*Every Man shall Camp by his Standard, and under the Ensign of his Fathers House, Numb. 2. 2.
Put on the whole Armour of God, that you may be able to stand against the Assaults of the Devil; above all take the Shield of Faith. Ephes. 6. 11. 16.*

By *Randle Holme*, of the City of *Chester*, Gentleman Sewer in Extraordinary to his late Majesty King *Charles 2.* And sometimes Deputy for the Kings of Arms.

CHESTER,
Printed for the Author, MDC LXXXVIII.

ACADEMY OF ARMORY OR A STOREHOUSE OF ARMOUR AND ELEGANT CONTAINING

The several variety of Created beings, and how born in Coats of Arms both Foreign and Domestick.

WITH
 The Instruments used in all Trades and Sciences together with their Terms of Art.

ALSO
 The Etymologies, Definitions, and Historical Observations on the same, Explicated and Explained according to our Modern Language.

Very useful for all Gentlemen, Scholars, Divines, and all such as desire any Knowledge in Arts and Sciences.

Printed by J. Sturges, at the Sign of the Gun, in St. Dunstons Church-yard, near the Temple, 1718.

By R. Wallis Holme, of the City of Chester, Gentleman, Secrer in Extraordinary to his late Majesty King Charles II. And some times Deputy for the Kings of Arms.

CHESTER,
 Printed for the Author, MDCCLXXXVII.

In Commendation of that Elaborate Piece of Heraldry, Intituled The Academy of Armes; Published by Sir Laurence Randle Holme, Herald in Chester.

M One but thy Sire can faithfully Express,
What vast Expence and Toyl brought Thee too Press;
The Expence so Great, for Numerous the Days,
As Thee to a due Estimate may raise:
Days did I say, nor Months, but Years, and those
Not few, tho' well Employ'd did Thee Compose.
A Work Herculean, in which thy Sire
Must Live always, tho' his Vital shall Expire.

H. Williamson, M.D.

In Commendation of that Ingenious piece of Heraldry, Intituled The Academy of Armes, and Blazon; Composed by my loving Friend Randle Holme Herald in Chester.

Some Strenuously their Wits do strain,
For the Alluring hopes of Worldly gain;
Many Sinister Ends that others make,
Of worthless Writings which they Undertake;
But this Unfolding th' Mystery of our Arms
In Heraldry, preserves us from the Harms
Which Ignorance, or dark Oblivion might
Involve us in, and make our Blazons Light.

J. Rock, Med.

In Praise of that Ingenious, and Chargable Piece of Heraldry, Composed by Randle Holme, Herald at Armes in Chester.

Kind Reader do so much as cast your Eye,
Upon this Precious Piece of Heraldry;
Here you may See, both High and Low Armes,
Likewise of Honor, and Mechanick Terms.
And other Things, (I may make Bold to say,)
That ne'er saw Light until this present Day.
Of all the Books that hereto hath been Writ,
There's none of Heraldry compar'd to it.

T. Tillier, Typog.

RANDLE HOLMES.

A N A G R A M.

Lo Mens Herald.

THis Title *Herald* which doth thee adorn,
Was given thee soon after thou was born.
The Priest e'en at the Font sure could divine,
When he bestow'd on thee that name of thine :
He then foretold thy Calling and thy Fame,
And therefore he Wove *Herald* in thy Name.
Now his Prediction thou hast fulfill'd,
In *Heraldry* there none is better skill'd.
Thou'st drawn a Patern, that may others teach,
What they may aim at but yet never reach :
The best may see portray'd before their Eyes,
A multitude of most rare Novelties ;
Which for a long time in abstruse did lurk,
But now appears in thy Laborious Work.
A Work needless of praise, to set it forth,
It self sufficient is to tell its worth.
The World's Indebted for thy great Expence,
Thou well deserves an ample recompence.
Thou hast out vi'd all those, writ thee before,
Succeeding Ages will thy Works adore.
I say but this, least I be said to flatter,
Thou art of all the best, *Caduceator*.
'Twixt *Mercury* and thee, there's but this odds,
Thou art *Mens Herald*, and he was the *Gods*.

By him who Eighty four years hath out worn,
Unfit for Rime, but more fit for his Urne.

Richard Blackbourne, Gent.

The Contents.

IN THE
ACADEMY
OF
ARMORY,
OR
STORE-HOUSE of ARMS.
In FOUR BOOKS.

LIBER I.

The First Book Treateth generally of the Rules of Heraldry as to the Honorable Ordinaries how they have been Anciently and Modernly termed, with the severall Ways or Methods of Blazon.

CHAP. I.

TREATETH of the Original, and Office of Heraldry, their Colledge, and Fees.

CHAP. II.

Treateth of Shields and Bucklers, their various Names, of what made, and the diverse Forms of them, how used: and what Colours have been used in them, their Signification, and worthiness of one above another, and of the points of an Escuchion.

CHAP. III.

Treateth of the Antiquity of Arms, and first Painting of Shields; the Colours used in Arms, and Rules of Blazon in General, and in Particular; with the severall ways of Blazoning of Arms.

Of the Honourable Ordinaries, and their Composition according to their severall Lines. As of the Chief, and its diverse ways of Bearing. Of the Pale; and Pile; the Gyron, and Canton; with their severall ways of Composition.

CHAP. IV.

Treateth of the Bend, the Bendlett, and Cost: The Fesse, the Barr, and Barrulett. The Escuchion, the Treasure, and Orle: With the Flanch, and Flaques, according to their severall Compositions.

CHAP. V.

Treateth of all Sorts of Crosses, that are in Arms and their Names by whom they are born.

CHAP. VI.

Treateth of the Cheveron, the Cheveronell, and the Couple Close: The Salter, and Frett: The Runlett, with its Terms answerable to the Colour. Of the Lofeng, Fusill, and Mascle. Of the Gutte, or Drop, and its diverse Blazoning. Of the Bordures, and their severall Compositions.

CHAP. VII.

Treateth of Furrs, and Tinctures of Fields, according to severall Forms and Shapes: As by Abatement, by Ordinaries, Per Pile, Pale, Fesse, Bend, and Per Cheveron. As also Tinctures of Fields by a twofold Ordinary, as Per Pale and Pile; Per Pale and Salter: &c. And also Tinctures of Fields by Obscure Ordinaries, as Barry Bendy: Lofeng: &c.

CHAP. VIII.

Treateth of the File, and Lambeaux: Of the bearing of Ordinaries, one upon another; Between one another: By the side one of another; and Commixt. Also of Ordinaries Diminishing one another; And Piercing, or Fretting one another.

CHAP. IX. & X.

Treateth of some Sorts of Bearings, which are Omitted in the Former Chapters. To all the foresaid Bearings, are set down the Name or Sur-names of such Families, as have such Charges in their Coats of Arms.

LIB.

The Contents

Also Tools belonging to a Pastry-Cook; and such as are used about Angling and Fishing, with several sorts of Nets, Hooks, and Decoying Wills. And in the end, those that belong to the Sope-Maker, and Sugar-Boiler.

LIBER

The Contents.

LIBER IV.

The Fourth Book Treateth of the Art of Blazon, both of Single and Double Coats, according as the Charges are interposed with the Ordinaries, or the Ordinaries with them; of Impaling, and Marshalling of Coats, according to the Degrees of Persons. Badges of Kingdoms; Orders and Processions of State, and at Coronations: The Solemnizing of Funerals, with Precedency of Persons.

CHAP. I.

Treateth of Coats of single Charges, and so proceeding to the Number ten: how Blazoned when Charges are in place of the Ordinaries, on, or between them: or if they be interposed with the Charges: or if confusedly commixt one with another.

CHAP. II.

Treateth of Examples of Coats, which have Variety of Ordinaries, and Charges, in one and the same Bearing. Also of Coats, which are Charged with Variety of Charges, without any Ordinaries interposing.

CHAP. III.

Treateth of the Marshalling part of Heraldry, which is to impale Coats together, as Baron and Femme; or according to the Functions of Persons, putting the Spiritual and Temporal Coats together. Also of Quartering of Coats, according to the number of Heirs Married withal; or else according to Coats by the Gift of Princes. And lastly, assigning to each Family his due difference, as there are branched out of the main stock, or House: giving such those Rebatelements of Honor, who have carried themselves according to their Significations.

CHAP. IV.

Treateth of the Adorning of Arms above the Escuchion, that is with Crown, Miters, Caps, or Hats, according to the degrees of Persons. Of the several ways Crests have been born, and in what, before the use of Wreaths: And of the variously contriving of Crests, contrary to simple Charges, of which there is set down many Examples, of things between; things pierced, and things held, or supported, by Crests.

CHAP. V.

Treateth of Beasts in several Postures, Arms diversly bended, Demy-Persons, and in whole, in various Actions: and lastly, several things mixt together for one Crest.

CHAP. VI.

Treateth of the Marshalling of Coats, by adorning them about, either with Compartments, Garters, Collars of Esses, Scarfs, Branches; or else on the side of the Escuchions, which is by Supporters, Swords, Feathers, Crostiers, and Crosses; or else by things under the Escuchion by Escrowles, Badges of Honor, and Emblems, of such Persons, Places, and Dignities. And in the last place, giving Examples of Mantlings, both Ancient and Modern, according to the Degrees, and Offices of Persons, whether Spiritual or Temporal.

CHAP. VII.

Treateth of several Forms of Supporters, composed of, and from divers Proportions; or Examples of divers Antique Supporters, drawn forth according to the Fancy of the Bearers.

CHAP. VIII.

Treateth of the Marshalling of whole Achievements, due and belonging to each Degree, from the Peasant to

the Prince; with all their Titles of Worship, Honor, and Dignity; with the Blazon, of all the Coats of the Nobility of England, in their several Degrees, with their Crests and Supporters.

CHAP. IX.

Treateth of the Badges, or Tokens of Kingdoms, whereby one is known, or distinguished from the other: the Ensigns, or Banners of all the European Kingdoms, displayed in their proper Colours: the Ensigns, or Coats or Seals, of the Cities and Towns Corporate in England: Blazoned; the Badges of Houses, as University Colledges, Halls, Inns of Courts, Abbies, and such like.

CHAP. X.

Treateth of the Badges of Princes, and Noble Persons, with the Tokens, and Cognizance of their Offices, Degrees, and Orders: both Military and Civil, Spiritual and Temporal. The Signs, Marks, and Tokens of Armies, distinguishing of Regiments, and Companies, that each Souldier may know his Leader and Company. Also the Coats and Cognizance of Trades, and Tradesmen; with the Mark used by Merchants, and such as Traffick beyond Seas.

CHAP. XI.

Treateth of the Orders, and Processions of great Persons Baptized, with the Ceremonies attending such magnificent Solemnities. Also of the Order and Manner of the Solemnization of Marriages of great Personages; several Presidents of such described.

CHAP. XII.

Treateth of the Pompous Progression, and Ceremonies of several great Princes, and Potentates, at their Inauguration, and Crowning; and of divers Kings and Queens riding in Triumph through the City of London, before their Coronations; their going to Parliament; with several other Processions of State, both in this Kingdom, and in other Foreign Places: with the Feasts and Banquets used at the time of such Ceremonies. Also of the Precedency of all Orders, and Dignities, according to their Office, and Place and Birth.

CHAP. XIII.

Treateth of Funerals for all degrees of Persons, as of Gentlemen, Esquires, Knights, and Barons; the manner of Foreign Funerals, both Ancient, and Modern; as Jews, Greeks, Romans, &c.

CHAP. XIV.

Treateth of the Funerals of a Baron, Viscount, Earl, a Bishop, and Arch-bishop; with Persons in high Offices, and Places of great Dignity; with the Form, and Descriptions of Hearses, Monuments, and Trophies of Honour set over them.

CHAP. XV.

Treateth of the Funeral of a Marquels, Duke, Prince, or any Great Potentate: the Forms of ther Hearses, with other Funeral Ceremonies, with which all is concluded.
Post Funera nihil.

IN LAUDEM AUTHORIS

READER observe, and here you'll plainly See,
The Labyrinthean knots of *HERALDRY*;

Clearly unt'y'd, and that laid ope to view,

Which other Writers but till now ne'er knew.

So that if e're you doubt, you need not look

In any other, but in *HOLMES* his Book.

Tho. Simpson, Jun.

*In Laudem operis Elaborati Patris Charentissimi Ranulphi Holme,
Nominati Academia Armorum.*

WHAT Art, Labour, Wit, Industry contriv'd,
In former ages is herein reviv'd;
Things long hid is brought to light again,
For the Lovers of Arts, them to attain.
By them Accepted will most kindly be,
Though others it contemn I plainly see.

FOR

Haply thy Appetite likes not that thing,
Speaks of Honor, and lasting Fame doth bring:
And apt to Censure that thou dost not know,
And to Carp at Faults, which are nothing so:
If this thou do, making it thy only end,
Know thou art neither Arts, or Learnings friend.

But an Ignorant, Empty, Brainless Sor,
Whose chiefeft Study is the Can and Pot.
If this be so, as nought else in't there may,
Then to your Works this Farewel I do lay;

Go thy ways Arts Book, and Feare no evill,
Envy'd by none, but Sons of the ☿ & ♀

Servus humilimus & filius tuus
Obedientissimus,

Ranulphus Holme, Jun.

T O

TO THE
Honourable the KINGS at ARMS,

WITH THE

Worshipful the COLLEDG of HERAULDS:

R. H. *Tonn Deputy for the County Palatine of Chester and Lancaster, with North-Wales; Wisbeth Prosperity and increase of Happiness.*

After I had read over several English Authors treating of this Subject (Heraldry); and weighing them altogether, I found there was a great deficiency in them as to those variety of Charges borne in Coats; which caused me to enter into some thoughts of an enlargement, especially in those things which I observed was never taken notice of by publick Authors: And this I was the more encouraged to do, having in those days the liberty of the Office, and other Libraries of that concern. Which endeavour though of many years search and industry in compiling, yet it comes far short of what is born in Arms: That which remaineth I must leave (as an addition) to more diligent Persons, and learned Pens.

BOOK I. CHAPTER I.

THE Word *Herauld* is a Term derived from the Saxon, *Here-hault*, or *Here-auld*; which is as much as to say an old Lord, or ancient Sir. Noting that he must be a Champion of an Army; a Gentleman of Quality, and an old experienced Man; else he cannot be admitted into so honourable an Order as this of an Herald is.

The Antiquity of Heraulds.

WE have it recorded in sacred Scripture, *Dan. 3. 4.* that in the Reign of *Nebuchadnezzar* King of *Babylon*, there was a Herald which proclaimed the King's Will and Pleasure. *Sir John Ferne* saith, *Glo. 158.* it took its beginning in the Reign of *Priam* King of *Troy*, in their solemn Plays of Wrestling, and other Feats of Activity, done in the Court of the said King, before the Greek Wars. But Heraulds were far more ancient than either of these: For among all Nations, ever since any Battle was fought, Heraulds and Officers have been appointed to see to the ordering of things belonging to Arms, and warlike Discipline; else there would have been nothing but Confusion, without Victory.

3. At the first they were certain Knights, called *Aunciers*, such as had served in the Wars 30 Years; at the least, who being sore bruised, lamed, and well steep into Years. Such were by Emperors, and Kings made the Judges of Martial Acts, and of the Laws of Arms.

4. We read that when *Julius Caesar* encamped before the City of *Carthage*, a Debate arose among his Captains, touching the worthyness of their Service upon the Enemy, every Man challenging the chiefest Honour as due to himself, because he had merited the best: Whereat *Caesar* being greatly astonished, but having pacified this Contention, to prevent the like inconvenience, established the foresaid Office, appointing two old Knights, to whom it was given in charge to oversee each Man's Doing and Behaviour in the Battle, that upon their Report and Judgment, the Emperour or General of the Host might be instructed how to reward them with Honour: And that from the Sentence of those Knights should no Man appeal, no not to the Senate.

5. From which Constitution and Order then begun, have our Officers, called Heraulds, by imitation, drawn their Function and Authority: They were by the *Romans* called *Feciales*, (*à fedore faciendis*) from their making of Leagues; and *Caduceators*, from their carrying of Rods or Wands, made of the branches of Palm, or Olive, writhen about with two Serpents; like to that of *Mercury*, whom the Poets feign to be the Messenger, the Herald and Interpreter of the Gods: Whose Rod is called *Caduceus*. The *Greeks* call them *Ceryces*, and *Trens-phylaces*, Guardians and Sequestrators of Peace; taken from the effect and issue of their Charge, which was to appease Differences by the way of Mildness, and to appoint Nations and Kingdoms Enemies, before they should proceed to handy strokes.

B

6. By

6. By the ancient *Ga ls* and *Britains* they were called *Bards* and *Druids*, who also carried their *Caducean* Rods, to shew that those sacred *Heraulds* or *Ambassadors*, were the Interpreters of their Princes Will and Pleasure. The *English* and *French* call them *Heraulds*, anciently *Herbault*, *Herold*, *Hyraud*, &c. Which *Stow* in his *Annals*, pag. 12. derives them from *Heroes*, *Noble-men*; such as excel in Vertues, Demy or Half-Gods: because to them was committed the office of making Peace, and proclaiming of Wars. And as *Upton* saith, they gave counsel without peril, for the which they were of all Estates had in Honour and Worship, their Persons were inviolable and sacred; to them no outrage ought to be done, neither any violence by words or deeds: Nay anciently they were held so sacred and reverend in account, that none was constituted thereunto, but such as were gentle born, and Free-men.

The Office of Heraulds.

7. **T**O the Office of an Herauld is requisite the skill of many Faculties, and Professions of Literature; they ought to be well known in several Languages and Tongues, to be of a mild and gentle Spirit, thereby to deliver either the Sovereigns peaceful Congratulations to Foreign Princes being at amity with him, or else the dreadful defiance and indictions of War, to those which do offer cause of Hostility; in which he is to shew Courage and Magnanimity.

8. They are to be expert and knowing in Martial Acts, and of the Laws of Arms, as in Conquests, Fields, Battles, Assaults, Roads, Combates, Tiles and Tournays, Encounters, Recountrings, Rescues, Challenges and Triumphs. They are to be present, as Judges, to assist the Earl-Marshall, and to be diligent in the observation of all actions of Nobleness; to record and register the merits of the Gentle, and Vertuous: As also to brand with infamy the disloyalty of Traitors.

9. They are to be well skilled both in the Laws of the Countrey and the Civil Laws; for that within the body of those great Volumns, lies scattered the Principles and Rudiments of the Laws Martial. Likewise it is most necessary that he be well read in the Books of Holy Writ, for the Office of a Judg, and a Herauld, do of all others come nearest to the Office and Ministration of a Priest.

10. And as to the Laws, so they ought to be well learned in History, to have the knowledg and antiquities of Nations and People: To see strange Countries, and to read the History of the World, to know the needful Forms and Ceremonies of Coronations of Kings and Princes, Creations of Noble-men, the Orders and Dubbing of Knights, making of Esquires: And in Royal Progresses and Triumphs, Princely Marriages, and Christianings; to know the difference of Robes pertaining to the Orders of Regality.

11. They ought to be exquisite in the noble art of Blazon, Painting and Limning: For the better ordering of Arms for such as the Prince shall enoble for their Vertue. As also to know the Nature, Property, and Condition of Birds, Beasts, and Creatures irrational, both on the Land, and in the Water: The vertue of Plants, Trees, Herbs, and Flowers: The Constellations of Heaven, with the courses and operations of the Stars and Planets. And from Heaven to descend into the bowels of the Earth, there to

apprehend the nature of Mettals, Minerals, and precious Stones; by whose intermixture they may learn the composition of Colours, which are all necessary for emblazoning of such Arms according to Art.

12. They are to be expert in the Marhalling and Solemnities of Mournings, and Funerals of the Nobles and Gentry; And for that end they ought to be skilful in the Coats of Arms, the Pedigrees, and Tribes of the Gentry within their Provinces; taking great care that one Gentleman do not bear the Coat of others: Lest thereby scandal do arise, and effusion of Blood do pursue. Therefore above all, they are (for that purpose) to be well known in old Deeds, Charters, Manuscripts, &c. the perfect reading thereof is requisite to find out hidden Antiquities, and to clear many doubts and scripples.

13. In a word, the Reader may herein perceive that the study of all Arts, Sciences, and Faculties, as well divine, as profane, noble, as ignoble, from the Scepter to the Spade, are to be known, and do all concur in the advancing the skill of Herauldry, to make an absolute and compleat accomplished Herauld, or King at Arms.

14. But alas! now a-days (saith my Author, *Theat.* 35.) this noble Science is so corrupt, and out of order; every office being bought and sold, that such as hold the places of Heraulds, are as ignorant and clownish as if they had never seen any thing: But are so impertinent and unskilful in the noble art of Blazon, and Painting, that they know not how to devise an honourable Arms for a Prince, or great Lord. For every Painter, Tricker, or a meer Blazoner of Arms, will not serve to make such an Officer; but that Man is an absolute Herauld, in whom is found the skill of many Faculties, and Profession of Sciences, and good Literature, and likewise the knowledg of War: Nay he ought to be such a Man as hath skill and knowledg in every thing. In as much as there is nothing but it is born in Arms, or comprehended in this Art or Skill of Herauldry.

The Colledg of Heraulds.

15. **T**HE Office of Herauld began to be respectively known, as also to be in great Honour and Authority, under the Reign of King *Henry* the Third of *England*, whose Court was more magnificent and full of splendour than any King of *England* before him: In the 50th year of whose Government (as *Spe-man* in his *Glossary* informeth) there was then set up a School of Heraulds, consisting of *Kings at Arms*, *Heraulds*, and *Possevanis*, which in succeeding Ages were thus distinguished.

I. **Garter**, *Principal King of Arms*, instituted and created with that Term or Title by *Henry* the First, King of *England*; whose office it is to attend the Solemnities of the Knights of the Garter, the Processions of great Estates, and to martial the Funerals of the greater Nobility, as of Princes, Dukes, Marquesses, Earls, Viscounts and Barons.

II. **Clarenceur**, *King of Arms* for the South-side the River *Trent*, stiled anciently *South-Roy*, but by King *Edmond* the Fourth created by the name of **Clarenceur King of Arms**, which before was only an *Herauld*. His proper office is to be at the ordering of great Estates, and to martial and dispose the Funerals of the lesser Nobility, as Baronet, Banneret, Knights, Esquires, and Gentlemen through the Realm, on the South-side the River *Trent*.

III. **Mort**

III. Norroy, or anciently *North-Roy*, whose office is the same to *Clarenceux*, for the North-side of the River *Trent*.

Heralds of Arms.

16. Besides the three *Kings of Arms*, there are six *Heralds* at this day, whose Names and Offices are, **I. Win-sor-Herald**, which Title was instituted about the 38th year of King *Edward the Third*, when he was in *France*.

II. Chester-Herald, instituted in the time of *Edward the Third*, King of *England*.

III. Richmond-Herald, came first to be instituted by King *Edward the Fourth*.

IV. Somerset-Herald, instituted by King *Henry the Eighth*, about that time when he created his Son *Henry Fitz-Roy*, Duke of *Somerset*.

V. York-Herald, instituted by King *Edward the Third*, in honour of his Son which he created Duke of *York*.

VI. Lancaster-Herald, instituted by *Edward the Third*, when he created his other Son Duke of *Lancaster*.

These inferior *Heralds* have no *Provinces* assigned them, as the *Kings of Heraldry*; nor any priority in their places, but are superior one to the other, according to the time and antiquity of their Creation. Whose office it is to be *Ministers*, and *Helpers* of the *Kings of Arms* in their office.

17. These are all the present *Heralds*, though in elder times we read of several others: As,

Guyon-Herald, instituted by King *Edward the First*, and continued to the end of *Edward the Third*: And so *Leopard-Herald of Normandy*. *Agencourt-Herald*, created by *Henry the Fifth*, in memory of the great victory he obtained against the *French* in those parts.

Ireland-Herald, which was by King *Edward the Sixth* changed into the Title of *Ulster-Herald*, or *King of Arms* for *Ireland*.

18. *Lion-Herald*, or *King of Arms* for *Scotland*, these *Heralds* pertained to the *Kings*, and in their several *Provinces*, were stiled *Kings of Arms*: But besides these there were other *Heralds* belonging to the *Nobility*, for *Dukes*, and *Earls* especially, who had their names from the Duke they belonged unto: As *Moubray Duke of Norfolk*, stiled his *Herald Moubray*. *Humphrey Duke of Gloucester*, and *Richard Duke of Gloucester*, called them *Gloucester-Heralds*. And so the *Earl of Pembroke*, *Pembroke-Herald*. *Charles Brandon Duke of Suffolk*, *Suffolk-Herald*: And *Marleone* his *Purfevant*. The *Earl of Northumberland*, *Northumberland-Herald*: And *Esperance* his *Purfevant*. So *Arthur Plantagenet*, *Viscount Lisle*, *Lisle-Purfevant*. And *Barton Hastings*, *Hastings-Purfevant*.

But our *Heralds* now being incorporated into a body, and made a *Colleged* by King *Richard the Third*, by Charter, under the great Seal of *England*, they have swallowed up all these inferior and domestick *Heralds*, as I may term them.

Purfevants of Arms.

19. With the three *Kings*, and six *Heralds*, there is joined four *Marshals*, *Messengers*, or *Purfevants of Arms*: And are *Ministers* to them in matters

of *Heraldry*, in the execution of their Places: Which are these.

I. Rouge-Croß, the first of all for antiquity, and is stiled so from the *Red Croß*, born by *St. George*, Patron Saint of *England*.

II. Bleu-Mantle, *Purfevant of Arms*, so stiled by King *Edward the Third*, in honour of the *French Coat* which he assumed, which *Mantle* was *blew*.

III. Rouge-Dragon, so stiled from the *Coat of King Henry the Seventh*, which was supported by a *Red Dragon*; which Title he instituted.

IV. Porcuëis, instituted also by *Henry the Seventh*; which was a *Symbol*, *Badg.* or *Cognizence* used by him.

20. Besides these, in the *Raign* of several *Princes*, there were *Purfevants* of other *Stiles*, but time wore them away to the four above-said. As,

Falcon, *Purfevant of Arms* in *Edward the 4th*, and *Henry the 5th*, and *6th* time.

Anelope
Wallingford } *Purfevants*, in *Edw. 4. H. 5. and 6.*
Cadran

Roseblanch, *Purfevant* to the Duke of *York*; with several others, which I forbear to name, as being nothing to my design.

If any desire a fuller relation of the *Herald's* antiquity, and office; let them peruse these following Authors.

Fees belonging to Heraldry.

21. *Heralds* are *Household Servants* to *Kings*, and *Princes*; in which respect they have their *Robes*, with an yearly *Pention* allowed them out of the *Kings Exchequer*, according to their qualities, which is all mentioned in their several *Patents* of creation, viz. *Garter Principal King of Arms*, 40*l.* per Annum: *Clarenceux*, an *i Norroy*, *Kings of Arms* 20*l.* each. Six *Heralds*, 13*l.* 6*s.* 8*d.* apiece. Four *Purfevants* amongst them all 93*l.* 6*s.* 8*d.*

22. At the *King* and *Queens Coronations*, at the Solemnities of their *Marriages*; or *Princes* and *Princesses*, at the *Baptizing* of their *Children*, and also at their *Obsequies*, and *Funerals*; they generally have amongst them the *Cloaks* and *Chaperons*, the *Gloathes* they wear, the *Canopies* of *Estare*, the *Cup* the *King* drinketh in; the *Childs Mantle*, *Swath-bands*, *Warming-Pan*, *Cloth of State*, *Pillows*, *Bafon* and *Ewer*: The mourning *Velvet-Pall* over the *Corps*, the *Hangings* of *Velvet*, or *Cloth*, in the *Rooms*, *Chappels*, or *Churches*; all which doth amount to a vast Sum. Also at the forefaid Solemnities; pertaining to *Joy*, the *Heralds* have a right three several times to cry *Largeſſe*, and throw *Medols*, or pieces of *Gold*, and *Silver* amongst the *People*, which is some benefit to them.

23. Also at the Creation of Noble-men, either of a Duke, Marquess, Earl, Viscount, or Baron, there is a Fee either of 5, 10, 15, or 20 Pounds, due to the Heralds, for taking their Names, Sir-names, Qualities; blazoning their Arms, and assigning them Supporters: Which is set down, and depicted in the Book of Nobility. And at the creation of a Baronet, making a Banneret, and dubbing of Knight, a Fee of 20 or 40 Shillings falls to their share; for which they record them amongst the number of such worthy and honourable Persons, with the blazoning of his Arms, and vertuous qualities.

24. Also at the installing or admittance of any new Officer into the King's Household, at their entrance into the same, the Heralds have a certain Fee, according to the quality of the Person, and Office. And if the King please to enoble any Person; or that inferior Men, by their Virtue, Learning, Valour, or any Industry, do attain to Honour or Magistracy; then a Fee accordingly of 10 or 20 l. is payable to them, for confirmation or granting such Coats of Arms, and registering them amongst the Gentry of that Shire, or Province, he or they live in.

25. But the Kings of Arms their principal Fees are those of the visitations of their Provinces; that is once in 20 or 30 years at the most, they ride through their part of the Kingdom assigned to them; where (in certain places most convenient) they summon in all the Gentry, as Baronets, Knights, Esquires, Gentlemen, and Free-holders, (or any whom he pleaseth to call before him) there to give an account unto them of their Family, Matches, Issues, Coats of Arms belonging to them, and their Title, as Esquire, Knight, &c. all which is registred or recorded, in a Book called the Visitation-Book for such and such a County, taken at such a time. For which registering, traveling Expences, and entertaining all his Visitors, the Kings of Arms, and his Marshal, demands from every Gentleman, 25 s. an Esquire, 35 s. a Knight or Baronet, 55 s. All which being summed up through the Kingdom, will amount to such a value, as may sustain them, with good husbandry, till the next Visitation; but that is seldom twice in one King at Arms's life-time.

26. Also at the death of every Gentleman, who was interred with Funeral Effcochions, or with Trophies of Honour, according to his degree; then the Heralds had a Fee, besides their Blacks, and travelling Expences, of 12 d. a Mile: Which Fees were anciently 20 s. for a Knight or Lady, 13 s. 4 d. an Esquire, 6 s. 8 d. a Gentleman, 5 s. a Gentlewoman, and 3 s. 4 d. a Citizen in Office, who was not a Gentleman of Blood, but enobled by his Office and Place in the Corporation. Which said Sums the Heralds received from the Heirs of the Defunct, or his Executors; for which said Fees, the Heralds are to take a Certificate (under their hands) of the time of the Persons Decease, place of his Burial, his Age, who he married, and when, what Issue he had, and the Coat of Arms of his Family; and to enter the same in a Book of Record, for benefit of Posterity: Called the Certificate-Book, for such a part, or County, of the Province.

27. But the Lords Commissioners, for regulating of the Court-Marshal, and for the better support and mainte-

nance of the Heralds, did in the year 1618, order a larger Fee for them, as a Gentleman, 3 l. 6 s. 8 d. an Esquire, 6 l. 13 s. 4 d. a Knight, or Lady 10 l. a Baronet and a Banneret, 13 l. 6 s. 8 d. of every Baron and Baronets, 25 l. of every Bishop 25 l. of every Viscount and Viscountess, 30 l. of every Earl and Countess, 35 l. of every Marquess and Marchioness, 40 l. of every Duke and Duchess, 45 l. and of every Arch-Bishop, 45 l. which Sums were afterwards taken of by the Parliament, in the year 1640, as an oppression of the Gentry, and Subjects of England; the Heralds now being content with their ancient Fees, with what more addition they can get, and what the nobleness of the Gentry, as a free Gift, are willing to pay.

28. There were also, in former time, when Combates, Tilts, and Tournayments were in use; and upon all Martial, and warlike Affairs, certain Fees due to the Heralds: But as they are ceased, so the Fees are lost with them. However, in short, take them as my Author delivers them, *Thes. lib. 1. cap. 4. fol. 33.* In the days of Tournays and Combates, the Combatants stood obliged to give to the Heralds all that fell to the Ground, and all that was carried between the two Lists, during the Combate, (except the Book whereon the Challengers and Defendants took their Oaths); after the Combate is ended, the Victor is to give a *Largesse*, that is to say, casts the Herald a Crown, or more in Gold, or Silver: Also all the Arms and Ornaments of the vanquished, belong to the Officers of Arms, and the Lists likewise, with the Chairs, and the Cup wherein the Combatants drink to each other, with Horse, Armour, Arms, Plumes, Bards, Chaufrains, Caparisons, and other Ornaments of War: And whatsoever is desired to be redeemed, by either party, is to pay the Herald the just value of them.

See more of this Subject concerning Heralds, of their Name, Antiquity, Creation, Number, Office, Colledg, Priviledges and Fees: In these Authors,

TO THE
MAYOR, RECORDER, and JUSTICES;

THE
Sheriffs, Aldermen, Gentry, and Counsel, with the rest of the Citizens :

OF THE
Honourable and Loyal City of CHESTER.

When the whole Kingdom was on Fire, through an home-bred War, and each took up Arms for the defence of his Place, and Person; altho tender Age made me incapable of that Action: Yet then it was my Study to follow my Predecessors in that way which tended to Marshal (as well as Civil) Discipline, viz. Arms, and Herauldry. Whose Endeavours (as a lover of, and a Free-born Citizen) I do humbly present to all the Loyal, True-hearted, Inhabitants; with my Prayers for the prosperous and flourishing Estate thereof: Whose Servant in all things I am. R. H.

C H A P. II.

A Shield, or Buckler, is an offensive (in some sense) and defensive Arms; by which we dint and blunt the edg of our Enemies Sword, and keep our Bodies from Blows and Wounds.

Names of Shields.

2. **T**HE Latines gave several Denominations to Targets, Shields and Bucklers, according to their use, as,

Albojia, Shields or Targets.

Clypeus, a Shield, Target, or Buckler, used by the Footmen only: So termed from its painting and engraving.

Scutum, is also a Target or Shield, used especially for an Horseman.

Ancile, a Shield without Corners.

Pelta, a Target, or Buckler, like an half-moon, used by Footmen.

Cetra, is a light Target, whereof the Poet maketh mention: *Levum cetra tegit.*

Parma, is also a Target, or Buckler, which Footmen use.

But the English give the name Target (or Tergate, as some write it) from the British word *Tarian*; and the French *Thiros* which as *Pausanias* saith, is the Buckler in use amongst the old *Gauls*.

3. An *Escutcheon* is the form or representation of a Shield, and is so called from the Latin word *Scutum*,

which hath the same signification: Altho the Target is not unaptly deduced from the word, *Tergus*, a Beast Hide, whereof at first Shields were made, or covered; upon which in after Ages, every Warriar had a device drawn by which he might be known, and this he called his Coat of Arms.

Shields of what anciently made.

4. **S**hields, or Bucklers, at first were made of Osters, or Twigs woven together, and then covered: Sometimes they were made of Wood, or the large Scales of Beasts, or Fish, as of the *Rhinoceros*, the *Tortois*, and such like. But they most commonly were made of raw Oxe Hides, or pieces of Leather doubled, (as *Ovid* saith); for *Ajax* had a seven-fold Buckler; and that *Achilles* had one was ten, and that done over with Brasse besides: As also elsewhere he describes a Target, *duo tauræ terga*; they were made of two Oxe Hides. Whereupon *Pliny* saith, *Tergus ad scuta galeasque impenetrabile*, an impenetrable Hide fit to make a Shield. And the Poet *Statius* saith, *Cæsis clypeos vestire juvenis*, that with Bullocks Hides they clad their Shields. The *Carthaginians* were wont to make their Targets of beaten Gold.

The

The several sorts of Shields of Arms

5. **I**t is a common Saying, in relation to our first Parents, in the contempt of Shields, Arms, and Gentry: That

*When Adam Digg'd, and Eve Span,
Who was then the Gentleman?*

Albeit there doth from thence arise no degrees of Gentry, and Noble-Blood, or Coat-Armour, as our Armourists, *Ferne* and *Gwillim* set forth, viz. from the Spade and Spindle: Yet from thence we may gather the Antiquity, the Forms and Fashions of Shields and Targets; which was the first degree, and from whence Nobility did arise.

I. *Adam's Spade* then we must set down for the first and most ancient form of a Shield, whose bottom sheweth the making of an Escutcheon, being a *Spade*.

II. *Eve's Spindle*, being the form of a *Spindle*, is the second sort of Shield, by which mankind is generally saved, and preserved from the furious strokes of Frost, Snow, and cold Winds. Now, as these two plead antiquity above all others, so they continue to this day for the same defence, and without which neither Prince nor People can be in safety. For saith *Solomon*, *Eccles. 5. 8. & Prov. 31. 19, 21, 22, 23. The King is maintained by the Spade; and the Spindle procureth the Woman's honour*: Perhaps to denote that Mans Achievements is to be gained in the Field; because he was formed there; and the Honour of Woman to be at Home, she being formed in Paradise.

III. But those Shields pertaining to War, this third Figure is presented to us for the ancientest fashion; of which the Poets make mention in this wise: King *Phocus* had three Daughters, *Medusa*, *Stena*, and *Enuale*. *Nepheus* God of the Sea, committed Adultery with *Medusa* in the Temple of *Minerva*; who in revenge thereof turned the Adulterers into an ugly monstrous shape, and her golden Hair into loathsome Serpents: *Minerva* yet seeking farther revenge, sought by all means how she might take away this Monsters life, gave a Christal Shield to her Lieutenant *Perseus*, the *Paladian Knight*, wherewith when he had slain the horrible Gorgon *Medusa*, consecrated the same Shield to the Goddess *Pallas*. This Shield (the very pattern whereof is presented to your Eye) was taken out of the City of *Troy*, about the Year of the World 1774, and before the Birth of *Christ* 1189 years.

This Goddess *Pallas*, taught to the *Libians* all things appertaining to War: So that I take her to be the Goddess of Heraldry and Arms.

IV: This is by some Authors supposed (may set down) to be the true form of *Minerva's* Shield: which she gave to *Perseus*: But whether so or not, I will not dispute it, however they may be taken one for the other, as having a near resemblance.

V. It is written of one *Asterial*, the Father of *Olibion*, who made a Target or Shield for his Son, when he warred against the cursed Seed of *Ham*, who greatly troubled them; this Shield was made of an Olive-tree after this form, two corners above his Face, and one to the groundward, in token that he was the chief of the Blood of the three Sons of *Noah*: This Shield was used some hundreds of years after the Deluge.

VI. This is the form of the Shield used by the People that now inhabit *Mesopotamia*, otherwise of the Frenchmen called *Dier-bechias*: They of old have used this fashion of Shields, which (is thought) was from the *Trojans*. It was brought into *England* by the Ancestors of us English-men, when they came out of *Germany* into *Britain*; which was about the year of our Lord 450, as *Verstegan*, in his Book of Antiquities, pag. 117. maketh mention: These People were descended of *Gomar*, whose Posterity used it in the figure before.

VII. This is a kind of Target used by the *Catalines*, whose Leader was that worthy Captain *Catulus* that subdued the *Cimbrians*, which was 10 years before the Birth of *Christ*: This noble man reproved *Silla*, for killing of a 1000 Prisoners when he had given them their Lives in the Battle; saying with whom shall we live, if in War we kill the armed, and in Peace the unarmed: The People of the Isle of *Sardinia* used Shields of this fashion, who hardened them so by art, that they were impenetrable by Sword or Lance.

VIII. The round fashioned Shield, we read of in Holy Scripture, *1 King. 10. 16, 17. That King Solomon caused to be made 300 of beaten Gold, 600 Shelds of Gold next to the making of one Target*: Which Targets or Shields were taken away from *Jerusalem* in the first year of *Rehoboam*, by *Shishak King of Egypt*, when he took the City of *David*; instead of which Shields King *Rehoboam* made Shields of Brass, *1 King. 14. 25, 26, 27*. The old *Britons* used Shields after this form, and was of them called *Parma*, (*quia a medio in omnes partes juxta*) being equal in all parts from its Center, like a Buckler.

A King *David* furnished a Tower with a 1000 of them, and depicted the Arms and Devices of Princes on them; as Sir *John Ferne* testifieth, in *Lac. n. bil. pag. 76*. which round form, is in Blazon called a *Roundlet*, which is a mark of better Dignity than some take it to be.

IX. Shields of this fashion were used by the People inhabiting the Isle of *Sardinia*, called *Sardalaries*: This People did, by art, so harden their Shields (which were made of the wood of *Saunders*) that they could neither be cut with Swords, nor pierced with any Spear or Lance whatsoever.

X. This is that kind of Shield, which belonged to the most renowned Prince, *Edward Prince of Wales*; whose Tomb is in the goodly Cathedral Church of *Canterbury*, (as saith Mr. *Bolton* in his *Elements of Armory*, pag. 67.) there (with his quilted Coat-Armour, with its half-Sleeves, tabered fashion, and his triangular Shield, both of them painted with the Royal Arms of *England*) hangs this kind of Pavise or Target, curiously embossed, and painted with the Escutcheon of the Arms of *England* in the midst thereof, which I omit and only give you the bare shape and form of the Shield of this victorious *Black-Prince*, for so was he commonly called: He died 1376.

XI. This is also another kind of Shield, used by the aforesaid *Sardinians*, spoken of in the ninth form of Shields.

XII. This kind of Shield was used by the Ancestors of the aforesaid *Edward the Black-Prince*, as *William* the Conqueror, *William Rufus*, and *Stephen Kings of England*, as our Chronologers and Antiquaries testify; who lived in and about the years 1066, and 1200; it may be called an Oval-Escutcheon Shield.

I find the Description of another such-like Shield as this, in *Speed's Chron. fol. 455*. only it was not so round at the top,

top, but flat and then comes with a turning instead of the two Corners: It was much used about King *Henry* the Second's dayes, Anno 1175.

XIII. This Shield was used by that valiant Captain *Antoninus*, a brown man of colour, and very hardy, and of an undaunted Spirit; who married the famous *Cleopatra* that Royal Queen of *Egypt*. Amongst other of his victories he took the King of *Armenia*, and tyed him in bands and fetters of Silver. He lived about the year of the worlds Creation 3900.

XIII. This Shield hath a near resemblance to the president before, which was used by *Antoninus*. Shields of this fashion were in use in *Asia* and the Eastern parts of the world; But when or where my Author is silent.

XV. This Shield may pass for a Cousen removed to the two next figures of Shields following it, Being likewise (as is by some Authors) supposed to be another kind of Shield used by the *Coribants*. For it may not be thought, that all the People of one Kingdom had all their Shields and Bucklers alike, but that there may be some variation; as we may see by theirs in the *Roman* Empire.

Note, Here the Engraver hath omitted the figures 16, and 17, so that I must begin the next form of Shields at 18.

XVIII. This is a form of Shield which is near 3999 years since it was first used; for *Jajius* who was King of *Italy*, had a Son that succeeded him called *Coribanti*, he called his People after his own name *Coribanti*, who used these kind of Shields with two Darts; and by the strength of their Arms would cast them very violently.

XIX. This form of Shield was used by the *Cimbrians*, *Ambrians*, and the *Teutoni*, which came to inhabit the west parts of *Italy*. *Justus Lipsius* hath delivered it upon his credit, that this is the true Portraiture of those kind of Shields. And besides this his Testimony, we do find upon the ancient *Roman* Monies this Impression of a *Cimbrian* *Parvis* or Target; which shape answers *Virgil's* Description of the *Gallies* Shields, in this his three quarter verse,

Scutis protegit corpora longis.

XX. The *Romans* used their Shields in the form of Ovals, much after this manner; and the Inhabitants of *China*, do display their tokens of Honour and Arms in Shields or Escochions, made after this manner; as *Martius Velserna*, a learned and principal Gentleman of *Ausburg*, hath declared for an absolute Truth. The like hath one *Josephus Acasta* diligently noted, that the Nobility and Gentry of *Mexico* and *Peru*, have their Arms in Escochions after the form of an Oval which gives us to understand that the Shields heretofore used by them, were after the same fashion.

XXI. The *Romans* in their Barriers, and Plays, had Shields and Bucklers after this form. As *Justus Lipsius*, in his *Saturnalianum Sermonum*, lib. 2. cap. 4. relateth, and is thereby figures (in Copper Cuts) expressed.

XXII. This form of Shield, as Authors say, was used at the Siege of *Troy*, by the *Trojan* Horsemen that then were clad all in Mail-Coats, having one of these Targets fixed before their Breasts somewhat toward the left Shoulder. In the Reign of *Numa* King of the *Romans*, there fell a Shield out of the Air, which is said to be a Shield without Corners, so that I cannot discern (saith *Leigh*, pag. 20.) but it might be after this form and fashion.

XXIII. This form of Shield, I find by some Writers to be used by the aforesaid *Trojans*; and also by the *Romans* in their Saturnal Sports: As *J. Lipsius*, lib. 2. cap. 21. describeth them.

XXIV. This form of Target is much between the two former, and was given me by an Acquaintance, a lover of *Heraldry*; but no time mentioned by him when, or by what kind of People used.

XXV. This form of Shield appertained to *John* of Gaunt, the King of *Castile*; and *Lion* Duke of *Lancaster*, &c. who was third Brother to the most victorious *Edward* the Black-Prince, eldest Son to King *Edward* the Third.

This honourable Shield hangs at the Tomb of the said Duke, in *St. Paul's* in *London*, (as *Ducdale's* History of *St. Paul's* testifieth, fol. 90.) and *Mr. Bolton* in his Elements of Armory, pag. 68. where 'tis very exactly drawn out for the benefit of future Ages.

XXVI. This form of Shield is far different from any of the former, and was found engraven in the Column of *Antonius*, at *Rome*; which Column was raised long before *Constantine* the Great was born, which is now near 1378 years: Which shews it to be of great antiquity and standing. *Justus Lipsius* (as saith *Mr. Bolton*, pag. 148.) thinketh that the Souldier which beared this Shield was a Captain, and Commander of a Legion, being made out of two parts: And his reason was, because an Eagle display'd having two Heads was figured upon the same, signifying that two parts of Eagles seemed (as it were) to be joined in one entire Body; or two broken Legions made into one.

XXVII. This was the fashion of the Shield, depicted by the *Saxon's* God of Battle, named *Woden*; who was whilst he lived, a most valiant and victorious Prince, and Captain of the ancient *Teutonicks*, inhabiting a part of *Germany*, who after his Death erected his Image in honour of him, which like to other Heathenish People they adored as a God, and our fourth day of the Week, they called by his name *Woden-day*, now *Wednesday*, dedicating it to his Service; (as *Veslegan*, pag. 72. relateth) which by computation of time is above 1800 years since.

XXVIII. This is the Shield of *Osyris*, otherwise named *Jupiter* King of *Egypt*, which for antiquity is not inferior to any; for this *Osyris* lived not many years after *Noah's* Flood, in whose time this kind of Target, and the other following were invented, (as my Author *Dionorius Siculus* tells) which is from this time near 3800 years.

XXIX. This was the shape of the Shield of that valiant Souldier *Anubis*, Son of *Osyris*, surnamed *Jupiter the Just*, of the Off-spring of *Ham* the cursed Son of *Noah*: Which said *Osyris* (as the aforesaid Author saith) being plentiful of Children, and by reason of the Curse fallen upon his Father, was banished from the blessed Tents of *Shem* and *Japhat*, and constrained to win himself and Children a dwelling place, in which War this form of Target was used, on which were painted signs and figures of Birds, Fish, and Beasts, or what the bearer pleased, and thought best to fit his Estate and Condition: Which signs were after called Arms. This form of Target by ancient Blazoners was called a *Sarcote*, but upon what grounds I know not.

XXX. In the time of *Numa Pompilius* this form of Shield was used, (the Story take thus) in his time there happened a contagious Sicknes amongst the *Romans*, which no Sacrifice could remove; and at that time there fell a cer-

tain,

rainbrazen Target, or Escochion (called in Latin *Æneaspelta*, or *Antile*, big at both ends (after this form) and cut like a half Moon on both sides) from Heaven into Numa's Hand, with a certain Voice, promising all Health to Rome so long as they could keep that safe, &c. Read the farther prosecution of the Story in *Goodwin's Antiquities of Rome*.

XXXI. This Shield is in fashion like those used by the *Greeks* at the Siege of *Troy*; and was also in after Ages used by them, and among the *Morisco* Horsemen: Which is born by them in such sort that it is a good defence for their Bodies, for it guardeth the Breast, and left Side, with the Head and Shoulders, which generally lies most open to the assaults of an Enemy.

XXXII. This is another fashion of the *Morisco* Targets, and is for likeness as the aforesaid, only this difference, that being a kind of a half round, this flat or straight.

XXXIII. This is said to be the *Roman* Souldiers' Footmen's Shield (as some give it forth) but I rather take them to be the Shields of the Knights Templars: And so I have seen several of their Monuments with Shields of this manner of form on their Arm, and before their Breast, bending as it were half round. See *Weever's Funeral Monuments* or the Diocels of *London*.

XXXIII. * Though Shields were at first used by Horsemen, yet since their first Invention, they have been much used by Footmen, which were made of a longer size, than Horsemen could well manage; for short ones were best for them, and long for Footmen: Which did contain near six foot long, and two foot in breadth. For the largeness of these kind of Shields, we have many Examples in ancient Histories; for Sir *John Frayart*, who writ of the great Battle of *Poitiers*, fought by the Flower of Chivalry, *Edward*, surnamed the Black-Prince, who commanded the Body of the Lord *Richard Duras* should be laid on a Shield or Target, and that five Men might bear the same to the Cardinal of *Peregrine* for a Present, &c. And in the latter end of the Reign of King *Edward* the Third, the Frenchmen to save themselves from the liberal Shot of the English Archers, had Shields made of Elm-wood seven foot in length, and three in breadth, and an Inch in thickness, which were made sharp at the point to pitch into the Ground. Yet Mr. *Bolton* is of Judgment that the Shields there spoken of, were of the shape and fashion of the 10th Figure in the Copper Plate, before shewed. But for the largeness of Shields several Histories make mention (as witnesseth that of *Alexander* the Great) for his Shield was so great, that it served him instead of a Boat, to carry him over a great River, when he went against the puissant King *Porus*.

XXXIV. This form of Shield I found drawn in an old Manuscript, written about 200 years since, but by whom it was used or first invented, I find nothing: Yet (in my Author's Judgment) it is not inferior to any for the defence of the whole Body, either being on Horse-back or on Foot; for the top is (like the Bever of an Helmet) with holes through, to see how to offend an Enemy, or defend his own Body: Likewise the bottom is so contrived, that the Bearer may either set his Foot forward or backward to his best advantage, and yet be a sure guard and defence for those parts.

XXXV. And XXXVI. These were Shields used by the ancient *Romans*, and were first invented (as *Just. Lipsius*, l. 1. c. 8. and others believe) for their exercise in their Saturnal Sports and Plays; and after used for defence against

their Enemies, both in Battles, single-Deuels, and Combates: The latter whereof they took much delight in, never accounting him a Man worthy of Honour, till he had vanquished or slain one in single Combate.

XXXVII. This is also another fashion of a Target, used by the aforesaid *Romans*, and is described to us by *J. Lipsius*, l. 1. c. 8. in his *Saturnalium Sermonum*, with Figures also of them engraven on Copper Plates: Beside him, if any one desire further satisfaction herein, and of their Laws, Sports, and Exercises in Feats of Arms, with their divers sorts of Weapons: They may peruse the Book entitled, *The History of the Roman Customs*.

XXXVIII. This sort of Shield was of no small account amongst the *Romans*, whereas it hath a rebatement on the one side of it, so was it their use and custom to rebate it (according as the Warrior was either right or left handed) on that side as was most suitable thereunto, and this they did only by altering of the Handle, and Arm-stay, on the back-side of it; as is seen in the 63d and 61st Figures on the Plate belonging to this Chapter.

XXXIX. This form of Shield, is of the *Latins* called *Tessera*, and at this day (using the *French* Term) we call the same a *Lozenge*, which Word (of *Latin*) doth signify any thing four-square, being born with the two sharpest points, one above, and another beneath: But this fashion of Shield was long agoe out of all use in Wars, because of the unfitness of its service, it being the least and worst of all Shields, for a Souldier's use, either to offend his Enemy, or defend himself.

Therefore it is set a-part, and allowed only for Maids, Heir-trixes, Co-Heirs, and Widdows; also to Women descended of Noble Blood, that on them they may set forth the Arms and Ensigns of the Houses they proceeded from: Women being a Sex, unfit for War or Battle, of whom we shall speak more hereafter.

XL. This is the fashion of the *Chinense's* Shield, being a long square; with which, a Dart, and Curtle-Axe, they hold themselves well armed: And this is used altogether in the whole Empire of *China*.

XLI. This form of Shield is used by the People of, and about, the *Friggid Zone*; called the *Ice-land* and *Lap-land* People: And beside that for the defence of the Body, against the shot of the Enemies Arrows (for in those places Shooting is altogether in use) they served also for other purposes; for they are made after such a manner, that they will transport the Bearer over a River, Pond, or any other place of Water.

XLII. This form of Shield, I find was used by some of those *Roman* Legion Souldiers, which lived in the time of King *Herod*, who under the *Roman* Empire, exercised power and authority over *Judea*, and the unbelieving Jews, whom God cast off to the hardness of their own Hearts: This *Herod* lived in the time of our Saviour's being upon Earth. And also in the first Persecution of the Church of Christ, in his Members the Apostles and Disciples, which is from this time, near 1680 years.

XLIII. This is the form of the Shield used by the *Indians* and *Moors*, a rude and barbarous People on the borders of *Asia* and *Africa*; and is to this day used by them, they being as yet but little acquainted with the Gun: Their fighting is with Swords, Darts and Arrows. This kind of Shield is four-square, but made after such a manner, that it turns half round, as if it were a defence only for the Breast, and no more.

On Squares, especially in quartered Coats of a Family, we of the western parts of the World, do depict or paint our Coats of Arms.

XI IV. This is another sort of Shield, I am informed doth belong to the *Indians*; and especially to him that is of any authority among them, as being their Head or supreme Governour. Whether this be so I dare not aver; but this sufficient Authors affirm, that the *Amazonian Women*, in imitation of *Diana*, the Goddess, or Patroness of Women, were armed with Moon-like Shields, and were buried under *Lozenge* Monuments.

XLV. This is a form of Shield used by the Inhabitants of the Island of *Japan*, in *America*, as Historians do inform.

XLVI. This is the shape and fashion of the Shields used by the Inhabitants of the *West-Indies*, or *Guinny-Islands*.

XLVII. This form of Shield (as I was informed) be longeth to the Knights-Templers; but the truth thereof I will not verify: Because I have seen Monuments of Knights-Templers, whose Shields are much after the manner of the English Foot-men's, described in the Plate, under the two 33 Figures; only this difference, that the Knights-Templers were half round; and the English and French Shields were straight.

These three foregoing Targets were shewed me by a Traveller, and a gatherer of Rarities, who lived near *Fix-Hall*, over against *Westminster* in *South-wark*; (with another Shield like to the 31st Figure in the Plate) which he said was also another form of Shield belonging to the Knights-Templers. But by his favour, in this, I shall not take his Word.

XLVIII. This kind of Shield, I find fixed on the Monument of *Mahomet* the great Emperour of *Turkey*; who was the greatest Scourge to Christendom of all that had been before him; for he subdued *Mentesia*, *Peru*, *Pelesonesus*, and *Castrin*; wone *Constantinople*, overcame *Craia*, took *Orta*, and so going against the *Caramanian King*, died: To whose Memory, they of his Empire erected a Monument, by whose Side this kind of Shield was placed, (with a great Battle-Axe in his Hand) having thereon the Arms of his said Empire: Which was done in the year 1481. But whether this was a Shield used by him, or the fancy of the Workman, I leave others to judge.

XLIX. This is also the Shield of *Tamlerlain* Emperour of *Tartaria*, called the *Wrath of God*, and *Terror of the World*: He overthrew, and took Prisoner, *Baiazet*, the Great Emperour of the *S. Russians* and *Turks*, whose Army consisted of 100000 Men, and shut him up in an Iron Cage. He also conquered *Mesopotamia*, *Babylon*, and the Kingdom of *Persia*. He died, as some affirm, in the year 1402. After whose death his Statue was erected, with this Shield by his left Side, and a Truncheon in his right Hand. But (as to the former Shield) so to this, a question may be made, whether such an one was used by him, or only the Invention of the Cutter? If so, then the shapes and forms of Shields, Targets, and Bucklers, would be as many as Carvers, Stone-cutters, Engravers, and Painters please: the variety whereof it is impossible to describe; neither is it my intention, but only give such forms as have been in use by People and Nations, as they have been delivered to us by good Authors, and Men of credit.

I. This represents the form of Shields for Footmen, before described, *Numb. 33*: * I save this hath an oval-like hollowness, or vacancy on the right side of it; through

which, I suppose, the Archer had a liberty to send forth his Arrow, or Souldier to manage his Spear: These were used by the ancient *Saxons* in their Wars near 1000 years since.

LI. This form of Shield, I had out of Mr. *Morgan's Sphere of the Gentry*, l. 3. fol. 54. which he tells me is a form of *Pelta*, or a Shield gathered out of old and decayed Monuments: *Et larva Amile gerabat*, according to *Virgil's Æn. lib. 9*.

LII. This (as the French Armorer informs me) was a kind of Target used by the ancient Romans: But this I take to be a Workman's device, as well as many others, which were never really in use for War.

LIII. Mr. *Dugdale* in his Description of *Warwickshire*, fol. 434. gives me the form of this Shield, which was taken from a Monument, in a Glass-Window, in the Church of *Compton-Murdock*, with these Arms, *Gules besantee a Canton Ermin*: Which Glass-Window shews great antiquity, even to the time of *Edward* the third, above 300 years old.

LIV. This is the form of the Shield of the Earl of *Flanders*, as is described by *Peter Balthazar*, in the *Lives and Genealogies of the Earls of Flanders*, fol. 67. where he sets down the Effigies (with this shape of Shield) belonging to *Baldwin de Bonnaire*, the seventh Earl, who lived about the year 1006.

LV. This is a form of Target, which is set forth by a French Armourist, to be the Shield of *Sir Bruor le Noir*, one of the Knights of the Round-Table, to *King Arthur* of *Britain*, above 1100 years since.

To the aforesaid fifty five, may be added these two, which I took out of *Sir John Ferri's Glory of Generosity*, p. 154, 155. which he presents there as an ancient form of a Shield.

This (by old Heralds) was termed a *Cabard*, a kind of Shield resembling or representing a Garment, which in old times was worn of the Female Sex: And in that form of Shield it was thought fit that Women should have their Coats of Arms depicted.

And here I shall conclude the forms and fashions of Shields; with the advice of *Sir John Ferri*, in his *Lacies Nobility*, p. 76. (though *Leigh* makes but 9 fashions, and I have produced 57.) Yet I am not so wedded to that opinion as to think there is no more, for there is no Kingdom, People, or Country, but they have their several forms and fashions: So that for 57 we may reckon up fifty times fifty seven; for as Men have altered in their civil Apparel or Vestures, so have they in all Ages, as phantastically, in their forms of Shields, Targets, Bucklers, and Escutcheons.

6. These aforesaid Shields, or the most of them, which were used by the private Souldiers, were generally plain, without any Work or Embellishment, till by their Swords they had merited some Honour, whereby they were advanced to higher places; then had they devices, and tokens of Honour bestowed upon them by their Sovereign: the

the General, or his Vice-Roy: Which token they bore on their Shields, as a reward of their adventurous and noble Acts, which being continued by their Successors; at length became Hereditary.

7. Notwithstanding I have seen Shields of that form and make, as have by Plates, Studs, Embossments, with other curious sorts of Workmanship made upon them, both in Steel and Brass, as hath made them look very lovely in the Beholder's Eyes; as the examples shewed by these following Figures in the Plate.

LVI.

LVII.

LVIII.

LIX.

LX.

LXI.

All which doth manifest, how Shields (which had no Device, or Coat of Arms depicted on them) were adorned in former time.

How Shields were used for a Souldiers Defence.

8. Every Shield had upon the back-side of it a double buckled Leather, through which they put the Arm and the Hand, which kept it stedfast to the Arm; and so, through the active use of the Shoulder and Elbow, it was managed too and fro according to pleasure: Those Shields or Targets which had double stays for the Arm and Hand were for Horse-men; but such as had only one handle were Bucklers for Foot-men. As the Figures doth manifest.

LXII.

LXIV.

LXIII.

LXV.

} Foot-men's Bucklers with one Handle.

} Horsemen's Shields with two Stays

And these Shields and Bucklers thus supported, were by the Bearers thereof so managed, that by the skill and dexterity of the Souldier, he was able to ward and defend his whole Body from all the Blows of his Enemy. Blows being over it was cast upon the Back, where it hung by a Leather Girdle.

Of the Colours of Shields.

9. They were for the most part of one Colour (if they were plain); and the reason thereof was, that till some Feats of Chivalry were performed, Devices were not to be put thereon: And that they were before that time of one Colour is apparent from ancient History. For King Solomon made 200 Targets of beaten Gold; and that 600 Shekels of Gold went to one Target: And also that he made 300 Shields of beaten Gold, and that three pound of Gold went to each Shield, 1 King. 10. 16, 17. These were Scuta, Escochions, or Targets for Horse-men; and the latter Pelts, or Bucklers for Foot-men: As Boswell in his *Armory of Honour*, pag. 19. explains it.

10. Alexander the Great (as *Justin* writeth) in a certain triumphant Journey of his, bestowed Shields of white Plate upon his Souldiers. In the Prophecy of *Nahum*, amongst the Books of Holy Scripture, it is said, *Nah. 2. 3.* that The Shields of the Mighty are become Red. And our Saxon Ancestors used to cover their Shields with tann'd Hides, which are generally of reddish Colour,

11. We find also that the *Grecians* used Ruffet Shields; the People of *Lucania*, in *Italy*, had their Shields wrought of Oliers or Twiggs, and covered over with Leather. It was the manner of the *Scythians*, *Medes*, and *Perians*, to have their Shields of red Colour, to the end that the effusion of their Blood should not easily be discovered (when they received any Wound) either to the discouragement of themselves, or animating of their Enemies. Moreover, they used Scarlet, and red Colours in their Military Garments, and Shields, to the end they might thereby strike the greater terror and astonishment into the Hearts of their Enemies.

12. I find in a Note worthy of credit among the Arms of several Nobles and Gentlemen that attended on King *Henry the First* (in his expedition that he made into the parts of *Scotland*, to the Siege of *Kalaverock*) that one *Eumenius de la Brete*, did bear in his Shield only *Gules*.

To bear nothing in a Shield is now accounted dishonourable, though the Heralds of old were esteemed ingenious that gave the Field *Sable* to Gown-men; the Field *Gules* to them in favour, rich, and honourable: The Field *Argent* to Divines and Innocent Persons. So the plainer the Coat, the nearest Antiquity; the simpler the form, the more gentile the Person.

13. Yet after Ages conceived it convenient, by outward marks, signs or tokens, to be set on Shields, thereby not only to distinguish the Bearers thereof as well one from another, but also to denote the Honour and Quality of the Person bearing it.

14. Our ancient *Britains* (besides other their Ensigns) had their Shields painted Blew: Perhaps (and as some do conjecture) because the Isle is invironed with the like coloured Ocean. So were the Shields of the German *Arri* (as witnesseth *Cornelius Tacitus*) painted Black.

15. And that this general way of bearing Shields of one Colour, was not only to the Souldiers, but we read of several chief Commanders, who had their Shields of one Colour, not putting any Device thereon, till by their Valour they had merited the same.

16. The King of *Portugal* (as saith *Anbrosius Rescendius*) wore nothing at first but a white Flag, till by reason of a Victory obtained against five *Morisco* Kings, the five Escochions *Azure* were by King *Alphonso* added. So that *Auristmb*, that was so much admired by the French, was but of one colour, a square red *Syndon* Banner, which was thought to have been sent from Heaven, to lead the French Host: As the Shield at *Rome*, for staying of the Plague.

17. Likewise the Arms of *Arseon*, as they were said to be long since, was only a Field *Or*: Not charged with four Pallets as now it is blazoned, which happened at such time as one of the Kings thereof dipped his Fingers in the Blood of a new slain *Sarazen*. (Or as others say) *Lewis* the Emperour, in the Wounds of *Conde de Barcelona*, fighting on his part against the *Normans*, ennobled that yellow Standard, by drawing upon it those bloody marks which now it hath.

18. So we read of *Helenr*, described by *Virgil*, to wear a white Shield, till he had atchieved some honourable Note to put upon it. So *Agripas* had his Banner of an *Azure* Colour, being given him for a symbolical Argument of Manhood, shewed at Sea. So also was the Banner of *Navarre* all Red, and (as it is said) continued so till *Sanchez le Fort* King thereof, who added those golden Ornaments which now do shine therein. Also *Simon* the

High-Priest of the *Jews*, sent with *Numenius* a Shield of great value to the *Romans*, to confirm the League of Friendship between them, which contained 1000 pound in weight. It may be probably conjectured that there was no Portraiture thereon, in that there is no mention of it.

19. Also all the Seiges of *Tamberlain* the Great, he never used any Flags but of White or Red; but these we must not take to be Coats of Arms, but Flags of Truce, or Signs of bloody War: Neither can a plain Field be called a Coat of Arms, without extream abuse of Speech; more than a plain piece of Wax, a Seal; or a Sheet of unwritten Paper, a Letter. But we must hold such things (as them of one colour) as *Plato* did of his *Abrase* Tables, to be fit and capable of any Form: And till the receiving of such Forms, we must account them as rude and improper things.

The Significations of the Colours used in Arms.

20. **T**HE Signification, and Names by which each Colour is distinguished, is first by Mettle or Colour; the second by precious Stones: And thirdly, by Celestial Planets, as the Examples following will demonstrate.

LXVI. Is the colour White, which is termed in Blazon **Argent**: derived from the Latin Word *Argentum*, Silver: And by the precious Stone, is understood by *Pearl*: And by the Planet, *Luna*. The colour White, resembleth the Light, and is by *Scribonius* thus defined, *Albedo est color simplex, &c.* White is a simple colour, and subject to every stain, except great care be taken of those that wear or bear the same; for in Blazoning it betokeneth Innocency, Cleanness of Life, and Chastity.

LXVII. Is the colour Red, and is termed **Gules**: By the precious Stone, *Ruby*: And by the Planet, *Mars*. This colour *Vermilion*, or Red, is the chief amongst colours, forasmuch as it representeth the Fire, which of all other Elements is the most lightfome, and approacheth nearest to the quality of the Sun: In regard whereof it was ordered, that none should bear this colour but Persons of noble Birth and Rank, and Men of special Desert; for it signifieth Dignity.

LXVIII. Is the colour Blew, and is termed **Azure**: By the precious Stone, *Saphire*: And by the Planet, *Jupiter*. This colour Blew doth represent the Sky in a clear Sun-shining Day, when all Clouds are exiled. *Job* speaking to the busy Searchers of God's Mysteries, saith, *Job* 11. 17. *That then shall the residue of their Lives, be as clear as the Noon-day.* Which to the Judgment of Men (through the pureness of the Air) is of an **Azure** colour, or light Blew: And signifyeth Piety, and Sincerity.

LXIX. Is the colour Black, and is termed in Blazon by the Word, **Sable**; and is derived of the Latin Word *Sabulum*, which signifieth gross Sand, or Gravel, in respect of its heavy and earthy substance: The Blazon by precious Stones, is *Diamond*: And the Planet, *Saturn*. This colour Black, is contrary to White, having no participation with Light: And is by *Scribonius* thus defined, *Nigredo est color in corpore, &c.* For what thing soever there is, that hath either Life, Light, or Heat, if the same be once extinct, the thing it self forthwith becometh Black. This is said to be the colour of Horror and Destruction;

in which respect Mourning Garments are made of this colour, which signifieth and represents to us the horror of Death and Corruption: As also Counsel and Antiquity.

LXX. Is the colour Green, and is termed by the Word, **Vert**, of *Veridis*; which signifies fresh and Green: By the precious Stone *Emerald*: And the Planet, *Venus*. This colour Green, consisteth of Yellow and Blew, and is the first and principal of those mixt colours used in Herauldry. Which colour *Gwilliam* Terms, *Colores mixti*, not being colours of themselves, but mixt of two Simples. It signifieth Felicity and Pleasure.

LXXI. Is the colour Purple, or Purple, and is termed in Blazon, **Purpure**: By the precious Stone, *Amethyst*: And by the Planet, *Mercury*. The Purple colour is another mixt colour, and consisteth of much red, and a small quantity of black. *Cassaneus* saith, that these six colours White, Black, Red, Yellow, Blew and Green; being compounded and mixt together according to art and proportion, doth make a good Purple colour. This colour is by *Ferne* termed *Plumby*, (but this, and the two colours next nominated, being *Murrey* or *Sanguine*, and *Tawny*; are not in use in *English* Coats, but much used by the *Dutch* and *French* Gentry) it is, and in ancient time was, of that precious esteem, that none but Kings and Princes, and their Favourites, might be admitted to wear the same: As we may see, *Dan.* 5. 16. 1 *Mac.* 10. 20. For it signifieth Honour and Dignity.

21. *Sanguine* or *Murrey*, is a colour termed in Blazon, **Sanguine**: By the precious Stone, *Sard nix*: And the Star, *Dragons Tail*. It is a colour compounded of Red and Blew, a Princely colour, in high esteem amongst Men of great degree; and by some old Heraulds is termed *Synamer*. (As Sir J. *Ferne*, *Glo.* 147. saith) But being a colour not in use with us in *England*; I forbear to put it in the Plate.

22. *Tawny* or *Orange* colour, is in Blazon termed, **Tenne**: by the precious Stone, *Jacynthe*: And by the Star, *Dragons Head*. This is a colour of worship (and is in *Glo.* 147.) termed by some old Heraulds, **Bruske**: Being compounded of two bright colours, *v.z.* much Yellow, and a little Red. This colour is much in use by the *Dutch* and *German* People, but being out of use with us, I do not set it down in the Plate.

LXXII. Is the colour Yellow, or Gold colour, and is termed by the Mettle, **Or**; derived from the Latin word *Aurum*, Gold: By the precious Stone, *Topaze*: And the Planet, *Sol*. Because this excellent Mettle doth represent the colour of the glorious Sun; the possession thereof (as the Wiseman saith, *Ecc.* 20. 29.) *inchanteth the Heart of Fools, and blindeth the Eyes of the Wise.* And therefore such is the worthyness of this colour, which doth resemble Gold, that (as *Christine de Price* saith) none ought to bear the same in Arms, but Emperours and Kings, and such as be of the Blood-Royal: Though now it is of more common use.

23. These are the colours (being six in number) whereof Fields ought to be made; but as for the Charges in the Fields, their colours may be sixty-times six: For every thing that is born in a Coat of Arms, may be figured out in its proper and natural colour, which may be many and divers. And because for them we are allowed no terms of Blazon, therefore they are all comprehended under this word, **Proper**: As painted in its natural and proper colour.

*Colours derived from them used in Herauldry.**From Yellow.*

24. **Y**ellow, or a perfect bright Yellow.
 Gold Yellow is a deeper Yellow.
 Fire colour, or Flame colour, a more reddish Yellow.
 Lemon colour, is a more pale Yellow.
 Box or Straw colour, a weak or imperfect Yellow.
 Brimstone colour, a whitish and pale Yellow.
 Bright-bay or Pheasant colour, a deep reddish Yellow.

Colours derived from White.

25. **W**hite, or the most perfect Snow White.
 Ivory White.
 Silver colour,
 Milk White, a blewish White.
 Hoary colour, or white-haired, a mixture of White
 and Black.
 Ash colour, more blackish than White.
 Grey, or Crane colour.
 Russet.

Colours derived from Red.

26. **R**ED, a pure bright Red.
 Scarlet, a Vermilion Red.
 Crimson or Stamell.
 Carnation or Rose colour.
 Flesh or Horse-flesh colour.
 Bay colour, a colour of a Horse, being a reddish brown.
 Fox colour, more Red than Yellow.
 Orange colour, red Orment colour.
 Bole colour, or Brick colour.
 Clay colour.

Colours derived from Blew.

27. **B**lew, or a bright Blew.
 Sky colour, or a light welmish Blew.
 Watchet colour, a more light whitish Blew.
 Sea-water Blew, or a waterish Blew.
 Marble colour.
 A Venice or Blunket colour Blew.

Colours derived from Green.

28. **G**reen, or Grass-Green.
 Pine-Leaf Green.
 Willow-Green, or Willow colour, a whisish Green.
 Sea-water-Green.
 Venice-Green.
 Popinjay-Green.
 Pink-Green, a Green inclining to a Yellow.
 Watchet-Green, a light colour between Green and Blew.

Colours derived from Black.

29. **B**lack, or Ivory-Black.
 Jet-black, or a shining Velvet-black.
 Ibony, black as Pitch, Satin-black.

Iron colour, or Iron-Grey.
 Buck colour, between a Russet and Black.
 Deep-Russet.
 Rats colour.
 Turkey colour.
 Silver Rabet colour.

Colours derived from Purple.

30. **P**urple or Murrey, Blush colour, lighter.
 Violet colour, more lighter.
 Peach colour, a more light bright coloured Violet.
 Bruse or Bruise colour, of Black, Blew and Yellow.
 Morley colour, any mixt colours.
 Gredeline, pale Peach.
 Isabella.

Colours derived from Sanguine.

31. **S**anguine, or a blood Red.
 Rudy colour.
 Deep Red.
 Dragons blood colour.
 Swart, or Swarvy Red.
 Saffron colour.
 Synaper, or Lake colour.

Colours derived from Tawny.

32. **T**awny, or Swarthy colour, a blackish Yellow.
 Hair colour.
 Dun colour.
 Mouse colour.
 Chestnut colour.
 Fallow or Dear colour.
 Swart, Swarvy or Tawny-moor colour.
 Lion colour.
 Bay Copper colour, a deep yellowish Red.

33. The signification of the bearing of these afore said Mettles and Colours, and how the Bearers Mind should be endowed with Vertue, according to the colours of his Coat; I refer you to *Leigh's Accidence of Armory*, pag. 3. to 13. and *Grilliams's Display of Herauldry*, f. 18. to 22. As also the Etimologies or Significations of the compositions and joinings of Mettles and Colours one with another.

Of the Worthiness of Colours.

34. **I**n the bearing of Arms, there are sundry degrees of the Worthyness thereof, and they are all of the Superlative Degree; As followeth,

- | | |
|---------------------|---------------------|
| 1. Most Ancient. | 5. Most Glorious. |
| 2. Most Glittering. | 6. Most Honourable. |
| 3. Most Rich. | 7. Most Lovely. |
| 4. Most Fair. | 8. Most Delightful. |

35. Now you shall understand, that that Field and Charge which consisteth of Black and White, that Coat is most Ancient: Because Light and Darknes, represented by White and Black, are the most ancient Colours of all others, and therefore are accounted more worthy than any in respect of their Antiquity.

36. When

36. When the Field and Charge is Gold and Green, it is esteemed most Glittering, taken from a Saying, in *Ecclesiastes* 10. 19. As the Smaradge that is set in Gold; so is the mirth of Musick, by the mirth of Wine. By which comparison, you may see that *Vert* and *Gold* is very sprightly, glittering and lively.

37. When the Field and Charge is Gold and Black, that Coat is esteemed most Rich; taken from the Diamond set in Gold, where the Mettle honoureth the Stone (which is black) and the Stone the Mettle; both which enricheth each other: So that these colours of all other are the most Richest.

38. When the Field and Charge is White and Red, that is of all colours accounted most Fair and Beautiful; because the same is so held, especially being well mixt in a Womans Face.

39. When the Field and Charge is Gold and Blew, it is most Glorious; for what is more transcendent in brightness and glory (within this visible World) than the shining Sun, in the Azury Firmament.

40. When the Field and Charge is Gold and Red, that Coat is esteemed most Honourable, or most Royal; as an Imperial Majesty, being deckt in Scarlet, and adorned with the purest Gold of *Opus*.

41. When the Field and Charge is White and Blew, that is most Lovely: because when *Aurora's* Morning Curtains are dipt within that changeable Die, that day is most pleasant, lovely, and admired by the beholders.

42. When the Field and Charge is White and Green, that Coat is accounted ever most Delightome; and that especially when *Hyems* hath cast away his Furr'd Gown, and Lady *Ver* begins to deck the Fields and Trees, with Leaves and Flowers: O then! How delightome is it to see, and smell the same, when the Earth is of such a Hue.

43. I do confesse, in one thing herein named, I do vary from *Leigh*, who terms Black and White most Fair, which I hold most Ancient: And I'll leave it to any Persons Judgment (for the Reasons therein said) whether is the most agreeable to Truth and Reason.

Of the Points of an Escochion.

44. **B**Efore you enter into the Rules of Blazoning, you must be informed what is an *Escochion*: And how many several Points are therein contained. For that end, view the 73^d Example in the Plate of this Chapter.

LXXIII. An *Escochion* is a triangular form, having two corners above, and one below; the Ancients did usually make it three corner'd, with a little swelling out of the Sides, much like the 5th Figure: But our Modern Heraldry draw it streight down in the Sides, and then compass it to a Point in the bottom, like the 6th Figure: Or else more round, as the 33^d *, and 50th Figures in the Plate.

45. For the several points of the *Escochion*, I have by Letters set in the parts thereof, expressed the names given to each place. As,

A, Signifieth the *Dexter Chief Point*.

B, Signifieth the *Precise middle Chief Point*, or *Chief Point*.

C, Signifieth the *Sinister Chief Point*.

D, Signifieth the *Fesse Point*, or *Honour Point*.

E, Signifieth the *Dexter Base Point*.

F, Signifieth the *Exact middle Base Point*, termed the *Base Point*.

G, Signifieth the *Sinister Base Point*.

46. The knowledg of these Points is very requisite, in respect, that when diverse of these Points are occupied, with sundry things of divers kinds and different natures (as oft-times it falleth out in some *Escochions*, and Coats of Arms) then you may be able thereby to assign unto each Charge, its apt Point, and peculiar Name, according to the dignity of his Place: For no Man can perfectly blazon any such Coat, unless he do rightly understand the particular Points of the *Escochion*.

A E, Signifieth the *Dexter Side* of the *Escochion*.

C G, Signifieth the *Sinister Side* of the *Escochion*.

And that is mentioned only when the Charge doth occupy, or is contained in the whole side of the *Escochion*.

47. Mr. *Gwilliam* and *Leigh* makes mention of other Points, which they call the *Honour Point*, above the *Fesse Point*: And the *Umbil Point*, under the *Fesse Point*. In place whereof, I have set * Stars, but give them no Names, because I hold them needless, and superfluous; and to burden the Memory with that as is of no concernment is troublesome. Therefore I have omitted them, holding no Point more deserving the *Honour Point* than the *Fesse Point*. For I never yet saw that Coat of Arms (let it be of what kind soever) but without the help of those two Points, I could give an intelligible blazon to it, so that any Person that is skilled therein, may trick the same exactly and truly.

TO THE
 Right Reverend Father in God, the Lord Bishop of CHESTER;
 AND
 The Reverend the DEAN,
 WITH THE
 PREBENDS, and rest of the CLERGY,
 OF THE
 Cathedral Church of *Christ*, and the Blessed Virgin *Mary*;
 WITHIN THE
 Honourable and Loyal City of CHESTER.

What my Endeavours have been herein, is in all humble manner dedicated to your serious perusal; all that I desire is, that in the reading you will judg candidly, and censure rightly: And then I make no doubt, but when you have done, you will willingly accept of the Labours of the Son of your Church,

R. H.

CHAP. III.

It may be questioned of some, what those Signs and Tokens of Honour (called Arms) were at first composed off? To this Mr. *Gwilliams*, gives this resolution, fol. 325. and 2. 3. that they must of necessity be (*signa existentium in rerum natura*) a representation of Things in Being and Nature: For it is impossible to represent things which are not.

Arms of what first composed.

1. IF then they consisted of things in Essence, no doubt they were such as the Vulgar (as well as the more Skilfuller sort) did well understand, and knew, through frequent use, what they were: As being the express Portraictures either of Celestial Bodies, as Sun, Moon, Stars, &c. Or of Things Sublunary, as Fire, Water: Or else Vegetables, as Trees, Plants, Fruit, Herbs and Flowers, &c. Or else they were resemblances of Earthly and Intelligible Creatures, as Men, Beasts, Fowles, creep-

ing Things, &c. Or else of Instruments, or Tools of familiar use, and exercise, in Mechanical Trades; which in respect of their common use, were best known to Men: And therefore served most fitly for Notes and Marks of precise differencing of each particular Person from another.

The Antiquity of Arms.

3. T Ouching the Antiquity of Arms, *Dionorus Siculus* writeth; of which *Gwilliam* maketh mention, f. 5. That *Ossiris*, surnamed *Jupiter the 7th*, Son of *Ham*, the cursed Son of *Noah* (called of the Gentiles *Jamus*) who being banished from the Blessed Tents of *Shem* and *Japhat*, was constrained to seek some remote place to settle Himself and Children in: For which purpose he assembled a great multitude, and appointed *Hercules* his eldest Son Captain. In which expedition of War, both he Himself, and his three Sons, did paint certain Signs upon their Shields

Shields and Bucklers: Which Signs were called Arms. This *Ojyris*, (as saith my Author,) lived not many Years after the Deluge; at which time Arms and Ensigns of Honour were first invented, which is near 3820 years since.

4. And that such Ensigns of Honour were in use in *Moses's* Time, is evident from the command of God, *That every Man of the Children of Israel, should pitch his Camp by his own Standard, with the Ensign of his Fathers House*, Numb. 2. 2, 9, 16, 17, 24, 31, 34. Here you see we have an uncontrollable Warrant, pronounced by the Almighty, for the use of two sorts of Arms, or Ensigns; the one general, being in number four: These only ordered for the Leading and Directing of these four great Regiments, or Battalions (as I may call them). And the other particular, serving for the demonstration of the several Families; and for the distinction of the particular Persons in each Family, for the more commodious distributing of them into Bands.

5. There are some Authors of opinion, that these Signs and Tokens (which we call Arms) were utterly unknown to the ancient *Greeks* and *Romans*, their memory not of old being found within those Nations. And again, others say they were first begun at the Siege of *Troy*; others affirm that they were brought to light by *Charles the Great*, and the *Lombards*: And some are of opinion that they began in the time of *Frederick Barbarossa*. Some again (that last out as far on the other side) there are, who are not wanting to affirm, before the Flood, such a King, Prince, or Common-wealth, bore such and such a Shield, or painted Symbol, *Elem. p. 10*. Infomuch, that I have ever look'd when these kind of Men (who will write any thing) would as readily tell me what Arms, or Badge, *Noah's Ark* did carry in its Sern: As well as we out of the *Acts of the Apostles*, can inform our selves, *Acts 28. 11*. what name the Ship was known by, that transported *St. Paul* towards *Rome*.

6. That the Discipline of Arms was brought to more perfection, in the foresaid Emperor and *Frederick's* time, than formerly; I do acknowledg: And then more generally propagated and dispersed. According to the Saying of *Cassaneus*, *non erubescat antiquitas*, &c. nothing is perfectly devised at an instant, but it is continued by time, and much labour, and great industry, that brings it to perfection. So doubtless, Arms have been in use both before and after *Moses's* time, and yet long before the Destruction of *Troy*: At which Siege it was brought to a certain perfection. And yet more rudely done in those ancient times, than now it is in these our Days; and notwithstanding all our endeavours, there is a want in many things, a refining of others, and an expugning of gross Absurdities.

First Painting of Shields.

7. **T**HE Antiquity of Arms on Shields and Bucklers, we may then derive from the first beginning of Wars, and Field-Battles; for the order of Arms, Fields, and Fightings, were used by the victorious *Scythians*: And as it appeareth that they were Warriors, so were they also bearers of Arms. Also *Justinian* writeth, that *Pallas* did not only teach the *Libians* the Law of Arms, but also the Feats of Defence belonging to War.

8. *Simiramis*, the Wife of *Ninus*, excelled all others in Chivalry; she brought *Ethiopia* under her Subjection, and made war in *India*. Was all this done without Ensigns, and Tokens of Honour, without which neither Battle can be fought, nor Men marshalled to the Wars? These things being first devised, for the more commodious distribution of Nations and Kingdoms, into Tribes and Families; into Regiments and Bands: As also for the marshalling and conducting them into Marshal Expeditions, and for distinguishing of particular Persons in War, as well amongst themselves, as from their Enemies. For it often falleth out, by reason of like Armour and Weapons, &c. (in default of such Signs) that much Treachery is wrought, and many Men (after Battle is ended) do make their Retreat to the Enemies Troops, under the Notion of their own Friends, to the endangering of their Lives.

9. So that it is clear, that without these Marks and Tokens of Arms, there would, nor could, be nothing but confusion; therefore this was the only cause, why such Notes or Distinctions (called Arms) were put in use: For if a Man encountreth us, we do forthwith discover, by the Mark he beareth, whether he be Friend or Enemy. Now in the first assumption of these Signs, every Man did take to himself some kind of Creature, as he thought best fitting and agreeable to his Estate and Condition.

Now as their Institution is not new, but very ancient; so their use was not limited, or restrained to some few particular Kingdoms, Nations, or Countreys: But more largely spread all the World over. Infomuch, that there is no Nation, Countrey, or People so barbarous, but they have their particular Signs, and Tokens where-by they may be distinguished, and distinctly known and discerned from others.

10. That several have thus adorned their Shields, Standards, and Ensigns, is manifest from *Homer*, *Virgil*, *Pliny*, *Paulus Emilius*, and several other ancient Writers; all which have writ that both Kings, Emperors, and Captains, have in Wars, had Devices and Emblems, painted on their Shields and Standards. *Plutarch*, in the Life of *Marius* saith, that the *Cimbrians*, a wild and barbarous People, in the Parts of *Denmark*, *Norway*, and *Almain*, had their Shields adorned with the form of divers kinds of Savage Beasts. Also *Amphiaraus* (as *Pindorus* the *Theban* Poet saith) had a Dragon painted on his Shield. And *Capaneus*, one of the seven Captains that besieged *Thebes*, bore the many headed *Hydra*. (As *Statius* the *Neopolitan* Poet reporteth.) *Polynices*, bore a *Phynx*. *Agamemnon*, in the *Trojan Wars*, bore in his Shield a *Lion*, with this Motto, or Epigram; *Terror hic est hominum, & qui hunc gerit est Agamemnon*.

11. *Ulysses* bore a *Dolphin*, and a *Tryphon* breathing out Flames of Fire. *Perseus* bore *Medusa's Head*. *Antiochus*, a *Lion* with a white Wand. *Theseus* bore an *Oxe*. *Seleucus* bore a *Bull*. And *Augustus*, a *Phynx*. With an infinite more, which to declare would require much time, but I omit them.

12. So of Countreys, Nations, and People in general, it is said, that the *Israelites* bore in their Standard the Letter *Tau*. The *Scythians* a Thunderbolt. The *Egyptians*, an *Oxe*. The *Phrygians*, a *Swine*. The *Thracians*, *Mars* the God of War. The *Romans*, an *Eagle*. The *Persians*, a Bow and Arrows. *Carali*, a Savage People of *Pontus*, bore two Wheels. The ancient *Teutonicks*, an

an Horse, &c. These and the like Institutions are not new, but very ancient: For in all these Examples, there is none so young as a thousand Years. But if we ascend to the Worlds younger Age, we shall find them not only of a thousand years Antiquity, but to be Antiquity it self.

Colours of a Coat of Arms.

13. **S**hields at the first (as you have heard) were of one Colour, but when Devices were put upon them, then more Colours were added, to make the same more compleat; that is to say, the colour of the continent, and the colour of the thing contained: The colour of the Field, and the colour of the Partition, the Ordinary, or the Charge of the Field.

14. So that two colours or more, are absolutely necessary to the making of a perfect Coat of Arms. *Note*, But withal, they are to be ordered according to the grounds of Art and Knowledge: For if there be two colours, one must be a Mettle; for no Armories are proper, without one of the two: Neither are they said to be good and honourable bearing. According to that vulgar Saying of all, and used as a Proverb, for a thing done, and wrong done.

*Mettle upon Mettle is bad Heraldry,
Colour upon Colour is false Armory.*

15. Shields consisting of Colours and Mettles are honourable; and things of the least worth, are worthy bearings: With this Rule of Priority, wherein we must account the Female less honourable than the Male; the Servant less than the Master; the Subject than the Prince: And things Sensitive less honourable than the Rational; and the Vegetive than the Sensitive. Yet every thing hath its due Honour, thereby denoting the dignity of the Bearer by the thing born.

16. Though I do confess, contrary to this ground, there are some Coats which plead Antiquity, which have in them Colour upon Colour, and Mettle upon Mettle, and yet are from the Bearers, accounted honourable: But these we shall pass over, and place them in a Rule by themselves, like to *Heter elites*, or Extravagants, as not tryable by the general Rule, and tract of Armory. And so proceed to the rules of Blazon.

Rules of Blazon, in General.

17. **A**rms, or Heraldry, doth principally consist in things born, and the terms or expressions used: The first to delineate the shape or proportion, the latter describes it in its proper action. And this is called Blazon or blazoning.

Note, The Definition then of Blazoning, or the Signification of the word Blazon; is, to give to each thing (whether Vegetive, Sensitive, or Intellective) born in Armory, its apt and significant terms, or words of Art, as they are generally used in those Sciences, to which such things do belong, or appertain.

18. It followeth therefore, by due order, that I should here annex such general Rules as are peculiar to Blazon; as for other particular Rules, I shall reserve them for their due and proper places.

First, Then in Blazoning, you must use an advised Deliberation, before you enter thereunto; for having once begun, again to recal the same, doth argue an inconsiderate forwardness, which merits a just reprehension.

Secondly, The more compendious your Blazon is, by so much the more it is held commendable; for what is brief is alway held to be most delectable. Therefore you must shun multiplicity of Words, yet with this caution, that you omit nothing material to be expressed; for as the one doth eclipse the Understanding, so the other is offensive to the Memory. Therefore you must take special heed to words in Blazon, for by either adding or diminishing makes the Arms cease to be the same.

Thirdly, You must not be too full of Concits in Blazon, nor use Iterations or Repetitions of words in the blazoning of one Coat, as not to name one Colour or Mettle twice; and especially these four Words (of, or, and, with;) for the doubling of any of these, is counted a great Fault, inasmuch as the offender herein is deemed unworthy of the name of a good Blazoner.

Fourthly, In blazoning you must have a regard of the things that are born in Arms, as also whereunto they may be resembled, whether they be natural, or artificial; and so to give them their due terms accordingly.

Special Rules in Blazon.

19. **A**fter the general Rules, there is some other especial and particular Rules, which hold forth a greater Observation, than any foregoing, and they are these.

First, In the blazoning of any Coat, you must ever remember to begin with the Field, and then proceed to the blazon of the Charge: Moreover, if the Field be occupied with sundry things, whether the same be one or more, or of divers kinds, you must first nominate that as lyeth next, and immediately upon the Field, and then blazon that which is more remote from the same.

Secondly, You are to observe in the blazoning of Coats, that to each particular state of Gentry, to give a blazoning correspondent to their Degrees: As for Example, to Gentlemen as have no Title of Dignity, as all such who are under the Degree of a Baron; their Coats are to be blazoned by Mettles, and Colours. To Persons ennobled by their Sovereign; such as Barons, Viscounts, Earls, Marqueses, Dukes, and all under the Degree of a Prince; their Coats are to be blazoned by Precious Stones. And to Princes, Kings, Emperours and Monarchs, and all such as exercise Sovereignty; their Coats to be blazoned by the Planets.

The several Ways of Blazon.

20. **T**here are divers ways of blazoning, but especially three Forms, by which the colours of things are described; and these are first by Mettles and Colours, the second by Precious Stones, the third by Planets: And they are these, with their Significations, and Letters, by which they are expressed or marked, in the Tricks or Draughts of all Coats of Arms.

D

Dy

Or,	O.	Topaz,	Ⓐ	Sol,	☉	Yellow.
Argent,	A.	Pearl,	☾	Luna,	☾	White.
Gules,	G.	Ruby,	♄	Mars,	♄	Red.
Azure,	B.	Sapphire,	♅	Jupiter,	♅	Blue.
Sable,	S.	Diamond,	♄	Saturn,	♄	Black.
Vert,	V.	Emerald,	♅	Venus,	♀	Green.
Purple,	P.	Amethyst,	♄	Mercury,	♄	Purple.
Tenne,	T.	Jacynthe,	♄	Dragons Head,	☠	Tawney.
Sanguine,	M.	Sardonyx,	♄	Dragons Tail,	☠	Murrey.

These are the Significations and Names by which each Colour is distinguished: and either by their Letters, or the Characters of the Stones and Planets, may be marked on any tricked Coat.

21. Besides this, there is a certain way by Hetching to signify any Colour or Mettle, as when a Person hath his Coat of Arms engraven upon his Plate, as Cups, Canss, Flagons, Dishes, and such like; by the several ways of Hetching the Field, the Colour or Mettle thereof may be expressed: For Example, if the Field or Charge be Gold, it is spotted all over. As the Plate before mentioned, *Lib. 1. chap. 2. Numb. 72.* doth demonstrate.

22. If the Field or Charge be Silver, then they are left plain, without any Hetching at all. But this is to be noted, if the Plate be gilt Plate, then it is contrary; for the Field and Charge then must be plain, and without Hetching with Pricks, and the Field for Silver to be pricked: They ever occupying the place of one the other, according to the colour of the Plates engraved upon.

Note. This would be very good if all Goldsmiths, and Engravers of Plate, would observe it; by reason it makes distinction in Coats, which without would be but the same Coat, though belonging to different Names and Families.

If the Field or Charge be *Red*, then they are Hetched with Strokes or Lines, drawn down-right, from the top to the bottom; as in the foresaid Plate, *Numb. 67.*

If the Field or Charge be *Blue*, then they are Hetched by Lines drawn right over-thwart the Escuchion; as in the Plate, *Numb. 68.*

If the Field or Charge be *Black*, then they are expressed by a double Hetched Line, the one streight down, and the other by Lines over-crofs; as in the foresaid Plate, *Numb. 69.*

If the Field or Charge be *Green*, then it is Hetched or Expressed by Lines bendways to the *Dexter Side*; as Plate, *Numb. 70.*

If the Field or Charge be *Purple*, then they are expressed quite contrary; that is to say, by Lines Hetched bendways, to the bend *Sinister*; as the Plate, *Numb. 71.*

And for the rest, not being Colours in use with us, there is no Lines assigned to them: And indeed properly there is no more than four colours in Arms, with *British* men, which are *Gules*, *Azure*, *Sable*, and *Vert*: and two Mettles, *Or*, and *Argent*.

Of the Honourable Ordinaries.

23. **H**AVING shewed, by several Demonstrations, the manner and ways of Blazon: It now remains, to consider, what the things are that must be blazoned, and they are called Charges.

Now the Charge of a Coat of Arms is that thing whatsoever it be, that doth occupy the Field, and is the same; as, *contenium in contente*: Whether it be Sensitive or Vegetive, Natural or Artificial, and is placed, either throughout all the Superficies of the Escuchion, or else in some special part of the same.

All Charges, are either Proper or Common, Ordinary or Extraordinary.

24. Those are said to be Proper or Ordinary Charges, in Coats of Arms, which are of ordinary use, and belong to this Art; and therefore are called Ordinaries, they have the Title also of Honourable Ordinaries: In regard the Coats honoured thereby. Forasmuch as they are oft-times given by Emperors, Kings and Princes, as additions of Honour, to Coats Armour of Persons of merit and descent.

25. Those are said to be Common or Extraordinary, where there is Charges without any of the Ordinaries; or that have Ordinaries between, or charged with (or both) by any other manner of thing alive or dead. Of which we shall treat farther hereafter, *lib. 4. chap. 1.*

26. As for the Honourable Ordinaries, they are according to *Leigh*, nine: But *Gwilliam* numbers them not, yet by his distribution of them, by Lines, he intimateth as much as if there were five more; to which, upon that account, I may add as many to them as will make up the number twenty: Which are as followeth,

- | | | |
|----------------------|---|---------------|
| 1. The Chief. | } | By Leigh. |
| 2. The Pale. | | |
| 3. The Bend. | | |
| 4. The Fesse. | | |
| 5. The Barr. | | |
| 6. The Escuchion. | | |
| 7. The Cross. | | |
| 8. The Saltier. | | |
| 9. The Cheveron. | | |
| 10. The Giron. | } | By Gwilliam. |
| 11. The Quarter. | | |
| 12. The Pale. | | |
| 13. The Flazques. | | |
| 14. The Cresure. | } | Added to them |
| 15. The Fret. | | |
| 16. The File. | | |
| 17. The Border. | | |
| 18. The Orle. | } | |
| 19. The Inescuchion. | | |
| 20. The Canton. | | |

27. Some

27. Some Heralds, will not admit of several of these for Ordinaries, because they stand oft-times for Differences: Yet in regard they are as well born for Coats themselves, without any other Charge, as with Charges; makes me take that freedom, as to insert them amongst the rest, for Ordinaries, being in ordinary use in Coat Armour, as well as the rest.

The composing of Ordinaries, according to the several Lines.

28. **T**HE Ordinaries are made, and formed of Lines diversly composed; some single, others double, or three or four-fold: And according to the divers Tracts and Forms, of those said Lines, they do receive a divers Shape and variation of Names. Therefore these Lines must be duely considered, and especially their Properties.

29. Now the Properties of Lines, are either straight, angled, or crooked: Which, because few Heralds heretofore have treated thereof, I shall give you particular Demonstrations of those several sorts of Lines, by which the Ordinaries are composed or drawn: As they are in the Plate of this Chapter, under these following Numbers, and Names.

I. Is a **Plain Line**, which needs not to be named; for all Ordinaries composed, or formed of straight Lines, you must only name the Ordinary, without mentioning the name of the Line whereof the same is made.

II. Is an **Angle**, this is when the Line of Length is (as it were) cut off in its straightness, by another straight Line, which in the joyning make a perfect Square Angle: Of Artists termed **Rect Angled**.

III. Is a **Bevée**, that is when the long Line is cut off by another Line, which makes an acute or sharp cornered Angle; inclining in the Corners to a Triangular form.

IV. Is **Escartee**; that is when the straight Line is cut off in the middle, with a perfect Square, into an Ordinary, or Partition, framed according to an Ordinary.

V. Is **Round**; that is when the straight Line is cut in the middle, by a direct **Semy-Circle**, or half round: By the French termed **Tranchee**.

VI. Is a Line **Arched** or **Enarched**, and is termed (when both Sides of an Ordinary are answerably bowed) either **Archee fleeted**, or **fleeked**: But if only one side of an Ordinary be bowed inward, it is termed **Index**, **Concave**, **Champaine**, and of some **Champion**; if the bending be outwards, it is termed **Shapourned**, or **Convered**.

VII. Is termed **double Archee**, as having two Bends, or Arches: It is also called **Ruee**, or **Andee** of the French Heralds: And sometimes **Brettisee**, and also **Inbeckee**, and **Goaree**.

VIII. Is **Wabee**, or **Wabey**, or **Waved**, or **Unde**, or **Surged**; in respect it beareth a representation of the swelling Waves, or Billows of the Sea, which being tossed by the Winds do rise and fall after this manner: Upton calls it **Watersy** or **Undatyd**, and **Undee**.

IX. Is termed **Indecked**; that is, when a quantity of half rounds, joining together with sharp points or corners, is turned into any of the Ordinaries: The French term it, **Quagee enbedans**, that is cloudy, or clouded inwards.

X. Is termed **Ingrailed**; that is when the sharp points turn outward into the Field: As you shall see in the Examples following. The French term it **Tranchee en Ruee**.

XI. Is termed **Nebula**; because it hath the representation, or a resemblance of a Cloud: Upton calls this **Indecked**.

XII. Is blazoned **Battailed**, **Imbattelled**, or **Crenelle**; because it represents the Battlements of a Wall or Tower, from whence it takes its name. The French, and so doth *Gwilliam*, term it **Crenell**, from **Crene**, which in French signifies the Dent, or Notch in the horn of a Bow. By Upton, it is called **Indented**. It is by Mr. *Morgan*, called **Brettelled**; but the difference of battelling, and brettelling, you will see in Bends of that nature, Chap. 4. Numb. 32, 33. The French blazon it **Emmanche**, or **Creneaur**. And Upton saith, that anciently this was termed **Endenter**.

XIII. Is in blazon called **Battelled-Imbattelled**; because it hath one degree of battelling above another: That before being a single Battlement, and this a double one. Of some termed **Battelled grady**; from the Ascent, Steps, or Degrees on the Battlement.

XIV. This is termed **Potente**; yet some call it **Counter-Potente**, and **Potence-Counter-Potence**. It is by *Leigh* blazoned, **Barniere**, or **Belire**. And *Urry Cuppa*, And *Urry Cassa*. See Chap. 7. Numb. 8.

XV. Is termed **Indented**, from its resemblance to the Teeth of a Saw, deriyed from the Latin Word *Dens* a Tooth, or *Indentura*, a certain Deed, or Writing, whose top is indented, or cut into like Teeth. Upton calls it **Racee**, or **Inraled**. And *Bosnel* in his Armory blazoneth it, **Alurle**, and in another place **Dentells**. And *Leigh* calls it **Lentally**, pag. 79. The French **Emmanchee**, and **Aluree**, and **Serrated**.

XVI. Is called **Dauncette**, which is the same to the **Indente**, *secundum qualem*, but not *secundum quantum*; for their forms are both one, but in quantity they differ much, for the **Indente** is smaller than the **Dauncette**. Also that is said rightly to be **Dauncet**, that hath both sides of the Charge, one striking into the other: Examples of both and their difference you may see in the Chief, but especially in the Fesse, and Barrs, Chap. 4. Numb. 71, 72.

Note, Also that **Dauncett**, and **Indecking** are never used in any partitions of Fields, or parting in Ordinaries; but for them is used **Ingrailed** and **Indenting**: Also **Dauncette** differs from **Indented**, by reason it consists but of three Teeth only (never more, but may have one less) whereas the **Indented** hath many Teeth.

XVII. Is termed **Patee**, or **Dobetail**, from a term of Art used by the Joiners, who make Joins one into the other by that Name. It is by Mr. *Morgan* in his Sphere of Gentry, blazoned **Inclabe**, and **Lambaured** or **Labelled**; because the points as they proceed from the Ordinary represent the points or ends of Labels.

XVIII. Is blazoned **Ardee**, and of some **Champion**, **Champaine**, or else **Harriated**: As *Leigh*, pag. 79. and *Ferne*, pag. 200. terms it; or **Crenile Points pointed**, and **Imbattled christed**. Upton calls it **Arree**. There is another kind of Line with the bendings round, which he terms **Inveeree Arree**.

XIX. Is termed **Rasie**, or **Rayed**; in regard it hath a resemblance to the Rays of the Sun, which shooteth out

out like the warbling of a Flame of Fire, or the Light of a Candle: Of the French termed *flamant*, or *Flaming*.

These are the forms of Lines by which Ordinaries are composed: I shall now shew you how the Ordinaries themselves are made by them.

Of the Chief.

30. **A** Chief is that which by the striking of any one of the said several forms of Lines on the top part of the Escuchion, and by reason of that partition or division, taketh away the third part of the same, making it another Colour: As for Example.

XX. He beareth Argent, a Chief Azure, born by *Hassellwell*: The Chief saith *Leigh* and *Gwilliam*, containeth in depth the full third part of the Field; which may in some cases be augmented or diminished a little from this Rule; but in no case divided into halves. If it be not charged either in the Field or Chief, then saith *Morgan lib. 1. fol. 9.* It is termed *Per Chief*, but if either be charged, then it is blazoned, only a Chief. *Upton* calls it a *Head*.

Parted per Chief, G. and O. born by *C. myse*.

O. a Chief G. by the Name of *Lumley*.

B. a Chief A. born by *Monstrell*: and by *Hassellwood*.

B. the like O. by *Beaufort*: Also by *Lufes*.

O. the like B. by *Lifours*, and *Stampton*.

S. a Chief A. by *Penley*.

✠ This Ordinary, and all others, being made of a straight Line, needs no naming of it (as before is said) but if it were composed of any other Line but this, then you must mention the form of the Line whereof the same Ordinary is composed, be it *Chief*, *Bend*, *Fesse*, *Cheveron*, &c. Saying such a thing either *Invecked*, *Engrailed*, *Wavy*, and the like: As in the Examples following.

XXI. He beareth Gules, a Chief angled Argent, born by the Name of *Corny*. This is of some termed a *Chief Beville*, but it cannot properly be so termed in regard that Beville is not rect Angled, but cornered eskué, as in the next: Therefore this is most properly termed a *Chief rect Angled*.

XXII. He beareth Argent, a Chief Beville Vert, by the Name of *Beverley*.

XXIII. He beareth Gules, a Chief cooped Argent, born by the Name of *Cheestet*: Also *Van Lufsdorf* of *Bavaria*, beareth S. such a Chief A. The French term this a *Chief recourüe*, but it is more properly blazoned cooped; being that nothing but the ends are taken away, which is a cooping of it.

XXIV. He beareth Argent, a Chief cooped Beville, Gules, by the Name of *Doucker*.

XXV. He beareth Azure, a Chief Escarteleé, Argent: Some blazon this Coat, He beareth in a Field Azure, one *Imbattlement* in a Chief, Or. But if the *Imbattlement* or *Trenell* had proceeded from the Chief, it would be best blazoned; as in the next Example.

XXVI. He beareth Argent, a Chief with one *Imbattlement* Gules: For *Imbattelling* ought, and must, proceed from the Ordinary, and not run into it. As you may see by this and the foresaid Coat. This is born by

the Name of *Hingley*. And such a Chief A. in a Field G. is quartered by *Van Lauterbach* of *Bavaria*.

XXVII. He beareth Purple, a Chief Inclave Argent. Before I told you from *Gwilliam*, fol. 64. that a Chief could not be divided, which is contrary to some; others hold it may: and that it may go through any Partition. Otherwise this may be blazoned Azure, two *Cantons* Argent; born by the Name of *Cantonell*.

XXVIII. He beareth Or, a Chief Arched Vert; else a Chief *Fleced*, from the Latin word *Flecto*, to bend or bow a thing: Or a Chief *Champion*, or *Champaigne*: But more properly a Chief *Conver*: Or after others *convered* in the lower side.

XXIX. He beareth Or, a Chief with one *Indent* Sable. This I find is a Coat of no small Antiquity, which I found in an old Book in the Herald's Office; and is thus blazoned, a Chief with a sharp point Sable, in a Field Or: Using the French manner of blazon, in naming the contained before the continent. Which manner of blazoning is counted by our Herald's most preposterous.

XXX. He beareth Argent, a Chief with one *Potce* Azure: Or a Chief *Inclave*, saith *Morgan*, fol. 8. 10. Which cannot properly be, seeing the Inclave goeth through the Partition; as he gives it in another Example, using the term from *Clavis*, a Key: Which (saith he) goeth into the Partition, as a Key into a Lock. But in my Judgment, it is best blazoned a Chief with one *Lain-beaur*, or one *Labell*. It is born by the Name of *Majchant*, or *Belloft*.

XXXI. He beareth Gules, a Chief Invecked Or: By the Name of *Vlaynger*. *Cassaneus* holdeth, that where the Chief is of one Colour, or Mettle, or more: you shall blazon the Chief first: But it is more consonant to reason to begin with the Field, because of the priority thereof in nature, as also in respect it is the continent, the Chief the thing contained.

XXXII. He beareth Argent, a Chief *Ingrailed* Vert. Here you may see the difference between the *Inveck*, and the *Ingrail*: The first ever hath the Points in the Ordinary Invecked, and the other hath its Points coming into the Field *Ingrailed*. By the Name of *Grindley*.

G. such a Chief O. born by *Havaden*.

XXXIII. He beareth Purple, a Chief *Wavy* Argent: Or a Chief *Undee*. By the Name of *Waterhead*.

XXXIV. He beareth Or, a Chief *Nowy* Gules: Of the French called a *Chief Tranche*. Born by *Cassell ap Nowell*.

XXXV. He beareth Or, a Chief double Arched Sable: This is also blazoned a Chief double *Fleced*. And by the French a Chief *Quee*; and a Chief of one *Indent*: And of some others a Chief *Soared*, or a *Soare in Chief*. This is a French Coat, born by the Name of *Fitz Lefours*.

XXXVI. He beareth Argent, a Chief *Imbattled*, or *Crenelle* Azure. By the Name of *Monstrell*.

G. the like B. born by *Ryncler*.

✠ Here you may observe, that if an Ordinary have its Line in the form of a Battlement, it is called *Imbattled*, and if both sides of the Ordinary be of that form, it is termed *Counter-Imbattled*: Which may be in the Pale, Bend, Fesse, Cheveron, Salter and Cross, but not in the Chief.

XXXVII. He

XXXVII. He beareth Gules, a **Chief Potence** Argent: Of some termed a **Chief Counter-potent**: And of *Leigh* called a **Chief Bar-Piere**. By the Name of *Lamoy of Cripleton*.

XXXVIII. He beareth Argent, a **Chief Champaine** Vert: Of some Heraulds, a **Chief Ardee**; and that I judg the best term for it, from his Name who beareth it: *Urder of Urder*. Yet others are of an Opinion, that this is no other than an **Imbattlement rebated** in its Corners.

XXXIX. He beareth Purpure, a **Chief Indented** Or. By the Name of *Dentale*, or *Dentalion*.

O. a Chief Indented B. born by *Bottiler*; or *Butler*.

G. the like A. born by *Barett*; and also by *Sarcester*.

B. the like O. born by *Dunham*.

XL. He beareth Argent, a **Chief Nebulee** Azure. Some term this Argent, in Chief, a **Cloud** Proper.

Per Chief Nebulee G. and O. by the Name of *Fancy*.

This is also born by *Van Ratzen*.

Which said last blazoning, saith my Author, if you term it per Chief; then you must name the chief colour or mettle first.

XLI. He beareth Or, a **Chief rasie Sable**: This is a fit Emblem for Wickedness, which though it flourish, and have a golden Field, yet *in the middle of their day the light of the Sun goeth down upon them*, *Amos 8. 9.*

XLII. He beareth Argent, a **Chief Patee** Vert, or **Doubetailed**: By the Name of *Dowdale*.

A. a Rose G. and such a Chief B. is born by *Watson*.

XLIII. He beareth Sable, a **Chief Or**, in the nether part thereof a **Fillet** Argent: This is the only diminution that belongs to the Chief, and is called a Fillet, because of the length and narrowness of it; as also because of the place where it is set, for did it occupy any other place, save the Chief, it should go under another term; as you shall see in the Examples of **Barulets**, **Cotizes**, and **Endorles**, &c.

The *French* term it, a Chief Or, **Supported** Argent: By the Name of *Kap* or *Cape*.

XLIV. He beareth Argent, a **Fillet** Gules. This is by *Ferne*, pag. 177. called a **Frie**; it is so named from its shape, being long and narrow, like the Fillet used by Women to truss up their Hair, and fasten their Head-Tires: So this is very aptly placed on the Chief, or Head of the Escuchion, compassing the utmost borders of the same.

XLV. He beareth Vert, a **Chief Argent**, surmounted of another Or: This is another sort of bearing the Chief upon a Chief. If the under Chief had been the colour of the Field, then it had been termed a **Chief removed**, or fallen out of its place. Though some in such cases will blazon it, a **Bar** in Chief. And such a Chief is born by *Van dem Busch*, viz. *Garrey*, A. and B. a Chief removed G. charged with 3 Flower de lis, O.

XLVI. He beareth Argent, a **Chief Or**, bordered Azure. By the Name of *Broderley*. Also O. a Stags Horn G. a Chief A. bordered of the second, is the State of *Goppingen's* Coat in *Germany*.

XLVII. He beareth Gules, a **Chief party per fesse** Indented Azure and Argent. *Gwilliam* blazons it Gules, a **Chief Point in Point Indented** Azure and Argent: This is another sort of bearing of Chiefs; and in it there is no need of saying per fesse (saith he) for it is alway supposed to run the length of the Chief; if otherwise,

either per Pale, or Cheveron, and the like, then to be named. But by his good leave, this cannot be termed Point in Point, but per fesse, except it were extended to the outmost sides of the Chief; as the Example, *Numb. 50.*

XLVIII. He beareth Argent, a **Chief Vert**, charged with a **Shapournett Ermyne**: This Term Shapournett is derived (if I mistake not) from the *French* Word *Chaperon*, which signifieth a Hood; whereof this is a diminutive, and beareth a resemblance. *Leigh*, pag. 62. is of an Opinion that this is a Partition, and for that end doth draw the Line thereof to the very top of the Chief. But *Gwilli*, fol. 65. takes it to be a Charge of the Chief; and not a Portion thereof: Which makes him to shorten the Head of it, from the top of the Chief; after which Examples this is figured. Some do only call it a Hood or Chaperon.

XLIX. He beareth Purpure, on a Chief Or, a **Bar Daunfett** Gules. I term it a Bar because of its narrowness, containing less than a third part of the Chief; if broader it might be blazoned **Daunfettee**, or else a **fesse Daunfett**. This is by *Ferne*, pag. 176. blazoned a **Clure**.

L. He beareth Argent, a **Chief Point in Point Indented** Gules and Or: This you see is contrary to the 48th Figure, that runs indented through the Chief; and this with its Indents from outside to outside of the Chief. Which some again term a Chief **Pilly** Gules and Or. Born by the name of *Partinghead*. This is through an oversight of Mr. *Morgan*, blazoned per fesse Indented; lib. 2. cap. 5. fol. 47. *Upton* terms it **Point in Point Compony**; but Compony in our Days is a far different thing, as Chap. 4. *Numb. 43.*

LI. He beareth Or, a **Chief quarterly** Purpure and Argent, **counter-flory** in the bottom Sable. By the Name of *Flurtal*.

Thus I have given you the several ways of bearing the Chief, according to those Lines of Partitions.

I proceed now to the next Ordinary.

Of the Pale.

31. THE Pale is another Ordinary, and it consists of two Lines drawn perpendicularly from the top to the Base of the Escuchion: As in Example.

LII. He beareth Azure, a **Pale** Argent: by the Name of *Hickman*. The Pale containeth the third part of the Escuchion, and must not be either enlarged, or lessened, whether it be charged or not: So that there can be but one Pale in an Escuchion. This is by *Morgan* termed **pet Pale**, lib. 2. cap. 3.

This Ordinary is subdivided into a **Pallet**, and an **Endorse**.

G. a Pale O. born by *Kinkley*, and *Grandmain*.

A. the like S. by *Calkin*.

LIII. He beareth Or, a **Pallet** Vert: The Pallet is the Moity or half of the Pale, and therefore receiveth his Name of diminution; as being a demy or little Pale: The Pallet is never charged with any thing either quick or dead. There are some Armorsits do hold that the Pallet cannot be parted into two; but that it may be parted into four,

four, so saith *Leib.* And by the *French*, part. 3. fol. 37. it is called a *coste* cut narrow.

A. 5 Pallets S. born by *Kendrick*.

O. 3 Pallets S. bord by *Fercy*: And the Name of *Athel*.

LIV. He beareth Gules, an *Endorse* Argent. The *Endorse* (saith *Leigh*, pag. 63.) is the fourth part of the Pallet. *Ferre*, pag. 178.) the eighth part of a Pale, which is all to one purpose. It is not used, but when a Pale is between two of them (saith one) but the *Endorse* may be born between Birds, Fish, Flowers, Beasts, and such like things (saith another): But then it sheweth that the same Coat hath been sometimes two Coats of Armour, and afterwards by some occasion joined together in one *Escuchion*. For proof thereof, he there gives an example of such a bearing in an *Escuchion* of *Pretence*, or *Engislet* (as he termes it) between a Lion Rampant and an Eagle display'd, Gules in a field Or.

LV. He beareth Argent, a *Pale Endorsed* Azure: By the Name of *Holdam*. Some Blazon it a *Pale* between two *Endorses*: But that is some-thing of Superfluity.

¶ If the Pale and *Endorses* were of contrary Colours, then name the *Pale* and Colour, or Mettle first; and then the *Endorses* and their Colour or Mettle after: As Gules, a *Pale Or*, *Endorsed* Argent: Born by *Haler*. The like is to be observed in all the other Ordinaries when they have the like bearing on either side of them.

A. Such a Pale *Endorsed* B. is born by *Cawley*.

O. the like *Endorsed* S. by *Naylor*.

LVI. He beareth Purple, a *Pale fitched* in the foot or bottom *C* By the name of *Glifson*. Some call it a *Pale coupé* and *Rebated* in the Bottom: Others say *Pointed* in the Bottom: Affirming that if it were truly and rightly *fitched*, it would loose its name, and become a *Pile*, which is an other kind of Bearing.

LVII. He beareth Or, three *Palletts* Vert: By the name of *Maner*.

¶ If there be more than one in an *Escuchion*, then they are not called *Pales* but *Palletts*: And as this Coat hath three, so you shall have them born to the Number of 8 or 10: Therefore in your Blazoning you must have an especial care to tell the exact Number of them. As

A. 2 *Palletts* S. by *Wentworth*, and *Tranfull*.

B. 3 such: Born by *Thornton*.

O. 4 such B. Born by *Skerley*, and by *Peel*.

LVIII. He beareth Azure, a *Pale Arrayed* Or. By the name of *Lihsford*. Here the Pale and Arraying is all of one colour, else your Blazoning must have been according to the rule before given in *Numb. 55. Grilliam fol. 197. and Spher. lib. 3. fol. 38.* Blazons it a *Pale Radiant* *Rajonee*, after the *French* way: But the foresaid Blazon is after the *English* way, Short and Pithy: For by Rays we understand the glittering and shining Beams of the Sun, which Pale being so arrayed makes it the more lustrous.

P. such a rayed Pale A. is born by *Whitman*.

B. such a Pale O. charged with a Lion Rampant G. is the Coat of *Coleman*.

After this manner *Pales* are set with *flopp*, and *counter-flopp*: which are to be blazoned after this Example.

LIX. He beareth Or, a *cross Pale* Gules. Born by the name of *Paulling*. This is another Bearing subdivided from the Pale, being termed a *Paule*. Now what a *Paule* is, *Cassianus* tells us in these Words: *Pallium est*

quoddam Ornamentum ad modum stole Sacerdotalis cum quibusdam crucibus nigris contextis, &c. This is the old way of making the *Paule*: Which *Morgan*, l. 2. c. 15. terms a *cross Pall*, and that very properly, it representing a Pale cut through the top and opened after the manner of a *cross* *Tau*.

G. such a *Paul* A. born by *Deycheler*.

A. the like S. born by *Duningham* Earl of *Glancorn*.

LX. He beareth Sol, a *Paule Jupiter*: Such a *Pall* or *Paule*, is born by the Arch-Bishop of *Canterbury*, and belongeth to the Arms of his Sea: And is the modern form of the *Paule* which is most frequently used. If this *Paule* were garnished or embroidered with any other Colours or Mettle, then in the blazoning you must add the term *edged*, *adozned*, and *fringed* so and so. This may as well be termed a *Priests Cope*, being a kind of Vestment used by them when they are at the Sacrifice of the Mass, and Altar, as I said before: Which in Latin is called *Pallium*, Englisht a *Paule*, which is a *Cope*, or Mantle, a *Priests Vestment* that covers his Back, Breast, and Shoulders.

LXI. He beareth Purple, a *Paule reversed*, or a *cross Pale reversed* Or. Here you may see the difference between the *Paule*, and the *cross Pale*, the one being edged and fringed in the bottom, terminating in the base of the *Escuchion*; and the *cross Pale* runs quite through to the side, with all its parts: This *Paule* is subject to the same accident that the *Pale*, and *Crosses* are, *viz.* of being charged with, or interposed between any other thing charged in Coats of Arms. As, A. a *cross Pale* S. between 3 *Mullets* G. By the Name of *Paulmulet*.

G. a *Paule*, or *cross Pale reversed* O. between 2 *Martlets* and a *Plate*. By the Name of *Crossel* *tr.*

LXII. He beareth Argent, a *cross Pale reversed*, at each side the Base one *Imbattel* Vert. This is born by the name of *Korbitz*.

G. the like A. born by *Van Chaynach*.

LXIII. He beareth Gules, a *Pale breasted* *Muce* first Or. Born by *Strongman*. This coat I have known otherwise termed; as a *Pale*, each side *double Arched*, which I hold the best and properest blazon: The *Pale* stands (as it were) for the Butment, or Foundation, to which the *Springalls* of the four *Arches* are fixed.

LXIV. He beareth Or, a *Pale double Arched*, or *Muce* Azure, or a *Pale Hoared* on both sides. Born by the name of *Howtock*.

LXV. He beareth Or, a *Pale Waiver* Sable. By the name of *Ayre*.

A. such a *Pale* S. born by *Button*.

LXVI. He beareth Argent, a *Pale Indented* Gules. Born by *Gradlee*; alias *Gadley*.

G. such a *Pale* A. born by *Strathum*.

LXVII. He beareth Vert, a *Pale Daunssett* Or: Any Ordinary that is *Daunssett*, ought not to exceed 3 points on the one (or top) side, let the *Escuchion* be great or small; but they ought (as the *French* *Heralds* say) to be numbered. Such a *Pale* is born by *Kinglanely*.

G. 3 such *Pales* O. is the Coat of *Mantuit*.

LXVIII. He beareth Argent, a *Pale Or*, *Ingrailed* Sable: Born by *Palgrale*. Some do term this a *Pale Ingrailed* S. surmounted of another O. But I judge the first good blazoning, when there is no mote to be seen than the *Ingrailing* on either side: This I confess doth exceed my Draught given to the Engraver, wherein the rounds touched the sides of the *Pale*.

LXIX. H

LXIX. He beareth Purpure, a Pale Ingrailed Or. Born by *Hame*.

G. such a Pale O. born by the name of *Chester*.

A. the like S. by *G. f. c. i. n. e.*, charged with a Pikes Head.

LXX. He beareth Gules, a Pale Inbatted Argent. Born by the Family of *Veck*.

LXXI. He beareth Argent, a Pale Nowey Champaine Azure, or else Nowey Ardee. Born by the Name of *Urdall*.

LXXII. He beareth Vert, a Pale Nowey Losengy Argent. Born by *Molenine*.

LXXIII. He beareth Or, a Pale Nowy Azure. Born by the Name of *Novelin*. If the swelling out in the middle of the Pale (or any other the like Ordinary) be round, it is termed only *Nowy*; but if it be of any other form, then you must mention the form of the *Noweying*, as in the two Examples aforesaid, & the next that followeth.

LXXIV. He beareth Gules, a Pale Nowy quadrat Argent, or else Nowy Square, or quater Angled, or quarterly; For all these terms I have known given to it. Born by the Name of *Quarkell*. See more of this way, in *Crosses Noweyed*.

LXXV. He beareth Argent, a Pale Escarteled on the right side Azure. Which is the Coat of *Woodro*.

LXXVI. He beareth Gules, a Pale Bretteshed Or. The French term it a Pale crossed in three pieces: there is much difference between Brettesling and Imbattelling, as you may see in Bends, *chap. 4. numb. 32*.

LXXVII. He beareth Argent, a Pale Imbattelled Azure. By the Name of *Armas*. A Name much near the device, for by scaling Battlements many a brave Man hath lost his Life.

LXXVIII. He beareth Gules, a Pale Raguled Or, Raguled is as much as a knotted, rough, uncut piece of a Tree set Palewise. You shall sometimes find Coats of this nature both Raguled and Trunked; as in Bends you will see an Example, *Chap. 4. numb. 26. And Chap. 9. numb. 3. 15*.

LXXIX. He beareth Argent, a Pale Pattee Vert: It is born by the Name of *Hobensfield*. Mr. *Alrean* calls this *Incubate*; so may I term it a Pale Dovetailed, or Dovetailly.

LXXX. He beareth Or, a Pale Fracted (or removed) Vert: by the Name of *Sparacke*. Some term this a Pale removed *Bevil* use, because the cutting or breaking of it in the middle is Beville; that is, not streight, but slopingly with cornered Angles.

LXXXI. He beareth Gules, a Pale Angled Argent: by the Name of *Anger*. This is also termed a Pale Rect Angled. Such a like Pale is born by *Posingworth*.

G. such a Pale couped at both ends A. born by *Schwen* of *Bavaria*.

LXXXII. He beareth Or, a Pale Beville Purpure: by the Name of *Beviler*.

Here you see there is a manifest difference between these three last foregoing Examples; of Fraction (or removing) of Angled (or Rect Angled) and of Beville; so that especial care must be taken to give such their due terms, when thus found in any of the Ordinaries.

LXXXIII. He beareth Argent, a Pale Champaine, (or enarched on the Dexter side) Vert: by the Name of *Ponman*. This hath several other Denominations, as *Inbatted*, *Concaved*, or *Shapourned* on the Dexter side. Where you must take notice on what side it is Concave, except it be so in both.

LXXXIV. He beareth Or, a Pale Battailed Imbattelled Azure. So I find it termed, but this will never give any Artist (except he know the Coat) that light as to trick it truly; therefore I shall not trust to their Judgments in this thing that so blazon it: but rather to them who say, he beareth Or, a Pale grady in Chief and Base, the middle Nowey quadrat Battelled Imbattelled. Or more briefly thus, a Pale grady at the ends and middle. Or else grady of three, both in the ends and middle. Others term it a Pale gricee in the head, foot, and middle, on both sides, and fixed. See *Chap. 4. numb. 69*.

There are several other ways of bearing of Pales, both charged and otherwise, but in regard they are in every respect answerable to the Bend: Therefore I shall need give no more Examples of Pales, but refer you to the Bends.

Of the Pile.

32. THE Pile is another Ordinary, consisting of two Lines formed after the manner of a Wedge; that is to say, broad at the upper end, and so smaller and smaller, till it come to a Point in the bottom: So that it differeth from the Pale (that being of an equal breadth all along) as the Examples will demonstrate.

LXXXV. He beareth Gules, a Pile Argent: born by *Fretton*. A Pile represents a piece of Wood that Builders do usually drive into the Ground, where the Earth is not found to bear Fortifications, or other great Buildings: And so by them to force an infallible Foundation.

This Ordinary is subject to no diminution, whether there be more or less in the Field all goes under one name: The Pile contains the third part of the Chief if it be alone, but if it be charged upon, then it may well contain two thirds of the Chief for breadth.

B. the like Pile O. born by *Aldham*, of *Aldham*: The same is also the Arms of *Hajwood*.

O. the like S. born by *Diehon*.

S. 2 Piles A. by the Name of *Hulles*.

Er. 2 Piles S. born by *Hollis*.

LXXXVI. He beareth Argent, three Piles Gules: This is born by the Name of *Gilleshrough*. Some term them 3 Piles in Point, because they all meet with their Points together in the base.

But this I now, that if the Coat consist of three they are ever so placed, and no otherwise; therefore that word may be omitted. See then what needless words are used by *Gwillim*, *fil. 93*. who blazons them 3 Piles meeting near in the base of the Escuchion. *Ferne*, *pag. 205*. and *Leigh*, *pag. 69*. terms them 3 Piles in Point. But *Upton* the same blazoning as aforesaid, because they are ever set after this manner: So that to use superfluity of Words, is contrary to the Rules formerly given, where brevity is commended, as being most compendious.

S. 3 such Piles O. born by *Maulit*.

LXXXVII. He beareth Argent, a Pile Sable, Cotized Ingrailed Gules: The Pile I never found in any Coat otherwise than *Claved* and *Ingrailed*; but the Cotizing of it hath been formed of other Lines, as well as plain. Some term this Cotizing, Ingrailed on the outside, because there may be Coats that have it Ingrailed on both sides. Such a Pile bendwise is the Coat of *Constrale*.

LXXXVIII. He

LXXXVIII. He beareth Or, a Pile in Bend *Waved* Azure: born by *Debar*. In this *Grilliam* fol. 84. likewise with many needless expressions, as issuing out of the dexter corner bendways: And *Leigh*, pag. 69. on the other side is too short, having omitted the waving of the Pile.

Also B. a Pile *waved* in Fesse between 3 Flowers de lis O. is born by *Blum* in a *German* Family.

LXXXIX. He beareth Gules, a Pile, between two other *reversed*, or *transposed* Argent. *Grilliam* here adds words of superfluity, *viz.* three Piles, one issuing out of Chief, between the two other transposed. Sometimes you will find Coats with two in Chief, and one in Base, which I conceive thus best blazoned, two Piles with another reversed, or a Pile reversed between two other. Piles are very often coupéd and transposed to several sides, and parts of the Escuchion; and therefore must be taken notice (in such cases) how and where they are removed.

A. 3 such Piles S. born by *Hulse*, or *Hul's*.

A. 2 Piles, and one transposed B. born by *Garnons*.

G. 2 Piles transposed O. born by *Ehinger* of *Germany*.

A. 3 Piles reversed B. born by *Marschalek* of *Brunswick*: Which name in English we call *Marshall*.

B. 2 Piles reversed with Roses on the Points A. born by *Khelinger*.

XC. He beareth Vert, a Pile *Waved* between two other Argent. If they had been all 3 *Waved*, then there had been no need of saying (the two between;) if the middle had been plain, then you should have said a Pile between two other *Waved*, or *Ingrailed*, or the like: The Pile hath anciently been called a *Sentrie*, that is a stick for a Tent, or for any other kind of work.

XCI. He beareth Gules, on a Pile Or, 3 demy Flower deluces conjoined to its Sides, and Chief, Sable: This is born by the Name of *Flowermaine*.

XCII. He beareth Vert, a Pile *Floried* at the point Argent. A fit Coat (saith *Mr. Morgan*, lib. 2. fol. 66.) for a Pioneer, who by his Wisdom hath countermined his Enemies Mines, if under-ground; or that *Pallizadoes* himself in his Castle above-ground.

XCIII. He beareth Argent, a Triple Pile in Base Bendwise Vert, *Floried* at the point Sable: born by the Name of *Wrot*. This is called a Triple Pile, because it is joined in the top or solid part all in one entire piece. This is by *Ferne*, pag. 179. termed a Pile *Passant* in Bend Triple *Flow*. *Grilliam* terms it, f. 83. a Triple Pile *Flow* on the tops, issuing out of the Sinister base in Bend towards the Dexter corner: Here is Tautologies, with an Absurdity in naming the tops for the points; for a Man is a Man, though he stand on his Heads and transpose the Pile, how, and where you will, the broad end is the top of it.

XCIV. He beareth Azure, three Piles Barwise Or: born by *Platten*. Being on the dexter side you need not mention it: After this sort shall you have the Piles born *Waved* and *Indented*, &c. Which Examples for tediousness I omit. Some will term this *Barry Pily* of seven Azure and Or. See Chap. 7. Numb. 98. But here was a great oversight in my Friend *Morgan*, lib. 2. fol. 68. who termed this per *Pale Indented*.

S. 3 Piles on the Sinister side Barwise A. born by *Van Rorbach*.

XCv. He beareth Argent, two Piles coupéd, with an other between them reversed Gules: This is the

Coat of *Holfom*. *Boiswell* terms these thus, two descending, and one ascending: But this is contrary to the rule of the Pile, before spoken of, where it was shewed, that the nature of the Pile was to have its point down; therefore needs no mentioning of descending, &c. Here I blazon the two coupéd, before I speak any thing of that as is reversed; which I give not the term of coupéd to, because it is entire, and fixed to the base of the Escuchion: Which were it not, I should then have blazoned it thus, two Piles with another reversed coupéd: Or thus, a Pile reversed between two other coupéd, or all coupéd: Or else one coupéd reversed, between two of the same.

XCvi. He beareth Argent, three Piles Engrailed, and Coupéd Azure. *Formanshaw* beareth this Coat Armour.

XCvii. He beareth Or, 3 Piles coupéd, two, and one Gules: This is born by *Proctor*. Here I am constrained to give this term two an one, to set out the manner of their being in the Escuchion; because the Piles stand naturally (being three) all besides one another, as the foresaid Examples, Numb. 69. 86. 90. doth demonstrate. But these standing contrary, it must therefore by two and one, be expressed how they are disposed of in the Field, that is two above, and one below, &c. Some blazons them two in Chief, and one in Base.

The like Piles with *Urled* or *Champaine* tops or heads S. in a Field A. is born also by the Name of *Proctor*.

XCviii. He beareth Azure, 2 Piles coupéd and reversed, conjoined to another Argent: born by the name of *Jayner*.

O. three such Piles coupéd and conjoined, two with their Points in Chief, and one in Base, G. is born by *Heyrling*.

XCix. He beareth Argent, a Pile in Bend Sinister, surmounted of another Dexter Argent: Yet others taking no notice of whether surmounts (as I think so too) do blazon them only two Piles in *Salter*. This is born by the name of *Salter's*.

C. He beareth Parted per Pile Purpure and Ermine, a Pile Argent: by the Name of *Keyluch*.

If the Pile had been Ermine, then I should have said a Pile of the second, by reason one Colour must not be twice named in one Coat: Yet I have seen this blazoned a Pile, and two base points parted (or two points in base parted.) If the Pile and the partition of the Field were of one Colour, then upon sight of the Coat, I should have blazoned it a Cheveron reversed, from the Chief to the Base.

CI. He beareth Gules, a Pile *Waved* out of the dexter corner bendwise, determined in Fesse Argent: born by *Van Toppler* of *Brunswick*. I have seen this anciently blazoned a *Gyron Waved*, because it extendeth no further than the Fesse Point, which the Pile ever doth: So that the Artist is at his choice whether to term it a Pile terminated, or a Gyron Waved.

CII. He beareth Or, three Piles in Chief Azure: born by the Name of *Van G. b. n.* If they be whole Piles, then they ever meet in Point: but being diminutive, or half Piles, then they stand in this order, and manner.

O. a Lion passant S. in Chief 3 Roman Piles of the Second: born by *Loggan*. So termed in *Grilliam's* 5th Addition, fol. 192.

CIII. He beareth parted per Cheveron in Base, Purpure and Argent, a **Pile counter-changed**: Otherwise, per Cheveron P. and A. and per Cheveron reversed counter-changed. This Coat Armour is born by the Family of *Churland*. See such a like Coat as this, but of a contrary blazoning, *Chap. 9. Numb. 64.*

CIV. He beareth Azure, three **Piles**, and as many in Fesse Argent. This is a *German* Coat, and is born by the Name of *Magdenburg*. Some have termed them 3 Piles in Chief, and 3 in Fesse. Others 3 demy Piles in Chief, and as many couped in Fesse.

G. 4 Piles in Fesse reversed and couped, and 2 issuing out of Base, A. is the Coat Armour of the Bishoprick of *Olmutz* in *Cermny*.

Party per Fesse, B. and G. 3 Piles transposed in Fesse A. by the name of *Van Wolkenstein*.

Of the Gyron.

33. **THE Gyron** is an Ordinary consisting of two Lines drawn from divers parts of the Escochion, and meeteth in an acute Angle, in the Fesse Point: It is derived, as some think, from the Latin word *Germium*, which signifieth a Lap. The Gyron is born single; by couples, of six, of eight, of ten, of twelve, and not otherwise.

CV. He beareth Argent, a **Gyron** Gules: by the name of *Gyronell*. If there be but one, it ever stands in this place without naming it: Yet *Gwilliam*, fol. 81. name the dexter Chief Point; which is needless, except it be removed to some other place. This Ordinary is by *Upton* termed contrary, **Coonyu**.

Sanguine, a Gyron on the dexter side (in Fesse after *Gwilliam*) Argent; is the Coat quartered by the Lord *de Wolf* of *Sveji*.

CVI. He beareth Azure, 2 **Gyrons** Argent: by the name of *Antelope*. See four Gyron, *Chap. 9. Numb. 103.* You need not say meeting in Point, the one from the dexter Chief, the other from the sinister Base; because they do evermore meet in the Fesse Point be they never so many. And if you observe, the Gyrons are made of two Lines, one in Bend, the other in Fesse, which make two directly opposite one to the other; and needs no naming of their places, except they be otherwise disposed.

CVII. He beareth **Gyronny** of six, Azure and Or. by the name of *Amberg*. Some blazon it parted per **Gyron** of six pieces: In the naming of the Colours, I name that first which occupieth the principle part of the Chief, but if it be divided into more then to name that first as occupieth the dexter part of it: As in *Numb. 111.* and the following Example. Some Blazoners of old, termed these **Gyrons** by the name of **Contra Contraconata**, or **Counter-joined**: For that the coins or corners of their contrary or different Colours, do all meet in the center of the Field.

6 Gyrons O. and S. is part of the Coat of *Callarde*.

6 Gyrons A. B. is born by *Van Sintzen-kosen* in *Barvaria*.

CVIII. He beareth **Gyronny** of eight, Argent and Purpure: by the name of *Ockton*. There are some who affirm that they may be born to the number of sixteen; and so I have seen a Coat in the Heralds Office to have that same number. These Gyrons are never born com-

posed of any other sorts of Lines, but a straight plain Line; except they be either single: or by couples, then you shall have them Waved, or Indented, Ingraled, or Invecked, and no otherwise. Some hold that Gyronny of eight ought not to be numtred; but only Gyronny of such and such colours: And the reason is because one Gyron contains the eight part of the Field.

The like O. and B. on an Escochion G. a Lion's Head Erased A. born by *Spaune*.

CIX. He beareth Or, a **Gyron** in Fesse Gules: by the Name of *Skatter*. Others a **Gyron** in the dexter Base.

CX. He beareth Argent, two **Gyrons** in Chief: Others say two **Gyrons** dexter and sinister in Chief. Now had these two been upon a Chief they had been termed Squires; as the Examples *Chap. 9. Numb. 71, 75, 77, 78, 83.*

Party per Fesse, O. and G. in Chief, a Talbot S. and 2 Gyrons in Base A. born by *Biberlisburgh* of *Switzer-land*. Some blazon it per Fesse O. and Gyronny of 5 G. and A. a Talbot S.

CXI. He beareth **Gyronny** of twelve, Or and Azure: by the name of *Malfering*.

The like O. and B. an Inescochion G. born by *Eller*.

Gyronny of 16 O. and B. an Escochion A. born by the Bishoprick of *Revela* in *Cermny*.

Gyronny of 12 A. and G. born by *Waldeth Van Boffelheim*.

CXII. He beareth **Gyronny** of eight, Gules and Argent, a **Delle Or**: by the name of *Mildmay*. As this Square is in the middle of the Gyrons where they meet in Fesse, so you will find Coats with Escochions, Roundlets, and the like; which place you need not mention, because such Charges ever stand in the Fesse, or middle part of the Gyrons. *Boswell* pag. 40. calls this a **Quadreate**.

The like O. and B. with an Escochion G. born by *Spon*, or *Spoune*.

The like A. and S. with a Basant, born by *Loregold*.

Of the Quarter, and Canton.

34. **THE Next Ordinary** is the Quarter, which is formed of two Lines, both straight through the middle of the Escochion, one from the Chief and the other from the Fesse points, where both meeting in the middle of Escochion in an equall Square is called a **Quarter**, because it contains a quarter part, or a Fourth part of the Field: as for Example.

CXIII. He beareth Escallopee Argent, a **Quarter** Azure: The Quarter I never found born otherwise, but composed of Straight lines: Though it is usually charged with variety of Bearings. This is a *Duch* coate and is born by the name of *Van Scalburgh*. **Escallopee** is born thus on Bends, Fesses, Barrs, Crosses, &c.

G & per Fesse **Escallopee** A. born by *Newburgh*.

Escallopee Er a **Quarter** G: born by *V. n Iari* of.

CXIV. He beareth Argent a **Canton** and a **Shapou-nett** Gules. born by *Feldwayne*. Though some (in regard of the Honorable bearing of it) do hold it to be an Ordinary: Yet for my own part, I take it to be no other then a Diminution of the **Quarter**, and contains the third part of it: It is called a **Canton**, because it occupieth but a Corner, or Cantell of the Escochion. If it be placed in the

the Dexter Corner of the Escuchion, there needs no other mention to be made of it; But if it be placed on the contrary side (or else where) then it is to be named, a **Canton**, or a **Quarter Sinister**: As in the following Examples it will be further manifested.

The **Shapoudruff** is **Or** born in the **Base**, both of the Escuchion, and all other Ordinaries, that it is charged withall. See *Numb. 48. Chap. 9. Numb. 83. 84. 87.*

A. a **Canton**, **G**: born by the name of *Chester*.

B. the like, **O**: born by *Carterlin*, also by *Studley*.

CXV. He beareth **Or**, a **Canton Sinister Sable**. The Dexter, and Sinister Cantons, are all one as in Form, so in Quantity, and Estimation; but differ only in this from their Local Position: And also that the Sinister is not of so frequent use. And the same Rules as serve for the **Quarter**, serveth for the **Canton** also.

Such a **Canton** blazoned as afore, belongs to *Clerke*.

S. the like, **A**: born by *Eytzenriet* of *Barvaria*.

O. the like **B**: by *Zolkofer* a *Zwitzer* in *Germanie*.

CXVI. He beareth **Argent**, a **Canton in Base Vert**: by the name of *Brucherley*. The **Canton** ever stands in the Corners of the Escuchion; never in the middle of the Chief, Fesse, or Base: Therefore I need say no more, but a **Canton in Base**, or a **Canton in the Sinister Base**, If it be on the other side.

Note that a **Canton** parted **Traverswaies**, whether it be from the Dexter Corner, or from the Sinister, is doth make two **Base Squires**: C. 7 N. 75. &c.

CXVII. He beareth **Or**, a **Canton Indented in the Bottom Gules**: born by the name of *Beyfynburgh*. The **Canton** is seldom altered from its old form and fashion of plainness: Therefore for its Rarity I have caused it to be presented to your view.

B. the like **O**: born by *Doppock Van Hufferz*.

A. the like **V**: with a Flower de Luce **O**: by *Carmon*.

CXVIII. He beareth **Vert**, a **Canton Argent**, with a **Pile waved**, issuing from the corner thereof **Bendwaies**, **Sable**: or more briefly, a **Canton** and **Pile waved** in

Bend, or **Bendwaies**. This is born by *Campile*.

G. the like **O**: born by *Enefeld*, also by *Feelding*.

O. the **Canton S**. **Pile G**: born by *Zemilburg*.

V. the like **O**: born by *Cempiles*, and by *Van Sethoditz*.

A. a **Canton** and the **Pile S**. **Ingrailed G**: by *Copewood*.

G. on a **Canton A**: a **Cross G**. a **Pile in bend O**. This according to our English mode, let the Ensign be what Colour the Colonel pleaseth: If there be *St. George's Cross* in the **Canton** thereof, with a **Pile** issuing therefrom either plain or waved it is the cognizance of a **Major**: For a **Major** of all **Regiments** of foot **Souldiers** (in our Kingdom) have in their warlike Ensignes a **Pile** from the **Canton**, to distinguish it from other Ensignes of the same **Regiments**. Perhaps to shew the Valour of our English Nation, who will stand to it both by Land and Water: It being the Emblem of both.

CXIX. He beareth **Azure**, a **Canton Argent**, with 5 **Piles** waved issuing therefrom, **Or**. If the distinction in Ensignes, for the Eldest, Second, or Third **Captains**, &c. be by **Piles**, either waved or plain: Then beginning with one for the **Major's** Companies Ensign, as aforesaid; and two for the eldest or first **Captain** &c. Then this falleth to be the Ensign of the fourth **Captain** in the **Regiment**, but as it is blazoned in this place it is the Coat Armour of *Mounfier De le Sun*, or *Sund*. Some will blazon this 5 **Rayes** of the Sun issuing out of the Dexter Corner: Surmounted of a **Canton**. Others again, leave out the words (Surmounted of) because the **Canton** must be seated in the Corner, and the **Rayes** proceed from under it.

G: the like with 2 **Piles O**: born by *Van Spingnailz*.

B: on a **Canton A**: a **Muler S**: 3 **Piles** in **Bend O**: by *Pakman*: And also by *Guddyer*, Sans Mullet.

A: on the like **S**: a **Leopards face O**: 3 such **Piles G**: by *Van Seltz*: With a **Rose O**: and **Piles** waved: by *Vantz*.

O: the like **S**: and 5 such **Piles G**: by *Mainfchan*.

O: the like with 3 **Piles** wavey **G**: by *Volaignez*.

A: the like **G**: the 3. **Piles** Engr: **S**: by *Silversborough*.

To the Eminent and Learned
DOCTORS, and PRACTITIONERS of PHYSICK,
 WITH THE
Skillful and Industrious CHYRURGEONS;
 And their **MINISTERS, and OFFICIALS:**
 Within the Diocels of **CHESTER and NORTHWALES.**

AS after the Welfare and Good of our Immortal Souls, which we must seek for at the Hands of God our Heavenly Father; and Instructions from our Mother the Church: So it behooves us, in the next place, to have a care of our Earthly Bodies; the Safety whereof depends (under God) upon your Knowledg and Care: Frail Life, by Art, may be preserved, but once lost, through neglect, is past recalling.

The Consideration whereof, makes him beg your care at such times; who in the Interim, Dedicates a part of his Labour and Endeavours to your Learned Thoughts: As it is a Work intended for general Good, so it is subject to each Man's particular Censure; but seeing what the whole means, be not too rash in judging the Author, nor too backward in valuing the Pains of Him, Who is Your Devoted Friend, Humble Servant, and Observant Patient,

R. H.

CHAP. IV.

THE Next Ordinary which we shall treat off, shall be the **Bend**; which also consisteth of two Lines drawn over-thwart the Escocion, from the Dexter Chief, to the Sinister base point, by an equal distance as the Examples following will shew.

Of the Bend.

2. **T**HE Bend containeth the fifth part of the field, as it is uncharged, but if it be charged, then it is the third part of the field, as the next will demonstrate.

I. He beareth Argent, a **Bend Vert**: born by the name of St. Nichol. The **Bend** hath it's denomination from the French word, *Bender*; which signifieth, to Stretch forth: As it doth from on corner to another. Yet in ancient Rolls I have seen the **Bend** drawn somewhat Arch-wise, or after the resemblance of the bend of a bow.

The **Bend** of all the Ordinaries exceedeth the rest in it's Dividings, or Diminutions: as the examples shew.

If the **Bend** stand on the right side to the left, then it needs no other blazoning, [but, a **Bend**.] But if from the Sinister Chief to the Dexter base it be drawn, then it hath the denomination of, a **Bend Sinister**.

G. a Bend O. born by Kelloberry, also by Columbers.

B: the like O: born by the Lord Scroup: and also by Grosvenator, or Grosvenor of Eaton in Cheshire. Concerning which Coat there was a great Suit between them, but at length determined by the Kings of England and France.

O: the like S: born by Gottlingen of Bavaria.

II. He beareth Gules, a **Bendlet**, Argent: born by Orrey. This is one of the Sub-divisions of the **Bend**, and it containeth the Sixth part of the field.

 Where Note that if the field contains more than one **Bend**, then they are not called Bends, but Bendlets; but all Partitions of Fields are termed Bendy: If there be never so many Divisions. As Chap. 7. Numb. 82.

O: 2 Bendlets G: by the name of Tracy.

A: 2 such G: born by Hackett.

G: 3 Bends O: born by Greleya.

S: Four

S: Four Bendlets A: born by the Name of *Wardination*.

III. He beareth Or, a **Gartier Gules**: This is another derivative from the Bend, and contains the half of it in bigness. The Word *Gartier*, is derived from the *French Gartier*; or from the *Norman Word Gartier*, both which are the same which we in *English* call a *Gartier*, or *Garter*. It is a Bearing of much Esteem with us in *England*, from that Renowned Order of Knighthood, called the *Garter*.

A Bend (saith one) represents a Belt, or the Zodiac Circle: And so every Bend is a Zodiac, every Bendlet is a Colure, every Scarf is a Parallel in the Sphere of Gentrey.

IV. He beareth Azure, a **Cot Argent**: The continent of this is the fourth part of the Bend, and half the Gartier. It is by most Heraulds called a **Cotise**. If it be born alone, it is termed a **Cot**, but if by couples, then they are called **Cotises**, or **Cotizes**; and also a **Batune** (as *Leigh* noteth): but *Bara* maketh a **Cotise**, and a **Batune**, two distinct things. It hath its name from *Colta*, which is in the *Latin* a Rib, either of Man or Beast. The Cot is rarely born but by couples, and that with a Bend (or such like) between them.

V. He beareth Argent, a **Riband Azure**: This is that other subdivision that is derived from the Bend, and doth contain the eighth part thereof. The Name agreeth well with the form, and quantity of the same, in that it is long and narrow, which is the right shape of a Riband. This (saith *Leigh*) is also called a **ffisure**, and then it receiveth that Name, when it parteth the Field into two colours, and is of it self Mettle.

Thus much of the Bend and its subdivisions; let us now peruse the Bend Sinister, and see how the same is divided.

Of the Bend Sinister.

VI. **HE** beareth Or, a **Bend Sinister Azure**: The Bend Sinister is sometimes born with another Dexter, which to sight will appear like a Salter.

 In Coats of such a nature you must be careful to observe which lieth next to the Field, for that must ever be first named; and not in this only, but in all such Coats, where one Ordinary lyeth over another. As *Chap. 8. Numb. 26. to 36.*

A: such a Bend G: born by *Rattaw*, of *Bavaria*.

VII. He beareth Argent, a **Scarpe Purple**, of some termed a **Scarf**: Which is a thing (as *Leigh* noteth) to be a kind of Ornament, much used with Commanders, and Field-Officers: And is used from the *French Word Escharpe*, signifying that Ornament worn by Martial Men from the left Shoulder overthwart the Body, and so under the Arm on the right Side. You need not in the blazon thereof to mention the word Sinister, because a Scarpe is never born otherwise than thus.

 And although this charge hath some resemblance of the common Note of Illegitimation, yet it is not the same, neither hath it any such signification, for that it agreeth not with the content thereof, nor with the manner of bearing the same: As is plain by the next Example. The Scarpe containeth the half of a Bend Sinister.

VIII. He beareth Gules, a **ffisure**, or a **Staff of Gold**. This containeth the fourth part of a Bend: And

is by the *Dutch* born both **Hebuley** and **Waved**, which seemeth to be a crooked Wire.

IX. He beareth Argent, a **Batune Sable**: This is a derivative from the Bend Sinister, and containeth the fourth part thereof. This word *Batune* is derived from the *French Baston*, which signifies a Wand or Cudgel. The Batune must ever be couped, and touch no part of the Escuchion; which makes it differ from all the subdivisions of the Ordinaries before manifested. This hath in former times been the only work of Illegitimacy; (perhaps from the Affinity of *Baston*, and *Bastard*: Or else to shew that such Issue have not the priviledge of Freemen, and so are subject to servile strokes;) but now being so generally known, is wholly left aside. But no more of this, for to give a dash with a Pencil is sufficient herein, which is a secret known only to Heraulds.

The Batune is not born of any of the Mettles, but by the Bastards of Princes, neither ought to be removed till three Generations, with which they may bear their Father's Coat Armour: but when they leave it off, they must bear some other mark in their Coat, such as the Heraulds think fit; or else may alter the Coat in the whole.

Of the Bend divers ways.

X. **HE** beareth Azure, a **Bend Ingraled Argent**: born by the name of *Groveling*.

G: a Bend Ingraled O: born by *Marshall*.

A: the like S: born both by *Ratcliff*, and *Bradd n*.

XI. He beareth Azure, a **Bend Inbecked Or**: born by the name of *Braddeler*.

XII. He beareth Or, a **Bend Waved Azure**: **Wavy** and **Wdee** are all one terms in Herauldry. By the Name of *Waterfall*.

A: the like S: born by *Burton*, and by *Wallop*.

A: two such S: born by *Hankford*.

A: three such B: born by *Wilbraham* of *Woodhey*.

XIII. He beareth Gules, a **Bend Wavy Waved** Argent and Azure: Some term this a **Bend Watery**. And is born by the Name of *Waters*.

S: such a Bend A: and B: by the name of *Standen*.

XIV. He beareth Ermine, a **Bend doubled Gules**: This may also be blazoned two Bendlets. And is born by the Name of *Hackett*.

XV. He beareth Or, a **Bend Azure, edged Argent**: by the name of *Smivall*. This is also blazoned a **Bend Argent, surmounted** of another Azure: but in my Judgment, it rather represents a Hem, or Welt of a Belt, or an Edge of Silver, than two Belts one upon another; which the Bend properly signifieth.

G: a Bend A: surmounted on another, born by *Zenner* of *Bronswick*.

XVI. He beareth Gules, a **Bend Or, double edged** Azure and Argent: by the name of *Doubleing*.

 Because some may doubt of the right placing of the Colours of the double edg, they must know, that after the naming of the Bend and its Colours: I next proceed to the colour of the Edging that lyeth next to it, and then name that more remote. Which way of blazoning you are to observe in Coats of this nature, or such like to them; else there may ensue grand mistakes.

XVII. He

XVII. He beareth Argent, a **Bend Azure, bordered** Or: by the name of *Bendwaine*. Some old Heralds term the two foresaid Bends; **bordered**; and some hold that this is the right way of bordering the Bends: To whose Judgment I rather adhere.

Therefore this may be taken for an Observation, that an edge, or hem, or welt, only runs on the sides of the Ordinary; but the Border invirons, or goeth clear round the same, as well the ends as the sides.

XVIII. He beareth Argent, a **Bend Gules, Cotized** Vert: by the name of *Tutiller*. If the Bend and Cotizes were of one colour, then they are both to be named before the colour, and then it is sufficient: *Boswell* terms it a Bend Cotized, with two Cotizes, and a Bend between two Cotizes; where he had not needed to mention the Number 2, or Word between: For by the blazon of a Bend cotized, we are given to understand there is a Cost, or Cotise, on either side the Bend.

A: a Bend S: cotized G: born by *Maconant*.

G: a Bend A: cotized O: by *Davre*, or *Dauter*.

O: a Bend cotized S: by *Harly* of *North-Wales*.

S: on a Bend A: cotized Er: a Rose G: between two Annulets S: by *Commy*.

XIX. He beareth Or, a Bend **double cotized** Gules: This of some old Heralds is termed a Bend between two **Bendlets Semel**. What a **Semel** is you shall know more in Barrs. But in my Judgment this is better blazoned a double Cotize, by reason some Coats are treble; and then, How can they be better expressed than by Cotizes? For their number makes them not to lose their Name: Some again number the Cotises, as a Bend between four Cotizes.

XX. He beareth Argent, two **Bendlets Azure**, between two **Cotizes Gules**: by the name of *Passant*. Or else thus, two **Bends**, between as many **Cotizes**.

XXI. He beareth Argent, two **Bends, or Bendlets Cotized**, Azure, born by the name of *Van Arizat*. If the **Bends**, and **Cotizes** were of contrary colours, then Blazon them thus, Two **Bends Azure, Cotized** Gules. As in the last example. Some blazon this Coat, two **Bends, each Cotized**: which is good.

Here in this Coat, and the foregoing, *Numb. 20*. You are to take especial notice of **Bends Cotized**, and **Bends between Cotizes**: For if there be 2 or 3 Bends, and that all of them stand together, and the Cotizes be on the out-side; Then they are termed 2 or 3 **Bendlets**, between 2, 4, or 6 **Cotizes**: Yet if the Cotizes be intermixed (as in this coat) then it is termed 2 **Bends** or **Bendlets, Cotized**: That is as much as to say, a **Bend Cotized**, and a **Bend Cotized**: For every perticular Bend ought to have it's own Cotizes.

XXII. He beareth Or, 3 **Torteaures** between 6 **Cotizes**, Vert: born by the name of *Cotterell*. Some term them 6 **Bendlets**. If the Cotizes had been of the same colour to the **Torteaures**, which are Red; Then you had not needed to have mentioned their colour.

For it is alway to be understood, and observed as a rule, that if the Ordinaries or Charges be of the same colour with them; then the naming of them will serve for the colour. As thus; 3 **Torteaures**, between 2 **Cotizes**, or **Bendlets**; born by *Inghamburne*.

A: 3 such, betw: 2 **Bendlets** S: born by *Ince*, or *Im*.

XXIII. He beareth Azure, a **Bend Engrailed** Argent, **treble cotized**, Or: born by *Fenisse*. This is of some blazoned; a **Bend Engrailed** between 6 **Costs**. Now as the Bend is born both plain, and after the several forms of Lines before specified; so also are the **Costs** born after the same sort: One or Two Examples thereof I shall give you.

A: such a Bend G: cotized S: born by *Tetlow*.

O: such a Bend V: cotized G: by *Reys*.

B: such O: double cotized A: by *Omnalley*.

S: the like A: treble cotized O: by *Sasseard*.

XXVI. He beareth Azure, a **Bend cotized Dauncettie** Argent: by the Name of *Dauncester*. Here I name not the Bend colour, because it and the Cotizes are all of the same. And the Bend being plain, I mention the **Dauncettie** after the Cotizes, as belonging to them; which had the Bend been **Dauncettie** also: I would have said, a **Bend cotized both Dauncettie**.

It is also blazoned, B: a **Bend A: cotized Dauncett** of the Second.

XXV. He beareth Argent, a **Bend Azure, double cotized Potent Counter-Potent** Sable; anciently termed a Bend between two **Bends Potent-Counter-Potent**: So that Bends as well as Cotizes are made after the same form. *B. swell, pag. 35*. useth a way of numbering the Potents within the Cotizes; saying each to contain so many points or pieces: Which way of blazon is very strict, seeing Heralds must be tied to number where there is no need of numbring; especially considering an **Escuchion** may contain more or less, according to its greatness or smallness: Therefore, in such cases, not only in this, but in several others (the like bearing) it is but a nice curiosity to stand upon such terms.

Azure four **Bendlets Potent-Counter-Potent** Argent: born by *Demrant*.

Cotizes are born both plain, and composed of the several sorts of Lines which the other Ordinaries are. Yet note this, that generally the Cotizes are plain on that side next the Bend (except in those, **Waved** or **Dauncettie** which ever go alike in both sides; as in the Example, *Numb. 24*. And in this of **Potent-Counter Potent**, where the inner sides are only stricken in one to the other.) But if the Cotizes be **Invecked**, **Engrailed**, **Notwed**, **Imbattelied**, or the like, on both sides (as I have seen in Coats of Armour;) then I should think it fit to have the Cotizes nominated, to be **Invecked**, or **Engrailed**, &c. on both sides. But the one side, and that the outer, being composed of the Lines, it needeth no mention of that side, being it is more common and known, when the both sides are more rare; therefore the fitter to mention.

A: a Bend and Cotizes **Engrailed** S: born by *Ducker*.

O: a Bend S: **Cotized** and **Engrailed** on both sides G: by the Name of *Mildred*. Yet some have been so exact that they have named the outside, or inside, or both sides, according as they are or have been seen.

S: a Bend A: cotized counter-Flowry O: by *Neik*.

A: a Bend between two Bends (or **Bendlets**) **Raguled** S: born by the Name of *Folesby* in *Durham*.

Some blazon it a plain Bend between two other **Raguled**: but the naming the one between the two other shews the first to be plain, else it had been as easy to say three Bends **raguled**, if they had been all alike. See *Chap. 5. Numb. 20*. what **Raguled** is.

XXVI. He

XXVI. He beareth Gules, a **Bend of a Limb of a Tree Raguled** Argent: by the Name of *Papudock* of the *Higlands*: ther is a **Bend Raguled**, which is not after this manner (as if the boughs and branches were cut off) but plain as in *Croftes Chap. 5. Numb. 20, 21.* *William, fol. 142* terms this kind of **Bend**, **Raguled** and **Trunked**; which neither *Leigh*, nor *Ferne* doth: Neither properly can it be trunked, except it were wholly in the Field, and touch no part of the sides of the Escuchion; and then by some, such is called a **Ragged Staff in Bend**. That which is in the **Bend Crenelle**, *Numb. 32.* being made by Art to Scale Walls; is in this naturally found, as fitted for such purpose, as to let up to the side of a Wall, and so to climb up by it.

Ingelsteter a Family in *Bavaria*, beareth such a **Limb** c lie ways, S: in a Field O:

XXVII. He beareth Argent, a **Bend Patee** Gules: this at first view seems to be **Rebulee**, from which it is not far unlike, yet something it differs, for **Rebulee** is round, and this is cornered with acute Angles. this is born by the name of *Patteson*, or *Pafson*.

XXVIII. He beareth Or, a **Bend Potentee** Vert: born by *Croucher*. Here you see the difference between the single Term **Potentee**, or **Potent**, to that of **Potent-Counter-Potent**; *Numb. 25.* The first having the Lines running on the outside, as all the Lines do; the Second having them on, or in the Ordinary, counter-pointing one the other.

XXIX. He beareth Argent, a **Bend Ardee**, or **Champaine**, Vert. It is called also, a **Bend Warri-ated** on the out files. And a **Bend Crenelle**, **Points Pointed**: but then the heads ought to be set one opposite to the other, as in the **Bend Crenelle**. *numb. 32.* this is born by the name of *Ch. mifer* and by *Liott*.

XXX. He beareth Or, a **Bend Gules: Ardee**, or **Champained**, (or **Championed** by Some) Sables. & is born by the name of *Ammerhagen* a *German* Family: this by reason of the **Champaine's** being of an other colour, is like a **Bend Surmounted** of an other, *Verdee*.

XXXI. He beareth Argent, a **Bend Nowy Quadrat** Sable. by the name of *Beilstone*. This is also termed a **Bend Single Brettesled**: or a **Bend Nowy Quaderangled**.

XXXII. He beareth Azure, a **Bend Brettesled**, Or. This is born by the name of *Bretsett*. This differeth from the **Crenell**, or **Imbatteling**, in two things: first the **Bend Imbattled** hath a larg and broad **Bend**, and this rather a **Bendlet**. Again **Imbatteling** stands equally proportioned on both sides, with the **Nuoches** contrary one to the other: whereas this hath them one opposite to the other: as if they were **Strong Staves** put throw a peece of Timber or a Pole or a tree to clime up thereby. After this manner, Souldiers in default of Scaling Ladders, used to put into long Poles and peeces of Timber, Strong pinns of wood: by which they ascended, and surprized the walls of an enemy.

Bends of this nature, have not about 3. or 4. of these **Nouches**, where-as **Imbatteling** may have as many as one pleaseth: neither is this terme **Brettesle**, used to any of the Ordinaries, except the **Bend**, the **Fesse**, and the **Pale**, to which it properly be longeth: And is of some old Heralds called, **Bettesled**: and **Aspined**, as c 6 n 62.

A such a **Bend couped** G. by *Van Donop* of *Bruswick*.

XXXIII. He beareth Purple, a **Bend Imbattled**

Argent. by the name of *Studman*. This is blazoned also a **Bend battelled**: or **Crenelle**. And of others termed, **Counter-battled**: or **Battelled Counter-battled**, because the **Battellings** generally are set on the two sides of the **Bend**, one contrary to the other, not opposite.

Mr. *Morgan lib. 2 chap. 23.* Saith, That it is to be observed: That if any Ordinary be **Imbattled**, or **Crenell** on one side, then it is to be blazoned either **Crenell**, or **Battled**, or **Imbattled**. but if the same be so on both sides: Then it is only termed, **Counter-Imbattled**, Which may be in **Bends**, **Fesses**, **Pales**, &c.

S: such a **Bend Er**: is born by *Ma:ston*.

G: one **Imbattled** on the top A: born by *Sackkirch*.

XXXIV. He beareth Tenney, a **Bend Nowy** Argent. this is born by the name of *Putt n*, or *Putt n*. As this is only with one Round in the middle of the **Bend**, so you shall have them **Nowy-Losengy**, and **Nowy-Quadrated**. and Coats also that are double and treble **Nowy**. as the next example.

XXXV. He beareth Or, a **Bend treble Nowy**, Gules. by the name of *Skarrot*. Some call it a **Bend Nowy**, if there be more then one Round upon it. others say if there be more then one, it ought to be termed, **Bottomy**, or **Pomety**, and not **Nowy**. Yet others blazon it **Brettesled-Nowy**: Because they stand one opposite to the other, as **Brettelings** doth. se *numb. 32.*

XXXVI. He beareth Argent, a **Bend Counter-flory**, Gules. Such a coat is born by the name of *Hillord*, and of *Bromflett*. Sometymes the **Florying** is of a contrary colour to the **Bend**: Then blazon it, a **Bend G: counter-flory**, S. It is of others termed **Flory Counter-flory**, and **Flory Counter-changed**. se the difference of **flory**, and **counter-flory**. *numb. 78.*

XXXVII. He beareth Argent a **Bend Debruced**, (or a **Bend Fracted**, or **Removed**) Azure. born by *Br ker*. This was in old tyme blazoned; a **Bend Double Dauncette**. Which terme I have severall tymes met with in old blazoned coats. Yet could never meet with it manifested by an example, tell in viewing of an old booke in the Heralds Office, I found a **Fesse** broken after this manner, and there termed **Double-Dauncette**: Which I do conceive, is nothing agreeable to its being. Also by some it is termed **Double Down-sett**: Which is more proper, then **Dauncette**. se *numb. 75.*

XXXVIII. He beareth Azure, **Bend Angled**, Argent. born by the name of *Squarrell*. This was of old blazoned, a **Bend Bevelle**: but **Bevelle** is with more Acute corners this having them of a perfect Square: Therefore more properly said to be **Angled**.

XXXIX. He beareth Gules, a **Bend Bevelle**, Or. by the name of *B. vile*. This **Bend** though it be like that *numb. 37.* yet it is much different, Seeing this hath a Substancie of the **Bend** in the joyning of the **Bevelle**, whereas the other hath none, but the two ends standing, or lying, each side the other.

XL. He beareth Argent, a **Bend per Bend Indented**, Gules & Or. born by the name of *r se*. this is (as I have shewed, before in the examples of **Chiefs**) blazoned **Point in Point**. Which it cannot be except the **Indents** run from one side of the Ordinary to the other. se *chap. 3. numb. 47. & 50.* Thus **Fesses** are also born

as G: a Fesse Indented A & B. by the name of *Wilden*.
And the same in Pointe by *Van Trautenberg* of *Bavaria*.

XLII He beareth Argent a Bend per Bend Crenell or Battled, Vert & Gules. dy the name of *Manners*. This also is blazoned Point in Point Imbattled: &c

XLIII He beareth Azure, a Bend Gobbonny, Or & Gules, eise a Bend Gobbonated. This is borrowed from our old English word *Gobbeus*, or small peeces; For so this Bend seemeth to be cut into.
Such a one over 2 Barrs A: belongs to *Leigh* of *Adlington*.
A such an other O B & G is born by *Crommally*.

XLIII He beareth Vert, a Bend Compony, or (after some) Counter-Compony, Or & Vert. born dy the name of *Goodecompany*. As the aforefaid example doth consist of peeces: So this is framed of two Tracts, or Rows of Colours, Compounded, or Conterly placed.

Er: the like A & S born by *Curssune*. & *Armball*.

XLIII He beareth Or a Bend Chequie, or Checkie, Argent & Sable. born by *Stirrope*. This way of Chequie, when it is upon Bends, Fesses, Barrs, and such like; is ne, ver lesse then three Tracts, or Rows of lines; but in all fields there may be as many as the *Painter* (with discretion) please. G the like O & V born by *Stilley*.

XLV. He beareth Argent, on a Bend Azure, three Cheverons, Or. by the name of *Pencher*. After this maner Bends are charged with Fretts, Fesses, Barrs, Crosses, and Salters. As in the next example.

Ers the like O 4 cheverons G born dy *Kendale*.

XLVI He beareth Or, on a Bend Azure, a Fesse Argent, charged with a Salter Gules. born by the name of *Hadlen* a *Germane* family.

A on the like S 2 Barrs O. by *Don Garillo* a *Spaniard*.

XLVII He beareth Purple, a Bend Archy Argent. or a Bend Champaine, after some Authors: or *Shapburne*, by others. This is born by the family of *Archy*.

G the like A: charged with 2 fishes *Nasant* Respeying each other B. the coate of *Schmback* of *Bavaria*.

G: 2 such Sinister O. is *Glatz*'s coate of *Bavaria*, & is quartered by *Monsterberg* a *Germane* family.

XLVIII. He beareth Or, a Bend Archee, Coronette on the top side, Gules. Some say, Having the higher side Coronett-waves, *Morgan* lib: 3. fo: 39. termeth this a Coronet in Bend. but he should then have said (*Extended in Bend*) because it reacheth from side to side of the shield.

Barry of 10 O & 2 such a Bend 2 born by *Peter* of *Savoy* Duke of *Saxony*.

A a Fesse S the like O born by *Van Wageleben*.

XLIX He beareth Argent, a Bend Traverse, Counter-pointed, Sable. by the name of *Traverse* or *Travis*. This hath the resemblance of a Trench or out worke of a *Campe*, made by Souldiers when they besiege a Fort, or City, to keep their enemies from Sallying out upon them. from whence I suppose it took its name.

L. He beareth Argent, a Bend Fusill, Gules. born by *Lymnoll*. Some Heraulds number the Fusils, which is needlesse, when they extend to the out sides of the Escuchion: And begin, or end, or both, with Demy-Fusils.

Sometymes you shall find coats with them contrary coloured; that is, one of one colour, and the next to it of an other colour: Which is thus termed, a Bend Fusill, Arg-

& Gul: Alternatively. or Losenge, A. & G. Gradam. or Gradually the one Arg: & the other Gules.

And as these are born in Bend, So are they in Fesse, Pale Crossle &c: Which examples in those Ordinaries I forbear there to shew for brevity sake.

Some have the Bends plain on the out sides, yet wrought upon with Fusill or, Losenge work, which consisteth of two colours: And then they are blazoned Fusilly or Lozengee. se chap: 7. numb: 113.

A the lik S is the coat of *Glastonbury*.

O the like B born by *Hean Foktrm*.

LI. He beareth Azure, a Bend Mascular, Or. born by *Wallesey*. Bends, Fesses, Pales, &c Are born Masculy like to the Fusill; Which is the same in shape, only the one is Solid, and this Voyded, haveing the field scene through the middle of it: Of these kinds and sorts of Bearings, You shall receive further Instructions in chap: 6 numb: 71 to 88.

¶ If the Field or Ordinary are wrought into Masculars, then it is termed, Mascular, or Mascularly, or afterwards, Mascular-Waves. As afore-said of Fusill, and of Fusilly: Losenge, and Lozengey. For there is a manifest distinction therein, which is to be carefully looked into.

LII. He beareth Argent, two Bends Fusill, Contoynd, Gules. or eise termed a Double Bend Fusill: because they stand not asunder, but touching each other in the points. This is the coat-Armour of *Strongbow*. and of *Van Reinsberg*. of *Switzerland* in *Germanie*.

A two such Sinister G is the coat of *Van Crefmits*.

LIII. He hath for his Coat-Armour Or, a Bend, and on the Sinister side two Bendlets, Vert born by *Budy*.

A the like G on the same side two such, V by *Tarry*. If they be of contrary colours as this is: Then first name the Ordinary & its colour: then follow with the Diminutions, observeing the place they stand in, whither on the Dexter or Sinister side of the Escuchion, naming their manner of forme and the colour they are off.

LIII. He hath for his Armes Argent, three Bends (or Bendlets) in Chief Gules. by the name of *Brown*. These I call Bends in Chief, because they are all seated in the top or head, or chief part of the Escuchion, no part of them falling into the Dexter side, but all on the Sinister; which they could not be, if any of them were drawn out of the Chief. Some term them Bendlets on the Sinister side of the Escuchion: or on the upper part of the Escuchion.

A 3 such V by the name of *Monnyrell*.

LV He beareth Or, a Bendlet Indented on the Lower side, betwene two other; that in base on both, Sable. by the name of *Detymont*. Others blazon it thus, Three Bends of which one & an halfe is Indented to the base. And others 3. Bendlets, the middle on the neither side and an other in base Indented. Others again I finde termes them 3. bends the middle Indented on the bottom, and that in base on both sides.

LVI. He beareth Argent, two Bends Azure, Engrailed, Sable. Which is born by *Golt*. in the *Duchy* of *Prabant*. This Coate is also blazoned, 2. Bends Engrailed. Surmounted of as many. se Cha: 3. numb: 68. an Example of like nature.

G the bend O engrailed A, betw: 6 Coronetts Contrary: posid of the *Second*: born by *Eljas*. Quarterly A & G on the first & last a Bend & 2 & 3 such a Bend Counter-changed. is the coate of

F

the

the *Wappen* of *Strasbourg*, in *Germany*.

V the Bend A Engr: O. is born by *Milforth*.

LVII. He beareth Or, two Bends, that in dale, *Hunnett*, (or *Hunnetted*) in the Dexter end, Sable. born by *Tennaker*. Some do blazon it, 2 Bends the undermost *Couped*, (or cut Short) in the Top. See the meaning of the Termes: *Hunnett* & *Couped*. In the Examples of Fesses of that nature: *numb: 63*.

LVIII. He beareth Azure, a Bend Archy, Or: *Edged*, & *Adorned*, with three of the *elestrall Signes*, viz: *♈ Sagittarius*, *♏ Scorpio*, & *♎ Libra*, Sables. This is and may be termed, a Bend containing the fourth part of the *Zodiack*; because it hath but three of the *Signs* fixed thereon. If six of them were Seen upon it, then it is termed the *Hemi-Sphere*, or the *Hemi-Zodiack*: That is halfe of the *Zodiack Circle*, which is as much as can be seen of the *Celestial Globe* at one Instant of tyme & place.

♂ on a Bend Sinister ♀: Three of the *Selestial Signs*, Viz: *♈* *♏* & *♎* of the first. Is born by the *King of Spain* in memory of his Discovery of that Quarter of the World called *America*.

lix. He beareth Or, three Bends Gules, *Floried* on the *Cops*, Sable. by the name of *Florisham*. Some of our old *Heralds* terme these 3 *Gartiers*, or *Cotts*, *Couped* on the Top & *Flouried*.

LX. He beareth Argent, two Bends, the one at the bottom, and the other at the Top, *Couped* & *Irradiated* or *Rent* and *Torn*, (or else *Splattered*, as some have it) Gules. by the name of *Brackenstffe*. In such bearings as these, the higher, or that next the *Chief*, with its concernments ought to be first named.

G the like A is born by *Splendering*.

Of the Fesse

2 THE Next Ordinary in order to be spoken off, is the *Fesse*, which is Formed of a two-fold Line, Drawn over-thwart the breadth of the *Escuchion*, in the middle thereof. Which in its Content, comprehends the third part of the field, and may not be Diminished.

3. This word *Fesse*, cometh from a *French* word that signifieth, The *Loins* of a *man*. This Ordinary hath Line Anciently taken for the same which the *Latins* call, *Baltrum Militare* or *Cinctum Honoris*, a Belt of Honor, because it divideth the field into equall parts, it selfe occupying the middle between both: even as the Girdle Inviroweth the middle part of a man; which was a gift in Ancient tymes, bestowed by Emperours and Kings and their Generalls of the field, unto Souldiers for reward of some especial Service. As we may see by *Joab's* words to the Messenger that saw *Abisalom* hanging in the Oake: *Why hast thou not killed him, that so I might have rewarded thy Service with ten Shekells of Silver, & a Girdle (or Armed Belt) as it is in 2 Sam: 18 11*. And amongst the *Macedonians* it was ordained by a *Military Law*, that the Souldier that had not Killed an enemy: *Non militari Cingulo, sed Capistro cingetur*. Should not be girt with an *Armeing Girdle*, but with an *Halter*.

LXI. He beareth Argent, a *Fesse*, Gules. by the name of *Solets*. And also by the family of *Dodinefs*.

O the like B born by *Vernon* Baron of *Shipbrook*: one

of the Ancient Barony's in the *County Palatine* of *Chester*.

LXII. He beareth Azure, a *Fesse Voided*, Argent. by the name of *Bluhall*. Some will say, *Voided* of the field, which needs not: for by the terme, *Voided*, or *Voiding*, is ment, that the colour of the field is seen betweene the sides of the *Fesse*. If the *Voided* part were of any other colour then that of the field, it is then blazoned, a *Fesse* Argent, *Surmounted* of an other Gules: or of such or such a colour. And againe others do terme them two *Barris*, or a *Barr Gemeile*, Yet it cannot be either, seeing it is only the breadth of the *Fesse*, and set in its own place: whereas the *Barris* do equally divid the field. And besides are never born Single. *Je numb: 85 & 92*.

LXIII. He beareth Argent, a *Fesse Couped*, Sable. Anciently this was termed a *Fesse Carneile*, and by some a *Hunnett*, or an *Hawmed*, as *Leigh* pa 106. & *Bosar* pa: 14. If three such as these be in one Coat, then they are and may be properly termed, three *Hunnetts*, which by reason of their Extention can be set no other-ways, then one above an other, which in such cases needs no mentioning to be in Pale. S the like A: born by *Bosack*.

O such a *Fesse* G by *Masham* of *Essex*.

A 2 such V on each 3 flowers De-lis born by *Rawley*

Er: 3 such G by *Dabrigcourt*. or *Abbriscourt*.

LXIV. He beareth Or, a *Fesse Hunnett*, Gules. by the name of *Hunnetts*. This differeth from the *Fesse couped* in this: That it sheweth its thickness, whereas the other lyes plain on the field shewing none at all. *Grilliams folio 309*. is of an opinion, that this is more properly called a *Cable*, others a *Grave ston*, and so the same hath bin anciently blazoned. G the like betw: 3 *Trestles* A: by the name of *Stratford* of *Glostershire*.

LXV. He beareth Argent, a *Fesse Imbattelled*, on the Top, (or higher side) Azure. born by *Batillerall*. As this is *Imbattelled*, so you shall finde them *Indented*, *Engrailed*, *Champaine*, and the like: according to the severall varieties of Lines before shewed &c: *Margaria his Sphere l: 2 fo 41*. Saith, This is the only *Imbattelled*, for if it be so on both sides the Ordinary, then it is termed properly *Counter Imbattelled*.

A such another S by *Walton*, & by *V. n Crumenaw*.

A the like G by the name of *Plumbe*.

LXVI. He beareth Or, a *Fesse Crenell*, (or *Imbattelled*) Gules. by the name of *Crenell*. *Je the next n 67*. A the like betw: 3 *Escallops* S born by *Beckingham*.

LXVII. He beareth Azure, a *Fesse Imbattelled-counter Imbattelled*, Argent. Here you may see the difference of *Counter Imbattelling*, (or *Counter-Battleing*) to that as hath but only the terme of *Imbattelling*, the one being a *Fesse* in its full thickness, with the Battlements set in good order, & opposite one to the other: but this hath the Battlements the one contrary to the other, so that where there is a void place betweene the Battleing on the one side, it hath that want supplied, by having the Battleing against it on the other side. And besides all this, In the *Counter-battleing*, the *Fesse* hath not the same Proportion in thickness, as the *Imbattelling*, for it contains not above the thickness of a *Barr*.

The aforelaid coat belongs to the name of *Barnas*.

G 2 such A is born by *Argelm*. & by *Prancke*.

LXVIII. He beareth Argent, a *Fesse Brettelled*, Gules: this

This is likewise no broader then a Barr, and hath the Brettesles set one against the other, as is shewed more fully in the Bend of this nature. *numb: 32.*

LXIX. He beareth Azure, a Fesse Battled Imbattelled, Argent. This is as it were, Double Imbattelled: or else, having one Battlement upon an other. So that in these five last examples, you may see five ways of bearings in Battlements, and all contrary to others, both in shape, & in the termes of blazoning; Yet neere in resemblance. others call this a Fesse Grady Imbattelled, and is born by the name of *Armestronge*. *sc c 3 n 84.*

LXX. He beareth Or, a Fesse Nowye, Azure. by the name of *Fesserm*. This Nowy is born Quadrant, and Lozeng-wise, of which I gave examples in Bends, *numb: 31 34.* This is also of some Authors termed a Fesse Bottom, or Dometty. Which being Gules, in a field Argent. is born by *Arlson*.

LXXI. He beareth Azure, a Fesse Indented, Argent. born by the name of *De-binghan*. Here you se the difference of an Indent, & a Dauncett: The one hath as many Points, or teeth, as you please, standing either contrary or opposite one to the other: but the Dauncett never exceedeth three points (Some say foure) on the top: And that the Points in the bottom, strike directly into the points on the top; So that it seemes to be but a Crooked Fesse, which were it Stretched out, would be Straight, and even. Which the Indented one could, nor would not be.

A the like G born dy the name of *Barton*.

LXXII He beareth Argent, a Fesse Dauncett, (or Dauncettee) Purple. by the name of *Stonmash*. or *St. andmarch*. This hath anciently bine blazoned a Dance; or Dancee: & a Fesse Counter Indented. It is the opinion of some Authors, that if the Dauncetts exceed 3 points on the top they ought to be number'd, as a Fesse of 4 5 or 6. Peeces: That is, hath 4 5 or 6 Points on the higher Side. Yet for my own part, I hold it best made when it consists only of 3. points.

This kinde of Fesse I have not only seen Dauncett, but the points have bine Ingrailed, Invecked, & Waved, &c: Which is one addition of a Line to an other; making such Coats Prodigious, Yet the like bearings are above 300. yeares old.

A a Fesse Daunsty G (so called of old) & born by *Che-dle of che le.* also by *Dedyn*.

Er: the like S. born by *Deincourt*. & G the like A is born by the name of *Papworth*.

LXXIII He beareth Or, a Fesse Dauncett Counter-Flory Gules. by the name of *Flower*. And after others, a Fesse Dauncett of two Peeces Floritce. by some termed thus (having but two Points) a Double, or two Cheverons Conjoyned in Fesse, Counter-Flory. In Coats of this nature, it is very necessary to Number the Points, else the Tricker of Coats may be deceived by its terme of blazoning.

B such a Fesse flory. O is born by *Ploden*.

LXXIII He beareth Argent, a Fesse Dauncett Gobony, Sable & Gules. or else a Fesse Daunsty, Pale of 6. For the Gobony in such Ordinaries are ever drawn from Point to Point, or else it will not keep an Handsome Decoram. This is born by the name of *Courtley*.

B a Fesse Dauncett Parted per Fesse Indented, A & S. is born by the name of *Doling*.

A the Fesse Dauncet Gobony O & G. *Van Cess-1113*

LXXV. He beareth Azure, a Fesse Debruced, Or. This Fesse I finde termed severall ways: as Fracted, Removed, & Double Downe-set. all which is as much as to say, a Broken Fesse. *se numb: 37.* Such a Fesse is born dy *Raumburgh* in *Germanie*.

LXXVI. He beareth Argent, a Fesse Nebulee on the top, & Invecked in the Bottom, Gules. This is born by the name of *Wakwater*. The Invecked points ought to answer the middle of the Nebulee points, else it is not rightly Drawn: besides one part of the Fesse will e broader & thicker then the other, if that be not observed in the Composure of the Ordinary, either of this or any other kinde.

LXXVII. He beareth Or, a Fesse between 2. Barrulets, Azure. This is born by the name of *De la Biere*. It is of some termed a Fesse Cotized, or betw 2. Cotizes: but that is very improper, by reason a Coss, or Cotize, is the Diminution of a Bend, and must be set alwayes Bend-waves, else it loseth its name. But this being the Diminution of a Barre, and set after the maner of a Barr must therefore have its proper term belonging to it fesse, & not to take its name from that to which it hath no Affinity.

It is by others termed, a Fesse between 2. Gemells: And that is as far from the Marke as the other: For a Gemell ever goeth by Paires, or Couples, & not to be Separated, but here being parted the are no more Gemells, or Twins, but Barrulets.

This is by some more Skillfull, blazoned a Fesse between 2. Clossetts. Which is more proper then Cotizes: because the Clossett is the halfe Barr, & is a Diminutive of or from it, as you will heare hereafter. *numb: 81.* So then to say a Fesse Clossed, or Clossitted, are no bad termes.

A the like S is born by *Sch. rp. fessm* in the *Palatinate of Rhine*. Also A a Fesse & one Barrulett over it V. is born by the same name.

G the like A by *Poyas*.

LXXVIII. He beareth Argent, a Fesse Gules, between two Barrulets Flory Vert. Here in this Example, take notice of the difference between Flory, (or Florty, or Flurt, as some call it) and Counter-Flory: The Flory or Flurt being only the tops or heads of the flowers de lis; and the Counter-Flory or Counter-Flurt, have both parts of the Flower de lis, but with this difference, that the heads and feet, or bottom part, are ever set contrary one to the other, as in *numb: 73.* and *83.* see the same in a Bend Counter Flory, *numb: 36.* born by the Name of *Trient*, of *Holland*.

LXXIX. He beareth Or, a Fesse, Azure, between two Barrs Gemell, Imbattelled, Sable. Here is the right term and nature of a Gemell, which like Twins ever go together, there is no parting them: Yet some have blazoned these a Fesse between two double Cotizes, or (double Cotized) though improperly. Therefore note, That when the Fesse is between two single ones they are termed Barrulets; if they be double, they are Barrs Gemelle: if treble, they are Barrulets again; born by the Name of *Lamare*.

A. a like Fesse B. by the Name of *Wifare*.

G. the Fesse Cheque Az. S. the Gemells. O. born by *Whitell*.

A. Fesse per Fesse Indented: V and S the Gemells counterchanged, born by the name of *Stowell*.

LXXX. He beareth Azure, a Fesse Ermine edged between two Barrulets: Or: if the Field had been White,

I should then have said, 4 Ermyne between two Barrs Gemelle. This is born by the Name of *Passaw*, a German Family.

S. the Fesse Ers. the edging and Barrulets A. born by *Sirudel*.

LXXXI. He beareth Or, a Fesse Argent, edged Gules: or else you may blazon it thus, Or, a Fesse Gules, surmounted of another Argent, born by the name of *Weingartyn*.

O: 2 barrs: G: edged: S: born by *Wittenberst*.

LXXXII. He beareth Azure, a Fesse and Canton Or. What the Canton is you shall know hereafter: But in this Coat, and such of like nature, you must observe, that if these two ordinaries be both of one colour, then their parts are not severed by their proper and distinct lines, but are joined together as one entire thing: Nevertheless, they may be easily conceived, what ordinaries they be composed of, notwithstanding the defect of the said Lines. And as it falls out in these two, so you shall have the like in Barrs and Cantons, Chiefs and Bends, &c. *numb. 96. 99.*

A the like G born by *Woodville*.

A 2 Barrs and Canton G born by *Deane*.

A 3 Barrs and Canton born by *Fuller*.

S a Chief and Bend A by *Christiane*.

A a Salter and Chief G by *Bruse*.

LXXXIII. He beareth Argent, a Fesse Azure, Counter-Flory (or Counter-Flurty) Sable. This is also termed Counter-Flority, Counter-Flurty, and Counter-Flowered; and some Heralds use this nice distinction between Flurty, and Flurty, as to say, the first signifies the heads of the Flowers de lis only, and the latter for both top and bottom of the Flower de lis, but so as to have them set contrary one to the other, both on Bends, Barrs or Fesses; and the like they observe in Flory and Flority; the first for the heads, and the latter for the whole Flower de lis contrary set, as in this Example; so that by this observation, and Critick distinction, such Heralds blazon this Coat thus; Argent a Fesse, Azure Flory or Flurty Sable; but I hold it best blazoned, to have the term (Counter) added, and then there is no fear of a mistake in the tricking; which otherwise, upon such nice expressions, there may be. This is born by the name of *Flowerage*.

V such a Fesse O born by *Harold*,

LXXXIV. He beareth Or, a Fesse double downsett Gules: Some term it ramped, and coppee. See more in Cheverons, chap. 6. *numb. 27.* this is born by the name of *Beedle*.

Party per Fesse B and G the like Fesse Couped A. is born by the name of *Van Sintzendorf*, in the Dukedom of *Austria*.

LXXXV. He beareth Argent, a Demi-Belt fixed in Fesse Azure, Buckled, Edged, and Garnished, Or, this is the true Fesse, which is meant for nothing else but a Belt encompassing the middle or waist of a Man; and I call it a demy Belt, because but the one half of it is seen; Though some Blazon it a Soldiers Belt extended in Fesse. This is a German Coat, and is born by the name of *Beltmaine*.

Of the Barr.

3 THE next in order to the Fesse is the *Barr*, and may (without offence) be said to be a diminution of the Fesse, though some Heralds hold that it cannot be divided, but that the Barr is an ordinary of it self, which I shall not much dispute about, but leave it to it self.

LXXXVI. He beareth Azure, a Barr Argent. This ordinary differeth from the Fesse, not only as it containeth a less proportion, not exceeding the fifth part of the Field (whereas the Fesse occupieth the third part.) but also that it is not tied to any certain or prescribed place, as other ordinaries; but may be transferred to any part of the Escochion.

¶ If there be but one in the Field, by the Rules of Heraldry, it is ever blazoned a Fesse, not a Barr; for it cannot be a Barr, except there be two or more in the Escochion; as you may see in the following Examples; this I having caused to be set here, for no other end than to shew its diminution from the Fesse.

LXXXVII. He beareth Or, a Closet Azure; a Closet is a Charge abstracted from a Barr, and contains the half of it in breadth; and of these there may be five in one Field.

LXXXVIII. He beareth Argent a Barrulet Gules; this is the fourth part of a Barr: These are diversly born in Arms, as plain, engaled, waved, Inbated, and the like, as you have examples in the Fesse between them before shewed, *numb. 77, 78, 79.* The Barrulet saith *Ligh*, p. 67. cannot be born dividedly, but by couples, unless they be parted with a Fesse or a Barr.

LXXXIX. He beareth Argent, two Barrs Gules; the Field being divided into five equal parts doth rightly compose this Coat, giving to each a just quantity and proportion: There are diverse opinions concerning the number of Barrs that ought to be contained in one Field; some say more, others less; but after the proportion of the Barr without diminishing it, the Field will contain but three, yet to the number of four may (without offence) be blazoned Barrs, and that in my Judgment can be the uttermost, what are above that number are termed Barrulets, or Closetts. This is born by that worthy Gentleman, and person of much Worth and Honor, Sir *Thomas Mainwaring*, of *Pever*, in the County Palatine of *Chester*, Baronett.

B the like A born by *Venables*, late Baron of *Kinder-ton* in *Cheshire*.

A the like S born by the Honorable *William Brereton*, of *Brereton*, Baron *Laughlin* in the Realm of *Ireland*.

XC. He beareth Or, five Barrulets Azure. This is also blazoned Or, five Closetts Azure: by this example you may see that the Barr doth loose its name when they amount to above four. In Coats of this nature, the pieces of which they are composed, are always of an odd number, as this doth, being of eleven pieces; but if it chance that they fall out to be even, then it is termed *Barry* of 4, 6, 8, 10, 12. as you will see in chap. 7. *numb. 69. 77.* where Arms are treated of, which have no predominate colour. Barrulets may be born in

in Coats to the number of fifteen, but not above. This is born by the name of *Youthline*.

O five such S. born by *Selby* or *Selsby*.

A five such G belongs to the Coat of *Valence*.

A six such G with a bend B born by *Scutevill*.

A seven such S born by *Samson*.

XCI. He beareth Argent, two **Barrs** between as many **Barrulets** Azure. This is of some termed two **Barrulets** **Cotized**, or between 2 **Cotizes**. But **Cotizes** are the proper term for **Bends**; yet sometimes the term is borrowed by Armorsists to Coats of this nature, for the better blazoning of them, as in the 94. example, and 77. This is born by the name of *De la Mough*.

XCII. He beareth Argent, three **Barrs** **Gemelle** Sable: This is another manner of bearing the Barr, called of some three **Gemulets**, or **Gemews**, or **Barrs** **Cupules**: because they are ever born by Couples, from whence the term **Gemelle** of **Gemellus**, **Twinn**, is derived: for a Child is no **Twinn**, except there be two, so these **Barrs** are not termed **Gemelles** except they stand by Pairs, or Couples.

☞ This term of **Gemelle** is used to no ordinary save **Barrs**, the *French* Herald *part 2. fol. 14.* doth blazon this Coat a Fesse of six pieces, but this is in regard the word (Face) stand both for a Fesse and a Barr. And also three **Gemelles**, they were called *ab antiquo*. This is born by the name of *Creswell*.

G 3 such O born by *Bensted*.

B 2 such A born by *Siphersst*.

S 3 such born by *Buckton*, with a Canton A.

G 3 such O 2 Canton S. born by Sir *Humphry Briggs*, of *Shapall*, *Barronett*.

XCIII. He beareth Azure, three **Barrs** **Indented** in the neither sides, Argent. born by the name of *Undercut*, or *Undercourt*.

XCIV. He beareth Argent, two **Barrs** **Cotized** Azure. and some thus, a Barr **Gemelle** between two **Barrs** **Cotized**: Others term it, a Barr between two **Closets** in Chief, and the like in Base. But the first is most proper, though it have but a borrowed term of blazoning by **Cotizes** instead of **Barrulets**.

☞ By which example you may note the difference between the **Barrs** being together, as *numb. 91.* and this of the **Cotizes** between the **Barrs**; for what thing soever is **cotized**, if they be two, three, or four, if they be said to be **cotized**, every particular must and ought to have its own **Cotizes**; so that the two between the **Barrs**, shews that one of them belongs to one Barr, and the other to the other Barr, as is shewed in **Bends**, *numb. 20, 21.* some again blazon this 2 **Barrs** each between two **Closets**. This is born by the name of *Couplesosse*.

XCV. He beareth Argent, three **Barrs**, the first with three, the second two, and the third one **Imbatell** on the top, Gules: Others blazon it three **Barrs** **Imbatell** on the top, the first with three, the second two, and the last one, by the name of *Van Pelsbach* in *Holland*. The like is born by *Van Der Warth* of *Barcaria*.

XCVI. He beareth Argent, a Fesse **Imbatell** (or **Battell**) parted (or double parted) Sable. This may very fitly be so termed, from the like parting in the example of **Crosses**, *chap. 5. numb. 82. 88.* being voided, or hollow, save in the places where the **Imbatell** doth join the same; otherwise if there were no

joining in the middle, it would then be blazoned, a Fesse **Imbatell**, **voided**. Some term this three **Pales** **cooped**, and two **Barrulets** conjoined Sable. Being all of one colour, they are joined together without the distinction of the lines of the Ordinories, as in the example before, of a Fesse and Canton, *numb. 82.* Others term it three **Billets** and two **Barrulets** conjoined Sable. This is born by the name of *Van Yffsburgh*.

XCVII. He beareth Or, three **Barrs** **Damcette** Vert. by the name of *Balony*.

O 3 such G by *Delmare*.

G 3 such A born by *Catnam*.

XCVIII. He beareth Argent, three **Pales** Gules, over all three **Barrs** Or; born by *Strongbare*. The like having the **Pales** S. and **Barrs** G. by the name of *Barre*.

XCIX. He beareth Or, two **Barrs** a Canton, and another in **Smaller Base**, Gules, born by *Deaneburgh*.

C. He beareth Argent, two **Barrs** **Counterpotent** Gules, edged Sable. There is some difference between **potent**, and **potentes** or **potented**, the one having the **potents** on the outside of the Fesse, as you may see in the Bend mentioned in this Plate, *numb. 28.* And this where they are all composed in the Fesse or **Barrs**, running contrary one to the other, thereby making themselves a compicat Ordinary: And as it is in this form of Line, so you will often find **Fields** and **Ordinaries**, so made, as in *chap. 7. numb. 117.* Some term this 2 **Barrs** **potented**: and also **potented** in 2 **Barrs**, and **Potent counter Potent**, as *numb. 25.* and **potency counter potency**; and **Potency in Point**. This is born by the name of *Newcut*.

Of the Esccheon.

4 THE next Ordinary to be treated on, is the **Esccheon**, which is an honourable Bearing, representing the form of an **Esccheon**, and containeth the fifth part of the Field (as saith *Leigh*) but his demonstration, *pag. 66.* demereth the third part, and may not be diminished: And although it be subject to some alteration, by reason of the different forms of Lines before specified, yet it keepeth its own set term of an **Esccheon**.

CI. He beareth Argent, an **Esccheon** Azure. The **Esccheon**, saith *Grilliams*, *fol. 86.* it is set in the Fesse point of the Field, then it shall be called an **Esccheon**, or an **Esccheon** of pretence: but if it be removed to any other place in the Field, or if there be more than one, then you shall term the same **Esccheon** or **Esccheions** born by the name of *Bartron*.

B the same A born by *Harleston*.

Er. the same G. born by *Halgrave* of *Halgrave*.

B 3 of the like A. born by the **Worshipful Company of Painters**.

A 3 such S. born by *Sudham*; also by *Matzingen*.

G 3 such each per Pale A and S. two **Cheverons** counterchanged by the name of *Schmartz*.

O 3 such B born by *Van Ahlsingen*.

A an **Esccheon** G by *Van Gerolt-Stein*, of *Rhine Palatinate*.

CII. He beareth Gules, on an **Esccheon** of pretence, Argent, another Azure. This was anciently termed by the name of a Fesse **Target**, because it doth occupy

the middle or *Fesse point* of the Shield. This is born by the name of *Scutimore*. Sir *John Ferne* terms it an *Escochion* of *pretence*, an *Engislet*, or *Felly Target* on an *Escochion* of *pretence*, O another B charged with the like A: such an *Inescochion* is born in the midst of the *Quartering* of *Hume*, Lord *Hume*, in *Scotland*.

CIII. He beareth Argent an *Escochion* Azure; *Flory* or *Flurt*, Sable, born by *Nichson*. Some use the term *Flit* on the outside in form of a *Cross*, by reason the *Escochion* (say they) might have had the *Flory* upon it; but then by their good favour, it would admit of another kind or blazoning, as thus; on an *Escochion* four *Flower de Lucés* issuant in form of a *Cross*: Or after some, four *Flower de Lis* tops fixed to the sides of the *Escochion*.

But here is one especial note to be heeded, and then the term (on the outside) needs not to be mentioned, and that is, when the *Escochion* is *Flory* on the out parts, then they are both of one Colour, or two; or of the two Metals, for they cannot be of a Colour and a Metal; but if the same *Flory* be a Charge on the *Escochion*, then the one must be Metal, and the other a Colour, except it be false Armory.

A like *Escochion* to this I have seen *Counter-Flory*, which in number never exceeds three tops and three bottoms of the *Flower de Lucés*, as the next example will demonstrate.

A the like B *flory*, V born by *Portugal*.

A an *Escochion* S. from the *Dexter Chief Point*, a *Rose Slip* proper, by the name of *Altorf*, of *Switzerland*.

O an *Escochion* *Flory* S born by *Van Hagenberg*.

CIV. He beareth Argent, an *Escochion* *Counter-Flory* of *Tulipas* and *Leaves Vert*; if these were of contrary Colours then blazon it thus, an *Escochion* Sable, *Counter-flowered*, with *Tulippas* Gules and *Leaves Vert*. After this manner you will find *Escochions* flowered and adorned with variety of *Flowers*, *Leaves*, and *heads* or tops of *Crosses*, with other such like things, of which you will see some examples in the *Orle*, in the next Section, *numb. 110.* and *chap. 9, 28, 29, 30.* This Coat is born by the Name of *Flowercros*.

G an *Escochion* *Loſengee*. G and B *counter-flowered* with *Tulipa's* and *Leaves* O by the name of *Schavenburgh*.

Quarterly O and G. an *Escochion* B set with 8 *flower de lucés* in point S born by *Mandeville*, some say set in the out-side with 8 *flower de Lis* all pointing to the *Fesse*.

CV. He beareth Or an *Escochion* *indented* (or cut, hacked and hewed) into on the *Sinister side Vert*. This sheweth to be a *Shield* much in *Warr* which hath received many blows upon, and cuts into it. This is the Coat Armour of *Van Zimmer*.

Of the Trefure.

5. THE next in rank of these kind of Ordinaries, is that of the *Trefure* with its diminutions, viz. the *Dyle*, which have the form of an *Escochion*, but

hath not the solid substance thereof, being they are evermore voided as in these following examples.

CVI. He beareth Argent a *Trefure* Sable. This word *Trefure*, may be thought to be drawn or proceed from the *English* word (*Tract*) it being only but a *Tract* or Line drawn about the sides of the *Field*; to which term or signification *Upton* aludeth, giving it this blazon: Argent a *Tract* Sable: It ever runneth answerable to the sides of the *Field*, if on a *Shield*, then it is in the form of an *Escochion*; if oval, the *Trefure* is oval; if square, then it is square; if the *Field* be round, or triangle, the *Trefure* is answerable therunto. This with a *Rose*, is the Coat of Sir *Josias Treleman*.

A a *Cheveron* G betw. 3 *Cross croſlets* fished S. within a *Trefure* *counter-flory* G. born by *Kenthy* Earl of *Cassels* in *Scotland*.

CVII. He beareth Or, a *double Trefure* *counter-flory*, Gules. This is all the ways that I ever saw the *Trefure* born as a *Trefure*, a *Trefure-flory*, a *double Trefure* (or *double Trace* as the *French* call it) *counter-flory*, and, a *trebble*, or two *double Trefure*, *counter-flowered*.

Now in the *Flory*, or *Counter-flory*, if the *Trefure* be square then it is set with eight flowers, but if it be any other form, it hath but six set about it. This is born by *Cmine*.

© the like, with a *Lion rampant* ♂, is the Arms of the Kingdom of *Scotland*.

Of the Orle.

6. THE next in order of this kind, is the *Dyle*, which is an ordinary composed of a threecold line, duplicated, admitting a transparencie of the *Field*, throughout the innermost Area or space inclosed. This hath the form of an *Escochion*, though not the solid substance thereof.

CVIII. He beareth Or, an *Dyle* Azure. - An *Orle* is taken from the *French* word *Oreiller*, which signifieth a *Pillow*, as if it were raised like a *Pillow* about the *Field*. *Upton* termeth it in *Latine* *Tractus*, a *Tract* or *Traille*, and a *Trace* simple; others an *Inner border*; some an *Orle* or *Escochion* voided. This contains only the proportion, as the *Escochion* of *pretence*, which is two parts less than the *Trefure*, and is ever born in the form of an *Escochion*, let the *Field* be either oval, triangle, round, or square. This is born by the name of *Pertram*.

B the like A. born by *Spring*.

G the like A. born by the name of *Hunſrevill*.

Mr. *Morgan* saith, if two of these be in a *Field*, it is termed a *Trefure*, but I cannot judge of it so, because this is unalterable, let the *Field* be what it will; and again this is ever set in the *Honor Point*, and the *Trefure* about the edge of the *Field*; so that they are two distinct things.

CIX. He beareth Argent, an *Dyle* of three peeces Sable. The *Orle* is born (saith *Chassaneus*) of many peeces to the number of six. They are termed a *double*, or *twofold*, *Dyle*, a *Triple Trace*, or *Orle*, &c. This is born by the name of *De la Champ*.

O the

O the like S born of the Bishop of *Main*, as Mr. *Gwilliam*, fol. 87. hath set it down.

CX. He beareth Or, an *Orle*, at each point, the head of a *Cross bottomy* Azure: The *Orle* (as the *Escochion*) is often born *flory*, *counter-flory*, and otherwise adorned, which for brevity I forbear to give examples; these may suffice to give instructions for many of this nature. This is born by the name of *Orlance*, or *Orlace*.

G the like A born by *Van Zedlitz*.

S the like O by *Van Rinderbach* of *Swabia*.

CXI. He beareth Argent, an *Orle Imbatellé* on the outside Azure. This Ordinary is born diversely, according to the several forms of Lines, and that on the inner and outward parts severally: This is born by the name of *Batt'round*.

If the *Orle* be Indented, Ingraled, Invecked, &c. on both sides, then it needs no mentioning, but an *Orle* Ingraled, and so of the rest; but if it be on the out, or inner side only, then it must be mentioned which side it is.

CXII. He beareth Or, an *Orle Ingraled* Gules. *Upton* (cited by *Gwilliam*, fol. 87.) blazons this an *Orle* Ingraled on both sides.

Note, that diverse Charges, as well Artificial as Natural, are born *Orleways*, or *in Orle*: as likewise in form of *Cross*, *Bend*, *Chevron*, *Salter*, &c. The examples whereof I must pass over, until a fit place be offered to handle things of that nature. The *Orle* is likewise composed of the sundry sorts of *Furrs*, but that I hold needless to use examples, seeing by their diverse manner of bearing in other Ordinaries, they may be easily conceived; and therefore shall leave them to observation. The *French* blazon this a *Trace engreilee* on both sides.

S the like A between 3 *Cressants* Er. born by *Bate-maz*.

CXIII. He beareth Argent, an *Orle* and *Hurts*.

Here I mention no colour of the *Orle*, because it is to be understood to be of that colour as the *Hurts* are, which is ever *Blew*. This is born by the name of *Shelhurst*. Also things set in *Orle*, or about the *Orle* are ever of the number of eight, which needs no numbering or telling; but if they exceed or diminish, then number them as in the next.

A the *Orle* with *Martlets* S. born by *Winnington* and *Leftwich*.

CXIV. He beareth Or, an *Orle* Gules, 10 *Billetts* (in *Orle* as some term it) *Sable*.

If any thing be set about the *Orle*, they are set after the manner of these two examples, and if they exceed 8 in number, they are to be numbered, or under; else not. This is born by the name of *Arrowsmith*.

This was anciently blazoned an *Orle* of *Humets* per *Border*, because they supplied the place of the *Border*.

A the same S. born by *Filkin*.

G the like Er *Semy de Billets* O born by *Welhope* or *Wallope*. The same also by *Walleys*.

G an *Orle* & *Semy* *Crusilee* O by *Bertram*.

S the like A *Bazontee* by *Hauks*.

Of the *Flanches* and *Flasques*.

7. THE next ordinary that follows in order, and according to the method of our Engraving them on the *Plate*, is the *Flanches*; which is an ordinary composed of a twofold line, drawn somewhat distant (but rather directly) from the corners of the *Escochion* in Chief, and so swelling by degrees, until they come to the middle of the said *Escochion*, and from thence descending unto the base points, as in the examples.

CXV. He beareth Gules, two *Flanches* Argent. This word *Flanch*, is derived from the *French* word *Flans*, which signifies the Flank of Man or Beast. I set the *Flanches* in the first place, not for preeminence of place) but because of its greater swelling into the Field than the other, and also by reason they are diminutions from this. In the making of these *Flanches* I rather follow the form of *Gwilliam*, pag. 84. than that of *Leigh*, pag. 70. who makes them swell so far into the Field, that they do in a manner touch each other; which they ought not to do.

CXVI. He beareth Or, two *Flasques* Azure. This is held for the more honorable ordinary (although it be but a derivative from the other) in regard it is more usually born. The term *Flasque* is either from the *French* word *Flequier*, or of the *Latin* word *Fleco*, to bend or bow. These *Flanches* *Flasques* are never born single, but always by couples; and sometimes you shall find these ordinaries composed of the several sorts of Lines before said, and also charged upon as others. This is the reward of a Gentleman for good service.

S an estoile O between them Er. born by *Habart*.

CXVII. He beareth Azure, two *Uolders* Argent. This is another deminution from the *Flanche*, and containeth the third part thereof. They are called *Uolders*, from the *French* *Voire*, which signifieth a Looking-Glass or Mirrour, which in ancient times were made commonly in that bulging form.

CXVIII. He beareth Argent, two *Flasques* Or, edged Gules; or after other, 2 *Flanches* charged or surmounted by *Flasques*. By the name of *Jury*.

CXIX. He beareth Azure, two square *Flasques* Argent: Some term them two *Flasques* rectangular, or acute-angled; but I should rather take them for two Triangles in the place of *Flasques*. Born by the name of *Van Darlipp*, alias *Van-erlip*.

CXX. He beareth Argent, a *Fesse* Azure, two *Flasques* engraled, Or; surmounted of as many Gules. Some hold that the *Flasques* cannot be voided, for then instead of *Flasques* they are to be blazoned, two *Chevron arches couchant* dexter and sinister. This is born by *Van Swalb. rlt*, a Low Country Name and Family.

Sometimes the *Fesse* surmounts the *Flanches* as in these Examples.

A 2 *Flanches* Chequice O. and B. over all a *Fesse* Er. by *Waring*.

G 2 *Flanches* Chequice O and B. the *Fesse* O *Waring*.

T O

TO
THOMAS COWPER,

Of the City of CHESTER, Gent.

Son and Heir of Thomas Cowper, of the said City, Alderman and
Justice of the Peace. Major, 1641.

Worthy Friend, Your forwardness in promoting this Work hath provoked many of
our Citizens to the like Zeal, which is thankfully acknowledged by him who is
ready to serve you whilest

R. H.

CHAP. V.

THE next ordinary to be spoken of, is the
Cross, which is an ordinary composed
of a fourfold Line, whereof two are perpen-
dicular, the other two are transverse; for
so we must conceive of them, though they are not
drawn throughout, but meet in couples, in four acute
Angles near about the Fesse point of the Escuchion.
This Ordinary together with the Salter, are subject to
no diminutions as other Ordinaries are; yet the Con-
tents thereof are not always the same; but they are
made lesser or bigger according to their being or not
being charged. For the Cross being single, it is the
fifth part of the Field, but charged upon, it contains
the third part; as in the examples

Of the Cross.

I. He beareth Azure, a Cross Or. In antient times
it was drawn after this form, and is taken to be the
true shape of the Cross on which it is said our Savi-
our suffered; yet this form of bearing it, hath been
much altered, through the inconsiderate handling of
common and unskilful Painters; so that this Cross I
have caused to be Cut, only to shew how in ancient
Rolls of Antiquity it was formerly depicted; and indeed
most consonant to Reason, that the Stem or lower part
thereof should be much longer than the cross part, by
so much as was requisite for its fixing in the Ground:
Yet in the rest of the Crosses following, I shall imitate
the vulgar manner of bearing now used. This form
of Cross, if it were coupé or cut off from the Field, is
termed a long Cross, as numb. 45.

II. He beareth Argent, a Cross Gules. This is so
generally known in England, that it is usually blazon-
ed only St. George's Cross, or the Cross of England. Up-
ton in his time saith, that several Armorsits gave it this
blazoning; the Shield Gules, four quarters Argent, which
is a very uncertain way for to decipher a Cross, seeing
quarters all meet in the Center of the Escuchion; they
might far better have termed them Cantons. If it be
not charged, some term it per Cross.

Crosses do receive diversity of names, according to
the diverse sorts of Lines whereof they are composed.

A the Cross G the Patronal Cross of St. George for
England.

O the same G St. Patrick for Ireland.

B the same O St. Dennis for France.

A the Cross G in the dexter quarter a Bloody Dag-
ger; which is the Coat Armour of the honourable City
of London.

G the same O by the name of Saroy.

S the same O by the name of F. mel.

V the like O by the name of Rising.

III. He beareth Sable, a Cross coupé and pier-
ced, Or: Some term this a plain Cross of equal
length.

~~But~~ If there be more than one in the Escuchion,
then they need not to be termed coupé; except there
be some of the ordinaries between them.

Of Crosses pierced.

2. **T**HERE are three ways of piercing the Cross and
Salter, which is only in the middle of them,
and that is when the colour of the Field is seen through
the

the same; wherefore good heed must be taken in blazoning Coats of this nature; For,

First, if the piercing be round, then the term pierced or perforated, shall suffice to signify an orbicular or round pierce or hole in the middle of the Cross; but if it be otherwise than round, then it must be named.

Secondly, a Cross pierced Losenge-ways, that is, after the form of a Losenge, with the points or acute Angles, streight upward and downward. Some say pierced Losengee, as *numb. 65*.

Thirdly, a Cross or Salter pierced quarterly; or quarter pierced, that is, when the hole through the Cross is foursquare, as *numb. 13*.

If these piercings be in any other part of the ordinary but in the middle, then they are not to be accounted for piercings, but for charges. Or if the Cross, as a crosslet, (or a Salter) had with the piercing, any more of the same nature upon any other part; as four of them at the four ends, or else were charged with any other thing, Natural or Artificial, then the pierce is no pierce, but a charge.

IV. He beareth Argent, three Crosses sable, they are never termed *couped* if there be more than one in a Field, for they are ever understood to be so: neither can two or three be in a Shield except they be coupled; without there be some other ordinary between them to which they may be fixed, as a Fesse between two Crosses, or a Pale or Bend between two, and the like, as in *cap. 8. numb. 67*. In which respect they must be termed *couped*, because they can be fixed to ordinaries, which they cannot in such like coats as this example. This Cross alone in a field, is by *Ligh, pag. 30*. called a *plain Cross humett*; or a *crosslet*, and others a *Crosslet*, that is a little Cross. This is born by the name of *Crosslet*. These Crosses are born composed of the several sorts of Lines, as is before described; and to give example of all the kinds thereof, is needless; seeing I have done it fully in Pales and Bends, therefore omit them here, seeing there is plenty of other sorts of Crosses.

B a Cross O charged with 5 Roses is born by *Grange*.

Such a Cross B charged with 9 Beazants, is *Hagen's* Crest of *Westphalia*.

V. He beareth Argent, a Cross *recoursie* Sable. This is by some blazoned a Cross Sable, surmounted of another Argent: of *Morgan, lib. 2. fol. 55*. it is termed a *Cross ciechee*, but it is fittest *recoursie*, because it hath the substance of the Cross taken away, the out-sides and ends of it only remaining; and differeth from the Cross voided only in this, that it hath ends, and the voided, none. This is born by the name of *Kacher*.

VI. He beareth Vert, a Cross *recoursie couped*, Or, by the name of *Courser*. This is of some termed a *Cross courlie voided*; others a *Cross umbrated*, but the umbrated Cross is tied to one colour, which is a blackish or dark colour; but this of *recoursie* may be of any colour of Mettle, neither hath umbrating so full a skore or so thick a line as this, but only a small line, to make as it were the sign or shadow of a Cross.

Some Heralds are of opinion, (to whom I adhere,) that the term *voiding*, is a term only belonging to Crosses that are conjoined to the sides of the Shield, or those that are coupled from it, which in the voiding

have no ends to the Cross, but the field seen quite through; and that the term *recoursie* to belong to all sorts of Crosses that are only voided of the field, yet hath the true form of the Cross, which it should have if it were not voided, as you may see in the examples, *numb. 10, 11*. and that umbrating is only a drawing or tricking out the form of any Cross with a darkish line, without any substance of a Cross to cast a shadow; but is only a meer shadow, as *numb. 73*.

The like rule may be observed for *voiding* and *recoursie*, in Bends, Pales, Salters, Cheverons, &c. as a Cheveron voided, and a Cheveron *recoursie*, *chap. 6. numb. 7, 9, 10*.

B a Cross flurt *recoursie* A born by *Melton*.

B a Cross crosslet the same A born by *Basing*, and so of the rest of the Crosses.

O the like G born by *Crekner*.

VII. He beareth Azure, a Cross *couped* Gules, *finibated* or *bordered* Argent. *Ferne pag. 173*. terms this a Cross Argent charged with another Gules; but it is too large a Cross to be charged on another, as the two examples following will manifest. Born by the name of *Grassior*.

VIII. He beareth Azure, a Cross Argent surmounted of another Sable. This is of some termed a *Cross edged*, in regard so little of the under Cross doth appear, as if it were but an edge, or border, or guard about the sides; but to be edged or bordered, ought to be whole at the ends as well as the sides. Born by the name of *Bleashume*.

IX. He beareth Vert, a Cross Argent charged with another Gules. Here in these three last examples you may see the difference between *finibating* (or edging,) of surmounting, and of charging; the edges of the Crosses in bordering ever goeth round the Cross, and surmount hath but a little part of the under Cross to be seen, and that on the sides only; but the Crosses charged, have a greater part of the under Cross seen, and the Cross upon it much narrower, not containing above the third part of the Cross charged. Born by the name of *Crosslate*.

X. He beareth Argent, a Cross voided Sable. This seems to be like the Crosses before said, one to be on another; but if you diligently observe, it is no Cross, but the Field seen through it. Some term this *voided of the field*, which needs not, for by voiding, is always understood to be of the colour of the field. By the name of *Woodneth*.

This Cross is born also, *waved*, *voided*, and *engraled*, &c. which is by some Heralds termed *sarcelled engraled*, which is as much as to say a Cross engraled (sawn asunder; but this word *sarcelled*, is much laid aside).

A such a Cross B born by *Wastborn*.

S the like A by *Wallham*.

S the like O by *Pulderfeld*.

B the like O by *Cruccur*.

G the like A by *Duxbury*.

XI. He beareth Azure, a Cross voided and *couped*, Or. *Morgan, lib. 4. fol. 60*. terms this a *Cross recercell disjoint*. By the name of *Crevequer*, of some written *Crevequre*.

XII. He

XII. He beareth Or, a **Cross Gules**, voided of another Sable. *Ferne* terms this a **Cross resarcelled** of another; this is an entire Cross, with another standing at a little distance from it, on every side of it. This voided Cross you shall find composed of the several sorts of Lines before shewed; for the blazoning of which, you must ever have a care to name the inner Cross first, for the other without it, is understood to be cut or sawed from it, as I have given you an example of a Chevron of this kind, *chap. 6. numb. 11.*

Crosses then of this nature are thus to be blazoned; Vert, a **Cross Or**, voided of another (ingraled, wavyed, indented, &c.) Argent. If both be of one colour or mettle, then they are both to be named, with the form of the line they are composed, before the colour; which being but once named, signifieth both to be the same.

Note here also, that the **ingraining**, **inbecking**, **indenting**, and **imbatteling**, or what other line the Cross is composed of (except **wavying**, ought to be plain on that side next to the Cross, the out-sides only to be composed of the said lines; for in voidings of this nature, the inner side is ever understood to be plain as you see in many examples of this work among the Bends, Piles, Chevrons, &c. *chap. 3. numb. 87. and cap. 6. numb. 12.*

But if it fall out otherwise, that you meet with Coats otherwise **ingraled**, **indented**, and the like, as it may be Heralds (who little understand the rules of blazoning) will, and do often invent such preposterous Coats, and **ingraled** or **indent** them (with the Cross also) on all sides, then it is but adding this (**ingraled**, &c. on both sides) in your blazoning; as for example, the field is Argent, a **Cross ingraled Azure**, voided of another, **inbecked on both sides**, Sable.

XIII. He beareth Or, a **Cross parted Azure**. There is difference amongst Authors in the blazoning of this Coat; some will have it to be a Cross, others to be none. *Morgan lib. 2. fol. 104. lib. 3. fol. 11. 29.* terms it in one place, a **Cross quartered**, and in another place, a **Cross quarter voided**, and **quarter pierced and voided**, which are no proper terms, by reason that quartering is rather understood to be some partition and division of a Cross, or any other Ordinary into quarter colours; and not a breaking or dividing of it into pieces, as this Cross; see a **Cross quartered**, or **quarterly quartered**, *numb. 57.* *Upton* calls this a **Cross perforated**, which is all one to Mr. *Leigh's* term of **quarter pierced**; which it cannot properly be neither; for a piercing doth not extend it self to the utmost sides or limits of the Cross; but doth receive the piercing in the middle, there being the substance of the Cross on all sides and corners of it, which is not so in this.

Others again hold it to be a division of the field into nine equal parts, being three rows of which **Chequie** is said to receive the name; more it may be, but no less; therefore because it is the very least, they give it this blazon, **Chequie of Nine**. The *French Herald*, *part 3. fol. 31.* terms it **five points Or**, **squared orderly into four**, **Azure**; a **Cross charged in the middle** (or heart) **with a point**; and also **four points made equal**. This Coat is born by the name of *Shattgood*.

A such a Cross G is born by *Hagenbach* of *Switzerland*.

I have seen such a Bearing as this, yet divided from the sides of the Escuchion in manner of a Cross, the two squares above and below much longer than the sides, have five Cinquefoils interposed or set between the parted Cross in each void place of the field; which I judge may be thus blazoned, Argent four **long squares**, or **long flat squares** in Cross, with five **Cinquefoils** interposed Azure. By the name of *Squarvile*.

XIV. He beareth Argent, a **plain Cross wavyed Azure**. Some term it a **watery Cross**, because it represents the Waves of Water, which is drawn upon the Cross by a darker colour than the Blew is. Born by the name of *Warver*.

XV. He beareth Azure, a **Cross corded Or**, and Sable. These two Crosses are by *Upton* termed quite contrary; for the first he calls a **plain Cross corded**, and this a **plain watery Cross**; but *Leigh* terms them thus, whose example I rather follow, being most agreeable to reason, and the nature of the things. Born by the name of *Cordwiner*.

XVI. He beareth Or, a **Cross Barry Nebulee**, Gules and Argent. As this is wrought all over with **Barry Nebulee** in point, as some term it, so you shall find them born **indented**, **barry**, **chequie**, **poshony**, **counter-compony**, &c. This is born by the name of *Waterer* ft.

O a Cross G masculced A by the name of *Van Zwn*.

XVII. He beareth Sable, a **Cross Or interlaced** with an **Annulett Gules**. Some term it **fretted** with an **Annulett**. Born by the name of *Van Cruunel*.

XVIII. The field is Or, a **Cross Azure**, with a **Demy Flower de lis** on each side Sable; the bottoms all turned (or pointing) to the fesse part. Born by the name of *Flowersy*. What I have said in *numb. 107.* about the flowering either of the sides or tops of ordinaries, will serve as a rule to this, to which I refer you.

XIX. He beareth Gules, a **Cross crossed**, Argent. Some term it a **Cross byssed**. Some a **plain Cross crossed**; and a **Cross crossed fyt**. Surely that Herald did greatly mistake himself, who termed it a **Cross raguled**, (for so I have seen it termed in a late Patent) when it is nothing like it; for **Ragulings**, are Knotches or Knotty pieces standing out of the sides Beville ways; as in the two next examples. It is termed also a **Cross Downed quadrat**. See *numb. 22. and 99.* This is born by the name of *Dazel*, or *Van Dajell*.

XX. He beareth Argent, a **Cross Crenelle Azure**. This is also termed a **Cross raguled**, as much as to say a ragged Cross; but this term **Raguled** is more proper for the following Cross, being ragged and knotty like the Limb of a Tree whose Branches have been cut or cropped off.

This term **Crenelle** is seldom used but to things of a climbing nature, as the Cross, Salter and Bend, where the Knots are set Beville wise: For the Fesse, Chevron, or Bars, and the like, it is blazoned (**Bat-**
G 2 tled

tled or Imbattelled.) This is born by the name of *Ragular*.

S such a Cross O born by *Stoway*.

G the like O by the name of *Lyfon*.

A the like S by the name of *Worth of Worth*.

A the like G born by *Lawrence*.

XXI. He beareth Gules, a Cross raguled Argent. *Gwilliams*, fol. 387. terms it *raguled* and *trunked*; And *Morgan*, lib. 2. fol. 10. calls it a *Cross trunked*; but I conceive that the word *trunked* were better used, and more proper for this Cross, when it is wholly cut off from the sides of the Escuchion; for to say *trunked* to this Cross, is the same as *couped* in another, as *Leigh*, pag. 31. hath it: Yet his Scholar *Boswell*, pag. 136. blazons such a Cross *ragged* and *couped*, see *numb.* 108. This is born by the name of *Ragstaffe*.

Of Crosses Nowy.

XXII. He beareth Sable, a Cross Nowy Or; it is also termed a *Cross Nowy* in the Center, to distinguish it from the *Nowy Cross* where the rounds are on the shanks of the Cross, as *numb.* 97. but that is termed *Nowyed*, shewing it hath more than one; this being *Nowy*, which signifieth only one, which must then be fixed in the center of the Cross as the fittest place. This is born by the name of *Roundcross*.

There are three ways of *Nowy* in Crosses.

The first is round, that is only termed *Nowy*.

The second is *Nowy Losengie*, which is, when the round part is made after the form of a Losenge, as you may see *numb.* 65.

And the third is *Nowy Quadrat*, or square in the middle, which *Morgan*, lib. 3. fol. 68. terms a *Cross quadrat* in the Center; as much as to say *Nowy quarterly*. After these three ways are all other Crosses subject to, to which after the naming of the form of the Cross, you must add this word *Nowy*, for usually Crosses are so born in Coats of Armes: If the *Nowy* be on the shanks of the Cross it is termed *Nowyed*, signifying more than one, see *numb.* 97. and 99.

Of the Cross Patee.

2. ALL the former Crosses spoken of, are such as naturally were fixed to the sides of the Shield, and such as are derived from them: I shall now proceed to give you some examples of Crosses which are not fixed, but stand as a charge in the middle of the Escuchion.

XXIII. He beareth Gules, a Cross Patee Or. This is by *Leigh* termed a *Cross Formie*: And *Upton* calls it a *Cross Patent*. I have seen it in an old MS. blazoned a *plain Cross streight*, from its streightness in the middle. But *Kara* and some others term it *Patee*, and gives this reason, *quia extremitates ejus sunt patule*, because the ends are broad and open, and with these agree many of our Blazoners. This is born by the name of *Islip*.

G the like A by the name of *Cross*.

O and G per Pale, such a Cross counterchanged, by the name of *Clapton*.

S 3 such A is born by *Van Schonenburg*.

XXIII. He beareth Or, a Cross Patee Azure, Fimbriated or Bordered, Gules. This is born by *Fombriall*.

For the term *Fimbriated* or *Edged*, and how it do's differ from *Charging* or *Surmounting*, I have shewed in the examples before *numb.* 5 6 7 8 9.

Argent a Cross Patee Voided Gules. Is born by *Sr. Will: Braconbridge*. This Cross Voided differeth from the *Fimbriated*, In this: that the Voided shews the field throw it; but *Fimbriated* is a whole Cross, but it is *Edged* or *Bordered* with another colour.

XXV. He beareth Gules, a Cross Patee Fitched in the foot; Argent. his is born by the name of *Finchett*. Some blazon it, *Fitched* (or *Figitive*) in the foot of the fourth; and it is termed *Fitched*, of the Latine word *Figo*, to Fasten, or make Sure: Because by the Sharpness added to the foot thereof, it becometh more apt to be fastned any where in the ground.

O such a Cross G born by *Scudmore*.

G the like A is born by *Fresen*, or *Frestell*.

B the like O is quartered by *Oldenburg* of *Batzaria*.

XXVI. He beareth *Jupiter*, a Cross Patee Fitched, Sol. This was the Coat Armour of *Ca. Malladr. Mauw*, the last king of the native *Brittaines* Lineage.

Note that these two kinds of *Fitchings* are Indifferent to all Sorts of Crosses, of what nature, and Forme soever they be: So that you must take diligent care in the naming of what kind the *Fitching* is; whether *Fitched*, (that is all the whole bottom part) or *Fitched* in the foot, which is from the middle of the bottom of the Cross.

S such a Cross O born by *Collyer*.

S the like A by *Mapsteden*.

XXVII. He beareth *Diamond*, a Cross Patee fitched-rebated, *Topaz*. born by the *Cuat Luitbolden*. this is termed *Fitched & Rebated*: because the Sharp end of it, is (as it were,) Blunted, or Cut off.

XXVIII. He beareth Pearl. a Cross Patee Concaved, (or *Rebated Crescent*-wise) Ruby. By the name of *Wandley*. Some term this a Cross *Rebated* of all four, in form of a *Decrescant*, or *Demy Circle*. Others a Cross Patee *Blemished*, Because part of the broad ends are taken away which doth disfigure it.

If this were *Fitched* like the former Cross, and *Rebated* also, then you must have a Care, that you set the term *Rebateing*, and *Fitching*, in their right places; that it may be understood what part of the Cross is *Rebated*. As thus, a *Cross Patee Rebated Fitched*, Shews the three parts of the Cross to be *Blemished*, and the *Fitching* whole. But a *Cross Patee Fitched Rebated*, Shews the *Fitched* part to be *Rebated*, or cut off: againe a *Cross Patee Fitched*, both *Rebated*, or *Blemished*, Shews all the parts of the Cross to be *Rebated*.

The *Cross Patee* is also subject to a *Double Rebatement*, which should have followed, but it is *numb.* 37

XXIX. He beareth Gules, a Cross Patee Converged, Or. By the name of *Honfleine*. It is so termed from its Swelling Round, which Artits in *Geometricall Lines*, term a *Conver*, as you may see *lib. 3 chap. 9 numb.* 27. It is also Blazoned a Cross Patee *Globicall*, (and *Patee Cit*.

Circulated, or Circuled,) For if the corners of the Cross did but meet a little neerer, it would then seem to be a Cross directly in a Compass, or Round Circle. And of others (& that not very Improperly) termed, a Cross **Patee Flanchee**, or **Flauched**. Because they swell Round, as the Flanch & Flaque doth. By the *French Artists* it is termed, a Cross **Patee Alison**. The Bricklayers will quickly tell us when they see it, that it is a Cross made of two **Brick Axes**, or a Cross with the ends of a Brick-Axe forme or shape. See chap: 9. numb: 37.

XXX He beareth Sapphire, a Cross **Patee fired** in base, (or issuing out of base, as sone have it) Topaz. This is born dy the name of *Stidfast*,

XXXI He beareth Venus, a Cross **Patee Entyre**, (or Fixed or Firme) Luna. This is born by the name of *Stronger*. Because it is the nature of these Crosses to be in the midst of the field, and from thence moveable to any place, according to the Bearers fancie. Therefore it is, that this term (**Fired**, or **Entyre**,) must be added, to shew that contrary to their owne being, they are joynted to the sides of the Escuchion. For as the Crosses which naturally are Immoveable, are termed **Couped**, If they be severed or disjoynted from the sides: So these which are moveable are termed **Fired**, or **Entyre**, if they be joynted to the sides. *Mr. Moreau lib: 4. fol: 27.* Blazons this a Cross **Formed throughout**. from it old name *Formee*.

And as it is with the Cross **Patee**, so it is usuall to and with all other Crosses of what form soever; to be also born both **Fitched**, **Rebated**, or **Entyre**. which in the said peticular Crosses I shall forbear to give examples, seeing these to the Ingenious are sufficient to give Instructions. Only I shall shew you the severall kindes & formes of Crosses used in Armes, which if **Fitched** &c: you may blazon them according to their being.

A the like S is the City or States Arms of *Cislanz* in the *Empire of Germanie*.

G the like Endented, A. born by *Van Muderstach*.

XXXII He beareth Amethyst, a Cross **Patee Inbecked**, Topaz: born by the name of *Victory*. others blazon it a Cross **Patee Inbecked at the ends**: But this kinde of Cross is never **Ingrailed**, **Indented**, or **Inbecked**, in any other part but in the broad ends. Therefore needs not to be mentioned, either on the Ends or Toqs.

XXXIII He beareth Argent, a Cross **Patee Crossed**, Sable. Of others a Cross **Crossed Patee**, or a Cross **Crossett Patee**. In all which there is no false Blazonry. This is born by the name of *Crossesall*, or *Crossesfull*.

XXXIV. He beareth Or, a Cross **Patee Flurt**, Sables. born by the name of *Swinerton*. *Morgan li. 4. ca. 29.* termes it a Cross **Formee Flory**, I have seen it in an Ancient M. S. blazoned a Cross **Flour-de-luse**: or a Cross **Formed fleury**.

A. the like G. born by the name of *Soufonhill*.

A, the like S. born by *Swinerton* of *Swinerton*.

XXXV. He beareth Venus, a Cross **Patee Fitchee** (or a Cross **Patee fitched on all four**) Luna. This is born by the name of *Formale*. Of some old writers it was termed a Cross **Patee-formy**. But for what reason I understand not: It being best termed **Fitchee**, to shew that all four are Sharpned at the ends, as numb. 58. & 60.

from the word **Fitched**, which shews only one end to be drawn downe Sharp, as numb: 26. & 74.

A. the like S. born by *Belgrave* of *Belgrave*.

XXXVI. He beareth Argent, a Cross **Patee Fitchee Disjoynted**, Sable. Else a Cross **Patee disjoynt fitched** of all four, which is no more then the former, but a multiplying of words. Others say disjoynt in the Center, or middle of the Cross. This is a *Germane Coat* & is born by the name of *Van Nordeckinky*.

B. such alike O. is born by *Brokenersse*.

XXXVII. He beareth Jupiter, a Cross **Patee double Rebated**, Sol. by the name of *Debruse*. this is blazoned **Double rebated** by reason that the two corners on each side of the tops of the Cross are cut off: whereby it looseth its breadth, which otherwise it would have had. And from this its cutting or **Stemishing** in two places, it is (as I said before) termed, **Double rebated**, both in respect of its own being, as also to distinguish it from that as is but only **Rebated**, as numb: 28. that being single & on the Top, but this double & on the sides.

Of the Cross Potent.

3. THESE kinde of Crosses resemble the heads of Crowches, which in Elder days were called **Potents** or **Potangs**, as saith old *Chaucer*.

*When lust of youth wasted be, and spent,
Then in his hand he takes a Potent.*

XXXVIII. He beareth Or, a Cross **Potent Gules**. by the name of *Malthe*. This is by *Leigh sa: 4* called a Cross **Batune**. And also in many old M. S. I find it so termed; the reason (as I suppose) is from its composing of **Batunes**; or being couped at both ends **Batune-like**. The *French* call it a Cross **Batue**, **Cioche**, **Crowchee**, or **Potency**.

G: the like A, born by *Peter of Savoy*.

O, the like B, by *Walvin*. & also by *Ward*.

S, the like O, born by *Sr. Edw. Allen* *Baronett*.

XXXIX He beareth Argent, a Cross **Potent Crofied**, Sable. This was born by *Cromcher* of *Cromcher*. Of all Blazoners of old this was called a Cross **Genelle**, from the doubling of the **Crouches** in the heads of it. this I have seen born in a coat of Armes **Fitched** in the foot, & blazoned a Cross **Genelle piche**.

XL. He beareth Argent, a Cross **Potent** between 4. other, Sable. The Armes of *Vibert de Morederit*. This for shortness is Blazoned a *Ierusalem Cross*. And thus it is made by the *French Herald*: & after this maner I have seen it born in the Chief of their Shields of Armes, to shew that they were of the holy Society of the Knights *Templers* of *Ierusalem*, all which bore it: Though *Leigh sa: 32.* & some others make the *Ierusalem Cross* to be a Cross **croflett** between 4. **Crosses**. as numb: 44.

We read of those that were Enrolled for the *Voyage into the Holy Land* (about the year 1187.) received such a Cross from the hands of their Bishoppes & Prelates, which was Sowed on the left side of their Garment, right against the heart. The *French* wore it **Red**, the *English* **White**, the

the *Italians Yellow*, the *Flemings Green*, and the *Al-mains & Germanes Black*.

A such a Cross O, is the Armes of *Ierusalem*, & was born by *Godfrey of Bullen* first Christian king thereof.

Of the Cross Croslet.

XLI. He beareth Azure, a Cross Croslett, Argent; it is also termed a Cross crossie; or a Cross recrosettee; else a Cross crossell; and a Cross croslett, and a Croslett crossed; or more briefly a Croslett; or a Crucell, or Crucellett. By the name of *Tadington*. *Vincent*, pag. 35. calls it a *Recroisee*.

A the like Sable. Born by *Wickersley*, and also by *Scott*.

O the like B. born by *Wickliffe*, and by *Sinople*.

XLII. He beareth Argent, a Cross croslett fitched, (or *Fitchy*) Sable. And a Crucell fitched Sable, so anciently. *B. fitch*, pag. 38. a Cross croslettie fitchee; others a Croslett fitched. By the name of *Scott*.

This Cross Croslett is born Flory in all the ends of the Cross, by the name of a Cross Croslet (or Croslette) Flory.

XLIII. He beareth Argent, a Cross croslet crossed, Sable. Of some termed a Cross double crossed, and a Cross croslet double crossed. It is (as it were) four cross Croslets joined in one at the center. In a Manuscript thus I find it termed, a Cross croslet crossly. *Leigh* pag. 32. terms this a *Ierusalem Cross*, but I suppose his meaning is this Cross following. This is quartered very ancient with *Ledesham* of *Ledesham*, and is by the name of *Eradnell* of *Lan. ashire*.

XLIV. He beareth Argent, a Cross croslet between four Crosses Sable. Some term the four Crosses plain Crosses, and others Croslets, which is little crosses. This kind of Cross and Crosses, I find by *Leigh* to belong to the Knights Templers of *Ierusalem*; only he joineh the little plain crosses, to the sides of the great Cross, the one over against the other.

Of Crosses on Grieces.

XLV. He beareth Vert, a long Cross (or *Christs Cross*;) mounted on three Grieces in base Or. It is called a long Cross, by reason the bottom part is much longer than the overthwart part is. *Morgan lib. 2. fol. 9. 11.* calls it a Cross Calvary, and is (saith he) usually mounted on Grieces and Steps like *Jacob's Ladder*. *Grilliams*, fo. 308. terms it a Cross mounted on Grieces.

B two Angels volant O supporting of a Calvary Cross, on three Grieces A is the Arms of the Abby of *Waltham*.

XLVI. He beareth Sanguine, a Cross croslet, or Cross crossed, mounted on three Grieces (or degrees) in base, Argent. Some say mounted in Base on three Grieces.

G such a Cross is born by *Johnes* of *Llanvair*, in the Principality of *North-Wales*.

XLVII. He beareth Argent, a Cross Patriarchal crossed, mounted in Base on Grieces Sable. These three examples of Grieces or degrees, should be only termed Grieces, if they were not fixed in the base part of the Escuchion. Some number not the number of the Steps, or Degrees, because say they, they are ever three, representing the three Theological Virtues, by which we mount to the Cross of Christ, viz. Faith, Hope, and Charity. This is born by the name of *Joshline*.

Of the Cross Flowry and Flurt.

4. **T**Here are several Crosses alike in shew, yet are different in name; and others are very near in Name, yet far different in shew and form; as example.

XLVIII. He beareth Mercury, a Cross patonce, Luna. The word patonce is derived from patee, as well as the Cross is composed of the Cross patee, for they are Cousin German, both being broad at the ends, only this of patonce is carved or cut with Indents in the end. It is termed also a Cross potoncee, and patoutee. It was the coat of *Baifue*, the 46 Arch-Bishop of *Canterbury*.

V the like O by *David* of *Dallam*.

A the like S by *Bailef* of *Bark*.

G the like Er. by *Paynell*.

S the same O by *Munck*.

A the same B by *David*, le Clark to the Earl of *Chester*.

XLIX. He beareth Gules, a Cross patonce Or, at each side proceeding from the Center, a Cresell Argent. As this Cross is beset with these Trefoils, so you shall find these and several other sorts of Crosses born in like manner with other kinds of Flowers, Leaves, and Fruit, all stalked, which are thus to be termed, as in this example.

L. He beareth Argent, a Cross Flory (or flowry, or Floury, Floury, Floury) Azure. Here you may see the difference of the Patonce and this of Flory; the first from the Center goes broader and broader to the end, even as the Patee doth. But this keeps an even Decorum from the middle till it comes to the ends, where it is determinated with a kind of flourish, like to the bottom of a flower de lis. This is the Baron of *Malpas* Coat.

O the like S by *Sir John Brackett*.

A the like G by *Trussell*.

B the like O by *Lamplon*.

LI. He beareth Argent, a Cross Azure, Flory Or. By the name of *Florence*.

A the Cross S Flory O born by *Newton* and *Walton*.

LII. He beareth Gules, a Cross Avellane Argent. This is another kind of Cross much like to the fore-said, yet of different name and form too, if seriously viewed; this is the old form of it, but of latter times there is another used, as in the example following.

LIII. He beareth Azure, a Cross Avellane, Or. This term Avellane is derived from the Latine word *Avellana*,

Avellana, a Filberd or Halle-Nut; for so the Heads thereof do very much resemble such Nutts. It is the Cross set upon the top of the King Mound; an Ensign that represents the Sovereignty and Majesty of a King.

LIV. He beareth Argent, a Cross potent flurt, Sable. Flurt or Flurdy doth expresse the top of the Flower de lis; and Flory the bottom of the flower de lis, at each end of the Cross. Some only term this a Cross flurt, which sometime is engraied, envecked, &c. but not at the ends. Some term this a Cross formy flurt. By the name of *Holmesbar*, or *Holmshall*.

LV. He beareth Sapphire, a Cross potent engraied Sol, flurdy Pearl. Of some, a Cross engraied flurt, Or; the tops Argent; or at each end the top of a flower de lis.

Now here is to be noted, that these kind of Crosses, when they are engraied or envecked and the like, they are never so formed at the ends, but on the sides only, as in this Cross is manifested. This is born by the name of *Grailinefort*.

A thelike S between four Cornish Chough. Born by *Edwyn* Lord of *Englefield*, and one of the 15 Tribes of *North Wales*.

LVI. He beareth Sardonix, a Cross couped (or Bumett) flurdy Pearl. Of some a plain Cross flurt. Born by *Fernaux*.

A such a Cross B born by *Offey* of *Madely*, being charged with a Lion passant gardant O and 4 Cornish Chough. Mr. *Morgan* lib. 2. fol. 13. terms this only a Cross flurdy, without any addition.

B such a Cross A born by *Florence* and *Cheney*.

A thelike G by *Trussell*.

LVII. He beareth Or, a Cross quarterly quartered, Argent and Gules, flurdy Sable. Here I name not the form of the Cross, as I did in the blazoning of the former (as Bumett or couped,) because in saying quarterly, or quarterly quartered, it is to be understood that it is a large broad Cross, by reason of the divisions of colours placed in it, which the thinn and small Crosses could not contain. This is born by the name of *Mannaugh*.

Of Crosses Fitched double.

5. THE next sort of Crosses in order to be spoken of, is the several sorts of Crosses double fitched, that is, being sharp pointed at all ends; some single, some double, some trebble, as examples following doth demonstrate.

LVIII. He beareth Azure, a Cross fitched of all four Or. This is more like a Galthrop than a Cross, and is of some so termed, but being compared together, there is great difference. This is born by the name of *Sharpley*.

LIX. He beareth Jupiter, a Cross Patee double fitched of all four, Sol; or as some of old call it, a Cross Patee furch; furch being then used for what we now term fitched. Mr. *Morgan*, lib. 2. fol. 13. calls it a Cross Ankred, or an Anchorites Cross. This is the Cross of the Knights of *Malta*, or Brethren of

St. John of *Jerusalem*; therefore may for brevity sake, be blazoned, a Cross of *Malta*, or *St. John* of *Jerusalem's* Cross; but more of this hereafter. The Latine gives it the name of *Crux furcata*, a Cross furcher, or a Forked Cross. And the *French Herald*, part 2. fol. 14. calls it a Cross encree, as he doth the Cross moline, see numb. 63.

LX. He beareth Argent, a Cross double fitched of all four, Gules. This Cross I find blazoned several ways; *Bosworth*, pag. 26. terms it forked. *Leigh* pag. 34. pither. In a MS. in the Office, I find it anciently blazoned a Cross furcher, and furcher, (which we now call furch.) The *French Herald* part 1. fol. 13. call it chappee. This is born by the name of *Croisfort*.

LXI. He beareth Gules, a Cross double fitched, and rebated of all four, Argent. The *French Herald* part 3. fol. 9. terms it a Cross double, or double doubled: Some call it a Cross escartalled, couped; as if it had only a nick or notch, sarcelled or sawed into the four ends of it. This is born by the name of *Carternall*.

LXII. He beareth Or, a Cross potent of all four, double fitched rebated, Azure. Some will have it to be a cross crosett, double fitched of all four, and debruied or broken off: Others a croset sarcelled in the four (or head) ends. Born by the name of *Sanyer*. The *French* call it a cross double, being G. in a Field O is born by *Avinus* Abbot of *St. Mesrim*.

Of the Cross Moline.

6. THE next is the Cross Moline, a Cross both in nature and shape far different from any as yet presented to your view, from which form there is several others derived, yet of a contrary term in Blazon, as in the examples following.

LXIII. He beareth Sapphire, a Cross Moline Topaz. This term is borrowed from the Ink of a Mill, of some called the Moline of a Mill, which is an Instrument of Iron set in the upper Mill-stone, whereby it is turned about, whose crooked ends turn after this manner.

There is both ancient and modern terms given it concerning this Cross, *Gwilliams*, fol. 93. and all late Authors, call it a cross Moline. *Leigh*, pag. 34. a cross Sarcell; and so doth *Boswell*, pag. 25. 35. as being a Disciple of his; and both of them in the blazoning, hold it not to be a Cross Moline, except it be pierced, because the Molyng, or Mill Rind is ever so; but this term of a Cross Moline is not given it, being a right Moline, but borrowed from it, by reason the ends thereof, are much after the manner of the Moline of a Mill. The *French* call it a cross Encree; and Mr. *Upton*, part 2. fol. 14. a cross Reversyd, or inverfed, or turned inwards, as having the ends turning round. This is the old way of making it, with the turning of it almost round: And in an old Roll among the Nobles of those times, is blazoned reversile, O and V. a une Crois reversile G Born by the name of *Ingham*, as saith Mr. *Morgan*, lib. 2. fol. 15.

V the like O by the name of *Baynham*.

O the

O the like S on an Escuchion B 3 Plates. Born by Weyer.

LXIV. He beareth Gules, a **Cross Molme**, Argent. This is the form of the Cross in our times; our Herald not making it so much round in the turning of the head, as the foregoing Cross. This is born by the name of *Beske*.

B the like O born by *Molineux*, also by *Brun* and *Prham*.

G the like by *Bernellon*.

B the like A born by *Trelesk*, and also by *Hotosfe* and *Dine*.

S the like A born by *Folly*, and also by *Upton*.

LXV. He beareth Vert, a **Cross fer de Moline** Argent. This is called *fer de Moline*, because of it piercing; for the Mill-rind is ever so, as I have shewed in the *Salter Moline*; and *Cross Moline* aforesaid. This may otherwise be blazoned, a **cross Melyn Nowy** *Lofengie* pierced; or a **cross Melyn Nowy Mascu-ly**. If this Cross had stood *Salterwise*, it had been termed only (a *fer de Moly*) but the Cross being added to that name, sheweth this to stand Cross ways.

LXVI. He beareth Argent, a **Cross Moline rebated** Azure. This may not unfitly be so termed; in regard, the ends are (as it were) cut or worn off. *Upton* calls this a **cross Miller**, because of the near relation it hath to the form and fashion of the Mill-rind. This is born by the name of *Crossmole*. In an ancient MS. I have seen it blazoned by the *French* Armorists, a *Cross Fur-hee*.

LXVII. He beareth Or, a **Cross Fursch** Gules. This is also termed, a **Cross Miller** rebated, as having the rebatements of the Cross following. Born by the name of *Furshall*.

O and V per Pale, such a Cross G Born by *Hingham*.

LXVIII. He beareth Sable, a **Cross Miller** (or *Miltine*) Or. This anciently hath been Blazoned a **cross Moine**. *Morgan lib. 2. fol. 15.* terms it a **cross Miltine**, because it hath the ends cramped and turned again, as the Mill-rine is, which carrieth the Millstone, it ought to be perforated also, as that is. Born by the name of *Miller*.

G the like O born by *Feney*.

Of Crosses with round Heads.

7. **T**HE next are Crosses with round heads, of which there are several sorts; both of Forms and Blazon, as

LXIX. He beareth Argent, a **Cross Pomell**, Sable. So called from its likeness to the Pomell or Head of a Sword: This Cross Pomell Ovalwise, lying contrary to the Cross, is very anciently born. This Coat is born by the name of *Pormale*.

LXX. He beareth Gules, a **Cross Pomettee**, Or; or of some termed **double Pomelled**. It hath the resemblance of two Shin-Bones set in Cross, the ends being the round Coronals or bunches which go into the

cavity of the Bones, to which they are joined; from whence it is by some called a **Cross coronal**, or **cro-nal**. This is born by the name of *Corporal*.

LXXI. He beareth Azure, a **Cross Buteny**, or **Botony**, Or: *Botone* saith *Leigh*, pag. 32. is as much as to say a **crossed Budded**, but rather **Buttoned**. *Upton* calls it a **cross knotted** or **knotty**, from the Latin, *Crux Nodulata*. The *French* Blazon it a *Cross Fleuronnee* and *Fleurdelysee*; and *Fleuree*, as being the Budds of Flowers. This is born by the name of *But-ton* of *Chester*.

A the like B by *Wastnes*.

A the like G born by *Holme*, also by *Bryerlegh*.

A a **Croset Botony** G born by *Gullet*, so termed by *Morgan*, lib. 3. fol. 69.

Of the Cross Lofengie.

8. **T**HERE are divers Crosses also of this kind of bearing, which have contrary terms, as

LXXII. He beareth Gules, a **Cross Mascle** Or, at each point a **Plate**. The *French* Herald, part 2. fol. 18. calls it a *Cross Clefche* or *Clecke*, *Pomettee*, and a *Cross Tholuze*. The Cross Urdee, with other Crosses of this nature, are often found with Rundlets at the points of them thus; which others Blazon a Cross of such or such a form, and terminated or ended with twelve Pomms or Apples; for the term (each end) signifies but four, at the utmost ends of the Cross one: This example may serve for all Crosses thus charged. This Cross is likewise called a **Cross Patee mascled**. This is born by the name of *De la Ballin*.

LXXIII. He beareth Argent, a **Cross Mascle Umbrated**. This sort of Cross or any other that is umbrated, hath no colour mentioned; for of whatsoever colour the field is, (saith *Baynell*, pag. 25.) the thing mentioned to be in the Field, is to be traced of a contrary colour, so that the body of the thing shadowed is of the colour of the Field. *Grilliams*, fol. 61. 67. saith; that the Umbrating must be done with some unperfected or obscure colour, as Black, or deep Tawney, unless the Field be of the same colour: So saith *Feney* also, pag. 174. 175.

This is Blazoned a Cross transparent (*quasi transparentes*) because the Field being (as it were) on the further side of the Charge, or underneath the same, yet the Tincture or Colour thereof sheweth clear through the charge, as if it were through a Glass. *Leigh*, pag. 36. calls it **entrained**, and **purified**, or **shadowed**, never naming the colour.

This rule for umbrating, holdeth good for all sorts of charges, whether ordinaries; or any other Creatures, natural or artificial.

LXXIV. He beareth Vert, a **Cross Patee fusil fitched** Argent. Some term it three **fusils** in Cross, and the fourth **fitched**; but I hold it best termed **Patee fusil**, because it partakes of both, the inner parts of it answereth the form of the Cross Patee, and the outward parts hath the sharp ends of the Fusil, or *Lofenge*. Neither can it properly be blazoned a Cross Fusil, except it had a Cross in the middle part, and the Fusils at the ends, as the example, *numb. 78, 79.* three Fusils con-

conjoined in Crosse, and fitched in (or of) the fourth. Others thus, 3 **Fusils in Crosse fitched**. This is born by the name of *Patit*.

LXXV. He beareth Azure, a **Crosse of five Fusils** (or five **Fusils in Crosse**) Argent. Of these kind of Cresses you shall have three in one Shield, which are thus Blazoned, Azure three **Cresses**, each containing five **Fusils**. These Cresses never exceed five **Fusils**, yet cannot be called a Crosse Fusil, by reason it wants a Crosse in the middle, as *numb. 78*. This is born by the name of *Maderine*.

O a Crosse of five **Fusils** B the middle A born by *Bessame*. Else say a **Fusil** A between four other conjoined in Crosse B.

LXXVI. He beareth Argent, four **Fusils in Crosse** Gules, else term it a **Crosse** of four **Fusils** or *Losenges*: And if three of them be in one Coat, you must Blazon them, a *Chevron* between three **Cresses**, each composed of four **Fusils**, &c. The first born by the name of *Fusil-crosse*, and the latter by the name of *Crosshurst*.

Quarterly O and B such a Crosse between 4 *Annulets* counterchanged. By the name of *Peacock*.

LXXVII. He beareth Azure, a **Crosse Fusilly**, Or. This after *Upton*, pag. 35. is called a **Crosse Maculate**, and *Leigh Macully*, and *Macully voided* of the Field, when the *Escuchion* is seen through them.

Here note the difference between a **Crosse Fusil**; and the **Crosse Fusilly**; which ever extends to the sides of the Shield, and generally begins and ends with half a **Fusil**, or *Macully*, if it be a **Crosse Macully**. This is born by the name of *Fotheringhay*.

If this **Crosse Fusilly** were on a plain Crosse, as other Cresses often are, to distinguish it from this **Fusilly**. Know that when it is but one colour, then it is thus made; if on the Crosse, then it is of two colours, counterchanging one the other.

LXXVIII. He beareth Ermine, a **Crosse Fusil** Gules. By the name of *Foscell*. *Leigh*, pag. 35. terms this a **Crosse Urdee**; but I am of their Judgment that call it a **Crosse Fusil**, as having the form of a **Fusil** on the heads or tops of it; Therefore of some called, a **Crosse ending Fusilly**, or the ends **Fusil**.

LXXIX. He beareth Purpure, a **Crosse Fusil rebated**, Or. By the name of *Blemisher*. This is rebated or blemished, by having the sharp ends blunted, worn, or broken off.

Of the Crosse Urdee.

LXXX. He beareth Gules, a **Crosse Urdee** (or *champaign*, Or. By the name of *Urdhall*. This is an ancient Crosse, and goeth under several terms of Blazon, as I have seen in old Manuscripts in the *Heralds Office*; as, a **Crosse Mateley**, a **Crosse Flanked**, a **Crosse Clefchee**, and a **Crosse Verdee**. The *French* term it a **Crosse Ayguisee**.

A the like quarterly quartered A and G. Born by *Hemel Varf Vehnioc*, a *Brittain*.

LXXXI. He beareth Argent, a **Crosse Urdee recoursee**, Sable: Of others a **Crosse Urdee voided**.

But in the speaking of the **Crosse recoursee**, I told you it was the opinion of good *Armors*, that the term *recoursee* ought to belong to all sorts of ordinary, as if it were in its own proper nature and being; as in this Crosse, where there is no substance of the Crosse, but only the form of it, which is (as it were) only traced about. And the term voiding, to belong only to such ordinaries which in their voidings have their ends cut through, so that the Field is seen to the very sides of the *Escuchion*; as in the examples of *Cheverons voided* and *reconsee*, chap. 6. *numb. 7. 9. 10*. This is born by the name of *Duckingfield* of *Duckingfield* in *Cheshire*, a very ancient Family, of whom is *Sir Robert Duckingfield Baronett*, now living, 1680.

Some term this a **Crosse Urdee clefchee**, shewing that it is pierced through, yet hath its form remaining.

Of the Crosse parted.

8. OF the **Crosse parted**, which should have been set in this Section, I have spoken of before, *numb. 13*. Now we shall give some examples of double and triple parting.

LXXXII. He beareth Azure, a **Crosse double parted**, Argent; as this is double or biparted, so you shall see them divided into three parts, termed a **Crosse triparted**, which for brevity I forbear. The first is born by the name of *Double*. The latter is born by *Trilemaine*.

G a *Lion rampant* to the Sinister O debrused with 4 *Rods Cross-wise*, and bound together at their Joints A is the Coat of *Degernbach* of *Paruria*.

LXXXIII. He beareth Sapphire, a **Crosse double parted and fretted**, Pearl. Some term it four *Batunes* (or a Crosse of four *Batunes*) fretted: And so *Leigh*, pag. 31. hath it in a *True-Loves-Knott*. By the name of *Tulore*.

LXXXIV. He beareth Argent, three *endorses*, Gules, surmounted of as many *Barrulets*, in form of a Crosse. The like to this you shall find born *Salterwise*, then they are termed *Cotizes*; in which always take notice which lieth next the Field, whether the *Dexter* or *Sinister*, and mention them first. This is born by the name of *Undrimis*.

A two *Endorses*, two *Barrulets* G born by *Bare* and *Ware*.

LXXXV. He beareth Diamond, a **Crosse double parted, flort** (or *flory*, or *florished*) *Topaz*. &c. is born by the name of *Van Kilkilow*, a *Germane* family.

LXXXVI. He beareth Gules, a **Crosse double parted flory**, Or. This is the old maner of making this kind of Crosse, which doth much resemble the other save that it is not pierced in the middle. This is also like the **Crosse Pattee double fitched**, but that it is much more opened, even to the center thereof.

LXXXVII. He beareth Azure, a **Crosse double parted clouded flory**, Or. such a Crosse is born by the name of *Knodel*, the field being *Semy de Crucilee*. *Vit. 2* termeth this a **Crosse Holynce Ambre**, *Morgan lib. 2. fol. 14* calls it a **Crosse Satele**, or *Resterilee*. other

H

term

term these 4. **Culvern Irons** Endorsed in form of a Cross. It is like the Cross **Holine Sawed**, or cut into 4. quarters, and disposed at a convenient distance; And therefore may fitly be termed a Cross **Holine Sarcelled**, or a Cross **Holyne voyded** disposed, or the Milne Cross Voided: The *French* blazon it, a Cross **Retercelee** dispoyned.

LXXXVIII. He beareth Or, a Cross **Tri-parted Flory** Sable. This is the Modern way of drawing this sort of Cross. Of old these parted Crosses were termed, Crosses **Parted** into three **courtes**, or **Thrice partee**. There is another more antient, as in the next following. This coat is born by the name of *Triffler*.

LXXXIX. He beareth Argent, a Cross **Tri-parted Flory** Sables. This is the old way of making it.

Now you must observe that if Crosses **Parted** be Disjoyned from the sides of the Escucheon, they are ever termed **Flory**, or **Florished**. *Ferne* saith, that **Double**, & **Treble Partings** are insident to all Crosses, as **Hyle**, **Holyne**, **Pattee**, **Sarcelle**, **Botoney**, **Flory**, &c. But I never yet found any such in coats of Armes.

Argent, a Cross **Crossed** each end **Tribble parted Flory**, Sable. I found born by *Sweetenhambergh*.

A, a Cross **Double Tri-parted**, Sable. is born dy the name of *Drudeley*. see its form chap: 8. numb: 4.

XC. He beareth Gules, a Cross **Anserated**, Argent. born by *Van Smacker*. The *French* term for it is, a Cross **Gringolee**; that is, a cross **Parted**, whole ends are formed into the Shape & fashion of Goose heads. And as this is, so I have seen them with **Lions**, **Talbots**, **Eagles**, & severall sorts of other heads; which may be thus Blazoned, a Cross **partee adorned** with **Lions** or **Eagles** heads. Some will tell the number, as **Adorned** with 8, **Lions** heads. Yet others term such; a Cross **Leonced**, when with **Lions**: & **Aquilated**, if with **Eagles** heads. These are also born **Fitched**.

G, a cross **Pavonated**, or **pavonied**, (that is with Peacocks heads) & on an Inescucheon A, 3, **Torteauxes**. is born by *Huy Van Aussewaert in Amsterdam*.

A, the like **Aulpulated**, (or with Fox heads) G, on a Die (or dice) a cinque, by *Dobbelstein* of the *Rhine*.

A, the like **Gringolee**, G, born by *Crummell*. & (each head) **Crowned** by *Harvert* in *Flanders*.

Of Crosses Annulated:

9. **I**N the Ordinaries of this kinde there are diverse Impossibilities & all receive terms in blazoning according to the nature of their position; for herein are Crosses so **Annulett**s both **Substantiall** & **Coniunct**, with the Rings entyre & fixt: as the examples will manifest.

XCI. He beareth Vert, a Cross Argent, at each end an **Annulett**, Or. by the name of *Ringlove*.

XCII. He beareth Argent, a Cross **Rebated**, at each end, an **Annulet**, Sable. born by *Westley*, or *Westle*. This is termed **Rebated**, because there is some part of the couped ends on both sides taken away; to which thinner parts there is joyned the form of 4. Rings. Of others this is termed a Cross **Rebated** at each end, on both sides: with 4, **Annulets** fixed there unto. Others blazon it a Cross the ends **Tenantee**, or **Tenanted**, Because it represents the

form of a peece of wood cut square off on both sides, to be fixed, or put into a like square hole made for it: which all workers in Timber, call a **Tenant**, & **Mornise**.

XCIII. He beareth Argent, a Cross **Annulett**, or **Annulett**, or **Annulated**, each **Fretted** with a **Ring**, Sable. born by the name of *De La-Croix-anull*. Others blazon it Cross **Ringed** at the ends, each **Fretting** (or having throw them) an **Annulet**. From the *Mariners*, terms it may be called a Cross of 4. Anchor heads with Rings in the Eyes.

XCIV. He beareth Or, a Cross **Cressant**, (or ends **Cressanted**) Gules. I have seen a Cross after this form, with Horse Shooes at the ends in place of the **Cressants**; which is termed a Cross at each end an **Horse-shoe**. as c: 8. n: 5. And this is best blazoned, a Cross at each end a **Cressant**, or **Cressanted**: which is born by the name *Van Vernam*. The *Germanes* & *Duch* often adorn the horns, or points of the **Cressants** with **Feathers**, **Roses**, **Leaves**, &c.

XCV. He beareth Argent, a Cross **Couped**, Gules: at each end a **Cressant** fixed on a **Pomell**, Sable. this is by the *French Armists*, termed a Cross **Fourchee**, And is born by the name of *Baradid*. This is also termed a Cross **Pomelled** & **Cressanted** (or **Pometee** & **Cressantee**) But by this blazon, the manner of the Cross will not be understood. Therefore to use the word (**Couped**) as aforesaid, is needfull; Thereby to shew that it is a plain full Cross cut off from the field, whose ends are **Pometee**, &c.

XCVI. He beareth Azure, a Cross **Anchored**, or **Anchor**, Argent. Born by the name of *Ancrey*, or *Ancryn* I have seen such a kind of Cross, termed **Ancry**, Because it resembles the form of an Anchor at each end thereof, *Sans Flocks*: that is, the **Shanks** of an Anchor without the **Flocks**; Some term it a Cross at each end a **Demy Annulett Inverted**. If these **Shanks** were made with Tongs like fish-hooks, Or with **Flocks** like Anchors, It is then (in my judgment) best blazoned, a Cross the **Stems Shanked** & **flooked** like an Anchor. Or **Barbed**, or **Conged**, like an Angleing hooke. which soever it is.

XCVII. He beareth Or, a Cross **Nowyed Degraded** **Contoynd**, Argent. born by *Die Hofwart* an *Hollander*. This is also termed a Cross **Nowyed Grady** fixed, (or **Double-grady** fixed) See the difference between **Nowy**, and **Nowyed**, numb. 22. I have seen the like in *Leighs Accidence* pag: 35, with the fourth **Fitched**, which may be thus blazoned, a Cross **Nowyed grady** **contoynd** in three, And **fitched** in the foot of the fourth.

XCVIII. He beareth Sable, a Cross **Grady**, (double **Grady**, say some) **Pomelled**, Or. born by *Perrault*. Of others termed more short, a Cross **degraded** **Pomell**.

XCIX. He beareth Argent, a Cross **Nowyed Losengie**, Azure. This is the Coat of *Nanellers*, Some term it **Nowyed** in form of a **Losenge**: If this **Nowying** were **Masculy**, then the part here **Losengie** should be voided, having the Field seen through it, as it is with all **Masculs**, see numb. 22. 65. 97.

The like Cross is born by the Abby of *Templebury*, l. 4. c. 4. n. 6.

Of Crosses of divers forms.

IO WE come now to speak of several sorts of Crosses, which have no affinity, make, shape, or blazoning one to another. as,

C. He beareth Azure, a **Cross potence rebated** on the head of the Sinister sides, **recourtie**, Or; By the name of *Bulwork*. Turn this Cross which way you will, yet the rebatement will be Sinister; therefore it is that I say rebated Sinister, because the top part is so; and so the rest on the contrary or opposite sides; others more briefly term it a Cross Potence rebated, or diminished on the contrary sides; or a Cross Demy Potence, rebated, recourtie; and some have called it a Cross **Redout**, from its resemblance to a Bulwark or Fortification so called, whose Fancy may hold good therein.

CI. He beareth Vert, a **Cross Patriarchal**, Or. Of the French termed a *Cross Lorraine*, but the lower overthwart part is made by them longer than the top piece. This is the Knights Templers Cross.

S the like A born by *Rodolphus* Arch-Bishop of *Canterbury*.

G the like A on a Mount in Base, is the Coat of the King of *Hungary*. *Morgan* makes this Cross longest in the bottom, as the little Cross in this same quarter.

CII. He beareth Or, a **Cross Patriarchal Gules**, charged with another Argent. Born by the name of *Albisen* in *Germany*.

CIII. He beareth Azure, a **Cross Patriarchal Patee**, Argent, as this Cross is here Patee; so you shall often find them to be crossed, Flory, Potence, Potent, Moline, &c. They are subject also to fitching, to be mounted on Grices; and I have seen such a Cross as this, with the bottom part only Flory; which you may Blazon thus, a Cross Patriarchal Patee, with the foot of it Flory, as *chap. 9. numb. 43*. This is born by the name of *Loather*.

A the like G is the Coat of the States of *Ajchsenburg* in *Germany*.

CIV. He beareth Argent, a **Cross Patee Lambear**, Gules. Of some called a Cross *Lambeaux*; and a Cross Patee fitched *Lambeaux*; as having a File or *Lambeaux* of three Labels fixed at the end of the fitched part of the Cross; but a Cross *Lambeaux*, (as *Morgan* terms it) it cannot be without some other term added to it, by reason the Patees are born several other ways, as *Crozier*, *Flory*, *Plain*, and *Flurt*, with the like, as *chap. 9. numb. 42*. This is born by the name of *Salmworthen*, a Low-Country Family.

G the like A born by *Rudetzker*, and *Van Groditzky*.

O the like Cross Flory B born by *Falkencrofs*.

The Cross is alterable, but the *Lambeaux* is always the same.

CV. He beareth Ruby, a **Cross Tau Topaz**. By the name of *Ten*, or *Tam*. This hath anciently been so termed, which makes me set it here amongst the ex-

travagant Crosses; otherwise I should have taken that liberty as to have placed it with the *oman* Letters. The French, *part 1. fol. 12*. call this *St. Anthony's Cross*. Mark with *Thau* the Foreheads of them that Mourn (saith the Prophet *Ezekiel, chap. 9. vers. 4.*) that is, set a cross Tau on their Foreheads, signifying the Cross of Christ, which all true Christians are signed with on their Foreheads. This is termed the Cross **Commisse**, being a token of Absolution, especially when the Malefactor hath it stamped on the hand.

A on a chief V 3 such Crosses O born by *Druy*.

CVI. A **Cross portante proper**, in a Field Vert. This is termed portante, from the Latine *porto*, to bear or carry; on which Malefactors were Hanged, it bearing them up. I set not this Cross like to that of *Leigh's*, but upright, as if it were ready fixed for the Malefactor to be hanged thereon; but his, *p. 31.* is Bend wise, giving this reason, that on that manner it was born by our Saviour to the Mount; and therefore he gave it the term of a Cross Portate; when as long before *Leigh's* time it was called a Cross Portant, from its Office in bearing, and not from its manner of being carried. This was not born by any, neither could be, but by the Lord Jesus, by whom we receive Remission of Sins, and Sanctification in him through his Cross.

O on a Mount A such a Cross couped G quartered by *Dillbern*.

Party per Pale B and A on a Mount O two such Crosses counterchanged. Born by the name of *Perghausen* in *Bavaria*.

CVII. He beareth Sol, a **Cross portante double and couped**, Saturn. This is very ancient, Blazoned a **Cross double**, and no more, or a **Cross double portante**. Mr. *Morgan* calls it a **Cross Patriarchal**, but it wants a head, or is a head too short for that; it may more fitly be called Christ's Cross, on which he suffered for our Sins, the top having the Supercription on, wherein was written the cause of his Death; and the lower cross piece, his Hands and Arms were fixed and fastened to.

CVIII. He beareth Argent, a **Cross portant (or portate) raguled and trunked**, Gules. By the name of *Rageley*. This Cross, is by *Leigh, pag. 3.* and *Bajwell, pag. 136.* called a **long Cross raguled and trunked**, the latter adding the term *couped*, which might have been omitted, in regard raguling signifieth the cutting off of the Branches, the Knots or little Notches only remaining, from the Stock or Stem of the Tree; see *numb. 112.* and *Trunking*, the cutting of the same Tree from its Root and Branches. See more of this term in the Cross raguled, *numb. 21.* and Bends raguled, *chap. 4. numb. 26.*

If the Cross were not raguled, but only trunked, it would be a plain Cross having only the ends cut off with a kind of slip at them, as you may see in this example.

CIX. He beareth Azure, a **Cross beasantee**. By the name of *Loregold*. *Leigh, pag. 36.* saith, That the Beasants ought to be numbred, though they be never so many; but all other things (except Crowns) may be *sa s number*, to which may be used (*ty or tee*) as *Platee*, *Billettee*, *Lofengy*, &c. But I am of that Judgment, that if the Cross extend to the sides of the Escochion (be they

more or less) they need not to be numbred; but if they be in Crofs, Salter, Bend, Cheveron, and Fesse, and do not touch the sides, then it is fit they be numbred.

CX. He beareth Argent, a **Cross Cable**, (or **cablee** Gules. By the name of *Cabley*. This is a Cross made of Cable Ropes; and is different from the Cross corded, *numb. 15.* that being a Cross over-cast, or wound about with a Rope; but this is the meer Rope it self in a Cross.

CXI. He beareth Gules, four **chains square linked** in Cross, Argent; **first to an Annulett in Fesse**, Or. By the name of *Ironside*.

Chains are born in Crosses, or in the form of any Ordinary, and ought to be mentioned: If round Links, then to say a **Chain** will suffice, it being supposed to be round; but if the Chain be an **S Chain**, a three cornered, or square **Chain**, it must be named what kind of fashion the Chain is. But all sorts of Chains, when they are fixed to Birds, Beasts, or any other Animal, need no mentioning of what sort of Chain it is; for in such cases it is left to the discretion of the Work-man to make what Cain he pleaseth; and the *Artist* to term it a Chain, without any other addition.

CXII. He beareth Luna, a Cross **snagg**, (or **snagged**) Venus. By the name of *Lap* or *Luse*. This differeth from Couping, that having no thickness or substance of the Cross appearing; and this having all seen, as if it were a plain Bough of a Tree cut off to fight; which Wood-men term Snagging or Lopping; and differeth from trunking, that having a slip left at the end cut off, as *numb. 108.*

CXIII. He beareth Saturn, a Cross, being **Moline** in Pale, and **Pattee** in Fesse, Luna. By the name of *venine*, or *Nevington*. I have found it Blazoned, a Cross Moline and Pattee, contrary one to the other; or or opposite one to another. And thus you shall find Crosses composed of the several sorts of Crosses as is before shewed, in blazoning whereof first name the top flame or Staff, and after what manner it is; and then the other parts afterward.

CXIV. He beareth Mars, a Cross **double claviéd**, Sol. This term is borrowed from the Latine word *Clavis*, a Key; because it hath the double Bites and Wards of a Key at all the three ends; and the handle of a Key at the fourth. This is born by our Holy Father the Pope, when he walks in Procession in his Pontificals. It is also born as the Coat Armour of *Clavely*.

CXV. He beareth a Cross of **four Queen Ermine**. Here neither the colour of the Field, nor Charge is named; all being understood by the term Ermine, which is Black upon White, as is manifested in the bearing of Furrs, *chap. 7. numb. 2.* This is born by the name of *Hwleton*, of *Piston*, in *Cheshire*.

A Cross of four Peacocks Tail Feathers proper, with a Trefoil in the middle O is the Crest of *Van Der Streithorfi* in *Westphalia*.

CXVI. He beareth Argent, a Cross of four **Leaves**, Vert; or else four leaves conjoined in Cross: Or a Caterfoile, set in Cross. This is born by the name of *Catteline*, or *Catline*. Some term it a Cross quarterfoile,

and such a Cross set Salterways, V. in a Field, A. I find born by *Utzingen*.

CXVII. He beareth Or, a Cross of four **Pomells**, Sable. By the name of *Hammough*, or *Mac Hammough* in *Ireland*. This is also Blazoned a Caterfoile (or more properly a Quarterfoile) that is, a Flower of four leaves, but the Caterfoile is ever pierced.

S the like A born by *Hottingen*.

G the like A born by *Semmler*.

CXVIII. He beareth Argent, a Cross quarterly, (or parted per Cross) Sable and Gules; at each end the **Cornish** of a **Mullar** (or **Capital**) Azure, adorned with two **Dak Leaves**, Vert. Such a Cross as this I find stamped upon some of the Coin set forth in the time of *Richard* the Second, King of *England*. Some term this a **Cross Collarino**, (that is) a large round swelling, with a Fillet on each side, which said ends may be adorned with what the Bearer pleaseth, as in the following examples.

CXIX. He beareth Gules, a Cross Argent, charged with another, Azure; **Cornished** and **flurt**, Or; the like to this, adorned with a Crown, in place of the Flurt and Cornishing; both which Crosses I have observed to be on our ancient *English* Coin, from whence I have taken most of these succeeding Crosses. See *numb. 121.*

CXX. He beareth Argent, a Cross quarterly Azure and Or, **Cornished**, Gules; adorned with an **Acorn** slip between two leaves proper. Some will say the ends **Cornished**, each adorned with an **Dak** slip fructed. Some term this a Cross quarterly **Affrical** adorned, &c. See *numb. 118.*

CXXI. He beareth Azure, a Cross voided, Argent; at each end a **Coronett**, Or. This is also termed a **Cross voided Crownated**, or **Coronetted**.

CXXII. He beareth Argent, a Cross quarterly Gules and Azure, in the Center, and at each end a **Caterfoile**, Or; with three **Trefoils** proceeding from the **Tops**, Vert.

CXXIII. He beareth Or, a Cross **Moline** parted per Cross, Sable and Gules at each side, at the Center, and on the top, a **Leaf** of three points issuant, Vert. This Cross, if it were one colour, then it should be Blazoned, a Cross **Moline** **sarcelled**, and joined again, as much as if it were sawed asunder; and after put together again, so that nothing doth appear but the score or joynt, where it is set together.

CXXIV. He beareth Gules, a Cross **Banister** Argent, crowned at each end, Or. This may be termed a Cross **Avestanee Crowned**. Others Blazon it four **Banister Staves**, fixed Cross-wise to a **Plate**, each Crowned on the ends.

CXXV. He beareth Argent, an **Annulett**, Or, with four **Fruitages** joined to it in form of a Cross, Vert; the **Grapes** proper. Some say, four **Fruitages** in Cross, conjoined by their **Foot-stalks** to an **Annulett**. This is also termed, a Cross **fruitagee**, with an **Annulett** in the Center.

CXXVI. He

CXXVI. He beareth Or, a **Cross Pomell** **Abellaned**, Gules; or a **Cross Pomery** **Abellan**: And some Blazon it a **Cross Pomell**, **floury**.

O a Cross Pomell Molyne G. This is quartered by *Gleichen*, a Noble Family in *Germany*. And so Crosses Pomell or Cornished are diversly born with the heads of other Crosses upon them.

CXXVII. He beareth Azure, a **Mascul** **Argent**, with four **double Fruitages**, (or double **Abellanes**) joined to the points thereof in form of a **Cross**, Vert. Others term it **double Abellaney**, (or **fruitagee**) in **Cross**, joyned to a **Mascul** in the **Center**.

CXXVIII. He beareth Argent, a **Cross Patonce** Gules; at each end a **Slip** of three **Leaves**, Vert, between two **Catcofies** (or **Scrowls**,) Azure; *alias*, between two **Modillions**, for so your Free Masons term the **Catcofies**, and all turning **Scrowls**.

CXXIX. He beareth Argent, a **Cross Pomell**, Gules; at each end a **Coronett** Or; adorned with a **Cresail** between two flying or flourishing **Catcofies** or **Scrowles**, Vert. This is a **Cross Pomell Coronette**, or **Coronetted**, &c.

CXXX. He beareth Or, a **Cross Abellane** **Inbeck**, Vert, **seeded**; or **double Buttoned**, Argent; or **double Pometted**. Others term it a **Cross Abellane**, with the **Leaves** or **Points** **inverted**. Others say four **Abellane Leaves** turned inward, fixed to a **Round** **lett** in form of a **Cross**.

CXXXI. He beareth Gules, a **Cross Anserated**, (or a **Cross Gungolee**,) Argent; from the middle of each end, a **Nail** round headed, issuant, Sable.

CXXXII. He beareth Or, a **Cross Moline** rebated on both sides, under the **reverting**s, Gules. See *numb. 92*. Some term these **double rebated**.

VIRORUM CLARISSIMORUM,

*Johannis Wainwright Legum Doctoris quondam Cancellarii,
Qui fato Cessit: &*

*Thomæ Wainwright Legum Doctoris, Jam nunc Successoris Cancellarii
Diocensis Cestriæ.*

E T

*Ricardi Wright Surrogati aliquando ejus, M. A. & Rectoris Ecclesie S. Mariæ super Mon-
tem in Civitatis Cestriæ, Generi predicti Johannis. Hoc Caput Dedicatum est*

Per R. H.

C H A P. VI.

NOW it follows that we speak of the **Che-
veron**, and of its diminutions; a **Chebe-
ron** is an Ordinary formed of a twofold
Line, Pyramidal-wise, the foundation being
in the Dexter and Sinister Base point, or near thereunto,
and the Acute Angle of the Spire near the top of the
Escuchion, as the examples.

Of the Cheveron.

I. He beareth Topaz, a **Cheveron Ruby**. This was
usually the ancient form and manner of drawing the
Cheveron, as appeareth by many Seals and Monuments
yet extant; but common Painters, the common disor-
ders of these Tokens of Honor, have greatly corrupted
both this and other Ordinaries by their Phantastical
Inventions, whereby they do not seem to be what they
were before; for a little alteration, makes a great altera-
tion in a principal part; so a little alteration, either by
augmentation, diminution, transposition, or whatever
other means, doth occasion so great a change in them,
as to make such things that they differ from them-
selves.

But seeing Ancient things are now adays laid aside,
as out of use; I will give you an example of the modern
Cheveron which is now in use, and according to that

Pattern, in all my examples, I mean to follow. This
is born by the name of *Stafford*, Lord *Stafford*. And al-
so by the name of *Ile*.

II. He beareth Saphir, a **Cheveron Topaz**. This
Ordinary is resembled to a pair of Barge Comples or Raf-
ters, such as are on the highest part of a House, for the
bearing up of the Roof. *Leigh*, pag. 65. saith it is the
Attire, which in old time the Women Priests used to
wear on their heads, as may be seen in divers old Mo-
numents. See lib. 2. cap. 17. numb. 32.

The content of the Cheveron is the third part of the Field
if it stand alone, or be charged upon: But *Leigh*, p. 66. saith
the fifth part, and that you may have two Cheverons in
one Field, but not above, and if they exceed that number,
then to be termed **Cheveronells**, that is to say minu-
tives, or small Cheverons. This Coat is born by the
name of *Swannington*, with a Label, Gules.

A the Cheveron G born by the name of *Trye*.

O the like V by the name of *Ingee*.

A the like B born by *Cirecster*.

B the like O by the name of *Aspul*.

Per Pale B and A a Cheveron counterchanged, born
by *Van Daspach*.

III. He beareth Azure, a **Cheveronell Purpure**.
This is a diminution of the Cheveron, and containeth
half the quantity of it. You may saith *Leigh*, *ibidem*,
have

have no more than three in a Field; yet I have seen four and five in an Escuchion; and all termed Cheverons and Cheveronells. This is not born alone, as any peculiar Coat; but A² Cheverons G is born by the name of *Fitz Robert*.

G 3 such A born by *Shingleton*.

IV. He beareth Diamond, a **couple-close**, Pearl. This containeth the fourth part of a Cheveron; and is not born but by Pairs, except there be a Cheveron between them. The name of this ordinary (saith *Gmiliams*, fol. 79.) doth well agree with its use; for it is termed couple-close, because they do by couples, inclose the Cheveron. *Upton* calls it a couple, or spars of Houses. If there be more than five in a Field (saith *Mr. Morgan* lib. 2. fol. 53.) then they are called couple-closes, not cheveronells.

V. He beareth Or, a **Cheveron in chief**, Vert. Note that the lower part of this Cheveron, is far above the ordinary place of a single Cheveron; therefore it is termed a Cheveron in chief.

There are divers accidents incident to this ordinary; as transposition, as in this example; (which some term a Cheveron transposed, or trasposed, for a Cheveron in chief) coupling, voiding, reversing, parting, and the like; of all which I shall give examples. This is born by the name of *Lofty*.

VI. He beareth Or, two **Cheverons**, Gules. These keep the quantity according to the rule of *Leigh*, pag. 66. and there can no more than two be so termed; if they exceed, they change their name to cheveronells. This is born by the name of *Fanner*, of *Fanner*.

A two such S born by *Lamborne*, and also by *Ashe*.

G 3 Cheverons A born by *Jessyn ap Gwrgan*, a British Noble Person.

O 4 such G born by *Everid*, or *Every*.

VII. He beareth Argent, a **Cheveron voided** Engrailed, Gules; if the middle part of this Cheveron were of any other colour from the Field, then Blazon it thus, a **Cheveron engrailed, surmounted of another**, of such or such a colour. This Coat is born by the name of *Voyd*.

B the like O born by *Dudley*.

G 2 Cheverons B edged, and the top envecked A others Blazon it edged, the top parts engrailed on the lower side. This is born by the name of *Asten*.

VIII. He beareth Argent, a **Cheveron couped**, Purple. What coupling is, you may see in Fesses couped, and humett, chap. 4. numb. 63. 64. This is born by the name of *Jones*.

IX. He beareth Argent, a **Cheveron**, Vert, **Bordered**, Gules. *Leigh*, pag. 106. saith, That if this Cheveron were couped as the foregoing Cheveron, then it is not to be termed Bordered, but Purled; because nothing may be bordered that is within the Escuchion. But *Ferne*, pag. 173. gives an example to the contrary, in a Crois Couped, Fimbriated, or Bordered. This is born by the name of *Boardman*.

B and G per Pale, 3 Cheverons couped counterchanged, bordered A by the name of *Saye*.

X. He beareth Azure, a **Cheveron recourfie**, Argent. What this term recourfie is, with its signification, I refer the Reader to the Crois recourfie, chap. 5. numb. 5. 6. Born by the name of *Skatterley*. This is by the French Heralds termed *clethee*, or *percee*.

XI. He beareth Vert, a **Cheveron voided**, of another engrailed, Argent. This is, as if a Cheveron were divided into three, which naturally is but one: The French term it a **Cheveron refarcelled** of another; if this small Cheveron were composed of any other sort of Lines than plain, it must then be Blazoned, a Cheveronell (so or so) within, or between, a Cheveron voided engrailed. If the said small Cheveron, or cheveronell, were of any other colour, to that engrailed, then it is also to be termed (within or between) the Cheveron engrailed, for it cannot be said to be voided when it is of a contrary colour. The first Blazon is the proper Coat of *Scattergood*.

A such a Cheveron S born by *Denton*.

XII. He beareth Or, a **Cheveron between two couple-closes**, Gules. By the name of *Fortior*. This is an example of couple-closes and their manner of bearing: It is of some Blazoned, a Cheveron cotized; but more proper a Cheveron coupled.

A such a Cheveron coupled S born by *Gimvile*.

XIII. He beareth Azure, a **Cheveron waved** Argent. By the name of *Wake*.

A the like B by the name of *Waters*.

XIV. He beareth Or, a **Cheveron Brettissed**, Vert. By the name of *Slatter*. *Ferne*, pag. 179. saith, This is better Blazoned, and all other Ordinaries, by the term Crenelle, or imbatelled; than Brettissed: But in my Judgment they are as much different as Dauncette and Indented; the one being bigger and thicker than the other; so it is in this; Brettissed hath but a thin Cheveron, or rather cheveronell; and seldom exceeds 4 or 5 Brettisses; and they one opposite to the other; see an example in Bends, chap. 4. numb. 32. But Imbatelling is quite contrary, as in this next following Coat.

XV. He beareth Vert, a **Cheveron Imbatelled**, Or. Here you may see the Crenell or Battlements of the Cheveron are contrary one to the other, and join to the sides of the Escuchion, which the Brettisses never do.

You will often find Cheverons born, Engrailed, Indented, Crenell and the like, only on the upper side; so that in such cases you are to mention what side it is, engrailed, &c. in the upper or neither side. This is born by the name of *Jud*.

B the Cheveron Imbatelled on the upper side, O by *Bayne*.

G the Cheveron engrailed A born by *Hinkley*.

XVI. He beareth Argent, a **Cheveron triparted**, Sable, or trebble parted. All ordinaries that are composed of a double or trebble line, are subject to these kind of partings, which is a division into two or three pieces, each piece running along the ordinary, till it come to the very utmost part or side of it; so that in all the meeting places it seemeth to be fretted one of another, as you see in this; and the Crois parted, chap. 5. numb. 82. 85, 88. This is born by the name of *Smithley*.

XVII. He

XVII. He beareth Azure, a **Cheveron reversed**, Argent. By the name of *Rumor*. This Cheveron is by *Foijmel*, pag. 36. termed *Verse*. I have seen such a Cheveron, with a Cloud at the point of it, with the Sun-Beams issuant proper: and also with three of the same in another Coat. The *French* term it a Cheveron *Renversie*.

A the like G sustaining or supporting another B. By the name of *Upholder*.

G the like A born by *Van Chontzin*.

XVIII. He beareth Argent, a **Cheveron couched**, Gules. By the name of *Tourney*. If it be couched on the other side, it is termed couched Sinister. The *French* part 1. fol. 11. call it a Cheveron pointed or turned.

G the like A by *Marshall Van Stuntzberg*.

XIX. He beareth Purpure, a **Cheveron Couched Sinister**, Or. by the name of *Bightine*. The *French* fo: 10. termeth it a Cheveron **Counter turned**, or **Fallen**, or **Counter Pointed**.

XX. He beareth Argent, two Cheverons **Couched**, Vert. by the name of *Couchmaster*. Others say 2 Cheverons Couched in Point. the *French* call them 2 Cheverons **Counter-turned**. & some of our Heraulds, term them 2 Cheverons **Couchant Dexter & Sinister**. But note it, that when there is 2 couchant, they can be placed no otherways; Although very often they are blazoned **Counter-couchant**, as is aforesaid.

O, a Rose betw: 2 Cheverons, the higher **Reversed**, G: Is the coat Armour of *Van Steen*.

XXI. He beareth Or, two Cheverons **Couched, Fretted, & couped**, Gules. by the name of *Loren*. If these were of contrary colours, then blazon them thus: He beareth Or, a Cheveron Dexter couched Azure, Fretted with another Sinister, Gules, both Couped.

XXII. He beareth Sable, a **Cheveron Fretted** with another Argent. by the name of *Weismar*. Others blazon it thus, **Fretted**, with another **Reversed**: Yet the term of *Reversing* needs not to be named, by reason the Cheveron that is leated in its right place, doth manifest the other to be contrary: else it could not be Fretted.

XXIII. He beareth Or, Three **Cheverons Fretted** in Base, Sable. by the name of *Brasbridge*. others blazon it, 3 Couple-cloves **Brased**, or **Minuts**, or Small Cheverons, or 3 **Cheveronells Interlaced**, *Mr. Morgan lib. 2 fol. 52.* saith, 3 Cheveronells Brased in the base of the Escuchion. B, the like O, born by *Fitz-Hugh*.

A, the like S, by *Brakenbury* of *Sallaby* in *Durham*.

XXIV. He beareth Or, a **Cheveron Arch**, Gules. Of some it is called an Arch **Cheveroned**, or **Cheveronwise**; Others call it only an Arch. But of that it wanteth both **Capitalls**, & **Pedestalls**, which an Arch hath; this being a **Demy-Circle**, and set in the forme of a Cheveron from side to side, And is therefore blazoned a **Cheveron Arch**. Yet *Morgan* termeth it **Enarched** only, without naming any Cheveron.

XXV. He beareth Argent, a **Cheveron Enarched**, Vert. by the name of *Ouldman*. This is by some called a **Cheveron Enarched voyded**, And is the ancient form which *Legh* sets forth pag: 105. but now out of use: And

therefore may best be termed a Cheveron **Supported**, or **Proped up**, or **Sustained**.

XXVI. He beareth Purpure, a **Cheveron Enarched**, Argent. This is that which is now in use. And is born by the name of *Archever* of Scotland.

XXVII. He beareth Argent, a **Cheveron Double-downsett**, Gules. I find this Cheveron to have diverse blazons, *Gwilliams* termes it a Cheveron **Rampee**, But I believe he ment **Coppee**, as rising in the head higher then ordinary, which in old *English* is called, **Copped**, or **Coppedee**, or **Coppee**: And so in severall Books in the *Heraulds Office* I find it termed. But I hold **Double-downsett**, or **Double-onsett**, to be a good Explanation of the thing; as having the two sides cut off, & Slipped down from its top part. Such a Cheveron betw: 3 Crosses **Bottony Fitched**. is born by the name of *Greenway*.

XXVIII. He beareth Azure, a **Cheveron Debrused** or **Fracted**, Argent. by the name of *Winterfall*. Some term it a **Brokeu Cheveron**, others a **Cheveron Remoned**, But that I hold a more fitter term for the next.

XXIX. He beareth Argent, a **Cheveron Remoned** Vert. This is born by the name of *Shak-Raffe*. Some blazon it, **Remoned** the one **Joynt** (being fallen) from the other. After these three Examples, you will find severall of the other Ordinaries, as Bends, Fesses, Barrs, &c: to be both **Double-Downsett**, **Debrused**, or **Remoned**: which you may by these Blazon accordingly.

XXX. He beareth Gules, a **Cheveron Disjoynted**, Or. by the name of *Discord*. Some say (**Disjoynt at the top**) Which addition needs not, for if it be Disjoynted it must be in the **Top**, there being no other place for it to be Disjoynt in. The *French Armorsists* call it, a Cheveron **Brisee**: That is **Burst** on the Escuchion, or **Shield**.

Such a Cheveron as this, but touching in the Bottom of the Joynt, And open in the Head: A. in a field S. is born by *Sorton*, Which may be termed, **Disjoynt**, or **severed at the head**: or **Fracted** (or open) in the top.

XXXI. He beareth Purpure, a **Cheveron**, & a **Demy Sinister one**, Argent. This is born by *Rosshall*. It is termed a **Demy Sinister Cheveron**, to distinguish it from that on the Dexter side: Some blazon it, a **Demy Cheveron Sinister in Base**. To declare its contrary bearing from the Succeeding Example.

A the like S betw: 3 Roses G born by *Bugallberg*.

XXXII. He beareth Argent, a **Point Dexter Remoned**, & a **Demy Cheveron Sinister**, Gules; In Base a **Cheveron** charged with 4 **Squires**, Or & Az: by the name of *Dentrey*. This is also blazoned Ar: a Cheveron Gu: charged with 2 **Squires** O & Az: with a **Sinister Demy one**, & a **Point Dexter Disjoynt** in Chief, of the Second. The like I finde born by *Van Harborough*.

XXXIII. He beareth Azure, a **Cheveron Argent**, charged with two **Squares** Sable. By the name of *Square*. This I have found otherwise Blazoned, as thus, a Cheveron charged with two Cheveronells counter-couchant; or couchant Dexter and Sinister.

XXXIV. He beareth Or, a **Cheveron in point imbotwed**, Vert. And again I find it Blazoned, Vert. two points

points Dexter and Sinister Flaunchee, and a point in point Or, else a cheveron Flaunched. The Dutch generally draw their Cheverons after this form: This is a Dutch or German coat, born by Van Oeden.

S the like O born by Van Ehingen.

G the like A by Hohenrain in Bavaria.

A the same G by the name of Turnell.

XXXV. He beareth Purpure, a Cheveron of seven Tiles, each projecting other, Argent; or a Cheveron grady on both sides. This is born by the name of Grise. Some term it 7 Billets or Tiles in Cheveron.

Per Fesse O and B the like Cheveron G with a Demy Lion rampant on the top of it S honoured O born by Rugen.

XXXVI. He beareth Argent, two Cheveron Arches couched, Gules. Some term them two Flaunchees voided, but those they cannot be, as the examples following will demonstrate, by reason they are born fretted. The French call them 2 Demy Wheels, or Circles fixed to the Dexter and Sinister sides. By the name of Le Archer; that is *Le Archer*; as *Deacres*, or *Dacres*, for *De Acres*.

A the like G charged each with three Bezants, by the name of *Van Pommerheim* of *Hassia*. Also by *Pernsheim*.

XXXVII. He beareth Azure, two Cheverons arched, couched and fretted, Argent. By the name of *Blace-Girdle*. These sort of Cheverons do represent the Vault or Arched Roof of a Church, as well as the Pyramid Cheveron doth resemble the Gable-end, or Rafters of a House.

XXXVIII. He beareth Argent, a Cheveron, on the top of it, the Ring and Cross-Beam of an Anchor, Sable; others more short, term it the Head of an Anchor; but I hold it best blazoned, to term it, a Cheveron Potonce, with an Annulett on the head of it. Such a Cheveron between three Crestants, was the Coat of that worthy person *Sr. Edward Walker*, Kt. *Garter*, principal King of Arms of all English Men; my very good Lord and Master, as pertaining to Arms, whose Deputy I was.

XXXIX. He beareth Or, a cheveron with a Cross Patee on the top of it, Gules. After this manner the Cheveron is often beset with several sorts of Crosses, the Flower de Lis, and the like; which doth rightly set forth to our view the end of a House, with its Pyramid or Pinacle upon it. Born by the name of *Topping*. Also by *Van Neven*.

The Cheveron is not only adorned on the top, but it is very often born flourished on both sides with Flory and counter-flory, as you may see in Fesses of that nature; chap. 4. numb. 36. 83.

B a Cheveron with the point or top of it in the mouth of a Leopards head O born by *Rotenburg*.

Party per Cheveron B and G a Cheveron with the top of a Flower de Lis on the point O. Some term it a Cheveron Flory on the top. This is born by *Van Friburg*.

A a Cheveron Imbowed G on the top an Heart reversed V Born by *Purten*.

XL. He beareth Argent, a Cheveron disjointed and crossed, Vert. By the name of *Lamleson*, or for brevity *Lamson*.

XLI. He beareth Or, a Cheveron supported with a Beam and Standard, Gules. By the name of *De la Dill*. See of this cap. 9. numb. 95.

Of the Salter.

2. THE next is the Salter, which is an ordinary composed of a four-fold Line, whereof two are drawn from the Dexter Chief, to the Sinister Base, and the other from the Sinister chief, towards the Dexter base, and do meet by couples in acute Angles, about the middle of the Escochion. This ordinary is limited to the fifth part of the Field, the same being not charged; but if it be charged, then it shall contain the third part thereof; as the example.

XLII. He beareth Azure, a Salter, Or: *Ferne* calls it a Cross traversed in Salter. This Ordinary varieth his name in Blazon according to the diverse forms of Lines whereof the same is composed; for in that it is no less diversly made in respect of its lineaments, than the Cross is; whereof you shall see precedents of this following. The French call it *Cruz decussata*, being cut or divided like an X, this is also called *St. Andrew's Cross*, or a Cross Saltery. If it have no Charge, then saith *Morgan* it is termed per Salter. This is born by the name of *Windcombe*.

O the like S born by *Helsby* or *Helesby* of *Helesby*.

G the like A by *Nevile*.

A the like Sable. Born by *Cavenham*; and also by *Baldwin*. The like born by both *Duckett*, and *Cornington*.

B the like O born by *St. Alban*, the first Martyr of England, Anno 286.

XLIII. He beareth Argent, a Salter voided, Gules. By the name of *Stevens*.

G a Salter O surmounted of an other V by *Andrew*.

XLIV. He beareth Argent, a Saltire quarterly quartered, Gules and Or. Yet the French term this quarterly only. Born by the name of *Hatstat*.

B such a Salter O and A is the Coat of the Bishoprick of *Bath* and *Wells*.

O such a Salter A and G born by *Van Anallaw*; also by *Benkham*.

XLV. He beareth Or, a Salter triparted Sable. The French term it, three Tierces in Salter: it is born by the name of *Trillombere*.

A the like B. between 4 Martlets S. born by *Tiercelin*.

XLVI. He beareth Gules, a Salter Engrailed, couped Argent. Sometimes three of these Salters are born in a Coat, then the word Couped may be omitted, being understood to be so, when they are removed from the center of the Escochion, except an ordinary interpose. This is born by the name of *Brekerosse*.

A the like B with 5 Flowers De Luce O. by *Bylingdon*.

A 3. such S. born by *Lesenten*.

Er, 3. such S. by *Newark*.

per Fesse O and B. a Salter couped counterchanged by *Manning*.

A. a Salter couped O. by *Van Grefen*.

XLVII.

XLVII. He beareth Argent, a **Salter Saltired** Sable. Some term this a **Salter Crossed**, which is very improper; for if the Cross be Crossed, or termed a Cross Croflet, from its little Crosses at the ends; then Justly may this Saltire (and also them that are composed, after the same form, as the Crosses are) be termed a **Salter Saltired**, or a **Saltire Saltirlet**: being there is as much right to the term for one, as in the other. *Leigh pag. 39.* termes this **St. Julians** Cross, of others a Cross Crossed in Salter, and a Salter couped Crossed. This is born by the name of *St. Sebastiane* or *Sebastiane*.

The Christian Knights and Martyres that bore **Salters**, were **St. Andrew**, who bore it Trunked: **St. Lawrence** and **St. James**, bore it Raguled, shewing the difficulty of their ascent; **St. Alban** bore it plain, and **St. Julian** bore it Crossed. Some bore it sharp, to shew their Sufferings, others Flowry, to shew their Victory.

XLVIII. He beareth Azure, a **Saltire Saltired**, **Patee** Or. And so of the rest, according to the diverse Forms of Crosses: these sufficing to instruct the Ingenious. This is otherwise Blazoned, a **Salter Patee** Crossed, or a **Cross Patee** Crossed in Salter, born by the name of *Frisfall*.

XLIX. He beareth Argent, a **Salter Molyne** Gules. *Leigh pag. 34.* termes this, a **Ferre de Moline**, which cannot be, for the **Ferre de Moline** is ever peirced, which this is not: again **Ferre de Molins** are different from this, as the examples of them will demonstrate, see *lib. 3. chap. 8. num. 57. 58. to 67.* And on the other side, to give it a new name because it is shifted, or transferred to another place, is repugnant to common reason, & faith *Gmillsams fol. 93.* It is a paradox, that transposition (being a thing accidental) should give a new name to the thing transposed: *quia novum nomen dat n. n. m. esset i.*; new things are supposed to be where new names are given: Addition and Subtraction are of greater force than Transmutation or Location; yet there is no such power in them, as to alter the Essence of a thing: So then the removing of this from a Cross to a Salter, causeth it not to loose its proper and ancient Blazon, but rather to retain that which is most agreeable to reason. Therefore to Blazon it a Cross Molyne in Salter (or set Salterwise) is no improper term. This is born by the name of *Saltmarsh*.

L. He beareth Azure, a **Salter Nowy couped and pierced** **Losengeways**, Argent. This is also termed a **Salter Ferdon** couped and pierced: and is born by *Mulrin*, or *Milrine*.

LI. He beareth Azure, a **Salter Nowy**, Or. This is the Coat of *Nonilbergh*.

LII. He beareth Argent, a **Salter Nowy arched**, Gules. Some puts the Arched before the **Nowy**; others term this, a **Salter Ferden**, from the **Ferre de moline** as it was made of old.

LIII. He beareth Gules, **Four Chaines** in Salter, fired to an **Annulett** in Fesse, O. by the name of *Van Rissenberg*.

G the like A is born by the name of *Jay*.

LIV. He beareth Argent, a **Saltire Azure**, **Botony** Or. The French call it, a **Salter Tholose** or **Toulouse**, and **Pometie**, which signifies round and circular heads.

This may be termed four Bowes (or Key heads,) the Shanks joyned in Saltire: or a Saltire of the handles of Keys. This is a Duch coate born by the nome of *Bassing hold*.

LV. Hk beareth Or, a **Saltire Saltired** Gules, **Flowry Sable**. This is also termed, a **Saltire potent**, **Saltired Fowry**; and a **Saltire Gemelle**, from its double Saltering, in the the head and steme. This is born by the name of *Salterfoile*.

Of the Frett.

3. **T**HE next ordinary (if I may so term it) is the **Frett**, that is to be treated off: It is as all other of the ordinaries, subject both to change, and being changed; as also to increase, and be diminished, which makes me to impute it as an ordinary, (though no Herald, as ever I heard, or read off, did ever so account it) therefore I give it a place amongst the rest.

The **Frett** is a thing composed of six peeces, in maner of a true loves knott, an example hereof is in the following Escochion.

LVI. He beareth Diamon, a **Frett Copaz**, the French call this a **Frett** of six peeces; but *Fern*, in *Laces Nobility page: 69* Saith that a **Frett**, thus made, cannot be of less then six peeces, and therefore needs no other addition then a **Frett**: If it consist of more, it is called **Frettee**; as in the next example. This is Born by the nome of *Carier*.

A the like S born by the name of *Vernon*: And also by the names of *Talmache* and *Braine*.

O the like S born by *Morda* and *Champaine*.

LVII. He beareth Argent, **Frettee** Gules: *Leigh pag 93* saith that if a **Frett** consist of eight, then it shall be numbred, if more, then to term it **Frettee**.

Nevertheless, observe this by the way, that if the Escochion be smal or great, either the six, eight, or ten peeces, run from side to side, and that all the ends are joyned, to the parts of Field, then be the peeces more, or less, it is termed **Frettee**. This is born by name of *Frettermine*, *Hevay*. (Stanton.)

V the like **Frettee** O by the name of *Whitware* of *Thur-*

O the like B born by *Willoughby*.

S the like O by *Maltreviers* and *Tardock*.

O **Frettee** G by *Falkenston*, or *Falkenstein* of *Bavaria*.

A the like G born by *Rottengatter*.

LVIII. He beareth Azure, a **Frett** in Fesse, Or. The **Frett** when it is between any other things, then it is ever set thus: And then to say a **Frett** between such or such things, will suffice without mentioning its being in the Fesse part. *Boswell pag: 129.* Saith, a **Frett** transverse in Fesse. The like between three Flower de Luces, is born by the of *Idnerth Vail*, a Welch noble personage.

LIX. He beareth Argent, a **Frett Couped** Sable. Born by the name of *Yaton*.

LX. He beareth quarterly Gules, and Argent; two **Fretts** Sable. in the Blazon of this Coat, you see:

I do not name (on the second and third quarter,

as some do, the two Frets to be placed) but take no notice of them: For this is to be noted that Colour upon Colour, Mettle upon Mettle cannot be, neither is such good Armory. Therefore the Frets being Sable consequently must be on the Silver quarters; on the contrary if the Frets had been Mettle, then they should have been on the Coloured quarters. Born by the name of *Spance*. A and G quarterly two Frets. O by the name of *Dutton* of *Dutton*, and *Hutton*. This is also born by *Warbenton* of *Arley* in *Cheshire*. The like Coat with a Fesse B born by *Morris* of *Speake*, and also by *Robinson* of *Gwerfult*.

LXI. He beareth Vert, a **Frett Ingrailed** Or. as this is borne Ingrailed, so you shall have them Indented, Crenell, Waved and the like: If this had contained more frets, then here it hath, (saith *Leigh* pag. 93) then it should have altered from its name, and been termed Diaper; what diaper is? you may see *cap. 7 numb. 17. 18* This is borne by the name of *Hornelaw*.

A such an one S. borne by *Canfield*.
G the like Er. by the name of *Eynesfort*.

LXII. He beareth Argent, a **Frett bettised** Sable. This Frett I find very anciently blazoned a Frett **espined**, or **assined**, and of some, a Frett **crossed**. This is born by the name of *Brettarchby*.

LXIII. He beareth Gules, **Frettee** Or, charged on each joynt, with an Ogres, or Peilett. *Ferne* pag. 188 Blazons: this, a **Crillis** (or Lettice of a Window, or Prison grate) Or Cloved, or Nailed Sable. This is born by the name of *Trolls*, O Frett G Nailed O by *Triffill*.

LXIV. He beareth Argent, **Frettee** Gules, each charged on the joynt (or middle) with a Flower de lis, so you shall find them charged, with several other kinds of things both quick and dead, examples whereof would be numberless, these being sufficient for instruction to things of this nature. This is borne by the name of *Hamden*.

A Frettee S between each joynt a Cinquefail G born by *Thornton*. See *lib. 4 nmb. 140*.

LXV. He beareth Gules, a **Frett** Argent, interlaced with an Annulett in the middle Or. Here I say in the middle to distinguish the place, because the annulett (as I have seen in Coats) may be on the out side of the Frett, which is then thus termed, a Frett, interfretted (or interlaced,) within an Annulett. This is born by the name of *Mardalase*.

LXVI. He beareth Or, between the inner part of a **Frett**, Gules, **Four Hurts**: or more short, blazon it, Or, in a Frett Gules, Four hurts: if they were on the out side, then term it a Frett between Four such or such things.

LXVII. He beareth Argent, a **Frett**, **flory at each point** Gules. This is born by the name of *Flowerfort*. I say at each point; to shew they are no where else, for by the term Flory, the Staves of the Frett may be understood to be adorned, with the Flowers also.

LXVIII. He beareth Azure, a **Frett in a true Loves Knot**, Or. It is born by the name of *Tracove*. Termed also a Frett double Fretted; or a **Frett fretted**, with round ends.

Of the Roundlet.

4. **H**Aveing now spoken of the principal Ordinaries and of their Deminutions, it remains to treat of such things, as have a near resemblance among themselves, yet do really differ one from the other in name; of which sorts or charges, I shall in the first place speak of the **Rounds, Roundles, or Roundlets**; of which *Leigh* pag. 87. gives examples, of nine sundry sorts, each differing from other, in Terms of **Blazoning**, and that according to their different colours; as for example.

1. Or.	1. Belants.
2. Argent.	2. Plates.
3. Vert.	3. Pomeis.
4. Azure.	4. Hurtes.
5. Sable.	5. Ogresles or Pellets
6. Gules.	6. Corteauxes.
7. Purple.	7. Golpes.
8. Tenne.	8. Orenses.
9. Sanguine	9. Guzes.

Now this you must note, that it is not requisite in **Blason**, to name the colloars of these nine **Roundlets**, except they be counter changed, as you shall see farther in these following example.

LXIX. He beareth Azure, a **Belant**, or as some call it, a **Callant**; it is taken to be a massive plate, or bullion of Gold, having for the most part no similitude, or representation of any thing thereon, but onely fashioned round and smooth, as if it were prepared to receive some kind of Stamp: Some term them **Bezants**, and **Bizants**, of *Bizanti* in the place where money was Anciently Coined. This is born by the name of *Baynsford*.

G. 3. **Bezants** born by *Babington*, *Dynham* and *Hidon*.

S. 3. Such born by *Porcer*.

B. 3. Such born by *Nausolyn*.

LXX. He beareth Sable, a **Plate**. This is called a Plate because of the resemblance they have to silver Bullion. This is of some called a **Ball**; a **Margarite**, or **Pearl**: Stones others take them to be, as *Boswell* pag. 89. & others.

G. 3. **Plates** born by *Botesham*, *Tarvis*, and *Musard*.

G. 4. **Plates** born by *Trotesham*.

S. 6. **Plates** 2. 2. 2. born by *Bronham*.

LXXI. He beareth Argent, a **Corteauce**. These by ancient Blazoners are called **Wastelles**, which are representations saith *Leigh* pag. 88. of Cakes of Bread; But must be Blazoned by no other name then **Corteauxes**. This is born by the name of *Tortox*.

O. 3. **Corteauxes**, born by *Courtney*.

A. 3. Such born by *Boyzell*, and also *Fitzarmes*.

A. 7. Such 2. 2. 1. born by *Honypot*.

A. 9. Such, 3. 2. 3. 1. born by *Gifford*.

LXXII. He beareth Or, an **Hurte**. This saith *Leigh* pag. 87. Comes from a Stroke or some violent Blow on a mans Body, which becomes Blew, and from thence, it took the name of a **Hurt**. But *Guilliams* saith *fol. 148*. That they are a kind of Fruit, or small round Berry, of colour

colour between, a Black and a Blew: they grow on a many-fold Stalk, about a foot high. And are found most in Forreits and Wood-land Grounds; and are called of some Wind-berries, and Heurts, or Heurtle-berries. This is born by the name of *Hurtle*

A. 3. Hurts or Heurts, born by *B. skerville*.

A. 10. Such born by *Hurling* or *Huckling*.

LXXIII. He beareth Argent, a *Pomeis*. That is as much as to say, a Green Apple, born by *Pomell*; Ermine 3. *Porneyes*, born by *Smith*.

LXXIV. He beareth Gules, on a *Plate*, a *Solpe*. That is saith *Leigh*, pag. 88. and *Gwilliams* fol. 357. as much as to say, a Wound; and it is at your choise, whether you will call them Wounds, or *Solpes*. Born by the name of *Goljman*.

LXXV. He beareth Argent, 3 *Ogresses*. These are also termed *Pellets*, and do resemble bullets for Guns, & are often termed *G.m-stones*, or *Bullets*.

O. the like G. born by *Courtney*.

G. the like A. born by *Babbington*, *Bolkesham* & *Hofreit*.

B. as many O. by the name of *Nassoll*.

A. as many B. born by *Baskerville* of *Old-wilmington*.

LXXVI. He beareth Argent, six *Orenge*s; these are both of the name and colour of an *Orenge*, therefore have they their name from that Fruit. This is born by the name of *Orenge*.

B. as many O. born by *Rumsey*.

V. as many O. born by *Hewick*.

A. the like S. by *Lacy*. S. as many. A. by *Punchardon*.

LXXVII. He beareth Argent, *Semy de Suzes*. They are said to be the ball of the Eye, and are so Blazoned, although it be Sanguine of colour, that is a blood shotten Eye. In ancient Blazoning, I have seen the colours of some of these Rundles named: *glor*. 143. yea and some are of opinion, that one or two sorts of these, differ in there names according to the quantity of their Figures, and not in their colours. Yet of late times amongst our English Blazoners, it is counted a great fault, to name their colours (except they be found counterchanged of the Feild) as in the next examples.

☞ If there be more then six, or ten, of these said roundlets in the Field: then they are not numbred, but are termed *Bezantee*, *Platee*, *Pelletee*, *Torteauxee*, that is (as much as to say) the Field is full of *Bezants* &c. *Upton* termes that of *Bezantee*, *Tallented*. See more of this *lib*. 4. chap. 1. num. 37. 38. and how these kind of numbers were anciently Blazoned.

B. 10. of them (set 4. 3. 2. 1.) O. is born by *Zouch* or *Souche*, and also by the the name of *Bejeles*.

V. as many, O. by *Lifton*.

A. as many S. on a cheif, a *Lion Passant*, by *Bridgman*.

B. 14. *Bezants* 4. 4. 3. 2. 1. born by *Van Bulom*.

LXXVIII. He beareth Party per Pale Vert and Argent, three *Roundlets counterchanged*. *Upton* calls them three *Bals*, and *Gwilliams* fol. 357. three *Roundlets counterchanged*; and by *Boswell* pag. 136 three *Roundlets transmuted*; and three *Roundlets* of the one and of the other. This is born by the name of *Greenhall*.

O and G. per Pale, the like counterchanged by *Abbot*.

O. and S. per Bend, the like in bend counter ch. by *Hoy*.

O. and B. per Pale 3. counterchanged born by *Paine*.

A. and S. per Pale three the like, by *Pickham*.

O and G per Fesse six *Roundlets* counterch. by *Selley*.

Of the *Lofenge* &c.

5. NOW we come to those other things, which have a near resemblance among themselves, yet vary their names, only from their distinction of forms. and these are *Fusils*, *Lofenges* and *Masculs*: the Figures of each of them, the following examples will demonstrate.

LXXIX He beareth Vert, a *Fusill* Or. The *Fusill* is a Figure composed of four strait lines, having its upper and lower parts more acute and sharp, then the other two collaterall or middle parts, which space between the two middle points (if the *Fusill* be rightly made) is alway shorter then any of the four Lines whereof it is composed. But this is to be understood of the modern *Fusill*; now in use; for anciently they were depicted after another shape; as the next will shew.

G a *Fusill* parted per Pale. O and B. by the name of *Fideler*.

Party per Pale A and B two *Fusills* Counterchaiged, by *Lasman*.

B three such and the Field *Semy de crusilets* O was the Coat of *Robert de Stackport* Baron of *Stackport*: One of the eight Barons belonging the Earldome of *Chester*.

LXXX He beareth Argent, a *Fusill* Gules. This is the Ancient *Fusill*, as I have seen in old Church Windows, and as it is set forth by *Chassaneus* part 1. conc. 75.

☞ *Fusills* if they be born Fess wayes, they are with their acute Angles upwards, as these Figures stand: But if they be pale wise, then their acute angles are set over cross the Escuchion: If in bend then the acute Angles lye contrary to their locall Situation.

A the like G born by *Schelman Van Bergen*.

G three such A by the name of *Cogan*: Also by *Fresforham*.

A three such S by *Pickerd*.

LXXXI. He beareth Purpure, a *Lofenge* Argent. The *Lofenge* differeth from the *Fusill*, in that the space between its two Collaterall, or middle Angles, is equal in the length to any of the Four Geometricall lines, whereof it is composed: The breadth I do confesse I have seen, and you may often find to exceed the length of one of the Lines; But never less, for then it is a *Fusill*.

Party per Fess A and S three such G born by *Leberskirch*.

O a *Lofenge* G born by *Gibbing*.

A the like G born by *Van Schwerim* in *Brabant*. Also by *Van Enbiug*.

S three such O born by *Guterath*.

LXXXII He beareth Or, a *Mascul*, Sable. *Leigh* saith pag. 92 35. That the *Mascul*, or *Mascul*, is ever Square (with the corners upright) whether it be voided or whole. But if they be *Masles* or *Masks* of a tier, as *Ferne* pag. 195 holdeth them to represent, then can they not be either Square or Solide, but must be voided; For if they be whole and Solide they would better resemble

qua-

quarrells of Glafs. Therefore the Masculine differreth from the Fusill and Losenge in two respects: First they are long this more square: And again they are ever born whole and intire, this is voided.

I have given you the difference of these; I shall now proceed to give some examples of the several wayes of their bearing in Arms

A three of them S born by *Allen* and also *Hyde*.

A three of them G by *Champaine*, *Gargan* and *Grompes*.

LXXXIII. He beareth Azure, three Fusills in Fesse Argent. By the name of *Cathrall*.

A three the like G born by *Mountegue*.

Ermine three S by *Pigott*. And G 3 Er: by *Denham*.

O four in Fels B a bend over all G born by *Angell*.

S five A born by *Dantree*.

A six in Fesse G born by *Stotenill*.

LXXXIV. He beareth Azure, five Fusills in Cross Vert. This is born by thame of *Ouzelcrest*: If more be born in a Coat, then say three, or five Crosses, each containing five Fusills.

Er: the like G born by *Mainley*.

O the like B born by *Besme*.

A three Fusills pointed or in point, triangular G born by *Prawn*, and also by *Van Braun*, & *Van Crackaw*.

LXXXV. He beareth Azure, four Fusills in Pale, Or. This is the Coat of *Fitz Almaine*; and also by *Besfree*. And thus Losenges, Fusills, and Mascles are born in bend Cheveron, or Salter.

G four such in Pale was born by *By John Fitz Nigel* Barron of *Halton*, and Constable of *Chester*.

LXXXVI. He beareth Argent, a Losenge flory Gules, charged with a Salter, Or. This is born by *Catsby*. The Losenge and Fusills are not only adorned with flowers but other things: and charged upon as these examples.

G the Losenge flory O born by *Cassyll*.

G the like A charged with a bend S born by *Banewile*.

LXXXVII. He beareth Azure, Seven Mascules conjoyned. 3 3 and 1 Or. This is born by the name of *Ferrars*, with a canton Ermine: Mascules are born either asunder or joynd together: As in this example, therefore you must take notice thereof: And likewise number how many are joynd, or set together in one row.

G the like O by name of *Ferrars*.

A the like G by the name of *Braybroke*.

G the like of 9 Fusills A born by *Cressid*.

A 10 Fusills 5 and 5 joynd S by *Faucombride*.

LXXXVIII. He beareth Argent, a Masculine fretted with four of the same, in Salter, Or. This is born by the name of *Die Van Dagellin* a *Germain*.

Of the Gutte or Drop.

3 THE next thing (in order of the Engraven Plate) that receives a diverse manner of Blazon, and that according to the colours they are of, is that which we call *Gutte*, of the Latin word *Gutta*, which signifieth a Drop of any thing that is either liquid by Nature,

or qualified by Art. These Drops, as I said, do receive a different manner of Blazon, according to their different colours, or diversity of the substance whereof they do consist, as for example.

If they be	{ 1. Or. 2. Argent 3. Vert. 4. Azure. 5. Sable. 6. Gules.	{ they are termed.	1. Gutte de Or, else Aure.
			2. Gutte de Eau.
			3. Gutte de Olive.
			4. Gutte de Larmes.
			5. Gutte de Poix.
			6. Gutte de Sang.

Drops, saith *Gwilliams*, fol. 158. ate seldom born of themselves, but rather upon, or with some other kind of charge, either ordinary or extraordinary; or else divided by means of the interposition of some of the lines or partitions.

LXXXIX. He beareth Gules, one Gutte de Or. These Drops are taken to be Drops of fusible or liquid Gold; and are termed *Gutte de Or*, else *Gutte de Aure*, from the Latine term, *Aurum*, Gold.

XC. He beareth Azure, three Guts de Eau. This word *Eau*, is *French*; and signifieth as much as *Aqua* doth in Latine; which is as much as to say he beareth three Drops of Water, whose proper colour is Argent.

A and S per Cheveron, three Guttees counterchanged. By *Crosbie*.

XCI. He beareth Or, three Guts de Olive, in Fesse. These are Drops of the Oil of Olives, which is of a Vert, or green colour.

XCII. He beareth Argent, two Guts de Larmes; these Drops called de Larmes, or Larmettes, are derived from *Lacryma*, Tears, because they represent them, which are always understood to be Blew of colour.

XCIII. He beareth Or, five Guts de Poix, Bendwise in Salter. This word *Poix* in *French*, is the same to Pitch in *English*, yet among our Heraulds these are termed, Guttes de Sable.

A three Guttes de Poix. Born by *Crosbie*.

XCIV. He beareth Argent, Gutte de Sang. These are termed de Sang, *quia ex Guttis Sanguinis constant*; signifying Drops of Blood, which is naturally red.

Some are of opinion, that Guts are never born so as to be numbred, but ever go under the term Guttee; the contrary I dare not avouch, because I have seen Coats that have had but five Guts on a Cross, and as many on a Chief and Cheveron, and eight on a Border; which are as so many things charged upon such Ordinaries; and yet in such Coats I never found any numbering in their Blazon, but only the term Guttee: But in Fields I have often seen them numbred, as in this example following; and in Coats after such like manner of Bearings. This is born by the name of *Lemming*.

S Gutte de Eau; a Canton Er. born by *Dannett*.

A the like de Poix, a Chief Nebula; G by *Raydenhall*.

A a Cross Sable, Gutte de Aure, else Or. By *Milkerfield*.

XCV. He beareth party per pale, Vert & Argent, twelve Guts or Drops counterchanged. The cause as I conceive of the numbering of them, is, because they are

are one directly under another, whereas if they had been set one contrary to the other, as Ermyne are; then they would have been termed Guttee, and not so many Gutts; my Author of this Coat, *Gwilliams*, fol. 370. Blazons it 12 Gutts or Drops in Pale, (rather Palewise in four) else in Pale signifieth no more than to have six in Pale on one side; and six in Pale on the other side the partition; which is a very uncertain way of Blazoning, to give any true knowledge of the manner of their placing in the Field. Born by the name of *Glindall*.

Again, as touching the Blazon of this Coat of Arms, it is in your choice, whether you will give it the Blazon above said, or else say party per Pale Vert, and Argent six Gutts de Eau, and as many de Olive, paleways.

Per pale O and V twelve Drops counterchanged. Born by *Grindore*.

XCVI. He beareth Or, six *Guttes de Larmes* reversed. By the name of *Droymater*. These being of some termed exhalations or moist vapours drawn upwards by the heat of the Sun, are therefore rather to be Blazoned, six Drops exhaled Azure, or six exhaled Drops.

Of the Bordure.

7. THE next and last of the Ordinaries to be discussed is the *Bordure*; the Border is an ancient difference, used for the distinction of Coat Armour, of particular Persons and Families, descended from one and the same House, or Original Stock; each from other amongst themselves; and as they have been differences to Coats, so they have anciently been held for Coats.

And this may be proved by many Authentick testimonies, both from Authors, Records, & Seales: As likewise Coats themselves, which I have seen; Which is a sufficient proof to me, to cause me to set it down amongst the Ordinaries for an Ordinary, though others be of a contrary Judgment. Examples of Borders, and its severall kinds are as followeth.

XCVII. He beareth Vert, a *Bordure*, Argent. born by the name of *Bordrouch*. The *Bordure*, (or *Wrisure*, as the *French Armorsists* call it) containeth in breadth the 5 part of the Escuchion, as saith *Leigh* p. 111.

Also it is to be observed that when the Field and *Bordure* about it, are both of one Mettle Colour or Furr; then you shall not term it a *Bordure*, but shall say he beareth Arg. &c. *Imbordured*. Which kinde of *Imborduring* is reckoned amongst the number of differences of Brethren: But that thing is committed to the discretion of *Heralds*, and *Officers of Armes*.

S a *Bordure* G born by *Tagmaret ap Robert a Brittain*. Er: the like B by *Maddock Voell of Wales*.

G 3 *Bordures* A is born by *Burdon*.

XCVIII. He beareth Or, a *Bordure Ingraied*, Vert. is born by *Sr Rys Hen of North Wales*. This word *Ingraied*, is derived from the Latine word, *Ingradior*: which signifieth to enter, or go in. or of *Gradus*, a Step or degree: And therefore it is called, a *Bordure Ingraied* (as *Vpton* noteth) *Quia eius color gradatim infertur in Campo*

Armorum. S the like O by *Iermorth Drwyndyn* of *Pomys*.

XCIX. He beareth Azure, a *Bordure Inbecked*, Argent. This *Bordure* is contrary to the foregoing, for as that doth with its points inroach into the field, so this by way of *Inversion*, doth contract it selfe, as having the points in it selfe: in regard whereof it receiveth this denomination of *Inbecked*, from the Latine word, *Inveho*; which signifieth to Carry in. The *French* term it a *Bordure Engreslee*, Such an one is born by the *Marquesse of Blainville*.

C. He beareth Argent, a *Bordure Inbecked* *Gobony*, Or & Gules. born by *Furstenberg* of *France*. This is by the *French* blazoned a *Border Muagee*, *Ende-dang*, O & G every *Inveck* being of a contrary colour from other. which of some of our *English* blazoners is termed a *Border Contrary Inbecked*, O & G see cap: 9 numb: 86. G the like A & B born by *Duckhome*.

CI. He beareth Vert, a *Bordure Indented*, Or by the name of *Talliate*. This term *Indent*, is borrowed of the word, *Dentes*, teeth; whereunto the same hath a resemblance, as well in property as in forme. As it is in these *Bordures*, so you shall have them Composed of the severall other Sorts of Lines, as is before shewed in *Cyfers* therefore it is needlesse to retalliate, these being sufficient to Instruēt the Judicious.

G the like A born by *Sr Perduas Dalbreth*.

G the like O born by *Tudor Maur*.

CII. He beareth Argent, a *Bordure parted per Bordure Indented*, Or & Azure. As this is *Indented*, so you shall have the *Bordures* parted according to the severall sorts of Lines. This by some Antient *Heralds* is termed a *Bordure Partie Indented*, *Gwilliams* saith a *Bordure point in point Indented*: But that is a fitter & more proper term for the next example, where the Points extend to the out sides of the Ordinaries. This is also blazoned, a *Bordure Azure*, Charged (or *Surmounted*) with another *Indented*, Or. Such a *Bordure* A Charged with an other *Ingraied* S belongs to the Coat of *Birkenhead* of *Manley* in *Cheeshire*.

CIII. He beareth Or, a *Bordure Point in Pointe Indented*, Argent, and Purple.

A a *Bordure Point in Point* *Nebulee*, O and B over all a *Salter* G born by *Van Schawenburg* in the Province of *Aljatia*.

CIV. He beareth Argent, *Indenteed Bordertwise*, Gules. Such a *Bordure* was born by *Sir Gilbert Talbot*, *Kt. of the Garter*. This is of some termed only *Indenteed*, as if the *Indents* were set no where, but about the sides of the Escuchion: Of the *French* it is called, a *Bordure Cancelee*, and *dentilee* of each point.

CV. He beareth Gules, a *Bordure Quarterly*, Or and Argent. Such a *Bordure* Er. and *Chequie* or counter Company. O and B was born by *Henry Fitz Roy* base Son to *King Henry* the eight This is the First sort of compounded *Bordure*, it is the least of the compositions being only divided into four parts.

CVI. He beareth Argent, a *Bordure Quarterly Quartered*, Azure and Or. This is a double composition

tion

tion to the former, consisting of eight peeces, which is from the center of the Escochion, to be divided per Crofs, and also per Salter.

CVII. He beareth Or, a **Bordure Gobonated** (or **Gobony**) Argent and Gules. Such a Bordure belongs to the Coate of *Adaff Goch a Britain*. This is the last of the composed Bordures, of a single tract, & doth consist of double the division of the last Bordure: viz. 16 peeces, and not to exceed; a few less it may, if the Border be so small, that it will not contain that number. It is termed **Gobonated**, because it is divided, and cut as it were into small peeces, which we call **Gobbits**. *Boswell pag. 35* termes this **Compony**, Argent and Gules.

Er: Such a Bordure A and B belongs to the Coat of *Pickering*.

Such a Bordure A and B belongs to *Beaufort Earl of Somerset*. And is by the French *fol. 8*, termed, a Bordure **Camp**, or **Compon**.

O a Lion ramp: B Crowned G a Bordure Gobony A and G by *Campusen*

CVIII. He beareth Argent, a **Bordure Counter-Compony**, Or & Sable. The terms **Gobony** or **Compony**, as afore shewed hath but one colour at a tyme in the whole breadth of the Bordure, or other Ordinarie; But the **Counter-Compony**, is made of two Tracts or Lines, And ever hath 2 colours in the breadth of the Ordinarie. If this be **Counter-Compony**, the other may fitly be termed **Compony**, being this is Compounded of two colours set foure square contrary one to the other. Of some this it termed **Counter-Gobony**, and **Countre-Camp**, or **Campee** ro only **Compony**

CIX. He beareth Or, a **Bordure Chequie**, or **Checkie**, Argent & Sable. Upon all ordinaries Chequie is composed of three tracts never less, but in Fields born Chequie; they may consist of more according to the discretion of the Artift. Therefore you must be carefull to observe the number of Tracts, or else you may easily commit an error in taking Chequie for Counter-Compony or Counter-Compony for Chequie: See *chap. 4 numb. 42 43 43 44*.

CX. He beareth Gules, a **Bordure** Argent, charged with three **Bendlets** sinister Purpure, there is born upon Bordures, Bends, Bendlets, or Bandy, to any number; therefore ever note in the sume of them to give it, its due term.

After this manner you shall have Borders charged with Barrs, Cheverons, Fretts, Pales, and such like, of which I shall give one or two examples.

Note also that all sorts of Bordures are subject to be charged with things as well Artificiall as Natural; as by following demonstrations, in part shall appear: where in I shall not be curious either in giving many in number, nor therein observe much order.

CXI. He beareth Azure, a **Bordure Cheverony** of eight, Argent and Gules. born by *Style*

CXII. He beareth Argent, a **Border** Or, charged with two **Pales**, and as many **Squires**, and **Barrs**, Azure. This is born by the name of *Latimer*. Upon termes this Bordure **Pally Barry**, contrary Coonyed, Or, and Azure; with a simple Shield of Silver.

CXIII. He beareth Gules, a **Bordure** Argent charged with **Lucyes**, Azure; and according to some (*Se-*

my de Lucyes) or charged with eight **Lucyes**: The Border of any Coate, if charged with any thing quick or dead, it is understood, to have the just number of eight such things charged upon it, and no more, nor less; if with more then to be numbred, else not.

CXIV. He beareth Azure, a **Bordure** Or, **Charged with Lioncels**, or **Lion Passant**, Sable. *Gwilliams fol. 32. Leigh pag. 3.* And several others term this, a Bordure **Enurney** of Lioncels: Which word **Enurney** (say they) is proper to all Bordures charged with any kind of Beast; which Beast must likewise be expressed in Blazon for the more certaintie thereof: Then the term **Enurney** is needless. Such a Bordure G the **Lions** O was born by *Hamlyn Plantagenet*.

The Bordure quarterly G and B the first three **Lions** the second, three **Elowers** de lis. O &c. or more short a Bordure quarterly *England* and *France*, Was born by *Courtney*.

CXV. He beareth Argent, a **Bordure** Purpure, charged with **Trefosses** Or: else **Trefoiled**, or **scmy** de trefoiles, (or a Bordure **Verdoy** of trefoiles) which term **Verdoy**, Saith the foresaid Authors, is appropriated to all Bordures charged with Leaves, Flowers, Frute, and other like Vegetables: And so the like unnecessary, is the term **Verdoy**, which Mr. *Gwilliams* himself in a sort acknowledgeth: When in the using of these termes, he giveth this caution; wherefore to make the Blazon more certain, it behoveth that you should expressly mention what kind of Vegetable the Bordure is charged withal.

CXVI. He beareth Purpure, a **Border** Argent charged with **Martlets** Sable. Such a Bordure B the **Martlets** O was born by *Jaffer Earl of Pembrock* half Brother to King *Henry* the sixt. Or **scmy** de **Martlets**, (or a Bordure **Enaluron** of **Matlets**) when any Bordure is charged with any sort of Foul, or Birds, or things belonging to them, this term **Enaluron** is to be used as a Blazon proper and Ancient for such Birds; which term is also alike superfluous.

CXVII. He beareth Vert, a **Bordure** Argent: **Pelletee**, surmounted of another **Engraled** Gules. This is born by the name of *Birkenhead* or *Birket*. Some term it charged with **Pellets**, and others with **Entoyre** or **Pellets** which term **Entoyre** is proper to all Bordures, charged with dead things, as **Roundlets**, **Cressants**, **Mullets**, **Anulets**, &c. So that you must name what kind of **Entoyre** the Bordure is charged with: then what signifieth the word **Entoyre**; when neither charge or colour is signified by it?

CXVIII. He beareth Gules, a **Bordure** **Ermine**: After some a Bordure **purflew**, **Ermine**: which term **purflew** is common to all the **Furres**, so often as they are used in Bordures. Yet *Boswell* never useth any such terms see his *Armory of Honour* pag. 37. and the more wiser man he was in it; take my reasons for these foresaid expression, to be contrary to the rules of *Herauldry*.

In the blazoning of these five last foregoing Bordure, I have given you the five termes used by the foresaid Authors (and not them only but of four of their Disciples, who have followed their rules) but for my own part, I hold them superfluous, and needless to express any such termes, and that for these reasons.

First

First there is in such Blazon, a multiplication of words, which is before forbidden in the rules of Blazon, brevity being ever held the most excellent way: So then to use words, when the thing is understood without them, is needless, and not good.

Secondly; if in the using of such terms so many kinds of things, as are in the five words, were understood, it were something to be approved, but to use them, and after to name the Birds, Beasts, Flowers, or Furies, &c. Makes it to stand as a cypher, and to no use.

Thirdly; why should such terms be used to them, more on Bordures, then on those Ordinaries, which are much more Honourable bearings, or in Fields. If to one, why not to the rest? Seeing when Bends & Cheverons are charged, they generally have three, and Croffes and Salters have five, the Bordure eight things upon them; if more, then to be numbered.

Fourthly; and again it is very plain that Guts, Beasts, Plates, Ermine, Varrey, and such like bearings; have the same names and termes wheresoever they stand, in the Field, or on the Ordinaries, and yet no such term is then used to them; and why to a Bordure, more especially then to a Feild? [is a paradox.] And so I shall leave

it to more able and judicious Judgments: But they that will follow this way of Blazen, let them amongst the rest, find out a terme for Fish, as well as Birds, Beasts &c. For they are of a contrary nature to the rest.

Now in opposition to their terme I shall give you a Blazon of a charged Bordure which may serve for all things born after the same nature, kind or maner.

CXIX. He beareth Or, a **Bordure** Gules replenished with **Lions paws** **Arazed** in **Salter** Argent. By this you may understand, that these Lions paws in Salter are set in eight places upon the said Bordure, which needs not to be numbred; though, I do confesse by some ignorant Blazoners I have heard, and seen it Blazoned; a Bordure charged upon, with sixteen Lions paws in Salter, others sixteen paws two, and two, Salterwise.

CXX. He beareth Azure, a **Bordure Counter-Flory** Or. Of the difference between Flory and Counter-Flory: I have shewed in the Bend, and Fesse of that kind. *chp. 4 numb. 36 83.* These are also set about the Bordure to the number of eight and no more, or no less.

B a Lion rampant and such a Bordure A born by Lodge.

K

TO

T O

His Honored Friends and Kinsmen

JOHN BRERWOOD Esquire

HARBERT BARRINGTON FRANCIS BROWNE THOMAS SWINTON

Esquires

RICHARD PARKER, RICHARD WRIGHT, THOMAS SIMPSON, BENJAMINE BROWNE

Gentlemen.

Out of a Pious Affection, and Naturall Love to the Inhabitants of the Place of your Nativity (amongst other Friends) you have not onely shewed a great Willingness, But have bine very Zealous in Promoteing the Endeavours of him who is your Fellow Cittizen, & much Oblidged Kinsman :

Randle Holme.

C H A P. VII.

BESIDES these Ordinaries, which make Coats of Armes to consist of two Colours: Yet there are certaine other distinct Beareings which are as Honorable as the Ordinaries, And are Indifferent both to Fields and Charges; Being compounded of two or more Colours, Which in their Blazon carry not the names of the Colours of which they are made, But go under other terms. Whereof there are 9. Sorts (after Leigh pa: 75.) and 8. (by Gwilliams fol: 23.) But I hold but 6. absolute, that have distinct terms, and these are called *Furres*.

Of the Furres.

Furres used in Armes, are taken for the Skins of Beasts, striped from the body and Artificially trimmed for the Furring, Doubling, or Lining of Robes, and Garments, as well, both for State and Magnificence: as also for wholesome and necessary uses. I shall then give you pericular examples of their severall beareings in Coats of Armes.

I. This is a *Furr* of one Colour, which is not used in Coats, but in Mantles onely: And is all white, which in Doublings, is taken for the *Litvits Skin*, or White Martyne. And is not to be termed Argent, but White: As being a Skin of a Beast.

II. He beareth *Ermyne*. This is the Second kinde of *Furr*, which consisteth of a White ground, and black

Spotts. Which you must blazon only by the name of *Ermyne*, and not Argent, Pouldred, or Purfled with Sable. For this is taken for the Skin of a little Beast lesse then a Squirell, that hath his being in the Woods of *Armania*, all White with the Tip of his Taile only Black. Called by the name *Ermyne*. From whence it is, that this term of blazon is Borrowed.

In some Coats these are numbered, but then they Extend not to a number above five: Yet both Leigh pag: 75. & Gwilliams fol: 24. say that they may be numbered to ten, about which they must not exceed. Which seems to me to be too great a number, for we often see that Crosses Salters, Cheverons, Cantons, & whole Quarters: have but five set upon them. And yet such are not numbered, but go under the generall term of *Ermyne*. Also whole Fields having some Ordinaries charged upon them, oft tymes have not ten, sometymes much lesse, yet are never numbered. Neither do I hold it necessary to number them at all, Except they are born as a pericular Charge is, as in these few Blazonings.

A 3 Queen Ermyne, born by *Hermoin*.

Four Queen Ermyne in Cross, by *Hurleston*.

Quarterly A & G in the first a queen Ermyne, 2 Frets
O born by *Warburton* of *Grafton*.

A a Cheveron G betw: 3 such born by *Potter*.

A a Cross berw: 4 such born by *Crotherm*.

A 5 such betw: 2 Barrulets G born by *Malvarlegb*.

In all which respects this is not a *Furre*, but a *Mettall* onely; But in all other Doublings & Lincings it is taken for

Donnae Francisci Bronne Armigeri Lecti in Legibus.

for a rich Furr. In which according to *Gwilliams* rule fol. 24: There is a late described Order for the Distribution of the **Powderings**, according to the Dignitie of the wearer: Which is, that an *Emperour*, *King*, or *Potentate*, may have the Powderings of their Mantles, as thick as they please. a *Duke* may have the Cape of his Mantle only foure Rankes. a *Marquis* three Rankes & an halfe. And an *Earl* three Rowes only. And a *Baron* to have his of white Furr.

These Rowes, or Rankes, before named, are of some Authors call **Cymbers of Ermyne**, for that noe man under the degree of a *Baron*, or *Knight* of the *Garter*, may have his Mande Doubled with **Ermyne**.

III. The third sort of **Furre**, is that which in Blazon is called **Ermynes**: Which consist of a black field and white Powdering upon it. Yet neither in this or the former shall you make any mention in the Blazon of them, of any such mixture, but only use the name Appropriated to either of them, which doth sufficiently expresse the manner of their Composition or commixture.

Eosnell and *Gwilliams* fol. 25 are of opinion, that **Ermyne**, and **Ermynes**, ought never to be set in Armes, with the Mettle of their colours, but in colours only: Because they are but **furres** and have no proper Blazon with any Mettle. Yet antiquity and Custome (which are the vigour of the Law, where there is no written Law) are powerfull in things of this nature, to cast aside his fancy: For as much as it is manifest, that not only Modern, but Ancient Coates are of such bearings, without any contradiction. Which he himself, in the Blazon of *Walcotes* Coate pag. 106 36 39. might have taken exceptions against, if he could have produced any good ground to have warranted this his opinion; but he passeth it over with silence as having no authority to produce.

IV. The fourth sort of **Furre**, is **Compounded** of a Yellow Feild or Ground, Powdered with Black, and is termed **Ermynois**. This Furre is not held so rich as the afore said. The use whereof *Bera* pag 14 maketh mention in his Book (*Le Blazon des Armoires*) also *Edell Hirsessen* in his Book, *Le Jardyn à Armoires* &c.

V. He beareth **Peane**. This is the first sort of **Furre**, which is contrary to the foregoing, it being a Black feild, powdered with Yellow.

VI. He beareth **Ermynites**. This is another sort of **Furre**, which at the first sight may seem to be all one with the second Furre; but it differeth in this, that herein is added one baire of red, on each side of every one of these Powderings. And as this differeth but little from the second in Form, so but little in term, that being called **Ermyne**, this **Ermynites**; this is the only (& all the **Furres**) that is composed of more then two colours without naming thereof; all **Furres** else that have more then two colours have the colours named.

VII. He beareth **Clair** (or **Varrey**) This is the seventh sort of **Furre**, and doth consist of Argent and Azure. If this kind of Furre be compounded of any other kind of colour save White and Blew: You are to say, he beareth **Varrey** of Or and Vert; (or Argent and Sable) or else of such and such colours: But the term **Vaire** and **Varrey**, will suffice (for Argent and Azure) saying no more.

 In all Coates of this nature, and bearing the Me-

tle is to have the preheminy and chief place; as being the most worthy. But *Leigh* makes to distinctions of the word **Vaire**, (as **Verrey** and **Varry**) giving to each term, two particular colours which they comprehend under the said termes, as

By **Verrey** is understood, Or and Vert. O and B saith *Morgan* lib. 2 fol. 73 by **vaire** is understood three or four colours, which must be told.

By **Verrey** is understood Argent and Azure. Which rules I must confess, I follow not; but agree to *Ferne* pag. 86, who in his Book of *Lacies* Nobility, writteth that there is no other Blazon, or termes allowed to a **Furre**, or doubling of this kind, then only **Vaire** or **Variated**: For which word (**Variated**) our English Blazoners use **Verrey** or **Verry** or **Vaire**, holding the foresaid distinctions, or termes Phantasies of *Leighs* own making, without any authority.

I shall therefore make no distinction of the words in this work, but some tymes use one, and then another, ever naming the colours, except they be Argent and Azure: At which either **Vaire**, **Variated**, **Verree** or **Verrey** and **Verry**; shall be sufficient, as I said before. This is born by the name of *Beauchampe*

Verrey A and S born by *De la ward* of *Place ward*, and *Hasbell*.

The same A and G by *Grayley* of *Essex*.

The like O and S is born by *Oldfeild*. also by *St. morton*

The like O and V by *Pezerell*.

G and Er. by the name of *Eresley*.

2. **HAVING** given examples of **Furres**, I proceed to a kind of bearings much after their nature, & often used in Armes, both in the Feildes, & upon the ordinaries; which have no relations to any of the ordinaries, but are of an Independent being, as these examples following.

Of Tinctures of Feilds

BY Tinctures, I mean the colour or colours of Feilds, of which there is a tincture that is to say metall, Colour, or, Furre predominating Others not predominating, as having two Mettals or Colours of equal being.

VIII. He beareth **Potent Counter Potent** Argent and Vert. This is a *Spanish* Coate, and is born by *Don Haro Maca*. This term *Gwilliams* fol. 27 gives it from its resemblance to Crowches head which *Chawer* call a **potens**; is reckoned by him to be a **Furre**, though *Leigh* and others make no mention of it amongst the **Furres** neither can I take it to be a **Furre**, by reason there is no certain colours assigned to it, as to other **Furres**, which if it were a **Furre**, it ought to have

This is of some old Heraulds called **Varry Cuppy** or **Cuppa**, and **Verrey Cassia**, which is as much (saith *Leigh* pag 111) as to say a **Furre** of **Cups** or of **Gobbets**, and to ranke **Cups**, and **Gobbets** with **Furres**, as a **Furre**; is something proposterous: This is also termed **Meirre** (or **Barr Meirre**) Argent and Vert. So it is well Blazoned, and very Ancient.

XL He

IX. He beareth Or, **Papellonne** Gules. This a French devise and so you have th French Blazon for it by *Ferne* in his *Glo: pag. 160* the term **Pampellettee** or **pepillottee**, in our English significth; Spangle beset with Spangles: But in my Judgment it may fitly be termed according to the English Language; Or, **mailed** (or **Escallopce**) Gules. Being it resembles, both the Iron rings quilted in Coates of Maile, and the lower part of Escallop Shells set one contrary to another like Fish scales. Some Artists term this in their profession, Scallop work, which if this were in use for English Coates would be a good term for it. See chap. 3 numb. 113 and chap. 9 numb. 86. This is born by the name of *Grimball*.

Per Fesse O & Mailed G a Lion passant S by *Van Schwenke*.

A bend Escallopce G. born by *Tetenbach*, and by *Tattenbeck* with the bend sinister.

Party per Fesse G and Papellonne A born by *Newbrig* or *Newburg*.

X. He beareth Argent, **Masoned** Sable. This is so termed from the joynts of Stone worke made by Masons: Every joynt being made contrary to the other. This is also Blasoned **yled** (or **lised**) or joynted) which are terms such Workmen use, and are fit for such kind of Coats as this is. This is born by the name of *Mason*.

A Masoned S. a chief Battled B by *Van Kalmantz*.
Party per Fesse Crenelle A and G Masoned. Three spur Rowels G. born by *Hiffer*.

XI. He beareth Argent, **Masoned into seven divisions** Sable, a **Lion between six Bartlets**, Gules. This is born by *Lewis de Marilla* Earl of *Eau: ont*. Some term it, the Feild containeth seven parts 2 3 2. in the Fesse part a Lion Passant, the rest each charged with a Martlet; some say parted in three, masoned into seven &c.

XII. He beareth Argent **Porculiced** Sable, or after some **Latticed** Sable I confesse I have diverse Blasonings giving to this Coate, as **Batunes fretted**, other a **Cross parted** over all the Feild, others a **Lettice**, from its resemblance to **Lattice Windows**. *Ferne* pag. 188 terms it a **Troillis**, as being the Grate, or Barrs of a Prison where Malefactors are kept. But his example is **frettee** in which the Cutter was mistaken in not doing his part as he there acknowledgeth, when as it was intended, to be straight down, and directly over Cross and not otherwise. This is borne by the name of *Gaoler*.

G a Chevron A. Porculiced S belongs to the Coat of *Moulton*, or *Moulson*; being between three Mullets.

XIII. He beareth **Chequie**, Argent & Sable. by the name of *Thorppe*. Of the Composition of **Checkie**, I have in the handling of the **Bordures** of that nature, shewed how it is to be born on all kindes of Ordinaries: But being here a **Cincture** in the Feild, it is Composed of as many Cross Lines as the Workman pleaseth, always provided, it be done with discreffion, viz: not too many, nor on the other side, too few Squares.

And as these foregoing examples, and some others following in this Chapter, are Coats Armour of themselves; Yet you shall often finde them both Charged upon, with Ordinaries, and other things, Quick & Dead: As also the Ordinaries charged with these kinde of **Cinctures**. In the blazoning of which Coats, you must give to each of them their due and proper Terms.

O & B chequie born by *Warren*. & by *Benson*.
G & O born by *Gryland*. also by *Ross*. & *Molton*. & *Fitz John*.
O & V by *H. ckford*.

XIII. He beareth **Billitee Counter** = **Billitee**, Gules & Argent: by the name of *Billinger*. This term is when the Feild is onely divided into Three equall Parts Fessewayes, And the division per Pale, being as many as is convenient: making them always more longer then broad. This is also blazoned, **Pally A & G a Fesse counter-changed**.

XV. He beareth **Barry** of foure, Vert & Argent: a **Pale Battelled Imbattelled**, Counter-changed. by the name of *Mallins*. Or else term it, a **Pale Grady** (of two) in the middle & ends, Counter-changed. see chap: 3 numb: 84.

XVI. He beareth Argent, a **Fesse Gricee**, by the name of *Grangrice* & also by *Newbofer*. Some term this a **Fesse Double Escartelee**. But then (as I conceive) it should have bine like the Pale afore said, set Fessewayes: which it is not. others say it is, **Grady** of three, in Fesse to the Sinister side.

XVII. He beareth Argent, **Diapered**, Sable. born by the name of *Leachtenberg*. That thing is said to be Diapered that is Fretted all over, and hath some thing, either Quick, or Dead, or both, between the Fretts. *Williams* f. 1: 32 33 34. In the blazoning of this Coat saith, **Diapered Entoyre Enurny Evaluron & Uerday**. Signifying thereby, That the same is Diapered with Birds, Beasts, Flowers, or Plants, & other dead things, As Mullets, Cresiants, Stars &c. So that you see **Diapering** is a kinde of Phantastickall worke, as being Composed of some thing of all Creatures.

Now as in this Coat you have the Diapering with many, or every thing: So you shall have them of one or two perticular things, in such cases you may use this way of Blazoning, **Diapered** with such or such a Bird & Flower, or such a Beast & Plant: For Diapering usually runneth the Feild all over with Flowers, & Branches, & other Antickes creatures.

XVIII. He beareth Gules, **Diapered**, with a **flower de Lis**, between **Eagles & Lions Rampant**. This kinde of bearing (saith *Ferne* pag: 189) is much used in *France*, & *Belgia*. But very reare, or never in *England*.

Diaper, or **Damafke**, for the most part is but of one Colour, as you may perceive in this Coat, being the colour of the Feild is either **Damasked** all over, with the same colour made Lighter, or darker. Thereby to make it appear to be **Diapered**: as the Feild is born **Damasked**, so the Ordinaries are also, which are thus Blazoned.

Gules **Damasked**, a **Cheveron** Or. Born by *Damajun* Azure, a **Cross Diapered** Argent. by *Macheroll*.

A and B per Fesse Diapered, by the name of *Ulm*.

A Diapered, a bend G. Born by *Str. sch. b.*

A Diapered, a Bordure G by *Schweinb.*

*Tinctures of Feilds by several
Shapes and Forms.*

3. **T**HERE are several other partitions of Feilds, by which the Coat of Arms is Blazoned, but in a more obscure way: I mean, the division of the Feild having no denomination from any of the ordinaries, nor any of their derivatives; but by proper terms of their own: And others again have a name from the Ordinaries, whole form they do represent. And lastly there are others which have their abstractions from Ordinaries, yet lose their nature and names: examples of each in their places.

XIX. He beareth Quarterly per Fesse Escartelee Argent and Purpure: Some term it quarterly with one Partement per Fesse: The French, *Escarterie* Argent and Gules with a Cap in the middle, one in the other. And is Born by the name of *Van Clux* of Germany. The same G. and A. is born by *Trachten*.

XX. He beareth Party per Pale Inclave, Argent and Vert; or per Pale paleways Argent, and Vert. And after others per Pale Inclave sinister, thereby shewing the side into which the Inclave was. Again I find it thus Blazoned: Argent, two Cantons Sinister Vert. because two Cantons on that side, must be placed in the chief & base Corners, this is born by the name of *Clavelland*. G the Inclave to the dextre A born by *Samjwald*; and *Dannelsen*.

A the like G born by *Arman*.

G the Inclave to the Sinister A by the name of *Buttrich* and *Pelkfa*.

A the like B the Town of *Vliegen* Coat in Germany.

XXI. He beareth Party per Pale, double beviled, Argent and Azure. Rather treble Beviled, being drawn Bevile at both ends and middle. See chap. 3. n. m. 82 and this chap. n. m. 62. This born by the name of *Sirivell*. The like A and G born by *Van Ortel*.

XXII. He beareth Vert, two Squires contrary Squared in Fesse, and conjoynd to the sides of the Escorpion. Or *Fern* p. 198 terms these, two Escorions, or *Petenees*, contrary placed, and conjoynd to the Dexter side and chief; and the Sinister side, and base; meeting in Fesse. By the name of *Squirv*.

A the like G Born by *Van Tale*, in *Brunswick*.

XXIII. He beareth Party per Cheveron Gady, Argent and Gules, masoned of the first. Some term this a party per Fesse, double Escartelee. Others per Fesse with one Battlement, Imbattled. Born by the name of *Charvall*. See chap. 9. numb. 78.

The like B and A Masoned S Born by *Rie'en*.

The like A and V Born by *Van Swarthen-stein*.

Party per Fesse Imbattled G and A Masoned S by *Schneis*.

XXIV. He beareth Party per Fesse indented into 3 points Trefoiled, Or and V After the same manner you will find Coates born, with one Leaf, and several other things, which are thus to be termed, as this example mani-

fest, See numb. 26 & 64 see chap. 9 numb. 90 This is born by the name of *Van Trachwith*.

Per bend Waveyed and Counter Trefoiled O and B born by *Rump*.

Per Fesse indented with three Trefoils fixed to the points Counterchanged A and B Born by *Hillinger*.

XXV. He beareth Gules, per Fesse pointed, with a Ball conjoynd thereunto, Argent. I have seen this termed, per Fesse Archee reversed, in the middle a *Do mell* (Ball or Globe) Gules and Argent. Also a point *Champaine*, in Fesse pomelled. Born by the name of *Blankenstein*. See chap. 9 numb. 59.

The like partition with a Cross patee. G and A in base a Rose, is born by *Peyling*.

Parted, per point pointed, with an *Ort* reversed there on A and G by the name of *Hermansdorf*, and by *Hermisdorf*.

XXVI. He beareth parted per Fesse waved, with 3 Foils (or Leaves) contrary poised Argent & Vert. as many leaves as there is, one is ever set opposite to the other in all these kind of partitions. Others Blazon it per Fesse nebucce or three. numb. 28 and chap. 9 numb. 117. by the name of *Crumpach*.

The like A and G. is born by *Winter'erg*. And also *Hermansdorf*.

XXVII. He beareth party per bend sinister in Alabe (a term from *Ala*, viz. in form of a wing) Or and Purple. The French per 3 fol. 19 term it per bend Cut, Sliced, or noched into Bonds, except the top. Also it is Blazoned, per bend Bande. And is born by the name of *Bregon*.

The like O and B by the name of *Warnier*.

XXVIII. He beareth Party per bend in form of two Round pointed Leaves, Or and Azure: or else with two Foiles contrary coynd, (or set one against the other) others per bend with two Foiles counterpoised. See chap. 9 numb. 117. Born by the name of *Pointallham*. And G and A born by *Ortlieb*.

XXIX. He beareth party per bend Sinister, in form of two Lions mouths, holding one the other, Argent, and Gules. By the name of *Shagley* or *Schangley*. The like G and A is born by *Helbner*.

XXX. He beareth Vert, a Demy Cressant reversed and conjoynd to the Dexter base, Argent. I have seen a Coat that the round in the middle or hallow of the Cressant is of a contrary colour of the Feild, and they Blazon it Triparted in form of a demy Cressant fixed in sinister base: Vert, Argent and Gules. The first born by *Van Randek*.

The latter by *Elverfeld*: And B the like O by *Linddeck zur Ligana*.

XXXI. He beareth Or, a Pile of three points reflected to the Sinister side, and fixed in Base. Gules. Or likewise thus, a Pile of three points reversed, and bowed to the Sinister side. This is born by the name of *Filleheim*.

G the same A is born by *Schinkey*.

XXXII. He beareth Argent, a Pile inbowed on one side, and ingrailed on the other, imbowed, Azure. This is of some termed, a Serpents tasse, Enraped, issuing

ing out of **Chief**. By the name of *Eberbach*.

O the like issuing from the **Sinister** chief and side **G** is born by *Van Rardorf*.

XXXIII. He beareth, **Party per pale**, Vert and Argent, two **Piles triple pointed**, **Bowed** and **Counterpoised**, pale wise, **Counterchanged**. Some terms the, Feild **per pale** &c. With two triple **Piles**, **reversed**, one to the **Sinister**, the other to the **Dexter**, **Counterchanged**. others term them two triple **Piles Counter-bowed** and **fired** to the **Line of division paleways**; the higher **pointing** to the **Sinister**, the other to the **Dexter sides** to the **Escuchion**. Other will have it to be **double**, or **Counter-escarteled**, each having three **Indents** (or **dents** or **dentells**) the upper into the **Sinister** &c. Others again will Blazon them two **Gonfanons** (or **penons**) of three **points contrary posed**, as these are **palewise**, so they are **Bendwise**, and born *Fessewife*.

A two such counterpoised, the higher to the **Sinister G**. in the first and last quarter of the **Escuchion** a **Spurr rowell** of the **Second**. By the name *Scusefell*.

Tinctures of Feilds by Abatements.

4 **W**E come now to the Tinctures or Partitions of Feilds, which are caused through Abatements. Now an Abatement is, an accidental mark added, or annexed to a Coate, by reason of some dishonourable, or ungentle Act; whereby the dignity of the Coate is abased, and are generally termed Abatements of honour.

XXXIV. He beareth Argent, a **Point Dexter Azure**, of some called a **point Dexter parted**.

XXXV. He beareth Azure, a **Point sinister Or**. These **points** are usually set in any of the four **points**, (or corners of the **Escuchion**, from whence they have their denomination of a **point**, from the place which they occupy.

XXXVI. He beareth Gules, two **points Sinister and dexter base Indented** Argent. By the name of *Crooked*.

XXXVII. He beareth Or, **diapered a pointed Azure**; if it be in the **base point**, it needs no other addition. Yet I have seen this termed, a **base point**, or a **point in base parted**, a **plain point**, and a **point in base**: *Leigh pag. 79 80* calls it **party per bass Barre**. And *Ferne pag. 183 177* termes it a **basse**. This **point** is composed, of all the **crooked Lines**, as the Ordinaries are: and so are these other Abatements following.

XXXVIII. He beareth Argent, a **point pointed Vert**. *Leigh* termes this a **base point pointed**, though others call it a **point in point**. This is removed to any side of the **Escuchion**, & then it is termed a **point in Point dexter**, or **Sinister**, according as it is. See *chap. 3 numb. 103* and *chap. 9 numb. 64*. This is born by the name of *Fremenclogh*.

O a **point in point**, extending to the chief. B born by *Waldemarib*.

XXXIX. He beareth Argent, a **Point Pointed reversed** Gules. It is here termed **reversed**, because its proper place is ever in **base**, Born by the name of *Van Curneg* or *Kurneck*.

XL. He beareth **Party per Pale in Point**, Argent, Or, and Gules. Others term it, **per pale** Argent and Or, a **point pointed Azure**; and so *Leigh pag. 35* hath it. Others term it **party per Pale with Gyron in base**. This is born by the name of *Triseild*.

XLI. He beareth, **party per Paule** Argent, Gules and Or. This is thus Blazoned, as from the form of the **Paule**, of which you may see more in the Section of **Pales**. *chap. 3 numb. 60*. But I think it may more properly be termed **party per pale**, Gules and Or. a **point pointed**, **reversed**, Argent, or a **Point in chief reversed**. Born by the name of *Goltaxi*.

XLII. He beareth, **Party per Pale and point**, Argent Or and Azure. By the name of *Fierer*.

G A and S the like is born by *Pannwith*.

A G and B the like is Born by *Van Westerfeten*. See *chap. 9 numb. 75*.

Per pale and Fesse B A and O born by *Hinmill*.

XLIII. He beareth Aznre, a **Goar dexter** Argent. These are removed, to either side, so that you must name that side which it is on.

XLIV. He beareth Or, a **Goare Sinister** Purpure. This is like the **Point pointed**, set in the **Base sinister corner**. But this is the place of the **Goare**, it never altereth to any place, but the sides: And is drawn from either **dexter or sinister chief**, to the middle of the **Base**, and **Pointed**. yet I have seen its form, sometimes set **Fesse wise**, as *numb. 25* and *chap. 9 numb. 65*.

XLV. He beareth Argent, a **Gusset sinister**, Vert. If there be but one in the Coate, then you shall name the side it stands on, whether **Dexter or Sinister**.

XLVI. He beareth Azure, two **Gussets** Argent. These are born also according to the tract of **Lines**. This is born by the name of *Treslan*.

S two such A born by *Coningham*. Some term this a chief Couped beville, and a pale conjoynd.

XLVII. He beareth Gules, a **side sinister** Or. The *French* term this, either a **dexter**, or a **sinister**, according to the side it is on. They are uot to exceed the sixt part of the Feild.

XLVIII. He beareth Argent, a **dexter and sinister side** Purpure. These are born both **dexter and sinister**, and by pairs, as in this **Escuchion**: and formed according to the several tracts of **Lines** formerly delivered. They are termed also **two sides**, and of some **two sides dexter and sinister**. They are born by the name of *Sidleing*. Other charges are often born between them.

XLIX. He beareth Or, a **point Champion**, Gules. Of some termed, a **Point Champaine**, which termes are proper to all the **points** aforesaid, if they be **arched** thus. The **point Chapourn** or **Champaine** is also **reversed**, and set in any of the four **Points** of the **Escuchion**, where they are termed **Shapournet** or **Champaine**, only; as in the next examples and *chap. 3 numb. 48 114*.

L. He

L. He beareth Argent, two points dexter and sinister convered, or Shapourned, Gules; some term them in dexter and sinister chief; but they ever are placed in the corner points, if otherwise they loose their names,

LI. He beareth Argent, two points Shapourned, or convered, Azure. Here I say not (in Base) by reason, it is the proper place for them, as before is shewed num. 37 and 49

LII. He beareth Gules, two points dexter, and sinister ingraled, Argent. And a point pointed enbecked, Or. This may also be Blazoned, a point pointed enbecked, between two Dexter, and Sinister, ended. This is good, but if the Feild be charged, then I hold the first Blazon to be the better. As for example, if the Feild had a Cheveron charged, then I would say: Gules on a Cheveron, Argent. Three Bartlettts of the first between two points dexter, and sinister engraled, and a point pointed enbecked Or. This is born by the name of *Parpoint*.

LIII. He beareth three Points, Or; Azure, and Argent. This is an old Blazon for a Coate thus divided into three, four or five, parts: But then each must be of a severall, and distinct, contrary colour, else this may be better termed, party per fesse Or, and Argent; a fesse Azure. This is Born by the name of *Van Skriggle*. The like A G and B is Born by *Van Fellits*.

Three points parted per pale, counterchanged, Born by *Garen of Gradelmai* a Welsh family.

S G and A in the points is Born by *Reutingen*,

The lik G A and B is Born by *Enmershoffen*.

Tinctures of Feilds from Ordinaries.

5. THERE are such partitions of Feilds, which have no Tincture thereof predominate in them, by way of dividing the Feild into even parts, so that one colour hath nor a greater share then an other, or surmount, one an other, & this is occasioned through counterchanging & Transmutation. as in example.

Per Pile.

LIV. He beareth, party per Pile in Base, Azure, and Or. This you may see comes down to the fesse part, (or there about) of the Escuchion, before it parts the Feild, which is the cause it is termed a parting in Base, the Chief being void, having no part therein contained. This is of some Blazoned two Points in Base parted, or Per Cheveron reversed. This is born by the name of *Bastwell*.

LV. He beareth Party Per Pyle Traverse, Argent and Vert. This Partition if it did not begin at the Dexter Chief Point, and dexter Base, & so run a long

to the fesse Point on the sinister side, I should not take it to be a division of the Feild, but a Pile traversed, or a Pile in fesse. Born by the name of *Graf*.

G the like A Born by *Domantz*: and charged with a Rose, is the Coate of *Volcker*.

LVI. He beareth party per Pyle transposed, (or reversed) Or, and Azure. *Ferne pag. 199* Blazons it, a point Azure, and two points Or: Others term it party per Pile, point in Chief, Born by the name of *Service*.

A the like O Born by *Van Raitenbuch*.

LVII. He Argent, a Pile reversed Gorcee, Purpure. The French term it, *Chappe arondy in point*: a Pile reversed rounded in Base. it is also Blazoned a Pile Shapourned, (or Champained) reversed by the name of *Garvin*.

G the like A Born by *Van Tannberg*.

LVIII. He beareth party per Bend in point to the Sinister, or per Bend reversed) Azure and Or. Others per Bend Escarteele pointed, or per Bend with one Incident pointing to the Sinister side. by the name of *Bostickland*.

The like A and G Born by *Van Hernburg*, also by *Kunigell*.

The like A and B by *Van Hernburg*.

LIX. He beareth party per Pale Or and Purpure, a Pile reversed Counter-changed. *Morgan lib. 2 fol. 52* Blazons this *Chappe* Or and Gules, Counter-changed, which is after the French part 1 fol. 10. who term a Pile *Chappe*. But this is best Blazoned per Pale and Pile, Or and Purpure. This is Born by the name of *Paline*.

The like S and A is born by *Van Weydegh*.

The like B and A by the name of *Raumbomb*.

LX. He beareth Argent, a point pointed, and two points dexter, and sinister, removed, Gules. Some term them Couped, or removed from, or out of the Chief. Others Gules, a Cheveron and Chief conjoyned, Argent. By the name of *Van Windischgratz*.

Per Pale.

LXI. He beareth party per Pale, Gules and Argent. This partition deriveth, his name from the pale which is an ordinary that stricketh through the middle of the Escuchion, from top to bottom, and this parting being so named, as party per pale, yet is not a Pale: and as this goeth with a right straight line; so you shall have them parted, with the severall sorts of Bouched, Crooked and accurate lines, as formerly shewed. *Upton* termes these partitions *Plaine Parted* Gules and Argent: or *Parted Per long*, else *Parted in length*.

S and O per Pale Born by *Fairly*. and also by *Fardle*. The some G and O By the name of *Pecher*.

A and G per Pale Born by *Troppen*.

O and G per Pale Born by *Lissnick*.

S and A by *Lynchboffer* of *Bavaria*.

B and A per Pale Born by the name of *Michellbeck*.

LXII He

LXII. He beareth party per Pale double Beviled, Azure and Or. *Gwilliams*, fol. 73. terms it only *Bevile*, then it ought to have been in the middle, and not at both ends, *chap. 3. numb. 82.* This is born by the name of *Aliban*.

LXIII. He beareth Paly of six, Vert and Argent: or after some party per Pale of six pieces. This is another partition per Pale that hath no colour predominate, that is beginning with one, and ending with another Colour or Mettle. Now as this is divided into six, so you shall have them both less and more, as Pally of 4, 6, 8, 10, 12, &c. and as they are here composed of six right Lines, so you shall find them made of the several sorts of Lines before said; so that you must be careful to express both the number of Partitions, and the form of the Line that they are framed with. This is born by the name of *Langley*.

A and G Paly of 6. By the name of *Fitznewell*, and *Barecroft*.

O and G Paly of 8. By *Thyr of Tule*. Also the King of *Araggon*.

A and G Paly of 8. Born by *Griffith Malior*, with a Lion rampant over all. S.

A and B Paly of 6. Born by *Strelley*.

G and Er: Paly of 6. Born by *Germany*.

LXIV. He beareth Pally of six, Vert and Or, parted per Fesse, counterchanged. Others thus, Pally of six, parted per Fesse, Vert and Or. And Pally per Fesse, counter-paly of six. This is born by the name of *Fitzing*, a *German*.

The French Blazon it Pally counter-pally, And is born by *Fergus*, one of the Knights of the round Table.

LXV. He beareth Pally of six, parted per Chief, Argent and Vert, counterchanged. The Chief being charged is thus Blazoned; Party per Pale of six, on a Chief of the Field, as many roundlets counterchanged. By the name of *Conworth*.

The like A and G six Crescents counterchanged. Born by *Sileto of Venice*.

LXVI. He beareth Pally of six, parted per Saltire, counterchanged, Argent and Sable. This is born by the name of *Van-Hanson*.

LXVII. He beareth Parted per pale of six, Bevile, Or and Azure. Others Paly of six Angled, or Rect-angled, and because the Rect Angles run Bendwise Sinister, for either the one or the other way, they must go in Pally; it is therefore by some Blazoned rect-angled in Bend Sinister, or rect-angled Sinisterwise. Born by *Lozenstein*.

A and B the like. Born by *Posingworth*.

Per Fesse and Barry.

LXVIII. He beareth parted per Fesse, Argent and Azure. Some will name the Colours first, thus, Argent and Azure party per Fesse.

You are to take notice that in the Blazoning of these or the like, to name that Colour first that oc-

cupieth the Chief part of the Escuchion; and if the Chief be parted as the partition per Pale, then you must name that first, as in the Dexter Chief Point. Born by the name of *Devon*.

The like O and B. Born by *Susto* or *Zuston* of *Venice*.

Per Fesse Indented B and A. Born by *Wormwood*.

G and Er. per Fesse, a File of five points A. Born by *Betfield*.

A and B per Fesse. Born by *Collingbach*.

O and S per Fesse. By the name of *Marsspecken*.

LXIX. He beareth Barry of six, Or and Vert. This partition consisting of more than two divisions, hath its denomination from the Barr, being called *Barry*, (and not as in the other partitions parted per Barr, by reason Barrs are of a double number, and all the other Ordinaries single, *Boswell*, pag. 32. as from *Upton*, saith, That Coats Barryed, are most commonly born to the number of six or eight, but not above, for then (saith he) they are termed *Barrulettee*. But *Gwilliams*, f. l. 373. holds no such rules for divisions or partitions of Fields; for in his Blazoning a Coat of twelve pieces, he terms it *Barry*, and not *Barruletty*. Barry ever consists of an even number.

O and B barry of six. By the name of *Constable*.

Of six Dauncett G and A by the name of *Todenham*.

Of six Nebulae A and S and also O and S Born by the name of *Blunt*.

Barry of six counter Battelled A and G. Born by *Barre*.

Of 10 A and S. By the name of *Burall*.

Of 12 A and G. By *Mannaring* of *Peter*. *Gwilliams*, 373.

LXX. He beareth party per Fesse wahey, Argent, and Barry of four, under, Azure and Or. By the name of *Barle*. This parting per Fesse *Upton* terms *partie Traverse*.

LXXI. He beareth party per Fesse, and a Pale Ermyne and Vert. This may be termed also per Fesse Incube in Base. See numb. 20. Born by the name of *Lomen*.

LXXII. He beareth party per Fesse Angled, Gules and Vert. else party per Fesse rectangl. d. By the name of *Angell*. The same G and A is born by *Fensterloe*.

A and B per Fesse dexter rectangled. Born by *Van Leubrechtling*.

The like A and G born by *Van Fronberg*.

The like S and A by *Van Langeneck*.

A and G the higher Angle on the Dexter part, is the Coat of *Van Lindt*, whence some have taken occasion from the uppermost Angle, to term this partition per Fesse Angled from the Sinister, &c.

LXXIII. He beareth party per Fesse, Bevile, Or and Azure. By the name of *Turber*. This also is observed by most, to mention what side the higher acute Angle doth proceed from, as thus, per Fesse Dexter Beviled, then the Line proceeding from the Dexter side is the highest: When it is per Fesse Sinister Beviled, then the Line on the Sinister side is the higher.

L

LXXIV. He

*

LXXIV. He beareth party per Fesse Indented into three points, at each a Cross Pattee counterchanged. This is by *Ferne* page 299. termed, *Emanchee* of Purple and Or. Others term it per Fesse Indented of three; or having 3 Dents or Denticles, *chap. 8. numb. 5.* This is born by the name of *Elbell*. Some Blazon it Indented of three points, one to Chief, and two to Base, else the two points might be drawn uppermost, and the single point below.

The like with Roses on the points B and A is born by *Van Rheing*, and *Rehling*.

The like with Flower de lis tops G and A is born by *Reichell*.

LXXV. He beareth party per Fesse, the chief part quarterly Indented in the same, Or, Ermyne and Argent, in Base two Squires Sable; but it is best Blazoned quarterly Indented per Fesse (or Fesse ways) Or and Ermyne; and parted per Fesse, Argent. The naming of the Fesse twice (being in Coats of this and the like nature) is no bad Blazoning. This is born by the name of *Bary*. The Squires are no other than Cantons voided.

LXXVI. He beareth Barry of four, Or and Azure, a Pale counterchanged. Some term it Barry of four, and party per Pale (counterchanged, Or and Azure; either of which will pass for good Blazoning; and is born by the name of *Van Te senberg*.

LXXVII. He beareth Barry of six, Gules and Argent, party per Pale, and per Chevron counterchanged. Others, as I said before, will name the colours last, as Barry of six parted per Pale and Chevron counterchanged, Gules and Argent. By the name of *Hibley*.

LXXVIII. He beareth triparted Barwise, each Indented per Fesse, Argent and Vert. Some term it point in point Indented, but that I have shewed to the contrary in the Chief of this nature, *chap. 3. numb. 47.* Some Blazon this two Bars Indented in the lower side, with a Chief of the same. By the name of *Dentall*.

Barry of 4 A and B each Imbattled per Fesse, counterchanged. By the name of *Marshall Van Overa dorf*.

LXXIX. He beareth Barry of six Quee (or goar-ed, or triple Arched) Or and Purple. The French term it *Tranche nuage*, or *Quee*; and *Bretelle* of six pieces, and Barry Arondies. By the name of *Tranwsher*.

LXXX. He beareth Vert, in Fesse, four Piles couped, transposed (or reversed) in Base two Piles of the same, Argent. Some Blazon it four Piles in Chief transposed, and two issuing out of Base. This is the Coat of *Figolwinler*, of the Kingdom of *Polonia*.

Party per Fesse A and G 3 Piles couped and transposed in Fesse B born by *Bredell*.

A 3 Piles reversed, on each point a Bird standing B. By the name of *Waldner van Frundstein*.

*

Per Bend.

LXXXI. He beareth party per Bend, Argent and Vert: And sometimes you shall find this kind of partition set on the left side of the Escuchion, which is then Blazoned, parted per Bend Sinister; and likewise composed of the several sorts of Lines, as is before shewed. This belongs to the Family of *Problane*. The French call this *Tranche*.

O and V per Bend, is born by the name of *Hamley*. A and G is a part of the Coat belonging to *Mac Willi*.

S and O per Bend Sinister, born by *Francis*.

Er. and Ers Sinister, a Lion rampant O born by *Tudor Trevaour*.

LXXXII. He beareth Bendy of eight, Or and Gules. In the Blazoning of this Coat, it may be disputed what Colour or Metal is first to be named; *Gerrilams*, fol. 366. saith, That usually they begin in the Chief, as in the foresaid example.

But if it be diversely parted as in this Coat, then to begin in the Dexter Corner, which is ever held to be the most honourable place. But I judg it, in this Coat of Bendy (if it exceed the number of six) to be as an indifferent thing, and it may be in the Blazoners choise, whether he will name Colour or Mettle first: But if the Chief be wholly or in part unparted, as in Barry Chevronny, Quarterly, Gyrony, &c. Or if the Chief be parted, and the Dexter side without lines, as in Pally, &c. Then to name that Colour or Mettle first, which occupieth the Chief or Dexter Chief, or the Dexter side, is very requisite. This is born by the name of *Bishopdale*.

G and Er. Bendy of 6. Born by *Coykin*.

O and B of 10. Born by *Mountfort*.

A and B of 6 Bendy by the name of *Playters*.

LXXXIII. He beareth triparted in Bend, Vert, Argent, and Sable. It is so blazoned by *Ferne*, page 185. and cannot be taken for a Bend (being too large) but a partition of so many parts; otherwise if it were but of two colours, it might be Blazoned Argent, 2 points Dexter and Sinister Base, Vert. See *numb. 88.* This is born by the name of *Van Barchulme*.

Triparted in Bend Sinister A G and S. is on an Escuchion of Pretence, belonging to the Coats of the Duke of *Finland*.

The like O G and B with a Greyhound currant in Fesse A is born by *Rubatsch*.

The like G A and B is born by *Ergolispach*.

LXXXIV. He beareth Bendy of six Enarchee (or Champaine) Purple and Argent. Born by the name of *Bowbridge*.

LXXXV. He beareth party per Bend Quee, Vert and Or. This is of some termed Double Goar-ed, &c. See *numb. 70.* The French *Tranche en Nuage*, and *Arondies* Dexter per Bend. By the name of *Gautimor*.

B and O born by *Van Heynjach*.

A and

A and G the like. Born by the name of *Wolkenstein*.

LXXXVI. He beareth **Bendy of six goates**, Azure and Argent. The *French* term it, **Bendy Cheveron** of six pieces. **Bendy Goatee** to the Sinister, to shew that the Goate points tend to that side which must be observed in this kind of Bearings, else a great absurdity may be committed; as these two last examples will manifest. This is born by *Harid van Weselheim*.

LXXXVII. He beareth **party per Bend Urde**, Gules and Or. By the name of *Fausse man Urdmay*.

Note, There is difference between **Urde**, and **Urdee** or **Urdey**; the first being of a single number, the other signifies many: It is also Blazoned per **Bend Champion** to the Sinister.

LXXXVIII. He beareth **Argent, three Pellets, a point Sinister, and another in Dexter Base Indented**, Azure: Or else thus, **two points Sinister and Dexter Base, or triparted in Bend Indented**. See *numb. 83*. Born by *Frikeim*, a German Family.

LXXXIX. He beareth **Barry of six, Or and Azure, party per Pale indented, counterchanged**. Or thus, **Barry of six, parted per Pale Indented, Or and Azure**. By the name of *Changer*.

The like A and G born by *Peyto*.

XC. He beareth **party per Fesse, Vert and Argent, a Losenge in point counterchanged**. *Ferne pag. 201*. terms this, per **Fesse a point Argent**, and **two points Vert**; as many in **Base counterchanged**. Some as following his example, Blazon it **per Fesse, Argent and Vert, four points counterchanged**. The *French* part 3. fol. 5. thus, **per Fesse two triangles counterchanged one of the other**. This is born by *Hinxley*, or *Hinchestey*. see *chap. 9. numb. 100*. The *Latine* Blazons it, *Arma Argentea duplicata de Nigro*: and the *French* say *Argent de cosse*, or cut about, *Sable*.

Per Cheveron.

XCI. He beareth **party per Cheveron, Gules and Or**. This is born by the name of *Estoner*.

S and A. Born by *Aston* of *Aston*, in *Cheshire*.

S and Er. per **Cheveron, two Boars heads**. By *Sandford* of *Sandford*.

Per **Cheveron in Chief A and G**, a chief of the second. Born by *Neydeck*.

XCII. He beareth **party per Cheveron Urde**, Argent and Azure. By the name of *Millerby*.

XCIII. He beareth **party per Pale, and engrailed per Cheveron, Or and Gules**. Others term it **thus, per Pale, Or and Gules; and per Cheveron engrailed counterchanged**. *Boswell, pag. 71*. Blazons in, **traversed in four, per pale and Cheveron**. By the name of *Omlerhead*.

XCIV. He beareth **Cheverony of Eight**, Argent and Vert. By the name of *Cheverony*.

Per Pale and Pile.

XCIV. He beareth **party per Pile, and Cheveron**, Gules and Argent. Also **per Pile, Gules and Argent, per Cheveron counterchanged**. By the name of *Corville*.

XCVI. He beareth **party per Pale and per Cheveron of six, Gules and Or**. By others he beareth **party per Pale, (or pally) of six, Gules and Or, and per Cheveron of the same, counterchanged**. By the name of *Spoimorth*.

XCVII. He beareth **party per Pile, Azure and Or**. Some term it **per Pile in point**, but that is a needless expression, because partings ever run from side to side of the Escuchion. This party per Pile may be charged (as saith *Leigh, pag. 27*) but no other part of the Field, and it may be used as one only Coat. This is born by the name of *Fobley*.

Party per Pale, and per Pile, A and G. Born by *Osterricher*.

XCVIII. He beareth **Pily of six pieces traverse**, Argent and Purpure, *Gmilians, fol. 376*. terms this **Barry Bendy of six pieces**. *Leigh, pag. 91*. gives an example of this kind of Bearing, and calls it **Barry Bendy**, but names not the pieces, because he saith they are ever to be eight; and so doth his Scholar *Bjfmek*. And *Upton, pag. 102*. (not considering it to be a partition derived from the Pile) gives it a better Blazoning, who calls it **Bendy Barried** (or *Barwise*) **Argent and Gules**. This is by some termed, **per Pale Indented, traverse the Escuchion**. Also **per Pale Indented point in point**. If these Points had stood to the Chief and Base, your Blazon had been only **Pily of six**, but standing overhwart, you must express the traverse. The *French, part 3. fol. 5*. term it **party Emmanchee**. This is born by the name of *Stichler*.

Pily of 4 G and A transverse in point. By the name of *Krackmar*, or *Van Crackmar*.

The like Pily of 5 B and A. By the name of *Van Wanlersleben*. And also by *Sclanders, org.*

The like Pily of 6. O and S. Born by *Muerer*.

The like Pily of 6. G and A. By the name of *Lemerdorf*.

XCIX. He beareth **Pily of eight, traverse in point to the Sinister Fesse**, Gules and Or. The term **traverse in point**, will suffice if it be on the Dexter side. This is born by the name of *Sidwell*.

The like A and G is born by *Cajarjolt*, or *Kaiserstul*.

C. He beareth **party per pale, Or and Sable, with a Gyron Sinister in Fesse**. Some name the Gyron to be in Sinister Base. By the name of *Drumlineregh*.

Per pale B and O a Gyron in Chief. A. Born by *Dedge*.

Per Salter.

CI. He beareth **Party per Salter**, Azure and Argent. Some term this a **Gyron of four pieces**, all the four parts may be charged with any thing, either Quick or Dead, or any two parts of them; or with one entire thing over all the Field. This partition is likewise subject to the several sorts of Lines according to the foresaid Rules; but are never formed of two distinct Lines in one and the same Coat, that being only peculiar to quarterly bearings, or in such Coats by which two ordinaries are expressed, as *numb. 93, 105, 106, 108*. This is born by the name of *Hegson*.

Er. and G per Salter. Born by the name of *Reft-nold*.

The same B and O is born by *Kall*, or *Call*. Also by *Pymford*.

The same B and A a Salter G Born by *Gage*. Also by *Dermart*.

The same G and B was born by King *Athelstan*.

CH. He beareth **Party per pale, and Salter**, Or, and Gules. By the name of *Stile*.

CHH. He beareth **Party per Salter**. Argent and Azure, a **Salter counterchanged**. By the name of *Tomlinson*.

Per Cross or Quarterly.

CIV. He beareth **Quarterly**, Vert and Or. This is also termed **party per Crois**, *Sph. lib. 1. fol. 9. 19.* that is, when it consisteth either of Colour, Mettle or Furs, without any other charge, *Grill. fol. 364*. But if it be charged upon, or on any, or all the quarters, then it is best blazoned quarterly; yet *Upton* holds no such rule, but in all his Blazonings terms it quarterly, whose Rule I chuse rather to follow. This is born by the name of *Veruit*.

Er. and Chequie O and B quarterly. Born by *Gyde-thorpe*.

The like G and A Born by *Walleis*.

Quarterly G and Er. By *Starnope of Rampton*.

The like O and G a Bend S. Born by *Malbanck*, Baron of *Wich Malbanck*.

The like G and O in the first a Lion passant A. By *Massy*, Baron of *Dunham-Massy*.

CV. He beareth **quarterly endented per Fesse**, Vert and Argent. Born by *Whitelberg*.

The like O and B. Born by *Parrott and Baston*.

The like G and O. Born by *Bromley of Hampton*.

The like O and G by *Laton or Leighton*.

The like S and A by *Bassy*.

CVI. He beareth **quarterly Endented per pale**, Sable and Or. And so in several Coats you will find the one of the partitioned scores according to the other prescribed Lines for the composing of Ordinaries. This is born by the name of *Gunders*.

*

The like O and B belongs to the Coat of *Asdeley*.
The like O and G by *Danco*.

CVII. He beareth Argent, a **Cross Parted**, Gules. See more of this in *Crosses, cap. 5. numb. 13*. Some term this, parted into Nine equal Divisions, in which if the Cross part be charged, it containeth but four things, but if on the Field, the Charge will be five, by which numbers (if either charged) you may understand whether the Field or Cross is occupied, without mentioning the same. For this Coat I have seldom seen born, but either the one, or other, or both, have been charged with something or other.

CVIII. He beareth quarterly, **party per pale Endented**, Gules and Argent; and Azure, a **Fesse Or**. The like you shall find endented (or with other lines) per Fesse, per Chevron, per Salter, &c. And that both in the first or second quarters; if the second quarter had had the partition in, then you should have named the colour of the first before any mention were made of the second quarter as thus: **quarterly Azure, and party per pale Indented**, Gules and Argent. See *chap. 8. numb. 117*. This is born by the name of *Van Kitzinghall*.

CIX. He beareth **quarterly Vert and Or**; a **Fesse and Bordure counterchanged of the Field**. *Ferne, pag. 202*. Blazons it thus **quarterly, V. and O. a Fesse counterquartered within a Bordure counterchanged every one of the other**. And the *French, part 3. fol. 21*. say **quartered**, the first and fourth Azure, in the Fesse Or, and in the Bordure the same; the second and third of Or, the Fesse Azure, and the Bordure of the same. This is born by the name of *Don Pressignies Verillo*.

CX. He beareth **parted per Fesse**, Azure and Argent, **two Bordures counterchanged**. Others term it **per Fesse Azure and Argent, each Bordured counterchanged**. This is born by the name of *Van Lipping*.

The like G and A is the Town Coat of *Luberg*. Also the name *Solothurn*.

The like A and S is the Town of *Ulme*.

After the same manner the *German and Dutch* bear Coats, thus bordured both per Bend and per Pale; as Azure and Argent per Bend each bordured counterchanged. Born by *Zurich*.

Azure and Argent per Pale, each Bordured counterchanged. By the name of *Lucern*.

Tinctures of Fields from Ordinaries obscure.

HAVING given examples of Coats abstracted from Ordinaries by a manifest Demonstration; now it followeth in Order to speak of such **Tinctures of Fields** as have their derivation from the said Ordinaries, but in a more dark and obscure way, as in these and the like examples.

CXI. He beareth **Daisy Bendy**, Pearl and Ruby. Here you may see this Coat is composed of the Lines of

of

of two kinds of Ordinaries commixt, to wit, of Pales and Bends, born overthwart the other, for which cause they are termed **Paly-Bendy**, a term not unfely appropriated to it. *Boswell, pag. 37.* Blazons it **Fusilly-Bendy**: And *Morgan, lib. 1. fol. 9.* **Bendy Losengie**, but I suppose they mean it by the example following, *numb. 114.* which is the true Losengie or Fusilly Bendy, and not this. This Coat is Born by the name of *Zu- zurg, of Germany.*

The like A and B. Born by *Barvaria*, Earl of Leicester.

Paly Bendy Sinister G and O. Born by *Salomon*, a Venetian.

Party per Pale, Paly Bendy B and O and G. Born by *Flitzing*. Some term this from the *French Tranche Traverse*.

CXII. He beareth **Barry Bendy**, Or and Azure. This consists of Barrs and Bends; and sometime you shall have the Bends to be Sinister, which you must mention in your Blazon thus, **Barry Bendy Sinister**. *Leigh, pag. 91.* gives an example of a Coat which he terms **Barry Bendy**, which is in the draught **Pily Bendy**, which example I have before shewed, *numb. 98.* under the term of **Pily of six traverse**, which is by divers Heraulds thought to be better Blazoned so than by **Barry Bendy**. *Mr. Morgan, lib. 1. fol. 9.* terms this **Barry Bendy Losengie**, or **Bendy Losengie**. This is born by the name of *Barben of Venice*. These kind of Bearings are rarely used with us, therefore few examples can be produced. The *French* term this **Tranche Traverse**. This is born by the name of *Sarratt*.

G a Fesse Barry Bendy A and B is born by *Nusberg*.

CXIII. He beareth **Losengie** (or **Fusilly**) Argent and Vert. This is not derived from any ordinary, but is abstracted from a common Charge, as the Fusill or Losenge, which being born all over the Field, is termed Losengie, or Fusilly; that is to say Losenge-ways, *etc.* as this is all over the Field, so it, (with the two foregoing Coats) are often born upon the other honourable Ordinaries, which are likewise thus to be termed; as a Bend Fusilly, a Chevron Losengie and the like.

In the blazoning of these, because there is no certain Colour or Mettle, which occupieth the Chief, therefore the Mettle is always to be named first. *Ferne, pag. 195.* terms this **Masculy**, and a field of **Masculy**. If termed from an Ordinary, say **Saltery**, or **Bendy Dexter and Sinister counterchanged**.

CXIV. He beareth **Losengy Bendy** (or **Fusilly Bendy**) Or and Gules: So termed because they ly with the Points Bendwise; and as these are drawn Dexter Bendwise so you shall find them (especially in *French* Coats) bending to the Sinister side, which you must term **Losengy Bendy Sinister**. This Coat is often drawn more numerous in the Losengy Bendy. This is born by the name of *Martono of Venice*.

The same A and B a Chief G. Born by *Puntzinger*.

CXV. He beareth **Barry** of six point in point, endented and counterchanged, Or and Vert. This I find also Blazoned, **Barry Indented one into the other**. And **Barry Bendy Losengie counterchanged**. There is no doubt but one Coat of Arms may receive two or three, or more ways of Blazon, and yet all good. *Morgan, lib. 1. fol. 9.* terms it **Barry Losengie counterchanged**, which is also very proper: And the *French, fol. 151.* term it **triangled, counter-triangled of so many pieces: and Trianglee** of Or and Vert: See another kind of Bearing like this, yet different in the Blazon, *cap. 9. numb. 112.* This is a Dutch Coat born by the name of *Kinspurgall*.

The same A and S is born by the name of *Gise*.

CXVI. He beareth **Masculy**, Argent and Vert. *Ferne, pag. 195.* terms Losengie by the name of **Masculy**; but this is the right manner of Masculy-ways, which is, as if it were Losengie, each charged in the middle with a square piece Losenge-wise, of the contrary colour as you see in this example; for it is ever the property of the Masculy to be voided. See it born otherwise with the points Bendwise, *cap. 9. numb. 118.* This is in the Church-Window of *Hartlebury* in *Worcestershire*, from whence I tricked the same.

From Fusils, Mascles and Losenges, when born all over the Field, they are termed in Blazon, Fusilly, Losengy, Masculy, that is Fusil-wise, Losenge-wise, Masculy-ways; which bearings are often found charged.

CXVII. He beareth **Barry Nebulee** (or **Nebulated**, Or and Azure. Some term it of six pieces, but when the whole Field is so occupied, I think it needless to express the number of Barrs. Others Blazon it **Nebule counter-Nebulee**; and **Nebulee in point**. This is born by the name of *Clowdley*.

The like O and G born by *Lowell*.

The like O and S born by *Blount*.

The like B and A on a Chief O a Lion rampant issuant S Born by the name of *Rottelu*.

CXVIII. He beareth Argent, an **Oyle of Pellets chained, all fixed to another in Fesse Gyron-wise**. This is born by the name of *Navarre*. This is generally termed the *Navarre Knot*, being the Coat of that Kingdom; thus I have seen it drawn of old, but now it is otherwise, as you may see *chap. 9. numb. 32. 33.*

CXIX. He beareth **Gyronny of four Champainie** (or **enarched or fleeted**) Argent and Azure; or else thus, **quarterly enarched, or parted in four, fleeted**. Born by the name of *Crookshaw*.

A and G the like. Born by *Braunck*. Also by *Nagell*.

The like A and B is born by *Van Elershofen*, of *Francia*.

CXX. He beareth triparted, fleeted, and reflected, conjoined in the Center (or Fesse point) Argent, Or, and Azure. Born by the name of *Tribute*.

The like A G and S born by *Van Fridesheim*.

The like A G and B born by *Tessell*.

T O

His Honored Friends,

William Ince, William Wilmes, and John Anderson,
Esquires.

William Wilson, William Bennett, John Wilme, Isaac Swift, John Jones,
William Selby, Gentlemen; And to each of them, Greeting.

Having so rich a Gift bestowed on me from your habitable parts and quarters of our City, as my second Self; I cannot, but in remembrance thereof, and as a return of Thankfulness; first to God, then in perpetual memory of your Favours, Dedicate these few unpolished Lines (in the next place to you) and Subscribe my self your Devoted Servant,

Randle Holme.

C H A P. VIII.

I. THE next thing in order to be treated off, is the File, which by *Grilliams*, fol. 35. is termed a modern difference for Coats of Families that are descended off and from the same Persons or Houses; yet I have seen them born for distinct Coats themselves, therefore rank them among the Ordinaries.

The File or Labell.

WHAT these Files are, it cannot be certainly avouched, for I find diverse Judgments therein, *Leigh*, pag. 107. and *Upton* calls them Points, such as Men in old time fastned their Garments withal. *Bude*, affirms them to be Tongues. *Alciatus* names them Plaitez or Plaits of Garments. *Bartholus* calls them Candles. Some others call them Files, and Lambeaux or Labells, Taggs that hang at Deeds and Writings to which Seals are fixed.

Of the diverse manner of bearing them, these few examples following will give light.

I. He beareth Argent, a File, or Fillett, Gules. The

*

File is ever placed in the lower part of the Chief, or thereabouts; if it be set any where else, it is called by another name according to the diminutions of the Ordinaries before said, but when it stands in this place, it is (as I may say) in its own Sphere.

In these first rank of Squares, for want of other room are several bearings placed, which take as followeth. Sable, a Cross couped on the top and flurt O. Some term it a Cross, the top flurty. Born by the name of *Varvaile*. This Cross should have had his place in chap. 5. after numb. 106.

II. He beareth Or, a File couped, Azure. A Cross couped (or a plain Cross) fitched, or fitched on all four, pierced Losengeways, Gules. See numb. 116. The Fitching of this Cross is not from the outsides, for then it would be a Cross Ordon, as cap. 5. numb. 80. but proceeds from the middle of the ends, as numb. 35. 36. This is born by *Crossilote*.

III. He beareth Argent, a File with one Label, Vert. The Labells, Lambeaux or Points, call them which you please, they are usually born in Coats even and odd to the number of Nine. Some term this a Label with one point; but *Leigh*, pag. 107. doth dissent from such a term, holding it better to be called a File of so many points

points or Lambeaux, then a Labell of so many points. This form of Bearing is found (saith *Gwilliams*, fol. 36.) in the Chappel at the Castle of *C. mpire* in Zealand.

The Cro's in this quarter is thus Blazoned, Gules, a Cro's Tau with the end **convered**, mounted upon three **Enierces** or Steps Argent. By the name of *Glochen*. This place in *chap. 5.* after *numb. 47.*

IV. He beareth Or, a **File of two points**, Gules, each **Fiurt in the foot**, Sable. This is born by the name of *Tnybeck*. And the Cro's is termed, a **Cro's double triparted**: of which see more, *chap. 5. numb. 89.* after which this should have followed.

V. He beareth Argent, a **File of three Labels** Azure. If the Field be Mettle, the File is a colour made according to the Heraulds pleasure, if a difference: and so on the contrary, if the Field be a Colour, the File is Mettle. This is a difference of an eldest Son, while the Father is living.

The Cro's in this quarter is thus Blazoned, Argent, a Cro's, at each end an **Horse-shoo**, Sable. Born by the name of *Eychenpash*. Some term it a **Cro's ferrated**, from *Ferrus*, as being shod with Iron, as Horses are.

O the like S is born by *Truchses van Kulenthall*.

B the like O on a Chief of the same, a Staggs-Horn Fesse-wise S. is the Town of *Kirchens* Coat.

VI. He beareth Or, a **File of four Lambeaux**, Gules: To which I have added this Blazon, being the Coat of a very worthy Gentleman without the File, *viz.* Argent, a **Fesse Barry of ten Or and Azure**, a **Lion issuant** Sable. By the name of *Vantrough*. If the Fesse thus divided, had the Field seen through it, then it is to be termed a **Fesse cinque parted**, or parted into five. See more of this **parting**, *chap. 5. numb. 82. to 89.*

VII. He beareth Argent, a **File of five points**, Sable. This is the difference of the Heir whilst his Grand-father is alive: The other Charge is 4 Crestants fretted. See *lib. 2. cap. 1. numb. 62.*

A such a File B is the entire Coat of *Henlington*.

VIII. He beareth Gules, a **File couped of three points** Argents. This kind of File Heraulds usually make in the chief part of a Coat, for the difference of an Heir, the Father being living; when it cannot otherwise conveniently be drawn through the whole Chief, as the 4, 5, and 6, examples. So that in the Blazoning, it is in your choise, whether you will term it a File couped or not: But it is more generally Blazoned (as it stands for the difference aforesaid) a Label, not a File, neither the points numbered if they be but three.

The second example of a File couped, is one of five points, which is thus made; if it so fall out that it cannot occupy or run through the whole Chief; and as I told you before, stands for a difference for the Heir apparent whilst his Grandfather is alive: Yet it is sometimes born in Coats, as per Fesse A and B the like G. Born by *Thalheim*.

The third example of a File couped, is one of seven points, which is thus made; and is the difference for an Heir while his Great Grandfather is ling; all which needs no other Blazoning, but to say; with the difference of the first House, the Father, Grand-father, or great Grand-

father living. A File of nine points is, when the great Grand-fathers Father is alive, and higher than that there is not any.

IX. He beareth Argent, a **Lambeaux issuing out of Chief**, Azure. Such a Label as this, between two Beazants in an Azure Field, is very ancient in a Glafs Window in *Raynesford* Chappel in the County of

A two Barrs, and two such Labels issuing V. is born by *Hamerstein*.

Parted per Cheveron Enarchie S and A a Label in chief Er. Is born by *Tenberg*.

S a Bar rampee and couped, conjoined to a Barrulet Argent. The like Lambeaux O. Born by *Van Hayden*. See *numb. 111.*

X. He beareth Or, a **File couped with two points**, Azure. This belongs to the Coat of *Kuniespere*, with some other charges: Also with a Cheveron is (by *Gwilliams* said to be the Seal of *John ap Howel* of *Monmouth*, that lived about the 32 E. 3.

The second charge set down in this quarter which should have been in *chap. 6.* after *numb. 68.* but wanting room, take its Blazon here, (*viz.* Gules, a **Frett** Argent, the joints and corners debuced with **Beazants**. This is also termed 9 **Beazants in Losenge upon the Frett**. This is born by *Huolen*.

XI. He beareth Argent, a **File of three Lambeaux issuing out of Chief**, Azure. *Honorius* saith, That one of these Labells betokeneth the Father, the other the Mother, and the middlemost signifieth the party himself that beareth this Coat. The *French* Blazon this a *File mouant de chief*.

XII. He beareth Sable, a **File of three points in Fesse**, Or.

Be careful to express how many Points each File hath, if it be more or less than three. This is an absolute Coat, by the name of *Fixall*.

G a Bend A in Fesse a File of three points couped B. By the name of *Blemmen* or *Blumenaw*.

XIII. He beareth Argent, a **File of three Labels in Bend**, Sable. This is born by the name of *Marien*, an Alien Born, and Buried in *St. Maries* Church in *Oxford*, A the like B. Born by *Groithus*.

XIV. He beareth Gules, a **File of five points in Bend Sinister**, Ermyne. In the drawing of this and the foregoing File, I have followed the Patterns from whence I took them; the points of the first hanging Perpendicular or streight down, the other more slopeways, answerable to the File, as if it stood in its right place and proper posture; yet the File being thus in Bend, I hold it best drawn when the Labels are pendant. Four Labels at a File thus set in Bend Sinister, is the Coat of *Curly* of *Warwickshire*. 20 H. 3.

XV. He beareth Argent, **two Files**, the first double, the other with a single Label, Gules. Some term it, **two files pointed, two and one**. By the name of *Spinke*.

XVI. He beareth Azure, **three Files**, the first with five, the second with four, and the last triple pointed, Argent, others **three Files**, with five, four, and three

three points, always naming the higher first.

And here it is to be noted also, that if there be but one File in an Escuchion when it stands in the Chief, you need not to name the place, but if it stand any where else, you must name the manner of its standing, as in *numb. 12, 13, 14, &c.* Also if there be more than one File in the Field, you need not to say Barwise, or one above another, for they must of necessity stand so; yet if they be otherwise, then you are to mention the manner of their being; as, three Files in Bend, &c. The aforesaid Blazon is a Dutch Coat, born by the name of *Liskirke*.

Now by these few examples, it serves to confirm us, that Files are not only born for differences, but also for Charges in Coat Armour.

A 2 Files of 5 point B. Born by *Vanderlippe*.

XVII. He beareth Or, a File, Gules, with three Bells pendant, Azure, Clappere, Sable. By the name of *Belfle*. Some have Blazoned this, a file of three campanes, or points campaned, a term borrowed from *Campana* a Bell; as much as to say, the Labels made into Bells.

XVIII. He beareth Amerhyft, a file of three points crossed, Pearl. The File is never charged with any thing, but the Lambeaux or points are both charged and formed into several shapes, according to the ends of Croffes, as Flory, Moline, and the like.

A a File crossed G. each charged with a Beazant between 4 Escallops A. Born by *Northcalpe*.

G a File of three points Molyn Or. By *Milfile*.

XIX. He beareth Argent, a file in fesse of two points, Gules, each charged with a Canton sinister, Or. Files are often thus born in Fesse between things, as *Fearnhead* beareth A a File in Fesse between three Fearn leaves, V.

Note, that as the Bordures before mentioned, so also the Files are often charged with things as well quick as dead, whereof I will give some examples.

XX. He beareth Or, a File with one Lambeaux, Azure, charged in the foot with a Canton sinister, Argent, sometime the Canton is placed on the Dexter side, then you need not to name the place, as I have formerly shewed in the Rules for Blazoning of Cantons, *chap. 3. numb. 115, 116.* Such a File with three Lambeaux Argent, with the Cantons on the Dexter side Gules, was born by *Lionell Plantagenett*, third Son to King *Edward* the 3^d. The like Ermyne and Canton Gules, by *Thomas* Duke of *Clarence*, second Son to King *Henry* the Fourth.

XXI. He beareth Luna, a File of three Lambeaux, Jupiter, each charged with as many Bars, Sol. Else this is of some termed *Gobony*, Or and Azure. Born by the name of *John Nevil*, Marquess of *Montague*, Duke of *Bedford*. Such is the Dignity of the File (saith *William*, fol. 36.) that Heralds have caused them to be laid aside, as to their bearing by private Gentlemen, because of their Dignity; for the Sons of Kings and Emperours cannot bear a difference of higher esteem.

XXII. He beareth Sol, a File of two Labels, Jupiter, each charged with three flowers de lis, Luna. The Charges are ever on the Points, not the File. Such a File with three Lambeaux thus charged, did *Henry*

Duke of *Lancaster* bear (over the Arms of *England*) York Blazons it a File of 3 points charged with 9 flower de lices.

XXIII. He beareth Mars, a File of three points parted per Pale, Jupiter and Luna: on the first six Beasants, and on the second as many Bullets, Saturn. Such a kind of File charged with six Castles, and as many Lionceaux or Lioncells rampant was born by *Edward Plantagenett*, Son and Heir to *Edmund Langley* Duke of *York*.

XXIV. He beareth Argent, a File, having three Taggs pendant (or double Labels) Azure. These represent the Labels of Charters and Deeds to which the Seals are fixed, which by all Scriveners and Clerks are termed Taggs or Labells.

XXV. He beareth Argent, a File with two Pomegranates pendant, Gules, entwapped with a Colper of Gold (or a Rubin Or) which you please to term it. After this manner you will find several Coats having Flowers, Leaves and the like pendant to the File in place of the Label, which Blazon after this example.

Ordinaries one upon another.

2. FROM the Honourable Ordinaries of their diverse kinds together, with their divisions and subdivisions, with their several terms according to the diversity of Lines, by which they were composed; we shall proceed now to shew you their diverse manner of bearing one with another, commixt; that is to say, how one Ordinary is born upon another, one Ordinary between another, one beside another, and several born together in one Coat; and then in the last place, how Ordinaries Frett and Pierce one another, and diminish or lessen themselves; of all which this Engraven Plate will give you divers examples, by which the Learner may know how to understand and conceive of others when they are presented to his view.

XXVI. He beareth Azure, a Pale, Argent, surmounted of a Cheveron, Purple, a Bordure of the second. Some will not use the word surmount, for seeing these Ordinaries lie one upon the other (they say) that the naming of them one after another as they ly, beginning with that next the Field, will be a sufficient and good Blazon; as Azure, a Pale Argent, a Cheveron Purple, a Bordure of the second. This is born by the name of *Lingart*.

XXVII. He beareth Argent, a Pale, Azure, a Cheveron, Gules, and a Bordure engrailed, Sable. Some, and not unfely, term it, a Pale debouned with a Cheveron.

Debrusing in Armory, is when one thing is upon another. This is born by the name of *Paragon*.

S Pale A Cheveron G. By the name of *Dixon*.

XXVIII. He beareth Azure, a Bend and a Border enbeeked, party per Pale, Or and Gules counterchan-
ged,

ged. Otherwise a Bend party per pale, Or and Gules, a Bordure counterchanged. By the name of Cook.

XXIX. He beareth Argent, two Barrs, Azure, a Pale, Gules, a Bordure Indented, Vert. By the name of Coe.

G 2 Pales A a Fesse O. Born by Amfringen.

XXX. He beareth Argent, a Cross Engrailed, Gules, surmounted of a Bend Sinister Azure. By the name of Trammol of Trammol. Quartered by Holme of Chester, Author of this Work.

XXXI. He beareth Azure, a Salter Argent, over all a Cross of the second, surmounted of another, Gules. This is the Union of the Crosses of England and Scotland, which upon King James the First and Sixth Reign, were joined together, and made Great Britains Ensign. A like to this is Gules, a Salter Or, surmounted of a Cross engrailed Ermin. Born by the name of Prince, of Ably Foliat in Shrewsbury.

XXXII. He beareth Argent, two Flasques, Gules, over all a Fesse, Azure, surmounted of a Pile of the second. By the name of Rowlinson.

XXXIII. He beareth Argent, a Fesse, Gules, charged with three Pale Or; on a Chief Engrailed, Sable, a Cross of the third; that is of the same Colour or Mettle which was thirdly named in the Coat, which (if you take notice of it) was Or. Born by the name of Wrihting. Also S a Fesse A with three Pales upon it G is born by Dudink.

XXXIV. He beareth Argent, two Pale, Gules, a Cheveron Vert, a Chief Azure, and a Canton Or. By the name of Hobson Smith.

XXXV. He beareth Or, two Barrs Engrailed Azure, on a Chief Ermine, three Pales Gules, over all an Escochion Argent, a Cross Gules. By the name of Holln priest.

Ordinaries between one another.

3. FROM Ordinaries one upon another, I shall in the next place, give some examples of them between one the other, representing (as it were) both Ordinaries and Charges.

XXXVI. He beareth Argent, a Fesse Azure, between a Pale and a Cheveron, Gules. If there had been no Cheveron in Base, then this Coat would have been Blazoned a Fesse and Pale in Chief, to shew that it exceeded not the limits of the Fesse point. Born by the name of Corker.

XXVII. He beareth Argent, a Salter between two Flasques, Azure, a Chief Gules. By the name of Mores.

XXXVIII. He beareth Argent, two Barrs, Azure, between a Cross of England and a Cheveron. By naming the English Cross, which is always Gules, I mention

*

not the colour of the Cheveron, which is understood to be of the same. By the name of Gibben.

XXXIX. He beareth Or, a Bend Sinister, Gules, between two Cantons, Azure. By the name of Tippling:ll.

XL. He beareth Or, a Fesse Azure, between four Piles waved, Gules. Some term them, (in Point in Fesse and Base.) Others multiplying words, Blazon it thus, a Fesse between two Piles, issuing out of the Chief in point, and as many out of the Fesse in point to the Base. By the name of Otemell.

XLI. He beareth Argent, a Fesse between three Piles and a Frett, Azure. By the name of Golden.

XLII. He beareth Or, a Cheveron Vert, between a Chief and an Escochion, Azure. Yet this may be better Blazoned, as a Cheveron Vert, an Escochion in Base, and a Chief Azure. By the name of Hardy.

XLIII. He beareth Argent, two Barrs Sable, over all (or debased with) an Escochion Azure, charged with a Plate and a Bordure Or. Else say, an Escochion Or, surmounted of another, Azure, charged with a Plate. Born by the name of Hardymett.

XLIV. He beareth Gules, a Salter Engrailed Argent, debased with a Fesse Or, in Chief an Escochion of the third. Born by Leather.

These two last examples should have come in after numb. 34, and 35, and those to have been in these places.

Ordinaries beside one another.

4. AS these Ordinaries are born in Coats one upon the other, and between one the other, so they are also in Arms set by the sides one of another, a device much used in Dutch and German Coats, but very rarely used by us in England; some examples follow.

XLV. He beareth Argent, two Barrs and a Canton Sinister, Azure. When they are of one colour, they are ever thus fixed without any division, the like you may see in the Fesse and Pale. This is of some Blazoned two Barrs Cantoned, thereby shewing that the higher hath a Canton joined to it. See chap. 3. numb. 8. This is born by the name of Gatcliffe.

G the like A born by Deane.

A the like with 3 Barrs G born by Fuller.

XLVI. He beareth party per Bend Sinister, Or and Argent, a Bendlet, Gules, and on the same side two Barrs Azure. Some will Blazon it, in base two Barrs. Born by Ridgway.

Party per Bend B and Ar: a Bend Gules, and two Barrs of the first. By the name of Bendbidge.

Here you need not mention the place of the Barrs, by reason they are a colour, therefore cannot be set upon a colour.

XLVII. He

XLVII. He beareth Argent, a **Salter Azure**, a **Chief Crenelel Gules**, **Charged with a Pile Or**. Born by the name of *Gran. er.*

A **Salter** and **Chiefe G** Born by *Bruse.*

XLVIII. He beareth Or, a **Canton, Squire sinister**, and a **Barrulett, Azure**. By the name of *Kenardy.*

XLIX. He beareth **party per Pale**, Argent and Vert, **fir Cheverons Counterchanged**, three and three. Some per Pale A and V Three Cheverons of the second, and as many of the first. By the name of *Gorlitz.*

L. He beareth **Quarterly indented per Fesse**, Or and Gules; two **Cheverons Azure**, & as many **Barrs Argent**. By the name of *Grantham.* This seems to be a quartered Coat and so might have been Blazoned, but for the Indenting in Fesse. Some begin it thus **party per Pale**, and **per Fesse indented**, &c. Here I name not the quarters in which the Cheverons, or Barrs are, by reason they are not to be set, mette on mette, or Colour upon Colour: Besides in naming the Cheverons first, shews them to be placed in the first and last quarter, and the Barrs in the second and third, being as it were in opposition or contrary one to the other. By this you see, how to Blazon the charges, on all quartered Coats.

LI. He beareth Azure, a **Cheveron**, and a **Pile in Chiefe**, Or. This is Born by the name of *Strettell.* Some omit the term in **Chiefe**, because if it were a full Pile it would have lye on the Cheveron, or the Cheveron on it; so then the word (**Debaused**, or over all, or surmounted) would have been used to one of them as *numb.* 26 27 32. Yet others use not these terms of **Debausing** &c. As is there shewed; therefore to mention the Pile, to be in Chiefe, is very necessary: as *numb.* 34.

LII. He beareth **parted per Cheveron** Argent, and and Azure; two **Cheverons Or**, a **Chiefe Ingraled** of the second. By the name of *Coppock.*

LIII. He beareth Or, a **Bend**, a **Canton**, and a **Cheveron**, Gules. By the name of *Tarnwood.*

LIV. He beareth Gules, and **party per Fesse Bendy**, of six Argent, and Azure, a **Fesse** and **Canton**, Or. By the name of *Hanson.*

LV. He beareth **party per Cheveron**, Argent and Purpure, two **Cheverons** in the **Dexter**, and **Sinister** parts; and a **Salter in Base**, **Counterchanged**. This is born by the name of *Fasslehurst.* Some say two **Cheverons** and a **Salter**, **Counterchanged**; But this shewes not the right standing of them, these being besides one another, when as usually they are born one over the other. These being more fitly termed two **Cheverons coupled** or **paired**.

LVI. He beareth **party per Fesse**, **Pally of six**, Argent & Gules & Azure, a **Fesse** of the second, & a **Cheveron**, Or. Or else Blazon it thus, **Pally of six A and G parted per Fesse**, B &c. Others thus, He beareth **per Fesse** Argent & Azure, a **Fesse** and the **Chiefe Pally of six Gules**, and in **Base** a **Cheveron**, Or. Born by the name of *Stubbs.*

LVII. He beareth Argent, a **Cheveron** and two **Pales in Base**, Gules, a **Chief Azure**, two **Piles Sa-**

ble. Others Blazon it a **Cheveron** between two **Piles** and two **Pales G** a **Chiefe Azure**. Born by the name of *Symcocks.*

LVIII. He beareth Argent, **Frett in a Fesse**, Sable: between two **Barrs**, in **Chiefe** a **Pale** and in **Base** a **Pile Azure**. Born by the name of *Harkston.* Others say between two Barrs, the one Paled, and the other Piled: that is there is a Pale and pile fixed into them. As in the example of the Barr and Canton *numb.* 45.

LIX. He beareth **party per Fesse**, Or and **per Cheveron** Gules; two **Pales**, Argent, a **point** of the first. Else thus, **Party per Fesse**, Or and Gules; over all two **Pales Argent**: in **Chiefe** **party per Cheveron**, and a **point Counterchanged** of the Feild. Or thus **Party per Cheveron** in **Chiefe**, and **per Fesse**, with a **point**, Gules and Or, in the middle part two **Pales Argent**. Born by *Strettall.*

LX. He beareth **quarterly** Gules and Ermine, two **Pales Counterchanged**. Here the Graver was mistaken, in cutting two Pales instead of four, which would have had an odd one to have been **Counterchanged** in the middle of it, as in the next example. These quarterly's per Pale might better be Blazoned (if they fall to be even divisions) **Pally of 6 8 10 12 per Fesse Counterchanged**, then to say quarterly, so many Pales. By the name of *Parlor.*

Ordinaries Commixt.

5. I shall now give you some few examples of mixed Ordinaries, that is to say, two or three or more of them in one Coat Armour, by which the Ingenious may know how to Blazon, or Judge of other such like Coats.

LXI. He beareth **Quarterly Ermine**, and Or, three **Palletts Gules**, a **Bozdure Azure**, on a **Canton Argent** a **Crosse Sable**, and a **Chiefe Gules**. This is Born by the name of *Holston.*

¶ The naming of Gules twice, in this Blazoning is not any absurdity, by reason what is born on a **Canton**, or on an **Escuchion** of **Pretence**, are supposed to be additional Coats, and therefore will admit of their own terms, as if the other were not mentioned. Others on the contrary argue, that seeing they are now made one entire Coat, it is not good to mention the colours, or mette twice, From thence then we may conclude, that till these agree, it is left to the Artists will, and pleasure, whether they be twice named or not.

LXII. He beareth **Pally of six**, Gules and Argent, on a **Cheveron Or**, two **Barrs Semicle**, a **Border Sable**, and a **Chiefe quarterly** Ermine and Azure. This is born by the name of *Hatfeild.*

¶ Here by these two examples you may see, that generally the **Bozdure** gives place to the **Canton**, and **Chiefe**; but to all other Ordinaries it doth not, but goeth round the **Escuchion** as *Grilliams fol.* 389 390 aff. firmeth, yet by his good favour, I have found some Coat, contrary to his general rule, but we shall take them for

Hieroglyphics, and therefore give such a Blazon by themselves, as in the three next examples.

LXIII. He beareth *Party Per Salter*, Or and Gules, on the first and last, *two Bends*, and on the second and third, as many *Pallets*, Counterchanged, a *Cheife Engrailed*, Azure, all *Surrounded* with a *Bordure* of the same, Argent. The *French* term the *side quarters* of the partition by *Salter*; (the *flankes* or *flanches*) as thus, *Party Per Salter* the *Chief* and *Point* with *two Bends*, the *flaque*, or *flankes Dexter*, so: and *Sinister* so and so, as the charges are.

LXIV. He beareth *Sable*, a *Cheife*, Azure, *Bordure engrailed*, Or, *Surrounded* with an other of the same Argent: on an *Escuchion* of *Pretence* of the second a *Cheveron* of the third, and a *Bordure* of the fourth. Others Blazon it *Sable* an *Escuchion* so and so, a *Cheife* *Bordure*, *engrailed*, all *Surrounded* with an other of the same, (or *Surmounted* with an other) &c. Born by the name of *Crocket*.

LXV. He beareth *Quarterly Pally* of four, Or, and Gules, and Argent, *two Cheverons*, Azure: a *Cheife* of the second *filleted* of the fourth, a *Bordure Vert*. Born by the name of *Horne*. Else blazon it according to *numb. 63.* or thus *Quarterly*, the first and last *Pally* of four Or, and Gules. The second and third Argent, a *Cheveron* Azure. Here you see the difference of a *Bordure* *surmounting*, and the *Bordure* that gives place to the *Chief*, which you must be sure to take notice off in the Blazon n^o 3.

LXVI. He beareth Argent, a *Cheveron* Azure, a *Pale* Or, and three *Bends Vert*: each joyning to the other. This is born by the name of *Key*. Some Blazon this, *Triparted per Pale*, Argent, a *Cheveron* Azure the second Or, and the third of the first, three *Bends Vert*. But the most properest way, is a *Pale*, between a *Cheveron*, and three *Bends*.

LXVII. He beareth Or, a *Cheveron* Gules between two *Crosses*, and a *Salter* *Sable*, a *Cheife* Azure. By the name of *Redland*.

LXVIII. He beareth Argent, a *Fesse* Gules, between two *Crosses* *quarterly* *peirced* *Sable*. *Fern pag. 181.* doth Blazon it, on a *Pallet* *Sable*, a *Fesse* Gules, and two *Barrulets* of the second *quarterly* *peirced*, of the *Feild*. By the name of *Kells*.

LXIX. He beareth *Barry* of four Gules and Argent, a *Cheife* *parted per Pale*, Azure, and Or, over all a *Bend* *Sable*. By the name of *Jackson*.

LXX. He beareth Argent, two *Barrs* and in *Cheife* as many *Pales*, Azure, on an *Inescuchion*, Or, two *Barrs* *Sable*. Born by *Breche*.

LXXI. He beareth Or, two *Barrs* Azure, on a *Chief* Argent, two *Ogresses* between as many *Squires*: on an *Escuchion* of *pretence* Argent, a *Pale* Gules. Born by *Musket*.

LXXII. He beareth *Pally* of four *Sable* Argent, two *Barrs*, and a *Point* Gules. Born by the name of *Wais* or *Wyatts*.

*Ordinaries more Intricately
Commixed.*

6. THERE are likewise *Commixt* Coats, which are more hard and difficult to be found out by the r^o ordinaries, I shall shew you some few examples.

LXXIII. He beareth *Pally* of six Argent, and Gules, a *Cheife Vert*, a *Barrulet* f Azure, and a *point* of the third. This is born by the name of *Lomehart*. *Fern pag. 177.* terms the *Pally* to be *fretted* with a *Barrulet* in *fesse*, a *Cheife* and *Baste*. And so he doth of all other Ordinaries, which ly over one another: For which *Gwilliams* useth the word *Surmount*, or (all over,) or *Debused*, which are more fitting expressions.

LXXIV. He beareth *Barry* of six, Ermine, & Gules, and per *Pale*, Azure, a *Cheife Engrailed* of the third and a *point* *Indented* Argent. Born by the name of *Altonley*. Some say *Barry* of six per *Pale* Er. and G and B &c. This sheweth that the first Partition is Er and Gules, per *Pale*, and the second to be wholly Azure having no *Counterchanging* at all; but continued in the same to the last.

LXXV. He beareth Argent, two *Barrs*, *Sable*, a *Bend Counterchanged*, between three *Cinquetoilles* (two in *Cheife*, and one in *Bale*) Gules: on a *Cheife* Or, three *Pales*, between two *Squires* Azure. Born by the name of *Mortmaine*.

LXXVI. He beareth *party per fesse*, and per *Pale* in *Cheife*, *Sable* and Argent and Or, a *fesse* Gules between three *Bends*, and as many *Sinister Counterchanged*, and *frettee* Azure. Some Blazon this, *triparted in Pale and fesse*, *Sable* Argent and Or, a *fesse* between three *Bends*, of the second, and as many *Sinister*, of the first, and *frettee* in *Bale* Azure. Others do Blazon it *triparted in Pale and fesse*. S A and O In the first three *Bends* A In the second three *Bends* *Sinister* S in the last, *Erectee* B over all a *Fesse* of the second.

LXXVII. He beareth *Barry* of six *parted per Pale* *Counterchanged*, Or and Azure, a *Cheife* *pally* of four, *party per fesse*, *transmuted* Argent and Gules, between two *Cantons* *gyrony* of eight Vert and Or: An *Inescuchion* of the third. The *French* Blazon is thus. He beareth Azure and Or: One *fesse* of six *party au Pece*, a *Cheife* *pallee* *Counter palee*, *fesse* *Counter fesse*, and two *Cantons* *Gyrons* of the same, over all a *Shield* Argent. This is born by the name of *Marsh*. the same with the *Cheife* *Pally* of four, is born by the name of *Presigne*. *Ferne pag. 202* the same with three *Pales* on the *Cheife* and two *Squires* *Bast Dexter* and *Sinister*, born by *Mortymere* Earl of *Marsh*.

LXXVIII. He beareth Argent, two *Barrs* Gules; on a *Cheife* Azure, two *Gyrons* Or, a *point* (in *Bale*) of the third, *charged* with a *Cross* of the fourth, on an *Escuchion* of *pretence*, Argent; a *Canton*, *Bend*, And *Cheveron* *Sable*. Born by the name of *Draywell*.
The

The **Escuchion** of pretence being an **Heirritrix** and having Children, her Husband thus assumes the bearing of her Coat, which is by the name of *Tarley*.

LXXIX. He beareth Or, on a fesse Gules a **Salter** Argent; three **Piles** in **Cheffe**, and as many **Pallets** in **Base** Azure. By the name of *Armstrong*. Some will say on a fesse, a **Salter**, between three **Piles** and as many **Pallets** &c. Other say triparted per fesse, the first, Or, three piles Azure: The second Gules, a **Salter** Argent, the last, of the first, three Pales of the second.

LXXX. He beareth Argent, on a fesse, Vert: a **Barr** Or, charged with three **Cheverons** couched, Gules, between a **Cross** and a **Salter** of the fourth. By the name of *Northlander*.

LXXXI. He beareth party per fesse, **Gyrony** in **Cheff**, Argent, and Gules; and **Quarterly** in **Base**, Or and Azure; a **Barrulett** between a **Crosse** and a **Salter**, Vert: an **Escuchion** of pretence, of the first. Or else more breisly thus, per fesse **Gyrony**, and quarterly &c. A **Barrulett** between a **Cross** and **Salter** &c. by the name of *Trollachen*.

LXXXII. He beareth **Chequie** of nyne, the first Argent a **Bend** Gules; the second **Gyrony** Or, and of the second, each contrary **Composé** to the other. This is born by the name of *Maslinberg*. Others do term this a **Cross** parted, each **Gyronny** Or and Gules, five **Bends** &c. As chap. 5 numb. 13 and chap 7 numb. 107.

LXXXIII. He beareth **Gyrony**, Argent, and Gules, a **Cross** Quarterly quartered Azure, and Or, on a **Cheffe** of the first, a **Pale** between two **Squires** of the third, charged with a **Crosse** of the fourth. By the name of *Houghinworth*.

LXXXIV. He beareth **Gyrony** Or and Gules, a **Salter** between four **Escuchions**, **Counterchanged**. By the name of *flowerflony*.

LXXXV. He beareth triparted per fesse, the first divided into three per pale, the first per **Salter**, Argent, and Gules, the second, Azure, three **Cheverons**, Or; and the last of the first, a **Cross** of the Second: the fesse part Purple: and the **Base** part, Or, three **Bends** **Sinister** Gules, with a **Bordure** Argent. This may be thus Blazoned, party per fesse B and O in **Cheffe**, three **Cheverons** of the first, beween two **Cantons**, the first A a **Cross** G the other party per **Salter** of the same: in **Base** three **Bends** **Sinister** Gules invironed with a **Bordure** of the third; over all a fesse Purple.

LXXXVI. He beareth party per pale, two **Bordure** Gules and Argent, the first invironing a **Field** pally of foure parted per fesse of the second and Azure, and Or, a fesse and a **shapournett** shapoured (or shapournetted or headed) of the third: The second **Imbordureing** **Gyronny** of the second and fourth a **Cheffe** of the third. Some will Blazon this as two distinct Coates, and so begin with the **Felids** and **Charges** first before they mention the **Bordures**. But I take them to be one intire Coat, for after this way, I have seen Bo

dures born by paires, by division per **Bend**, per **quarter**, per fesse, with, and without **Charges** in the **Felids** as examples after will demonstrate. numb. 111 112 113 chap. 9 numb. 91. This is born by the name of *Van Botsfeldt*.

Party per Pale G. and A diapered, two **Bordures** **Counterchanged** is the Coat belonging to the Bishoprick of *Augsburg* in *Germanie*.

Ordinaries Pearceing and Fretting others.

7. **T**HE Ordinaries though in themselves Honourable, yet by their variance, and striving one with another, they are made less noble, and that is by reason of that war which is between themselves, wherein some are pierced, others Fretted, others diminished, and several cut off by the halves, of which take these few examples for manner y

LXXXVII. He beareth Argent, a **trefoil** in fesse supported with two **Staves** issuing out of **Base** in form of a **Cheveron** Gules, pierced with an **Oake-tree** **Eradicated** (or mooted up by the roote) Vert. This is born by the name of *Portman*.

A fesse G proceeding from the middle of it, an **Oake tree** proper. by the name of *Sklmell*.

LXXXVIII. He beareth Argent, a **Dart** in fesse or, piercing of an in **Escuchion** Gules: The **Feathers** and head proper. Born by the name of *Leirfonger*. Or thus, a **Shield** Gules, pierced with an **Arrow** fesse-wise, or, Feathered Argent, headed Sable.

LXXXIX. He beareth Argent, a **Pile** Gules, **Dehulled** with a **Salter** Vert, pierced with a **Barrulett**, Azure. This is born by name of *Dua Pile Andrew de Pickee*.

Note that pierceings of this nature are ever understood to be in the middle of the ordinary pierced, if otherwise then to be named how in what place the piercing is.

XC. He beareth Argent, a **Cheveron** Azure, pierced with a **Bendlett** **Sinister** Gules. The **Bendlett** by reason of the **Cheverons** lying upon the lower part of it hath but very little of it discerned. Others term it a **bend** **Perforated** through a **Cheveron**. This is born by the name of *Milemurt*.

O the like **Bend** Er. and **Cheveron** G Born by the name of *Hadstock*.

XCI. He beareth Gules, a **Fess** Or, pierced with a **pale** Argent. Also Blazoned, a **Pale** perforated through a fesse. This is Born by the name of *Nangrate*.

XCII. He beareth Or, a **Fess** Gules, pierced with a **Pale**, Azure. This is born by the name of *Truxie*. In these two examples you may see a diverse way of piercing; the first proceeding with the entrance from above the ordinary: And this having its piercing proceeding from the lower part of the ordinary: and yet both termed pierced, now in such a case as this, how shall the Tricker draw the Coate true, but may easily mistake one way for another?

To

To this I must say, that generally pierceings are from above, and that the piercer (or ordinary piercing) doth Debruse, or ly upon the ordinary pierced, upon the higher side of it: But this being contrary, for its distinction may have an additionall expression to it, to shew that the debrusing is on the lower part of the ordinary as thus: a Fesse pierced with a Pale, and debrused in the lower (or contrary) side.

XCIII. He beareth Argent, a **Cheveron** Gules, pierced with a **Barrulett**, **Debrused** on the **Sinister** side, **Azure**. This is born by the name of *Longhall* or *Lamball*. If the **Barrulett** had lain upon the **Cheveron** on the right side, then you had needed no such term, as **Debrused**, for all such kind of ordinaries, as are pierced Fesse wayes, are so to be.

XCIV. He beareth Or, two **Pales** **Azure**, **Pierced** with a **Bendulett**, **Gules**. Born by the name of *Dennysgate*. Ordinaries pierced bendways, are ever debrused to the **Sinister** side, the top part we suppose cannot be seen being higher then sight: except in Fesse, Barrs, Cheverons, and Croffes.

XCV. He beareth Argent, a **Pale** **Gules**; **pierced** with a **Barrulett**, **debrused** on the contrary side. This is born by the name of *Formington*.

XCVI. He beareth party per Fesse, with three **Indented**, **Argent** and **Azure**, **Fretted** with a Fesse Or. *Ferne pag. 199* terms this *Emanichee*. A and B Fretted &c. By the name of *Gildy*.

XCVII. He beareth Or, a **Cheveron** **Vert**, **Fretted** with a **Barrulett**, **Argent**. This is Born by the name of *Okell*. Some, will say, debrused and Fretted, naming that first which proceeds from the dexter.

XCIII. He beareth Argent, three **Pylletts**, **Sables**, **Fretted** with a **Barrulett**, **Azure**. Born by the name of *Intraboth* or *Antrobach*.

XCIX. He beareth Argent, an **Oyle**, **Sable**, **Fretted** with a **Palett** and a **Barrulett** **Gules**, **piercing** a **Cheife**, **Vert**. This is Born by the name of *Truggmoch*.

Ordinaries diminishing one another.

8. **COATS** casually abated, or cut off by the halves, or by other accidentall courses or causes, are eclipsed and diminished; those Coates, that have the ordinaries diminished, or cut off by the halfe, are when they be joyned either with themselves, or with other charges, as the examples following will manifest.

C. He beareth Or, a **Demy Bordure** **Purple**, and a **Salter** **Azure**. Born by the name of *Boldersalt*. Some term this a **Bordure** determined in Fesse, (or proceeding to the Fesse part) and a **Salter** in Base.

CI. He beareth Argent, a **Bend sinister couped** at the top; between a **Pellet** & a **Bullett**, **Sable**, in **Cheife** four **Piles** **Azure**. Some term these demy Bends, and Piles. This is Born by the name of *Hollysch*.

CII. He beareth **Sable**, a **Bordure** Or, a **Cheife** **Argent** and a **Canton** **Gules**.

In this Coat note two things: In your Blazon name that first which lyeth next the Feild, and the rest in their order, as they are near or farthest off. Then observe that the **Bordure** gives place to the **Cheife**, and the **Cheife** to the **Canton**: which generally they do, except some few examples as *numb. 63. 64. 65*. This is Born by the name of *Brecking*. But the **Bordure** doth generally give place to the **Cheife** **Quarter**, and **Canton**.

CIII. He beareth **Baron**, and **Femme**; the first **Argent**, an **Oyle**, between eight **Bartlettts** **Sable**. the second Or, a **Bordure** **Gules** this is the old way of impaleing coats belonging to husband and wife; cutting their two coats through the middle, and with two halves, making one entire Escuchion; which nevertheless in their Blazonings are to be termed, as if they were the whole Coats, without any diminishing at all. The first is Born by *Lefmich*. And the second, *Tertonbergh*.

Yet this observe in the impaleing of Coats with **Bordures**, that that side of the **Bordure** (whether in the man or womans Coate) next to the impale, is ever exempted and taken away after this example: But if the **Bordure** belonging to a Coate Armour, if the Coate be Born sole and entire of it self, then shall the **Bordure** Inviron the Coate round, no part shall be diminished. Also if a **Bordured** Coate, be to be **Marshallled** or **Quartered**, among Coates quarterly, then shall no part of the **Bordure** be omitted, but it shall surround the quarter (except it be honoured with a **Chief**, **Quarter**, or **Canton**, as aforesaid) even as if it were born alone of it selfe.

CIV. He beareth **Baron Femme**; the first Or, a **Cross** **Patee** **Gules**: the second **Gules** a **Cross** **Argent**. Here I name a colour twice, because they are two distinct Coates being (as I said in the last) husband and wife conjoynd in one; But if it were an absolute Coate of it self, then Blazon it, and the like thus: **per Pale** Or and **Gules**, a **demy Cross patee** **Gules**; and a **demy Cross** Or, **conjoynd**. The first by the name of *Wardly*: the second by the name of *Pincheffer*.

CV. He beareth party per **Pale**, **Gules** and **Azure**: on the first three **Lions** passant gardant in **Pale issuant**, Or; and on the second a **Garbe**, and a demy one **Conjoynd**, of the third. This is the Armes of the City of *Chester*, being the gift of King *Henry* the seventh, when he made it a County of it self, distinct from the County: which may breifly be thus Blazoned, **Half the Armes of England**, and *Chester*, **conjoynd**.

B an halfe **Eagle** conjoynd per **Pale** A to G 2 **Bends** B by the name of *Hertingshausen*.

CVI. He beareth party per **Pale**, **Sable**, and **Argent**; a **Cullippa** (or **Lilly**) **Sliped**, and a demy one Or, **conjoynd** to the half of an **Eagle displayed**, **Gules**. The like to this is Born by the Town of *Kaufbeuren* in *Germany*; the **Eagle** on the dexter side &c.

Per **Pale** O and **Bendy** of 6 A and G and half of an **Eagle** conjoynd to the **Sinister** side **Sable**. This is the Armes of the Town of *Nurnberg*.

G an halfe **Eagle**, and half a **wheele** conjoynd A the Armes of the Town of *Ratibar*.

CVII. He

CVII. He beareth *Baron* and *Femme*: the first Argent, an *Hurt*, and a *Labell* of three *Points* Gules. The second Or, a *Cross flet* conjoynd in the middle Azure. This in the first division is Born by *B. Skermich*. And the second is Born by the name of *Braklsch*.

Baron & Femme, the first O and Eagle with two heads S the second V a Fesse O Conjoynd in the middle by the name of *Frymanner* of *Hohen Randeck*, in *Bavaria*.

CVIII. He beareth Gules, six *Beasants*, a *Canton*, Argent. Here I Blazon the full number of *Beasants*, although the *Canton* (or a quarter) doth cover one, & a part of two more. So that as I shewed before *numb.* 34 61 102 all ordinaries, & charges whatsoever, give place to them, yet whatthey cover is not to be diminished in the Blazoning. This is Born by the name of *Zouch* or *Souch*.

CIX. He beareth *Quarterly* (or four *Coats Quarterly*) the first Argent, a *Salter* Gules. The second Argent, a Fesse Gules, between three *Pellets* (or *Bullets*) the third Or, an Eagle displayed, Sable. the fourth Gules a *Lion Rampant* Or. Over all an *Escuchion* of pretence, Argent; charged with a *Mullet* Sable. Here again you may see that an *Escuchion* of pretence, will diminish, and hide all or part of the charges in *Feilds*, where it is set; yet in Blazoning the whole is to be mentioned.

CX. He beareth *party per fesse*, the *Chief* part divided by the same, *Indented*, *Imbowed*, Argent and Azure. The Base of the second, a *Pale* and two points, Dexter and Sinister, of the first. Born by *Don Doblecote*.

Per Fesse, the *Chief* by the same, Urdee in point G & S the Base of the first, a *Pile* of three points reversed of the second. By the name of *Lerch Van Durmstein*.

CXI. He beareth two parts per Fesse, the *Chief* parted by the same Or and Argent, a *Tile* (or *Billet*) with two other joynd in the Corners projecting it: & a *Border* Gules. The Base parted per point *Escartellee* *Gravy*, (or having two *Grices*) Azure and the second, a *Border* of the first: the *Tiles*, or *Billets* may be termed, a *Fesse Rampee*, and *cooped*. See *chap.* 4 *numb.* 84 and *chap.* 6 *numb.* 27 and this *chap.* *numb.* 9 113.

CXII. He beareth *party per Pale*, Azure and Argent, a Fesse Counterchanged, each part Bordered of the same. others, per *Pales*, six *Borders* counterchanged. Others per *Pale*, triparted per Fesse, each Bordered. o-

thers will have them to be square *Masculs*. This is born by the name of *B. rdeaux*. Also by the *Langrave*, *Leuchtenberg*.

CXIII. He beareth *party per Bend Vert* and Or, on the first, a Fesse, with one *Battlement* *imbattelled* pierced quarterly (or quarter pierced) a *Border* Argent: on the second a *Squire* (or rather a point removed) Gules, Charged, or Surmounted of an other, a *Border* Sable. Here you see *Bordures* are composed according to the division of the *Feild*. And it is a usuall way, with the *German*, and *High Dutch* so to bear them.

CXIV. He beareth *party per fesse*, Gules and Argent. two *Pales* coupd in Base, conjoynd to an other, all Counterchanged of the *Feild*. Born by *Wilklowe*.

Per Fesse G and A the like Caunterchanged, Born by *Robert*.

CXV. He beareth Azure, a *Chief removed* (or by others a Fesse in *Chief*) and three *Pales* conjoynd, Argent. Some term it a *File* of three points fixed, or extending to the Base. Born by *Kolben*.

G a like *Chief*, and *Paly* of six A By *Heylsberg*.

CXVI. He beareth parted in four, per Fesse, Argent and Vert. over all a *Cross* coupd, *Fitched*, in the ends, Counterchanged; charged with an *Escuchion* Or, over all a *Salter* Gules. See this kind of *Cross*, more plainly set fourth *numb.* 2 This is born by *Van Hobert hager*. The like G and O the *Escuchion* B and *Salter* A Born by *Otingen*.

CXVII. He beareth *party per fesse*, Argent, and *Indented* in the same, Azure and Or. In *Chief* a *Barr Dauncett* of two pieces, in the middle of it, on the top a *Cross* Gules. By the name of *Illsinger*.

O such a *Barr* of two pieces, and a mount in Base B By *Greifenrot*.

CXVIII. He beareth Argent, a *Cross* and *Salter*, Gules, on a *Quadrat*, or *Quaderangle* Or, a *Cheveron* charged with a Fesse. See *chap.* 9 *numb.* 50.

B the like O on an *Escuchion* B a *Bend* A born by *Bletz Van Rotensdein*.

CXIX. He beareth Or, four *Cheverons*, and a *Pallet* conjoynd Gules. Born by *Buchwitz*, Per *Pale* B and G the like O Born by *Van Buchwitz*. See *chap.* 9 *numb.* 95.

T O

His Esteemed Friends, and Relations,

Henry Lloyd, Thomas Thropp, Mathew Anderton,

As also to

Hugh Starkey, William Allen, Francis Skellicorne, Nathaniell Williamson, John Witter, Robert Fletcher, John Golborn, Robert Hewet, and Lewis Williams, Gentlemen, and of the Councell: And to every of them in particular, with the rest of the Esquires and Gentlemen, Inhabiters in the Bridg-street in Chester, in general.

TO whom the Paines, and Care of this following Chapters, is most willingly offered, and to your Memories Dedicated, by him who is yours, to serve you more then himself.

Randle Holme.

C H A P. IX.

CURTEOUS Reader, these few additions mentioned in this Chapter, and Engraven on this Plate are to be placed in the right Chapters and Sections and numbers as is herein set down.

Chap. 3. Numb. 23. 88.

I. He beareth Argent, a **Shapournetted Reversed**. Azure. (Some term it, a **Chiefe Shapourned**; and a Shapournett in Chief Reversed; because the place assigned for the Shapournett is ever in the Base point of the Escuchion.) In Base three Piles waved Reversed, or Transposed, Gules. The *French* calls this three **Piles Flame** ing. Born by the name of *Wychebell*.

B three Piles Waved Transposed in Bend O Born by *Hof.r.*

O Five Piles in Base Waved and Reversed by *Fingerling*.

II. He beareth Sable, a **Fesse** and three **Pales** in Base, one joynted to the **Sinister** side Argent. Counter-flory on the top Or. Others thus, per Fesse Sable, and Paly of six of the same, and Argent: with a Fesse

Conjoynted, of the second, Flory on the top Or. See this otherwise Blazoned. *chap. 8 numb. 115.* This Coate is Born by name of *Van-Rern*. And is best Blazoned thus, a **Chief removed Flory**, on the top, and **Pally** of six conjoynted.

Chap. 3. Numb. 82.

III. He beareth Or, a **Pale Fracted**, (or removed) and overlaid Gules. Others term it a broken Pale conjoynted. Some a Pale Couped in Fesse, Conjoynted to the like issuant from Base: or else conjoynted on the **Sinister** side to the like issuant &c. By the name of *Van Zirn*. Also G the like A by *Van Zirn*.

IV. He beareth Argent, two **Pales Fitched** on the top, Gules. By the name of *Droughda*.

B three such Pales A By the name of *Enhaut*.

V. Vert, a **Pale Raguled**, and **Razed** on the top which two leaves Pendant Or. Others Blazon it a **Lime** or **Stock**, or **Trunke** of a Tree, **Ragguled** fired in Base, and ragged on the top &c. By the name of *Scomen*.

A die

A the like proper. Born by *Van Stockhausen*.

S the like trunked on the top, and irradiated (or mooted up by the root) on each side a Leaf and an Acorn pendant O by the name of *Eychler*.

Chap. 3. Numb. 91.

VI. He beareth Argent, a **Pile Pomettee**, Vert. Some term it **triple Nowyed**; but Nowy never exceedeth more than one round upon an Ordinary, therefore more fitter to be Blazoned **Bottomy** or **Pomettee**, as the French do; or Pomelled. This is born by the name of *Dunstable*.

VII. He beareth Or, two **Piles Imbowed**, Fretting each other, Azure. Others say, two Piles issuing out of the Dexter and Sinister corners, **Imbowed and Fretted**. Born by the name of *Van Hoggey*.

VIII. He beareth party per **Fesse Flamant**, or **Rasie**, Gules and Or. The French term this Gules, three **Piles flaming**, Or: But it is more properly Blazoned, a **Partition per Fesse**. Born by the name of *de Rotterdam*.

IX. He beareth Azure, five **Piles couped and conjoined in Fesse**, Argent. Some term this a Fesse having five indents in the bottom; or five **Dentels** in the neither side. Others make it a partition per Fesse **indentifrey**, with a Chief of the second. By the name of *Heartside*.

G the like A born by *Vom Mistelbach* of *Barvaria*.

Per Fesse **indentilley** (or Indented per long, that is long indents) G and A born by *Franchen*.

X. He beareth Gules, two **demy Annulets**, fixed to the sides of the Escuchion Argent, each charged with three **Pellets**: There is diverse judgments passed in the Blazoning of this Coat; some term them demy Annulets; others **Cheveron Arches couchant**. Others **Flasques voided**; and such as hold that Flasques cannot be voided, Blazon them thus, Gules, two **Flanches Argent**, each charged with three **Bullets** and a **Flasque** (or **Voider**) of the first: Others two **Flanches Argent**, each charged with 3 **Pellets** and surmounted, with a **Flasque Gules**. This is born by the name of *Wascher*.

A the like Annulets G charged with Plates. Born by the name of *Pernheim*.

Chap. 4. Numb. 26.

XI. He beareth Or, a Bend Vert, **Flamant** on the sides proper. Some term it a **Bend on Fire**, or fired on the sides. By the name of *Prandner*.

XII. He beareth Argent, a **Line of a Tree in Bend**, with two **Roses stalked**, **counter-pendant**, Gules. By the name of *Drachler*.

Allo G the like A born by *Dillinger*.

XIII. He beareth Argent, a **Bend Archy**, with the higher side **flurty**, Sable. Born by *Van Elbenor*.

G the Bend Sinister Archy and Flory, A. By *Elben*.

G the Bend leaved on the higher side A **Quartered** by *Kisell*.

XIV. He beareth Gules on a Bend Argent, another

*

in point **Dauncette**, Azure. Some term it, **double Dauncette**. Born by *Van Lossnitz*.

XV. He beareth a Bend of a **Limb of a Tree**, (or a Limb of a Tree in Bend) **raguled and trunked**, with a **Leaf stalked and pendant** on each side of it, Vert, in a Field Argent: By the name of *Boode*.

A such a Tree Raguled and Trunked with three leaves on each side G. By the name of *Die Stangen*: Also by *Van Oberledel*. Also per Bend Sinister G and A: The like with 2 leaves B by *Seboten*.

G the like with 2 leaves A born by *Besse*.

XVI. He beareth Purple, a Bend, the **Indents Imbowed**, Or; a Bend hacked or hewed on the sides, or cut into the sides. By the name of *Larden* or *Larding*.

O the like Sinister ways G born by *Gundisingen*.

XVII. He beareth Argent, a Bend of the **Limb of a Tree**, with three Leaves growing on the upper side of it, Vert. By the name of *Martincroft*.

G the like O born by *Van Kolnitz*; and with 3 **Roses**, is born by *Van Annenberg*.

G on a Fesse B a Limb of a Tree trunked with three leaves on each side O is born by *Van Der Annus*.

XVIII. He beareth Or, a **Bend Barry** of six, Ermine and Vert. This is different from a Bend Gobbony, as you may see, comparing them together, chap. 4. numb. 42. that being streight over the Bend, according to its mounting; but this Beville-ways, striking off the Bend, as if the Barrs were to be drawn on the Escuchion, and so all the Barrs are to be made, let the Ordinary be as the Bearer pleaseth to set it.

Chap. 3. Numb. 68.

XIX. He beareth Argent, 6 **Losenges in Fesse**, surmounted of a **Cross Sable**: a **Shapournett** **shapourned**, Vert. This is more briefly Blazoned by others, on a double Shapournett, a **turn-Pike Gate**, or a **Turn-Style**. Born by the name of *Caldwell* or *Caldy*.

G the like A on a Shapournet O born by *Lamminger*.

XX. He beareth Or, five **Pales couped in Fesse**, **entrapped with Oliers**, Briers or Thorns, Ten. This was the old way of inclosing of Fields, Meadows, and Pasturing Land; and was anciently termed a **Nethering**, our Country-Men, if they were to describe this Coat, would say, it is five **Stakes** wound with **Netherings**, or **Windings**: From this I may fitly (and that by Art) give it this Blazon, 5 **Poles in Fesse Nethered**; some pronounce it **Addered**, and **Athered**, and **Addering**; others **Tathered** and **Tathering**: Such a Nethered or Fesse of windings, with a Lion passant in Chief, is the Coat of *Paungartner* of *Barvaria*, in *Germany*.

XXI. He beareth Argent, a **Wiure**, **Nebule**, **counter Nebule**, Sable. A **Wiure** is much less than either **Barrulett** or **Cotize**; being drawn only by the stroak of a **Pencil**, or full Pen, alter what sort of Line the Bearer pleaseth: This is by some termed a **Barrulett Nebule**, and others a **Viure Nebule**. Born by the name of *Wiure-draeger*.

A the like in Bend Sinister, belongs to the Coat of *Zer-perkinden*.

Per

Per Fesse O and A in Chief a Lion passant B and in Base the like Wiure B. Born by *Van Cladenbech*.

XXII. He beareth Or, the **Top of a Tower** or **Battlement extended** in Fesse, shewing its thickness Gules. By the name of *Peacock*.

S the like A born by *Van Lanternaw*, of *Switzerland*.

XXIII. He beareth Argent, a **Fesse Dauncett**, of two pieces, **couped in form of a Roman double W**: Azure. By the name of *Bany*, or *Bannie*. *Ferne*, p. 199. Blazons it a **Fesse Emanuchee couped**, which is the best term, seeing it consists only of 3 points like the double W. See *numb. 24.* and *chap. 7. numb. 74.* Yet others call it a Fesse Dauncett with one point on the top, and two under, couped; for when there is but one point above, there must needs be two under; for as this is the least in points, so it can be no otherwise drawn: So on the contrary, if two points be uppermost, then there can be but one at the bottom.

XXIV. He beareth party per Fesse Argent and Gules; two **Barrs Dauncett** in point of 2 pieces in form of a W; counterchanged and fixed: By the name of *Die Iljung*. This ought rather to be termed a Fesse Dauncett of two pieces or points reversed, as being contrary to those mentioned, *chap. 4. numb. 73.*

Per Fesse G and B the like A. Born by *Iljung*.

G the like with a Cross Pattee on the point A is the Bishoprick of *Raczenberg* Coat.

XXV. He beareth Or, two **Barrs Battelled counter-Battelled**, Gules. Born by the name of *Southerne*. This is the true way of Counter-Battelling, when one Battlement stands opposite to that against it.

XXVI. He beareth Argent, two **Barrs**, each with one **Imbattell** on the top, **counter-Battelled** with two in the bottom, Azure. By the name of *Nield*.

XXVII. He beareth Vert, a **Barrulett couped**, with one **Imbattell** at each end, **counter-Battelled**. Born by the name of *Darkeu*. Others call it a Fesse rectangled at both ends, and couped, the Dexter to the Base.

G two such Barrs A born by *Kol ever zu Hone*.

Chap. 4. Numb. 103.

XXVIII. He beareth Argent, an **Escochion Azure**, **florished** (or Flowred) with eight **Trefoils**, Vert. This is born by the name of *Scutfoile*.

Per Fesse A and B an Escochion flourished with 8 Staves Pomettee and Florytee. Born by *Hawjmaner*.

XXIX. He beareth Or, an **Escochion flurt**, Azure. By the name of *Leather*.

XXX. He beareth Argent, a **Triangle, pierced triangular**, each point **Pomitted and florished**, Sable. After the same manner you shall often find **Quadrants** thus **flowred**, as in these foregoing examples, by which you may easily give such their true terms in Blazoning. This is born by the name of *Trinelly*.

B the like A born by *Eberstein*.

B a Triangle with a Spur-Rowel of 6 points, at each cant or corner A born by *Gender*.

B a Triangle pierced, each point Bottency A by *Ulerford*.

*

Chap. 4. Numb. 107.

XXXI. He beareth Or, a **Chain** of eight **Links** in **Orle**, Sable. Born by the name of *de Zuniga*, Duke of *Vejar*: The *French* Blazon it, Argent, a Bend Sable, one Chain Or, (*compose de 8 Chain Links*) in form of an Orle.

XXXII. He beareth Gules 9 **Annuletts** linked to each other in **form of a Gyron** (or Gyron-wife) Or. This is by the *French* Blazoned no otherwise than he beareth *Navarre*, as being the Coat of that Kingdom: though others term it 8 Annuletts in Orle, linked to another in the Center, and each other Gyron-wife. This Chained Gyron, belongs to the Arms of the Kingdom of *Navarre*.

XXXIII. He beareth Gules, a **Gordian Knott**, Or else thus, a double Orle of Annuletts linked to each other, and all to another in the Center, Gyron-wife; or after the *French*, fol. 16. 69. the *Navarre* Knot, or the double Knott of *Navarre*, being so born for the Coat Armour of that Kingdom.

Chap. 5. Numb. 104.

XXXIV. He beareth Argent, two **Crosses Patriarchal Pattee**, conjoined and annulated in the middle of the bottoms, Sable. Some say in the middle of the bottom Cross. This is born by the name of *Flecken*. The same, with contrary colours; and Plates in the places of the Annuletts, is born by *Van Fleckenbult Gem Burgell*.

XXXV. He beareth Or, a **Cross Pomelled Molynne**, Gules. Others call it a Cross Pomettee Molined. Born by the name of *Virmont*. See *chap. 5. numb. 126.*

XXXVI. He beareth Sable, a **Cross Pattee Battant**, Argent. Some call it, a Cross Pattee Invecked; The *French* term it a **Cross Chelouse**, or **Toulouse**, from its round Circles at the ends; others a Cross Pomettee. Such a like Cross is in the Coat of *Lewis de Nogaret*, a *French* Family.

XXXVII. He beareth Argent, a **Cross conjoined** at each end, Azure. This is termed also a **Cross capital**; or a Cross headed after the **Custan Order**. Or a Cross Brick-axed, because the ends much resemble the Heads of Brick-axes, by which Brick-layers cut their Brick. See *lib. 3. cap. 3. numb. 44.*

XXXVIII. He beareth Or, a **Cross Pendall**, Sable, **garnished** in the center (or middle) with five Rubies: Some call it a **Cross Spindle**. Such a Cross as this I find stamped upon the Coin of King *Harold* the Second.

XXXIX. He beareth Argent, four **Roman V** in point Gules, fretted with an Annulett Sable. Others term it 4 V in Cross, fretted with a Ring. This is Stamped upon King *Edward* the Elders Coin.

XL. He beareth Argent, two **Pales Pattee couped**, surmounted of as many **Barrulets** of the same, in form of a Cross, Sable: Some term these two **Billetts**, **dehysed** with the like in Cross, others will have it to be a **Cross double parted Pattee**. Born by the name of *Parthy*, or *Bartly*.

N 2

XLI. He

XLI. He beareth Gules, a **Cross flamed**, or **flamant**, Or: Born by the name of *Firecross*.

This is also termed a **Cross Raisie**, or **Rayed**, because the Points issuing from the Cross represent the Rays of the Sun.

XLII. He beareth Argent, a **Cross Patriarchal** with a **Lambeaur** on the Dexter side, Gules: If it had not been wanting on the Sinister part in the foot, it should have been termed a **Cross Lambeaur**, as in *chap. 5. numb. 104.* though some do term it so, only add (the rebating on the Sinister end:) This is born by the name of *Norcote*.

B the like A born by *Tschetschke*, of *Siletia*.

XLIII. He beareth Vert, a **Cross Patriarchal** **Patee**, and **Flory** in the foot, Or. By the name of *Dunpatrick*. Also per **Pale B** and **A** such a **Cross G** supported by two **Lions rampant**, **Barry** of **10 O** and **A** **Crowned**, is the *States Coat* of *Hirschfeld* in *Germany*, for so they write it in their Language.

XLIV. He beareth Or, a **Cross Patee fixed** (or **entyre**), at each end a **Label issuant** Argent, from the Center four **Flowers de lis** Azure, an **Escuchion** (or **Inescuchion**) **Sable**: If the Field and Label were of the same Colour or Mettle, then some Authors have termed it, a **Cross demy fannelled**, as being half sawed through: Others a **Cross Notched**; and a **Cross Patee escartel**ed at each end, as having a square piece cut out of it: And again, others will have this Cross fixed, to be charged at each end with a **Canton** in the middle; but I hold them more proper to be termed **Lambeauxes**. This Coat is born by the name of *Barbach*.

Chap. 6. Numb. 11.

XLV. He beareth Argent, four **Cheverons**, the first and third engraied on the lower sides, Gules. By the name of *Darmalerg*.

G two **Cheverons B** invecked on the higher sides, and edged Argent. By the name of *Asten*.

XLVI. He beareth Argent, a **Cheveron In point**, **Imbowed**, Gules, on each side of the top three **Laurel Leaves**, Vert. See *chap. 6. numb. 34.* This is born by the name of *Die Schutzener*.

S the like **Cheveron** and **Leaves O** by *Van Tranbach*.

XLVII. He beareth party per **Pale**, Argent and Gules, two **Cheverons reversed**, counterchanged. By the name of *Von Lerch*.

XLVIII. He beareth Azure, a **Cheveron Potent**, counter-Potent; in Base, a **Pale coup**ed at the top Argent: This may be fitly termed a **Cheveron Gady**; by reason it ascendeth by degrees, being contrary to **Crenell** or **Imbattleing**: See *chap. 6. numb. 15.* This is born by the name of *Stainkircher*.

O Such a **Cheveron G** with a **Demy-Lion** on the top of it, is the *Coat-Armour* of *Rugen*.

G such a **Cheveron A** and a **Label** of 5 points O born by *Healy*.

XLIX. He beareth party per **Cheveron**, Gules and Azure, on a **Cheveron** Argent, a **Chain flier** and re-

fliered, **Sable**. The *French* call this a **Chaplett** or a **Bracelet**, a **String of Beads**. This is born by *Alonzo Diego Lopez de Mirandole*.

L. He beareth Or, a **Cheveron** Azure, charged with a **Fesse**, Argent: The **Fesse** is supposed to be all of one piece, though the bottom part of the **Cheveron** do separate it; neither can it fitly be termed any thing else; for it must run streight; according to the lines of the Ordinary; yet some term the **Cheveron** charged with 2 **Squares** or **Quadrants**; and that in my Judgment is the most proper term; or else those **Blazoning**, mentioned, *numb. 18.* and *chap. 8. numb. 62.* are not right. This is born by the name of *Merkenby*.

Chap. 6. Numb. 57.

LI. He beareth Argent, three **Darts**, Sans **Feathers** in **Fesse**, issuing out of Base, **Sable**; **Pheons** or **Heads** Azure, surmounted of two **Barrulets**, coup^d Gules. Born by the name of *Yatell*.

LII. He beareth Or, three **Pales coup**ed, debased with four **Barrulets** of the same, **Sable**. This is termed a **Latice**, see *chap. 7. numb. 12.* but most proper a **Portcullice disarmed** and **dismembred**, or **disjointed**, by reason it is pulled to pieces and destroyed, only the middle part remaining; it is torn by *Rejler*.

LIII. He beareth Azure, a **Pale**, between two other coup^d; all fitted in the bottom Argent; debased with two **Barrulets** Or; **Nailed** **Sable**. This is born by the name of *Barcade*.

A the like G **Armed** in the fitted parts with **sockets** or **Hoops** and **Spikes** B. Born by *Die Schwartzkopf*.

Chap. 6. Numb. 84.

LIV. He beareth Argent, a **Losenge Diaper**ed, (or adorned with a **Branched Border** and **Flowers**) Azure. Born by the name of *Sandelance*.

LV. He beareth Or, eight **Losenges conjoined** in form of a **Cross**, viz. two, four, and two Vert. By the name of *Holton*. The like A in a Field G is born by *Van Grafeneck*. Also by *Blanckensteiner*.

LVI. He beareth Purple, a **Mascle**, each corner **Bottom**ed, Argent. By the name of *Van Wallendert*.

A a **Quadrant quarter pierced**, the points **Flurt** G. Born by the Family of *Quaternall*.

Chap. 7. Numb. 20.

LVII. He beareth Argent, two points dexter and sinister **Imbowed** Gules, and a point **Escartel**led Azure; or two points dexter and sinister **shapoured** or **convered**, &c. Born by the name of *Gaskellinger*.

Per **Fesse** **Escartall**ed A and G is born by *Dacham*. And A and B with a **Vine Leaf**, is *Geymanners* **Ccat**.

LVIII. He beareth **Pily** of four pieces **traverse**, Argent and Gules. Others term it **Bendy Barwise**. See more *chap. 7. numb. 98.* This is born by the name of *Van Krechmar*. Also by *Van Greyff*.

LIX. He beareth Vert, a **Pile**, and two demy ones

unmowed or flanché, and fixed to the sides Argent, each charged in Chief with a **Corteaure**. This is also Blazoned, **Pily of Five**, or two **Piles reversed Vert**, in a Field Argent, &c. Born by the name of *Borlach*.

The like B and O three annulets in Chief, and two in base counterchanged. By the name of *Die Schutzen*.

LX. He beareth Argent, a **Pile in point Imbowed Bendwise**, pierced **Loſengeways**, Azure. Some term this a **point in point** reversed, and in Bend, &c. This is born by the name of *Thurnell*. And such a Pile or Point reversed Bendwise Sinister, is quartered by the Earl of *Wiltzer*, *Van Spiegelſeldt* in Germany.

LXI. He beareth Or, a **Pile in Bend**, Sable, having three Laurel leaves on each side Vert, **ſurmounted**, (or charged) with another Gules. Born by the name of *Diplich*.

A Cheveron thus adorned with 6 leaves O in a Field S is born by *Schutzen Van Tranbach* in Alsatia.

LXII. He beareth Azure, a **Point pointed**, on the top a **Pomell pomelled**, Argent. Born by the name of *Hermanſdorf*. If the bottom Lines had come higher out of the sides of the Eſcochion, it ſhould then have been termed per Feſſe a point, &c. or per Baſe a point pointed, &c.

LXIII. He beareth Argent, a **point pointed reversed** **Bottomy** at the end Azure. By the name of *Hurſt*. G the like A born by *Die Feur van Au* of Bavaria.

LXIV. He beareth Or, a **point pointed** to the Chief, Vert, with the ſame **reversed** to the Baſe, counterchanged. Some will term it a **point pointed in point**, the ſame **reversed** counterchanged. By the name of *Boniſſall*.

LXV. He beareth party per Feſſe **point in point reversed**, Argent and Purpure; an Annulett Sable. By the name of *Gräſſwein*: Alſo by *Waldkirk*.

S the like point in point reversed, between two flowers de lis A, is born by *Pucher van Ringers*. And G the like A by *Van Curnegh*.

LXVI. He beareth quarterly Vert and Argent, a **point in point** Or. Some Blazon it **per Croſs in point**, ſee chap. 7. numb. 40. the French ſay per Pale, with the point parted into three Eſcochions. This is the Coat Armour of *Lalain*.

LXVII. He beareth Argent, a **point in point**, **flopy** on the top, Vert. Theſe kind of bearings are often made both Bend Dexter, and Sinister ways. This is born by the name of *Volsby*. And the Field G and point A by *Hofmairn*.

LXVIII. He beareth Or, a **point pointed**, Gules, **Pomelled** and **Flopy** on the top, Azure. Some term it **Pometee** and **Floriſhed** or **Floured** on the top. Born by *Van Hoyer*.

A the like G. Born by *Luterdit*.

B the like in Bend A by *Hollen*.

S the like in Bend Sinister O. Born by *Schroten*.

LXIX. He beareth party per Feſſe, Azure, **point in point**, **pometee** and **floriſhed**, Or, a Cinquefoil, Gules. It is very frequent with the Dutch Heralds thus to flouriſh and adorn the top of theſe ſaid Points, with variety of

Leaves and Flowers, and out of Crowns to have ſeveral things to proceed, as Feathers, Branches, &c. which the Ingenious may eaſily give them their terms in Blazoning, by theſe few examples. This is born by *Baben*.

A a point pointed, with a Crown on the top G, having three Roſes with Stalks iſſuing proper. By the name of *Van Dodge*.

LXX. He beareth party per Pale, **Barry** of ſix **contrary Urdee**, Argent and Gules. Some term it **Barry** of 6 Champion. Others per Pale **varriated point in point**. And per Pale crenelle points pointed. Others **Barry** of 6 Urdee at the ends, or **contrary champion** at the ſides. And others **Barry** (or Urdee) in point Barwiſe of ſix, See numb. 83. This is born by the name of *Durdirvalle*, or *De Urdevile*.

Per Feſſe O and B Urdee Paly, is born by *Negell* and by *Dormiſter*. See numb. 83.

LXXI. He beareth party per Pale, Vert and Argent, a **Pile ſitched** (or Urdee) in the top with a Crenell, or ragulee on each ſide, counterchanged. Some term it a **Pile raguled tranſpoſed**. This is born by the name of *Tanhouſener*. The like B and A is born by *Van Waldeburg*.

B and A per Pale, a Cheveron G. Such a Pale in Baſe counterchanged by the name of *Waldenburg*.

LXXII. He beareth party per Pale, the fiſt per Bend **Nuce**, (or **goared**) Vert and Argent and Gules. The French term this per Bend **Tranchee Nuage**, and **Bendy Arondie**. By the name of *Ratrice*. This ſhould be Blazoned, per Bend Nuce to the Dexter, to ſignifie the points are that way, elſe they may as well be ſet otherwiſe.

LXXIII. He beareth Azure, a Pale Argent, on a Bend three **Roundletts** all counterchanged. By the name of *Griſgault*.

LXXIV. He beareth **Barry** of four, Or and Gules, and per Pale counterchanged. Of ſome Barry of four, per Pale counterchanged O and G. Born by the name of *Copiar*.

LXXV. He beareth party per Feſſe, and per Pale in Chief, Argent, Vert, and Azure. Others beginning at the top part ſay, party per Pale A and O, and per Feſſe B. By the name of *Coteran*.

Per Pale A and G and per Feſſe B born by *Van Panwitz*.

Per Feſſe G and per Pale A and S. Born by *Girſdorf*, and *Van Parsberg*.

Per Feſſe G and per Pale B and A. By *Van Gerſdorf*, and *Van Corbitz*.

LXXVI. He beareth Argent, a **point** with one **Battlement**, and a **Loop-hole** therein, Sanguine; a Falcon with **Wings diſplayed** ſtanding thereon, proper. By the name of *Falwall*.

A the ſame B a Bird thereon G by *Andernach*.

S the ſame point A and Falcon O by *Hirſchvogell*.

LXXVII. He beareth Argent, a **Wall** with a **Battlement**, Gules, having a (Pendent or) Pennon fixed thereon, Azure, Staff Or. This Coat is quartered by the Family of *Van Waſſſpreeg*. Some will ſay, a Wall, Maſoned; but that term is underſtood by naming a Wall.

LXXVIII. He

LXXVIII. He beareth party per Bend Escartelle gr-
by Gules and Argent, **maſoned Sable**. Born by the
name of *V. n. Klammerſtein*. See chap. 7. numb. 23.

LXXIX. He beareth Or, a **point Sinister remo-
ned**, and extending it ſelf to the Dexter ſide, Gules: Two
Squires contrary coynd. This Coat I hold better bla-
zoned by reaſon of the charge of the Squires thus, party
per Bend, Gules and Or, two Squires counterchanged, a
Chief of the ſecond. By the name of *Haller*.

LXXX. He beareth Azure, two **Gusſets** Argent,
each parted per **Feſſe Baſie**, Or. The French term it
flamant or **flaming**, becauſe they reſemble the Rayes
of the Sun; as thus B. in Paul Cope; the Flances (or ſides)
flaming S and O. By the name of *Belifare*, Lieutenant
to the Emperour *Julianus*. *Da obilum Belifareo*.

LXXXI. He beareth party per pale, Azure and Argent,
a **Pile tranſpoſed or reverſed**, indented, counterchan-
ged. Such a Coat is quartered by *Die Greifsmot* in the Pa-
latinate of *Rhine*.

LXXXII. He beareth party per Feſſe, the chief part
Pily of eight. Argent and Vert, and Or, at the points
a Bay leaf fixed, of the ſecond. By the name of *Wald-
nergh*.

The ſame A and G, the leaves of the ſecond. Born by
the name of *Faulhaber*.

LXXXIII. He beareth party per Feſſe, **Barrey in
point**, Argent, and Gules, and Or, a **Shapournett**
(or **Mount** in Baſe) Azure. Some per Feſſe **Ardee in
point** *Pa'wiſe*, &c. See a mb. 7c. This belongs to the
Coat of *Nat el Van Diermſlein*.

Per Feſſe, the like Barry O and B: In the Baſe a Lion
paſſant: Born by the name of *Weſternof*.

LXXXIV. He beareth Argent, a Feſſe Azure, between
two **Piles triple pointed**, in form of a Cheveron Gules,
and a **Shapournett mounted**, Vert. Others to make
a long buſineſs of it, will Blazon it a Feſſe between two
triple Piles in Chief, one out of the dexter, the other out
of the ſiniſter ſide, Cheveron ways (or in Cheveron) and
a Shapournett Shapournett (or a Mount with a Hill up-
on it) in Baſe. The Dutch Heraulds make all their Hills
generally after this form; and of ſome are called a Sha-
pournett Crested. This is born by the name of *Luzen-
burgail*. A a Feſſe V. and two ſuch Piles G is born by
Kerdell.

LXXXV. He beareth party per Feſſe Gules and Argent,
on the firſt ſix **mounts ſurmounting** one another in
form of a **Shapournett**, Or; on the ſecond a **Pile** of
four points, iſſuing out of Baſe, Bendwiſe, Sable. Some
term this a Shapournett of **ſix pieces**. This is born by the
name of *Landsberg van Lerch*.

LXXXVI. He beareth Barry of four **Escalloped**, Ar-
gent and Gules. Some term the Barry **counterſcallop-
ed**, by reaſon they fall one contrary to the other, after
the manner of Scales upon Fiſh. Others term it Barry
Nuagee contra Nuagee, which we may English Barry
Clouded contra Clouded. See chap. 6. numb. 100. and
chap. 3. numb. 113. This Coat each **Scale Nailed**, Sable;
is born by the name of *Armourer*.

LXXXVII. He beareth party per Feſſe, Argent, a Sha-

pournett Shapournett (or a **Mount mounted**) Vert
and Azure, three **Piles reverſed**, (or **tranſpoſed**) Or.

If the Field was all of one Colour or Mettle, then you
muſt Blazon it a Shapournett Shapournett in Chief, and
3 Piles reverſed in Baſe. This Coat is born by the name
of *Hoberg Van Schenborn*.

LXXXVIII. He beareth Argent, ſix **Ogreſſes**, and
a Lion paſſant in Baſe, Gules; **Maſoned** between them
Sable: Otherwiſe Blazoned, Argent **Maſoned** in four
Diviſions Sable, between ſix Ogreſſes 3, 2, 1, and in
Baſe, a Lion paſſant, &c. The French Blazon it, A. **Ma-
ſonnee** of ſeven pieces S. charged with 6 Ogreſſes, and
a Lion of the ſame. By the name of *Ranlach*.

The ſame charged with 6 Martlets and a Creſſant S.
By *Marillac*.

LXXXIX. He beareth Or, a Croſs and Salter Gules
between 8 **Pellets**, a **Deſſe** (or **Quadrat**) Argent.
By the name of *Bletzen*.

S the like O an Ineſcochion B charged with a Bend,
A. By the name of *Van Rotenſtein*.

XC. He beareth party per Feſſe **Indented Bowed**,
Argent and Gules, each point **Pometee**, counterchanged.
By the name of *Pileram*.

The like Indented Bowed per Bend A and G by *Van
Mort*.

XCI. He beareth quarterly Argent and Or, the firſt,
a **Label iſſuing** out of Chief Azure, the ſecond and third
Bordered Gules; and the laſt a **Pale couped** on the
top (or a **Demy-Pale** iſſuing out of Baſe) of the third.
By the name of *Lauderheſſen*.

XCII. He beareth Argent, a **Feſſe**, **Canton**, and 2
Lambeaux iſſuing out of Chief, Azure, in Baſe a **De-
my-Border** (or a Border diminiſhed or determinate in
Feſſe) Gules. The French term theſe **Lambeaux** by the
name of **Pales recoursie**. By the name of *Littleg. od.*

G a Canton and two ſuch Lambeaux A. By *Hafner
Van Waſelheim*.

A 2 ſuch Lambeaux, and as many Barrs S. By *Ha-
merſtein*.

XCIII. He beareth party per Bend, Argent and Or;
three **Labells** iſſuing out of Chief **Pendant Bend-
ways** Azure: In Baſe a Bend Sinister Vert. Theſe La-
bells the French term, **Pales retracted**, as being one
ſhorter than the other, according to the parting of the
Field. Born by the name of *Gaskell*.

XCIV. He beareth Argent, a Feſſe Gules, three **La-
bells** iſſuing out of Chief, **Imbowed** Sable; in
Baſe three Pales **contrary poſed**, and **conjoined** and
fitched on the tops, and **Barred**, Vert; theſe repre-
ſent the Pales of a Garden or Court. This Coat is born
by the name of *Rivall*.

G 3 ſuch Labels O. Born by *De Liene*.

XCv. He beareth Argent, four **Cheverons** Gules, a
Pallet, Sable. If this were termed according to the Art
or Science of a Maſter Carpenter, he would ſay it is a
Standart ſupporting four Rafters (or the **Crown poſt**,
or **Kings-piece**, ſuſtaining four **Sleepers**) in Cheve-
ron. This is the Coat Armour of *Shermite*. See chap. 8.
numb. 119.

XCVI. He

XCVI. He beareth Argent, a **Fesse Azure**, between two **Barrulets Or**, **Indented on one side**, Gules, or Indented on the out-sides; or else two **Barrulets**, each having 3 **Dents** into the Field. By the name of *Affer*. But this is better Blazoned, by saying A 3 **Fusils** in Fesse G over all a Fesse B between 2 **Barrulets** O.

A 3 **Fusils** S the Fesse and **Barrulets** A born by *Onsorg*.

XCVII. He beareth **quarterly**, the first and last Argent, a **Pale Gules**; the second and third per Fesse **Ecartelle**; the one **Grady** of three, the other of two, Azure and Or. This is born by the name of *Pillar*.

Note, the **Ecartelle Grady**, if it exceed two heights or degrees, are to be numbered, as Grady of 3, 4, 5, and the like. Per Fesse **Ecartelle** of 2 degrees, G and A. By the name of *Profer*.

XCVIII. He beareth party per **Pale**, Or and Gules, and per Fesse Argent; a **point Indented**, Azure; a **Boivre**, Vert. Some term it per **Pale** in Chief, and per Fesse Indented in Base; but hereby they shew nothing how, or after what manner the partition is in the middle part. The French term it **coupe**, the first parted; and the second half per Chief, and Indented into 4 pieces, &c. By the name of *Gib van Fernough*.

XCIX. He beareth Argent, three **Bends** Gules; on a **Chief** of the first, two **Lions issuant combatant** or **assrontant**, Sable; in the neither part a **Fillet** Or, charged with an **Adder**, Azure. The French term the latter part of this Blazon, a **Chief supported** Or, with an **Adder** Azure. Such a Coat as this is born by *Paulus Savides*, Prince of *Albano*.

The like **Barry** of 6 A and G on a **Chief** A supported (or filleted) O a **Rose-branch** issuant. By the name of *Des Ursins*.

C He beareth Or, a **Lozenge in point**, (or extending it self to all sides of the Escuchion) Gules; charged with three **Barrs** Argent. The French Blazon this, Gules, a Fesse of three pieces Argent; **clad or slaved and shot**, Or. Others call them four **points** Or. See chap. 7. numb. 99. how it is otherwise Blazoned. This Coat is born by the name of *De Santepean*.

CI. He beareth party per Fesse, Argent, 3 **Pales**, Gules; and Azure, a **Canton**, Or. Some will say, per Fesse, the first A 3 **Pales** G. and second B a **Canton** O. Born by the name of *Renchell*.

G 3 **Mascles** A on the **Canton** A a **Lion rampant** S **Chief** O 3 **Pales** G. By the name of *Bergues*. In this Blazon is lodged 3 Coats, viz. the Chief, by *Malines*, **Canton** by *Brabant*, and the rest by *Bautersens*. Here the **Canton** gives place to the Chief, contrary to chap. 8. numb. 102. and therefore first named.

CII. He beareth party per **Salter**, the first and last, Or, four **Pales**, Gules; the others Azure, a **Castle** Argent. The French Blazon it quarterly in **Salter**, the Chief and Base Or, four **Pales** Gules; the two **Flanches** (or **Cotes**) Azure, a **Castle** Argent. Here is two Coats touched in this one Blazoning, yet all born by one name, as was the foregoing examples, viz. the **Pales** belong to the Kingdom of *Arragon*; and the **Castles** to the Kingdom of *Castile*, which is usually in short thus set forth, per **Salter** *Arragon*, and *Castile* counterposed.

CIII. He beareth **Gyrony Indented**, Or and Sable, a

*

Fesse Gules. Born by the name of *Crackleborne*. If the *Girony* did not meet all in the points, but made themselves into four, then they are termed S 4 **Gyrons**, O. which according to the making of them; shewed, chap. 3. numb. 105, 106. are to proceed from the four chief places of the Escuchion and to meet in Fesse.

CIV. He beareth Argent, six **long Stones** issuing out of Base, conjoined, surmounting one another in form of a **Pyramid** Azure. Some term them 3 **Stones** out of Base, 2 surmounting the 3, and 1 the 2. Born by the name of *Slingsstone*.

G the like A born by *Preisach*, that is the Town Coat of *Preisach*.

CV. He beareth Argent, a **Barr Gemelle conjoined**, Gules; between three **triple Pales Fitched and Barred**; two issuing out of Chief, the other in Base, Or. Born by the name of *Pallizar*.

B 3 **Flower de Lices** O between 3 such **triple Pales** A. By the name of *Van Arnsdorf*.

Chap. 8. Numb. 88.

CVI. He beareth Gules, a **Chevron** Argent, pierced with 2 **Darts Salterwise**, in Base, the **Phoenix** (or heads) in Chief. By the name of *Meyhsner*. Others Blazon it two **Darts** (or **Arrows**) in **Salter**, **points erected** and **piercing** of a **Chevron** debased on the neither side.

CVII. He beareth Argent, an **Arrow drawn in a Bow**, in Pale proper, the Head pierced into the middle of the Chief, Gules. By the name of *Schutzenbergh*.

CVIII. He beareth Gules, a **Sword in Bend** proper, piercing a **Shield**, Or, the end debased by a **point dexter**, Argent. By the name of *Scuten persen*, or *Scutenpersen*.

G the same (without the point Dexter) born by *Heldten*.

CIX. He beareth party per Pale, Argent, two **Barrs** and a **Fesse Vert**. This is one entire Coat, though it seems to be two Impaled, and is born by the name of *Barface Vom Gomarch*. Yet divide the same, and the Fesse is born by *Greenrag*, and the Barrs by *Futerer*.

CX. He beareth Gules, a **point pointed**, and a **Chief** with 2 **Imbattlements**, Argent. Or a **Chief** with 2 **Crenells**. This is born by the name of *Stebile*.

Chap. 7. Numb. 116

CXI. He beareth **Lozenge** Argent and Gules, each Mettle, charged with two **Barrs** Sable. else say A **Lozenge**, G. each other **Barred** (or a **Bar Gemelle**) S. By the name of *Seringarve*.

Parted per three Fesse-wise, Bend-wise, and Bend-Sinister, all counterchanged the one from the other O and B by the name of *Rorbach*.

CXII. He beareth **Barry** of four, Or and Azure, parted per **Stett** counterchanged. This is also termed **Barry** of four **point in point** indented counterchanged; but there is a difference between this and that mentioned, chap. 7. numb. 115. By the name of *Kettich*.

CXIII. He

CXIII. He beareth Argent, on a Mount in Base Vert, five **Pop-pies** fired in Fesse, Or. By the name of *Mountcheval*. S on a Snowy Mount in Base 6 **Staves** or **Poles** fired in Fesse A. Born by *Monsterberg*.

CXIV. He beareth **per Pale and Salter** Or and Gules; three **Flaies** (or **Cyrenhalls** in Triangle, after the form of a Y, the **Swafes** pendant, Sable. By the name of *Huebadman*.

Party per Pale A and B and per Chevron G three such Flaies in Triangle O. Born by *Ungeraten*. See numb. 116.

CXV. He beareth Argent, three **Shapernes** in Pale, Sable, called **Chaperons**, **Chapourns** and **Shapournetts**, from the resemblance they have to Hoods or Head Attires after the old Fashion. This Coat is born by the name of *Adeleresen van Heym*.

A 3 such Chaperons, Gules, edged on the tops, O. Born by the name of *Kramberg*. See lib. 3. chap. 13. n^o 120.

CXVI. He beareth party per pale and point, Sable Gules and Azure, in Fesse (or per Fesse) counterchanged; three **Shapournetts mounted** (or **cristed**) **removed**, Argent. They are here termed removed, or cut from their situation, which is ever at the bottom line of either Field or Ordinary on which they are born, as numb. 83, 84, 87. Otherwise this is blazoned by some, quarterly Sable and Gules, a point in point Azure, three **Hoods** Argent. By the name of *Van Howellshall*.

A on a Bend G 3 such Hoods O. Born by *Van Howelt* of Saxony.

There are Coats that have another round above the top of these two, as if they were three, one above and

less than another, as *Schwartzberg* beareth A a triple Hood or Shaperon S.

CXVII. He beareth party per Fesse, **counter Pomettee** of three, Azure and Argent, chap. 7. numb. 26, 28. of others **per Fesse Nebulee** of three, &c. This is born by the name of *Bourgongne*. After this manner partitions of Fields are made with Leaves, Flowers de lis, Roses, and such like set contrary and counterchanged.

CXVIII. He beareth **Masculy Bendy** of four, Argent and Gules; others do term it **Masculy**, A and G. 3 **Bendlets** (or costs) of the same (or of the second) signifying, that as the Ordinary lieth either streight or Bendwise, so the Masculus ly answerable thereunto; else of right their points are direct upright, as you may see chap. 7. numb. 116. This is born by the name of *Brandt* or *Brandtlib*.

CXIX. He beareth Azure, a Pale, and two **Squires** Argent; a Chief of the first. Some do term it a Pale between two Squires, (or two **Squires** from Chief to the Base) others Blazon them two **Points Dexter and Sinister**; or two **squires in point**, because they extend from point. This is born by the name of *Squiroake*.

CXX. He beareth **parted per fesse**, Argent and Gules; two **Piles reversed in point**; out of the Dexter and Sinister Base, of the first; these two Coats do something resemble each other; and yet by their Blazon, they are of contrary natures and kinds. This is born by the name of *Tidnock*.

Per Fesse B and A in Chief, a Lion passant, and in base two Piles reversed counterchanged. By the name of *Fra-ventrant*.

Gentlemen:*

R. H. Wisbeth a continuance of health, in all Prosperity, and Happyness, with a further increase of Honour; Who in perpetual memory of your worths, doth Dedicate this last Chapter of his first Book of Herauldry to you, who doubts not of your ready acceptance: seeing you have been ever Forward to Promote the Interest of the Author thereof; who for his many Favours received at your hands, obligeth him to subscribe himself, your most devoted Freind and Servant to the Death.

C H A P. X.

HAVING finished the the content of the last chapter, it was my thoughts to have finished my first Book of Armory, consisting of Ordinaries, with their severall Division, Subdivisions, and Tinctures of Field made by and through Lines: But by the Assistance of my good Friend, and fellow Labourer in matters of Armory (Mr. *Silvanus Morgan* of London Armes Painter) I obtained some Books wherein upon a Serious perusal, I found some certain Bearings, which I did not formerly take notice off, which though they be born after their due time, yet I hope may be Serviceable to the Instruction of others; Seeing they are such things as have not been mentioned by any of our *English* Authors.

And now I have done what my Poor endeavour, and my small Library can afford, yet in the end, I must conclude with that Latine Phrase; *Barnardus non visit omnia*, for there may be thousands of such Kinds, which neither I, nor mine, to the third, of fourth generation shall

ever come to see or know: for each Kingdom or Country hath some thing therein, which is born in their cognizance & tokens of honour, that is unknown to all but themselves; others in seeing thereof, being not able to Judge of them; what they either are, or signifie. Of such kind take these few Forreign examples.

I. He beareth Azure, from a Cheef *Nebule* or *Clouded Sable*, the *Sun Beams* or *Rayes*: Born by the name of *Hesper*. *Williams* terms it, the Sun resplendant *Rayes* ~~thereout~~ issuing. And *Morgan* saith out of a *Cloud* in *Chief Rayonnee*, proper. But according to this draught it may be more fitly Blazoned, a cloud in Chief with three *Flames* of Fire issuant. See lib. 2 chap. 1 numb. 60.

In a Field *Satur* out of a *Cloud* in Chief *Rayonnee*, a demy *Sinister Arm* extended in *Pale*, laying hold on the *Wrist* of an other: (extended in *Fesse Or*) issuant from

from the Dexter side Luna, with five demy flowers de lis bordering the edges of the Escuchion Sol, and in Base a Pomegranate Slipped and Leaved of the same. is the Coat Armour of the Colledge of Phisicians.

II. He beareth Or, a Bend Sinister, Gules, and a Bend (Dexter) Azure Born by *Bendall*. You may at the first view, take this to be a Salter, if they were both of one colour, which perhaps you may find jointly thus born.

Therefore in Coats of such Bearing, (if you use not the terms *Surmounting* or *Debasing*) you must carefully observe, which of them lyeth next to the Field, and name that first, and its colour, then the other after. And this rule holdeth not alone herein, but also in all other Coats of Arms formed of divers ordinaries, or charges, or both, one upon an other: whereof the one must necessarily lye nearer to the Field, then the other, as I have formerly given severall examples in chap. 8 number 26 to 35.

III. He beareth Gules, a Fesse Or, Imbrated on the Top, Sable. This was the Coate of *Sr. Aygli s*, one of the Knights of the round table in the time of King *Arthur of Britta n*. Some of our Ancient *Brittish* Blazoners, say circelled into, or on the top with Sable.

IV. He beareth Argent, a Fesse On-sett or double downsett Couped, Sable. Is born by *Van Sindorfe*. See this otherwise Blazoned, chap. 8 numb. 111. and chap. 4 numb. 84.

V. He beareth Argent, a Fesse Gradie, or with three Gyces on the higher side, Sable. Born by the name of *Hohenstein*, also by *Marquartstein* in the Province of *Bavaria*. See lib. 3 chap. 13 numb. 37.

VI. He beareth Azure, a Cheveron disjovnt or open in the head Or. By the name of *Brokmale*. See more of this chap. 6 numb. 30.

S the like between three Losenges A. Is born by *Storton*.

VII. He beareth Parted per Fesse, Sable and Argent, on the first (or in Chief) a point pointed (or in point) and on the second (or in Base) a Loseng Counterchanged. By the name of *Die Graeber*. The like Born by *Die Gruber Van Grub* of *Bavaria*. See the like kind of bearing numb. 69.

VIII. He beareth Argent, a Point dexter removed, extending to the Sinister side, Azure. By the name of *Westerather* a Dutch family. This is the *German* way of Blazoning it, but in my opinion it is better termed, parted per Bend Sinister, Azure and Argent a Chief of the second. See numb. 79.

The like B and O a Greyhound courant in bend, Sinister A coloured G a Chief O Born by *Van Grofsa*.

IX. He beareth Gules, a point dexter removed, in Chief Argent. By the name of *Eysersken*. Else Blazon it, per Fesse, and per Bend in the Chief, G and A. But some are of the Judgment, to which I rather incline, that these two last bearings are more properly termed Gyrons or Squires, in regard one of the sides rune straight and the other Beville, as they generally do: if so, then Blazon them thus, a Gyron, or Squire in Chief,

transverse in point to the Sinister Fesse. Others affirm that a Gyron cannot extend further then the middle of the Fesse point, and therefore it ought chiefly to be named a Squire.

X. He beareth Gules a point Sinister removed, & extending it self to the Dexter Fesse point, Argent: charged with the like Azure. By the name of *Sallerburg*, also by *Beurl* of *Switzerland* in *Germany*. Else blazon it a Squire Sinister transverse in point to the dexter side, terminated in Fesse, Surmounted of an other &c.

XI. He beareth Quarterly Azure and Argent (in the first and last) a Squire Or. By the name of *Van Kunreicht* of *Bavaria*. See chap. 7 numb. 75 and 6 33. These are of some termed Joyners Squares fixed to the dexter side and Base, if two be in a Field, or Quarter, they are ever set endorfed, for the cannot be both on a side.

XII. He beareth parted per Pale, Gules and Argent a Fesse Vert. Born by the Family of *Van Sintzendorf* in *Bavaria*. Here I name not the Fesse to be on the Sinister side, because being a colour, it could be no where else then on the mettles part.

Per Pale A and G a Fesse of the first. is born by *Van Messenbach*.

XIII. He beareth parted per Pale Gules, and Bendy of four Argent, and Azure. Born by the name of *Cammer*. Some Blazon it thus, per Pale Gules, and per Bend A and B a Bend Counterchanged.

XIV. He beareth party per Bend, Argent and Sable, a Bend of the first. By the name of *Romer zu Marofch*.

XV. He beareth party per Fesse Argent and Gules, and per Pale Azure. By the name of *Florimer* of *Bavaria*. Here you see the dexter side partition, which is per Fesse, runs through the Field, till it meets with an opposition, which is per Pale where it stops, not exceeding that limit, which if it did, would not be either per Fesse or per Pale, but Quarterly. See chap. 7 numb. 42 and chap. 9 numb. 7.

XVI. He beareth party per Pale, Argent and Gules, a Bend Sinister by the same, (or counterchanged) Or & Azure. By the name of *Eberhart*. This I set down as a president, that a Bend or Fesse or the like; may &c is often divided according to the partition of the Field, yet counterchanged with contrary colours.

Per Pale O and B a Fesse of the same division G and A is born by *Dicason*.

XVII. He beareth party per Fesse, a Pale counterchanged. By the name of *Van Halleg*.

The same G and A is Born by *Lavider*.

The like B and O three Buckles of the second. By the name of *Spalding*.

XVIII. He beareth parted per Fesse, and three Pale conjoyned, Azure and Argent. By the name of *Van Rein* of *Frankford* in the *Low Countries*. Thus the Dutch and Germans, often bear their Coats composed of Fesses & Pales conjoyned, Barrs & Cantons, & Chiefs and Pales &c. Making no division Line between them, which kind of Coats are very rarely used by us of this

Kingdome, for we generally make a division Score between such ordinaries

XIX. He beareth party **per Pale** Azure, and **per Pale** Gules and Argent. By the name of *Ratibor*. This may also be Blazoned **per Pale** B and G a side A.

XX. He beareth parted **per Fesse Battled counter Imbattled**, Gules and Argent. By the name of *Van Ega*. Thus partitions are not made only with a Single Battlement, but with one Battlement upon the top of another, to two or three height: which some terme counter Battelled of two or three Grieces, degree, or heads. **Per Bend** Sinister the like O and G is born by *Drosten*.

XXI. He beareth **Barry** of six, Argent and the Gules **Imbattled on the top**. By the name of *Dopelstein* of *Alfalia*. Some say Argent and Battled on the Higher side Gules. Other, triparted, each **per Fesse Imbattled** A & G.

XXII. He beareth parted **per Fesse**, Argent and Gules, a **Barr Engrailed** each point **Flory & pomety** interposed on the top, & **inbecked** in the bottom, Sable: and a **Barrulett**, Or. By the name of *Sigelmann*. This Barr ought, and generally doth not exceed five intire Engrailed points, whereof three are Flory, and the two between Pomety: and the Inveck to answer the points of the Engrale. See *chap. 4. numb. 76*.

XXIII. He beareth **Cheveronny** of eight **reversed**, Argent, and Gules. By the name of *Wincher*. Either Cheverons themselves, or Cheverony to six, eight, or ten, are much born by the Gentry of the *Netherlands*. Cheverony of four reversed A and G is born by *Van Witsleben*.

XXIV. He beareth Gules, two **Cheverons** Azure, **edged** having the top part **Engrailed** in the inner side, Argent. Born by the name of *Alten* a German Family. This may also be Blazoned, Gules two Cheverons Argent, each **Surmounted** of another **inbecked** on the top Azure. See *chap. 6 numb. 7*. If these four **edgings** were four **Cheveronells** and all the rest of the Field of one colour, then you may term them four Cheverons, or Cheveronells, the first and third Engrailed on the lower, or nether side Argent, in a Field Gules, which is born by the name of *Stelfoxe*.

B four Cheverons, the first and third Engrailed on the top O the other A Born by the name of *Innocent*.

XXV. He beareth Argent, a **Pile** of five points **issuant** from the **Sinister Chief Bendwise**, Gules. Born by the name of *Van Rainsbrune*. Piles of this nature are often born with 2 3 4 and 5 points seldom exceeding that, and are set severall wayes, having also the points adorned, with variety of Flowers, Leaves Stars &c. See *chap. 3 numb. 94* and *9 numb. 84 85*. Sometime the points are born Imbowed as *chap. 7 numb. 31 32*.

XXVI. He beareth Azure, a **Square**, or **Squire**, or point removed, or **Quarter pointed**, (by all which I have seen it termed) **extending from dexter Chief to the Base**, and terminated in the Fesse point Or. Is born by the name of *Dier*. This is just the fourth part of the partition of a Salter, and may fitly be termed a Quarter **per Salter**, as the quarter is from the quarterly partition.

G the like A charged with a Rose. Is born by *Volcker* of *Frankesford*,

XXVII. He beareth Azure, a **Fesse Indented** **per Fesse in point** Argent and Gules, with a **Fillet** at the bottom Or. By the name of *Vom-moss*. This at the lower part of the Fesse, may be termed, either an Edging, a welt, or a Fillet.

XXVIII. He beareth Gules, a **Fesse Lozengie**, Argent and Azure, **Edged** Or. By the name of *Arvenell*. Some terme it a Fesse Argent edged or, charged with an other Lozengie.

XXIX. He beareth Or, a **Fesse Quarterly**, Azure and Gules, **Bordured Gobony**, Argent and the second. Such a Fesse as this, was Born by the Duke of *Somerset*, having the Armes of *France* and *England*, Quarterly thereon.

The like, with a Labell of three points G was born by the Lord *Harbert*.

XXX. He beareth Sable, a **Fesse** with three **Battlements** on the top, each having a **Square Loop Hole**, Or. Such a Fesse between ten Crosses is the Coat of *Winterbecher* of the *Rhine*.

G the like A **Masoned** having long Loop holes S Is born by *Wegensteten*.

XXXI. He beareth Argent, a **Fesse** and a **Barulett**, Vert. Born by the name of *Scharpsenstein*. Some say a **Barulett**, and a Fesse; others, a Fesse and a Cost at the higher side: or a Fesse with a **Barulett**, or **Closet**, above it. This hath the Barulett on the side, to make it a distinct bearing from one of the same name whose Coat is A. a Fesse between two Baruletts V.

XXXII. He beareth Argent, a **Fesse** between two **Barrs Gemell**, Gules, a **Bordure counterchanged**. By the name of *Priessperg*. In counterchangings of this nature, in several Coats, I have found the **Bordure**, to give place to several ordinaries, and yet is not diminished in its self.

G the like (Sans Bordure) A is born by *Pryers*.

A the same G by *Badelismere*.

XXXIII. He beareth **Barry** of four Argent and Azure, a **Fesse** Gules, between two **Barrs Battelled Counter-battelled**, **Counterchanged** of the Field. By the name of *Marmion*.

XXXIV. He beareth Azure, a **Fesse** with two **dents**, or **dentalls** at a distance, on the higher side, and counter-dented on the neither side, Or. Such a Fesse between nine Billets is born by *Gyncourt*.

XXXV. He beareth party **per Fesse**, Or, and Sable, a **Fesse On-sett**, or **double downsett** **Oraby**, Gules masoned, Sable. Is born by *Plottarch*.

XXXVI. He beareth Gules, a **Fesse**, the middle removed, or **debaused**, Argent. That is, slipped down, or broken from its place. See *chap. 6 numb. 28 29*. This between two Roses is born by *Brokrofe*.

XXXVII. He beareth Argent, a **Fesse patee**, Azure. See *chap. 4 numb. 27*. Such a Fesse charged with 3 Flowers de Lis Or. Is born by *Atwood*.

XXXVIII. He

AAAVIII. He beareth Gules, a **Fesse Wauey**, parted per Fesse, with the same, Argent, and Azure; two of the same, of the first. This between two Leopards Heads Or. Is the Coat of *Reynolds*. Some Blazon it, a Fesse Wauey, per Fesse, Argent and Barry of 3 4 or 5. Wauey Azure, and the first.

XXXIX. He beareth Quarterly, Azure and Gules, a Fesse Compony of the same, edged Argent. Is born by *Van Chistritz*.

XL. He beareth party per Fesse, Sable and Argent, a Fesse changed, or interchanged, or counterchanged, Or, And the first, by the name of *Sibb*. Here is an example of an ordinary, which is counterchanged of the Field, yet not of the colours of the Field.

XLI. He beareth Argent, a Fesse parted in point, with two **Dentails**, Azure and the first, edged Or. By the name of *Van Marssach*.

O the like (Sans edge) A B is born by *Mansbofer* of *Bravaria*, and *Van Heinsberg*.

XLII. He beareth party per Bend and Fesse, Or and Gules. By the name of *V. n Kaufman*. This kind of partition is by some termed, per Bend and Fesse Bendwise, because the lines are all Bendy, though they terminate in the Fesse. But it is best Blazoned, per Fesse Beville Bendy, or Bendwise. See chap. 4 numb. 39 and 6 numb. 62.

XLIII. He beareth Argent four points pointed and Nowy, on the top, in Pale Argent, this Coat is Quartered by *Count Gravenneck*, in the Empire of *Germany*. Some of our Heralds, take them to be four **Barreys** in point, or per Long; to which I do adhere, by reason those Heralds do usually make their Barry with the points to the middle of the straight lines of those above them, as I shall shew by some few examples following numb. 44 45 46 whereas our Heralds, if they understand their Rules, draw them so, as the points of the Barry under, meet the points of them above. As you may see chap. 7 numb. 7 So that their Fields of Barry represent rather so many **Pales** or **Pally**, then a counterchanging.

XLIV. He beareth Argent, six **Barreys**, 3 2 1 Azure, a Chief Or. Born by the the name of *Greul Van Greulsser* of *Bavaria*. Here you have not the Field Vary, as Generally they are born all over, so also upon ordinaries: But by certain numbers, taking up only a part of the field, the head or point of the under, standing against the middle of the bottom score of that which is above it, and so of the rest under, according to their degrees in descent.

XLV. He beareth Argent, on a Bend Sable, five **Barreys**, Or. Born by *Phallay* or *Vallay* a *German* Family. Here the **Barreys** touch neither the top, bottom, or sides of the Bend, but are as an intire charge upon it, the pointed top answering the middle of the straight line of that above it.

XLVI. He beareth Azure, on a Bend Sinister, Argent, three **Barreys**, or Dutch hats, Gules. By the name of *Hunnevoeler* of *Alsatia*. These are to me no other then **Barreys**, only the score in the Headband

place, makes me also to judge of them to be Hats, let up on the crown of an other.

G one a Bend A the like B born by *Storn*.

G on a Pale A 6 such B Born by *De la Vanguyon* of *France*.

P on a Crofs A 9 such, all pointing to that in the center G Born by *Aymard*, Somtime Chancellor of *France*.

XLVII. He beareth Argent, three Bends, Gules, a Pale Sable, edged Or. Born by *Stillingberg*. The like Gules and Bends Argent, a Pale O. Is Born by *Marg-Burgam*.

XLVIII. He beareth Azure, a Bend per Bend Argent and Gules, **Cheverony** of six, counterchanged. Born by the name of *Van Greysneck*.

Here it is to be noted, that if the Bend, be charged with either **Salters**, **Crosses**, **Cheverons**, **Piles**, **Files**, or **Chiefs**, they must be set thereon, as if the Bend were turned into a Pale. But if the Bend be charged with **Barres**, **Pales**, a Fesse, or Chief they must be set on either Bend, or Cheveron, as if they were directly drawn upon the Field, notwithstanding the stopping of the said ordinaries; of which I have given examples before in chap. 6 numb. 110 111 & chap. 8 numb. 62 chap. 9 numb. 50 besides observe these 3 following.

XLIX. He beareth Or, a Bend parted per Bend, Argent and Gules, **Pally** of six counterchanged. By the name of *Van Sponheim*. Here you see the Pally is drawn perpendicular, or straight down right, notwithstanding the Bends lying Beville-wise, from corner to corner.

O the like Bend Sinister A and G with a Lyon Rampant to the same, on the Dexter side G is by *Bacharach*.

A Such a Bend Sinister O and G is Born by *Van Viernumdt*.

L. He beareth Or, a Bend party per Bend, Argent and Gules, Barry of six counterchanged. By the name of *Wolkenburgh*.

B three Flowers de lis O over all a Bend G charged with a Chief, and Daphine B. This is quartered By *Adolph de Bourgogne* Lord of *Burges* in *France*.

LI. He beareth Argent a **Cheveron** Gules, charged with four **Barrulets**, Or. Born by the name of *Hoe*. Here though the opening of the Cheveron below, seems to make the two bottom Barres into four, yet for all their dividing, they are still in Blazoning but two, seeing they stand one opposit to the other.

B on a Cheveron A three Barres waved G between three Lyons passant of the second. Born by *Ruse*.

LII. He beareth Gules, a Bend Lozengy Argent, and **Beazantie** enterposed. Born by the name of *du Dr. L*. Some will Blazon it, **Lozengs** and **Beazants** one after another conjoyned, for the making of a Bend, or in Bend.

A such a Bend of Lozenges and Roses alternately disposed G is born by *Van Alten* of *Brunswick*.

LIII. He beareth Gules, a Bend Sinister Dauncett, Gobony, Argent and Azure. Born by the name of *Van Ban*. Others will term it dauncett of so many points or pieces: now in the drawing of such kind of lined ordinaries, you must be sure to make the points of the lower to answer the higher, and the division of it to run cross

cross the Bend from point to point, else it is not rightly made. The German Heraulds though they make this kind of Bend or Fesse, but of one colour, yet they will draw lines over it after this manner.

G such a Bend Sinister A between two Lions rampant to that side O is born by *Edlibachen*.

G the like, between two Lions rampant to the Sinister O is Born by *Van Diebach*.

LIV. He beareth Argent, a **Bend Dauncett**, Sable, **Cotized** with the like Gules. Born by the name of *Kendall*. If the Bend and Cotizes be composed of one and the same sort of Line, whither Waved, or Dauncett, (for they are the principle concerned herein) you must be sure in the composing of them, to make the points to answer one the other else it will look with a deformed aspect. This is a thing some Painters little observe, for so it go in and out, (Like *Hob* and *John*) it matters not how the Angles are Scituated, it serves them, & those for whom it is made.

LV. He beareth Or, three **Bend Gules**, one a Chief Sable, **Supported** with an other **Ermine**, as many **Flour de Lices**, Argent. By the name of *Norman*. Some term this a Chief with a Fillet on the neither side. See *chap. 3 numb. 43*.

LVI. He beareth Argent, a **Mure nebulee** between 2 **Cotizes**, Gules. Is born by the name of *Chelrey*. Some term this a Barulet Nebulee, other a Wyer flexed and reflexed several times. See *chap. 9 numb. 21 49*.

LVII. He beareth Gules, a **point in point**, or a **point pointed** to the Chief Argent, on the **dexter side**, a **Beazant**, and on the **Sinister**, over all a **Bend Sinister** changed by the Field and **charge**, of the second and Sable. Born by the name of *Mayheir*. Some will blazon it a point pointed extending from the Base to the Chief, between a Beazant, and a Bend Sinister Counterchanged of the Field or charge.

G such a point A on the dexter side issuing out from the Base thereof, an Elephant Snout flexed and reflexed B flory on the out part O. on the Sinister, a Swans foot Couped in the thigh, extending to the Base of the Escuchion, and counter coloured according to its position of the second, and S. Isborn by the name of *Freher*. When a thing is thus set over the Field, and charg it is by the best Artificers term a Swans leg (or what else it is) Jeslants. See *lib. 2 chap. 7 numb. 26*.

LVIII. He beareth Gules, a **Bend edged and Ingraled**, Or. By the name of *Landgarn*.

Here is an example of a Bend, that hath three parts, first the Bend it self, then the edging which is made by drawing of an other score on each side, and lastly an Ingralcing from it, as if it were an other edging under all, yet all but of one colour or mettle, only distinguished by the strokes of a Pen or Pencill. This may also be Blazoned, a Bend Ingraled, Surmounted of an other, & charged with the same, all Or.

G the like O between six coronetts, the circles reversed, or turned to the Bend O. is Born by the name of *Elfas* of *Bavaria*.

LIX. He beareth Argent, a **Bend Gules**, **Masculled** and **Edged**, Or. Born by the name of *Rodeslein*. Some

times the Bend Masculled and edged, have the Field colour seen through the Masculles, then it is termed only a Bend Masculled and edged; which edge make it an even Bend, else it would stand out in corners. See *chap. 7 numb. 116* and *chap. 9 numb. 118*.

LX. He beareth quarterly Gules, and Or, a **Fesse** of the same, and a **Bordure counterchanged** of the Field: Born by the name of *Andomius* Chancellor of *France*, Archbishop of *Rouen* and Abbot of *Rebez*.

LXI. He beareth Gules, a **Bordure Or**, and a **Pale Argent**. Born by the name of *Lantern*: and is the City or States Armes so called, in *Almane*. Here the Bordure contrary to its usuall way, doth give place to the Pale, as being over, or upon it; the like is done by a cross as you may see in the next example.

LXII. He beareth Vert, a **Bordure Engraled** Argent, a **Cross over all**, Or. Born by the name of *Luell*. The like I find Born by *Phillip* Prince of *Savoy* and Count of *Genevrey*: viz. G a Bordure O and cross A.

LXIII. He beareth Argent, four **Barrs Azure**, a **Bordure rebated** or **cut off** in the **Chief**, compony, Or and Gules. By the name of *Choller*. In this the Bordure gives place to no ordinary, but is diminished in the chief by the plaine Field.

A three Barrs G such a Bordure Compony counterchanged. Is born by *Tangel*.

LXIV. He beareth **Quarterly** and **per Salter**, Sable and Gules, a **Cross counterchanged** **Ermine** and the First. By the name of *Denbreen*. If the field were of one colour, then the Cross would be termed Quarterly Quartered, as in *chap. 6 numb. 44* and *chap. 5 numb. 57*.

LXV. He beareth **Quarterly** Gules and Argent, four **Crosses counterchanged**. By the name of *Standing*. The like bearing to this is. **Ruby** and **Topaz Quarterly**, four Crosses counterchanged. Is born by the Lord *Caryll*, a Peer or noble man in the Kingdom of *Scotland*.

LXVI. He beareth **party per Pale** Gules and Argent, a **Fesse** and **Pale counterchanged**. By the name of *Van Reideburg*. Some will term this a Cross, but that it cannot be, by reason the Fesse part meeting with the Pale, is checked in its own colour, and receives an other from the Pale, and so again on the contrary side: which the Cross would not do, but by his counterchange would have one halfe from chief to Base of one entire colour, and the other side of the Cross of an other.

LXVII. He beareth Azure, a **Cross double voided**, Or. This Coat is quartered by the Honourable *Edward* Viscount *Conroy*, and is born (or taken to be) By the name of *Crevequer*. Some term this a Cross voided Sarcelled, or else Sarcelled resarcelled, that is double or twice Sawed afunder. See *chap. 5 numb. 10 11*.

LXVIII. He beareth Argent, a **Cross double parted**, (or four **Batynes in Cross**) each joyning, **Fretted**, **tyed** or **held** together with an **Annulett**, Or. Born by the name of *Tyrer*. See *chap. 5 num. 82 83* some of these kind of Cross are tyed together, with cords, or Rubins. A a Cross triple parted S. born by *St yrome* of old termed **Pale-Fesse-Sede**, that is a Pale and Fesse of three pieces fretted.

LXIX. He

LXX. He beareth Gules, 4 **Butunes**, or **Staves** fretted in **Cross**, each end **Casseled**, Or. Some say **Buttressed** and **Casseled**. This is born by the name of **Rash**. Sometimes in Coats you may find **Staves** thus born in **Cross** or **Salter** with the end **Flory**, or **Flurt**, or else adorned with **Flowers** and variety of **Leaves** and **Branches**.

Out of A **Coronet** such a **Cross Tasselled**, O. Is the **Crest** of **Printz** a **Dutch** Family.

LXX. He beareth Gules, a **Cross coupéd** **Flowy** **Quadrate**, Argent. Born by **Coppock**. In an old and Ancient M.S. Wherein Coats were drawn and Blazoned, I found this kind of **Cross** thus Blazoned. **Goblys**, 3 **crossys** **Récoppé**, **Gold**: on a **Chefe sylver**, an **Egyle** **splayd** **Sabyll**. And was born by **Kogas de Garbom**. Wherein I did also observe in other Coats that our old **Englishterms** were these.

Alert or **Synobylt** for **Vert**.
Purpel or **Purple** for **Purple**.
Sylver for **Argent**.
Dore or **Soyla** for **Or**.
Goblys or **Gawlys** for **Gules**.
Sabolt for **Sable**.
Azure or **Aseure** for **Azure**.
Armys for **Armes** or **Armour**.
Powdred for **Semy** or **Powdred**.
Armys **harnysht** f. **Armes** **Armed**.
Berder or **Bordwre** for **Bordure**.
Bezaunte of **Gold** for **Beazantie**.
Bende or **Bendys** for **Bends**.
Bottone for **Bottony**.
Bolt **hedys**, for **Bulls** heads.
Bouckys for **Bucks**.
Barly for **Barry**.
Colorys for **Colours**.
Counter **colorys**, or **Colerys**, for **Counterchanged**.
Chefe for **Chief**.
Crossys or **Crossys** for **Crosses**.
Cross **Crosseletys**, f. **cross** **Crosslets**.
Chefe **Entte** **Pyche**, for **point** **pointed** **reversed**.
Crosse **Pale** **sece** **Newe**, for **Tri-** **ble** **parted**, **Cross** **fretted**.
Corbyns for **Crows**.
Cheverond for **Chevron**.
Cheverond **daunce**, for **Fesse** **dancet**.
Cokke for **Cock**.
Chefe **Entty**, for **per** **Chevron**.
Cekko or **Cheche**, for **Chequie**.
Crown and **Cheymd**, for **Gorged** with a **Crown** and **Chaine**.
2 **Cheverons** for **parted** **per** **Cheveron**.
Combattand for **Assaulting** or **lifting** up any sort of **Armes**.
Dismembred for **Membred**.
Dessendante.
Ermyne for **Ermyne**.

Voyde for **Void**.
Wheat **Ears**.
Woydys for **four** **Quarters**.

LXXI. He beareth **Argent**, a **Cross coupéd**, **Fitch-** **ed** **per** **long**, **Gules**. By the name of **Pashall**. This is termed **Fitched** **per** **long**, when the part **Fitched**, exceed in length much more then the other parts of the **Cross**: and is generally used to the **Lines** of **division**, when in length they exceed their usuall proportion. As you may see **chap. 9** **numb. 970**.

A **3** such **S** a **Bordure** **G**. Is born by **Ch-senale**.

LXXII. He beareth **Gules**, a **Cross coupéd**, the head or top part **Fusill**, and the lower **Fitched**, **Argent**. By the name of **Wrycroys**. Other term this, a **Cross** **Loseng** in the head, **coupéd** in the stem, and **Fitched** in the fourth or bottom.

B an **Armed** **Armie**, **Flected**, in form of a **Roman** **V** between **3** such, one in **Chief**, and two in **Fale** **A**. And is born by **Kirch**.

LXXIII. He

LXXIII. He beareth Gules, a **Cross Molyne Inverted**, Or. By the name of *Mounsemys*. This Cross much resembles the Molyne, or Pomette; saving in this, the cut, or sawed ends, so turn themselves inward that they appear to be Escrowles rolled up. Some term it Molyne the ends roulled up.

LXXIV. He beareth Or, a **Cross Quarterly Quartered, coupé**, the ends **Sarcelled** and **reverted**, Gules. Born by the name of *Hofmart*. This is also like the Cross Molyne.

But here you must take notice, that if the turned down ends, were turned up again, it would then be no other then a Cross coupé, but the turning of the ends, maketh it resemble a Molyne, which it is much different from.

LXXV. He beareth Gules, a **Cross Potence, Pommeléd**, and **fitchéd** in the foot of the fourth, Argent. This is Born by the name of *Dildill*.

LXXVI. He beareth Sable, a **Cross coupé, parted**, each end **Flower de Lucy**, or adorned with the chief part of a **Flower de luce**, Argent. Born by the name *Harell*. Some take this to be a Cross potent Flurt, but I rather take the crossing of the ends, to belong to the Flower de lis, then to be any thing of the potent. As you may see *chap. 5 numb. 13 54 55*. Where the potent is far smaller then this, this having the full thickness of a Cross; and therefore may fitly be termed a Cross Flowered with de Luce.

Such a Cross and Semy de Billets A. Is born by Sir, *John Norrys of Gloucestershire* in time *E. 1*.

LXXVII. He beareth Argent, a **Cross potent**, the end **rounded**, Gules, **Surmounted** of a **Cross coupé** (or a plain Cross) Or. By the name of *Croschier*. This Cross is also born voided per Cross, that is the form of a Cross cut out of the middle of it, the out sides still remaining entire. Which some Artists term a Cross potent **recourfée** but that cannot properly be in this, because the potent ends are not voided, but only the middle cross part, and that which it is voided off, is only a plain or coupé Cross. See *chap. 5 numb. 5*.

G 3 such voided Crosses O a Chief varrey Er. and Ers. Is born by *Verney of Compton Mordack* in the County of *Warwick*.

LXXVIII. He beareth Gules, a **Cross Pometee voided**, Or. Born by the name of *Braunston*. The like to this I find born by the name of *Verney of Belton* in the county of *Rutland*. Viz. Gules 3 such Or, a chief Varrey. See more of Crosses voided *chap. 5 numb. 10 11*.

LXXIX. He beareth Sable, a **Cross patee Pometee**, Or; charged with another **Formy**. By the name of *Morjon*. This is also born voided per Cross Patee, viz. Gules three such Crosses Patee Pometee voided, or recourfée, Or; a Chief Varrey. Born by *Verney*.

LXXX. He beareth Argent, a **Cross Patee Molyne**, Azure. Born by the name of *Lannoy*. This Cross nearly resembles that mentioned *chap. 5 numb. 59*. But there is as much difference between them, as the Cross Patonce, & Cross Flory: for that is a Cross Patee double fitchéd of all four, yet the points turn not. but this of Patee Molyne hath the points turned half round like to the Molyne. *Chassanensis* in his *Gloria mundi* fol. 54 call this a Cross Nyle.

O the like G. Is born by the Count *de la Feuillade* in *France*.

LXXXI. He beareth Gules, a **Cross** of the **Capitals** of four **Pillars**, Argent, **Flurty** and a **Leopards head Jessant**, Or. By the name of *Van Harragdorf*. This is a Cross composed of 4 pillar Heads of the common order, having only 2 Rings or Swelling frizes. And the term Jessant, is used to shew that the charg born is both upon the ordinary and Field. as *lib. 2 chap. 7 numb. 26*.

Such a Cross O upon a Cross G. Is born by the *Arch-Duke of Austria*.

LXXXII. He beareth Sable, a **Cross triparted** and **fretted**, Argent. Born by the name of *Skylome*. This in old time was Blazoned **Une Croysse de Sylve Pale Fete Neve**.

LXXXIII. He beareth Gules, a **Cross** (or long Cross) with a **Semy Circle**, or **Fallow** of a **Wheel** conjoynd to the top of it, Argent. By the name of *Rycalle de Almayne*.

LXXXIV. He beareth Gules, a **Staffe** with **Molyn** ends **Bendwise**, **Surmounted** of an other in **Salter**, Argent. By the name of *Aurele*. This is like the Salter Molyne mentioned *chap. 6 numb. 49*. But it is much different from it.

G such a bearing between 4 de lis O. Is born by *Arborio* a Kt. of the order of *Savoy*.

LXXXV. He beareth Argent, a **Caterfoil** in **Salter**, V. Born by the name of *Utzangen*. This is also termed 4 leaves conjoynd in *Salter*.

LXXXVI. He beareth Argent, a **Cheveron reverted**, Gules, **Supported**, or **Sustained** by an other, Or. Is born by the name of *Redding*.

LXXXVII. He beareth Or, 3 **Cheveronells** Gules, a **Chief removed**, of three **pieces**, of the **second**. Born by the name of *Freemin de Cocherell*, a *French* Family.

LXXXVIII. He beareth Gules, a **Cheveron** Argent, **double fretted**, Sable. Born by *Strongberg*. This I term double Fretted, because it hath more rows then is needfull for an ordinary, which makes it so thick and strong that little of the Cheveron is seen. Such a like Cheveron Gules, double Fretted Or, in a Field parted pe Pale Indented Sable and Ermine. Is born by *Mackworth* of *Empingham* in the County of *Rutland*.

LXXXIX. He beareth Azure, a **Cheveron**, Or, **fretted**, Gules. By the name of *Feld*. This is the common and usuall way of Fretting this kind of ordinary, which as it bends both ways, the staves run along it and meet Salterwise, which in all other ordinaries, as Crosses, Chiefs, Bends, Fesses Barrs, &c. (except the Salter) it doth not, but only crosseth them.

XC. He beareth Vert, a **Cheveron** Gules, **Laticed** Sable, by the name of *Weyers*. This is of some termed **Percula-féd**: And is in all respects quite contrary to the **frettee**, for being on the Cheveron and Salter, the **Staves** or **Batunes** are drawn **Perpendicular**, and **Streight** over Cross. As the example: But on all other ordinaries, as Crosses

Crosses, Chiefs, Bends, Fesses, Bars, &c. The Staves, run a long the ordinaries (on which there is never less than two) which are again crossed at the like equal distance by lines or Staves over cross the ordinaries.

XCI. He beareth Argent, a **Cheveronell** with a **Mascie Head or Top**, (or the top **Fretted** over in the form of a **Mascie**) in **Base** a **Cross Pattee** Gules. This is in a Glafs Window in a Chappell, on the South side of the Chancell of **Okeham** in the County of **Rutland**. And is taken to be a Merchant Marke.

XCII. He beareth Argent, a **Pallet** and **Barraulet** conjoynd in **Chief**, and in **Base** a Roman **W** whole at the top, **Sable**. This I find to be a part of a Seal, as also to be in the Glafs Windows of the old Hall of the Hospitall of **Okeham** in **Rutland shire**, with this writting in a circle about it: *Will'mus Dal'y fundator istius Hospitalis*.

XCIII. He beareth Or, a **Cross Pattee** **Sarcelled** in the bottome, in form of a **A Reberied**. This is Born by the name of **Uppingham**.

XCIV. He beaeth **Party per Pale** on the first, or **Dexter side**, Or: per **Cheveron** in **Chief** **Azure**, a **Plate**: in **Base** a **Fesse Vert**. The **Sinister side** counter-opposite, counter-changed. By the name of *Hibisch*. The same Coate is born by *Nibisch*, by changing the **Plate** into a **Leopard head** with a **Ring** in his mouth. Some doe Blazon this, (not taking notice of the deviation of the Field) **Quarterly**; but it cannot be so termed, in regard the partition Scores per **Fesse** are not equally set, but one above, and the other below in each side, and that makes the **Fesse**, or **Barre**, to be one in **Chief**, the other in **Base**, which otherwise would be termed a **Fesse** and **Barre** without any other additions. Others Blazon it, per **Pale Azure**, a **Plate**, two points **dexter** and **sinister**, with a **Base point Or**, charged with a **Barraulet Vert**, the **Sinister side** in all parts counter-changed.

XCV. He beareth **party per Pale**, **Argent**, and **Sable**, 3 **Annulets** conjoynd, in the same, Or; a **Chief ingrailed**, parted per **Fesse** **imbattelled**, **Argent** and **Azure**. Is born by the name of *Hillbach*.

Per **Pale O** and **G** such a chain **S**. Is born by *Knip-pinck*.

XCVI. He beareth **Argent**, a **Squire** in point, from **Fesse** to **Sinister Chief**; & a **Base point**, **Gules**. By the name of *Sneybrook*.

XCVII. He beareth parted per **Bend Sinister**, **Gules** and **Sable**, a **Pile** issuing out of **Dexter Base** in point, **Bendwise**, **Argent**. By the name of *Balndorf*. Some do term this a point pointed in point, from **Dexter Base**, to **Sinister Chief**. others say, **Triparted** per point pointed from **Base** **Bendwise** **Sinister**.

G the like **A**. Born by *Blanckenstein*.

Per **Bend Sinister B** & **G** the like **A**. Born by *Walsen*.

XCVIII. He beareth **Argent**, a **Pile** of five points in **Bend Sinister**, **Sable**. Born by the name of *Piller*. **B** a **Pile** of 3 points out of **Dexter Base** in **Bend A**. By *Burrendorf*.

XCIX. He beareth Or, a **Pile** of five points, proceeding from the middle of the **Chief** and **Sinister side** in

Bend Sinister, **Gules**. By the name of *Collinham*.

C. He beareth **Argent**, a **Pale** **Lofengie** conjoynd **Gules**. By the name of *Lee*. This **Lofenged** I term conjoynd, because they are thick and strongly set together by an unskilfull hand: whereas Artifts make the points but only to touch one the other as you may see chap. 4 numb. 50 52. This is also **Blazoned** A two **Voyders** ended of three points.

CI. He beareth **Argent**, two **Piles** **Barwise**, parted per **Fesse**, **Gules** and **Azure**. By the name of *Gulb*.

CII. He beareth **Azure**, six **Pales** issuing out of **Base** conjoynd, and extending to the sides of the **Escuchion**, fitched on the tops, **Or**. By the name of *Murpale*. they resemble the **Pales** of a **Garden wall**. As chap. 9. numb. 94. 105.

Out of a **Coronett**, eight such **O** and **A** inter-changeable. Born by *Arnborg* as his **Crest**.

CIII. He beareth **Gules**, two **Piles** **Barwise** **Argent** with as many on the **Sinister side**, counter-changed. By the name of *Toller*. This is by others **Blazoned**, a **pale** **Lofengie** in point, or extending to the sides, or uttermost limits of the **Escuchion**; but by that no Arms Painter shall ever trick out this **Coat** aright; first because there is no certain number of **Lofenges**, or **Fusils** mentioned, So that 4 5 or six may be drawn, which make it not the same **Coat**. Again there is no notice take, or mention made, of the demy **Fusils** both in the **Chief** and **Base** of the **Escuchion**, which must be in this, though they may be omitted in the **Pale** or **Bend** **Lofengie**.

Therefore take notice, that when **Lofenges** extend thus in point, they are not to be **Blazoned** **Lofenges** or **Fusils**, but **Piles** **traveried** and **counter-traveried** **Barwise**: in which one **Pile** with its apposit **Pile**, make one **Lofenge**, two **Piles** makes three **Lofenges**, four **Piles** makes seven **Lofenges**, and five makes nine **Lofenges**; besides the demy ones in **Chief** and **Base**.

CIV. He beareth, parted per **Fesse**, **Azure** and **Or**. three **Piles** **solide** and **triangular**, couped in **Fesse** **Argent**, a **File** of three **Lambeaux** per long, of the second. By the name of *Matravers*. Some term these, three-square **Piles** or **Tetragonell** **Piramides** **reberied** in **Fesse**, because the thickness of them are seen, besides they are couped and take their beginning there, and so proceed to the **Base**. And the **Lambeauxes**, I term per long by reason they extend to the **Fesse** contrary to what we draw them now, though anciently they were by us *English* when thus made.

Parted per **Pale** **indented** **Ermine** and **Azure**, and per **Fesse** **Gules**, three such **Piles** in point, **Argent**. Is born by the name of *Seaton*.

CV. He beareth **Gules**, a **File** with three **Labells** in **Fesse**, counterpoised with an other, the points erected, **Argent**. By the name of *de la Hespaule*. This **Coat** is also **Blazoned**, two **Files** in **Fesse**, the higher having the **Labells** erected: or two **Files** in **Fesse** endorsed, or contrary turned. Yet others will, and do constantly term this, a **Barre Gemellee** (or **Fesse** voided) **Pattee**.

This is a **French** bearing, and besides the rarity of the **Coat**, I have caused it to be set in this place, to shew the several ways **Countrys** and **Kingdoms** have in making

making of these Lambeauxes. The former example shews how our ancient *English* did make them, that is straight and even all a long; from which our modern Heraulds have a little varied by making the bottom part a little broader Patee-wise, as the examples *chap. 8 numb. 4 5 6 &c.* And *Gwilliams fol. 40 42* contrary whereunto, the *French* make theirs, short and thick, Dove-tail like, as them in this Quarter doth manifest, and *chap. 3 numb. 17.* The *German* and *Dutch* contrary to both for these make theirs, thick and short, and all of a breadth to the File the hang at, as in the next example. and *chap. 8 numb. 8.*

CVI. He beareth *Argent*, a *File of three points*, the middle *per long* (or exceeding the other in length) *Sable*. This is the *Dutch* way of making them, save here in we must except the middle, which is longer then they use them; this being a *French* Coat drawn after the *Dutch* way. And is born by the name of *Maquis*.

CVII. He beareth *Sable*, *three Piles wavy Fitch* ed at both ends, *Argent*. This was born by *Sir, Percy-vall Sowdan*, an Ancient Baron or Noble man in *Wales*, as I find it mentioned in an old *M.S.* Some term them (Fitched also on the top) for naturally the Pile is sharp in the bottom, therefore to signifie its sharpness at both ends, they Blazon it as I have said.

CVIII. He beareth *Pally of six Crenelle*, *Argent*, and *Gules*. Born by the name of *Sapallier*.

CIX. He beareth *Azure*, *two Wivres Nebulee counter-nebulee Inverted*, *Sable*. Is born by the name of *Goburd*. In the old times this was termed a *Viure* *Anewyd*. See *chap. 9 numb. 21.*

Party per Pale A and S a Wivre of the same in Pale, *Or*. Born by *Fischecke*.

A the like *Cheveron* wise, or in form of a *Cheveron* between three *Bulls* faces, *G*. Born by the name of *Worthens*.

CX. He beareth *Argent*, two *Barrs Crenelle* *Azure*, *Edged*, *Or*. Born by the name of *Maurice*.

Sol. four *Barrs Crenelled*, voided through out (or in all parts) *Marrs*, is the King of *Macedonias* *Caot* of *Armes*.

Barry of eight *Crenelle*, (or three *Barrs Crenelle*) *Sol* and *Mars*. Is the King of *Siria's* *Coat*.

CXI. He beareth *Barry of six*, *Argent* and *Gules*, every other with one *Battlement* on the top and *counter-battelled*, under, and and *masoned Sable*. Is born by the name of *Van Olsey*.

CXII. He beareth *Cinque parted per Barr* (or the Field divided into five equal parts) each *parted per fesse Imbattelled* (or counter-imbattelled) *Azure* and *Or*. by the name of *Gynet*. This may also be Blazoned *Barry* often, the first and every other counter-imbattelled, *Azure* and *Or*.

Barry of four (or *Catterparted*) each divided per *Fesse* imbatteled per long *B* and *A*. a *Base* point of the first. Is born by the Lord of *Gyvec* in *France*.

Barry of eight the 2 4 6 and 8 counter-battelled, *Argent* and *Azure*. Is Born by *Marschal Van Oberndorf*.

CXIII. He beareth *Barry of six* *Argent* and *Azure*,

six Flower de Luces issuant, *Or*. By the name of *Grey*. These are termed *issuant*, because joyned to the score, and but half seen, being as it were growing up into the Field. See *lib. 2 chap. 7 numb. 24.*

CXIV. He beareth *parted per fise Barewise*, *Or & Azure*, (or else say, *Or* two *Barrs Azure*) *Flower de Luces issuant* and *contrary poled counter-changed* By the name of *Golding*.

CXV. He beareth *Barry of four* *Argent* and *Sable*, on a *Chief Gules*, 3 *Battellement Battelled imbatteled issuant*, *flurty on the tops*, *Or*. By the name of *Whijcha*. Otherwie term the *Chief*, charged with 3 *Grieces*, each having as many *Heights*, or *Steps*. Others thus, a *Chief*, in the *Base* thereof three *Mounts*, with as many *Grieces*, the tops *Flurt*. Some call them three triple *Grieces*, or else three degrees of as many *Steps*.

Bendy of six O and *G* the like *Chief O* with *Grieces* *Flurty*, *G*. Is Born by the name of *de Tron*.

CXVI. He beareth *Argent*, *nine Losenges Losenge-wise* (or in *Losenge*) *Gules*, a *Chief parted per fesse Battelled imbatteled in point*, *Or* and *Azure counter-changed*. Born by the name of *Gabrell*.

O eight *Hurts* in *Ovale* 1 2 2 2 1. Is born by *Maximilien de Egmont*.

B nine *Losenges* so disposed *G*. Is born by *Van Drebbel of Westphalia*.

G such a *Chief A* and *S*. Is born by *Lenix*.

CXVII. He beareth *Losengie & Mascule*, *Gules* and *Or*. Born by the name of *Briske*. This Coat is framed after that termed *Losengie*, *chap. 7 numb. 113*. But that which is counter-coloured there, is turned into a *Masle* here having the Field seen through it, as it is with all such bearings. from whence some Blazon this Coat *Gules*, *Masculie* *Or*. As having the *Masles* all over the Field, which may also pass for good Blazoning.

G nine *Masles* conjoined, 3 3 3 *O*. or else term them 3 *Pales* each containing as many *Masles*. These as they are drawn all over the Field, may as well be termed *Masculie Losengie*. This Coat did (in *John Bisseau's* time the *French* *Armourist*) belong to the Duke of *Cuimene* chief Hunter to the King of *France*. And the same belonged to the Duke of *Roban* and *Mombasson*.

G the *Masles* a *A*. Is born by *Pierre de Roban* Lord of *Gie*, and *Marshall of France*.

CXVIII. He beareth *Losengie* *Gules* and *Varrey*, *Vert* and *Or*. By the name of *Stedyrk*. This is an other way by which Fields and ordinaries are Tinctured, the Field being first stricken or drawn over with lines to make it *Losengie*, whereof one is for a plain colour or mettle, and the next to it, to be drawn into the lines of *Varrey*, which always consists of two counterchangable colours and mettles: And then after the same maner the whole Field is wrought counter-changable, one *Loseng* from an other.

Losengie G and *Varry A* and *B*. Is born by *Wakrley of Yorkshire*.

Losengie, each *Varry A* and *G*. Is born by *Trigony*. which kind of bearing is contrary to the other, this being first stricken into *Losengie* and then every one of them wrought into *Varry*, by lines drawn over thwart the corner

corners or points of all the Losenges, as you may see by them which are before shewed.

CXIX. He beareth **Chequie Bendy sinister counter changed**, Argent & Sable, by the name of *Cammers*. This is a tincture of a Field, and may be a charge to any of the straight ordinaries, as Pales, Bends, and Fesses &c. being contrary to all heretofore described by me, this being composed of Squares, each divided Bend-wise from the Sinister to the Dexter Base corners (the others mentioned chap. 7 numb. 111 112 113 114 115. And chap. 9. numb. 111 112. Being generally divided Loseng-wise) so that in the whole, this tincture consists of so many Bends, as the Chequie hath Squares in the Field.

And as this is Bendy Sinister, so on the contrary, it is also born Chequie e-Bendy Dexter. And sometime it is born Chequie Salteric, that is when each Chequie or Square is divided per Salter, and counterchanged one from the other: which of some is termed Chequie Diamond like. An example whereof I need not to shew, seeing it is easily conceived from this, how it is made.

CXX. He beareth **Barry Bendy** (or **Pally Barry**) in **Prospective**, Argent and Sable. Born by the name of *Prospect*. Some say Prospective ways: others, by reason of the slopein of the down lines three severall ways, term it Barry and Pally Bendy towards the center in Chief.

CXXI. He beareth Agent **Scaled**, or **Escalloped**, the edges **Jagged**, each containing an **Ermine**, on a **Chief** Gules, two **Fillets**, Or. Born by the name of *Beck*. This is a contrary way of Escalloping, to those formerly shewed chap. 3 numb. 113 and chap. 9 numb. 86: they being plain Scaling or Escalloping, and these having the edges cut into, as they were Scales Scaled, or Escalops Escalloped. This kind of bearing is wrought after the manner of diapering, with a deeper colour then that of the Field, as is directed chap. 7 numb. 18.

The Fillet or File to be double, or parted, is very rarely found, yet *Chassaneus* in his Catalogue, *Glorie mundi*, fol. 54 gives an other example of such bearing in the Coat Armour of the Earl *Arthejus*.

A a Bend so Scaled G. Is born by *Tettenbeck*.

Party per Fesse, O and the like Escalloping A in Chief a Lion Passant, Is born, by *Van Schwemke* of *Westphalia*.

CXXII. He beareth **Pally** Argent and Gules, party per Fesse counterchanged, a **Barr** Fusill, and an other issuant *et issuant*, Or. By the name of *Glasmon*. This is a tincture of a Field or ordinary seldom used in *England*, but often in *Italy* and those Foreign parts, the composition whereof is to be carefully observed, else it will not be, what it ought to be: for in the main, it consists of two Barrs Fusill, or Loseng (for the number it matters not, so the exceed three or four) the one in Fesse the other in Chief and Base, which is but one, signified by the term issuant (explained lib. 2 chap. 7 numb. 28.) From which points of the Fusills, or Losenges the Palles are to be made, else the work is not right. Some others Blazon this tincture, a Barr in Fesse, and an other issuant out of Chief and Base, Surmounting a Field Pally, and counterchanged per Fesse.

CXXIII. He beareth Azure, a **Frett Doubled** (or a

Double Frett) **Quartered**, Argent. Others Blazon it a Loseng, or Glas query, double fretted. This is an other way by which I have seen Fields, and half Fields adorned. This is Born by the name of *Lozen* See lib. 3 chap. 16 numb. 87.

CXXIV. He beareth Or, a **Long Cross potent** **pomelled of three**, the other below, or the foot plain, Gules. Born by *Heraclius*. This I call a long Cross because the bottom stem, is longer then the other parts of the Cross, whose ends are Pomelly.

The like to this Cross set upon four Grieces or Steps, was coyned upon the money of the Emperours *Mauricius* and *Phocas* with this Inscription about, **VICTORIA, AUG. G.** And under the foot of it these Letters, **C. O. N. C.** being that form of Cross which was used by the *Jews* before their destruction.

CXXV. He beareth Gules, on a **Globe** or **Ball**, a **Cross fixed**, whose top is **Bended** after the form or order of a **Roman P.** Born by the name of *Justin*. And such a kind of Mound and Cross I find among the *Roman* Coyn, set forth by *Jacob de Bie*, which he terms a **P.** Set upon an Orbe crossed, which is the *Hieroglyphix* of the name *Christ*. pag. 237.

CXXVI. He beareth Gules, a **Cross of Triangles**, or **12 Triangles in Cross**, the points towards the **Center**, and there conjoyned, Or. By the name of *Burcher*.

CXXVII. He beareth Vert, a **Cross** on each **Stem**, a **Saxon B.** **Comoned** and **contrary-poled** Argent. By the name of *Bon-Burbell-Berge*. After this manner Crosses may be made and framed soe, that the Letters joyned to it may serve to express the Bearers name, or at least the Character of it.

CXXVIII. He beareth Vert, upon three **Grieces** or **Steps in Base**, a **Mound**, or **Dike**, Argent, **Insigned** with a **Cross Patriarchall** **Pomettee**, Or. By the name of *Triburbe*.

CXXIX. He beareth Argent a **Cross Patriarchall** **thrice Crossed** **potence** the foot **Lambeaured**, Sable. Whether to term this a Coat or a Merchants mark I know not, but judge of it to be the later: being a symbolical Character of the Owners name, *Edm. Edwards*. And so some have termed it therefrom, a Staff Potent, or a Crouch Staff **Lambeux** in the foot, having 2 **Roman E.** endorsed and conjoyned to the middle.

CXXX. He beareth Azure, a **Cross** **Lambeaured** in all four, Or. Born by the name of *Van Poinburg*.

CXXXI. He beareth Argent, a **Cross of four Pruning Hooks** **contrary Imbowed**, Sable. Born by the name of *Hooker*. Some term these four Culcers joyned to a Ball or Bullett, contrary bowed in the points.

CXXXII. He beareth Argent on a **Cross** Gules an **Imperiall Crown** between four **Cantons**, Azure. This kind of bearing was upon the Regimentall Ensignes of the Lord *Ferrers* under King *James 1 An. Dom. 1685*. The Red Cross being over all the Ensignes, from which went another of white, as if the Red Cross were set on another; the remaining part of the said colours were four Cantons, or Squares of a Pale red. Each Captain being distinguished by the number of Crowns set on the Cross.

The signification of all the Charges and Ordinaries used in Heraldry within this first Book.

ANULETTO is a Ring, and is the Emblem of Unity, Friendship, and love to Eternity.

Barr, a stop or hindrance, and signifies invention, industry and labour in Fortifying a Camp, that the Enemy receiveth damage thereby.

Beuile, is broken, or a Carpenters Square moving upon a Joint, and signifies care and foresight of an action.

Battene, a note of Illegitimacy.

Bend, a Shoulder Belt, or a Scaling Ladder; it denotes the Bearer to be the first that ascended or mounted upon the Enemies Wall.

Chief, a Head or Chieftain, and signifies a Senator or honourable Person.

Lambeaur, Plaits of a Garment; and signifies Unity and Agreement, also subjection.

Larmes, Tears; the Emblem of Grief and Sorrow.

Labell of three points denotes Father, Mother and Heir, or Faith, Hope and Charity.

Masle, a Mash of a Net, signifieth a prudent and politick deviser of Stratagems.

Muslett, a Meteor, Star or Spur-rowell; signifying swiftness, and the Messenger of some ill Tidings.

Nombrell, the Navel; the Emblem of Strength and Courage.

Nowy, a Fold or Knott, and signifies true Love.

Dyresse, a Pellet of a Gun, a Bullet; it signifies Murder, Ruin and Desolation.

Oyle, a Pillow; signifying Rest, Quietness and Content.

Pale, a Fence or separation, and signifieth one well skilled in Mines and Foundation of Forts and Castles; a Man of reason and Understanding.

Pattee, broad; and signifies to lay open a matter.

Pile, a Wedge, the Emblem of a sure Foundation, a steadfast support.

Potonce, a Crutch; a stay or support, one that will not fail in time of need.

Quarter, a fourth part of the Escochion, signifieth partnership in a Service.

Salter, an Instrument to Torture, also to Scale an Enemies Wall; is a note of Christian Profession.

Scarpe, a Scarfe, a Souldiers Badge of Honour.

Shapone, a Hood; the Emblem of Shamefastness, Modesty.

Torteur, a Cake; the Emblem of Providence and Care, having a regard to them under his Charge.

Goyder, a Looking-glass; and signifies one to have an aspect of danger afar off, and so seeing endeavours a safety.

And so I shall conclude my first Book of Colours, Ordinaries and Partitions, with their variety of Bearings, and terms of Blazons, both Antient and Modern: wishing they may be as acceptable and delightful to the Reader, as to me it was pleasure (yet p. insul) in their Collectings; to whose Censure I lay my self open, if pleasing I have my reward; if otherwise, it is but what I expect of some: However, I shall now address my self to the second part of the same, with Hopes that that will amend the mistakes in this;

Farwel, R. H.

Laus Deo dabitur.

An Alphabeticall Table,

Containing all the Terms of Heraldry, used in this first Book Of the Academie, or Store-House of Armory.

The first figure stands for the Chapter, the next after, for the number, or numbers of that same Chapter. If an (&) come between numbers, it signifieth, that after it, an other Chapter and Number, is mentioned. If an (s) be set before a Figure, It is for Section 1 2 3 &c: of such a Chapter before it.

THE
SECOND BOOK
OF THE
ACADEMY
OF
ARMORY and BLAZON.

THE
SECOND BOOK
OF THE
ACADEMY
OF
ARMORY AND BLAZON.

T O

The Right Honorable, the *Earls, Viscounts, and Barons;*

The Honourable, the *Barronetts;*

The Right Worshipful, the *Knights and Justices,*

The Worshipful, the *Esquires;*

With the *Loyal Gentry and Freeholders* within the *Principality of Wales,*
the *Counties Palatinates of Chester and Lancaster.*

My Lords and Gentry,

IT is a general fault in most *Antiquaries*, preferring that their *Rarities* should Die with them, and be Buried in their Graves, rather than others should receive any benefit thereby: To cross which Currant of Corruption, I have presumed to Dedicate these my Labours to your serious Considerations. Let none be offended that I Patronize you at the second hand; for though I confess you are my refuge and support, in relation to your Deceased Friends, yet you are my choice in reference to the surviving Nobility and Gentry; whom God preserve with length of Lives and true Grace, that in your times you may remain Loyal to His Sacred Majesty our Kingdoms Father; a Support and Comfort to our Holy Mother the Church; an Honor to your Country, a Credit to your Kindred; and a Joy to all true Subjects, which is the hearty wishes and desires of

Your most Humble and Devoted Servant R. H.

C H A P. I.

HAVING performed the Task which my proposed Order imposed on me, touching proper Charges, (*viz. Ornamentaries*), together with their making, and diverse manner of Bearing; the same orderly Progression calls us to the handling of **Common Charges**.

By **Common Charges** may be meant all things both Natural and Artificial which are used in Coats of Arms, but in this Second Book I shall only treat of such things as are natural: Now things natural are (according to the Philosophers) Essences of themselves, or subsisting by others, the number of which, is Infinite, as *Zoroastrian* noteth, lib. I. p. 55. *de Operibus*: saying *Infinitum est quod prope infinite, non tam res, quam rerum species*, in *Caelis*, in *Aere*, in *Terris*, in *Aquis*: But it is not to be expected that I should speak of all such natural things, only such as fall within the compals of Armory: Those I shall evidence by Examples and Demonstration.

Of Natural things, which are born in Coats, I shall endeavour to set forth the several Varieties thereof, under these heads.

1. The Heavens with the things therein.
2. The Air, with such things as are produced therefrom.

3. The Fire, with the things thereof.

4. The Earth with its natural products.

5. The Water, with what is derived from the same. First, in our Treatise of Heavenly Bodies, give me leave to give you the names by which the Heavens are called, with the number of them.

Of the Heavens, the Number, Names, and Distance.

Altogether they are termed generally by the name of the Coelestial Sphere, the Heavenly Orbe, the Globe of Heaven, of which there is a division into eleven parts, called the Heavens, or Elementary Heavens.

1. The Imperial Heaven, or Heaven of Heavens, this is the highest Heaven, and is the place of Bliss and Happiness, where God, his Holy Angels and Saints doth dwell. To this Heaven, Philosophers account it from the Earth miles.

A

2. The

I: P: M: Carol Dñi: Mostue de vice comitis Marisburgh.

2. The *Primum Mobile*, or first moveable Heaven, this is round, of a Blew colour, clear and shining, without any Stars, ever moving, and from East to West maketh his Revolution in 24 hours; it is called also the Diurnal Sphere, or daily moving Heaven. This Heaven is by Astronomers accounted to be ----- miles distant from the Earth.

3. The Christal Heaven, of some called the Watry Heaven, it is also clear and shining, without any Stars: it is distant from the earth ----- miles, and maketh its Revolution about the Earth, according to the motion of its *Primum Mobile*.

4. The Firmament, or Starry Heaven: In this Sphere or Heaven all the fixed Stars are fastned; having no other motion than the moving of the Firmament in which they are fixed; and that is according to the Revolution of the first Mover. This is distant from Saturn, 120485 miles, and therefore the Bodies of these Stars must needs exceed the Globe of the Earth by many hundreds of degrees.

5. The Heaven, or Circle, or Sphear of Saturn, the highest of the seven Planets: It is said to be bigger than the Earth 91 times, and maketh his Revolution from West to East in 30 years; and is distant from Jupiter 18721 miles.

6. The Heaven of Jupiter; it is bigger than the earth 65 times, and makes his Revolution from West to East in 12 years, and is distant from Mars 18721 miles.

7. The Heaven of Mars; it is bigger than the Earth one time and half; makes his Journey from West to East in two years, and is distant from the Sun 15725 miles. It is sometimes called the Sphere of *Herculus*.

8. The Heaven of Sol, or the Sun; it is bigger than the Earth by 162 times; and runs his course round the World in 24 hours; and his Revolution from West to East in 365 days and 6 hours, which is one Year; and is distant from Venus 1437 miles and a half.

9. The Heaven of Venus; this Planet is said to be 37 parts as little as the Earth; runs her course from West to East in the same space of time as the Sun doth, and is distant from Mercury 12812 miles. This is a bright shining Star; going before the Sun, is called the Morning Star; after the Sun the Evening Star.

10. The Heaven of Mercury, this Planet is lesser than the Earth by 32000 parts; and makes his Revolution from West to East as the Sun doth: It is distant from the Moon 12812 miles.

11. The Heaven or Orbe of Luna or the Moon: This is the least of the Planets, being 43 parts lesser than the Earth, and 7000 times than the Globe or Body of the Sun: She maketh her Revolution from West to East in 27 days. It is distant from the Earth 1570 miles.

The whole sum from the Earth to the Firmament, 358463 miles and a half: But others affirm, that to the Firmament or 8 Heaven is 170000103, that is one hundred and seventy millions, a hundred and three miles Geometrical; and from the first moveable to the Earth, is ten times so much.

The Jewish Rabbins say there are but nine Heavens or Spheres, 1. That of the Moon. 2. That of *Cochab*. 3. That of *Nogah*. 4. That of the Sun. 5. That of *Mandim*. 6. That of *Tjedack*. 7. That of *Shabthai*. 8. That of the Starry Firmament. 9. The highest Heaven.

2. FROM natural things, such as the Heavens do afford unto us, and is made particular use off in tokens of Honour, are such as these.

I. He beareth Azure, in a *Gloze*, in Hebrew Letters, the Word *Jehovah*, with a Cloud invironing the lower part of it proper: After this manner the Ancients did describe the God-head only from a Glory, having no Image or Form, which they took from the saying of the Prophet *Isaiah*, *Isa. 40. 18, 25. To whom will ye liken GOD? or, What likeness will you compare him to? This made the Idolatrous Athenians term him an unknown God, as Act. 17. 23. having no known image or form; and better thus to set him forth than after the likeness or according to the shape and fashion of any Human Creature. This is a part of the Coat of Nassau, a Title of Honor belonging to the Prince of Orange.*

II. He beareth Azure, in a *Gloze*, three Letters, viz. *I H S*. Sable, invironed with Clouds in Chief and Base Argent: The *I H S* signifieth *Jesum Hominum Salvatorem*, being the Symbolical Letters or Characters, for the name Jesus, the Saviour of the World. This is born by the name *Jesuite*.

III. He beareth Argent, within a *Crown of Thorns*, (or a Wreath of Thorns, three Letters, that is to say *X P S*, Sable. By the Letters we understand the name *Christus*, being the Symbolical Letters of Jesus Christ, who for our sakes wore such a Crown; which by *Boswell* is termed also a Crown of *Espine*, from *Sina*, the Latin for a Thorn: Born by the Catholick Christian. This Crown is worn of all the Soldiers of our Saviour Militant here, and he that feels not the pricks thereof, is in danger never to wear the Crown Triumphant hereafter.

IV. He beareth Gules, in a *Gloze*, the visible form of the *Holy Ghost*, in the likeness of a Dove displaid, Argent, Legs and Beak, Gules. Others Blazon it a Dove displaid Argent in the Glory of the Sun: But in old Blazoning it was termed nothing else but the Holy Ghost, because it is said to descend on our Saviour in the likeness of a Dove, *Luke 3. 22*. This is part of the Coat belonging to the Worshipful Company of *Stationers*.

V. He beareth Sable, a Dove volant Descendant, in the Dexter corner Argent, in the *Gloze* of the Sun, termed by others in the Glory of the Sun, issuing out of the Dexter corner Bendwise, a Dove volant or descendant) proper. By some termed the *descention* of the *Holy Ghost* in Bend, in the form of a Dove. Born by the name of *Dove*.

VI. He beareth Vert, in a *Gloze*, a Fiery Tongue, proper. This was the visible form of the descention of the Holy Ghost upon the Apostles and Disciples of Jesus Christ, mentioned *Acts 2. 3. And there appeared unto them Cloven Tongues, like as of Fire, and sate upon each of them; and they were all filled with the Holy Ghost, and began to speak with other Tongues, as the Spirit gave them utterance. Which thing was promised by our Saviour, and foretold by the Prophet Joel, as you may read Act. 1. 4, 5. Mat.*

3. 11. and Joel 2. 28. This is termed also the Holy Ghost (or Holy Spirit) in the visible form of a Fiery Tongue.

Note, that all things which have a Sanctity in them, are always circled about with a Glory; or have it about the head, as all Saints were of old, so depicted.

VII. He beareth Gules, three Plates in Triangle, all conjoined to another in the Center: containing four Letters, *P. S. G. H. Sable*, which Letters signify God in the Trinity of Persons, Father, Son, and Holy Ghost. This I found in an Escutcheon very ancient in a Glass Window in St. Mary's Church in *Wich Malbank*, which was of old thus Blazoned in short; The Trinity of Persons in the Unity of Essence. Others a Trinity and Unity, each charged with a Symbolical Letter representing the Persons of the Deity: Bishop *Baile* in his *Practice of Piety*, calls it a Tripartite Idol, representing the Trinity.

VIII. He beareth Argent, an Annulett joined on the out-side to the middle of a triangle pierced triangularly, *Sable*. This I have seen upon a Monument in a Wall in St. Michaels Church in the City of *Chesler*, and by the Bearer and Owner of that devise was termed the Unity in Trinity, because (if rightly drawn) the triangle is composed from the Annulett. After this manner according to these two examples the Ancients did draw the Trinity, signifying by four Letters the Trinity of Persons in the God-head; and it is very observable, that in all Languages, the name of God hath been of old written with four Letters; as,

Jehovah in Hebrew.

Theos, in Greek.

Deus, God in Latine.

Ddu, or *Dur*, in Welsh or British.

Godd, in English and Scotch.

Dodd, in Saxon and Teutonic.

Ndja or *Dnja*, in Mancks and Irish.

Dieu in French.

Dios in Spanish.

Idio in Italian.

Godt, or *Gott*, in German and Dutch.

Adad in Assyria.

Syre by the Persians.

Alla by the Arabians.

Doyd, Thoyth by the Egyptians.

Boeg by the Esclavomians.

Eloi by the Chaldeans. Mark 15. 34.

Abdi, by the Turks and Mahumetans.

Zimi by the Indians.

Kong by them of China.

Lsar by the Ectusians.

Manu by the Molucca Islands in the Indies.

Abba in the Syriack Tongue, Mar. 14. 36.

IX. He beareth Or, on a Rain-Bow, a Naked Man sitting; having a Glowy about his head, all Inbroned with the Sun Beams, and a Cloud under it, all proper. This is more briefly Blazoned, the Son of Man sitting on a Rain-Bow, in the Glowy of the Sun, and the Clouds under his Feet. But *Ezekiel* the Prophet doth best describe this Judge and Judgment Seat, *Ezech. 1. 26, 27.* who saith; That above the Firmament, in the like-

ness of a Throne, as the appearance of a Sapphire Stone, and upon the Throne is the Son of Man, with fire round about him, like to the Bow in the Clouds in the day of Rain, &c.

Here give me leave to give the Reader a brief Description of the Gods of the Nations, and how, and in what manner the Heathens usually depicted the same.

Imperial Gods failed to be Gods.

These are such Gods as no Man might appropriate to himself, but were common, or the chief Gods of all People and Nations in general; who were first by the Greeks assigned to their principal Kingdoms and Offices, as,

Saturn, the God of Time and Age, he is drawn like an Old Man, holding a Sith or Hook in one hand, and a Child in the other, devouring it, with a Star on his head, with the Character of the Planet Saturn in the body of it; others depicted him a very old Man, holding in one hand a Serpent turned round with its Tail in his Mouth; his Temples girt with a green wreath, Hair and Beard milk white.

Jupiter, or *Jove*, the God of Heaven and of Thunder, with a Thunder-bolt in one hand, and a Scepter in the other, and Wings on his Shoulders, with a Star on his head, with his Character in it (as all the other Planets have) others draw him without Wings upon the back of a Flying Eagle. Others draw him Crowned, and a thin Vail over him, in his right hand the Image of Victory, in his left a Scepter with an Eagle at the top of it.

Mars, the God of War, sometimes drawn on Horseback in compleat Armour, with Lance and Shield all Bloody, with a Fiery Star on his head. Sometimes drawn in a Chariot, drawn with Horses called Fear and Horror, or Fury and Violence, driven by Wrath and Destruction.

Phabus, *Titan* or *Sol*, the God of Wisdom and of Arts, is drawn like a Young Man with the Sun Rays round about his head, with a Scepter in his hand, with an eye on the top of it. In England the ancient Britains adored him in the shape of half a Man with Rays of Light about his head, and a Flaming Wheel on his Breast.

Mercury, the God of Eloquence, Thieves and Merchants; he is also called the Messenger of the Gods; he is drawn in the shape of a young Man, holding a Snaky Staff (called a *Caduceus*) with a thin Vail about his naked Body, and two small Wings fixed on either side his Heels, and two in his Hat or narrow brimmed Cap. Some set his Star and Character in it, over his head.

Neptune, the God of the Sea and Waters, an old Man painted naked, with a Mantle flying about, riding on a Sea-Horse (or a Whale) with a Trident on three forked Mace in his hand. Of some he is set forth standing upright in the concavity of a great Sea Shell or Escallop drawn by two Sea Horses.

Foelus, the God of Wind, an ancient Man with two Blub Checks, blowing a Blast, with two small Wings up-

on his Shoulders: Some draw him with a pair of Bellows under his Arm.

Vulcanus or *Vulcan*, the God of Fire, (or of Arts and Industry) and of Smiths. Drawn like an Old Man, all smoaky, and of a swarthy complexion, with an Hammer and Anvill, or a Smiths Forge by him; in one hand a Thunderbolt, and the other an Arrow.

Bacchus, the God of Wine and Drunkennes, Drawn naked, being Young, without a Beard, but grofs and corpulent, with fat Checks, having a Garland of Vine leaves fructed (that is with Bunches of Grapes) about his Temples, and middle of his body; riding upon a Tun or Hoghead, with a Glas of Wine in one hand, and a Bottle in the other: Sometime holding a *Thyrus* or Vine-spear in his hand, sitting in a Chariot drawn by Tygers and Panthers.

Cupid, the God of Love, a Naked Boy with Wings, a Quiver with Arrows at his Back, and a Bow in one hand and Arrow in the other: He was Son of *Jupiter* and *Venus*. Some Picture him with two Darts, the one of Gold, the other of Lead; one is to procure Love, the other to chase it away.

Pan, or *Faunus*, or *Sylvan*, God of the Woods and Groves, and of Flocks of Sheep and Herds of Cattell; or the Country Mans God: He is drawn from the middle upwards like a Naked Man, swarthy, and a ruddy face, with Asses ears and horns; in one hand a Shepherds hook, in the other a Whistle; and from the middle downwards the perfect shape of a Goats hinder parts. A Satyre.

Pluto the God of Hell and Riches, drawn sitting in a Chair, with a Black Scepter in one hand, and a Crown in the other; by his feet either standeth or coucheth in a Chain the Dog *Cerberus*, or else drawn in a Fiery Chariot by 4 Black Horses, having fire and smoak issuing out of their Nostrils.

Manes are Infernal Gods.

Apollo, the God of Wisdom, drawn like a Beardless Youth, with Yellow hair, carrying in one hand a Cythren, and in the other his Bow and Arrows. Sometimes with a Bow in one hand, and an Arrow in the other; either Armed, or loose Robes and Mantle, with Rayes about his head.

People held for a Sea-god. The former also being Drowned, was made a Sea-god.

Portunus, the God of Harbours.

Priapus, the god of Gardens and Gardeners, the Son of *Bacchus* and *Venus*, he was so deformed through the Inchantments of *Juno*, that his Mother slighted him.

Aegipanes, are Demy-gods of the Woods and Fields.

Silenus, the god of Drunkards and Debauchery, the foster-Father of *Bacchus*, he delighted much in planting of Vineyards, he is described to be an hairy Man and deformed, old, and riding on an Ass, Bald-pated, Flat-nosed, and Pot-bellied.

Consul, the god of Counsel.

Tithonus, god of the Morning, is an Old Man made Young again by the Physick of *Aurora*, who loved him, he lived long, and being weary of his Life was turned into a Grasshopper, and so carried into Heaven.

Libitina, the god of Funerals and Interment; called also *Venus Libitina*, in her Temple were bought and sold such things as were requisite for Funerals.

Momus, the god of reprehension, whose Father was *Sleep* and Mother *Night*, he did nothing himself, but was employed to look upon the works and actions of others, and reprove where he found cause.

Amphiaraus, a Prophet and Fore-teller of things to come, after his Decease had in the Country of *Athens*, a stately Edifice erected to him; and was esteemed as a god and gave answers by his Oracles, through Dreams, not by a *Pythiassa* as the Oracles of *Apollo* were.

Perseus the Son of *Jupiter* and *Danae*, whom he begat in a Golden shower; he is depicted with a Cristal Shield, and in compleat Armour, with a Sarge and Lance: On the Shield is painted *Medusa's* head: sometime he is drawn on *Pegasus* the Winged Horse, slaying the Sea Monster that should have destroyed *Andromeda*.

Hercules, he is Drawn in a Lions skin, and a Club in his hand; of him see more chap. 17. n. mb. 77. he was Son of *Jupiter*, by *Alcmene* Wife of *Amphytrion* Prince of *Thebes*, who because of his noble Acts, after his Death was adored as a god.

Orpheus Son of *Apollo* and the Muse *Calliope*, a famous Musitian, is drawn with loose Robes, playing on the Harp, with several sorts of Birds and Beasts about him.

Harpocrates was the Egyptians god of Silence, he was the Son of *Isis*, his Statue was made with his Finger to his mouth, and a Wolf skin full of Eyes about his shoulders.

Epheus was the great Interpreter of the gods amongst the the Egyptians, and was painted with the head of a Hawk.

Genius, the Son of *Jupiter* and *Terra*: he is in shape like a Man, but of an uncertain Sex. He is the God of Kingdoms and every particular persons God, to have an Eye and Watch over them: The Poets say that every Man had two from his Nativity waiting on him, till his Death; the one whereof was a good Genius called *Lares*, the other a bad Genius called *Leumies*: They were worshipped in the form of Serpents, sometimes as a Boy, Girl, or Old Man with a Garland of Palmes about his Temples, a Cornucopia in one hand, and a Dish with Offerings, reaching it out toward an Altar in the other hand.

Janus, the god of foresight or of knowledge of things past, and to come: He was the first King of *Italy*, and by reason of his Knowledge was Painted with two Faces,

Demy Gods.

5. ARE such as were Heroick persons, and after their Decease were Deified, as,

Castor and *Pollux*, the Gods of Marriners and Voyages, the latter being the Son of *Jupiter* by *Leda*, Wife of *Tyndarus*, King of *Oebilia*, and therefore Immortal; the other by *Tyndarus*. They cleared the Coast of all Pirates at Sea, therefore were adored amongst the Divinities at Sea, and were numbred amongst those that did protect from evil, for this cause the Heathens offered to them in Sacrifice a Lamb.

Palemon and *Glaucus*, the Gods of Swimmers, the latter being a Fisher-man who had a way to take Fish in Winter which others had not; he was also an excellent Swimmer and Diver under Water; being at last Drowned, or devoured of some great Fish, was by Superstitious

*

ces, the one old and gray, with a long Beard looking forward; the other young and youthful and beardless, looking backwards, holding in one hand a Rod or Wand, and in the other a Key.

Agon, the god of actions and enterprises.

Peculiar Gods and their Offices.

6. **T**Hese are such gods as were worshipped and adored by the Ancients for several purposes, and by peculiar people; termed also Household gods: as,

Statues, *Tonantes*, *Feretrii* and *Jupiter-Elicius*, household gods that raised Thunder, which the Romans worshipped.

Vertumnus the god of Merchandising.

Cantius, a god to whom they prayed for Wise Children.

Morpheus, the god of Sleep; to whom they prayed that they might Rest and Sleep quietly without disturbance.

Vagianus, a god that kept Children from crying.

Cunius or *Cunius*, a god that kept Children from misfortune in the Cradle.

Ruminus, a god that preserved Womens Duggs from corruption.

Volcanus, a god that young people adored that desired Marriage, to whom they prayed for good Wives and Husbands.

Agrestis, a god they prayed to for fertility in the fields, and to have good increase.

Belus, the god of War, which they prayed to for Victory over their Enemies.

Honorius, the god of Inn-keepers, to whom they prayed that Pilgrims and Strangers should be well intreated, and much made on.

Esculanus, the god of the Gold and Silver Mines, to whom they prayed for discovery, and good success in their Mining.

Esculapius, the god of Physick, and to Cure the Sick, an Old Man with a long Beard, crowned with Bays, in one hand a knotted Staff, in the other a Serpent; with Flowers and Herbs on his Lap, or Fruit.

Pavor, the god of Cow-herds, to whom they prayed that their Cattel might be kept from Diseases, and be preserved in Strength.

Mauzum, the god of Power and Riches; this was the god of the Romans, who in the height of their power and greatness, esteemed it above all their gods, and therefore worshipped and adored it, *Dan* 11. 36, 37, 38, 39.

Tellus, the god of the Earth, like an old Woman with Towers on her head, in one hand a Scepter, in the other a Key, her Garments all Embroidered with Flowers and Herbs.

Talisman, or Talismanical Images, were such Figures, or Shapes, or Images of Creatures made by Art Magick, that by the influence and power thereof, they preserved Cities, Countreys and People, from such noisom Creatures, as did molest them. Some say there shape was not Human but of some Celestial Figure; though others are of an opinion, that the first gods of the Latins, which

they called *Averrunci*, or *Dii Tutelares*, Household or Tutelar gods, to be no other than these foresaid Images made under certain Constellations, which for their Protection came afterwards to be Idolatrously worshipped.

Countrey Gods and Goddeses.

7. **T**Hese were such Gods as were worshipped in particular Kingdoms, Nations and Countreys; now the gods in diverse Countreys were these.

Anubis, the Egyptians God, whom they adored in the shape of a Dog, or with a Dogs head, because he loved Dogs and Hunting; they worshipped all living Creatures, namely of Beasts, the Bullock, Dog, and Cat; of Fowl, the Ibis, and Sparrow-Hawk; of Fish, the Lepidotus, and Oxyrinchus.

Succoth-Bemoth, the god of the Babilonians. Some take it to be a Hen and Chickens: Others an erected Tent, set up in honour of *Myllita*, or *Venus Urania*, eminent Deities in Babilon, 2 King. 17. 36.

Memphis, the Babilonians God, called also *Succoth Bemoth*, 2 King. 17. 30.

Tarcat, or *Tartak* the god of the *Eruims*, 2 Kings 17. 31. *Nibhaz* was also another of their Gods; the one the shape of a Dog, the other an As.

Orim-sda, a certain kind of Fire which the Persians worshipped as their God.

Mossus, the Africans God.

Asbima, the Idol of *Hamath*, 2 King 17. 30. in the shape of a He-Goat.

Serapis, a Serpent, the *Naucratis* god; called also *Apis*, it was a live black Bull with a White Star, and Lift down the back; with a white mark like a Half Moon on the right shoulder.

Yet the Egyptians did Paint their god *Serapis* with 3 Heads, of a Lion in the middle, on the right hand a fawning Dog, and on the left hand a ravening Wolf, all which forms joined together by the winding body of a Dragon.

Host of Heaven, as Sun, Moon, and Stars; these were worshipped by the Israelites, when they forsook the Commandments of the Lord their God; as we read in 2 King. 17. 16. and 23. 5. called 23. 5. called the Image of the Sun; and the Queen of Heaven, *Ezek* 6. 4. 13. and 8. 16. *Jer* 7. 18. and 8. 2.

Nehushtan, the Israelites God, this was the Brazen Serpent that *Moses* made, which the people burnt Incense to, which the good King *Hezekiah* brake in pieces, because of their Idolatry, calling it *Nehushtan*, 2 King. 18. 4. that is, a piece of Brass, in contempt of it when abused.

Golden Calves, Gods of the Israelites, set up by *Jeroboam* at *Dan* and *Bethel*, to hinder them from going up to *Jerusalem*, to worship, which were no other than Devils, 2 Chron. 11. 15. 1 King. 12. 31. *Jer* 48. 13. *Hos* 10. 5. By these we understand Molten and Carved Images, so much spoken against, *Exod* 32. 2. *Isa* 48. 5. and Image of the Grove, mentioned 2 King. 21. 7. *Hos* 10. 1.

Belshazzar, the God adored by *Nebuchadnezzar* King of Babilon, *Dan* 4. 5. this was probably the name of that Golden Image, which was threecore Cubits high, and six Cubits

Cubits broad, which the said King caused to be set up in the Plain of *Dura*, in the Province of *Babel*; causing all People, Nobles and others, to fall down and worship it, *Dan. 3. 1, 2, 3, 4, 5.*

Succoth, the *Israelites* Idol called their King, and *Chim* their Images, *Amos 5. 26.* which they carried about, thinking there was a certain Deity in them.

Astartes or *Ashtaroth*, the *Assyrians* god, and of *Sydonia* who as some write was the fourth *Venus* for Beauty, which *Salomon* worshipped at his Concubines inticement, *1 King. 11. 5.* it had a Bulls head on her head.

Abrammelech and *Anamelech* were the gods of the *Sepharvains*, for *Sepharvaim* was a City of *Assyria*, *2 King. 17. 30.* to which Idol they burnt and Sacrificed their Children. He was drawn like a King in a Throne, a Scepter in his hand, and a Crown Regal wreathed.

Tibillanus, the god of *Noricum* in *Barbaria*.

Melchom or *Milcom*, the Idol of the Children of *Ammon*, *2 King. 23. 10.* called also by the *Ammonites*, *Molech* or *Moloch*, *Amos 5. 26. Acts 7. 43. Jer. 32. 35.* and *Malcham* by the *ews*, *Zeph. 1. 5.*

Jula, the god of the *Moors*.

Sangus, or *Xambus*, a god of the *Sabines*, he was their first King.

Dagon, the Idol of the *Philistins*, *Judg. 16. 23.* adored at *Asdod*, in the shape of a Mareman, with a writhen Tail, and Crowned, *1 Chron. 10. 10.*

Gabirus, the *Macedonians* god.

Baal-Perith, and *Baal-Meon*, gods of the *Phenicians*, and of *Egypt*, whom the *Israelites* worshipped in the shape of a King, and so named, because first worshipped in *Be-ritb*, a City of *Phoenicia*, *Judg. 8. 33. and 9. 4. 46.*

Priapus with great Genitals, was the god of *Lampsake*, who was set up at *Hilispont* to be adored, called also *Hilispontiacus Vir*; they made him Keeper of their Gardens, setting him up with a Sithe to frighten Thieves and Birds away: *Hor.* They Sacrificed to him an *Ass*: *Ovid.*

Nebo, was a god of the *Chaldeans*, *Isa. 46. 1.*

Crephagamentus, a god of the *Thebans* in *Egypt*, whom they esteemed Immortal.

Diomedes, the god of *Diomedea* Island.

Venus, the goddess of *Paphos*, *Amathus* and *Cythera*, three pleasant mountains in the Isle of *Cyprus*.

Apollo, the god of *Delphos*, whose Image spake, and told the event of things; called the Oracle of *Apollo*, and the Oracle at *Delphos*.

Diana, the great goddess of the *Ephesians*, *Act. 19. 28. 34.* adored also at *Tarentis*, and in *Perusia*.

Asina, the god of the Eastern people, worshipped in the Image of an Ape, or as some affirm, a Goat, or Ram, the *Egyptians* hate all that killed them.

Baalzebub, the Lord of Flies, was an Idol or Oracle erected at *Echron*, to whom *Hezekiah* sent to know whether he should recover of his Disease, as tho there had been no God in *Israel*, *2 King. 1. 2, 3.* this was a Devils name which the Jews accounted the Prince of Devils, *Mark 3. 22.* who the Greeks called *Pluto*. It is like a King sitting in a Throne.

Nergal, was a continual Fire upon an Altar, which was daily adored in *Ur* of the *Chaldeans*, and from which *Abram* departed. It was adored by the *Persians* and *Cuthites*, *2 King. 17. 30. and 19. 36, 37.*

Nisroch, a god of the *Assyrians*, who was worshipped of *Senacherib*, when he was slain by his Sons, *2 King. 19. 37.* it is thought to be the Ark of *Noah*, or a Figure of it, or the Image of an Eagle; others a King standing (in the Ro-

man habit) on a Ball; a Scepter in the right, and supporting a Shield with the left hand.

Nibhaz, the god of the *Egyptians*, *2 Kings 17. 31.* the *Arims* also did worship it; and is supposed to be the same to *Anubis* before said, and was in the form of a Dog. Some write it *Nabhaz*.

Teraphim, a certain kind of Image, *Hof. 3. 4.* which *Micah* made, and by it told the *Damies* their good success, as it is mentioned, *Judg. 17. 5. and 18. 17.* *Rabbi Eliezer*, surnamed *Gadol*, that is, the great, saith, they were certain Statues made in form of a Man under certain Constellations, whose influences caused them to speak at some certain hours, and give an Answer to whatsoever was demanded of them; being as it were, like those Oracles which oftentimes speak by the mouth of the Devil: But laying aside all other conjectures of them, *St. Jerom*, on *1 King. 22.* and *1 King. 6. 16.* tells us, that they were the Images of Seraphims and Cherubims. *Hamahalzel* therefore concludes with this truth; that certainly in the time of the Patriarchs, there were some certain wonderful Images or Statues, by which God made known his Will to his People.

Deumo, the Devil, or a Devilish Idol, most superstitiously adored by the *Painims* of *Calicut* in the *East-Indies*.

Kimmon, the chief god of *Damascus*. He is said to hold a Pomegranate in his hand, to shew he was the Protector of that people who did bear a Pomegranate in their Coat of Arms. Some say it was the Image of *Venus* holding an Apple. He was the god of the *Aramites*, *2 King. 5. 18.*

Thammuz, the god of the corrupted *Israelites*; mentioned *Ezek. 8. 14.* it is thought to be the Sun.

Moloch or *Molech*. It was a hollow Image of Brass, having seven Repositories, 1. For Meal. 2. For a Sheep. 3. For a Ram. 4. For Turtles. 5. For a Calf. 6. For an Ox. 7. For a Child. Its form was like a Naked Man, with a Calfs Head Crowned. To this Idol, the *Israelites* burnt their Children in the Valley of *Hinnon* or *Tophet*, near *Jerusalem*. See *2 King. 23. 10. 2 Chron. 28. 3.*

Bel, was another of the chief gods of the *Babylonians*, *Isa. 46. 1. Jer. 51. 44.* and *Chaldeans*, a fat Fellow (like *Bacchus*) crowned with a pointed Crown, and in habit of a Roman, with a Mantle on his Back, in the left hand a Scepter pointed out; and in the right, holding a Jug or Pitcher by the Ear.

Mero, or *Merodach*, was another god of *Babylon*, whose name the Princes did assume, *Isa. 39. 1. Jer. 50. 2.*

Dercetus was a goddess of *Askelon*, and represented as a beautiful Woman.

Melechbet, an Idol mentioned by *Jer. 7. 18.* and is taken to be either the Sun or Moon, for they adored it by Offering Cakes to it, as to the Moon.

Adramus was the Tutelar god of *Sicilia*.

Comisalus, the Tutelar god of the *Athenians*.

Sesach, or *Saceus*, was an Idol of the *Babylonians*, who was adored as *Saturn* in *Rome*: The Festival gave liberty to all manner of Debauchery: Some think this to be *Juno*, it is mentioned, *Jer. 25. 26.*

Cabrus, the Tutelar god of *Pamphilia*.

Rephan, or *Remphan*, *Cim*, or *Chim*, named in the *Acts* of the Apostles; some take it to be *Saturn*; others a bright Star in the Firmament, worshipped by the *Israelites*, *Acts 7. 43. Amos 5. 26.*

Tanais, the Tutelar god of the *Armenians*.

*

Tuisco,

Tuifco, the Grand-Child of *Noah*, was adored by all the *Germans*, and from them by the *Tuifh* or *Tentanicks* and *Saxons*, our Ancestors; they drew him like an Old Man, naked, with a rough, hairy Mantle cast over one Shoulder, with a Rod Scepter-like, in his right hand.

Woden, is drawn like a warlike Prince, in perfect Armour, holding up a Fauchion in the right and his Buckler in the left hand, with a Crown upon his head.

Ther or *Theramis*, was another Idol God, worshipped by our ancient *Saxons* and *Angles*: It was seated on a Throne, with a Crown of Gold on his head, encompassed about with many Stars; robed, and in his right hand a Scepter.

Seater or *Crodo*, was another Idol adored by the ancient *Saxons*: He was drawn standing upon the Back of a Pearch Fish, being an Old Man, and Lean of Visage; a long Beard, with a Wheel in the left hand held up; and a Basket of Flowers in the right; in a side Coat girt with a long Girdle.

Ermenfentl, was a favourable Idol to the Poor, represented by a great Man amongst heaps of Flowers, upon his Head a Cock, on his Breast a Bear; and in his right hand a displaid Banner.

Theutates and *Hefus*, two Idols of the *Gauls*, and ancient *Britains*, supposed to be Warlike and Bloody Devils, for the Adorers were as Bloody here as in other Nations; being the common practice of the Fathers, to cut the Throats of their Sons, and Sacrifice them on the Altars of the *English* gods.

Ogmian, or *Omcana*, the *Gauls Hercules*, whom they painted with many Chains proceeding out of his Mouth, fastened to the Ears of a multitude of little people at his feet.

Friderast, *Prono*, *Helmsteed* and *Sime*, were all Idols of the old *Britains* and *Germans*; whose Descriptions we have not.

Flynt, an Idol so called because he stood, or was set on great Flint Stones, was made like the Image of Death, and naked, save only a Sheet about him; in his right hand a Torch or Fire-blaze; on his head the Lions fore feet, and one of the hinder feet on his shoulders; and the other supported with his hand as high as his shoulder.

Eriga, an Idol god also of the old *Saxons*, it represents both Sex of Man and Woman, an Hermaphrodite; in one hand she holds a sword, and the other a Bow.

Luna or the *Moon*, was a god they also adored in the shape of a Woman, with a short Coat like a Man, a Hood covering both head and shoulders round; with two long Als ears; She holdeth the Moon increasing in both hands before her Belly. Called the Queen of Heaven, *Jer.* 7. 18. and 44. 17.

Baal, or *Baalim*, an Idol of *Amon* and *Zydon*, and *Phanicia*, like a King standing on a Pillar, armed like a Roman, bare Thighs and Arms; a Mantle on his left Arm, with a Fauchion advanced in the right hand. His Priests were called *Chemarims*, *2 King.* 23. 5. *Jude.* 10. 6. *Jer.* 7. 9. *Ezek.* 8. 3. 5. *Hof.* 2. 16. 17. and 11. 2. *1 King.* 22. 52.

Baal-Peor or *Beel-phegor*, the god of the *Moabites*, *Hof.* 9. 10. adored in the shape of a Naked Man, with a Mantle on the left Shoulder and Arm, holding a Garland of Olive Leaves twisted in his hand above his head.

Chamos or *Chemoch*, or *Chemoz*, an Idol of *Moab*, *2 King.* 11. 7. it is an Image like a King in the Roman habit, a

Mantle on his Back, a Sword in the right, and a Shield on the left hand, between two Females in Robes and Vestments, one holding a Scepter, the other pointing up with her Finger, *Is.* 16. 12. *Jer.* 48. 13. 46.

Deumus, is a Devil worshipped amongst the *Indians* in *Calacate*; his Image is most horribly Pictured in a most ugly shape.

Grigre, is accounted a great God, or rather Devil in *Guinea*, who keepeth the Woods, whose Priests are called *Charobes*.

Houiculsira, is another god or Devil adored by the *Indians*.

Imperial Goddesses so fained to be.

8. **T**hey are such who are said to be Wives of the fore-said Gods; or else such as are their Assistants and Commissioners, as,

Juno, Wife of *Jupiter*, the goddess of Heaven, of Marriages and Riches, is drawn like a Woman of a middle Age, Crowned, with a Scepter in one hand, and a Pomegranate in the other, with a pair of Fetters lying at her Feet, black Hair, and a Sky-coloured Mantle; beset with the Orient Circles of a Peacocks Tail. She is also Depicted drawn in a Chariot by two Peacocks, or a Peacock standing by her.

Proserpina the Wife of *Pluto*, Queen of Hell, the Daughter of *Jupiter* and *Ceres*, whom *Pluto* stole away and ravished, and kept in Hell, who could not be delivered thence, because she had tasted of a Pomegranate in *Pluto's* Orchard.

Felicitas, a goddess of the *Romans*, whom they Invoked for prosperous success in their Enterprises.

Cybele or *Vesta*, the Wife of *Saturn*, she was goddess of the Earth, and of Fire and Burning; and Depicted with Towers on her head, sitting in a Chariot drawn by Lions. She was also called *Vesta*. *Numa Pompilius* dedicated to her an Eternal Fire, ordaining her Priests the Vestal Virgins to see to its preservation.

Diana or *Cynthia* or *Phoebe* and *Luna*, by all which names this goddess was called; she was Sister of *Apollo* or the Sun, and goddess of Hunting, Child-bearing, Virginitie and Dancing. She is drawn in a long Robe, girded about her Paps, with her Bow and Arrows; set in a Silver Chariot drawn by two white Stags; sometimes by two Horses, one Black, the other White; on her head a Crescent, and two Wings on her Shoulders.

Venus, the beautiful goddess of Love and Pleasure, the Wife of *Vulcan*, god of the Fire, she was Drawn like a Beautiful Lady, with rich Ornaments and Jewels, a Star upon her head, set in a Chariot with *Cupid* by her, drawn by Swans or Doves.

Arlaja is also a Diety of Beauty. And is Crowned with Roses, And Rising out of the Sea.

Aurora the goddess of the Morning and Light, is drawn like a fresh Virgin, Clothed in Blew. Set in a Chariot of Gold, drawn with White Horses, or Cranes; having her Fingers dropping with Dew. Some say, a handful of Roses, Gilliflowers and Lillies, with a Basket of Flowers in the other hand; and in Purple. Some call her *Tithia*, *Nilivra*.

Minerva, the goddess of Learning and Wisdom, called also by the name of *Tritonia*. She is painted with a Helmet and a Crest, with a Cock on the top of her Helmet, with a round Target on her Arm, and a Spear in the right hand: The Owl it is Painted by her.

Pallas, the goddess of Arms, a young Woman Armed with an Helmet or Head-piece, a Shield on her left Arm, and a Spear in the right hand, on her Helmet a Phoenix or Cock.

Bellona, the goddess of War, Depicted with the same Habilliments of War, (and Armed Back, Breast and Shoulders) as *Pallas* afore, by her side two Boys with Knives threatening each other.

Victoria, the goddess of Victory, a Woman in Arms like *Pallas*, standing upon Slaves as her Conquest, or else drawing them after her in Chains and Fetters.

Charity, the goddess of Charity, a Woman with 2 or 3 Children.

Gratia, the Graces, the three Daughters of *Jupiter*, they were Drawn, Fair, Naked, Wings at their Feet, holding each other by the hand.

Ceres, the goddess of Corn and Tillage and Plenty, called *Cypria* and *Tellus*; like an Old Woman in a Green Vesture, Crowned; in one hand a Globe, and in the other a Scepter: Some draw her with Corn about her head, and a Poppey head in one hand; and a Torch or Firebrand in the other.

Thetis, the goddess of the Sea; she was Wife of *Oceanus*, the Father of all the gods. She was Daughter of *Calm* and *Vesta*, the Mother of Rivers and Fountains.

Oreades, the goddess of the Mountains.

Hecate, a Monster with 3 heads.

Astrea, the Goddess of Justice.

Vesta, in the habit of a Virgin sitting on the ground, crowned with white Garlands.

Hebe, the goddess of Youth. And *Thalia*, the Deity also of Youth; the first was Daughter of *Juno*, whom she Conceived by eating of Lettice; she was Cup-bearer to *Jupiter*.

Opia, the Mother or goddess of New born Babies, whose Image Women with Child did wear before their Bellies for Nine Months; if the Child any way miscarried, they burnt the Image or beat it to Powder; else they Adored it if the Child lived.

Voluptas, the goddess of Marriage for young People, as Maids.

Lucina, the goddess of Child-birth; crowned with the Herb Dittany, and a burning Torch in her hand.

Flora, or *Chloris*, goddess of Flowers and Gardens, adorned with green, garnished with Flowers of Gold and Purple, having a Garland of Flowers about her Temples, and a Poësie in her right hand; with the Horn of Plenty (called *Cornucopia*) in the other Arm.

Nox, the goddess of Hell, the Mother of Eternal Night, Painted all Black, and in a dark Cell or Cave.

Nereides, *Nymphæ*, the Deities of the Water, as *Nereus*, *Doris*, Nymphs of the Sea. *Thetis* were Nymphs of Fountains and Rivers. *Proteus*, Neptune's Shepherd, and the Leader of his Sea Calves, &c. All these were Drawn Naked, with Scarfs flying about them; and Wings like the Finns of Flying Fishes.

Occasio, the goddess of Opportunity; painted on a Wheel, with Wings on her Feet, a long Fore-lock, and Bald behind.

Cardines, a goddess of the Romans, to whom they Sacrificed to keep them in Health of Body, especially the inward parts, as Heart, Liver.

Segacia, a goddess to make Seeds grow.

Meditrina, the goddess of Physick.

Nemesis, the goddess of Revenge, Justice and Punishment, Drawn with Wings, standing on a Wheel, in one hand a Golden Ball, in the other a Whip: Some Draw her with a Staff in one hand, and a Bridle in the other.

Suadela, the goddess of Eloquence.

Hamadryades, goddesses or Deities of the Woods. *Feronia* is also the goddess of the Woods.

Muse, the Muses or goddesses of the Poets, are *Calliope*, goddess of Epiques: *Clio*, of Lyriques: *Aurat*, of Love Poetry: *Thalia*, of Epigrammatists: *Melpomene*, of Elegies: *Terpsichore*, of Dramatiques: *Euterpe*, of Mymicals: *Polyhymnia*, of Panegyristis; and *Urania*, of Mystical Poetry.

Euphrosyne, the goddess of Chearfulness and Mirth.

Meretrix, the goddess of Whores and Bawds.

Metuta, the goddess of Jealousy.

Calatina or *Clotina*, goddess of the Stool, Houses of Office, and the Jakes.

Iusta Funebria, and *Iusta Exequiarum*, are Gods of Burial, and Funeral O-sequies; Funeral Deities.

Nymphæ, or Nymphs of the Woods, are Virgins of *Diana*; they are Depicted Naked, with their Garments girt about them, Arms and Shoulders Naked, with Bows in their hands, and Quivers by their sides.

Euterpe, the smooth tongued goddess of Flattery.

Fortuna, the goddess of Fortune or Chance, Depicted with two Faces, one Fair, the other Black and Ugly, holding Treasures, Jewels and Riches in one hand, and a Staff or Wand in the other: But she is generally Drawn standing on a round Ball or Bubble, in a large Sea-shell, floating in the Sea, holding a Sail by the Yard, with one hand above her head, and the other holding the skirt of the Sail; all her Body Naked.

Parce, or the Destinies, or Sisters, or goddesses of Man's Life; they are three, *Clotho* is young, *Lachesis* of a middle Age, *Atropos* Old and Decrepid: they are Depicted sitting all in a Row; the first and youngest draws a Thread from a Distaff, the second winds it about a Wheel; and the third, with her Kniffe or Scissars cuts the Thread off; they are invested with White Veils, and Coronets on their heads, wreathed about with Flowers of *Narcissus*.

These may suffice, having named the chief; for the rest they may not be set down but with great Labour and Charge; for it is recorded by good Authors; that the gods, goddesses, and demy-gods of the Centiles, exceeded the number of Thirty Thousand; and what were they (saith King David) no other than Devils, *Psal. 96. 5.*

Francis Holyoke, his Etymological Dictionary.

With what Authors they cite.

X. He beareth Or, an **Ancient in Robes Triple Crowned, supporting of a Crucifix** (or Christ upon the Cross,) on the Breast whereof is a **Dove display'd**, all within a **Gloze**, and the **Firmament** under his feet. This I have seen in several Glass Windows in Churches in *Cheshire*; and is the Emblem of the Trinity, Father, Son, and Holy Ghost; and may be fitly termed the *Romish* Figure of the Trinity; which *Daniel* describeth, *Dan. 7. 9. 13.* By the *Ancient of Days*, and the *Son of Man in the Clouds*, having Power and great Glory. Read *Rev. 20. 11.*

Ignorance hath begotten these Idolatrous and Superstitious Adorations in the hearts of People; especially such who are led through Blind Zeal; that they not only frame and fancy a Similitude of God; but also Worship and Adore that Image as God; when the Prophet absolutely forbids it, *Ija. 20. 17. 18.* asking them the question, *That seeing all Nations before God are less than nothing, To whom then will ye liken God? or what similitude will ye set up unto him?*

XI. He beareth Azure, our **Saviour in Purple Vestments**, holding up a **Mound** in his left hand, and his right extended to the **Dexter Chief**, proper. Others to make a long business, Blazon it thus, Christ the Saviour of the World, clothed in long Vestments, with a loose Mantle flung over his Arm and Shoulders, with the Glory of the Sun about his head, extending his right hand to the Dexter corner, and in his left a Mound, invironed with a Circle, and insigned with a Cross Avellane. This is born for the Arms of the Bishops Sea or Abby of *Saint Saviour*, in *Italy*.

XII. He beareth Argent, our **Saviour in his long Robe, close girt**, Purple; sitting upon a **Humett**, with a long Cross on his Shoulder, supported or held by his right hand, Or; in his left hand before his Breast a **Mound**, Azure, circled and crossed of the third. The like Coat to this is born by the See of *Chichester*, which *Mr. Morgan, lib. 3. fol. 64, 68.* Blazoneth thus, Saphire, a *Prestier John* (or *Presbyter John*) sitting on a Tomb-stone, having in his left hand a Mound, and his right hand extended, a Linnen Miter on his head, and in his mouth a Sword, all proper. It is now since our Protestant Reformation so Blazoned; but of old that Bishoprick did bear the Arms as I have set them forth in this example, *numb. 12.* which may be seen in several Glass Windows, especially in some old Manuscripts which I can produce.

XIII. He beareth Saphire, our **Lady with her Babe in her right Arm**, and a **Scepter** in her left hand, Topaz. Others Blazon it, our Blessed Lady, the Virgin *Mary*, in her long Robes close girt, with her Hair pendant, holding her Son in her right Arm, with Glories about their heads, and a Scepter in her left hand. This Coat belongs to the Bishoprick of *Salisbury*.

Ruby 2 Lions passant gardant Topaz; on a Chief Saphire, our Lady sitting on a Tomb, with her Babe, Crown, and Scepter of the second; is the Arms of the Bishoprick of *Lincoln*.

In the Sun, or invironed with the Sun, a demy Virgin *Mary*, with the Babe in her Arms, is the Crest of *Van Raker* of *Barvaria*.

Sometime she is born Sitting Crowned and Sceptered. But note this, that our Saviour, Virgin *Mary*,

with all the Apostles, Saints and Martyrs, in what posture soever they are born, either in Coats, or for Crests; they ever have either a Glory or Circle about their heads; and their Garments are long Robes close gird, generally with loose Mantles or Vestures carelessly cast over the Shoulders and Arms, as their posture requireth.

XIV. He beareth Jupiter, a **Woman clothed, close girt, and Mantled**, Mercury, standing on a **Cressant**, Luna, **crowned with seven Stars**, within the **Gloze** of the **Sun**, Sol. *Morgan lib. 3. fol. 11.* Blazons it more short thus, a Virgin standing in the Moon clothed and Crowned with Stars, Cristal; within the Sun, Topaz. But *St. John* in his Revelation shews himself to be the best Herald in Blazoning this Coat, who saith, that amongst the rest of his Wonders, *Rev. 12. 1.* *He saw a Woman clothed with the Sun, and the Moon was under her feet, and upon her head a Crown of twelve Stars.* This is born by the name of *Glorier*.

This is also the Order of *Burbon*, or the Knights of our Lady in *Burbon*, instituted 1360. with the word *ESPERANCE*. *Mr. Rosse* in his Religious Orders terms this the Virgin *Mary* entowered with the Sun; crowned with 12 Stars.

XV. He beareth Sable, a **Crucifix** proper. Otherwise Blazon it thus: He beareth Saturn, **Christ Nailed unto the Cross**, proper; having an **Escrowie** fixed over his head, containing four Letters, viz. I. N. R. I. Luna. These Letters signifie, *Jesus Nazareth Rex Judaeorum*, Jesus of Nazareth, King of the Jews. This is the Coat belonging to the Kingdoms of *India*.

XVI. He beareth Jupiter, an **Arch-Angel**, in his right hand a **Palm-Branch**, and in his left a **Sword**, all proper. Others to set forth the habit of the Angel, will say, **habited in a long Robe close girt**, proper.

Here it is at the Artists choice, whether they will use the word proper or not; for Angels in what posture soever they be, if they be in white Robes, with Golden Wings and Hair, are said to be in their proper colours, because they resemble Purity and Holiness, therefore need not to be mentioned; but to say an Angel (or so many Angels in such or such a posture) and no more. But if they be of one distinct Colour or Mettle, or of several colours, then it is necessary we express what colours they are off. By the name of *Raker Van Hoggen*.

XVII. He beareth Mars, an **Angel** with his hands **conjoined and elevated** upon his Breast. In the Blazoning of Coats wherein Angels are, beside what hath been spoken in the former example, take notice of these things.

First, of the difference between **Archangels** and **Angels**, the former being ever Insigned on the forehead or top of the head with a Cross.

Secondly, if Angels be in a standing posture, you need not to mention it, neither the displaying of the Wings; for if the Angels stand directly with a full Body, or presence (as it were) to our sight; then the Wings do spread themselves on both sides the Body: But if the Angels stand sideways, then their Wings will fall to be one behind the other, which have terms accordingly, as following examples will declare: And,

Thirdly, In the last place to mention the manner of their Robes (saying, habited in a long Robe close girt, and trussed up, and such like, as *Gwilliams* terms it) may very well

wen be omitted; for all Angels are Depicted in such kind of Garments; as it is mentioned Rev. 7. 9, 13, 14.

This Coat is born by the name of *Brangor de Carvilia*.

Such an Arch-Angel couped at the middle, saith *Gwilliam*, was the King of Arabia's Coat Armour, Anno 1413.

The like demy Arch-angel was born issuing out of Base, by *Gideon*, Bishop of *Pellicaster*.

XVIII. He beareth Diamond, an Angel volant in fesse, pointing with his right hand to the Heavens and his left to the Earth, his Garments Sardonyx, winged, Pearl, having an Escroll issuing out of his mouth, containing these Letters, G. I. E. D. of the third: The Letters do signifie the words uttered by the Angels who brought the Shepherds the Tidings of our Saviours Birth. *Gloria In Excelsis Deo*, &c. Glory to God on high, &c. This Coat may well becom any Ambassador or bringer of Happy News, especially such as first plant Religion in any Country.

XIX. He beareth Sol, an Angel in a genuine posture (or Kneeling) with his hand conjoined and elevated on his Breast, Mars: Wings in Sepulture, Luna: Of some, the Wings alter this form, being one behind the other, is termed expenced: In some Coats you shall find Arch-Angels and Angels genuant or Kneeling, with their Wings displayed, and when you need say no more but an Angel Kneeling.

But if the Angels be sideways, and the Wings behind each other, they are termed Sepulture (or Expenced,) yet this Kneeling with the Body full in sight, is not termed an Angel Sepulture; but an Angel Kneeling, the Wings Sepulture, by reason they are seen but by the halves. See numb. 23.

And this manner of Blazoning ought to be used to all Charges that stand sideways, or three quarterwise; as to fight there doth appear but half the Face or little more, with half the Body, with a small part of the Right Arm or Foot; then you shall term such thus, an Angel Demy faced praying, or in such or such a posture, Wings Sepulture; as you shall see in many examples in the handling both of Men and his several parts, as Head, Eyes, &c. chap. 17. numb. 6, 7. and also in the Treatise of Birds and Fowl, chap. 11. numb. 4, 21, 23, &c.

XX. He beareth Gules, a Demy Angel issuing out of a Cloud, holding the Head of St. John Baptist in a Platter, all proper. This is the Crest of the Worshipful Company of Tallow Chandlers, of the City of London.

XXI. He beareth Or, an Arch-Angel habited in a long Robe, Argent, ensigned on the Forehead with a Cross Patee, and girt over the Breast with a Salter, Gules, having in his right hand a Dart of the Field, and on his left Arm a Shield of St. George, standing in Triumph, and piercing through of a Dragon of the Third. Thus by Mr. Morgan, lib. 3. fol. 10, 11. who saith it is the Badg or appendant Jewel of the Order of St. Michael in France: Which more short may be termed St. Michael, (or an Arch-Angel) in Triumph over the Dragon, or Devil.)

After this manner is an Arch-Angel represented like an Armed Knight, with a Shield and Helmet ensigned with a Cross, triumphing over the great Red Dragon the Devil.

*

XXII. He beareth Gules, out of a Cloud, in the Dexter corner, an Arch-Angel in a Glory, with a Dart, casting Lucifer headlong into a Flame of Fire, issuing out of Base proper. This is also termed the Battel between Michael and the Devil, with his casting out of Heaven into the Lake of Fire and Brimstone. Here give me leave to tell you after this Fall, how many Orders of Angels still remained.

The Orders of Angels.

9. THERE remained still in Heaven (after the Fall of Lucifer, the bright Star, and his Company) mote Angels than there ever was, is, and shall be, Men born in the Earth, which God ranked into Nine Orders or Chorus, called the Nine Quiores of Holy Angels.

1. Is the Order of Seraphims, whose Governour or chief Arch-Angel is Uriel: Whose Ensign is a Flaming Heart and a Cross Staff.

2. Is the Order of Cherubims, whose Arch-Angel is Japhiel. Who are represented young, having four Wings to cover their Faces and Feet.

3. Is the Order of Arch-Angels, whose Head is Michael; his Ensign is a Banner hanging on a Cross, and Armed, as representing Victory; with a Dart in one hand, and a Cross on his Forehead.

4. Is the Order of Angels, whose Governour is Gabriel, whose Ensign is a Book and a Staff.

5. Is the Order of Thrones, whose Chief is Zaphiel or Sachiel; represented Kneeling, whose Ensigns are a Palm and a Crown.

6. Is the Order of Principalities, whose Arch-Angel is Chamael or Samael. Whose Ensign is a Scepter and Girdle across the Breast; being the Angel Guardian of Kingdoms.

7. Is the Order of Powers, whose Leader is the Arch-Angel Raphael or Raphel. Therefore his Ensign, of some, is made to be a Thunderbolt and a Flaming Sword, thereby to withstand the power of Evil Angels.

8. Is the Order of Dominions, whose Arch-Angel is Zadkiel or Sachiel; whose Ensign is a Sword or Scepter, and a Cross.

9. And the lowest is the Order of Virtues, whose Conductor and Leader is Haniel or Anael: Whose Ensign is a Crown of Thorns in one Hand, and a Cup of Consolation in the other.

Yet some Authors have them thus, 1. Michael. 2. Gabriel. 3. Samael. 4. Raphael. 5. Sachiel. 6. Anael. 7. Cassiel or Gaphriel.

Some Authors rank them thus, Seraphims, Cherubims, Thrones, Dominions, Vertues, Powers, Principalities, Arch-Angels, Angels.

Kings or Princes Infernal.

10. GOD never Erected any Order, Rule or Government, but the Devil did, and will imitate him: For where GOD hath his Church, the Devil will have his Synagogue. And as there is Orders and Degrees in

B 2

Hea

Heaven; Hell shall not be without; where it is said by the Learned, that in the Infernal Region there are Nine Orders (others say seven Kingdoms) over which there is as many Kings or Rulers.

1. The Order of **Pride, Uain-glow, and Honour**, whose Leader is **Beelzebub** or **Bael**.

2. The Order of **Lies, Fallacies and Doubts**, whose Head is **Python**.

3. The Order of **Mischiefs and Evil doings**, whose Head is **Belial**.

4. The Order of **Temptations, Inticements to Wickedness, Accusations and Punishments**, whose grand Captain is **Asmodeus**.

5. The Order of **Deceit, Fraud, Couzenage and Disguise**, whose Leader is **Sathan**.

6. The Order of **Airy Powers**, who can give Thunder, Lightnings, Hail, Rain, &c. whose Leader is **Mercurius**.

7. The Order of **Discord, War, Strife, &c.** whose Head is **Abaddon**.

8. The Order of ----- whose Leader is **Asmodeus**.

9. The Order of ----- whose Head is **Patmon**.

1. **Bael**, the principal King of all Devils and Evil Spirits; he hath three heads, one of a Toad, a Man, and a Cat. He hath under him 66 Legions of Spirits. Under him are these Princes.

Azazel, like an Old Man, riding on a Crocodile, with a Hawk on his Fist. He is the first Duke, having under him 31 Legions.

Barbas, or **Barbas**, is like a Lion; under him are 36 Legions.

Amion, or **Amion**, like a Wolf, with a Serpents Tail, spitting out Fire; under him are 40 legions of Fiends or Devils.

Barbatus, he is like a Sagitarius: He was of the Order of *Virtues*, and hath 30 legions under him.

Buer, is like a ----- and hath 50 legions under him.

Eusebius, is like a Musitianer, or the Philosopher *Alexophilus*; he hath 40 Legions under his power and command.

Botis or **Otis**, he is like an ugly Viper, if he put on human shape he hath great Teeth and two Horns, with a Sword in his hand; he rules 60 Legions of Devils.

Bathin, is like a Man with a Serpents Tail, riding on a Pale Horse; he ruleth 30 legions.

2. **Purson**, or **Cursen**, he is a great and potent King in the ----- He is like a Man, with a Lions Face, carrying a most cruel Viper, and rideth on a Bear, with Trumpets before him: He rules 22 legions of Devils which were partly of the order of *Virtues*, and partly of the order of *Thrones*. He hath under him

Eligor, or **Abigor**, like a goodly Knight, bearing a Launce and Ensign, and a Scepter; he governs 60 legions.

Lerale, or **Oray**, like an Archer with Bow and Quiver; he governs 30 legions of Spirits.

Malefar, or **Malephar**, the shape of a Lion, and head of a Thief; he rules ten legions of Devils.

Mozar, or **Fozati**, like a Bull; and rules 36 legions.

Ipos, or **Apporos**, in shape of an Angel; yet more obscure and filthy than a Lion; with a Lions head, Goose feet, and a Hares tail; he hath under him 66 legions.

Naberius, or **Cerberus**, in form of a Crow, 19 legions obey him.

Glafia-Labolas, or **Caacrinolaas**, or **Caafimo-las**, like a Dog, with Wings like a Griffen; and 36 legions hear and obey him.

Zephar, is like a Soldier; 26 legions are at his command.

3. **Belsheth** is a great King, and terrible in the ----- he rideth on a Pale Horse, with Trumpets before him, and all kind of melodious Musick; he was of the Order of *Powers*, and hath 85 legions at his command; Under him are

Sitris, or **Bitru**, appears with the face of a Leopard, and Wings of a Griffen. He is a Bawdy Devil, and hath 60 Legions under him.

Patmon, he is more obedient to **Lucifer** than other Kings are; he is like a Man riding on a Dromedary, and weareth a glorious Crown, before him goes an Host, with Trumpets, Cymbals, and all Musical Instruments. Some say he was of the Order of *Dominions*; others, of the order of *Cherubims*: There follows him two hundred Legions, partly of the Order of *Angels*, and partly of the Order of *Powers*. Note **Patmon** hath ever two Kings following him, viz. **Beball** and **Abalam**, and other Potentates, in whose Host are 25 legions.

4. **Belial**, is also a great King, and was the head of all the Angels that were cast out of Heaven, but was inferior to those that staid in Heaven; he is found in the form of an Exorcist or Conjuror, in the Bonds of Spirits; he hath under him 80 Legions, partly of the order of *Virtues*, and partly of *Angels*.

Bune, is like a Dragon with three heads, one like a Man, he hath 30 legions that obey him.

Fornus, is like a great Sea Monster; under him are 29 legions, partly of the Order of *Thrones*, and partly *Angels*.

Ronoue, he resembles a Monster, and hath 19 legions under him.

Verith, or **Beal**, or **Bolsry**, he is like a Soldier all in Red; red Colours and Horse, a Crown on his head; 26 legions are under him.

Asaroth, like a foul Angel, sitting on a Dragon, with a Viper in his right hand, he rules 40 legions.

Fozas or **Fozcas**, is like a strong Man; and rules 29 legions.

Furfur, is like a Hart with a Fiery Tail; rules 26 legions.

Marcholias, like a She Wolf, with Griffins Wings, and Serpents tail; he was of the Order of *Dominions*, under him is 30 legions.

Malphas, is like a great Crow; 40 legions obey him.

Aepar, or **Separ**, is like a Mermaid; rules 29 legions.

Sabnacke, or **Salmat**, like an Armed Soldier, with a Lions head, riding on a Pale Horse; he rules 50 legions.

5. **Sidonay**, or **Asmoday**, is a great King, strong and mighty; he hath three heads, one of a Bull, of a Man, and a Ram; he hath a Serpents tail, belcheth Fire out of his Mouth; Feet like a Goose, rideth on an Infernal Dragon; he carrieth a Launce and Flag in his hand, and

and goeth before others which are under the power of **Amaymon**. He hath under his power 72 legions of Spirits; under him are these Princes and Dukes.

Caap, or **Cap**, is of a Meridional shape; 66 legions obey him.

Shar, or **Scor**, is a dark and great Stork; he hath 30 legions.

Praceil, is like an Angel; he was of the Order of Powers, or Poteslates; and hath 48 legions under him.

Furcas, is like a cruel Man with a long Beard, and hoary Head, sitteth on a Pale Horse, carrying in his hand a sharp Weapon; 20 legions obey him.

Murmur, like a Soldier, riding on a Griffin, with 2 beere him with Trumpets; rules 30 legions, which were of the Order; partly of Thrones, partly of Angels.

Caim, is like a great Thrush; he was of the Order of Angels, and ruleth 30 legions of Devils.

Ratni, or **Raini**, is like a Crow, and was of the Order of Thrones, and governs 30 legions.

Palphas, cometh at road like a great Stork; hath 26 legions.

Focaloz, like a Man, with Griffins Wings; hath 3 legions; he was of the Order of Powers.

Uine, is a great King and Earl, is like a Lion riding on a Black Horse, with a Viper in his hand.

Bifrons, is like a great Monster; he hath 26 legions.

Samigin, is in the form of a little Horse; he hath 30 legions.

6. **Zagan** is a great King; and comes abroad like a Bull with Griffins Wings: he is head of 33 legions; under him are,

Onas, is like a Lion riding on a strong Horse, with a Serpents tail; and carrieth in his right hand two great Serpents hissing; and hath under him 30 legions.

Calac, like a Boy with Angels Wings, riding on a two headed Dragon; he hath 30 legions of Devils under him.

Somoy, is like a fair Woman with a Coronet about his middle; he rideth on a Camel; he hath rule over 26 legions.

Decarabia, or **Carabia**, he cometh forth like a Star; 30 legions are under him.

Amdufcias, is like a Unicorn; hath 29 legions under him.

Andras, is in an Angels shape, with a head like a black Night Raven, riding on a Black and Strong Wolf; with a sharp Sword in his hand; he is Author of Discord; and hath 30 legions under him.

Andrealphus, is like a great Peacock; he raiseth great Noises, and hath 30 legions under him.

Ole, is like a Leopard, and makes Men Mad, that they suppose themselves to be Kings, Princes, &c.

Aym, or **Haborim**, hath three heads, viz. a Serpent, a Man, and a Cat; he rideth on a Viper with a Fire-brand in his hand; he hath 26 legions of Devils at command.

Orobas, is like a Horse, and hath rule over 26 legions.

Capula, is a Lion with Griffins Wings; hath 36 legions.

Timeries, is like a Man riding on a Black Horse; he ruleth in the parts of Africa, he ruleth 20 legions.

Amy, is like a Flame of Fire; he hath the rule of 36 legions, which were partly of the Order of Angels, and partly of Powers.

Flauos, is like a terrible strong Leopard, in human shape he hath a terrible countenance and fiery eyes; he hath 20 legions under him.

*

7. **Balam**, is a great and terrible King; he hath three heads, of a Bull, of a Man, of a Ram, Flaming Eyes, a Serpents Tail, riding on a furious Bear, carrying a Hawk on his Fist; he governs 40 legions; and was of the Order of Dominions; under him are

Alloer, a great Prince (as all the other aforesaid are) like a Soldier riding on a great Horse; he hath a Lions Face, very red, with flaming eyes; he rules 30 legions.

Saltos, is like a gallant Soldier, riding on a Crocodile, with a Dukes Crown.

Uuall, is a great and terrible Dromedary; he was of the Order of Powers; and ruleth 37 legions.

Daagenti, like a great Bull with Griffins Wings; hath 33 legions.

Phoenix, is like the Bird Phoenix; he rules 20 legions.

Stolas, is in form of a night Raven; he hath 26 legions.

Apollyon, is a hideous Monster to behold, covered all over with Scales; having the mouth of a Lion; feet like a Bear, and Wings like a Dragon; Fire came out of his Belly; the Prince of Destruction, Rev. 9. 7, 8, &c.

Besides these there are other Infernal Spirits which are said to have power over all the rest, being chief of all, as

Lucifer, the bright Morning Star, being the principal Angel, for his Arrogancy, that he would needs be like God, was cast out of Heaven, and became the chief of Devils; and ruler of the rest.

Amaymon, is the Chief, whose Dominion is on the North part of the Infernal Gulf.

Soyson, is chief King, whose Dominion is on the South part of Hell.

Zimmar, hath his Kingdom on the East part; and is chief Ruler or King there.

Soap, hath the West part of Hell, where he ruleth as King.

Of the Orders of Angels, and the Fall of *Lucifer*, and his Fellow Devils, peruse

The Hierarchy of Angels: By Tho. Heywood.

XXIII. He beareth Or, a demy Angel in Sepulture, Gules, issuing out of a Cloud proper, sounding of a Trumpet Argent. This is also termed a demy Angel, half faced, with Wings Sepulture, &c.

In the Blazoning of Angels, I do not use the term proper to the Face, Hands and Feet; for they are ever understood to be of a fleshy colour like to that of a Man; except they be all of one entire Colour or Mettle, in which respect the naming of one colour, serves for all parts of the Angel.

Yet if the Blazoner please, he may use the term proper, but then he is tied, and of necessity he must add (that he is clothed in a long Robe, &c.) of such a Colour, which in the leaving out the word proper, he needeth to say no more, than an Angel in such a posture, and of such a colour, naming only that of his Garment. This is the Crest of Dr. John Richardson, Bishop of Ardagh, in the Realm of Ireland.

XXIV. He beareth Jupiter, a Cherub, Sol. This cannot properly be termed a Cherub; but a Cherub (or Cherubs, or Cherubims) head, the Cherub being described after in *numb.* 27. 28. but because Antiquity hath thus drawn them, I shall therefore follow it.

There

There needs no mention of displaying their Wings; for they are ever drawn thus, or according to the next example, *numb. 25*. Note also, that if there be but one in a Coat, it is called a **Cherub**, but if more, then **Cherubims**, Cherub betokening the Singular number, and Cherubims the Plural. Mr. *Morgan, lib. 3. fol. 10.* to make a distinction between this and the following Cherub, terms this a Cherub displaid, and that a Cherub, without any addition, which are but niceties. This is born by the name of *Hipofer*,

S 3 Cherubims O by the name of *Swift*.

S a Chevron between 3 Cherubims O born by *Chalener*.

In the Base of this quarter is a **demy Arch Angel sans Armes**, with a Scarf Salterwise over his Breast, and girt about the middle O the Robe A is the Crest of *Halen van Sambeim, a German*.

XXV. He beareth Gules, a **Cherub**, Argent, **Winged** and **Crined**, Or. This Cherub I have caused to be set here, to shew only the ways of bearing the Wings, and that is according to their being born, if on a Fesse or Chief, then there is a liberty to display the Wings; but if there be three in a Field, or four between a Cross, or five on a Salter, there being in such cases no liberty for an extended Wing, have them drawn more close and pendant, as this is: However, if the Artist will follow Mr. *Morgans* distinction, *lib. 3. cap. 1. fol. 10.* he is left to his liberty, and offends not.

Cherubims are represented young, to shew their continual strength; having Wings, to signify their swiftness of motion, and unweariness; their Garments White, to shew their Purity; or Gold, to shew their Sanctity; Garments on, to shew their Modesty; and girt, to shew their Readiness.

XXVI. He beareth Venus, a **Cherub** having three pair of **Wings**, the uppermost and neithermost are counterly crossed, and the middlemost displaid, Luna; so *Gwilliams, fol. 108.* He beareth a Cherub having three pair of Wings, the upper and neithermost conjoined, the middle displaid; so *Morgan, lib. 3. fol. 10.* And to save all this labour, it may as well be termed a Cherub with three pair of Wings, and no more.

When the Wings are of two Colours, then Blazon it a Cherub proper, Winged Argent, ponion e. l. Azure, and Crined Or; for the long Feathers are often born in Coats, of one colour, and the Ponion of another; see in Wings, *chap. 11. numb. 2.*

XXVII. He beareth Gules, a **Naked Boy sans Armes**, proper, Winged and Crined, Or. This is by some set out for a **Cherub**, being the whole Figure of it, as used in Armory; though according to Scripture Revelation, the Cherubims that covered the Ark of God in the most Holy Place of the Temple, are said to have Feet like Calves feet; by which it doth appear, comparing *Ezek. 1. 10.* and *chap. 10. 14.* together, that the Cherub hath not only the Feet, but the Head of an Oxe, or Calf, or Lion, or Man, as *Ezek. 41. 18, 19.*

XXVIII. He beareth Sable, a **flying Cherub**, with four heads, like a Man, a Lion, a Bull, and an Eagle, the Body of a Man, and Feet like a Calf; having four Wings, two displaid, and two covering his Body, Or. this may for shortness be termed *Ezekiels* Cherub, which

he thus describeth, *chap. 1. 5, 6, 7, 8, 10.* A living Creature of the appearance or likeness of a Man, with four Faces and four Wings, with straight feet, and soles like a Calves foot, with hands of a Man under their Wings; the heads were, one like a Man, another like a Lion, another like an Oxe, and the last like an Eagle: this was the Prediction of the Spirit dwelling in the four Evangelists, described by the four Beasts in the Revelation, *cap. 4. v. 7.* which they were ever Drawn with; as St. *Matthew* with an Angel having a Man's Face, St. *Mark* with a Lion, St. *Luke* with a Bull; and St. *John* with an Eagle; each Beast or Cherub having six Wings, and they were full of Eyes.

XXIX. He beareth Argent, an **Evil Angel demy faced**, in shape of a Naked Man, with **Eagles Talons**, **horned**, and **Winged** like a **Dragon**, Sepulture; Cloven Feet, having a Fire-Brand in his right Paw, and elevating the left proper: As the Devil or Satan is the Prince of Darkness, so he is described by dark and blackish colours.

That bad Angels as well as good are sometimes born in Arms, may appear both by this, and in an Escuchion pertaining to the ancient Family of *Trolles* in *Normay*, where the Devil was represented without a Head in a Field Or; having a Human shape, but with a long Tail; his Hands and Feet having Tallons like an Eagle, Gules. *Spher. lib. 1. fol. 8.*

Also a **Demon Sable**, issuing out of a Flame of Fire, in the Sinister Base; in a Field Argent, is a Coat belonging to a Noble Family in *France*. See *chap. 18. numb. 83.*

XXX. He beareth Sable, the **Devil**, or **Satan transformed** into an **Angel of Light**, having short Horns, Dragons Wings, Sepulture; a long Robe close girt, and Eagles Feet, pointing to the Dexter Chief with the left hand, and with the right to the Base.

The **Devil**, **Satan**, the **Prince of the Air**, the **Ruler of Darkness**, call him what you will; an Evil Spirit, a Wicked Angel; is born in Armory, and looked upon to be honourable, for the subduing of the works of the Devil, as *Medusas* head was to *Pallas*, though neither of them were delightful to others, more than to shew the Deformities of Nature.

The several Names of the Devil.

1. **I**T hath pleased God to inform our weak capacities of the diverse names ascribed to the Devil, whereby his Nature and Disposition is known to us, as

Behemoth, the great Elephant, a Brutish Creature, which sets forth his greatness and brutish nature, *Job 40. 10.*

Leviathan, a Creature that will not be tamed, *Job 40. 20. Isa. 27. 1.*

Hammon, a Covetous desire, so that nothing but ruine and destruction will satisfy, *Mat. 6. 24. Luke 16. 13.*

Daemon, one that is cunning and crafty, the Devil, *Mark 16. 17. James 2. 19.*

Cacodaemon, is perversly knowing; he will be worshipped as a god, yet he knoweth nothing of good, to be obtain-

obtained thereby; *Psal. 95. 5.*

Diabolus, is an Accuser or a Slandeter, *Job 1. 9.* and *2. 5. Rev. 12. 10.*

Sathan, is an Adversary, one that troubleth and molesteth, *Rev. 12. 12.*

Abaddon, a Destroyer, one that delights to hurt, *Rev. 9. 11.* in Greek he is called **Apollyon**, that is, Destroying.

Legio, or **Legion**, is many, a multitude, *Luke 8. 30.*

Spiritus, a Spirit, a Lying Spirit, *1 King. 22. 21,* *22. 1. 16. 16.*

Angelus, an Angel, the Angel of the Lord, the cruel Angel, the Angel of Satan, the Angel of Hell and Darknes; *1 Chron. 21. 12, 15. 2 Cor. 12. 7. Rev. 9. 11.* that is, a Messenger of the Lord, as the Executioner and Minister of his displeasure.

Draco, a Dragon, the great Dragon, for his Pride, and Force, and Strength; the red Dragon, for his Bloodiness, *Rev. 12. 3. 9.*

Serpens, a Serpent for his Policy, Cunning, and Craft, the Old Serpent from his Experience, *Gen. 3. 10. Isa. 27. 1. Rev. 12. 9. 14.*

An **Owl**, a **Kite**, a **Raven**, a **Pellicane**, from his ravening, and unsatiable desire of Devouring, *Isa. 34. 11. 15.*

Leo, a Lion, the roaring Lion, from his terrible noise, *1 Pet. 5. 8.*

Homicidus, an Homicide, a Manslayer, *John 8. 44.*

Mendax, a Liar, the Father of Lies, because no Truth is in him, *John 8. 44.*

Rex, a King, a Ruler of the Sons of Pride and Disobedience, *Job 41. 25. Eph. 2. 2.*

Princeps, a Prince, a Prince of the World, a Prince of the Air, a Prince of Darknes, *John 8. 12. Eph. 2. 2.*

Autor Peccatorum, the Author of all Sin and Wickedness, *1 John 3. 8.*

Devils Familiar with Men.

Penates, Domestick Devils, such as are of the household, and live quietly within Doors.

Lares, are Devils that trouble or haunt private Houses. Familiar Spirits.

Larvae, Spirits that walk in the Night, Night Spirits, Goblins.

Hanes, Walking Spirits, the Souls or Ghosts of the Dead, that vex and trouble Men in the way.

Circuli Terrei, a Familiar Spirit or Hagg, that supplies the Office of Servants, especially Maids, as to make Fires, sweep the House, fetch Water, and such like; these kind of civil Spirits, are in some places called *Hob goblins*, *Robin Goodfellow*, and *Hudgin*, or *Robin-Hood*, because he always wareth a Cap or a Hood. Some Lob ly by the Fire.

Jim, and **Ohim**, or **Jim**, are Spirits by whom Satan deludes Mens fantasies, *Isa. 13. 21, 22,* and *34. 14.*

Guteli, or **Trulli**, are Spirits like Women, which shew great kindness to Men; and hereof it is that we call light Women Trulls.

Familiares Daemones, Familiar Spirits, such as will come when they are called, and do what they are bidden, &c.

*

Incubus, and **Succubus**, Spirits that lie in Bed with Men and Women; the first Women, the latter Men, pressing their Stomachs; it is of some termed the Night-Mare.

Lamiae, **Fairies**, or **Elfs**, little Dancing Spirits, as **Faunus**, or **Satyri**, **Fairies** of the Woods or Fields; **Naiades**, of the Waters; **Orcades**, of the Hills.

XXXI. He beareth Argent, issuing out of the Base Sinister, a **Dragon**, or **Devils head**, Gules, casting out Fire and Smoak, with ugly Spirits therein, proper: This is termed **Hell-mouth**; according to that saying in the Revelations, *That Hell opened his Mouth, and there arose the smok of a great Furnace, and Locusts were therein, Rev. 9. 2, 3.*

XXXII. He beareth Sable, in Base the **Bottomless Pit**, casting out **Fire and Smoak**, with **Evil Spirits** therein, in the forms of Serpents, Toads and Adders, all proper; the bearing of these Hellish Vituperious, horrid and vile things, is to deter not only the Bearer, but also the beholder from becoming like them, by degenerating; for all are not Military Civil, yet may thereby become civilly honest.

10. **FROM** things supernatural, such as have their abiding in the Heavens; we come to such natural things as are under the moveable Sphere, and are contained in the four Elements; as for example.

XXXIII. He beareth Azure, the **Coelestial Sphere**, Or, **invironing the Terrestrial Globe**, proper. This may without any other additions be termed only a **Sphere**; which doth comprehend in it both the **Coelestial and Terrestrial Globe**: Though some will say a **Sphere beautified** (or **adorned and replenished**;) with variety of Coelestial Bodies, &c. which I hold needless, the Sphere being always thus set forth; this was the Shield of *Achilles*, that famous *Grecian* Captain.

Bull, Queen *Elizabeths* Clock-maker bore a Sphere for his Crest.

The Chief Circles in the Sphere.

- a the Circle Artick, or the Northern Circle.
- b The Tropick of Cancer.
- c The Meridian Circle, or mid-days Circle.
- d The Tropick of Capricorn.
- e The Zodiack or Ecliptick line, or circle of the Sun.
- f the circle Antartick; but more particularly.

The names of all the Circles in the Coelestial Globe, as they are imagined by Astronomers to be in the eight Heavens or Firmaments: To the intent that the measure of the Stars, Signs, Images, and other appearances therein contained may be the better demonstrated; of these Circles there are in all ten; of which some are great, others lesser; the greater Circles are such as pass through the Center or midst of the Firmament, and do divide the whole Circle thereof into two equal parts, of which there be these fix.

1. The

1. The *Equinoctial Line* or Circle, is that as divides the Sphere in the midst into two equal parts; and therefore is called the Girdle of the World. When the Sun toucheth this Circle which is twice in the year, viz. the 11 day of *March*, and 13 of *September*, at which time the Days and Nights are of an equal length, therefore called Equinoctial; and by reason this Circle divides the World in the very midst, those that dwell right under it, are said to have no Latitude either Northward or Southward, to whom the Days and Nights are always equal.

2. The *Zodiack*, or the *Ecliptick Line*, or the Circle of the Sun; it is an Oblique Line, crossing the Equinoctial Line, and doth divide it into two equal parts; one part lieth between the Equinoctial and the South Pole: This Circle is divided into 12 equal parts, and each part hath a particular Sign ascribed to it; and these are called the 12 Signs of the Zodiack or great Circle of Heaven: This Circle hath also its Axeltree and Poles, answerable to the Poles of the World, about which it turneth.

3. The *Colure* of the *Equinoxes*, or *Equinoxes*; And

4. The *Colure* of the *Solsticials* are two Circles that goeth crosswise through both Poles of the World from North to South, dividing one another in the Poles in two; the one passing the points of the Equinoctial, is called the Colure of the Equinoctiums; the other passeth through the points of the Solsticials, is called the Colure of the Solstices or Solsticials: The Sun coming to these Circles (by his yearly course in the Zodiack) divideth the Year into four Quarters, as Spring, Summer, Autumn and Winter.

5. The *Horizon line*, or *Sight Ender*, (so called because our sight doth end at it) is a great Circle dividing the Sphere into two equal parts, whereof we see the one above, the other is sunk under it out of our sight: That we term the Horizon in Architecture, which is even with the sight of the Eye, to whose Center all the lines tend thereward; in a word, by Horizon is understood as much of the Heaven as can be seen of us, even from the rising to the going down of the Sun.

6. The *Meridian Circle*, or *Mid-days Circle*, so called from *Meradies*, that is Mid-day; because the Sun coming to the South to this Circle, make Noon day or Mid-day; and after, it doth descend again; this is the great Circle that passeth through both Poles of the World, and through the Zenith, crossing on both sides, the Equinoctial; and right in the South and North the Horizon.

The lesser Circles are such as divide the Sphere into unequal parts, of which there are these four.

1. The *Tropick of Cancer*, or the Suns turning of *Cancer*; because the Sun coming to that point, and being at the furthest from the Equinoctial towards the North; then turneth again through *Cancer* towards the Equinoctial; this Circle is Northward from the Equinoctial, and runs Parallel with the same; and is drawn from the point of the Zodiack or Ecliptick line at the farthest distance from the Equinoctial.

2. The *Tropick of Capricornus*, this Circle is Southward from the Equinoctial; and is so called, from the Suns turning of *Capricornus* in the Ecliptick line; at which point the Sun is the farthest from the Equinoctial in the South; and

turneth again through that Sign, towards the Equinoctial.

3. The *Circle Artick*, or the *Northern Circle*.

4. The *Circle Antartick*, or the *Southern Circle*; these two Circles are drawn round the Sphere by the Poles of the Ecliptick Circle; these are of an equal distance from the Poles of the World, as the Tropicks are from the Equinoctial Line, called also the Polar Circles.

Besides these, there are diverse other Circles; some are said to be Parallels, some Right, some Oblique, some Moveable, and some Immoveable.

The *Parallel Circles* are the two Polar Circles, Artick and Antartick; the two Tropicks and the Equinoctial, which is in the very midst of them all.

The *Right Circles* be the two Colures, the Right Horizon and the Meridian, because these cut the Sphere of the Globe with Right Angles.

The *Oblique Circles* be the Zodiack, and the oblique Horizon; because they are said to cut the Sphere of the Globe with Oblique Angles.

The *Moveable Circles* are these, the Equinoctial, the Zodiack, the two Tropicks, and the Polar Circles; for they continually move with the Firmament; and are alike in all places.

The *Immoveable Circles* are the Horizon and the Meridian, which are said to be Immoveable; because in the turning of the Sphere or Globe they remain immoveable; for though we change both Meridian and Horizon by going from one part of the Earth to another, yet every place hath still its own Meridian and Horizon which remain immoveable.

The *Intrinsic* or *inward Circles* of the Sphere, are all such Lines or Circles, as ly inward in the material Sphere or Globe.

The *Extrinsic* or *outward Circles*, are those which inclose on the out-side, all the parts of the material Globe, as the Meridian and Horizon doth.

XXXIV. He beareth Gules, a *Celestial Globe*, Or. Thus briefly; but others will term it a Sphere without its Meridian or Foot: Others the *Celestial Circles*, with the Signs on the Zodiack. This is born by the name of *Cloughby*.

13. FROM the frame of Heaven with all its Circles; we proceed next to those Sparks or Spangled Bodies which give light unto our lower Orbe; and these are the Elementary Signs and Planets, which God the Supream Orderer hath set therein, to be unto us for Signs and Seasons, and Years.

XXXV. He beareth Sable, a *Star Argent*. Born by the name of *Ingleby*. It is better in Blazon to be termed an *Estile* or *Estoile*; in which we are to note these rules

If the Star or *Estoile*, have but six waved points, then you shall need to say no more, but an *Estoile* or Star, but if they have more (for they never have less) then you must have a care to express the number of the points.

Also if the *Estile* be Gold, you need not to mention its colour; for yellow is ever held to be its proper colour; if other-

otherwise, then to be named of what colour it is.
If but one Star be in a Coat, it may be termed the North Star, or a Pole Star. If two Stars be in a Coat, one opposite to the other, with a Fesse, Bend, or the like between, they are termed the two Pole Stars; or the Artick and Antarctic Stars. *Girilliams fol. 117. Morgan lib. 1. fol. 44.*

XXXVI. He beareth Azure, an **Escutle** of eight points, also a **Star** fulgent of eight Rays. Stars by reason of their distance, and the weakness of our sight seem to have resplendent Rays waving or warbling forth, for which cause Stars are made with their points waved. This is born by the name of *Esleffe*.

S the like A born by *Hapfard*.
S 3 Stars A born by *Stodart*.

XXXVII. He beareth Argent, a **Star** of sixteen points, Gules. Born by the name of *De la Hay*.

Stars are often found in Coats of Arms perforated or pierced; which some will not then take to be Stars but Spur-Rowels; Though the Telescope doth discover a seeming hole or spot in the body of the Planet Mars. Others are likewise charged upon; but with this difference, not exceeding the body of it; for it is infallibly to be noted, that the Star perforated or pierced, is ever round, all other piercings being repugnant to their nature.

B the like O born by *Momham*. Also by *Hedney*.
S the like A born by *Hokenhill*.
B the like A by *Ogard*.

XXXVIII. He beareth Sable, an **Escutle** of sixteen points Argent. The Star of so many Rays is thus drawn by *Morgan, lib. 1. fol. 44.* which seems to be rather a **Mullet**, or **Spur-Rowel** of four points, upon an **Escutle** of sixteen. Being now fallen amongst the Stars, it would not be much digression if I give the Reader an account of the Names of the Stars or Constellations, both in the Planetary Heavens, the Zodiack, and the North and South parts.

The Seven Planets described.

1. *Sol*, or the *Sun*; so called *quasi Solis*, being the Image of God and the Light of the World; the Gentiles worshipped him under diverse Epithets and Operations, as by the *Persians* *Belus* of *Euphrates*; the *Lybians*, *Amman*; the *Arabians*, *Saturn*; the *Affyrians*, *Jupiter*; the *Egyptians*, *Scrapis* and *Osiris*, as having many Eyes; the *Grecians*, *Apollo* and *Pagan*, and *Ether*; by the Eastern World, he was worshipped by the name *Bel*, *Belus*, *Baal*. He is represented as a Young Man, with a Mantle cast about him, with a Glory about his head, with a Scepter (having an Eye on it) in his hand. Drawn in a Chariot with Wild Horses, &c.

2. *Luna*, or the *Moon*, she was anciently Adored under the name of *Diana*, *Proserpina*, *Isis*, and sometimes called Sister, sometimes Daughter of *Phibis*, or the *Sun*.

She is represented like a Young Woman, Robed and Mantled, either holding a Cressant in her hand, or with it fixed on the top of her head, which is by some reputed to be Horns; with a Torch and Arrows, and Wings, to shew her motion.

3. *Saturnus*, or the Planet *Saturn*; he is said to be the most ancient of the Heathen Gods; and worshipped by the name of *Seater*, by the ancient *Saxons*.

He is described two several ways, as a Naked Old Man Mantled, with a Sythe in one hand, and devouring a Child; signifying thereby, the long continuance of time, and slow Revolution or Motion in the Heavens, being 30 years in running his course through the Heavens; others with a Serpent in his hand, biting of his own Tail; to signify the virulencie and biting cares of the time. See *Vesegan, p. 78.* where he is Drawn like an Old Man, with a Wheel on his left hand, and a Pail of Water full of Flowers in his right.

4. *Jupiter*, by him (as saith *Virgil*) all things receive life and motion, and therefore was called *Xenius*, the god of Hospitality, *Phibis*, the god of Love, *Heterius*, of Fellowship, *Homignus*, of Kindred, *Phratrus*, the god of Tribes; and *Ephorcius*, the god of Oaths, &c.

He is described, sitting on a Throne Crowned, with a pair of Globes Coelestial and Terrestrial in his hands, to shew his Immutability and Authority, and that both Heaven and Earth were in his power. Sometimes he is Painted with a Thunderbolt, as a Punisher of Impiety; and sometimes with a Scepter in one hand, and a Circle in the other, and an Eagle by him; or drawn in a Chariot by Eagles, with a Vail flaming about his head.

5. *Mars*, by his power Kingdoms and States are said to be defended and preserved. He is the God of War.

He is described to be a Man of War, drawn in a Chariot with two Horses, Terror and Fear; his Star is of a Red, Fiery and Ardent aspect.

6. *Venus*, she is called by the Heathens by the name of *Juno*, and *Isis*, others from her Beauty the Mother of the gods: This Star is so clear and bright, that the Rays of this one Star casteth shadows upon the Earth: When she prevents the Morning, and riseth Oriental, it is called *Lucifer* or the Morning Star; when she shineth from the Occidental or West parts, supplying the place of the Moon, she is named *Vesper*, or the Evening Star.

She is described to be a very Beautiful Woman, Drawn always with *Cupid* by her, with Bow and Quiver. She was Painted Naked, Crowned with Roses, sitting in a Chariot, drawn sometimes by two Doves, sometimes by Swans or Sparrows, to signify the nature of Carnal Love and Lust.

7. *Mercury*, he is said to be the Herald or Messenger of the gods. His Star is of a bright shining Gold colour.

He is described to have Winged Shoes and Hat, a Wand wrapped about with Serpents (called a *Caduceus*) to shew his swift and various motion; yet that Wisdom and Eloquence ought to be the guide, whereof the Serpent is the Emblem. He is said to be Red or Yellow Haired.

The Description of the Twelve Signs of the Zodiack.

1. *Aries* or the *Ram*, is one of the Signs in the Zodiack or Ecliptick Circle; and containeth 13 Stars; and is distant, with the bright Star in his head 68 degrees 17 minutes from the North Pole.

C

2. *Tau*

2. *Taurus* or the Bull, containeth 23 Stars; *Aldebaran* or the Northern Eye of the Bull, distant 74 deg. 14 min. North Horn of the Bull 61 deg. 45 min. South Horn of the Bull 69 deg. 7 min. distant from the North Pole.

3. *Gemini*, or the Twins, of some termed *Apollo*, and *Hercules* others *Castor* and *Pollux*. This Sign consisteth of 18 Stars, whereof three are bright, one on the head of *Castor*, another on the head of *Pollux*; the other on their feet; they are distant 72, 57, 61 deg. odd min. from the North Pole.

4. *Cancer*, or the Crab, containeth 9 Stars.

5. *Leo*, or the Lion, consisteth of 27 fixed Stars. *Regulus* or *Basiliscus*, the bright Star on the heart of the Lion with three other on the Neck, Back and Tail distant, 76, 68, 67, 73 deg. from the North Pole.

6. *Virgo*, or the Maid, is the middle Sign of the Zodiac, it consists of 26 Stars; the bright Star on the Northern Wing of *Virgo*, distant from the North Pole 77 deg. 3 min. called *Vindemiatrix*; the Girdle Star 84 deg. 34 min. distance. She holds a Garland in her hand, called by Astronomers, *Vindemiatrix*.

7. *Libra*, or the Ballance, or a pair of Scales, consists of 16 Stars, the bright Stars one on the North Ballance, and the other on the South Ballance are 75 deg. 32 min. and 82 deg. 2 min. distance from the South Pole.

8. *Scorpio*, or the Scorpion, consists of 28 Stars in the heart of the Scorpion, a Star called *Antares*, lyeth 64 deg. 28 min. distant from the South Pole.

9. *Sagittarius*, or the Archer, or the Shooter, represented by a demy Naked Man, shooting with a Bow and Arrow, fixed on the Neck or Shoulders of a Horse, it consisteth of 31 Stars.

10. *Capricornus*, or the Goat, is a Constellation consisting of 28 Stars; the Northernmost of the two Horns and Southernmost of the same, are 76 deg. and 74 deg. some minutes distant from the South Pole; the foremost and Westerly and Easterly of the two Lights in the Tail of *Capricornus* are 71 and 72 deg. some minutes distant from the South Pole.

11. *Aquarius*, or the Watery Sign, or Waterer, consists of 16 Stars; the 3 greatest on the left Shoulder, on the right Shoulder (and in the outermost stream of *Aquarius*, called *Fomahant*.) 82, 87, 58 deg. from the South Pole.

12. *Pisces*, or the Fishes, consisteth of 24 Stars.

f the Planets and Signs.

14. **N**OW the Planets, with the Signs in the Zodiac, with their Characters and signification, or things compared unto, take more briefly thus,

☉ the Character of the Planet *Sol*.

☾ the Character of the Planet *Luna*.

♀ the Character of the Planet *Venus*, a Beautyfull Star, and goeth before the *Sun*, and glittereth in the morning

*

for 6 months is called the Morning Star; but following the *Sun* for other 6 months is called the Evening Star.

♃ the Character of the Planet *Jupiter*, a bright Star.

♄ the Character of the Planet *Saturn*; it is a Pale Star.

♂ the Character of the Planet *Mars*; a Star Red as Fire.

☿ the Character of the Planet *Mercury*, a glittering Star, from whence a Quivering Beam glanceth or flasheth like that of *Venus*.

♈ the Character of *Caput Draconis*, or the Dragon Head.

♏ the Character of *Cauda Draconis*, or the Dragon Tail.

Next to the Planets, followeth the *Cœlestial Signs* of the Zodiac, or great Circle of Heaven, which are twelve in number; whose Characters and Descriptions, as much as is necessary for Heraldry, is as followeth.

♈ the Character of the *Cœlestial Sign Aries*. This is deciphered unto us by Astronomers, by the shape of a Ram; and is the first of the *Cœlestial Signs*; and is ascribed to the Rule and Government of the Month of *March*.

♉ the Character of the *Cœlestial Sign Taurus*, or the Bull, which is the second Sign in the Zodiac; and is ascribed to the rule of *April*; and so of the rest as they follow in their order.

♊ the Character of the *Cœlestial Sign Gemini*, described by Twins, or two Naked Boys.

♋ the Character of the *Cœlestial Sign Cancer*, or the Crab-Fish.

♌ the Character of the *Cœlestial Sign Leo*, described by a Lion.

♍ the Character of the *Cœlestial Sign Virgo*, or a Maid, or Naked Woman.

♎ the Character of the *Cœlestial Sign Libra*, or a pair of Scales.

♏ the Character of the *Cœlestial Sign Scorpio*, or the Scorpion.

♐ the Character of the *Cœlestial Sign Sagittarius*, described to us by a Shooter, viz. half a Man drawing an Arrow in a Bow, fixed on the Body of an Horse in the place of the Horse head.

♑ the Character of the *Cœlestial Sign Capricornus*, or the Goat.

♒ the Character of the *Cœlestial Sign Aquarius*, signified to us by a Naked Man pouring Water out of two Bottles; a Waterer, a keeper of Water; or a distributor of Waters.

♓ the Character of the *Cœlestial Sign Pisces*; represented by two Dolphin Fishes, lying one above the other, with the head to the tail one of the other. This is the twelfth Sign; and as before hinted, ascribed to be governor of *February*, the last of Months: And although the forefaid Signs, singularly and appropriately have their Month especially assigned them; yet all these 12 Signs, in every Month, at all times, every day and hour, every moment and minute of an hour, do concur in the Nativity of every Birth, although not equally, yet according to the more or less; and that Sign and Planet which hath the chiefeft Dominion at the Nativity, the same is the Constellation of the Infant.

Names

Names of the Northern Stars.

15. These Stars standing by the North Equinoctial line have Northerly Declination.
1. North Pole Star, called *Alrucuba*, or the North Star is distant from the North Pole 2 degrees, and about 39 min.
 2. *Ursa major*, or the greater Bear; called also *Arctos* and *Helice*; it consists of 27 Stars, of which read more in *Charles Wain*, numb. 26.
 3. *Ursa minor*, or the lesser Bear, is the next of all to the North Pole; it is called also *Helice minor*, or the lesser ----- because of its small Revolution, it is called also *Cynosura*, because it hath the tail of a Dog, though it be termed a Bear; it consists of seven Stars. See more of it in the 26 Constellation called *Charles Wain*.
 4. *Draco*, or the Dragon consists of --- Stars, and the brightest in the Dragons head, is 38 deg. and 23 min. distant from the North Pole.
 5. *Cepheus*, or the King of *Æthiopia*, consists of --- Stars; the Girdle of *Cepheus* is distant from the North Pole 21 deg. 3 min.
 6. *Arctophylax*, or *Ursa custos* Bootes, a Star set near the *Ursa major*, or following of *Charles Wain*.
 7. *Corona Borealis*, or the North Crown, it consists of 8 Stars; *Ovid* saith 9; and is distant from the North Pole 62 deg. 2 min.
 8. *Engonastus*, or *Ingeniculus*, the name of a Star in *Hercules* right Knee; it consists of 29 Stars, and is distant from the North Pole.
 9. *Lyra*, or the Harp, consists of --- Stars, and is distant 51 deg. 30 min.
 10. *Aquila*, or the Eagle consists of --- Stars, and is distant from the middle and brightest Star in the Eagle (called also the Vulture) to the North Pole 82 deg. 2 min. the Eagles Tail 51 deg. 31 min.
 11. *Avia*, or the Bird consists of 17 Stars, and is distant
 12. *Cassiopea*, or *Cepheus* Wife, is a Coelestial Sign, and consists of 13 Stars, whereof there is four bright Stars remarkable, one on the Breast of *Cassiopea*, called *Schedr*; one on her Hip, one on her Knee, and another on her Chair; the first being distant from the North Pole 35 deg. 24 min.
 13. *Perseus*, or the Son of *Jupiter* and *Danae*, a Constellation consisting of 26 Stars, whereof the brightest in his side, is distant from the North Pole 41 deg. 31 min.
 14. *Auriga*, or the Waggoner, called also *Hemochus*, and *Erichonius*, that is, a Man with a Bridle in his hand, for so he is painted; his Constellation consists of 14 Stars; the bright Star on the Waggoners Shoulder called *Capella*, and sometimes *Hircus*, is 44 deg. 26 min. distant from the Pole.
 15. *Serpentarius*, or the Serpent Bearer, called *Ophiuchus*, consists of --- Stars, the brightest in his head, is distant 77 deg. 7 min. from the North Pole; the Star in the left hand, and left knee of *Ophiuchus* 87 deg. 16 min. and 80 deg. 16 min. distant from the South Pole; the Star on the right Knee 74 deg. 49 min. from the South Pole.

16. *Serpens*, or the Serpent, consists of --- Stars, the bright Star in his Neck called *Ophiuchus*, distant 82 deg. 22 min.

17. *Sagitta*, or the Arrow, called also *Telum*, consisteth of 5 Stars.

18. *Delphinus*, or the Dolphin consists of --- Stars.

19. *Pegasus*, or the Winged Horse, called also *Equus alatus*, and *Hippus*, consists of 20 Stars, whereof 4 are most noted, one in the mouth of *Pegasus*, called --- a bright Star on his Leg, called *Sebest*, one on his Shaft, called *Marcab*, and another on the Wing; the first is 81 deg. 47 min. distant from the North Pole.

20. *Andromeda*, the Wife of *Perseus*, a Constellation, which consists of 13 Stars, of which 3 are bright ones, which are placed on the head, the girdle, and the southernmost foot, the first being 62 deg. 55 min. distant from the North Pole.

21. *Triangulus*, or the Triangle, or 3 square, consists of --- Stars.

22. *Guardes*, or ----- consists of 3 bright Stars; the middlemost or brightest, is 14 deg. 8 min. distant from the North Pole.

23. *Cetus*, or the Whale, consists of 22 Stars, the brightest in his mouth, called *Menkar*, is distant 87 deg. 20 min. from the North Pole; and the Northernmost in the Whales Tail 79 deg. 10 min. and the Southernmost in the Whales Tail 69 deg. 59 min. distant from the South Pole.

24. *Medusa*, or the Monstrous Woman, a Sign in Heaven, which consists of --- Stars; the bright Star in the head 50 deg. 30 min. distant from the North Pole.

25. *Orion*, by some called *Isagula*, a Constellation which consists of 33 Stars, and by some of 16 Stars. *Orions* Girdle, called the Cloth Yard, and the Ladies Cloth-Yard, are 3 bright Stars at an equal distance one from the other; and are distant from the South Pole 87, 73, and 82 deg. with some small number of minutes; the bright Star on his right, and another on his left Shoulders, are 82 and 84 deg. some minutes from the North Pole. This is those Bands of *Orion* mentioned *Job* 38. 31.

26. *Charles Wain*, called also the lesser Bear, or the Waggon, is the most remarkable of all the Northern Constellations, it consists of seven bright Stars in form of a Waggon and Horses. *Dubhe* or the North pointer, or the hinder Wheel, which points on the North Pole, is distant from it 26 deg. 20 min. the South pointer, or South hinder Wheel, is distant 31 deg. 40 min. by these two Stars is found the North Pole, keeping them in a direct line to it from the North Pointer, which according to computation is five times as far to it, as there is distance between these two Pointers. The North fore Wheel of the Waggon 30 deg. 56 min. the South fore Wheel of the Waggon 34 deg. 15 min. the next Horse to the Wagon 32 deg. 1 min. the middle Horse 33 deg. 8 min. the fore or outermost Horse 38 deg. 49 min. distant from the North Pole.

27. *Bootes*, or the Driver of the Oxen or Wain; he is to have the care of, and wait upon *Charles Wain*, consists of 22 Constellations. *Arcturus*, or the bright Star between his Thighs is 68 deg. 52 min. distant from the North Pole.

28. *Herculus* his Constellation consists of 29 Stars; that on his head is distant 75 deg. 8 min. from the North Pole. See the eighth Sign or Constellation, called *Engonastus*.

29. *Cygnus* or the Swan, consists of Stars; the Star in the Swans Breast 51 deg. 53 min. the Star in the Swans Tail 45 deg. 59 min. distant from the North Pole.

30. *Canis minor*, or the lesser Dog *Procyon*, it consists of 2 Stars, and is distant from the North Pole 83 deg. 52 min.

31. *Pleiades*, or the seven Stars; they were the seven Daughters of *Lycæus*, or *Atlas*; they are a Constellation consisting of 7 Stars, six bright, the other seldom seen, they are named *Alcione*, *Merope*, *Electra*, *Celano*, *Taygete*, *Sterope*, and the bright shining, *Musa*. These Stars are mentioned by God in *Job* 38. 31, 32. and 9.9.

Galaxea, or White way, doth seem to be a confluence of Stars; feigned by the Poets to be the Souls of the Heroes.

Via Lactea, or the Milky Way, this was occasioned by young *Hercules* spitting some of the Milk out of his Mouth which he received from *Junos* Breasts, which whited all that part of the Sky.

The Names of the Southern Stars.

16. These Stars here following, standing all to the Southwards of the Equinoctial Line, have Southern Declinations.

1. The South Pole Star.

2. *Cetus*, or the Whale; of this see in the North Constellations, numb. 23.

3. *Orion*. See it also in the North Stars, numb. 25.

4. *Lepus*, or the Hare, consists of 12 Stars; it is placed between the Legs of *Orion*. It is distant from the South Pole deg. min.

5. *Canis Major*, or the greater Dog, called *Syrus Canis*, consists of 18 Stars, and is distant from the South Pole 73 deg. 48 min. to this Constellation belongs 11 other Stars.

6. *Lupus*, or the Wolf, it consists of 19 Stars.

7. *Argo Navis*, or the Merchants Ship, consists of 41 Stars; one great Star in this Constellation, called *Canopus*, is never seen in Italy, or in any Countrey on the North side of it.

8. *Hydra*, or the Watery Serpent; it consists of Stars, whereof the bright Star on the heart of it, is 82 deg. 55 min. from the South Pole.

9. *Corvus*, or the Raven, a Constellation consisting of -- Stars.

10. *Centaurus*, or Centaur, or half a Man fixt on the Shoulders of a Bull.

11. *Corona Austrina*, or the South Crown consists of 13 Stars.

12. *Spica Virginis*, or the Virgins Spike, it consists of -- Stars, and is 80 deg. 48 min. distant from the South Pole.

13. *Ophiuchus*, or the Serpent bearer; see in the North Constellations, numb. 15.

14. *Caput Argol*, or Argols head, also called *Minervus* Shield, a Constellation of Stars.

15. *Equiculus*, or the little Horse, consists of 4 Stars.

17. **SUCH** is the resplendency of the Sun, that from its glory, all the rest of the Planets and Stars, (whither fixt or wandering) do receive their Light; yet the beautiful and blazing brightness of it, and the Moon, are oftentimes subject to the Passion of Darknes, and Eclipsing; of whose Glittering, Clouding, and Eclipsing, and variety of forms, these few bearings will demonstrate, with chap. 18. numb. 4. to 10.

XXXIX. He beareth Azure, a Sun in his **Glozy** (or **Splendor**) the Sun being thus born, needs no expression of its colour; for who knows not, that the chiefest glory and splendor of the Sun consists in its Beams, which cannot be better expressed than by Gold, or Gold Yellow. But if it be born in any other colour than this, it must be expressed, only Black excepted, as numb. 41. This Coat thus Blazoned, hath many Bearers, as by the name of *St. Ciere*, *Aldkrabam*, *Elebeham*, *Aldham* and *Nadall*; also by *Breitenacker*.

G the like born by *Richmond*.

S the like born by *Darnely* and *Rake*.

A a Sun G born by *Hurst*.

A the Sun beams G the face of the first, born by *Van Milburn*, and *Starn*.

A on the top of an Hill out of the Base V a Sun G born by *Van Sonnenburg*.

XL. He beareth Gules, the **Zodiack Circle**, Or, beautified or replenished with the Characters of the **Coelestial Signs**, Sable. This needs no other Blazoning but the Zodiack or Ecliptick Circle; for it is not the Zodiack, but some other thing, as a Ring, Hoop, or such like, if the Coelestial Characters be not upon it; again, the Zodiack Circle is ever born Bendways Sinister. This is born by the name of *Girdler*.

XLI. He beareth Argent, the **Sun Eclipsed**. When it is Sable, it needs no naming; for by Eclipsing, it is made dark by the body of the Moon passing between the Sun and us; so the Light is diverted from our sights. See chap. 18. numb. 8. This is born by the name of *Nightling*.

XLII. He beareth Azure, a **Sun Argent**, at the point of each Beam, a **flame** proper. The glorious and splendid shining of the Sun, is comprehended under these two Titles, the Sun Beams, or its Rayes.

Now, some will make a particular distinction between these; the Beams are that as shines directly upon a place, without any wavering or sudden motion therefrom; and the Rays (say they) are caused through the weakness of our sight looking upon it, to whom it seems to strain out and warble forth its brightness, which is nothing else but our conceit thereof; in which respect the Sun is ever drawn with Rayes and Beams; the streight ones being the Beams, and the warbling strains the Rays.

So then in such kind of bearing (if all the points be not occupied) take a care rightly to express on which of them the Charge is, whether on the Beams, or on the Rays.

Such a Sun O flamed in the points of the Beams, is the Crest of that worthy Gentleman, *St. Tho. Jones*, of *Shrewsbury*, Kt. Serjeant at Law, and one of His Majesties Chief Justices for *South Wales*.

XLIII. He beareth Sable, an Eye proper, in the Glory of the Sun. Born by the name of *Suz-Gilbert*. After this manner you shall find several Coats with Charges on the Sun; as a Rose A in the glory of the Sun, was the Badge of King *Edward* the fourth of *England*.

XLIV. He beareth Gules, in the Sun Argent, a Shield with a Cross, Gules: Others will term it a Shield of *St. George* in the Sun, Argent. Born by *Segiger*.

Such a Shield Lozengy A and B in the Sun O is the Crest of *Buena*.

In an old Grant made by *Thomas Clarendon*, principal Herald and King of Armys of the South parties of this Realm of *England* (for so he termeth himself) dated 26 Feb. in the first yere of the Reigne of King *Richard* the Thirde. Was confirmed to *Robert Roos*, Chapellayne and Registrar of the Fraternity of the Holy Trinity, and of LX Prestes of *London*, and all and every of the Brethren of the same Fraternitie, this Coat Armes, viz, parted by Cheveron, Azure and Goules, in Obliets set with in in Sonnes in their propre coloures.

Oblets are certain pieces of Mony, having the stamp of the 3 foresaid letters J. H. S. coined thereon within 2 or 3 Rings or Circles; and was given or offered of old in the *Romish* Church, for the maintenance of their Feasts of Charity; in value it was worth our Penny Farthing, and were called Oblets, from the Latine *Oblate*, and it from Oblationes. Sir *H. Spelman*, in his *Glossarij*, saith they are round Loaves of Unleavened Bread used at the Consecration of the Eucharist, having that mark Printed upon it.

XLV. He beareth Azure, a Dove displayed, Argent, in the Glory of the Sun. Some will term it the Holy Ghost, proper; and thus I have found it very anciently Blazoned, because the Holy Ghost descended on our Saviour after his Baptism in the likeness of a Dove; see *numb. 4. 5.*

After these examples, you shall find varieties of things born in Arms in the body of the Sun; now it is in your choise, whether you will in the Blazon, expresse the Sun first, or the thing in the Sun, as in these examples; for neither way can be reproved.

XLVI. He beareth Gules, one Raye of the Sun issuing out of the Dexter Chief Bendways. This is *Mr. Gwillims* Blazon, fol. 100. by which I suppose there should have been only a Ray with some small Beams, to distinguish it from a Pile waved; but seeing this hath a part of the Body of the Sun visible; I hold it may as well be termed the Sun issuing out of the Dexter Chief, with one Ray Bendwise.

Morgan, lib. 1. fol. 41. will not have either Sun, Moon, or Stars, to be termed issuant, but surmounting; because issuant seems rather to denote an exhalation or Meteor, than a Planet. Yet I hold no such matter; neither can either this or the following Coat be well Blazoned without the term issuant. This is born by the name of *Alder-ton*.

B the like, born by *Aldam* or *Alibam*.

XLVII. He beareth Azure, on a Mount, (or Hill) in Base, Vert; a Unicorn Argent, Jessant on the Sun. Others thus, the Sun issuant from behind a Hill in Base, debased with a Unicorn, all proper. This term debased is, when a thing lies upon another, or hath any thing in part visible behind it, as in this, where the Unicorn seems to be all over the Sun, or the Sun to be behind it. Some term it a Unicorn over the Sun. This is the Crest of *Gillycray*.

A Lamb thus in the Sun, is the Crest of the Worshipful Company of Merchant Taylors of *London*.

B on a Bank in Base, a Sun rising, both proper. Born by *Sumybank*.

XLVIII. He beareth Vert, a Naked Arm flected, the hand holding a Flower de Lis, Or, issuant out of the Sun. Thus you will find varieties of Coats, with Hands and Arms, Naked, Clothed, Armed, &c. issuing out of the middle of the Sun.

Here then take notice from the examples *numb. 43. 44. 45.* what it is to say (in the Sun) and *numb. 47.* what is (over the Sun) there is yet one other way of Bearing in the Sun, which is an overtopping of the Sun, as a Charge surmounting the Sun, or issued out of the top of it; but this kind of bearing, I never saw or found with any other Charge that demy Men or Women; and those in several habits, and holding of variety of things: I shall give you the Blazon of one, which I determined to have set in this Plate, but was omitted by the Graver.

He beareth Sable, the Sun in his Glory, surmounted by a demy Maid (or a Woman Naked) holding in her right hand a Palm branch, and in her left, a Sword, all proper. Blazoned also, a demy Woman issuant in the top of the Sun. But *Moreau, lib. 1. fol. 47.* saith this term surmount, is the most fittest and properest term to be used to any thing that is on the top of either Sun, Moon, or Star. By the name of *Shamsaff*.

XLIX. He beareth Sable, a demy Sun arising out of the Dexter Chief, Argent. Some term it a demy Sun, or the Glory of the Sun, or the Sun Rays out of the Dexter Chief. Born by the name of *Wishait*.

B the like A born by the name of *Rising*.

18. FROM the greater Light, we shall proceed to the lesser Light, the Moon; and give some examples of the varieties of its bearing.

L. He beareth Sable, an Increffant circled. This Word Increffant, signifieth the Moon in its Increment, or Increasing estate, from her entrance into her first Quarter till she come to her Full. The Moon needs to have no colour mentioned, if it be Silver; for the proper colour in Heraldry is taken to be so, both because of the weakness of the sight, as also to distinguish it from the Blazoning of the Sun. I term this also, an Increffant circled, or invironed in a Circle, or a Glory; to signifie thereby that it is a Moon in its Increfe, and to distinguish it from a meer Increffant, that hath no Face at all within it; for there

there ought to be a distinction of the one from the other. See *numb. 56*. This is born by the name of *Increase*.

Er. 3 such G born by *Symmes*.

G an Increffant A born by *Weber*.

G the like O born by *Descus*.

LI. He beareth Gules, a **Decreffant circled**, Or. This is the Moon in her Decreasing or last Quarter; when her Light is every Hour by degrees taken away, till she return to her Change. By the name of *De la Luna*. Some term it the Moon in her Wane. Note that the Increffant hath the Horns of the Moon turned to the Dexter side; and the Decreffant to the Sinister.

LII. He beareth Sable, a **Moon in her Complement, or Full**. Of some termed a Moon in her Plenitude. Born by the name of *Moonplane*.

B the like, born by *Chaffin* and *Herell*. The colour of the Moon, is always to be understood White; which if it be so, there needs no mentioning of it; if of other colours, then to be named, except Black, as in the next example.

LIII. He beareth Argent, a **Moon in her Detriment, or Eclipse**. Of some, a **Moon Eclipsed**, Sable; but naming the colour, being Black, is needless. This is born by the name of *Night*.

LIV. He beareth Argent, a **Cressant**, Gules, between four Characters of the Planets, *Sol*, *Luna*, *Mars*, and *Venus*, Sable. The Cressant it self, is the Coat Armour of *Cressy*.

Quarterly A and G 2 such S and 2 A by *Tatton*.

S a Cressant O born by *Hovel*.

G a Cressant O born by *Ottoburn*.

B the like A born by *Luce*.

B the like O born by *Raby*; also by *Rath'y*.

A 3 such G born by *Bunewill* inc.

LV. He beareth Azure, a **Cressant surmounted by an Estoile**, Argent, between 3 Planet Characters, viz. *Saturn*, *Jupiter*, and *Mercury*, Or. This Blazon sans Characters, is born by *Mynshull* of *Mynshull* and 3 such Cressants surmounted by Estoiles, is born by *Mishull*, of *Erdeswick* of *Cheshire*.

B a Cressant surmounted of the Sun O born by *Mons*.

S the like surmounted of a Mullet A born by *Denfell*.

But in my Judgment it is best Blazoned upon the Horns or Points of the Cressant an Estoile, or the like; surmounted being upon it, not over.

LVI. He beareth Gules, an **Increffant**, between four Characters of the Celestial Signs (or of the Zodiack Signs) viz. *Aries*, *Taurus*, *Gemini* *Cancer*, Or. This is an Increffant, as it was anciently used; but the modern Heralds generally make a Face in it; which we not improperly call a New Moon, or a half Moon; see *numb. 50. 51*. This is born by the name of *Signifer*.

B the like O born by *Balfwill*.

LVII. He beareth Gules, **two Cressants in point Fesseways**; between four Characters of the Signs of the Zodiack, viz. *Leo*, *Virgo*, *Libra*, and *Scorpio*, Argent. These are termed Fesse ways, to shew how they stand in the Field, for they might as well have stood one

above the other; and then they might be termed in point Paleways. These I find Blazoned only a Decreffant, and an Increffant; and two Increffants respecting one another, or two Cressants respecting. This is born sans Characters by the name of *Lozger*.

S the like, by the name of *Dowlight*.

LVIII. He beareth Argent, **two Cressants Indorsed**, Azure, between four Symbolical Signs (or Characters) of the Zodiack, viz. *Sagittarius*, *Capricornus*, *Aquarius*, and *Pisces*, Sable. This is also termed an Increffant, and a Decreffant in Fesse. This is sans the Characters born by the name of *Lommons*.

O two such G born by the name of *Fitzrill*.

S two such conjoined A born by *Fertager*.

S two such O born by *Leiser*. And also by *Van Fubbach*.

B the like with Faces O is born by the name of *Zily*.

LIX. He beareth Sable, **two Cressants Braced**, Or. If their Bracing were with the points upward and downward, then they should be Blazoned a Cressant Fretted or Braced, with another reversed. This is the stamp or impression of King *Charles* the Seconds Two Pences. The like is born *Braymon*.

LX. He beareth Azure, a **Cloud in Chief**, with the **Suns resplendent** *Glozy* or *Brightness* issuing thereout, proper. Or thus, out of a Chief Nebule; the Sun Beams illuant. Born by the name of *Van Burg*.

G the like proper, born by *Lesone*; which Mr. *Gwilliams*, fol. 120. thus Blazons, a Chief, on the lower part thereof, a Cloud; the Suns resplendent Rays thereout issuing, proper.

LXI. He beareth Gules, an **Estoile**, Argent, between **two demy Circles**, with the **Suns resplendent** *Glozy*, Or. By the name of *Kettle*.

The like on a Chief, is part of the Atchievement of the Family of *Brocson*.

LXII. He beareth Sable, **three Cressants Braced**, and **fretting each other**, Argent. Others will add, Fretting each other in Triangle; but they can be Fretted no way but this; and therefore they need no other term than three Cressants Fretted. The Stamp of a Three Penny Piece, in the now Reign of our Sovereign Lord, *Charles* the Second, &c.

He beareth Argent, **4 Cressants Braced** (or **Fretted**) in **Salter**, Gules; and is the Stamp or Impres of a Coin made by King *Charles* the Second, and passeth for Four Pence. Sometimes they are made so, that their Fretting makes a direct Cross; and then they are termed four Cressants Braced in Cross; but when the Fretting is in Salter; then it is named so; though others take upon them to set them forth thus; a Cressant with another reversed, braced (or interlaced) with an Increffant and Decreffant. See the Figure, lib. 1. chap. 8. numb. 7.

19. **W**E shall in the next place proceed to things produced in the Element of Air, in which there are several and various Products, which are born in Coats of Arms, and are such as follow, with their like.

LXIII. He

LXIII. He beareth Azure, **Aeolus Head, or Face,** in Chief, sending forth his Blast or Wind, into the Base, proper. *Aeolus* is feigned to be the God of the Wind; and as the Wind Bloweth where it listeth; so this Head may be set to send forth his Blasts which way the Bearer pleaseth. It hath been the fancy of some to term these Winds from the four parts of the World, set forth by the Compass, being East, West, North, and South; assigning the East to the Dexter Chief, the North to the Sinister Chief, the West to the Dexter Base, and the South to the Sinister Base.

I have seen a Devise in a Shield of four Faces in the 4 foresaid corners of the Escuchion, which represented the four Winds, all sending forth their Blasts to a Rock fixed in the Fesse, which may be thus Blazoned, he beareth Argent, a Rock Gules, blown upon by the four Winds, proper; I say proper, because the Wind was ever set forth by a Head or full Face, with swollen Cheeks, sending forth a Blast, which is always of an Airy colour, agreeable to that of the Field.

LXIV. He beareth Vert, two Heads in Chief, Dexter and Sinister, sending forth their Blasts Bendways, proper; termed the East and North Winds opposing each other. By the name of *Cambust*.

B the like, born by the name of *Tempest*.

The Names given to Winds by Seafaring Men.

A **Calm**, the Wind is Room, a scant Wind, fair, gentle Weather.

A **Breeze**, a small Airy Wind; a breath of Wind, as doth Daily keep its course, and blows out of the Sea landward.

A **Gale**, a little Wind, reasonable Wind, to bear the Top-sails.

A **Pleasant Gale**, that it may be perceived to blow, called also a Trip.

A **Fresh Gale**, the Wind blows brisk and sharp.

A **Stiff Gale**, when it blows strongly and stiff; termed Wind taught.

It **overblows**, it bloweth hard.

A **Gust**, a blast of Wind, Wind that hath intermissions.

A **Storm**, a Tempest, a grown Sea.

A **Spout**,

A **Loume Gale**, when it is little Wind.

An **Eddy Wind**,

A **Flake of Wind**,

A **Tornado**, a fierce Wind.

A **Mounthloun**,

An **Upercano**, a Terrible Wind that drives down all before it.

The **Wind Meers**, a large Wind, is a Quarter Wind, such as bloweth not streight, but wavering.

The **Wind shrinks**, is the Veering of a Wind, which gives notice of a Storm coming.

LXV. He beareth Azure, a **Comet, or Blazing Star, in Bend, Or.** All Flames of Fire, of what form or nature soever they seem, as Comets, Wandring Stars, Fiery Dragons, Fire Balls, and such like, proceed from a dry, hot, stinky exhalation, drawn up to the highest part of the Air, where it is set on Fire, and burneth till it hath consumed it self; and after the same nature is the *Ignis fatuus*,

or going Fire upon the Earth. This is born by the name *Fancy*.

G the like, born by *Whitbergoe*.

LXVI. He beareth Argent, on the Sinister side, out of a Cloud, an Arm reflected, the hand holding of a Thunderbolt, all proper. This is by some Blazoned the Arm of *Jupiter* or *Jove* out of a Cloud on the Sinister side, casting of a Thunderbolt. By the name of *Tremble*.

S the like proper. Born by *Flaming*.

The four Winds described.

EURUS, or the East Wind, is Emblemed by a Youth Naked, with a Scarf flying about, Wings upon his Shoulders, with puffed or blown Cheeks, with Wind coming out of his mouth (as all other Winds must be) his body like a Tawny Moor, and upon his head a Red Sun.

Zephyrus, or the West Wind, is drawn like a Youth with a merry look, holding on his hand a Swan with Wings displaid; on his head a Garland of Flowers.

Boreas, or the North Wind, is Depicted like an Old Man, with an horrid terrible look; his Head and Beard Snow white; with the Feet and Tail of a Serpent.

Auster, or the South Wind, is Painted like an Old Man, his Head and Wings wet; with a Pot or *U*n under his Arm pouring out Water, with which descends Frogs, Toads, Worms, Grasshoppers, and the like Creatures which are bred by moisture.

Euroclydon, or a Tempest, or Stormy Wind, is set forth by a grim foul faced Old Man, his Mantle torne and flying about, his hands griped as if he would Fight; compassed about with dark Clouds. But it is best described by a Ship split upon a Rock, the Masts and Sails, broken, rent, and flying about; Trees broken, and much bowed, with the Clouds dark.

LXVII. He beareth Sable, a Thunderbolt, or *Jupiters* Thunderbolt, Or. This is the form by which it is delineated, and being of one colour, it needs no more Blazon, or terms to set it forth; yet *Gwillims*, fol. 134. calls it a Thunderbolt in Pale, Inflamed at both ends, shafted Salterwise, and winged Fessewise, &c. all which terms are needless, except the particulars named, were distinct and various colours; then he had needed no more, but a Thunderbolt Sable, enflamed at both ends, shafted Gules, and winged Argent; or with such like colours. It is termed also *Jupiters* Thunderbolt, &c. But Mr. *Morgan*, lib. 1. fol. 50. draweth it without Wings, and his reason is good, because Wings being *Jupiters* Bird, was not Fledged till the next days work; therefore till then — *paris imperio a manebit*. This is the Arms of the Kingdom of *Scythia*, as witnesseth *Chassan-us*.

LXVIII. He beareth Azure, a Rain Bow issuing out of two Clouds. Here you may take your choise whether you will name them proper or not; for a Rain-bow is never born otherwise; the natural colour of it, is Red, Blew, Yellow and Green, as it were shadowed one into the other; if it consist all of Yellow, this is palish; if white, its defiled, or whelmish; if Blew, its fading; if red,

its

its a Blossom; it Green, its withering; and if it be of a Purple colour, its stand or staining; *Gwillim fol. 134* and *Murean, lib. 1. fol. 51.* term it a Rainbow issuing out of two peat Clouds in Fesse &c. This is born by the name of *Cloudingdale*.

B. a Rainbow issuant from the sides proper. Born by *Van Mozen*.

G. 2 Rainbows issuant from the sides proper, having an Arched Fesse betwixt G. Born by *Weylheim of Germany*.

A. 2 Rainbows coupled and endorsed Palewise proper. By the name of *Hacken*.

B. 2 Salmons counter naiant between 3 Rainbows, all between 3 Mullets of six points O is the Town Arms of *Prembut in Germany*.

Products of the Air and Water.

21. These things are the effects and products of the Airy Element, as it is either hot or cold.

Air, one of the pure Elements, it fills all places, for there is no vacancy but hath it; it is more weighty than Fire, being hot and moist.

Air thick and dark, is Cloudy Weather.

Air thin, is Mists, or that as dissolveth into Mifty Vapours.

Air temperate,

Air pure,

Bubble, is a Drop of Water falling into the Water, Air interposing maketh it a Bubble.

Congelate, or Coagulated, is a congeling of such vapours as are exhaled out of the Earth.

Comets, Flames, and *Ignis fatuus*; or such like, seen either in the Air, or wandering on the Earth; Dants or Sulphury Damps in the Earth; all proceed from dry and hot slimy Vapours drawn out of the Earth, and set on Fire by the heat of the Air; in the Air they are called Comets of Fire or Flames; on the Earth going Fires.

Cold, produced from the moistness of the Air, and want of the Sun, which naturally doth bind and congeal all waterish and moist bodies.

Dew, see Frost.

Dants, or Damps, see Comets.

Darkness or Night, is through Suns declining of our Horizon, and going under the Earth as to us, causeth the Firmament to be dark.

Distillations, are those waterish Vapours which the Sun draws up into the Air, which when the Sun is down, fall to the Earth again, and this we call Dew.

Drought, or Drouth, is an over dryness of the Earth and Air.

Eclipses of the Sun, is through the interposition of the body of the Moon between the Sun and the Earth, which taketh away part of its Light, but cannot wholly darken it; being the Moon is a far lesser body; see *numb. 76*.

Eclipses of the Moon are by the like interposition of the body of the Earth, between the Sun and Moon; so that the Moon cannot receive any Light from the Sun.

Exhalations, are such vapours and moistures as are drawn and exhaled out of the Earth by the heat and influence of the Sun.

Elements, see Air, Water, Fire, or Earth.

Element pure, is any of the four of themselves, without a Commixture of any of the other, as pure Fire, pure Air, &c.

Elements compound, are the effects and working causes in natural Bodies, and produce variety of Forms.

Frost, or Hoar Frost, is a cold moist vapour, drawn up a little way into the Air, and in the Night falls again on the Earth, where it dissolveth; and through the Cold there, congealed, becometh Frost; the more congealed is made Ice, if not congealed, but resolved into Water, it becometh Dew.

Froth or Fume is produced from many Bubbles, and the foulness or thickness of the Water, which the heat of the Sun congeals, which coming to an hardness, maketh the Refined Stone.

Fogg or Mist, is an unwholesome vapour drawn out of the Earth by the Sun, which at the loss of its Light and Heat, fall to the Earth again, like a white thick smoke.

Heat, or hot season, proceeds from the Sun, and want of Rain to cool the Earth and Air, which are naturally hot.

Heat doth thicken and harden all moist Bodies. Hail, is a Cloudy Vapour, resolved into Water, which in the fall through the Cold Region of the Air, is congealed, and so made Hail; the higher it cometh from above, and the longer it tarrieth in the Air, the greater and rounder it is.

Ice, see Frost.

Influence, is the effect or product of things by the mixture of the Elements one with another; as Fire and Air produceth Sweat or Drought, as they are predominant one above the other.

Lightning, see Thunder. Aristotle affirmeth that it is after the Thunder, but the Fire doth first appear to us, because the Eye is quicker of Sight than the Ear of Hearing. There is three kinds of Lightning.

1. Dry Lightning, which doth not burn but cleave, part, or divide in pieces.

2. Moist Lightning, which burns not, but altereth the colour.

3. Clear Lightning, which is of a Marvellous Nature, doth Kill and never touch; full Barrels by it are emptied; it melteth Money in the Purse; it breaketh the Sword, the Purse and Scabbard not perished, yea the Wax in them unmelted.

Light, or Day, comes from the Suns appearing in our Horizon, which gives a light in the Firmament, called Day.

Liquid body, any thing that is of a Waterish substance.

Mist, see Fogg and Exhalation.

Moisture, is a waterish cold humour, proceeding from abundance of liquid matter, arising out of a Conjunction of Air and Water.

Moist, is moist, and therefore rules all inferior bodies that are moist; for by her waxing and waining, the Seas, Floods, Rivers and Springs rise and fall; neither is there any other apparent reason of the Ebbing and Flowing thereof.

Rain, is a cold Vapour drawn out of the Earth and Water, by the influence of the Sun, into the Airy Region, from whence it falleth upon the Earth.

Rainbow, is caused through the shining and rebounding of the Sun Beams in Airy Clouds, each giving to other

other, a contrary reflection, which hollow, thin and unequal Clouds being in Opposition, and receive from one another the reflection of the Sun, causeth so many Rainbows one above another, at one and the same time. I have seen five Rainbows at a time, one above another, but each had a degree of faintness, or less perspicuous one than another, from the highest.

SNOW, is a moist Vapour, drawn up to the middle Regions of the Air, and there thickned, and Frozen into the body of a Cloud; and so congelated descendeth to the Earth.

SLIME, or slimy matter ariseth through Water and Earth commixt, being the Quintessence of both.

SUN, it is the Ruler and giver of Light to all inferior bodies, being the governor of the Day, and doth distinguish Times and Seasons. It is naturally hot.

STARS, are great bodies, enlightened by the Sun when opposite, by whole Constellations, Influences and Operations over all Created Bodies, they are guided and governed, as to all Earthly and Natural Actions, touching Life and Death. *Astra Regunt Homines, Jea regit Astra Deus.*

THUNDER, it is the quenching of Fire in a Cloud; or it is an exhalation hot and dry, mixt with moisture, carried into the middle Region, there thickned and wrapped into a Cloud; of this hot matter, coup ed with cold and moisture closed in the Cloud, groweth a strife; the heat beateth and breaketh out of the sides of the Cloud with a Thundering Noise, the Fire then disperfed is the Lightning.

Thick or Thin Air; see **Air**.

Temperate, is when the Air is neither too hot, nor too cold, but between both.

Clapours, are Mists, Foges, or waterishness of the Water and Earth, drawn or distilled out of them by the heat of the Sun, and carried up into the Air by his Influence and Virtue.

Water, one of the four Elements, it is Cold and Moist.

Wind, is a multitude of dry Exhalations drawn up from the Earth, and above the Earth enforceth here and there.

it; keep it under, and its a good Servant, and it will prove an unruly Master. This is Born by *Wilding*.

This is termed an *Ignis fatuus*, a Flame of Fire, having no Fuel to feed upon, which soon is extinct. S three Flames proper. Born by Monsieur *Jaques Armodis*.

LXX. He beareth Sable, a Flame of Fire. The *French* generally make their Flame of Fire after the manner of a Heart like this example, which for distinction we may term a Flame in torn or a reversed Heart, or a Heart reversed Flamant (or all inflamed) Born by Count *Jadamra*, Knight of the Oracle.

A a Chevron S between three such Flames, proper, is in *Barkley Church*, in the South Window.

A a Maus Heart G between 3 such Flames, is born by *Armodis*, of *France*.

LXXI. He beareth Sable, seven Fire Brands Flamant. This is also termed seven Bulets fired in one entire Flame; but more properly a Bone Fire made of many Bilets, because they are all burning together; or a Fire of so many Sticks, Cordals or Bilets. This is born by *Mech nick Gwillim* terms them seven Firebrands flamant and scintillant, that is Flaming and Sparkling.

LXXII. He beareth Argent, a Billet raguled and trunked on each side, Sable, flamed (or fired in three places,) proper. Born by the name of *Billetter*.

A 2 such B in Salter, flamed proper. Born by *Sherrish*. A *Dutch Coat*; and the Field O by *Prandier*.

O the like G flamed proper, is the Coat and Crest of *Van Prandt* of *Germany*.

O on a Hill V the like with four Flames proper, between two Estoiles S is born by *Grasewit*.

LXXIII. He beareth Argent, a Billet raguled and trunked, Gules, enflamed on the top; or a Stock of a Tree raguled and trunked, fired on the top. By the name of *Stockfire*.

A the like in Bend S enflamed proper. Born by the name of *Prandis*.

B the like on a Hill O flammant on the top, proper. Born by *Prandtz*.

Barry of 6 G and A the like in Bend B born by *Van Brandshidt* of *Alsatia*.

LXXIV. He beareth Azure, a Candle in Bend, Argent, surmounted of a Caper or Wax Light, in Salter, both flammant on the top, proper. By the name of *Chandler*.

Products of the Fiery Element.

22. **W**E shall in the next place give the Reader some few examples of Bearings, drawn out and extracted from the Fiery Element; there are of Fires three several sorts.

1. Natural Fire, that is only in the Element of Fire, which is above the Air.

2. Artificial Fire, which must be maintained with Fuel, as all Earthly Fires are, else they are extinct and perish.

3. Counterfeit Fire, such are all Fiery Vapours, which shew as if they were Fire, but are not, which soon vanish, like Sparks in Stones, in Glow Worms, and Fire painted on a Wall, and the *Ignis fatuus*, or going Fires.

LXIX. He beareth Vert, a Flame of Fire, the finding out of Fire was the Invention of all Trades, and perfection of Skill; yet let all be careful how they deal with

23. **F**ROM the Element of Fire there are these things produced.

Light, proceeds from the bright shining of the Fire, which ariseth from the Burning of the Fire.

Heat, hot, warm, sultry hot, or burning heat proceedeth from the more or less quantity of Fire.

A Spark, is a part of the Fire, separated from the greater Body of the Fire, which appears for a while, and then dieth or disappears. D A **Scin**

A **Scintillation**, or Sparkling of the Fire, is the sending of Sparks from the Fire, caused through something that will not burn well.

A **Flame** is a Sulphury Vapour contained in the Fuel fired, which when it comes to Burn, casts forth a Flame or Light, a bright, shining, burning Fire.

Fire, is one of the four Elements, and the purest of them all, being the highest; it is in it self Hot and Dry.

Gloze, is a Fire where there is no Flame, as in the Fire made with Charcole.

Flash is a Flame of Fire, soon Fired, and immediately gone, like Lightning.

Smoak, the moist Vapour, proceeding from the Fuel fired or burning.

Wild Fire, a Masterless Fire, is a Fire that cannot be quenched or put out, a Fire that will burn in the Earth, Air, or Water.

24. **H**AVING given you examples of Bearing from the Element of Air and Fire, it would not be amiss in the close of this place, to give the Reader a short Discourse of the Nature and Reasons of the Increase and Decrease of the Moon, the cause of the Eclipses, and how to understand the Conjunction of the Planets, all which is shewed in these three exemplary Figures.

The Changing of the Moon.

LXXV. The outward Circle is the Circle or course of the Sun; the second is the Circle of the Moon, and the inner Circle is the Compass or Globe of the Earth.

The Sun in his Course, having the Moon in her Monthly course, near to the Sun and above the Earth, is termed in Conjunction with the Sun, then she is in her Change, being all dark.

The Moon being in Opposition to the Sun, and having the Earth between them, then she receiveth her whole Light, and is in her Full.

The Moon after her Change having run to the eighth part of her Monthly Course, is in the Sextile Aspect, where she is said to wax or increase.

The Moon being in the Quartile Aspect, that is the fourth part of her Monthly Course, then she is half Full.

The Moon being in the Trine Aspect, that is, when she hath run the three eighths of her Monthly race, she hath three parts of her Globe enlightened by the Sun, and is near the Full.

The Moon being in Opposition to the Sun as above said, is in her Full; but passing her Opposition to the Trine Aspect again, she beginneth to decrease and lose her Light on the contrary side.

The Moon being gotten to the Quartile Aspect in her Wane, is half full of Light.

Then the Moon being again in the Sextile Aspect, it is in its Wane, or waneth and decreaseth, till it come to her Change; by which Figure you may fully understand the course, and how it Waxeth, and is at Full, and Waneth in all its Monthly shining: For the Aspects, see numb. 77.

The Eclipse of the Sun and Moon.

LXXVI. Here you have the Circle of the Sun, which is the outermost, the next is the Circle of the Moon represented by Pricks; having the Body of the Moon in two places upon it; that is above and below the Globe of the Earth, which lies in the middle of all.

Now the Moon being directly opposite between the Light of the Sun and the Earth; as much as it takes the Light from us, so much either more or less is the Eclipse of the Sun.

If the Globe of the Earth be in opposition between the Sun and the Moon; as much as the Earth doth overshadow the Moon, and keep the Light of the Sun from it, so much, either more or less, the Moon is Eclipsed.

Note, That the Sun cannot be totally Eclipsed, by reason the Globe of the Moon doth not contain that largeness, as to hide it from the World; yet the Moon may be totally darkened by the overshadowing of the Earth.

LXXVII. In this Figure, which is a Circle, you have presented to your view, the Course of the Sun, with the Sun in the Chief thereof.

The next is a Perpendicular Line, which goeth through the Globe of the Earth, being the Circle in the middle, which Line is the Conjunction Line, if the Planet be between the Sun and the Earth; or the Opposition, if the Earth be between the Planet and the Sun.

The next is a Triangular Line, which is the Trine Aspect, to any Planet that is at the corners of it; by it the Circle is divided into 3 equal parts or divisions.

The next in the Circle, is a Quadrangle, which divideth the same into four equal parts, and the Planets at the points thereof, are said to be in a Quartile Aspect.

The last in the Circle, is a Hexagon, or a six cornered Angle, which divides the Circle of the Sun into six equal parts, and is termed the Sextile Aspect to all Planets that do fall upon the said points; always provided, and be it noted, that the points of the Trine and Quartile Aspect, meeting with the Sextile points, take those points from the Sextile.

So that in short, the Sextile hath the next two points to the Conjunction; the Quartile the two next points below them; and the Trine hath the two lower; and the Opposition one point, which is directly at the bottom.

Example,

- ☿ and ☉ the Sun and Mercury in Conjunction.
- ☾ and ☉ the Sun and Moon in Opposition.
- ♄ and ☉ the Sun and Saturn in a Trine Aspect.
- ♃ and ☉ the Sun and Jupiter in a Quartile Aspect.
- ♂ and ☉ the Sun and Mars in a Sextile Aspect.

Here followeth other Names or Terms used by Astronomers in the Art of Astronomy; and the use of the Globes; set Alphabetically.

Angles, are certain imagined Points in the Heavens, notifying the farthest distance of any Orbe, Sphere or Cir.

Circle from the Center of the World.

Axeltree, is the imagined Line going from one side of the Sphere to the other, direct in the Diameter, on which the Earth hangs; therefore called the Axeltree of the World, at which end are two Points called the Poles or Axis.

Aris, see **Poles**.

Ashvada, is the Label or Pointer of an Instrument called an Astrolabe.

Aspect or Radiation, is the meeting of the Planets, or their joining with the Sun or Moon within such and such Degrees. Aspects are of several kinds, each being expressed by a peculiar Character; as followeth.

♄ The Conjunction Aspect is when the Planet is joined with the Sun or Moon, or other Planets amongst themselves, within one degree or less.

♊ The Semisextile Aspect is when they are under one Sign or Degree.

* The Sextile Aspect or Radiation, is when such are together within 60 degrees, or distant from one the other so much as 2 Signs.

♊ The Quintile Aspect, when they are distant one from the other 2 Signs 12 Degrees.

♋ The Quadrant or Quartile Aspect, when they are together within 90 degrees.

♌ The Tridecile Aspect, is when they are removed 3 Signs and 18 Degrees distant.

♍ The Trine Aspect, when they are 120 degrees distant, or parted 4 Signs.

♎ The Biquintile Aspect is when they are removed 4 Signs and 24 Degrees distant.

♏ The Quincunx Aspect is when they are 5 Signs distant one from the other.

♐ The Opposition Aspect, when they are 180 degrees distant one from the other, or 6 Signs or a Semicircle.

Altitude, is the height or elevation of the Pole (or any other thing) above the Horizon; that is, there is so many Degrees, Yards, &c. in height between such and such a place.

Astronomy, the Noble Art and Science of measuring the Heavens, and knowing the course of the Planets and Stars, their Rising and Setting, the diversity of Circles, Asterisms, &c.

Arithmetick, the noble Art of Numbring, and casting up of an Account from certain Numbers.

Astrology, the Art of conjecturing future Occurrences by the variety of Constellations, Planetical Aspects, and disposing of the Houses of Heaven and such like.

Augury, telling of Fortune by flying of Birds.

Bissextile, or Leap Year, which is every fourth Year, in which Month February hath 29 days.

Center, is the middle point of any round.

Combust, as Mars in Aries Combust, is as much as to say, Mars and Aries being under the Beams of the Sun.

Circulation, taking of rounds, the turning of things round after the manner of Circles, a turning round.

Circumference, the same to Circulation.

Coelestial, Heavenly.

Cosmography, the Description of the World, the same to **Geography**.

Charts, Paper draughts, either of the Winds, or situations of Countreys.

Calculate, the foretelling of a thing, to tell the event of a matter.

*

Diameter, the breadth of any round body from one side to the other, cross the Center point.

Degrees, the distance of places, or measure; a Degree is 60 miles on the Globe, the thirtieth part of a Sign; for into so many parts are they all divided.

Digits, a Digit; for 10 Digits make a Minute, as 60 Minutes make a Degree: It is the diminution of a Minute into any part under 10: Some write it Digits and Digit, which in Arithmetick is all the single significant Figures under Ten.

Ecliptick, the name of a Circle in the Coelestial Globe, or Circle of the Moon.

Epat, is a certain number taken out, or known by the Golden Number, through which the Age of the Moon is found out.

Ephemerides, is the consignment of the Planets, and where they be every Noon or middle of the day throughout the Year; and with what Aspect and Conjunction one is with the other.

Eclipse of the Sun or Moon, is the darkning of their Light, by having some solid or gross body interposing between it and us; as the Earth between the Moon and the Sun, is the Moons Eclipse; and the Moon between the Sun and the Earth is the Suns Eclipse.

Elevation of the Pole,

Golden Number, is a number of Years following one the other to 19; for at every 19 Year, it beginneth again at 1, 2, 3, 4, &c.

Geometry, the Noble Science of measuring the Earth, with the Longitude, Latitude, and Profundity thereof.

Geography, a Description of the Earth, with its parts. See **Cosmography**.

Horizon, is as much of the Heaven as we can behold at one time about. See **Equinoctial**.

Longitude, the length of any place.

Latitude, the breadth of any thing, or wideness of distance of one place from another.

Magnitude, the greatness or largeness of a thing.

Minutes, the diminutions of a Degree; 60 Minutes make a Degree which is 60 Miles.

Mathematick, one that Calculateth Nativities, an Astrologer, or a Mathematician.

Radir, or **Rader**, it is that part of the Heaven or Earth directly under our Feet, and so descending through to the Center of the Earth, to the Heavens opposite to our Feet.

North Pole, the height of the Heavens in the North part, about the which all the Planets and Moveable Stars do turn.

Oriens, **Oriental**, the East.

Occidental, the West.

Obe, the World, else taken for any round thing, as a Ball.

Pole, is the point of the Axeltree of the World; of which there is one in the North, called the North Pole; and another in the South called the South Pole; upon which Poles it is imagined that the Coelestial Sphere is daily moved about her Axeltree; the like Poles hath the Ecliptick or Zodiack Circle; these Poles are also called the Axis.

Profundity, is the depth of a place, or distance between the top of a thing to its bottom.

Progress, Progression, the going forward of a thing.

D 2

Prime

Prime, or Golden Number. See **Golden Number**.

Product, produce, a bringing forth or drawing out.

Retrogradation, a going back of a thing.

Revolutions, the turning round of a thing; as to begin here, and not to cease till it turn to this place again; the course of the Sun, Moon, and Planets, the turning of the Year, Times, and Seasons.

Sphere, is the Globe, comprehending both the Heavens and the Earth; or the Lines and Circles of the Celestial Globe, of which there are 3 kinds.

1. **Sphera recta**, or right Sphere, that is, when the Poles of the World lie, as the Horizon and the Equinoctial Line is one with the Zenith, standing upright.

2. **Sphera Parallela**, the equal distant Sphere, so named, when the Axeltree of the World stands right up,

*

having the one Pole in the Zenith and the Equinoctial and Horizon lying even.

3. **Sphera obliqua**, or crooked Sphere, so called because the Axeltree of the World, nor Equinoctial, do ly flat down or stand upright from the Horizon, but inclineth sloping.

Scruple, is the Tenth part of a Minute.

Second, is the half of a Minute.

Scheme, the Draught or Figure in Astrology, by which they know the Houses and Places of the Planets; a Figure to Calculate or tell a Man his Fortune thereby.

South Pole, that Pole opposite to the North Pole.

Terrestrial, Earthly.

Terrestrial Globe, is the great round body of the Earth.

Zenith, is that part of the Heavens directly over our heads, in what part of the Earth soever we stand.

Zones, or Climates, see *cap. 2. numb. 28.*

T O

T O

The Right Honorable,

WILLIAM-GEORGE-RICHARD STANLEY

Earl of Derby:

Lord Stanley, and Strange of Knocking, Viscount Kington, Baron of Wee-
don, Lord, Mohun, Burnet, Basslet, and Lacy; Lord Lieutenant of
the Counties *Palatines* of *Chester*, and *Lancaster*, and *Admiral* of the Seas
thereunto belonging; Chamberlain of His Majesties Court of *Exche-
quer* of *Chester*: And Lord of *Man*, with the *Isles* &c.

THIS Chapter in perpetual Memory of your Honors Loyalty to your Sovereign, a Pillar
of the Church: And a Support of the Country: is Dedicated to your Lord-
ship, by him who is your most Humble and Devoted Servant.

Randle Holme.

C H A P. II.

WE Proceed now to the third Ele-
ment, viz. Water. Of which we
will give some few examples of the
several wayes of bearing it in Arm.

Waters fresh and sweet, are reckoned amongst God's
peculiar Blessings, promised to the observers of his Law:
and those of chiefest rank. *Lev: 26 v. 7 For the Lord
thy God bringeth thee into a good Land, a Land in the which
are Rivers of Waters, Fountains and Depths that spring
out of the Valleys and Mountains.*

For it is agreed upon all sides, that the Sea is the Riches
of a Kingdom; and a fair River is the Riches of a City,
and Springs of water, the Safety of a House or Castle.

Now water hath its severall denominations according
to the places in which it hath its being, and station, as for
examples it is called.

Of moving Waters

1. The *Ocean*, the great and vast Waters that inviron
the great continent of the World, the main Sea.

2. *Sea*, this is a gathering together of many Waters,
so called by God himself: *Gen: 1 10. And the gathering*

together of the Waters be called Seas.

3. *Floods of Waters*, is the rising and falling, or the
ebbing or flowing of Waters. Floods in some parts are
called Tydes or full Seas.

4. *Streams*, is a violent gliding or running of Waters,
so as not to be Stopped; from whence ariseth the Proverb.
Its hard to strive against the stream.

5. *Rivers*, is the meeting together of many Springs.

6. *Arm or Branch* of the Sea, are such great and broad
Rivers, that are near the Sea, and run into the Sea: a nar-
row Sea between 2 Lands.

7. *Rivulet*, is a small River, or some few Springs
meeting together.

8. A *Brooke*, or *Rile*, a *Torrent*, is a running Water
from a Spring.

9. A *Poole*, or *Brook*, is a place of Water kept to-
gether and is fed or Supplied by Springs; the overplus
running away through Sluces, Defenders, Wyers and
over Cawfies.

10. *Spring* or a *Fountain*, are such places where Wa-
ters issue out of the Earth.

11. *Baths*, are Springs of Water in which Sick and In-
firm people wash and bath themselves: of which there
are two sorts the hot Bath, and the Cold bath.

12. *Spawes*,

Lib : 2

Chap : 2

fol 34

12. *Spaves*, are Springs of Water arising out of the Minerals of the Earth, which are Physicall waters, some purging by Urine, others by Vomit, and Stool.

13. A *Streight*, is a part of the Sea or Ocean restrained with narrow bounds, and then openeth again, as a way to the Sea.

14. A *Creeke* or *Bay*, is a Sea contained within a crooked shore.

15. A *Whirle Pit*, or *whirle Poole*, is the turning of Water into circles as it runneth away.

16. A *Chanell*, the deepest part of a River, there where the stream runneth swiftest: a running Ditch.

17. A *Rade*, is a place where a Ship may ride near land, and yet cannot ride Land-locked for all winds.

18. A *Sound*, is any great In-draught of the Sea, between two head lands, where there is no passage through.

19. An *Offen* or *Offing*, is to be out in the open Sea from the shore-ward; so for a ship to lye in the middle of a Channell, and comes not near the shore.

20. A *Cove*.

21. *Surges*, are the risings and fallings of the water in Waves; which by Sea-men have several other terms ascribed to them, according to their more or less, lifting up.

22. A *Gulfe* or *Bosome*, of the Sea. A Whirle pit or deep pit in the Sea, where water falls in, and cometh not out again.

23. A *Raging* or *troubled* Sea, is when the Seas and Waters rage and roate through a tempest in them. A tempestuous storme, Surges and raging waves.

24. A *Wave*, is a rising & falling of the Water through wind.

25. A *Ford* or *shallow* water, where Men and Beasts may go over on foot.

Terms about the Sea, and its Ebbeing and Flowing &c.

A calme Sea.

A becalmed Sea.

A working of the Sea.

A rough Sea.

An over-groan Sea.

The rut of the Sea.

Roaring of the Sea.

The Flowing of the Sea.

A quarter Flood.

High water or still water.

Full Sea.

A Spring tide.

Ebbe, or Ebbeing.

Quarter ebbe.

Halfe ebbe.

A low water.

A dead low water, or a

Neptide.

A shoale or shallow water.

A deep water.

A Gulfe.

The froth of the Sea.

Standing Waters.

If the waters be standing waters, having no shew or appearance of motion then they are called.

1. A Pond, or Pit, or Fish Pond; places of water in Fields or Commons, for Cattle to drink at, and where Gentlemen keep Fish: a place always full of water.

2. A *Mote*, is a large Ditch or Trench of water about Mansion or Hall houses.

3. A *Well*, is a sinking into the Earth to the Veins of Water that run through, which water is drawn up from thence by the help of a Rope and Bucker, or sweep.

4. A *Mare*, is a great broad standing Water in Ireland called a *Lough*.

5. A *Cistern*, is a place in a house in which water is kept for the use of the family: under the figure of a Cistern the Prophet *Jeremiah* *Jer: chap. 2. v. 13.* Reproves the Rebellion of Israel. *You have forsaken me the Fountain of Living water; and have digged Pits to your selves that will hold no water, and have made to your selves Cisterns, even broken Cisterns, that will hold no water.*

6. *Fens*, are weat & spungy Grounds, called also *Flars*, *Bogges*, *Moorish* ground.

7. A *Lake*, or *flash* of Water, is a little hole or place of water after a great Rain, not sunk into the Earth.

8. A *Ditch* of water, a place where water standeth and runs not away.

Sorts of Waters Natural.

Besides ordinary waters, there are waters of an extraordinary nature as,

1. *Bathes*, or hot Springs, of which some are very hot others blood warm. Others exceeding cold.

2. *Spaw* waters, are such Springs as proceed from Minerals or Mines of Nitre, Sulphure, Allome, Bitumen, Copras &c. And have their taste.

3. *Bryne* water, or salt water, which being boiled converteth into Salt.

4. *Cream* water, is such water as hath a kind of Oyl, or fat scume upon it, which being boiled, turneth into several Medicaments.

I. He beareth Argent, a Cloud issuing out of the Chief Sable, Distilling droppe of Rain. This is born by *Pilewater*. Rain is a cold vapour, an Earthly humor, or fumosities drawn up out of the Water & Earth, by virtue of the Sun, to the nether part of the middle Region, or space of the Air; and there through cold thickens, then dissolved: being thus ingendred falls on the Earth.

Thus of natural Rain, but for miraculus Rain, as milk, blood, stones, flesh, iron, fowle, corn, wooll, or Jupiters coming to *Dinae*, in a golden shower &c. I leave the Curious to satisfie themselves, both from Scripture, *Iosh. 10. 11.* And from *Pliny's Natural History lib. 2. chap. 58. Ovid Metamorph.*

II. He beareth Argent, a Chief waved Sable, Distilling droppe of Rain; in base the Waves of the Sea, with a Sea-horse Naissant proper.

This term Naissant is used from *Nascend* of *Nascor* to be born, as if the same were issuing out of the wombe, or middle of the water. This form of Blazon is peculiar to all liveing things that shall be found issuing out of the middle of any ordinary, or common charge and lyeth upon a part of Field, as this horse doth; having his head so much above the water as it comes into the Field. Here note also that the Sea horse Naissant, is no more then a demy Sea horse, the other part is supposed to be within the water. Yet some Blazon it in short thus Argent a Cloud Distilling Rain (or out of a Cloud a shower of Rain) Sable, in water a Sea horse Naissant (or swimmeing) Proper. This is born by the *Hipotespest*.

III. He beareth Argent, a Gorges, or whirle Pool, Azure. If this Gorges or Gorges, did fill up the vacui-
ty

ty of the Escochion, and that no part of the Field were concerned, then it is to be Blazoned thus, a Gorges, Argent and Azure. And this kind of bearing may be termed the Ocean or Sea, because there is nothing seen in it but Water. A **Gurge** is nothing else but the draught of a Pencil with a blewish Wave round and round inwardly: or after the manner of a Spirall line, beginning at the center, and going further off, as it turneth. And is Born by the name of *Gorges*.

IV. He beareth Vert, a **Fountain**, or a **Well of Water**. Thus Blazoned by *Guilliams*, and others, but I hold them more properly termed *Pitts*, or standing Waters; for a Fountain, & Well are contrary things, as you may see *numb. 9 10 11* and *14 15 16*. These are of some termed *Roundles* or *Roundlets Barry waved*. And is born by the name of *Wells*.

G the like wavey, A and V. Born by *Thymelten*.

A 3 such A and B. Born by *Fountain*.

V. He beareth Gules, a **Square Pitt of Water**, waved Argent, and Azure. By the name of *Pond*.

VI. He beareth Sable, a **Pitt of Water**, with severall sorts of **Leaves**, and **Flowers** about it proper. Born Anciently for the Crest of *Grosvenor of Eaton*, with a Falcon hovering over it.

VII. He beareth Argent, two **Bubbles**, and another rising out of the **Water in Base** proper. By the name of *Bubblenard*. A Bubble is Aire inclosed in Water, which flyeth about.

Azure 3 Bubbles. Born by *Aire*. Waters are also born Bendwise and in Fesse, as G a Bend-Sinister watery waved A and B. Is born by *Stammer*. And O a Fesse the like. Born by *Van Buren*.

VIII. He beareth Azure, a **Cloud** with an **exhalation** out of the **Sea**, all proper. Some term this, a **Pillar of Rain** issuing out of the **Cloud**, and falling into the middle of the **Sea**. But I rather take it for an exhalation, then Rain, for such hath been often seen by Mariners in their Travails upon the Seas. How ever either term of Blazon may serve. And is Born by the name of *Drought*. Some term it a **Sea spout**, which is a fall of water out of the Clouds for a League, or two in compass, like the fall of the Sea; that what Ship is within that compass, is dash't all to pieces.

IX. He beareth Argent, a **Well** Gules, the **Windle**, or **Turne**, Or, with the **Rope Pendant** into the **Well**, Sable. The Ground **paved** Azure. By the name of *Depwell*.

X. He beareth Argent, a **Well** Gules, with a **Rope pendant**, Or. Or *Jacobs Well*, *Joh. 4 11*. Because the *Well is deep, and thou hast nothing to draw the Water with, (as the Samaritan Woman said to our Saviour) how then shall this Well yield any supplies, had not a Rope been there for use?* This is born by the name of *Jaques*.

XI. He beareth Argent, on a **Hill in Base**, Vert, a **Well** Gules, furnished with a **Pole**, and **Sweep**, Or with a **Buckett**, and **Chain pendant**, Sable. This is the Coat Armour of *Sweepwell*. The like is born by *Polliard*.

B the like O. Is born by *Pronner Van Tabelhausen* of *Bavaria*.

XII. He beareth Argent, a **Bridge** of one **Arch** (or an **Arch**) over a **River**, running with a fall into the **Base**, between two **high and craggy Rocks**, Gules. Or a fall of water between two Rocks, with an Arch over it. By the name of *Waterfall*.

XIII. He beareth Argent, the **Sea**, with a **Rock** in the middle, joynd to the **Dexter side**, from whence issueth a **Spring** or **Spout of Water** all proper, Or in a **Sea-skip** of **Aire** and **Water**, a **Rock** fired to the **Dexter side** spouting out **Water**, (after some, gushing out Water) all proper. By the name of *Rockwater*.

XIV. He beareth Argent, on a **Grice** or **Step** in **Base**, a **Stone Cisterne**, Gule, **Basined**, with a **Pipe** on the **Sinister side**, **Swan necked** casting in **Water**, proper. By the name of *Fountaindale*.

XV. He beareth Azure, on a **Hill in Base**, Vert, a **Fountain** issuing water. Born by the name of *Pymley*. This may be termed a *Garden Fountain*, or a *Fountain of pleasure*, or *delight*, to distinguish them from those Fountains or wells mentioned *numb. 11 13 19 23*.

XVI. He beareth Argent, a **Garden Fountain** double **Cisterned**, Gules, issuing proper. These kind of *Garden Cisternes* have (in severall Coats and Crests where they are born) variety of *Figures* set upon the top, as *Angels*, *Lions*, or other *Beasts* sedant &c. Which thing ought to be named what they are: for such things often cause a great alteration in the bearings. This is the Crest of the *Company of Plummers*, with an *Angell* on top of it with a *Sword* in one hand and a pair of *scales* or *ballance* in the other.

XVII. He beareth Argent, a **Well** in **Base**, open on the **side**, Gules, fired on the **top** two **standards**, with a **Twirle** (or **Pullas**) and **Rod** with the **Rope** (or **chain**) **Pendant**. Born by the name of *Standdelsroy*.

XVIII. He beareth a **Sea Skip**, or **Aire** and **Water**, in the middle of the **Water** a **Rock** Gules. Or a **craggy Rock**. Born by the name of *Fortior*.

XIX. He beareth **Party per Fesse** **Aire** and **Sea**, on a **Rock** fired to the **Dexter side**, Gules, a **Naked man** lying a long, with a **Water pott** under his **Arm**, from whence issueth **Water** into the **Sea**. See *numb. 23*. This is termed by the Poets, the *God of the Fountains*, on a **Rock** sending forth **Water** from his **Fontall**. By the name of *Fountain*.

XX. He beareth a **Land-skip**, containing three **Hills**, one at a distance in **chief**, extending it self throughout the **Escochion**; the other in **Fesse** fired to the **Dexter side**, and the third to the **Sinister** and **whole Base**, in the **Valley** a **Mare**, with a **River** issuing from its **fleeting**, and **Reflecting**, and **Determining** in the **Dexter Base**, all proper. More briefly Blazoned thus. In a **Land skip** a **River** running in a **Valley** between three **Hills**, with a **Spring**, or **Mare**, at the **Head** of it, all proper. This is known with us by the name of the *River Dee*, or *Devia*, running amonge the *Hill* from the head thereof called *Pimble Mare*.

XXI. He beareth a **Sea-skip** airy per **chief**, a **Cape**, or **Promontory** or a **Neck** of **Land** thrusting it self unevenly into the **Water** from the **Dexter side** with **fleeting**

ing and reflectings proper. See of this numb. 31 32
By the name of *Cape of Good-hope*.

XXII. He beareth *per fesse*, *airy* and *Water*, an *Island* beset with *Trees* in the middle whereof is a *Summerhouse* with a *Spire* proper. By the name *Darlington*.

XXIII. He beareth *Argent*, a *Fontall* casting out *Water* (of some called a *Water pott*) or a *Scat-hra* which are things, out of which *Water* runeth. This is Born by the name of *Waters*. The Gods of the *Fountaines*, and the *Water Nymphs*, with the description of *Fountains* and *Rivers*, are all decyphered by men and *Women*, lving or leaning on such kind of *Potts* as this. It is termed a *Fontall* from *Fons* a *Fountain*, as being that by which *Fountains*, *Wells*, and *Springs*, are set forth.

XXIV. He beareth *Argent*, in the *Sinister Chief* a *Cloud* disilling drops of *Raine*, *Sable*; in *dexter Base* a *Cestern*, with the Image of a *Demy Lyon* with *Woman Breasts* Spouting out *Water* set on a *Pillet* within in it. Born by the name of *Digondover*.

2 IN the next place I shall give some examples of the last and heavyest of all the Elements, viz. *Earth* in which you shall see how the *Earth* is born in *Coats*, first in the whole, and then after in its parts.

XXV. He beareth *Gules*, an *Oybe*, or *Globe*, *Vert*. Born by the name of *Orball*. This is the Figure of the round *World* without any mention of *Land* or *Water* it being nothing else but a direct round *Ball*.

Azure. 3 *Orbes*, or *Globes*, *Argent* is the *Coat of Round*. This is a general bearing amongst the *German* and *Dutch* Families.

XXVI. He beareth *Azure*, a *Terrestrial Globe* with its *Equinoctial Line*, *Argent*. If it had been divided into two colours, then it had represented the *Earth* and *Water*. This is Born by the name of *Munerator*.

The like to this divided into two, viz. *A* and *G*. Is the *Crest of Schmeden* a *Smaden*. And the same with a *Parror* standing upon it with a *Stoned ring* in his *Becke* proper. Is the *Crest of Schiffer* of *Austria* in *Germany*.

The like parted with the *Zenith* and *Neder line* *B* and *A*. Is the *Crest of Van Clugheim*.

XXVII. He beareth *Vert*, a *Terrestrial Globe*, *Argent*, with its *Horizon*, the *Elevation* of the *Pole* with the *Zenith*; and the *Neder lines*, *Sable*. Which lines are so called, these letters will demonstrate. Born by *Wordall*.

a. the *Zenith Line*, being that part of *Heaven* just over us.

b. the *Elevation* of the *Pole*.

c. the *Horizon* or the *Equinoctial* or *Meridian line*.

d. the *Neder*. Being that part just under us.

3 3 *Roundlets* parted *per Crofs*. *A* and *G*. Born by *Dreward*. And the same *Gyrony* of 8 is born by that name.

XXVIII. He beareth *Gules*, a *Terrestrial Globe*, with all its *Lines*, *Argent*. The names of them, see

in the *Coelestiall Spheare*: chap. 1 numb. 33.

In the *Globe* of the *Earth* there are five Zones or *Climates*, one over hot, two over cold, and two *Temperate*; the two hot *Climates* are in the middle *Circle*, signified by. c. d. The two *Temperate* *Climates* are between the *Circles*. b. e. And the two *Frozen* or cold *Climates* between the *Circles*. a. f. See for them fuller spoken unto in the signification of *Words* about the *Globe* in the word *Zone*.

XXIX. He beareth *Azure*, the *Terrestrial Globe* proper, *Individed* with the *Meridian*, *Or*. This is the *Coat of Fitz Shakerley*.

B. a *Crofs* *patée* fitcht, and on a *Chife*, *Or*: Three *Terrestrial* of the first. By the name of *Eldred*.

XXX. He beareth *Azure*, the *Terrestrial Globe* fixed in the *Meridian*, with its *Pillars*, this is another way of drawing the *Terrestrial Globe*.

The *Globe* of the *Earth* is the *Center* of the *Coelestiall Sphere* and it is no more to be compared to the magnitude of the *Heavens*, then the point of a *Needle*, is in comparison of the *Circumference* of the whole *Earth*.

Yet this massy *Globe*, this body of the *Earth* is of a most vast bigness; for as *Astronomers*, *Geographers*, and the like do writ of it; they say that it is in compass round 21600 miles; and that the diameter, or thickness of it is 6872 miles, and Eight parts of Eleven, of a mile, as *Archimedes Rule* is; though others affirm it to be but 360 Degrees, which maketh in the *Circumference* or *Circute*. 5400 miles, the Diameter to be 1800 miles, and the Semi-diameter, from the *Surface* of the *Earth* to its *Center* 900 miles; But this is to be understood of *German miles*, which is three times as much as an *English mile*.

The *Earth* hath but one known great, and vast, *Continent* in it, which is seated about with thousands of *Islands* both great and small.

It is divided into four parts, which are these *Europe*, *Asia*, *Africa*, and *America*.

Europe.

First is *Europe*, which is the Northern part of the *World*, and lyeth under the *Tropick of Cancer*, which is divided into *Continents*, and *Islands*: the *Continent* is again sub-divided into severall *Kingdoms*, and *Empires*, and *Provinces*, as

Spain hath these *Kingdoms* in it, 1 *Leon* and *Oviedo*, 2 *Navarre*, 3 *Corduba* and *Granada*, 4 *Gallicia*, 5 *Biscay*, 6 *Tolledo*, 7 *Murcia*, 8 *Castile*, 9 *Portugall*, *Algarve*, 10 *Valencia*, 11 *Catelogne*, 12 *Aragon*.

France, hath these *Provinces* in it. 1 *Aquitaine*, *Gascogne* and *Xainmoigne*, 2 *Picton*, 3 *Anon*, 4 *Maine*, 5 *Tourene*, 6 *Bretagne*, or little *Britaine*, 7 *Normandie*, 8 the *Isle of France*, 9 *Belfia* or *la Beausse*, 10 *Berry*, 11 *Burbon*, 12 *Beavois* and *Auvergne*, 14 *Limosin*, 15 *Perigori*, 16 *Quercu*, 17 *Daulphine*, 18 *Languedoc*, 19 *Provence*, 20 *Picardie*, 21 *Champagne*, 22 *Burgundie*, 23 *La Bresse*, 24 *Burgundy County*, 25 *Lorraine*, 26 *Savoie*, 27 *Genova*. Which four last acknowledged not the *French Command*.

Italy. hath these *Regions* in it. 1 *Hesperia*, 2 *Lati-um*, 3 *Nasonia*, 4 *Oenotria* 5 *Lomlardy* and *Piedmont*, 6 *Tuscany*,
E

6 Tuscany, 7 Rome or the land of the Church, 8 Naples, 9 Genoa, 10 Venice, 11 Florence, 12 Millaine, 13 Mantua, 14 Urbine, 15 Parma, 16 Luca.

Belgia, or lower Germany, low Countreys or Neetherlands, which hath these Regions in it. 1 Flanders, 2 Zealand, 3 Lymburgh, 4 Luzenburg, 5 Gilderland, 6 Brabant, 7 Artois, 8 Hainault, 9 Namur, 10 Zutphen, 11 Holland, 12 West-Friez-land, 13 Utrecht, 14 Over-velt, 15 Machlyn, 16 Gronning.

Germany, hath these Countries in it. 1 East-Friez-land, 2 Westphalia, 3 Cleveland, 4 Alsatia or Elzas, 5 Franconia or Frankenland, 6 Rhene Palatinate, and Wirtemberg, 7 Helvetia, 8 Switzerland, 9 Val-tia, 10 Rhetia, 11 Suevia, 12 Bavaria, 13 Northgoia, 14 Austria with Corniola and Tirolis, 15 Bohemia, which containeth Silesia, Lusatia and Moravia, 16 Brandenburg, 17 Pomerania, 18 Mecklenbourg, 19 Saxonia, which containeth Turingia, Misnia, Voiland, and Saxonia, 20 Brunswick and Lunebourg, 21 Hassia, 22 Veteravia,

Denmarke, containeth in it these Countries. 1 Cimbricke Cherionesse, 2 the Balticke Islands, in number 35. Of which the four principall are, Zealand, or Sealand, Fionia, or Fuinen, Fimra, and Bornholmia, 3 Scandia.

Norway, on the Northwest of it lyeth Finnmarkia.

Sweden or Smetland, it containeth these Regions. 1 Lappia, Lapland and Sericjunnia, 2 Bodia, 3 Finland, 4 Gothland, 5 Suecia or Sweden.

Muscovia, this Kingdom standeth part in Europe, and part in Asia, called also Russia Alba or Sarmatia: it containeth these 1 Novogodia, 2 Plescovia, 3 Valadomire, 4 Rhezan, 5 Permia, 6 Severia, 7 Gandra, 8 Petzora, 9 Mulerie: & ten lesser provinces, which are these. 1 Smolensko, 2 Roscovie, 3 Rostovia, 4 Corelia, 5 Bielizozz, 6 the Kingdom of Cogan and Cytraban, 7 Taver, 8 Masiskie, 9 Wologda, 10 Jagra.

Poland, the chief Provinces in it are. 1 Livonia, 2 Lithuania, 3 Volinia, 4 Samozitia, 5 Podolia, 6 Russia Nigra, 7 Mazovia, 8 Prussia, 9 Podlussia, 10 Ozwitz, 11 Polland.

Hungary the great, (in which is the Batchmege Desert called *Campus Cumanorum*) is divided first into the upper Hungary, which containeth: 1 Jazygia, 2 Lombardy, in which is a part of Noricum and Austria.

Secondly, the lower Hungary, which containeth. 1 Pannonia the higher, wherein are these Provinces. 1 Valeria, 2 Stiria or Stiermark.

Secondly, Pannonia the lower, in which is 1 Slavonia, or Sclavonia, which contains these Provinces or Regions, Illiris, Dalmatia, Croatia, or Liburnia, 2 Bualia, 3 Mantina, 4 Dacia, which hath in it these, Transilvania, Moldavia, Walachia, Servia, Rascia, Bulgaria, Bosnia.

Greece, it is Divided into these Regions. 1 Peloponnesus, 2 Archaia, 3 Epirus, 4 Albania, 5 Macedonia & Thessalia, 6 Migdomia, 7 Thracia.

Peloponnesus, being divided into these Provinces.

1 Elis, 2 Messenia, 3 Arcadia, 4 Laconia, 5 Argolis & Archaia.

Archaia, is divided into: 1 Attica, 2 Megaris, 3 Boetia, 4 Phoris, 5 Aetolia, 6 Doris, 7 Locris.

The Islands dispersed in the Greek Seas are. 1 Palus Macotis, 2 Pontius Euxinus, 3 Tenedos in the River Hellespont.

The Islands in the Aegean Sea are. 1 Samothracia, 2 Lemnos, 3 Lessos, 4 Chios, 5 Euboea, 6 Scyros, 7 Salamis, 8 Sporades, 9 Cyclades or Iles, of the Arches, being 53 all in a Circle.

The Islands in the Cretan Sea are. 1 Creta, 270 miles long, 50 broad, 2 Claudi, 3 Dio, 4 Aegilia.

The Islands in the Ionian Sea are. 1 Cythera, 2 Strophades, 3 Zacynthus, 4 Ebinades, 5 Cephalenia, 6 Corcyra, 7 Ithaca, 8 Leucadia.

The Islands in the Adriatique Sea are. 1 Absirtides, 2 Cherso, 3 Weggea, 4 Grissa or Paga, 5 Lejina, 6 Corzola, 7 Zara, 8 Brazzia, 9 Lissa, 10 Arbe.

The Islands in the Mediterranean Sea are. Sicilia a large Ile divided into three Provinces. 1 Vallis de Nota, Mazarra and Mona, 2 Malta, 3 Corsica, 4 Sardinia, 5 the Baleares being 4 greater Iles, as, Majorca, Minorca, Ebuissa, and Olbissa. And the lesser are these; 1 Vulcanian or Aeolian Islands, 11 in number, the Chief are the Liparean Iles. 2 the Iles of Naples 18 in number, the Chief are, Ischia, Caprea and Anaria. 3 the Ligurian Iles, the Chief are, Elba or Ilva, Gallinaria and Giglio. And 6 Cades or Cales.

The Iles in the Ocean or British Seas are these. First great Brittain, which is divided into three Kingdoms: England, Scotland, and Wales.

England Anciently contained seven Kingdoms. 1 Kent, 2 South-Saxons, 3 West-Saxons, 4 East-Saxons, 5 Northumberland, 6 Mercia, 7 East-Angles. This Hierarchy, being united into one Monarchy it was divided into 39 Provinces or Counties, as. 1 Barksbir, 2 Buckingham, 3 Cambride, 4 Cheshire, 5 Cornwall, 6 Cumberland, 7 Darby, 8 Devon, 9 Dorchester, 10 Durham, 11 Essex, 12 Gloucester, 13 Haat or Hampshire, 14 Hereford, 15 Hertford, 16 Huntingdon, 17 Kent, 18 Lancashire, 19 Leicester, 20 Lincoln, 21 Middlesex, 22 Monmouth, 23 Northampton, 24 Norfolk, 25 Northumberland, 26 Nottingham, 27 Oxford, 28 Rutland, 29 Salope or Shropshire, 30 Somerset, 31 Stafford, 32 Suffolk, 33 Surrey, 34 Sussex, 35 Wornicke, 36 Westmerland, 37 Wiltshire, 38 Worcester, 39 Yorkshire.

Scotland contained anciently three Kingdoms, as. 1 the Scots, 2 Picts, 3 the Isles. But united under one Sovereign, it is divided into two parts by the great River Tay. Viz. The South which contains these Provinces or Shires. 1 Teisdale, 2 Merch, 3 Lauder, 4 Liddesdale, 5 Eskdale, 6 Annandale, 7 Niddesdale, 8 Galloway, 9 Carrick, 10 Kyle, 11 Cunningham, 12 Arran, 13 Cluydesdale, 14 Lennox, 15 Stirling, 16 Fife, 17 Strathern, 18 Menteicht, 19 Argyle, 20 Camire, 21 Lorne. The North is divided into these Provinces, as. Loquabrea, 2 Eravidalbin, 3 Perth, 4 Atholl, 5 Angush, 6 Mern, 7 Marr, 8 Bugnhan, 9 Murray, 10 Rasse, 11 Sutherland, 12 Cathanes, 13 Strathnacern.

Wales, it contained anciently, three Principalities. *Viz.* *North-Wales*, 2 *Powis*, 3 *South-wales*. But being united to the *English Monarchy*, it was divided into 13 Counties, as. 1 *Flynt*, 2 *Denbigh*, 3 *Carnarvon* or *Shirevon*, 4 *Montgomery*, 5 *Nerionth* in the North of *Wales* with the Isle of *Anglesey*, which makes a sixth. 7 *Brecknock*, 8 *Caernarden*, 9 *Cardigan*, 10 *Glamorgan*, 11 *Pembrok*, 13 *Radnor*, in *South-Wales*.

2. *Ireland*, which is divided into 4 Provinces, as First *Muster*, which contains these counties: 1 *Limrick*, 2 *Kery*, 3 *Corke* 4 *Waterford*, 5 *Desmond*, 6 *Holy-Cross* in *Tiferary*. Secondly *Leinster*, which contains 1 *East-meath*, 2 *West-meath*, 3 *Kilkenny*, 4 *Caterlough*, 5 *Queens county* 6 *Kings county*, 7 *Kildare*, 8 *Weisford*, 9 *Dublin*. Third *Connagh* which contains in it these counties, 1 *Clare* or *Tommond* 2 *Gallway*, 3 *Maio*, 4 *Slego* 5 *Leitrim* 6 *Roscommon*. Fourth, *Ulster* which contains these counties, as 1 *Dunghal* or *Tyrconnell* 2 *Upper Tyrone* 3 *nether Tyrone*, 4 *Fermanagh* 5 *Cavan* 6 *Monaghan*, 7 *Colrane*, 8 *Antrim* 9 *Downe* 10 *Armagh* 11 *Lough*.

The lesser Islands are. 1 The *Orcades* or *Isles of Orkney* in number 32 the chief is *Pomonia*, 2 the *Hebrides* in the west of *Scotland* 44. in number, the chief are, *Ila*, *Jona* *Mula*, 3 the *Sorlinges* or *Sylly Islands* in number 145. Of which ten are only of any esteem as *Armath*, *Agnis*, *Sampson*, *Sylly*, *Brefar*, *Rujco*, *St. Hellens*, *St. Martyns*, *Arthur*, *St. Marys*. 4 the *Spor des*, which are the *Isles of Man*, *Anglesey*, *Jarley*, *Gernsey*, *Wight*.

The lesser *Isles* then the forelaid, are *Preston*, *Helbrie* *Donnie*, *Londay*, *Chaldey*, *Than-rt*, *Cheppie*, *Cocket*, *Holy-farne*, and the *Calle* of *Man*.

The *Islands* in the Northern or *Deucalean Seas* are: 1 *Thule*, or *Shetland*, 2 *Greenland*, 3 *Island*, 4 *Freezland*, 5 *Nova Zemla*.

Asia.

Secondly *Asia*, which is divided into Continents and Islands. The Continent is again subdivided into severall Empires, Kingdoms and Provinces, as followeth.

Anatolia, which hath these Regions in it. 1 *Cilicia* 2 *Pamphilia*, 3 *Lycia* 4 *Caria* 5 *Jonia*, 6 *Lidia*, 7 *Aolis*, and *Mytia*, 8 *Phrygia minor*, 9 *Phrygia major*, 10 *Bithinia*, 11 *Pontus*, 12 *Paphlagonia* 13 *Gallatia*, 14 *Capadocia* 15 *Lycania*, 16 *Pisina*, 17 *Armenia minor*.

Syria, which hath these Regions in it. 1 *Phenicia*, 2 *Celo-Syria*, 3 *Syro-Phenicia*.

Palestine or *Juda*, and the *Land of Israel*, in which there is these Regions. 1 *Gallilea* the higher and the lower, 2 *Samaria*, 3 *Idumaea*, 4 *Judea*.

Armenia, which is divided into these Provinces. 1 *Colchis*, 2 *Georgia*, 3 *Turcomania*.

Arabia, which hath in it. 1 *Arabia Deserta*, 2 *Arabia Petrofa*, 3 *Arabia Fellix*.

Assyria, *Mesopotamia*, *Chaldea*.

Media and *Persia*, in this Empire are these Provinces 1 *Persis*, 2 *Susiana*, 3 *Carmania*, 4 *Gedrosia*, 5 *Drangiana*, 6 *Aria*, 7 *Arachosia*, 8 *Parapomusius*, 9 *Saca*, 10 *Hircania*, 11 *Ormus*.

Parthia.

Tartaria, in which are these several Provinces. 1 *Tartaria-precopenfis*, 2 *Tartaria Asiatica*, 3 *Ta tari Antiqua*, 4 *Zagathai* or *Scythia*. Which contains, 1 *Mah-giana*, 2 *Sogdiana*, 3 *Bactria*, 4 *Turcheistan* and *Zagataie*, 5 *Cathaie*.

India, This is the biggest countrey under one name of all the World, except *Tartaria*, and *China*: this country is divided into two Principal parts, *India* within *Gangem*, and *India* without *Gangem*. *India* inter *Gangem*, called also *Industan* is divided into 47 Provinces or Kingdoms. As 1 *Narsinga*, 2 *Malabar*, 3 *Balassia*, 4 *Cambaia*, 5 *Mandao*, 6 *Bengala*, 7 *Oristan* or *Orissa*, 9 *Canora* 10 *Dellie* &c.

India, extra *Gangem* or *India magnis*, or *India* the great which is divided into twelve Potentates, the most remarkable are. *Macin*, 2 *Arrachan*, 3 *Cambria*, 4 *Caurin-China*, 5 *Barma*: But the most powerfull are, 6 *Siam*, 7 *Pegue*.

China, is well nigh equal to all *Europe*, for it is said to be 3000 Leagues in compass, and 1800 Leagues in length: it is divided into 15 Provinces, in which there is no less then 70 Kingdoms.

- 1 *Canton*, which hath in it 37 Cities, & 150 Townes
- 2 *Fegvien*, 33 Cities, and 99 Townes.
- 3 *Olam*, 90 Cities, and 130 Townes.
- 4 *Sisnam*, hath 44 Cities, and 150 Townes.
- 5 *Tolenchia*, 51 Cities, and 135 Towns.
- 6 *Canfaie*, 24 Cities, and 122 Townes.
- 7 *Minchien* 25 Cities, and 29 Townes.
- 8 *Ochian* 19 Cities, and 74 Townes.
- 9 *Honnan* 20 Cities, and 102 Townes.
- 10 *Pagnia* hath 47 Cities, and 150 Townes.
- 11 *Xanton* 47 Cities, and 78 Townes
- 12 *Quinchen* 45 Cities, and 113 Townes
- 13 *Chegvian* hath 39 Cities, and 95 Townes.
- 14 *Sufnam* 41 Cities, and 105 Townes.
- 15 *Quinsay* 38 Cities, and 114 Townes.

The *Islands* disperfed in the *Mediterranean Sea*, as part of *Asia* are: 1 *Rhodes* 120 miles in Circuite, 2 *Carpathos* or *Scarpanto*, 70 miles in Circuite, 3 *Cyprus* 200 miles long & 65 broad, a Kingdom divided into 11 Provinces.

The *Islands* in the *Orientall Ocean* are chiefly these. 1 *Japan* 600 miles long, in which are 66 Kingdoms, the cheifest of which is the Kingdom of *Tenz*. 2 *Zeilan* 250 miles long, 140 broad in which is 6 Kings 3 *Mollucca* or *Molluccoes*, being in number 5 *Isles*: the cheif are *Tidore*, *Gilolo*, and *Terenate*, 4 *Banda*, or *Banton*, 5 *Java* the greater being 3000 miles in compass, and *Java* the lesser 2000 miles in compass, and is divided into 8 Kingdoms, 6 *Borne*, 7 *Summatra* being 700 miles long, and 200 broad in which are 29 Kings, the cheif are the Kings of *Pedor*, and *Acem*, 8 *Phillippine*, or the *Phillip Islands* which are in number 10000: besides these there is a Frie of *Islands* over against *China*, affirmed to be no less then 7448, and another Skull of them about *India* no fewer in number then 127000. All which layd together would make a continent as large as three of four parts of *Europe*.

Africa

Africa.

Thirdly *Africa* which is a Peninsula, joyned by a small neck of land to *Asia* it is divided into these Kingdoms and Provinces.

Barbarie, it comprehended the countries Anciently called, *Numidia Antiqua*, *Africa Propria*, *Mauritania Cesariensis*, and *Mauritania Tingitana*: But at this day it is divided into these Kingdoms. 1 *Tunis*, which is divided into 5 Provinces, *Constantina*, *Bugia*, *Ezzab*, *Tripolis*, and *Tunis*: 2 *Algeir*, it contains these five principall Cities. *Hubeda*, *Teedenit*, *Guagido*, *Argeirs*, and *Teljeine*, or *Tremisen*. 3 *Fesse*, which is divided into 7 Provinces, as *Fesse*, *Ham Lisnan*, *Septa* or *Senta*, *Tanger*, *Mehenes*, *Alcazer Gwer* and *Arguer*. 4 *Morocco*, which is divided into 6 Provinces, as *Morocco*, *Tangorvifta*, *Fessedet*, *Taradent*, *Massa*, and *Alarach*.

Numidia, is divided into these Provinces. *Staphilet*, *Dajfen*, *Dara*, *Lapsa*, and *Teffet*.

Lybia, is divided into these Provinces. *Huaden*, *Guargati*, and *Toberaum*.

Terra Nigritarum, or the land of Negro's or Blackmores. This is divided into 25 Provinces. 1 *Gualata*, 2 *Guina*, 3 *Tombutum*, 4 *Mell*, 5 *Cako*, 6 *Gialofi*, 7 *Benin*, 8 *Nu'ia*, 9 *Bornum*, 10 *Goaga*, 11 *Ganaga*, &c.

Aethiopia Superior, it comprehendeth the regions called *Aethiopia* before *Egypt*, *Trogloditica* & *Cinnamomifera*, and at this time there is in it 70 Tributary Kingdoms the chief whereof are these. 1 *Bernagassum*, 2 *Tigrematon*, 3 *Angote*, 4 *Amara*, 5 *Guagere* &c.

Aethiopia Inferior, it is divided into, First *Ain*: in which there are two potent Kingdoms, *Abex* and *Adell*. Secondly, *Zanzibar*, in which there are 15 Kingdoms or Provinces as: *Carova*, *Calen*, *Anzuu*, *Manculo*, *Balin*, *Melinda*, *Mamboza*, *Quila*, *Mofambique*, *Mombara*, *Mombizo*, *Macas*, *Emboc*, *Mordazugi*, *Safila*. Thirdly *Monomotapa*, it hath these chief Provinces in it: *Montana*, *Tocoa*, *Melchucha*, *Quinibebe*, *Bersaca* & *Barvagat*: Fourth *Cafraria* Fifth *Mamcongo*, in which are these Provinces *Congo*, *Sango*, *Bambu*, *Sanni*, *Bango*, *Patta*, *Pempa*, *Abundi*, *Matama*, *Qu'ama*, *Angola*, *Caongo*, *Congeris*, *Amilaze*, *Langelungi*, *Anziqu*, *Cuchi*, and *Laangi*.

Egypt, in it there are near 2000 Cities, the principall 1 *Alexandria*, 2 *Pelufium* or *Damiata*, 3 *Bubastis*, 4 *Heliopolis* or *Bejamie*, 5 *Siene* 6 *Thebes* 7 *Nicopolis* 8 *Campus* 9 *Arfinoc* 10 *Niloscopium*, 11 *Matared*, 12 *Coptus* 13 *Memphis*, 14 *Rosetta* 15 *Cairo* 16 *Gleba*, *Rubra* &c.

Cyrene, in which are these Cities. 1 *Fessan* 2 *Barca*, 3 *Cyrene*.

Islands in the *Ethiopick Sea* are, 1 *Magadiscar* 1200 Miles long, 2 *Zocotara*.

Islands in the *Atlantick Sea* are. 1 *St. Thomas*, 2 the *Princes Island*, 3 the *Gorgades*: These Islands are 9 in number. 4 the *Canaries* or *Fortunate Islands*, they are Seven in number, which are *Palma*, *Tenariffe*, *Gomera*, *Hierro*, *Lanfarotte*, and *Fuente*, *Ventura*. 5. The *Azores*, nine in number viz. *St. Mary*, *St. Michael*, *Gratiosa*, *St. George*, *Pico*, *Faiall*, *Flores*, *Corvo* and *Tercera*. 6 the

Hesperides which are two Islands: 7 *Pharos* a little Island over against *Alexandria*.

America.

Fourth, *America* or the new World. It is divided into two parts: *Mexicana* and *Pervania*, or *North America* and *South America*.

Mexicana containeth these distinct Provinces. First *Mexico* or *Nova Hispania*, which is divided into four parts. 1 *Gallicia nova*, 2 *Mechuacan*, 3 *Guastacan*, 4 *Tremistitan*. 2 *Quivira*, which hath two Provinces, *Cibola* and *Nova Allion*. 3 *Nicaragua*, in which are the Cities new *Granado* and *Les*. 4 *Fucutan*, in which are three Provinces, *Fucutan*, *Guatimala* and *Acafamill*. 5 *Florida* whose chief Cities are, *Arx Carolina*, *St. Helen*, *St. Mathews*, 6 *Virginia*, on the North part, whereof is new *England*, 7 *Norumbega*, 8 *Nova Francia*, 9 *Terra Corterialis* 10 *Estiland*.

Pervana, in which are these Provinces, 1 *Castella del Oro*, 2 *Nova Andalusia*, 3 *Nova Granata*, 4 *Cartagena* is the South of *America*, and containeth: 1 *Castella Aurea*, 2 *Guiana*, 3 *Peru*, 4 *Brasile*, *Chile*.

The Islands of *America* in the *Vergivian Sea* or *North Sea*: are 1 *Margarita*, 2 *Cubagna*, 3 *Trinidad*, 4 the *Bacalaos*, 5 *Boriquan*, 6 *Jamaica*, 7 *Cuba*, 8 *Bermudas*, 9 *Hispaniola*.

Islands in the *Pacificque Sea*, or *Mare del zow*: are 1 *Jusule Solomon's*, which are many in number, of which these three are chief, *Gavdalcanall*, *St. Thomas*, *St. Ijabella*. 2 *Jusule Latronum*, or *Ladrones*. 3 *Jamaica*, 4 *Hispaniola*, 5 *Cuba*, 6 *Camercana* Islands, which are severall, as *St. Martyn*, *Barbados*, *Martinino*, *Lucia*, *Viceme*.

Magelana or the *Terra incognita*, which is that part of the World lying near the South Pole, which is yet unknown to us whether Inhabited or not.

Of the Divisions of Kingdoms into lesser Parts.

From this great Division of the Globe of the Earth into Empires and Kingdoms, we may gather that there is a Sub-division of those greater Countries into less places, each of which hath its several denomination according to its Continent. A Kingdom then may be said to be divided into these severall parts

1 Provinces, Principalities, Archdukedoms, Dukedoms, Earldoms and Countries. These are places governed by great persons of such and such qualities under the Sovereign or Supream of the Kingdom.

2 Counties, Shires and Ridings, Barony's.

3 Hundreds and Wapentakes, Knights fees.

4 Lordships, Towns, Maners.

7. Halls, Mansion houses, Castles, Forts, Farms, Cottages, Coats, Shepards Shealds, or Howells.

A Second division of Empires or Kingdoms into lesser places, are such as these, whereof some are not inclosed but ly wast, or open and unoccupied, as

1 Wilder-

1. Wildernesſes, Forreſts, Chaſes, Champion ground, Plains, Woods, Town Fields.

2. Commons, Waſts, Hearths, Moors, Moſſes, Turburyes, Greens, Downs.

Others are incloſed and occupied, as

1. Parks, Warrens, Conyborroughs.

2. Fields, Meadows, Paſtures, Airable Fields, Tillage Lands, Feeding grounds, Cloſes, Cloſures.

3. Orchards, Gardens, Courts, Backſides.

4. Woods, Groves, Coppies, Thickets or underwoods, Springs.

And theſe again, are Sub-divided into ſmaller parcells, according to that quantity of ground it containeth, both for, length and breadth. as

1. Virges, Hydes, Bovates or Oxgranges, Granges.

2. Poles, Acres, Selions, Rods or Roodes, Loons, Lands

3. Ridges, Butts, Flats, Stitches or ſmall Butts, Pikes.

Others are named from length only, as

1. Miles, Furlongs, Pearches, Poles, Rodes.

2. Yards, Paſſes or Paces, Elles, Cubits.

3. Feet, Span, Palme, Inches, Come Length.

Now as there is a Term for every Temporall diviſion and place of note in Kingdoms; ſo in Spiritual affaires, each Church hath its bounds, which is again divided into leſſer Jurifdictions, and theſe again ſub-divided into the meanest of all, as

1. The Papall or ſee of *Rome*, (which claimeth the Univerſall Biſhoprick) and hath the command of *Europe*, except ſome few Kingdoms, and Provinces, which have Jurifdictions of their own, and doth not acknowledge that place for their Head.

2. Patriarkes, of *Conſtantinople*, *Alexandria*, *Antiſchia*, and *Jeruſalem*. Which are the Metropolis of all the Churches of *Aſia*, and part of *Aſſyria*.

And theſe are all of them again divided into leſſer dignities, as

1. Cardinalricks, Archbiſhopricks, Metropolitans.

2. Biſhopricks, Dioceſſes, Denaries, Ruralls.

And in the laſt place theſe are again ſub-divided into leſſer Miniſteries, as

1. Prebendaries, Pariſhes, Vicarages, Chapellryes, Tythings, and Lects. So much as to the Diviſion of the Earth: now to our Blazon again.

XXXI. He beareth Azure, an *Iſland* Argent. An *Iſle*, an *Iſland* or *Iland*, is when the Water Invironeth or waſheth a piece of Land round on all ſides. This is born by the name of *Iſland*.

A. 15 *Iſlands* diverſly coloured: which Coate belongs to the King of *Sain*, as Lord of certain *Iſland* to that number.

XXXII. He beareth *Aſre* and *Water*, a *Rock* traверsed in *Feſſe* with a *Peninſula* proper. Born by *Penſula*.

An *Iſland*, is when the Water runneth round the Land. A *Peninſula*, or an almoſt *Iſland*, is when it is waſhed

on all ſides, & yet hath a neck of Land by which it is joyned to the Continent.

A *Cape*, is a corner or an uneven part of Land, ſhutting into the Water. See numb. 21 having the Sea on two ſides of it.

A *Promontory*, or a neck of Land. The ſame to Cape an *Isthmus*, is the neck of Land, which joyneth the *Peninſula* and the Continent together.

A *Continent*, is any great piece of Land that hath not Water about it; *Europe*, *Aſia*, *Africa*, and *America*, is called the great Continent of the World. Other great *Iſlands* may be termed the Continent, to a *Peninſula*; though but an *Iſland* it ſelf.

Other terms uſed by Seaſaring Men for an Harbour or Landing place

A *Rock*.

A *Leerge* of Rocks.

A *Shoule*.

Fast ground, or good Anchoring.

Die, or foul ground, ſuch as an Anchor cannot ſtick

or hold in it.

Sandy ground.

Clay ground.

An *Dead Land*.

A *Furland*.

A *Reach*.

A *Land Mark*.

An *Haven* or *Harbour*, a place where Ships arrive with their freight.

The *Sea Shore*, or Bank, Coaſt, or ſide of the Sea: Land lying cloſe by the Sea.

A *Damme*, or *Bank*, or *Cauſey*, made to keep in the Sea from overflowing the Land, called alſo A *Heap*, *Bulwork*, *Rampire*, or *Countermaure*.

The *Borders*, ends or Confines of a Countrey.

XXXIII. He beareth Argent, a *Craggy Rock* in *Base*, extending it ſelf throughout the Elcochion, with a *Concave* in it *Sable*. Or with a *Concavity*, or an *Hallow* paſſage through it. Born by the name of *Cragge*.

XXXIV. He beareth Argent, a *Rock*, or *Mountain*, *Gules*. Born by the name of *Hill*.

A the like *G* and a *Cheit* of the ſame. Born by the name of *Muchill*.

Several ſorts of Hills.

Mountains, are vaſt great and high Hills.

Precipes, Hills with a ſteep down deſcent.

Craggy hills, Hills hard and difficult to go up them.

Hills for Paſture, as Sheep and Goats, and yong Cattle.

Hills of an eaſie aſcent, not laborious to go up.

Ridges, or tops of Hills.

Coges, the outſides of craggy ſteep Hills.

Mould hills, little Hills in Fields, caſt up by Moulds.

Billocks, very little hills, or riſing above the plaine Earth.

Calſes, plain ground at the foot or bottom of Hills, termed *Vales* and *Dales*.

Clifts, or craggy hills of Stone.

Caves, holes in Rocks and Hills.

Convaies, or Valleys incloſed all about with hills.

Straits

Straits, or narrow passages between hills.
Combs or **Quarries**, deep places in hills which Stone hath been taken out.

XXXV. He beareth Argent, a **Mountain in Base Vert, Inflamed on the top**. This for shortness may be Blazoned the **Mountain Aetny**; which is said to be the mouth of Hell, being continually with fire & Smoak on the top of it. This is born by the name of *Macloyd of Scotland*.

XXXVI. He beareth Argent, on a **Mount issuing out of Base, Vert**; a **Lamb in Sacrifice** proper. By the name of *Holy Lamb*.

A a Hill in Base with the fire upon it issuing into three flames proper. Is Born by the name of *Flammen*.

XXXVII. He beareth Argent, in a **Rock, or Mountain** proper, a **Cave Sable**. Or else thus, issuing out of Base, a hill proper: with a Cave in it, Sable. Born by the name of *Cave*.

XXXVIII. He beareth Gules, a **Lion Passant issuing out of a Cave Argent, the Hill in Base fired to the sinister side, Vert**. By *Lousden* alias *Lions-den*.

XXXIX. He beareth Argent, a **Rock Gules, piled at the foundation** and **Enwrapped with Diers, Biers, or Thornes, Tenne**. This we must suppose to be a kind of Sandy Hill, or Mountain; which would in time moulder & fall away, if it were not defended, & supported, or fortified with stakes, and windings to keep it together. See lib. 1 chap. 9 numb. 20. and lib. 2. chap. 18 numb. 62 63 64 65 66. This is Born by the name of *Strongill*.

Per pale G and A in each the like Counterch: Born by the name of *Heypaeer*.

XL. He beareth Argent, a **Hill Vert**. By the name of *Hillok*. If there be but one in the Coat, it is termed an Hill, if more, they are called Moul-hills: which are Hills or Hillocks of earth cast up by Moulwarps.

A Chevron between 3 V. Is Born for *Tildefley* and *Shakerley*.

A 3 Moul hills V. Born by *Tildefley* of *Tildefley*.

A 3 such V. each charged with an Annulet, O By *Tildefley* of *Wardley*.

In the Base of this quarter is placed a craggy Rock, which is diversly Born by families in foreign Provinces: some have it thus in the Base, others from the whole Base ascending up the Dexter or Sinister side of the Shield, with some kind of wild beast climbing up the same. as for example.

A such a Craggy Rock B with a Spur rowel of 7 points upon the top of it G the like is the Crest. And is Born by *Van Sternfels*.

A the like V with a Lion Rampant regardant B crowned is the Coat of the Town of *Velburg* in *Germany*.

G on the lower side of a Bend Sinister O such a craggy Rock extending it self to the ends thereof V. Is Born by *Sibenburger*.

O a craggy Rock in Base ascending the Dexter side Bendwise B a wild Goat climant or ascendant G Born by *Gamsen*.

G the like A with a Ram A Born by *Rammelslein*.

G the like to the Sinister side O the Ram A Born by *Ramsperg*.

Minerals.

From these foresaid Rocks, Mountains, Hills and Mountiny places, proceeds Minerals, and Mines for all sorts of Mettals, and Moulds, of which in order.

There are three kinds of Minerals.

First such that notwithstanding their hard growing together, yet will dissolve in Water, as Salt, Allome, Vitrioll or Copperas, Nitre, Salt peter, Bitumen, Armonick, Borax, Brimston &c. whole foundation is generally called aroch.

Second, such kind of Minerals as will flame, or be enflamed by Fire; as Coale, Amber, or Amber-grease, Canole, Chrysolilla or Boras, Petroll, and other Hillalimes of Bituminous qualities, not of one sort, but many: with several fat Earths both Concrete and Liquid.

Third sort of Minerals digged out of the Bowells of the Earth, are such as Will be beaten to dust, and turned into Paints or Colours, as Arsenick or Mercury, Open alias Auripigmentum, Orment, Sandarake, Synope, Minium or Vermilion, Ruddy, Subium or Antimony, Azure, Calx, Bole or Bolarmacke, Sulphur &c.

Mettals.

Out of the Earth proceeds Mines of Mettals which are by the fire both purged from their dross, refined and made, as

Lead, out of whose Oare, is produced Red-Lead, Ceruse or whit-lead, Litharg or Lithargie.

Tin, a more pure and harder, mettles by it is made Pewter with a mixture of Lead.

Iron, it is made of a Stone called Iron Stone by melting: it being refined maketh **Steel**, the hardest of all mettals.

Copper, of its rust comes Verdigras, but being mixt with Lead Oare, makes **Lattin** and **Brass**, two Brittle mettals, that will not be hammered.

Silver, a mettles Royal, white and clear, having a shrill Sound it is the next to Gold for purity and riches.

Gold, the purest of mettals, therefore the most weighty and massy, being mettled an hundred times loseth nothing of its Substance, nor receiveth no rust. There is a certain Veine in the Earth, whether I may call it a Stone or Golden Earth, it is easily digged up and broken, having the very look and face of Gold: Some call it the Arsnick Stone, but the Arsenicum or Arsnick is double, one of an Ashie colour, and the other of colour like Gold.

Calck, is of the nature of mettals which will not endure to be either melted or hammered, because of its untamable hardness. The Stone is like glass, having as it were about it, Hills and edges naturally set in it. **Quicksilver** a metal that never groweth hard, for it is always moist, and yet never wetted or moisteneth any thing.

Electrum, or **Amber**, a mixt mettles of Gold and Silver.

The foundation of these mettals is Oare, save that of Iron which is called a Stone.

Mettals.

Mettals, Sealed or coyned is termed money or good for money, that which is wrought or made otherwise, are Vessels or Plate, that which is unwrought is called a Lump, or Bar of raw mettles, of some a Wedge or Bulline.

Moulds.

From the Earth are gathered many sorts of Moulds, or distinct sorts of Earth, which are serviceable for several purposes, as being of various conditions, all which being layd in the Sun becomes hard, and put into Water, becomes clay, dirt and mire: if burnt in the Fire, it both looeth its nature and colour, and becomes either Stone or Glasse. Of earth are several sorts, as

Black earth which is the generall Soil of the Land, Slime, Mould for Gardens.

White earth, which are of two sorts, one more clammy, as Clay used by Potters.

Others more Brittle, as Chalk, Argill, Plaster of Paris, Fullers earth, Rotton Stone.

Red Earth, as Marle, Clay, Occar, Spanish red, Terra rubrum, Raddle, Bole, Brick.

Yellow earth, as Durry, Yellow Occar, Sand.

Brown earth, as Umber, Cullin earth, Occar de lis.

Green earth, as terra Vert.

Earth in it self is one of the four Elements, and is a thick and grosse substance, Scraped and compact together out of all the other purer Elements, and is by nature cold and dry.

Atome, or **Note**, a thing of earth so little, that it cannot be divided.

XLI. He beareth Or, a **Flint Stone** proper. Born by the name of *Flint*.

V 3 such Argent, is quartered by the Earl of *Cumberland*.

A Steell and a Flynt Stone, was the emblem of *John Digonius* Earl of *Flanders*.

XLII. He beareth Argent, an **Island set about with many small Isles** proper. But both *Gniliams* fol. 136 and others have Drawn the Flynt Stone after this form, so that it may as well be Blazoned, a Stone with many little ones about it. This is Born by the name of *Stonley*.

XLIII. He beareth Argent, a **Rough Stone**, Gules. This is Born by the name of *Mason-Work*.

XLIV. He beareth Or, an **Escarbuncle Sable**: this is the **Escarbuncle** made after the old fashion, being always voided of the Field. See chap. 18 numb. 37 38 39 This is Born by the name of *Garley*. The Carbuncle hath sparks like Fire, so that by reason of its refulgency it is described with eight Scepters or Rayes.

XLV. He beareth Gules, an **Escarbuncle Or**, this is a kind of precious Stone, & those things that proceed from the Stone, are accounted to be its Rayes or shining luster: But *Gniliams* call them, Staves or Rayes **Pomette** and **Florette**. Others **Staves nowed and flowered**.

In which it is to be noted, that if the Staves, or Rayes, exceed the number of six, then they are to be mentioned whether eight ten or twelve; for they are, and e-

ver must be of an even number. The *French* Herald term them, **Escarbuncles flourished** or set with Flowers and Pometies. Or thus an **Escarbuncle Argent Rayes flowery et Pometie**, Or. A on a Bend G 3 such O By the name of *Thornton*.

XLVI. He beareth Or, a **Diamond** proper. This may be more properly termed, a table Diamond, or a table Stone. Three such is Born by the name of *Diamond*.

B 3 Topaz Stones in Bend. Is Born by *Payer Van Flack*.

Gemmes are ever Born Losenge like, or 6 or 8 cornered and pointed.

XLVII. He beareth Gules, a **Gemme** or precious Stone, Argent. These kind of Stones are generally termed according to there colour, of which kind of Stones there are these several sorts.

Rich Stones or Jewels.

The **Carbuncle**, which is of a Flame colour, like to a fierie coale: of these there are twelve kinds.

The **Diamond** or **Adamant**, are of a blackish colour, the first and most sparkling of all Stones. It will not suffer the Load-Stone to draw Iron to it, being placed near it.

The **Jacinth**, is of a waterish blewish colour, or Violet.

The **Emerald** is green.

The **Jasper** is somewhat green, yet specked with bloody spots, there are sixteen several kinds of them.

The **Azure**, is of a blew colour.

The **Sapphire**, is a rich blew, or Sky colour, it is one of the Noblest and Royall sort of Gems, and most meet to be worn of Kings.

The **Topaz** is of a Golden colour: it was first found in *Arabia*: *Pliny* saith it is of a grassie colour.

The **Onyx**, a bright shining Stone having colours all about it, intermingled like a mans Naile. The **Onyx of India** is of a Fire colour, dyed with white veins or zones: that of *Arabia* is black, yet dyed with white lines or zones.

The **Ruby** is red and sparkling: supposed to be found in a Crabs head, some are yellowish.

The **Sardonyx** or **Sarda**, so called because it is red with the Sardus, and white with the Onyx; therefore one Stone from both.

The **Garnet** } are both red, some call them the
The **Coznelian** } Sardy Stone.

The **Agate**, is of a Saffron or pale yellow colour.

The **Achate**, is variously coloured, being black interlined here and there with white veins: some have stroakes of blew, some with blood.

The **Corqueis**, of the wax colour.

The **Chrystal**, and **Bistow Stone**, or **Pippel**, are bright shining Stones, which resembles, or is a counterfeit Diamond.

The **Onion**, or **Unions**, or **Pearl**, are little round Stones, white, found generally in the Belly of the horse muscle Fish, and other shell Fish as Sea Snayls, Oysters &c.

The **Toad Stone**, is of an Azure, and is found in the head of an old Toad, some give it the name of *Nesorpora*.

The **Amethyst**, is of a Purple or Violet colour, of which there be five sorts.

The

The **Coral** is both white and red, it is a Sea Shrub, growing to the Rocks under Water, and being drawn forth into the Air, becomes hard as a Stone.

The **Gem**, is the generall name, or notion given to all Precious Stones, which are called **Gems** saith *Isidorus*, because they shine, and are as smooth as Gum. And they are called Precious Stones, because they are rare: for all things that are rare, are precious. Of **Gems** some are found in the Veins of the Earth, and are digged up with Mettals: some are cast up to the Land from the bottome of the Sea, whose place of Generation is unknown: other some are bred and found in the bodies and bellies of Fowl, Fish, Birds and Beasts, with other creatures of the Earth.

The **Alabandine**, is a Stone or Gem of the colour of the Herb *Calcedonie*, but clear.

The **Abistos**, is a precious Stone marvellous weighty and black of colour, bestroked with red Veins. This being hot, keep so seven whole days.

The **Amatite**, is that kind of Gem, that touching a man Garment, it makes it able to resist Fire, neither hath it power to burn.

The **Argirite**, is a Gem four square, in colour like Silver, with the appearance of Golden coloured gravel.

The **Asterite**, is a Gem, white coloured, having the light within it self, but looking through it, shews the Suns reflections.

The **Astrion**, is an *Indian* Gem, like to Christal, in whose center there is a shining light, without reflection, much like to the Moon.

The **Calcedon** or **Calchedonie**, is a Stone of a flarrie sparkling colour: there are three other kinds of them wherof some are pale, and wan, and of a dull colour. it being well chafed and warmed, will draw a Straw or a Rush to it.

The **Ceraunium**, is a Stone like to the Christal, bespotted with blew: this is an other kind of them Firelike in colour, or resembling a Flame.

The **Chrysopasis**, is a Stone of *Aethiopia*, which in the day shineth not, but in the night, it is Flame like, being yellow and wan in the light.

The **Dionise** Stone, is black or brown, all bestrowed with bloody strokes or veins.

The **Aerizula**, is a kind of *Persian* Jasper stone, but of a Skie colour: but that of *Phrigia* is purple coloured.

The **Diacondite**, is a stone taken out of a Dragons head, which is only of a bright Fiery colour, as long as it is come by, the Dragon being alive.

The **Dyadocos**, is a kind of stone very pale, yet hath shimmering withal.

The **Echite**, is a stone found in *India* and *Persia* in the shore and Sea-banks: it is of a violet colour. There are a pair of them Male and Female, and be found most commonly both together in the Eagles Nest, without the which she cannot bring forth her yong.

The **Efesside**, is a stone that being held against the Sun is Fiery coloured.

The **Elutropia**, is a Gem of a green colour or grafie, coloured and bespotted with purple specks and bloody veins. it will cause things a farr off to be presented to your Eyes: being put into a Bason of Water, seems to a mans eye to change, the Sun beams giving them a contrary colour: held between the Sun makes it to appear a bloody Sun, and darketh the Air in manner of an Eclipse.

The **Ematite**, is a ruddy or somewhat Sanguine stone, it is of some called **french blood**, for that it stoppeth the vent or course of flowing.

The **Endros**, is a mean and small stone, which continually sweats or drops, yet it doth not for all this lessen or melt away.

The **Gagate**, is of the precious sort of stones, of which there are two kinds, the one russet colour & the other black. The last easie to be fired; and as smoky as Frankinsence.

The **Selacia**, is a Gem very white, being of the figure and shew of an Hail-stone, and is so excessive cold, that in no Fire it becometh hot.

The **Seratite**, is a kind of black stone: but exceedeth in vertue many others, for if any man carry it close in his mouth, he may tell what every man thinketh of him: as saith the Lapidarie.

The **Alpis** stone, it is a little stone taken out of the Serpent **Alpis**, of a green colour like the Jasper.

The **Iris**, is a kind of a stone, of the colour and as clear as Christal. It is called **Iris** from the likelyhood to the Rain-bow, for the Sun beams piercing throw it, doth shew the colours of the Rain-bow on the wall next it.

The **Raman** stone, it is in colours very diverse, sometimes black; then white, now shamefaced and blushing, a none pale and wan.

The **Rabiate**, is a stone clear coloured like to the Christal.

The **Kalpophanus**, is a kind of black stone, yet may be painted with other colours.

The **Ligurius**, is a stone in colour like Tin. It is engendred in the entrails of the wild beast Linx.

The **Lipparia**, is a Gem in *Africa* near to *Egypt*, whose property is to enamour all kind of beasts with its sight, to which they all hastily run when they see it.

The **Mede**, is a precious stone found amongst the *Medes* it is in some places there, seen green, in other black.

The **Melanite**, or Hony stone; it is double coloured, on the one side it is green, on the other yellow.

The **Mirrite**, is a Gem both in taste and colour like to Mirrhe, which being wroong and pressed hard, giveth a pleasant smell like Nardus, or Spikenard.

The **Melochite**, is a green Gem, much like the Smaradge, but more thick and gross: some call it the green **Malue**.

The **Drite**, is a Gem black, and in figure round, there is an other kind that is green having white spots.

The **Pauteron**, is a stone of all colours or most of them: for it is in some part black, others green, others purple, &c.

The **Quiren**, is a stone found in Islands and Fennes, but most commonly in the Lapwings nest: being put under a persons head will make him talk in his sleep.

The **Quandias**, is a stone found in the Vultures head it is but of a dirty vile colour, but of great vertue, as saith *Diascorides*.

The stone called **Sol**, is a precious Gem in colour like to the Sun: for it giveth reflections of Sun beams as the Sun doth.

The **Tararippe**, is in colour very fiery and shineth in the night like to a burning gloaring coal.

The **Turches** or **Turky** stone, it is in colour Air like and is clear, some call it **Cranus**, others **Turcois** or **Corneis**, but they are more yellowish. They are only found in *Turky*.

The

The **Agarite**, of Gems, is the chief of them that be white.

The **Corneole**, is a kind of **Dnyr** stone, of a black colour: the other **Cornellis**, is red like to **Coral**,

The **Smaradge**, is of an excellent fresh green, far passing any Leaf.

The **Salax**, is of a white colour, like polish **Marble**.

The **Berill**, a stone six square, in colour Oyle or the water of the Sea. there is an other kind called the Golden, **Berill** whose green colour interchanged resembleth the colour of Gold.

These are stones for Rings and Jewels, of which those that glitter, or shine are the more costly, but if they have a speck in them, they are held of no great or much value.

Those stones as are clouded, not having a spark but a bright and shining polish, are of less price then the other, except them that are rare to be had.

Stones of all Sorts.

There are several sorts of stones besides these; for in strickness stones are no more then earth hardened, and the softest is called Greet or Grit, which being ground small becomes Sand; being more grosser or courser we call gravel.

Of these stones, the **Flint**, will take the first place being the hardest of such sort of stones as are common with us: with it we strike fire on a Steel, yet will be broken on a Cushion.

The **Touch** stone, is black, it trieth Metals.

The **Magnus**, or **Load** stone draweth Iron or Steel to it; and is of an Iron like colour.

The **Jett**, is black, and being rubbed to be hot will draw a Straw to it, as the **Loadstone** doth Iron.

The **Blood** stone, is of variable colours; it Stancheth blood.

The **Allablast**, is white, with it is made Figures and Statues and Monuments, of carved works, being Sawed and easily cut with working tooles: Some is veined with diverse colours.

The **Free** stone is white and worketh like **Allablast**, but more hard, and durable: it is a kind of greet but finer landed, and a smoother stone.

The **Slate** stone, is blewish and smooth, of it is made tables, and coverings for houses.

The **Lyme** stone is whitish, being burn in a Kiln maketh Plaster.

The **Mill** stone, is whitish, being nothing but small and round gravel, fixed or hardened together into one entire stone. Of it is made **Grinding** stones to grind or bruse, Corn with.

The **Albeston** stone, is of an Iron colour growing in *Arcadia*; which being once set on fire, can never after be quenched or put out.

The **Ophite**, is a kind of **Marble**, which hath spots on it like a Serpent, of which there are 2 sorts one white and soft, the other black and hard.

The **Caristum**, is a kind of **Marble** of a green colour: some of this sort are here and there dyed after the manner of golden drops: others of a **Corall** kind, which have certain spots besprinkled on it proportionably.

The **Prasius**, is a stone in manner of a Onyon or Lecke very green: it is found sometime to have bloody drops, and some with drops that be white.

The **Pirrite**, is a kind of stone yellow, like to the flame of fire, and in quality almost all one with the fire: it is soon set on fire and sparkleth.

The **Pionite** stone, it is thought to be a female, for in very short time it conceiveth, and bringeth forth his like.

The **Rhombite**, is a stone after the figure of the Mathematicians **Rhombus**, it is very white; but an other sort there is of them like a narrow rowler, but coloured and dyed within and without.

The **Silonite**, it is a stone in *Persia*, in colour like to **Jasper** or fresh green herb: It increaseth and decreaseth even as the Moon.

The **Marble** stone, of which there are several colours as white, black, blewish, Ashcolour, some spotted, other veined.

The **Marchalite** stone, or fire stone, a blackish stone mixed as it were with Silver Ore, these stones are used in wheele locks for firing of the Pistals as **Flints** for Ferris in Guns.

The **Antimony** stone is of a Silver colour, and found in Silver Mines.

The **Lazul** or **Azure** stone, of it is made the Smale and Bize, used by Painters.

The **Grindle** stone, a kind of a whitish Greet, of which there are several sorts some more rough and others very smooth.

The **Porphirie** stone, resembleth **Marble**, but is all spotted and veined with variety of colours: it is the finest and excellent **Marble**: some call it **Parus** from the tree the *Para*.

The **Peeble** stone, are stones of various colours, lying amongst gravel by the Sea side, which being cut and polished have a rich spark in them resembling the **Diamond**.

The **Opal**, stone in Latin *Opalus*, wherein appeareth the Fire brightness of a **Carbuncle**, the shining purple of the **Amethyst**, & the green shew of **Emeral**, all shining together with an unbelievable mixture.

The **Pardal** stone, a stone all spotted like a panther I take this to be fine wrought **Porphire**.

The **Rinoper** or **Ruddle** stone, a soft and red stone found in mines.

The **Sleek** stone, a ball made of glass, which Landresses and Drawers of Cloath use to polish or sleeken their Linnen with.

The **Hone**, is kind of yellowish colour, being a Holly-wood converted into stone, by lying in Water for a season: of this Water I have not heard any where save in some part of *Ireland* and *Italy*. Though *Johnson* in his *Herbal fol. 1276* signifieth as much, as if such Water were in *England*.

XLVIII. He beareth Argent, in Base a pavement (or paved with **Marble**) with a pyramide (or an Egyptian pyramide) with eight persons ascending on the out sides of it, Sable. This is borne by the name of *Jury*. The pyramids of Egypt are said to be labours of the *Israelites*, when they were in their Bondage ther: and the persons ascending and descending, may fitly be compared to the age of Man, who is growing higher and higher till he come to the top or pinecle, and then must descend again, till he come to the earth from whence he had his first being. This may also be termed a four square Steeple pyramide lyke.

E

XLIX. H₂

XLIX. He beareth Airy, the prospect of the Inner part of a ruined Theatre, or Church, proper. This is born by the name *Tyme*. For by it all vast and stately Fabricks, are brought to ruine.

L. He beareth in a Landskip of Earth and Aire, a Craggy Rock on the Dexter side, with a Tree pendant growing out of the side of it, and a ruinous house of stone, on the Sinister side, all proper. This is born by the City of *Litchfield*, having several Slain or Martyred persons in the Feilds.

LI. He beareth in a Landskip, a round Tower fixed to the Dexter side, invironed with a Water ditch and a Castle with three Towers together, compassed with an outward Wall, port open, all proper. This is born by the name of *Castlemaine*.

LII. He beareth in a Landskip of Aire Earth and Water between two Trees in fesse a Church and two Houses with Fire issueing out of the Rooves of of them all proper. This may as well be said to be a Town fired for shortness sake. This is the *Souldiers* Coate of Arms, viz. Fire, Sword, Ruine, and Destruction.

LIII. He beareth all over the Escuchion, or Shield, a Craggy Rock, Gules, double Caved, (or having one Cave within an another, Sable. This may well be termed the Devils arse of peak: for they that have ever seen it, will judge this to be such an other kid of Hell hole.

LIV. He beareth Argent, on a wrought pavement of Marble, a broken Columbe, Gules. This is the Coate Armour of *Collumel*. This is not only broken (as it were) in the middle, but is cracked through, besides several other flaws in it: so that it may be termed a broken and shattered Columbe, or an half Columbe broken or ragged in the top part, and cracked in diverse places.

Things of most note in these two foregoing Chapter viz. 1 2 with the places cited where mentioned.

The Signification of Caelestial and Terrestrial Bodies used in Armes..

Sun, signifieth Charity and Splendor, but is the Emble of Sovereignty, of Royalty, of truth and Unity: and in the Zodiack is a token of Honour and Advancement.

Moon, is the Hieroglyphick of Nobility, and signifieth men of publick spirits, for publick good.

Starrs, signifieth men born to publick good, and of exemplary Lives amongst the worthy.

Thunderbolt, signifieth a person of an active and stirring Spirit.

Comett, is the Embassador of some extraordinary matter.

Fire, the Embleme of Loyalty, and of working spirits of Zeal, and Counsel.

Angels, messengers of good tyding, Emblems of Embassie.

Clouds, signifieth Troubles and Adverse Fortue; but the Sun, out of it shews a Restoration, or giving of Honor after much Peril and Danger.

Cherubins, signifie fullness of knowledge and wisdom.

Water, signifie Instability and unconstant, a man not of sound principles.

Zodiack, is the imitation of a Bend and is esteemed 2.

a Gir

a Girdle of Honor, or a note of favour, as to the Romans who to Honor their confederates gave them Chaines of Gold, and Silver.

Sphere, a Signature of Divine providence, & its constant mobility, shews the perpetual care of the prince.

Water or **Waves**, signifieth Service done thereon by speedy and quick motion.

Ring or **Circle**, the Emblem of Faith, Freedom and Fidelity.

Things on **Fire**, signifieth Envy and Malice, shewing that in hurting others they pleasure not themselves.

Precious stones, signifie & are emblems of the graces. **Diamond**, is the Emblem of Fortitude, and is of singular vertue against all Charmes, Inchantments, & Witchcrafts.

Sapphire, signifieth prudence.

Ruby, denoteth Charity.

Opaze represents Justice.

Emerald, to it, is attributed the vertue of Hope.

Pearle, by reason of its whiteness, representis Faith.

Crystal, Chastity and purity of life.

Emerald, signifieth Temperance and Sobriety.

The Right Reverend Fathers in GOD,

The Lords Bishops of St. *ASAPH*, and *BANGOR*.And the Reverend the *Deans*, and *Prebends*, with the rest of the
Clergy within the said Diocesses.

AS it is a great Happiness for me to Present, so it will be accounted no less in you, to accept the Devoted Labours of him, who with a most humble Heart Dedicateth the same to the Holy Altars of your Church; and as I am bound to acknowledg my Happiness to proceed from your Goodness and Bounty in the acceptance thereof, so herein it is desired that you will ever reckon me in the number of your most obliged Servants, and Sons of the English Faith,

R. H.

C H A P. III.

HAVING spoken of such Natures in the Globe of the World, as have a Being from God the maker of all things; and in a manner are said to live. In the next place, we shall treat of those Creatures or Animals, which by Nature are said properly or perfectly to live; such Natures I mean, as those which have in themselves express and manifest tokens of Life, and of a Living Soul.

Of this kind some are Vegitive, others Sensitive, and the third sort are Rational: And for as much as I am now to discourse of the Vegetable Animals, and of their particular kinds, I shall first begin with Trees.

Trees are certain Plants springing from a Root, with a single Trunk or Stock, or Stem (for the most part) shooting up in height, and delineated with Limbs, Branches, or Spriggs, on which groweth Leaves, Flowers, Fruits, and the like.

Of these Trees some are more proper to hot Countreys and others to a more temperate, and some again to cold Regions, as the Frankincense to *Arabia*. The Balsamum, Myrrh, Nutmeg and Mace, the Pepper Trees, and such like chiefly grow in *India*, the Plane Tree in *Egypt* and *Arabia*, the Pomegranate, Orange and Lemon Trees in *Africa*; the Apple, Pear, Nut, Cherry, Plumb, and such

in *Europe* and the several parts thereof. But this I purposely pass over, and will (omitting their place of growth) give you a Catalogue of such Trees as are born in *Arms*, and then give examples of their several Bearings, whether in whole or in part.

1. Trees that bear no Fruit but their own Seed, are the *Linden*, the *Plane*, the *Haple*, the *Ash*, the *Elme*, the *Sycamore*, the *Birch*, the *Poplar*, the *Oster* or *Withen*, the *Willow*, the *Cedar*, the *Cypress*, the *Cwe*, the *Palm*, the *Bor*, the *Fir*.

2. Trees that bear Fruit, but not for Mans general eating, are the *Oak*, the *Holly*, the *Hathorn* or *Whitethorn*, the *Gall*, the *Cork*, the *Privet*, the *Cotton*, the *Alder*, the *Bay*, the *Laurel* or *Mistle*.

3. Trees that bear Fruit for the use of Man, are of several sorts, and all eatable according to their Seasons and kinds; as

(1.) Such as are covered with Rinds, as the *Figs*, the *Pear*, the *Apple*, the *Orange*, the *Lemon*, the *Pomegranate*, the *Pomecitron*, the *Quince*, the *Hedier* or *Open-artie*.

(2.) Such as have Stones in them, as the *Cherry*, the *Plumb*, the *Peach*, the *Apricock*, the *Olive*, the *Cornell*, the *Bullays*, the *Slow-tree*.

(3.) Such

3. Such as are covered with Husks and Shells, as the Chestnut, the Walnut, the Almond, the Date, the Beech, the Nutmeg, the Filbert and Hassel.

4. Such as bear Berries, as the Aline, the Mulberry.

5. Such as bear Spices, as the Pepper, the Cloves, the Nutmeg, whose Husk is Spice, and Bark Cinnamon.

4. Trees that yield Gums, Rosin, Pitch or Tar, out of their Bodies for the use of Man, are the Cherry, the Plum, the Mastich, the Turpentine, Myrrh, Camphir, Firr, and the Pitch Tree.

5. Trees and Shrubs, and Wood Plants, whose Leaves are always green, are the Bay, the Laurel, the Orange Tree, the Strawberry Tree, the Hirtle, the Jellamine Tree, the Arabian Jellamine, the Camarisk Tree with white Leaves, the Firr Tree, the Arbor Vitae or Tree of Life, the Cypress Tree, the greater Stone crop Tree, the evergreen Oak, Holly, Box, the evergreen Hawthorn, the Staff Tree, the Privet.

Terms for Woodlands.

A Wood, is a place set thick with Trees.

A Copse, is a green pleasant place set with Trees.

A Spring, or **Copp**, a place set with young Trees.

A Nursery, Trees sowed, which as they grow up are transplanted.

A Forrest, is a place where Trees are thick and unpassable.

A Wilderness, is a vast, large and great Wood, not Travelled through.

A Desert, a place large and great, made dark by thickness of Trees.

A Thicket, a shady place and uncut, the Boughs not lopped.

A Copse, a place that hath the Trees lopped and cropped, and grown again.

But more particularly we say a Grove of Oaks, a Grove of Pines, a Grove of Birches, a Grove of Willows or Ofiers, or else a Ground or Walk of Willows.

Shrubs, or Underwoods.

3. Those underlings or middling sort of Trees generally called Shrubs or Underwoods are these,

The **Hassel**.

the **Bullace**.

the **Slow** or **Blackhorn**.

the **Alder**.

the **Holly**.

the **Rose**.

the **Eglantine**.

the **Hony-suckle**.

the **Sweetbrier**.

the **Brier**.

the **Raspberry**.

the **Curran-berry**.

the **Blackberry** or **Bramble**.

the **Dog-berry**.

St. John's Berry.

the **Caper shrub**.

the **Yew**.

the **Nutmeg** or **Cinnamon**.

the **Bay** or **Hathorne**.

the **Aline**.

the **Holly**.

the **Pepper**.

the **Gooseberry** or **Fennel**.

berry.

the **Licorish**.

the **Balm**.

the **Cotton**.

the **Laurel**.

the **Hirtle**.

Under-Shrubs.

4. Those that are smaller than Shrubs, are called Under-Shrubs, of which sort are these following having woody stalks.

Knee-horne or **Butch-Sage**.

ers broome.

Goose.

Hen-goose.

Chistles.

Heath or **Heather**.

Spikenard.

Lavender.

Rue or **Herb grass**.

Rosemary.

Tyme.

Hyssop.

Wormwood.

Hugworth.

Bill-berries or **Winter-ries**.

To which some add the **Bulrush**, **Sedges**, **Rushes**, **Reeds**, and **Canes**, of which there are several sorts; but their Stalks or Branches cannot be said to be **Woody**.

Such as are less than these, and have Stock or Stems and Branches more tender, and do every Year as it were Die, and the Year following spring out anew, these are called Plants, Herbs, Flowers and Grain, of which in their order and course.

I. He beareth Argent, on a Mount, an Oak Tree Acorned or Fructed, proper. This is the strongest of Trees, and is apt for mighty Building, for it groweth to a vast height and circumference. In former times it was Hallowed to Jupiter, and the Acorns made Bread for the Food of Man. Born by *Ockely*.

There is difference between on a Mount, and on a Mount in or out of Base; the first being free from the Efcochion, the latter joined or issuing out of the Base. See *numb. 65, 62, 62*.

O such a Tree born by *Wood*.

A the like eradicated, by the name of *Haell*.

II. He beareth Argent, an Oak Branch Acorned or Fructed, proper. Born by *Amade*.

The Branch of all Fruits and Leaves (according to the Rules of Heraldry) doth consist in three Fruit, and four Leaves; if more, then it may rather be termed a Tree than a Branch; if it have but one Acorn (or any other Fruit) with a Leaf on either side, then it is termed in Blazon, *numb. 60*. a Slip of an Oak Fructed, or an Acorn slip (or slipped). This is a great Fault both in the Herald's and Herald Painters, which is wished may be rectified for time to come, that in their making and Painting of Arms, they observe this Rule and Difference between a Tree, a Branch, and a Slip of a Tree, otherwise in Blazon one may be often taken for another. See *numb. 43, 49, 60, 17*.

The

The **Laurel Oak** hath but little seen of its Fruit out of its Cup.

The **Indian Leaf** or **Tobacco** hath an Acorn like Seed pod out of a Cup indented in the brim or edge.

III. He beareth Argent, an **Acorn**, proper. That is to say, the Head or Fruit yellow, and the Cup and Stalk Vert.

The Fruit of all sorts and kinds, when they are born themselves without Leaves; they have ever a slipped Stalk to them, which in Blazon you need not to mention, being common to all: Yet if such Fruit have no Stalk as sometimes I have seen in Dutch Coats, then term the Acorns (or such a Fruit) sans Stalk. See *numb. 21.*

The **Holme Oak**, and the **Cork Tree Acorns** have the Cups rough and prickley.

The **Bitter Oak** Acorn hath the Cup edges cut and jagged, like the Hasle or Filbert Nut.

IV. He beareth Or, an **Oak Leaf**. Born by *Leave*.

Note, That if Trees, Leaves or Fruit be born in Arms in their proper colour, you shall not need to mention it; but if they be of any other colour, then you ought to take notice of it, and name the Mettle or Colour they are off.

And as this is the general way of bearing Trees, Branches, Slips, Fruit and Leaves; so from these examples you may see how all other sorts and kinds are to be Blazoned: So that to give Examples of all Trees after this manner, would require much Time and Cost, and be needless; the meanest Capacity from these may Judge of all the rest: I shall therefore present you with the Examples of Fruit, with the form of their Leaves; by the knowledge whereof the Tree will be easily known.

If the Leaf stand thus, as this example, then it is termed only such a Leaf; if it have the Stalk upward, then it is termed a Leaf pendant; if cross or overthwart the Escuchion, then it is a Leaf Barwise, naming the Stalk, either to the Dexter or Sinister side of the Escuchion. See *chap. 4. numb. 38, 39, 40, 41.*

The white Poplar hath such a Leaf, but broader in the middle, and sharper at the Stalk.

A 3 Oak Leaves V born by *Foules*.

S 3 such A born by *Loner*.

V 5 such in Salter O born by *Woodward*.

V He beareth Argent, a **Tree**, proper.

If a Tree only consist of Leaves without any Fruit therein, whereby it may be distinguished what sort of Tree it is; then in such Cases for to Blazon it only a Tree is no absurd term; which may be either drawn thus into open Branches, or all together after the Trees, *numb. 59, 61.* This is a **Tree** neither on a Mount nor Couped, but appears to Sight as much as a Tree doth above the Ground; and therefore is called a Tree absolute. This is born by the name of *Wooday*.

Per pale A and B 2 Trees moted counterchanged. Born by *Aspach*.

A on a Hill in Base, a Tree V born by *Van Birckicht*.

VI. He beareth Vert, a **Pear**, Or. It is by *Morgan*, *lib. 1. fol. 27.* termed a Pear pendant; yet others hold that the Pear only, of all other Fruit, is thus to be Blazoned simply a Pear; because say they, true Blazoning teacheth, that what is born in its proper being, or posture, needs no other addition; and that a Pear in its growth

doth hang so, none can deny; but such a proposition though true, yet will prove of bad consequence; for then most or all Fruit hanging down, ought to be Blazoned so, which they are not; for doth not the Apple, Cherry, Plumb, Pomegranate, Pine Apple, with variety more, hang down in their growth; yet are Blazoned pendant, which is also a proper term for this, and those not to be faulted that use it. See *numb. 30.* This is born by the name of *Parry*.

B 3 such O born by *Stukeley*.

G 6 such, and a Chief O born by *Alport*.

VII. He beareth Gules, a **Pear**, proper, that is, Yellow and Green intermixed, as one side Yellow, the other side Green. This is also termed by *Gwillim*, *fol. 145.* a **Pear erected**, which save in the Pear, I never heard any that termed this posture erected, all concurring in this, that Fruit having the Stalk downward, have no other addition to the name of the Fruit; and for my particular, I shall but little observe it. Born by the name of *Parrott*.

VIII. He beareth Argent, a **Pear Tree Fruited**. By the name of *Pear-Tree*. There are several sorts of Pears, as,

St. James Pear, round at top, narrow at stalk, and is red and yellow.

An **Abby Pear**, of a green, or greenish dusky colour.

A **Warden**, it is like a Quince, but brown and spotted; of them there are several sorts.

A **Burgomot Pear**, is a big Summer Pear, of a yellow and red colour.

A **Popperom Pear**, or Popperin.

A **Katherine Pear**,

A **Slipper Pear**.

An **Denge Burgomot**, is a round, short stalked Pear, of a deep yellow.

A **Musk Pear**, it is great and large, yellow, and of a Musky Taste.

A **Bloody Pear**, is small, brown on the outside, and Blood red within. I have seen an Apple of the same Nature; but these are but curiosities.

A **Winter Musk Pear**, is large and round, red sided yellow fruit.

A **Windsor Pear**.

IX. He beareth Gules, an **Apple**, Or. Born by *Apple*. Of Apples there are several sorts, as,

The **Pear-main**, of which there are three sorts.

The **Russet Pear-main**, which hath generally a rough brown side, and the Rind oft chopt and choned, the other part greenish; this is called the Summer Pear-main of some.

The **Yellow Pear-main**, hath a fine smooth rind, of a whitish yellow colour.

The **Green Pear-main**, or **Winter Pear-main**, is of a deep green colour, spotted faintly with whitish green spots.

The **Russet Apple**, is a small Apple, brown on one side, and red and yellow, or green on the other.

The **Darling Apple**, is yellow, with a mixture of red on one side.

The **Pippin**, is a green roundish Apple, sometimes reddish on the side; of these there are diverse kinds.

The **Red Strake**, is greenish, striped all over with red; this is a good Sider Apple.

The

The **Daubil**, or **Lady Finger**, of some called a **Beaking Glomaine**, it is a long Apple, red on one side, and green on the other, having a Beak or Hook, by which it hangs to the Stalk.

The **Paradise Apple**, is a delicate Apple for Taste, of a yellow and red colour.

The **Juniting**, is a small Apple, yellow and red sided.

The **Magdalen**, or **Margaret Apple**, is a fair and beautiful Fruit, yellow and thick striped with red; it hath a delicate taste, sweet scent, and early ripe, and is best eaten off the Tree.

The **Giant Apple**, it is a great and long Fruit, yellow, and well tasted, and either to Coddle, or Bake in Tarts, the most excellent of any Summer Apple.

The **Good Housewife**, is the largest of all the Apples I have seen, of a long round, gathering in at the Stalk and Blossom or Crown; of a pure green, or greenish yellow colour.

The **Queening**, is a fair red striped Apple, and beautiful in its Season, being a kind of Winter Fruit.

The **Quince Apple**, is a fair, smooth yellow Apple, something like a Quince.

The **Rennet**, is a fine lasting Apple, of which there are several sorts, but the **Lincoln Rennet** is reputed best.

The **Pear Apple**, so called from its Pear-like form.

The **Pomeewater Apple**,

The **Costard Apple**, of which there are three kinds, as the white, gray, and red Costard.

The **Greening**.

The **Fig Apple**, it is without Core or Kernel, or without Blossom, the Fruit coming out of the sides of the Branches (after the manner of Figs) and as big as a Pippin.

The **Crab**, is a small round Apple, growing on Trees in Hedges by the Way sides; it is red, green, and when ripe, yellow sided; there are diverse kinds of them, some as large and fair, as other well tasted Apples.

Per Fesse A and B 2 Apples with Stalks and Leaves proper. Born by **Holtzsfell**.

Gules in a Bend A 3 Apples sans Stalks G born by **Hautzendorf**.

B on a Bend G 3 Apples with Stalks A born by **Maenbaup**.

B a Fesse A in Base 3 Apples O born by **Harlewin**.

X. He beareth Argent, a **Quince and Leaf pendant**. The Quince is full of Burs and bunches, or unequal, covered with a white Cotton before it be ripe, but then yellow. Born by the name of **Quince**.

The **Lion Quince**, is yellow, the sides deep ribbed, with a hollow Crown.

The **Brunswick Quince**, is round and more whiter than the other.

The **Portugal Quince**, is yellow, with the sides full of Chops and Chones.

XI. He beareth Argent, a **Pomecitron** (or **Poundcitron**) pendant. The Leaf of this Fruit is nicked, or small indented like a Cherry Leaf; the Fruit is generally covered with a rugged, bunched out, and uneven yellow Bark.

The **Limoons** are like the Pomecitron, and larger and more rugged than the former.

XII. He beareth Argent, a **Lemon and Leaf pendant**, or a **Leomon** with a Leaf slipped, pendant. By the name of **Leomaine**.

B 3 such born by the name of **Flymston**. The Lemon hath a pleasant yellow Rind, some are smooth, others Poery, and others full of Carbuncles, or set here and there with swelling knobs.

XIII. He beareth Argent, an **Orange and Leaf pendant**. By the name of **Orange**. The Orange is between a yellow and red, or of the colour of the mixture of both, which in Heraldry is termed **Tenne**.

B 3 such born by the name of **Sibell**. This Tree doth at all Seasons of the Year bear Fruit, having Ripe, Green Fruit, and Blossoms on it all at a time; and the Leaves always Green, and sweet smelling Flowers of a whitish colour.

XIV. He beareth Argent, a **Stock slipped at both ends, with three Appicocks in a Cluster fixed thereon, and leaved**, proper. They are of a yellowish red colour, and Downy. Born by **Pracock**.

Peaches grow after this manner, and of a light green, and white colour, turning to yellow, some all red; others red on the side, all downy; the white **Appicocks** have the leaves foulded, seldom opening. The long **Appicock** is long, and of a pale yellow colour.

The double flowered **Peach**, of some written **Beech** or **Beach**, is like the ordinary Peach, save the flowers which are double, consisting of 3 or 4 rows of leaves, of a reddish bluish colour; they seldom come to any Fruit.

The **Nectarine** is like the Peach in the tree and fruit, but smaller, smooth and round, which before they begin to ripen, are much like to a green Walnut; but after, of several colours, as green, yellow, white, red, murrey, tawny and russet, also white painted with red spots.

XV. He beareth Argent, an **Almond slip fruited**. Born by **Almond**. The Almonds grow not with Stalks, but fixed to the Boughs like to Figs and Apricocks, and such like Fruit; therefore a slip of them is to be 3 leaves only on the top, and 2 or 3 Fruit on the Twig or Stem; as in this example, and numb. 14 and 38. They are in the husk of a whelmish green and downy; the Stone whitish, the skin which covers the Almond of a Cinnamon or brown colour, and the fruit it self pure white. The Leaves and Flowers of the Almond Tree are like those of the Peach; it blooms early in the year, and many blossoms of a fair, pale reddish colour, consisting of 5 leaves invecked on the top, set about a tufted head, set in a short foot hose, cut into four points. **Barbary** Almonds are small, **Jordan** Almonds long and slender, **Valentia** Almonds short and broad. This is born by the name of **Almonder**, being in a Golden Field.

XVI. He beareth Or, a **Pine Apple**, Vert; the Apple is at first raw and green; but ripe, it is of a yellow colour, inclining to a Red or Chestnut. Born by the name of **Pinner**. Some term it a Pine Apple erect.

G a Chevron Er. between 3 such O. Born by **Pine**.

V 3 such Pendant O born by **Japin**.

B 3 such O is born by **Van Winter Steten**.

Per pale G and A a Pine Apple V is born by **Augspurg**.

XVII. He beareth Argent, four **Pine Apples**, Or, on a Branch; of some Blazoned, a Branch of a Pine Apple Tree Fruited; or a Pine Apple Branch; but by these Blazonings how can a Man know how to trick out the

the just number of the Apples, except they be first told; this Branch being contrary to the Oak before said, *numb.* 2. that consisting only of three Fruits, as all Branches ought to do; if more, then to be numbred, as in this example.

The Branches and Stock are all scaled with Leaves, the Leaves long and narrow, like the Palm or Date Tree. This is born by the name of *Palmer*.

G 3 Pine Branches proper. Born by *Pinough*.

XVIII. He beareth Argent, a *Fir Tree*. The Fruit of the Fir is the same to the Pine Apple.

A *Savin Tree* is like leaved to the Fir, and the Fruit round like to an Apple.

A *Juniper Tree*, is like leaved to the Fir and Pine, with Fruit Pear like.

The *Larch Tree*, the Body or Stem scaly like the Palm, the Leaves and Fruit like the Fir, but more fine, thin, and small scales.

The *Pitch Tree*, the Branches all scaly, the leaves and Fruit, as the Fir.

The *Phyllirea*, or the *striped Phyllirea*, is a fine Plant rising to a Mans height, thick set with small Branches, and thole with small ever green leaves, constantly edged and striped with white; this may be by the Garden shears fashioned into what form you please.

XIX. He beareth Or, a *Cedar Apple slipped*, proper. The Fruit of the Cedar much resembles the Pine Apple; and the Tree hath the same kind of Leaves, and groweth aloft much after the manner of the Cypress Tree, Pyramid or Sugar loaf like; the Leaves grow altogether out of a Knot, which are small, long and narrow, as you see on the Slip above shewed. This is born by the name of *Cedarall*.

B 3 such slipped, born by *Wanton*.

Lofengy O and G on a Bend sinister A 3 such Apples pendant. Born by the name of *Winterthur*.

XX. He beareth Argent, a *Pomegranate slip*, (or a slip of the Pomegranate Tree) Vert, fructed, Gules. *Grillim* terms it in Pale slipped. Some write it *Pomegar-net*; and term it a *Pomegar-net leafed*. This is the Coat Armour of the City of *Granata*, alias *Granada*.

S 3 such proper, born by *Spenser*, of *Herefordshire*, and *Ford*, O.

The *double flowered Pomegranate* is the rarest of all flowering Trees and Shrubs, it grows in a thick Bush, full of small Branches, with some Thorns thereon, and many small, long shining green leaves; at the ends and sides of the Branches come forth many hard, hollow, reddish Cups, and out of them most Beautiful Flowers, as big and double as a large Province Rose, of a bright Crimson colour. There is also another of this kind, with double Flowers of an Orange colour; it seldom bears Fruit.

XXI. He beareth Or, a *Pomegranate sans Stalk*. This Fruit is red by nature: They are never born in Arms but with a broken or burst side, to shew their Seed within them, though naturally they are close and have a hard husk, which requires cutting: The end is jagged and cut unevenly. This is born by *Pomeraine*.

A 3 such is born by *Argue*.

XXII. He beareth Argent, a *Medler Slip*, with one Leaf on the sinister side. It is called generally an *Open-axe*; the Fruit is green in growing, but being

laid aside to mellow or rather rot, (for they are not good till then) it goes to a kind of brown or hair colour. Born by the name of *Medler*.

XXIII. He beareth Or, a *Cherry Slip*, others, a *Cherry*, Gules, *Stalk and Leaves*, Vert, and a *Cherry slipped with two Leaves*, proper. By the name of *Cherry*.

The *great Preserving Cherry*, they are of a blackish red on the outside when ripe, and Blood red within.

The *Biquat Cherry* is a fair kind, of a pale red colour, and spotted with white.

The *Amber Cherry*, hath very large Leaves, the Fruit of a fair Amber colour.

The *Dwarf Cherry* is of two sorts, the one small branches hanging down, the Cherry being small, round and red; the other Branches more erect, having Fruit bigger and pointed.

Mr. *Girle* makes mention of a kind of *Hungarian Cherry* (as faith *Rea* in his *Pomona*, fol. 206. that is as large as an ordinary Apple, which he calls *Caligi Birrieoni*.

Thus you shall have Cherries like Hearts, called *Heart-Cherries*, and the *Black Heart Cherry*, of a blackish red colour; the *Flanders Cluster Cherry*, they grow on the Stalks in Clusters, 3, 4, and 5, joined together; the white Cherry hath a little red on one side, the Leaf is like to the Medlar, saving that in handling of it it is somewhat more rough; the Flower is white, being 5 round leaves about a pod or head, which having gotten full ripeness, becometh Blood red, but white within, having a Stone in the middle with a Kernel in.

The *double flowered Cherry* hath double white flowers, and many growing together, which falleth away without bearing Fruit.

XXIV. He beareth Argent, a *Plumb*, Sable. There is several sorts of Plumbs, both round, long, Pear-like, Wheat-like, &c. and these are both white, red, green, and black. 3 Plumbs. Born by the name of *Plumb*.

The *Blew Primordian Plumb* is fashioned like a Pear, with a round head, and smaller towards the Stalk, of a red colour, and some of a Violet blew colour.

The *Barberry Plumb* is black, and fashioned like an Egg.

The *Damson*, or *Damascen* is round and black, some of a blackish blew.

The *Wheaten Plumb* is like a Wheat Corn with an incision or cleft all along the side, of a whitish green and yellow.

The *Diapered plumb* is a pale yellow, marbled with red, called also the *Marbled Plumb*.

The *Peastod plumb* is long, some are white, red or green.

The *Pear plumb* and the *Date plumb* are either red, yellow or white.

XXV. He beareth Argent, a *Slip of three Leaves*. Born by *Leafy*. Others say three Leaves in a Slip: It may be Blazoned a *Laurel Slip*, a *Mirtle Slip*; if they be of any other Fruit Trees you may term them accordingly, as a *Slip of three Orange Leaves*, or three *Cherry Leaves* in a Slip. Born by the name of *Brolbrough*.

The Slip is also born crazed in the Foot, which then say some, you are to term three leaves upon a Stalk crazed or irradicated; a *Stock*, *Branch*, *Stalk* or *Twig*

G arc

are so termed; but of a Slip it is improper in my Judgment.

XXVI. He beareth Or, a Laurel Leaf, or a Bay Leaf, or a Bay Tree Leaf. By the name of *Leare*.

The *Wild Bay Tree* hath two leaves at every joint of a dark green; at the top of the Branches come forth tufts of small white Flowers, with blush edges, which are succeeded with small blew Berries.

The *Wild Bay of Portugal*, the leaves are of a brown green; the Flowers inclining to Purple, the Berries blew.

The *Rose Bay Tree* is of two sorts, one beareth red Flowers, the other white.

The *Indian Bay*, it grows in a thick Bush, the branches of a yellowish green Bark; the Flowers grow in a long Spike, of a greenish white colour, succeeded by Berries like small Olives.

The *Mirtle* grows in a thick Bush, the leaves somewhat broad, and long, and smooth edged, being ever of a bright shining green; at the joints of the Branches come forth the Flowers composed of 5 small white leaves, with some white Threads in the middle, and very sweet.

The *Box leaved Mirtle* hath the leaves round, pointed like the Box Tree, in all other things as the aforesaid.

The *upright Mirtle* hath the leaves sharp pointed and narrow, the branches growing upright. Some from thickness of its growth call it the *Birds Nest Mirtle*.

The *double Flowered Mirtle* differeth from the other in the Flowers which are white, but very thick and double, and of a delicate sweet scent.

The *great Spanish, or Laurel Leaved Mirtle*, the Leaves are like Bays, but of a whiter green colour, set in a double row on both sides the branches, but in Flowers and Fruit as others.

The *Cork*, the *Clove*, the *Coffee Trees*, have such leaves.

The *Spindle Tree*, and *Pickwood* also.

XXVII. He beareth Argent, a Laurel Garland, of some termed a Garland of Leaves. By the name of *Garland*. This form of Bearing is much used in Crests, held by several sorts of Creatures, as Men, Women, Lions, &c. as in this work is manifested.

O a Garland of Pine Leaves is born by *Van Lenberg*, one made of a Peacocks Tail, is the Crest of *Van Wethyn*.

A a Garland of Laurel and Roses. Born by *Schappell*.

XXVIII. He beareth Argent, a Laurel Sprig, or a Sprig of Spray of Bays.

The Slip consists (according to Heraldry) of 3 leaves, the Sprig of 5 leaves, and the Branch being unfructed, of 9 leaves, as *chap. 5. numb. 50*.

The *Laurel Tree* is always fresh, and never loseth its green colour; it beareth a Flower of whitish blew colour, which ripeneth to a kind of Black Berry, or of a deep dark red, but the juice within is a most pure Sanguine or Blood colour, and represents the colour of the best *Indian Lake*.

O 3 such born by *Strigg*.

A a Sprig of Heart leaves G born by *Foster*.

B a Sprig of Bays in Bend Irradicated O born by *De-*

genberg. *Boswel* terms it a Spray of such or such a Tree, pag. 27.

A on a Mount in Base, a Branch of Heart Leaves G born by *Bacharat*.

Per Fesse O and G in Chief 2 Branches slipped in Saltier V in Base a Bend waved Sinister A is born by *Kerspack of Alsatia*.

a Branch crazed O in a Field per Fesse S and A is born by *Fridihorff*.

XXIX. He beareth Argent, a Vine Branch, flected and reflected with Fruit, (or Fructed) proper.

Grapes are either white or red, if they be in a Field of Colours, they are white, if in a Field of Mettle, then red; so that according to the Field they are coloured, therefore need not to be named; though some term this a Vine Branch Vert, Graped Gules. But if the Grapes be any other colour, as yellow, green, blew, &c. then name the same; for such are supposed either to be unripe or overgrown. If this were an absolute Vine, then it should have only one Stem or Stock, which should have shot out it self into several turning Branches, which as it hath not, it is but one winding or turning Branch.

The black *Clustered Grapes* are set thick on the bunches, and are small and black.

The *Muscadine and Canada Grape*, are white, the latter called the *Parley Grape*, from the Leaves, which are more cut in and divided than any other.

The *Raisin Grape* is large and red.

O a Vine Branch in Pale fructed, flected and reflected proper. By the name of *Majchky*.

O the like on a Fesse S is born by *Van Wense*.

Per pale O and B a Pallet on the one side a conjoined to it, is a Bunch of Grapes between 2 Vine Leaves, and the other side 2 Hares Heads. Born by *Van Moltrzan*.

XXX. He beareth Or, a Cluster (or Bunch) of Grapes. If any Fruit may with this term hang downwards, the Grape may (being of so heavy a body as it is in its growth; but being this is born upright, I see no reason why others should not be termed pendant; see *numb. 6. and Gwillim, fol. 146*. they grow on short Foot-stalks, which are all fixed to a main stalk, which runs through the middle of the Cluster; so that they are more scattering or separated than this is Engraven. Three of them is born by the name of *Grapyrrl*.

G a Chevron between 2 Spur-rowels, and a Cluster of Grapes slipped B. By *Kemmerer*.

XXXI. He beareth Argent, a Vine Leaf with its Tendrell. The Vine Leaf hath 5 principal points, each point having 3 indents.

The *Parley Vine Leaf* hath the Indents long and sharp pointed.

The *Plane Tree of Virginia* hath the 5 points ingrained and then hairy, some have them with deep Indents.

XXXII. He beareth Argent, a Vine of three Branches from its Root, each Graped or Fructed, that is to say, Gules, according to the rule, *numb. 29*. This may also be termed a Vine proper. Born by the name of *Viner*.

B on a Hill in Base, a Vine of 5 Branches, sans Fruit A is born by *Van Trunfcheler*.

XXXIII. He

XXXIII. He beareth Argent, the Stem trunked at both ends, with a Mulberry thereunto pendant, proper. Here I say proper, because the Stem is yellowish or Wood colour, and the Mulberry purple being its proper colour; yet some are black, white, or red. *Gwillim f.l. 144.* Blazons this a Mulberry with its Stalk trunked, proper. By the name of *Mulbury*.

The Mulberry Tree hath a Sovereign Red colour in the Fruit, being a Cluster of Red Berries set close together; which before they be ripe are white, then flesh colour, lastly a deep blood red; they grow upon the small branches among the leaves. The *Egyptian* Mulberry is not much unlike the aforesaid, but it hath a singular manner by it self in the Fruit bearing; for neither on its Boughs, nor amongst the Leaves, but upon the body of the Tree it beareth the Fruit about the bigness of a Fig, having no inward kernel as other Fruits have.

O 3 such born by the name of *Gascogne*.

A 3 such, by the name of *Derbrough*.

XXXIV. He beareth Argent, a Bramble Berry (or Black Berry) pendant. The names shew what colour it is, therefore needs no naming to be Sable. The Leaf of the Bramble is in all respects like the Rose Leaf, being three nicked leaves joined together at the end of the Stalks.

A *Raspes* is the same, the Berries pure red, and is the Coat of *Rassia*.

XXXV. He beareth Or, a Mulberry Leaf. Some write it a Mulberry, being a Cluster or Knott of Berries joined together, broad at the Stalk, and declining towards the end; of a red or purple colour. *Mulberry* beareth three of these leaves.

O 6 such Leaves born by *Iyamin*.

Per Fesse A and B Escartee; a Mulberry leaf issuant O born by *Geymancer*.

A a Chevron between 3 such pendant B is born by *Lemming*.

XXXVI. He beareth Argent, a Gooseberry pendant, Or, with a Leaf. They grow in races all along the slip or twig: the *French* Gooseberry is oval like, of which there are black, red, and yellow ones: *Holland* Gooseberries are white, the *Blew* Gooseberry is long, of a dark red colour, tinged over with Blew; the green Gooseberry is round, and some long.

XXXVII. He beareth Or, a Curran Tree Leaf slipped, with a race of Currans on either side, Sable. The Currans are of three colours at their maturity, viz. white, red, and black; therefore in them observe the same rule given, *numb. 29.* Therefore I Blazon these Sable, being thereunto injoined. Some will term this a Curran Branch; others a Curran Leaf slipped, with Fruit fixed thereto.

XXXVIII. He beareth Argent, a Fig Tree Branch Fructed. The colour of a Fig on the Tree is a whelmish or light Grass green; when ripe, of a blewish brown. The Fig groweth out at the Stalk of the Leaf, so that there is at every leaf of the Stem a Fig, which is contrary to most other Fruit. This is born by the name of *Figs*. The colour of the leaf and rind is somewhat wan and pale; the Flower is Medler like; its moisture or sap is like *Womans Milk*.

*

XXXIX. He beareth Or, a Fig Leaf. By the name of *Frisen'erg*. The leaves are large, divided commonly into 5 Sections.

O 5 such in Salter, born by Count *Ferla* or *Farra* in *Spain*.

XL. He beareth Argent, a Pole issuing out of Base (or a Pole in Base) sustaining or supporting a Branch of Hops. Some term it an Hop-Pole sustaining the Fruit, proper; for it is their nature to wind about any thing that is set for their support, which needs not to be mentioned; the colour of the Hop is a kind of a light, greenish yellow, near to the colour of Ash Keys: the Hop is only many round leaves growing together in Knotts or Bunches, like to a Grape or Mulberry. A Bunch of scaly leaves; the leaves are a large three pointed dent leaf, or cut into 3 divisions. By the name of *Hoply*.

XLI. He beareth Argent, a Sycomore Tree Fructed, born by *Sycmore*.

The leaves of this Tree resembleth the Mulbury leaves; the Fruit is round and very juicy and full of Milk; they grow not at the top of the Boughs as the Figs do, but out of the sides of them, and are sweet like a wild Fig, having grains within the Fruit as the Fig hath.

The Maple Tree is the same. This is born by *Maple*.

XLII. He beareth Argent, on a Mount or Hill, an Olive Tree Fructed. The leaf is a smooth, long, narrow and streight leaf; the Fruit is a long Berry, something resembling an heart, of a yellowish green colour; they grow generally together by pairs like Cherries.

The *Luke-Olive* is the same, but smaller and longer in the Fruit. This is the Coat Armour of *Oliver*.

XLIII. He beareth Argent, an Olive Branch Fructed. Born by *Olive*.

The wild Olive, or Tree of Paradise is of a dark yellowish colour in the woody shoots, set with long, narrow whitish green leaves, bearing along the branches small flowers, of a greenish yellow, which are succeeded by green Berries like Olives, when ripe will be reddish.

3 such is born by the name of *Oziane*.

XLIV. He beareth Argent, a Ginny Pepper and Leaf slipped, pendant. Or a slip and leaf of Ginny Pepper, the fruit Pendant. By the name of *Pepperall*. Of this kind of Pepper some are Heart-like, others grow directly round.

XLV. He beareth Argent, a Gall Branch Fructed; or more exactly as to the number, say three Galls on a Branch. Born by the name of *Gallick*.

This may be termed also an Oak Branch with three Apples, the Oak Apples and Galls are like one another; and is born by the name of *Appleck*.

XLVI. He beareth Argent, a Chestnut pendant, with two Leaves, or a Chestnut slipped pendant, with two Leaves. The Nut is covered with a green rough prickly husk.

The Beech Tree is like the Chestnut; only the Leaf broader and smooth without Nicks; the Fruit also like the Chestnut, covered with a rough husk, which when it is ripe, cleaveth in four parts; and so the Beech droppeth out.

G 2

The

The **binding Bean Tree**, hath a rough husk, which upon the opening, shooteth into four Bean Cods, and hanged at a round head at the end of the Stalk.

XLVII. He beareth Argent, a **Pew Tree Branch Fruited**, (or a **Pew Branch with Berries**) slipped. This is born by the name of *Jewen*. The Yew is very like the Fir Tree, having long small, or narrow leaves set on either side of all the Branches. The Berries of this Tree are red, growing close to the Branch on short Foot Stalks.

XLVIII. He beareth Argent, a **Barberry Branch Fruited**. By the name of *Berry*. These Berries are long and round, with a seed at the end after the manner of an Apple; they are red being ripe, and grow in races together on a small Stalk after the manner of Currans.

The **Bill-berry** or **Wind-berry** branch hath the same leaves round at the end, and sharp pointed towards the Stalk, the Berries are with a Seed or Flower place like an Apple; they grow in Clusters on small Stalks at the root of the leaves on the main Stem, which generally is but one Stalk; see *numb. 80*. The branch of such is born by *Don Sirettel*.

XLIX. He beareth Argent, a **Hassel Slip and Husk**, Vert, the **Nut**, Or. By the name of *Hassellall*. Else Blazon it, a Slip of an Hassel Tree Fruited; the difference between a branch and a slip, see *numb. 2*. Some term it a Hassel Nut slipped, proper.

The **Cotton Tree**, bears a Fruit not much unlike a Nut, which gaping or opening, discovereth about the Kernels a little Ball or Bottom of Wall, which is unwoven from the Seeds, of which is made Cotton Yarn.

The **Cokar Nut** is like the top of an Apple, covered in a Husk like a Hassel all over, but more Barky, which when ripe openeth in parts and quarters.

The **small Indian Cokar Nut** groweth in a hairy husk or skin.

L. He beareth Or, **three Filbert Nuts inclosed in their Husks with Foot Stalks on a Stalk**.

The **Filbert of Constantinople and Macedonia** are all covered with a jagged and cut husk, as if the husk were many doubles over it.

The **white and red Filberts** differ from the common Hassel Nut, in that the Husks are longer, covering the Nut.

LI. He beareth Argent, a **Cluster of Hassel Nuts slipped, in Bend**. Else term it three Nuts in a Cluster slipped, Bendwise, or a Slip with three Nuts in a Cluster. Born by the name of *Thicken*.

LII. He beareth Or, an **Elme Leaf**. It is also called an Elmen Leaf. Three of these are born by the name of *Elmener*.

Er. on 2 Bars S 10 Elme leaves born by *Elmes of Lilford*.

The **Elme Tree** is of some called **All-heart**, it is a Wood that is yellow and Sinowy, but soon breeds Worms, It beareth a certain Grape and nothing else.

LIII. He beareth Argent, an **Aspine Leaf**. Born by the name of *Aspinall*.

LIV. He beareth Or, **three Cloves**, Sable; these pertain to the Company of Grocers, viz. A a Cheveron G between 10 Cloves, S.

LV. He beareth Argent, a **Clove Branch**. By the name of *Clovely*, alias *Clanley*.

LVI. He beareth Argent, a **Nutmeg Branch slipped, or a Nutmeg pendant, with a slip of three Leaves**. The Nutmeg is inclosed in a husk, with a dalk or furrow in the middle, the leaves like to the Laurel; when it is ripe, then the husk bursteth open, and the Fruit appeareth out of it, like to an Hassel-Nut, and jagged like to it; the husk of the Nutmeg is that which we call Mace, sold for a rich Spice, and the Bark of the Tree for Cinnamon.

Cinnamon is so called, because his top is as it were folded or plaited together; it is of an ashie or dusky colour, the leaf is like to wild Marjoram, it never smells till it be thoroughly dry. It groweth amongst Briers on very hard Rocks, being about two Cubits high, and is gathered with much pains and difficulty, the best groweth on the top Twiggs.

There is a kind of counterfeit Cinnamon, called *Cassia*, or *Cassia Lignum*.

LVII. He beareth Argent, a **Pepper Branch slipped**. The leaves are round, and pointed at the end, like to the Trefoil, against every leaf on the stalk groweth a long Cluster of Pepper, like to Races of Onions which Gardiners make up for Market Sale. The Tree groweth on Poles like to Hops, or else they would ly on the ground like Cucumbers; not having strength to support themselves. The Pepper is naturally white, but it is made black and wrinkled by Fire.

The **long Pepper** is after the same manner, the Races being described in *chap. 5. numb. 48*.

Sinny Pepper hath a long pointed leaf on a long Footstalk, with a long cod or pod round and thick at top, and taper downward, till it end in a point, see *numb. 44*.

LVIII. He beareth Or, a **Cypresse Tree**, see *numb. 78*. This is born by the name of *Van Brag*.

A 3 such Trees. Born by the name of *Eytonhall*.

G such a Tree. Born by *Madockr*.

LIX. He beareth Argent, an **Holly Tree Berried or Fruited**. Born by the name of *S. twester*.

The **Haythorn**, or **White Thorn**, or **Haw Tree**, Blossomed, is the like for Draught, see *chap. 5. numb. 52. 53*.

LX. He beareth Argent, an **Holly Slip**; else an **Holly Slip leaved, or an Holly Berry Cluster, with two Leaves slipped, and a Holly slip Berried**; all these ways I have found the Slip termed. This is born by the name of *Hollinworth*.

A an Holly Sprig of Leaves only V born by *Balber van Wintertur*.

A 3 Holly Leaves Barwise, the Stalks to the Dexter side. V. born by *Arnest*.

A 3 Holly Leaves pendant V. by *Jurvine*.

LXI. He beareth Argent, an **Holly Leaf**. Born by *Arnest*.

The **Holly Holly-Leaf** is the same for substance, being

being a thick and hard leaf; but is smooth in the edges, ending in a sharp point, which is strong and prickly.

The **Holme Oak** hath a Jagged, turning pricking leaf.

The **Aegyptian Musk Ballow Leaf** is thus engrailed, and so is the red berried **Arrache**, called in Latine *Amplex*, of which there is the white, red, and green.

LXII. He beareth Argent, on a Mount or Hill in Base, a Wood of Grove of Trees. This is the ancient Crest of *Brun*, alias *Bruen*, of *Tarvin* and *Stableford*. The like by *Roughley*, having the Stocks O.

O such a Wood V by the name of Grove.

LXIII. He beareth Argent, a Birch Tree Irradiated or mooted up by the Roots, or erased at the root, which last term is not so proper for Trees, though I have often seen them so termed; yet use rather the words Irradiated or Mooted.

The Birch Tree Branch or Slip is ever drawn void of leaves, but full of small twiggs. By the name of *Birchley*. The Birch Tree is the Crest of *Van Tannwitz*.

LXIV. He beareth Or, a Birch Twig, Sable; or a Branch of Birch in Bend. 3 such is *Birches* Coat.

The **Broom Stalk** is drawn after this manner, so that in Blazon it may pass for it, when it is Vert. This also pertains to the Coat of *Bromfield*.

LXV. He beareth Argent, on a Mount in Base, an Ash Tree with its Keys. There are two kinds of Ash Trees; the He Ash, that never beareth any Keyes, and the She Ash, which beareth Keyes; from hence it is, that the Tree with them hath in Blazon been termed a *She-Ash*; signifying thereby an Ash tree fruited, or with Keyes. This is the Arms of *Ashley* of *Ashley*, in *Cheshire*.

LXVI. He beareth Gules, a Bunch of Ash Keys, Or. See *numb. 68*. Thus in *Boden* Church for *Ashley's* Coat.

The **Service Tree** hath a long winged leaf, like the Ash, and the Fruit hangs in Bunches like the Keys on Foot-Stalks, being covered with green husks like Walnuts; some round, some Pear fashion.

LXVII. He beareth Argent, an Ash Tree Leaf. The Ash tree leaf is nine long and narrow leaves nicked, fixed upon a small stalk, one against the other, and the odd one at the end.

G 3 such O born by *Holtzer*.

O such an Ash leaf. Born by *Wallary*.

LXVIII. He beareth Azure, a Bunch of Ash Keys pendant, Or. The natural colour of them is a kind of a yellowish green, or that which Painters call Pink. Three such born by *Ashworth*.

In this and 66, the Graver did not do his part, for the Keys have all of them a small stalk by which they hang all together in a Bunch to a little Knot at the root of the leaf, which is on the Branch, and not thus altogether at a Stalk, which is more like a flower than Ash Keys, see *chap. 5. numb. 30*. the true form of them.

Note, that when we mention three of any sort of thing, it is always understood that they are placed two above, and one beneath in the Escochion.

*

LXIX. He beareth Argent, on a Mount in Base (or out of Base) a Ewe Tree. Born by the name of *Vene*.

The Fruit of the Ewe is a red Berry, which groweth to the Branch on a short Foot stalk after the manner of the Slow; see *numb. 47. 80*. they are of a pleasant taste.

LXX. He beareth Or, a Palme Tree. This is the Tree of Victory, for in former Ages, when Princes returned from great Battels, and mighty Enterprises, they bore Palms in their Triumphs; and the Saints in Heaven are said thus to Triumph, *Rev. 7. 8*. it never fadeth, but is ever green Winter and Summer. The Palm the more it is oppressed, the better it groweth; to which King *David*, *Ps. l. 62. 12*. compareth the righteous, who shall flourish like the Palm. By the name of *Palmer*.

A the like Irradiated. Born by *MacLonsbor*.

Per Fesse O and A the same Irradiated V and in Base two Pales G by *Van Salis*.

LXXI. He beareth Argent, a Palm Branch.

The *Indian Cokar Nut Tree* Sprig, is after the same form.

A 3 such Branches, born by *Lovetoyle*.

In this quarter is also a Reed or Cane Sprout only in the leaves, being as yet not grown to maturity, as it is in *numb. 120*. and such as this Argent in a Field Azure, is the Coat Armour of *Lorrach*.

LXXII. He beareth Argent, a Therebith or Turpentine Tree Irradiated. From this Tree proceeds the Gum called *Turpentine*; the Flowers or Blossoms of it grow to Grapes or Berries like Olives, and hang in Bunches of a reddish colour, the leaves winged, round and pointed. This is born by the name of *Torquine*.

LXXIII. He beareth Argent, a Limb of a Tree in Bend, raguled and trunked, entwrapped with an Ivy Branch. Born by the name of *Iveslock*. The like is born by *Jurvin*, in a Field, Or.

LXXIV. He beareth Argent, an Ivy Sprig with four leaves. The Flower is a small yellow, motie one, the Berries that proceed from them stand in an Umbell or close together in round tufts, on short footstalks, of a black colour.

LXXV. He beareth Argent, an Ivy Leaf. There is as much variety in the Ivy Leaf, as in any of our home bred Trees whatsoever, for some are round, others 3 pointed, 5 points and single pointed; some long and slender, others short and oval, and such like forms, yet all smooth in the edges.

LXXVI. He beareth Argent, a Walnut Branch slipped and fruited. The Walnuts grow 2 or 3 together in green husks speckled, so that it may be disputed whether this may not as fitly be termed a Walnut Slip, as a Branch, seeing the Fruit is but in one place; the Walnut if on the Slip or Branch is born in its husk; if not on them, then without the husk, as *chap. 5. numb. 17*. This is born by the name of *Walmare*.

LXXVII. He beareth an Indian Apple pendant, with two Leaves slipped; or the Slip of an Indian Apple, the fruit pendant. Born by the name of *Sagrill*, in a Field Argent; see *chap. 5. numb. 24*.

O the

O the like G leaves V born by *Walkerville*.

LXXVIII. He beareth Argent, a Branch of Cypress fructed; a Cypress Branch. This is born by the name of *Cyprian*.

LXXIX. He beareth Argent, a Date Tree Branch, with a Bunch of Dates out of the Husk. Having but one husk or knot of Dates, it may as well be termed a Date Tree slip, the Fruit pendant. Born by the name of *Barrowdate*.

LXXX. He beareth Argent, a Branch of a Slow Tree, or a Blackthorn Branch fructed. Others call it a Bullas Tree Branch. This is born by the name of *Slomburgh*.

2. **T**HUS much for Trees, with their Leaves and Fruit, as I have found them born in Arms, either in whole, or in the several parts. Now for such Trees, or part of them, as have lost their Life and are perished.

Which when the Branches are lopped off, is termed Trunked, if cut off is called Couped, but if torn or taken up by the Root, is Blazoned Irradicated or Mooted up by the root.

LXXXI. He beareth Argent, a Stemme (or Stock or Trunke) of a Tree Couped and Irradicated, sprouting out two Branches, proper. *Grillim* terms it irradicated or mooted up by the Roots, as also couped in Pale, &c. By the name of *Deadly*.

G the like A born by *Barough*, alias *Stockden*.

LXXXII. He beareth Or, a Starved Branch, Sable. Of some termed a withered Branch; a Thorn (or a dead Thorn) Branch. Born by *Parrisher*.

The Coral Tree is thus drawn, and if either white or red, it may be Blazoned a Branch of Coral, noting the Field it is within.

A 3 such S born by *Flickstock*.

A the like G born by *Cerrall*.

O two such in Fesse S with a Bucks Horn in Chief, is born for the Coat of the Town of *Dornstat* in the *Netherlands*.

LXXXIII. He beareth Vert, a Stock of a Tree Couped, Trunked, and Irradicated, Argent. This I have seen termed only a Stock crazed. Some term it a Trunk or Stump, or Log crazed; or the root of a Tree sawed off. Born by the name of *Stockly*. S the like in Bend Sinister A is born by *Van Ronan*.

V 3 such A born by *Stockton*.

Per Fesse A and B the like Stock in Bend O is born by *Van Ahlen*.

LXXXIV. He beareth Gules, a Stock or Stem of a Tree Raguled, Trunked and Eradicated, Or. These kind of Stems or Limbs of Trees I have seen born Bendways, and Bends made of them. See *lib 1. chap. 4. numb. 26*. By the name of *Stoke*.

S the like A gorged in the top with a Coronett O by the name of *Pellin*.

A the like in Bend, couped at both ends G by the name of *Siment*.

*

Per Pale A and G on a Hill in Base B two such counterchanged. Born by the name of *Kerstdorf*.

G the Stock couped at both ends, and in Bend O is born by *Brandt*.

B 2 such Bendwise Sinister A born by *Van Tanbadell*.

O 2 such Couped and Irradicated Pale ways. By *Dorgello*, an *Italian*.

LXXXV. He beareth Azure, two Billets raguled and trunked, in Cross. Or two Billets in Cross raguled and trunked. When Stocks or Billets are raguled at both ends they are ever set one contrary to the other. 2 Faggot Sticks raguled and trunked. By the name of *Woodmunger*.

G two such in Salter A is the Coat Armour of *Holtzell*.

O 2 in Salter S born by *Berka zu Tarb van Leipt*.

A 2 in Salter irradicated S born by *Tettingen*.

A 2 plain Stocks in Salter, couped at both ends G is born by *Walleck*.

LXXXVI. He beareth Gules, a Faggot, or Pile of Wood bound up, Or, Wreathed, Argent. Others term it 5 pieces of Cord-Wood bound together: Others according to the Coats they are in, term them either a bunch of Faggots, a bunch of Laths, or a bunch of Sticks. This belongs to the Coat of the Company of *Woodmen*: Also is a part of the Coat of the Company of *Slaters*; Where in the first, it is called a Bunch of Faggots or Billets; in the latter a Bunch of Laths. The like out of a Coronet, is the Crest of *Brandt*.

LXXXVII. He beareth Argent, a Thorn, or a withered Hawthorn, Sable. By the name of *Thornby*.

A 3 Thornholms on as many Mounts V is born by *Thornholme* of *Yorkshire*.

LXXXVIII. He beareth Argent, within a Wreath or Crown of Thorns, Sable; three Roman Letters, viz. XPS, which are the Symbolical Letters of Christ; and is as much as to say *CHRISTVS*, others expound the X to be *Christus*, P for *Populum*, and S for *Salvator*, see *chap. 1. numb. 3*. that is Christ the Saviour of the People.

LXXXIX. He beareth Gules, a long Cross of a Log of a Tree, couped of all four, Argent, fretted with a Crown of Thorns, Sable. This is also Blazoned Christs Cross couped; because the bottom part is longer then the cross piece is. This is born by the name of *Mazarin*.

XC. He beareth Or, a Stock couped at both ends, Sable. Others call it a Log or Chub of Wood, the bottom of a Tree sawed off. Born by the name of *Chubbey*.

Such a piece of Wood belongs to the Crest of *Middleton* of *Leighton*, with an Ape sitting upon it, and chained to it, all proper.

B the like in Base O with a Peacock standing on it, is the Coat and Crest of *Van Poppendorf*.

3. **W**E shall after Trees, and there several parts and members, proceed to Roots and Grain, and shew how they are in whole or part born in Coats of Arms.

XCI. He beareth Sable, a **Turnepp**, Argent, **Leaves** Vert. Some term it a Turnepp root. This is born by the name of *Garmes*.

G the like proper, a Chief O born by *Tarpine*.

B 3 such A is born by *Rubben van Pheikerg*.

G one A is born by *Van Centeseach*.

XCII. He beareth Argent, a **Potata** (or a ground Artichoke, or a Jerusalem Artichoke root,) proper, that is of a sanguine coloured skin, but under it or a pure white. This is born by the name of *Groundling*.

O 3 such born by *Graling*, alias *Grouling*.

XCI. He beareth Argent, a **Carrat**, Or, **Leaves** or **Wifalls**, Vert. The tops of Carrats and Parsnips are by Gardiners termed Wifalls, and some Wisomes, so then according to the terms of Art, the Carrat is Or, Wifalled Vert. Born by *Carrate*.

The **Parsnip** is the same to the Carrat, but of a white colour; the Flowers are white, in Umbells.

The **Radish** the same, only white at the bottom of the root, and a deep Blood colour on the higher part, next to the Wifalls or Leaves.

G 3 Parsnips is the Coat of *Van Bilriscb*.

XCIV. He beareth Sable, a **Mandrake**, proper. The *Hebrew* Rabbins or Doctors say, this was the Coat in the Standard of the Tribe of *Reuben*; which may probably be gathered from that saying in *Genesis* 30. 14. *that Reuben went out in the days of Wheat Harvest, and found Mandrakes in the fields*.

Hechoachan hath such a kind of Forked root, but not twisted or wreathed together. It hath a Stalk of diverse colours, as yellow, greenish, reddish, the Fruit is like a Grape.

XC. He beareth Azure, a **demy Mandrake**, Argent, **the top**, Vert. Some describe the Mandrake to be the direct shape and proportion of a Man or Woman, and that it hath extraordinary Virtue in it; which *St. Augustine* hath written much against. Of some it is called *Circa*; it bears an Apple of sweet smell, which of some is called the Apple of the Earth, there is of this both Male and Female, the first hath like leaves to the Beet; the other to the Lettise. This is born by the name of *Man-devile*.

XCVI. He beareth Gules, a **Garlick head**, Argent, **the Bladdes**, Vert. Some term it a head of Garlick shanked Vert. By the name of *Garlich*.

The heads of Garlick are divided into so many cotes or houses, which they call Cloves of Garlick, each of which being parted and set in a Garden will encrease to a full head again, which thing the Onion will not do.

The **Onyon** is the same, only the head round, and not distinguished by Cloves; for the Bolls of the heads of

Garlick, are termed Cloves, and the Onion it is termed the Coats or Pils.

The **Leek** is like the Onion; so are **Chibols** and The **Chynes**, but of a lesser growth.

The **Scallion** is like to Garlick in taste and smell, but in Stalk and Leaves resembles the Onion.

XCVII. He beareth Sable, a **Mushroom** or **Toad-stool**, Argent. The Mushroom is much eaten by the Gentry, especially in *Ireland*; but as it may delight one, so it may be Poison to another.

There are several kinds of these Mushrooms, as the **Puffe** or **Bratune** of the Earth, growing most under ground. The **Goats Beard**, of which there are the reddish one and the spongy one, and the Pepper tasted one. The **Fly-Bane** and the **Fus-Ball**, with several others, whose form of growth are like the examples following. This is generally called the Field Mushroom or Garden Mushroom.

G 3 such in Triangle, the roots in Fesse conjoined A is the Coat of *Lemminge* of *Bavaria*.

XCVIII. He beareth Argent, the **House Mushroom** proper, those that grow in old, rotten decayed Houses, or on perishing Trees, out of Walls that receive Water, and on decayed and ruinous Timber Foundations, &c. are of a swarthy tawny colour, which upon long growth turn to a Black; of these there are several sorts; the **folding** or **changeable** Mushroom, the **Stone** Mushroom, the **branched** Mushroom, and the **ragged** Mushroom; yet are generally of this form, only some round and flat, others copped rising to a point, and others like long Hatters Blocks, or capped tanks, i.e. Hats with Brims.

XCIX. He beareth Or, an **Head of Garlick**, bladed and seeded. The outward skin or rind that covers the Cloves of Garlick, is of a sanguineish white colour. This is born by the name of *Trunier*.

The **Moly**, or **wild Garlick** hath leaves like a Tulip, with some bulbs sometimes growing at the end, sometime on the stalk, which being set, will produce a Plant of the same kind; the stalk is naked without leaves, round and smooth, bearing a great umbel or tuft, of small Star-like Purple flowers upon equal foot-stalks.

The **Indian Moly**, the Stalk hath no Flowers, but only bears a Clutter of reddish scaly Bulbs, each as big as an Acorn standing on foot-stalks, which being set, will produce a Plant of its own kind.

The **Moly of Hungary** hath the Bulbs as aforesaid, of a red colour, which breaketh forth into a Flower like the wild Garlick or Moly, of a pale purple colour.

Serpents Moly hath the Bulbs on the head of the Stalks redder; and the small green leaves twine and crawl, from whence it took its name; the Flowers which grow among the Bulbs are very beautiful.

The **Mountain Moly** hath a tuft of yellow Star-like flowers, greenish on the back, with yellow threads in the middle: Others of this kind have Purple flowers tipped with yellow: Others white flowers.

The **Spanish Silver cupped Moly** hath a Stalk proceeding from 2 or 3 rush like leaves, on which is an head of flower on long foot stalks, which spread much open, of a shining Silver colour, with lines on both sides the leaves, in fashion small and hollow, like a Cup.

The **sweet Moly** hath 3 or 4 small Bent like leaves, the

the stalk bearing many Star-like Flowers, which if the Summer be hot, smell like Musk or Civer.

A 3 such Garlick heads proper. Born by *Garlick*.

There is another way of bearing the Garlick without the Seed, which is also set down in this quarter; and are born by *Knobloch* in *Francford*, viz. Sable one in Pale, the other two in Salter, the Blades reversed Argent.

C. He beareth Argent, a *Dag-stone flower*, leaves and root, proper. The Flower is like the *Snap-Dragon*, being many of them together, rising higher and higher to a point at the top, of a Purple colour. This is generally known by the name of *Priest-Pintle*, or *Goat-Stones*, whose Flowers are variable, as white, bluish colour, light Purple, and spotted.

4. FROM Roots fit for Mans Use, we come to grain, the staff and stay of all rational Creatures, and that is Corn of all sorts; now how they are born in Arms either whole or parted, these few examples following will manifest.

Where note, that Corn, if it be born Black, it is termed such a Grain Blasted or Mildewed, and so needs no mentioning of its colour.

CI. He beareth Azure, on a Mount, Vert, a Wheat Ear, Stalked and Bladed, Or. Some say, a Wheat stalk Bladed and Eared. 3 on a Hill in Base, is born by *Garzon* of *Venice*.

Indian Cossick, Tree, Stalk and Ear, is made directly like to the Wheat.

French Wheat, or *Buck Wheat*, hath a reddish Stalk, set with leaves on a stalk, broad and round, and biforked at bottom, small and pointed at the end, at the top in Branches are diverse clusters of small white flowers, which turn to triangular blackish seed.

CII. He beareth Vert, a Wheat Ear, Or. 3 such Seeds are born by *Grainer*.

Wasson, it is not one kind of Corn, but a mixture of Wheat and Rye.

Blanche, is a kind of Wheat that is hard and thick, it will not be driven from its husk, except it be fried or parched.

Furmenty is a Wheat husked and boyled.

Goats Wheat, it is a Wheat without any husk, much like to our Greats or Furmentie.

Cyph Wheat, it is very like to our Rye, it is of an unpleasant taste, and doth make very black Bread.

Er. 2 Flanches B on each 3 Wheat Ears coupéd Or; is born by the name of *Greyby*.

B 3 Ears of *Ginny Wheat* bladed and coupéd Or, is born by the name of *Grandorge*.

Per pale G and A 5 such Ears in Fesse Stalks coupéd V born by *Van Holden*.

Per Fesse B and O on a hill in Base V two Marigolds between 3 such ears is the Coat and Crest of *Roge*.

CIII. He beareth Gules, a Rye Stalk Bladed and Eared, Or. Born by *Risley*.

G 3 such on a Bend S born by *Rye* or *Ry*.

*

Barly hath a longer and rougher aulne or awne, or beard than *Rye*.

Secourgon is a lean, wrinkled and starved Corn, somewhat like unto Barley.

Amel-corn is a Grain between Wheat and Barley.

CIV. He beareth Or, a *Ginny Wheat Ear*, Gules, Stalk and leaves, Vert. Or, a *Ginny Wheat* tipped and bladed.. It is also termed *Indian*, or *Turkey Wheat*, the stalk is full of joints, from each with the leaf, sprung an ear, which hath a husk of many leaves folded over them, with a Bush of threads or hair hanging down at the ends, which when they are ripe, are to be cut off, and the Ear will appear.

CV. He beareth Or, a *Pease-cod* pendant, Vert. 3 such is born by the name of *Codwre*.

The *Care-Cod*, the *Fitch-Cod* this will serve for, being all after one form of making.

The *Bean-cod*, the *Lentill-Cod*, the *Lupine-Cod*, and the *Kidney-Bean-Cod*, are all alike, save the end is more fuller and rounder than the *Pease*; see chap. 5. numb. 87. the leaves are winged leaves, sharp pointed, but the *Witch* and *Care* have them long and narrow winged, with round points.

In this quarter is another sort of Garbe, or rather a Fasse or Bundle of Grasse tied up; and these kind of bearings are much in use by the *Germanis*, or else they make all their Garbes thus, which is contrary to all Nations.

S 3 such O is the Coat and Crest of *Buechrim*.

Per Fesse A and B 3 such O is born by *Treyen van Derr*.

CVI. He beareth Azure, a Garbe, Or. termed also a *Wheat Sheaf*, or a *Sheaf of Corn*, let it be a Sheaf or any kind of grain, or any thing tied up in form of a Sheaf; to name it a Garbe of such and such a thing will suffice; see chap. 18. numb. 43. This belongs to the Worshipful Sir *Thomas Gresvenor*, of *Eaton* in *Cheshire*, Baronet; of whose full Atchievement I shall speak hereafter.

B 3 such O was the Coat Armour of *Randle Bohun*, the third Earl of *Chester* of that name, called *Randle Blundeville*; the Son of *Hugh Bohun*, otherwise called *Kere-lock* the fifth Earl of *Chester* after the Conquest, and the second of that name, who did bear for his Coat B 6 Garbes O.

O on a Fesse engraled B 3 such O born by *Marbury* of the *Mere*.

G 3 such A on a Chief B a Lion passant A by *Rutter* of *Kingsley*.

G 2 Helms A and a Garbe O born by *Cholmundele* of *Cholmundele*.

B a Cheveron betwixt 3 Garbes O by *Hatton* of *Hatton*.

Er. a Cheveron B betwixt 3 such O by *Masterson* of *Namptwich*.

B a Fesse G betwixt 3 such O born by *Sandbach* of *Sandbach*.

S 3 such O a Bordure A by *Birkenhead* of *Huxley* and *Backford*.

CVII. He beareth Argent, a Garb dejected, Vert; with a Cock standing thereon, to the sinister, Gules;

it

it is also termed a **Wheat Sheaf dejectant, or thrown down, or debased.** This is the Crest of *Williams of Anglesey*, and *London*, Herald-Painter.

CXVIII. He beareth Gules, a Garbe, Or, with an Adder or Serpent through the top of it, his head aloft, and the tail surrounding it, Vert. Others, an Adder entwrapped about a Garbe. This Crest pertains to Esquire *Dod*, of *Edge*.

CIX. He beareth Azure, a Garbe, Or, banded or wreathed, Gules. By the name of *Gravenor*, of *Ower*, in *Shropshire*.

CX. He beareth Gules, a Garbe, Or, banded with Roses, Argent.

Sometime you may find the Garbe bound with a Garter, the ends flourishing abroad; some wreathed or wrapped about with Adders, and such like, which you must be careful to observe and name. This is born by the name of *Gargarle*.

CXI. He beareth Azure, a Garland of Wheat, Or. Some term it a Garland or Chaplet of Wheat Ears, or Ears of Corn, made into a Garland. This is the Crest of the *Whitebakers Company*; being held up by two naked Arms issuant out of a Cloud.

CXII. He beareth Argent, a fasces of Palme, Vert, banded with a Garter or Ribbon, in form of a Garbe, Gules, out of a Coronett, Or. Some term it a fascicle, from *Fascis*, and *Fasciculus*, a Bundle of Sticks bound up, or an handful of any thing bound together in a little Bundle. This is born by the name of *Van Hurson*.

CXIII. He beareth Argent, a bunch or tuft of jagged Grasse. Or five Piles of jagged Grasse in a tuft. Some are so exact, as thus to number them; and considering the numerous ways of bearing Grasse, it stands us sometimes upon, for distinction sake, to number the Piles. Three such is born by the name of *Tindesly*, alias *Tinsley*.

The like out of a Coronet, is the Crest of *Van Ernaer* and *Næbier*.

The like A on a Cap B turned up A is the Crest of *Luxen*.

CXIV. He beareth Argent, a For Tail Grasse. Of some termed a Reed-grass, or Cats tail grass, or horse-tail, or Feather-grass, and Tufted-grass slipped.

The House-tail grass hath a green spiked head, long and slender.

CXV. He beareth Or, a Pease leaf slipped with two Blossoms. The Pease leaf is three together, the highest at a little distance from the two under, which are fixed in a manner close to the stalk of it under. Born by the name of *Peas*.

The Fenugreek bears the like, only the leaves round, and the pod long, and slender like a Kidney Bean.

CXVI. He beareth Argent, an Oat-stalk Bladed and Rizomed. The Corn in the Oats are not called Ears, but Rizomes; though of Old I have seen the Blazon to be, an Oat Ear Bladed.

A Reed hath a jaggy head like an Oat, but more thick and closer, and Spike headed, of a kind of deep brown Purple. The Reed is between an Herb and a Tree, but in growth is above the Herb, yet nothing in strength to a Tree; it is without very smooth and plain, save the Knots where the leaves grow, but within is like an empty Vessel; it is carried and bent on every side by the Wind.

CXVII. He beareth Or, a Lavender flowered, proper. The knot or knaps of Lavender are of a blewish colour, see chap. 5. numb. 69. By the name of *Lavenaer*.

CXVIII. He beareth Argent, a tuft of Grasse; a single Grasse is called a Pile, and many together are a tuft or knot of Grasse. Born by *Grassey*.

There is a kind of Grasse in *Babylon*, which is like Cane or Reed, which being tasted or eaten of Cattel, killeth them. And in the Hill *Parnassus*, there groweth another kind of Grasse more thick and rank than the other, and of better size, for it beareth a Leaf like Ivy.

In *Cilicia* there is a kind of Grasse which is called *Heraclia*, which grows in Hedges, about Walls and Vines, whose Leaf is like *Mercury Herb*, and is full of Bristles.

Rushes are like hercunto, called also Rush-Grass; but they are generally round.

CIX. He beareth Argent, in Base (or issuing out of Base) Sedges or Reeds, with three tops or Spears out of the same, proper. This is the Crest of *Barnardiston*, with a Crane in the same, proper.

The like in Base with 2 tops bending to the Dexter and Sinister Chief, in a Field A is the Coat and Crest of *Melhofen*.

CXX. He beareth Argent, a Spear Reed, Vert, the top Sable. These are termed also Sedges, Flaggs or Water-flaggs. Three such is born by *Sacklich*.

Per Fesse A and V 3 Reed Spear heads issuant, and a Fesse counterchanged, is the Coat of *Mermoser of Bavaria*.

A on a Mount in Base 3 Reed Spears (sans leaves or sedges) born by the name of *Van Uttingen* of the same Province.

A 2 Spear Reeds, single sedged and couped in Salter proper, a point G born by *Mosaw* in the Province of *Lyold*.

G on a Mount in Base V 3 Spear Reed heads (sans Sedges) O born by *Murbaimer*.

Per Pale O and B 6 Reed heads falling from one stalk, each side three counterchanged. Born by *Van Pasheymb*.

O on a hill in Base V 3 Spear Reeds double sedged or leaved; is born by *Liesch*.

On a Coronet 3 Spear Reeds, banded in the middle, ends florant O is the Crest of *Van Holtingen* of *Westphalia*.

7 Spear Reeds, one G another A alternately (or by turns one after another) is the Crest of *Van Kribewinkle*.

Cyperus, or **Engilish Saffron**, or the **Bull-rush** hath in the top a few short leaves, out of which proceed (on small stalks) many panicles, or chaffy green spikes, or ears of small leaves.

Camell Bay Rush hath the top of divers brownish or purple husks, which cast forth Mossy white threads, or downy hairs.

The **Great Rush**, or **Bull Rush**, called of some, the **Sotts Brow**, the *Romans* call it the **Sea Bull-rush**, because it groweth best in moist grounds, there be two kinds, one hath a square top, or Crown very blunt with all; the other is rather Spear-like, and sharp topped.

T O

The Right Honorable Robert LORD Bulkley of Benmaris in Anglesey,
VISCOUNT CASHALL in the Realm of IRELAND:

And to

RICHARD BULKLEY His Son and HEIR apparent.

Amongst others to whom I owe Service, I must acknowledge You not the least, but chief in Vertues, the experience whereof makes me to presume the presentation, of this my Service in the Dedication of this Chapter and Plate to your Pious memory, not doubting of the favourable acceptance from him who is your much Obligated Servant,

Randle Holme.

C H A P. IV.

I. **A**fter Trees and Herbs Nutritive, let us proceed to such as are of less use to Nature; but more delightfome and for pleasure: and those are Flowers of all sorts, whereof some for the Eye, others for scent, and others for the adorning of houses, or other pleasureable uses; as making of Crowns, and Garlands; from which use they received their names of Coronarie herbs. Of which Herbs and Flowers I shall give some few examples, of the several ways of Bearing them and then shew you the Flowers, and Leaves they bring forth, according to their several kinds.

I. He beareth Argent, an **Unfoile** Vert. This is Born by the name of **Unfoile** or **Unfall**. This is an Herb that never hath more, then one Leaf from a Root, till it Shute to a Seed which comes from the middle of it, then it hath but two at the most, it is also called **one blade**, by Johnson in his Herbal. trib. 5. cap. 14.

Some Blazon this a **Unfoile slipped**, but that is needless; for this, the **Dufoise**, and **Crefoise**, all of them, have them naturally.

II. He beareth Argent, a **Dufoise** or **Crefoise** Vert. Flowered, Purple. The Flower is like that which we commonly call, **Dog Rories** or **Witch-pintle**, but more spicing. This is borne by the name of **Dufoise**

O 3 such Leaves slipped V. is born by the name of **Tnybride**.

III. He beareth Sable, a **Crefoise** Or; In the Herbal this is called, a **Fesid hony Suckle leaf**, or **Short Aine**, or a **Clover Grasse**, it is of sweet smell: some term it a **three Leaved Grass slip**, which is from the Dutch Blazoning, who in their Coats, bear the **Crefoise** very much without the Stalk or Slip: but such Coats are rare here in England. This is born by the name of **Tnemol**.

O 3 such V. Born by **Haman**.

G on a Bend A 3 such V. Born by **Harvey**.

B on a Mount in Base 3 such their Ships in point (or joyned at the bottom) O Born by **Muelich**.

O on a chief G 3 such O Born by **Banville of the ster**.

Per pale G and O on a chief Indented A 3 such V by **Gilham**.

A 3 such S Born by **Champney**.

V 10 such A by **Maure of Bankhall**.

IV. He beareth Argent, a **Crefoise** Sable. This is born by the name of **Schekich**.

G the like O Born by **Van Leerscheide**.

A 3 such S Born by the Earl of **Burgh** in Germany.

G the like A Born by *Van Skreibersdorf*. Also by *Van Linder*.

A the like B Born by *Malsblyng of Franconia*.

V. He beareth Argent, a *Cresfoile double siped*, Gules. This is borne by the name of *Strongville*.

VI. He beareth Or, a *Cresfoile treble siped*, Or. Born by the name of *oswell*. After some, a *Cresfoile* with the *Stalke* *couped* or *erased*.

VII. He beareth Argent, a *Cresfoile*, the *Stalke* *siped*, *raguled*, and *Couped*. By the name of *Harraeth*. After this manner the *Dutch* have the *Stalke* of several *Flowers*, and *Leaves*, thus *Siped*, *Raguled* and *Couped*, and sometime with but one or two, of these Terms.

VIII. He beareth Argent, an *Heart Cresfoile*, the *Stalke* *couped* in the middle Vert. Born by the name of *Swill*. This is also termed a *Wood Sarel Leaf*, or *Part grass*, or *Part Clover*.

IX. He beareth Sable, a *Caterfoile*, or a *Quarter foile*, Born by the name of *Forrester*. This is taken to be some *Flower* with four *Leaves*, as *chap. 6. numb. 80. 81.*

After the same manner as the *Cresfoile* is *siped*, *double siped*, *raguled* &c. and *Fretted*, in the same manner these *foiles* following, are borne in *Coates of Armes*, which are to be termed the same way in *Blazoning*.

G the like O Born by *Ron*.

V 3 Quarterfoiles siped O Born by *Spratt*.

B 3 the like A Born by *Vincent*.

G 5 in Salter O Born by *Palmar*.

X. He beareth Or, a *Cinguefoile Azure*, some write is *Cinquefoile*. This is taken to be a *Flower of five Leaves*, either *round* or *pointed*. This is Born by the name of *Mutton*.

A the like G Born by *Powcher*.

B the like A Born by *Bessington*.

G 5 such in Salter A Born by *Palmer*.

XI. He beareth Argent, a *Serfoile*, or a *Sisefoile*, Sable. Born by the name of *Sextill*. This is taken to be a *Flower of six Leaves*.

G a Bend, and a *Sisefoile* in the Sinister quarter A Born by *De La Fontaine*.

XII. He beareth Vert, a *double Caterfoile*, Or. This is often used in *Coates of Armes*, to distinguish *Houses* and *Famileys*: being the difference for a ninth Son.

XIII. He beareth Argent, a *Wood Sorel Leaf*, or an *Heart Clover*. The *Stalke* of the *Wood Sorel*, is naturally red. Three such is the Coat of *Tredisgin*.

A 6 such Born by *Laffels*.

XIV. He beareth Argent, a *Succroy Leaf*, Vert. It is cut or torne in the edges on both sides even to the middle Rib, ending in a point, with a red Rib, down the middle of it. The *Flowers* are of some Red, others Blew, growing Spiked at distances with small *Leaves* under hem.

XV. He beareth Or, a *Parfoley Leaf*, Vert. This is borne by the name of *Parley*. This may also pass for the *Groundwell*, or *Groundell Leaf*, which much resembling it.

Perley, for so some write it, is a Garden Herb much used by Cooks. *Wild Perley* hath a longer and broader Leaf with the *Stalkes* more long and scattering abroad: there are diverse kinds of it.

Grunduel, or *Grundel*, hath the Leaf green and hoarie, like to an old mans beard. It hath a daisy flower growing in branches of a yellowish colour, out of a short husk, denoted in the top.

XVI. He beareth Argent, a *Spinage Leaf*, Vert. This is borne by the name of *Spinage*. This is a five pointed Leave, much cut into, in the edges as if it were rent.

XVII. He beareth Argent, an *Angelica Leaf*, proper. This I call only a leaf, as also *numb. 15.* because it is the nature of the Herb *Angelica* to have five or seven leaves on a *Stalk* and many of these *Stalkes* making but one branch when they are fixed to the great *Stem*.

Alexanders, grow after the same manner, only the leaves have a little longer stalk, by which they are fastened to their greater stalk.

Lobane, is the same, with *Seeds* growing on the mean stalk, like *Fennel Seeds* all in an umbell.

XVIII. He beareth Argent, a *Fern leaf*, Vert. *Spireworth* have the leaves thus on a stalk only they are smooth not nicked or dented.

Maiden hair, hath the same, save the leaves are round at the end.

O 3 Fern leaves V Born by *Fernall*.

XIX. He beareth Argent, a *Colts foot leaf*, proper. This is borne by the name of *Colton*. This is a large three pointed leaf with deep dents in the edges. Some have five points and tunc up in the leaf near the foot stalk.

XX. He beareth Or, a *Mercury leaf*, Vert. It is a three pointed leaf, but long and slender with smooth edges.

3 such is borne by *Marvaile*.

XXI. He beareth Argent, a *Nettle leaf*, proper. By the name of *Stringer*.

O 3 such Born by *Nettle of Malpass*.

A 3 such G Born by *Malherbe*.

A a Nettle Bunch couped. Born by *Mallerby*.

XXII. He beareth Or, a *Betony leaf*, these grow in Bunches near the ground like the *Primrose* and *Daisy* leaves. Born by the name of *Betty*.

The *Endive* leaf is waved and groweth in Bunches on the ground, the stalk is Bunched bearing at the tops small blew flowers, cut in points, like a *Pink*, out of a small six leaved husk.

2. From leaves we come to Flowers, and shall begin with the Flower de lis being the fairest for shew, though the English Rose out passeth it for smell.

XXIII. He beareth Gules, a flower de lis Coupéd, Argent. Some write it, flower deluce; others flower de luce, or a luce or lis: and so it hath been anciently Argent, a luce, or de lis, Sable.

This is a Dutch Coat, and is born by the name of *Dalmahut*.

And such a like A is the Crest of *Bindemoner*.

Per Fesse A and G 2 Roses, and the bottom of a delis conjoynd to the Fesses line, Counterchainged born by the name of *Goldly*.

G a Fesse O a delis issuant, and a Mullet of six points in Base A. Is born by the name of *Walter*.

XXIV. He beareth Argent, a Dutch flower de lis Azure. I call this a Dutch de lis, because those Heraults there, generally make them after this form.

This is born by the name of *Van Freislinger*.

A the like G is born by the name of *Morden*.

Per Fesse G and S the like A is born by the name of *Buben Hansen*.

B the like A Born by the name of *Digby*.

V the like A born by the name of *Fouke* and *Van Be hem*.

Quarterly B and A the same Counterchanged. Is born by the name *Bohem*.

XXV. He beareth Azure, a flower de lis, Or. By the name of *Stamwater*.

B 3 such O is the Armes of *France*. Also *Cantelo*.

Quarterly G and O in the first and last three such A. Born by *Massy* of *Puddington* in *Wirral*. And of *Codrington*.

B a Fesse between three such Or. Is Born by Sir *Peter Leicester* of *Tabley* Baronet.

B a Fesse G fretted O between the same. Is born by *Licester* of *Tost*.

Per pale G and O a Flower de lis Counterchainged. By *Cornburgh*.

G a Flower de lis in Bend A. Is born by *Istein*.

XXVI. He beareth Sable, a flower de lis, Argent. This is a de lis, made after the old maner; and therefore shall say no more of it, but shew you it form, and figure.

XXVII. He beareth Gules, a flower de lis, Argent, seeded Sable. This is born by the name *Wadsworth*. Others will term it, a de lis, between each leaf a trefolle. Mr. *Morgan lib. 1 fol. 21.* give an example of this kind of flower de lis, but add no more to them, (but a flower de lis, stalks, and slipped,) as if the Trefolles (which they are not) were appurtenant to it. See *numb. 29*.

XXVIII. He beareth Azure, three Lylies in form of a flower de lis, Argent. But the most proper Blazon for this, is to term it, a flower de lis, (which it is, as

to the principle part of it) composed of three Tulips, or Lillies, or what else soever the heads are off. And such Flowers as these, I have seen of two colours: which you may thus Blazon: a flower de lis, Vert, composed of three Tulips, Argent. This is born by the name of *Wallingham*.

XXIX. He beareth Argent, a flower de lis, Gules, between each leaf, a Staffe holding of a penon, Azure. This is born by the name of *Don John Virillo a Spaniard*.

Thus have many French, Dutch, Spanish, and Italian Coats, things between the Leaves of the head of the flower de lis, with either Stalkes or Staves: at whose points are Stars, Roses, Caterfoils, & long seeds as in Gillflowers, and Tulips, which is accordingly named.

XXX. He beareth Argent, a Cuped flower de lis, Azure, Seeded in form of Stars. This is also termed the open flower de lis, or the Losenge-like de lis. This is born by the name of *Van Claubitz*.

XXXI. He beareth Azure, a Bulbous Lilly or flower de lis, Argent, Stalke slipped, and bladed (or leaved) Vert, Seeded Sable. *Pliny* saith that the Lilly is next to the Rose, for fairness of colour, and sweetness of smell; for vertue and effect in its working: therefore the Spouse in the Canticles, *Cant. 2. 1.* is compared to it. *Gwilliams fol. 154.* terms this a Lilly, but I judge it more properly to be termed a flower de lis slipped, &c. For it is the true de lis, as it groweth. See the Lilly is another thing *numb. 32. and 57. and so Morgan lib. 1. fol. 23. 27.* doth make them.

The Iris or flower de lis, hath flaggy leaves standing uprigt, out of the middle of one of them proceeds a short weak foot-stalke, with a flower first covered with a thin yellowish Skin, containing nine leaves, (as all Flowers de Luce doe) whereof three stand upright, and are short and closed together having broad pointed tops: the three that fall down turn up their ends, having a yellow thrumy substance, or strip down a good part of the middle of the leaf: three other leaves are Arched, which cover the bottomes of the three standing, and the tops of the three falling leaves. These are of diverse colours, as White, Yellow, Blew or Sky colour, Ash, Red, and Peach colour, others variously striped on the leaves. This is most properly called the Bulbous flower de luce, of some, a Chamolet.

The English Bulbous flower de luce have thick long leaves Crested on the back, and hollow on the other side: the stalk beareth on the top out of a thin Skinny hose, one or two Flowers, composed of nine leaves; three turn down, which are longer, and broader then all the rest, each having a yellow freez, or thrum near the bottom; the three arched leaves which cover the lower parts of the falling leaves, turning up again in the ends, which are nicked or divided into two parts, and the three standing leaves are small at bottom and broad at the top, of a deep Blew or Sky colour. Some of this kind have them white, yellow, purple, others with the falling leaves white, the Arched leaves Silver colour, and the standing leaves of a bluish purple. Others there are which have the falling leave circled with blew, the Arched pale blew, & those standing purple. Others have the falling leaves yellow, Arched

Arched Sky colour, and top leaves murrey, with other varieties for which the Flowerists have peculiar names.

The **Water flag, Flower de Luce**, the Flower is yellow having three falling leaves, each having a free or ring at the bottom, three Arched leaves, and in place of the three standing, this Flower hath only three short peices standing up.

The **Flower de luce of Tripoli**, hath on the top of the stalk three or four long narrow leaved Gold yellow flowers, in fashion like the **Bulbous Flower de luce**, others are of a bright blew.

The **Flower de luce of Lusins**, or the variable **Flower de luce**, hath a thick flat rhinathow long leaves, the stalk hath four or five or more flowers one above another: the lower leaves are variable marked with white and blew, the Arched and top leaves are light blew.

The **double Flower de luce**, the flowers seems like many thrust together, coming confusedly out of one husk; some having the distinct form, others no form nor fashion of a flower de luce, they are white, veined, or the blew leaves some of these are purple, white, and Straw colour.

The stinking **Gladioli**, is a kind of a wild **Flower de luce**, having flag leaves with sharp edges and thick in the middle, the stalk bears three or four flowers at the top, made somewhat like the **Flower de luce**, having three upright leaves of a dead or fallen purplish all colour, with some veins in them: the three falling leaves and the Arch leaves, in this flower stand out asunder one from the other.

This is born by the name of *Murwin*.

S 3 such A is the Armes of *Winchester Colledge*. But Mr. *Morgan* makes them without leaves.

3 such out of a Coronet, is the Crest of *Van Thellr*.

XXXII. He beareth Or, a Lilly Argent, Stalk flipt, and bladed, Vert; Seeded, Sable. There is two sorts of Lillies, the one groweth with turned leaves half round much after the nature of the turn Cap: the other with leaves upright after the *Eulipa*, but sharper at the stalk, se numb 56. 57. So that for distinction this were best termed an **open Lilly**, or **Lilly flower**, this sort being no other colour, but, white, and the **close Lilly** of several colours, as White, Orange, &c. This is born by the name of *Lilly*.

B 3 such the Stalks flipt. Born by the name of *Beauty*.

3. FROM the Lilly of the Valley we come to the Rose of Charon. And they are several as,

The **Damask Rose**, of a purple colour so is the **Uelvet Rose**.

The **Yellow Rose**, single and double.

The **Rosa mundi**, white veined or striped with red.

The **Varbled Rose**, is a light red veined with a deep cr.

The **Hungarian Rose**, is of a pale red with many faint spots spread over the inner double leaves.

The **Dwarfe Rose**, or **Gilliflower Rose**, have small flowers yet very double, which in the bud are as if they were cut, and are of a **Carnation**.

The **double Musk Rose**, one rising out of the mid-

dle of the other: or the **Rose in Rose**, being a small **double Rose** of a deep red or **Carnation**, with large great **Beardies** representing **Winged leaves**, or **Jagged leaves**, rising out of an other larger **Rose**, of the same form, with a small foot stalk. I have seen **Roses** thus, of three heights, the highest being least.

The **Monthly Rose**, of the purple colour, it bears three times in the year.

The **Tock and Landcaster Rose**, is half white, half red in the leaves: but in **Herauldry** it is a white **Rose**, in a red **Rose**.

The **Scarlet Rose of Austria**, hath one side of the **Rose leaves** **Scarlet**, and the other side of a pale **Brimston** colour.

The **Musk Rose**, grow many together, and the first leaves larger then the inner, which are small and very double; being whitish or of a **Cream** colour.

The **Eglantine Rose**, is the **Sweet brier Rose**, which is white; some edged with red, there are both single and double Flowers of them.

The **Virgin Rose**, it without thorns, the leaves in the inner side of a pale blush colour, and the out side whitish.

The **Dog Rose**, or **Brier Rose**, it is both single and double, and of a faint whitish bluish colour; some are white with **Scarlet** edges the **Seeds** or **Crown** yellow.

The **Ever-green Rose**, is a single **Rose** of five leaves like the **wilde Eglantine**, but fall not away in the **Winter**, untill they be cast off by the new in the spring time, the Flowers stand four or five together at the ends of the Branches, which are of a pure white colour.

The **Spanish Musk Rose**, it is a single **Rose** of five Leaves, white with an eye of **Blush** colour in them.

The great **Apple Rose**, hath reddish branches with green sharp thornes; the flowers are small and single, standing on prickly Buttons, which after the flower is fallen, grow great, and red, and of the fashion of a **Pear**. But in all other **Roses**, it grows red and long, but thick in the middle.

XXXIII. He beareth Gules, a **Rose**. This is born by the name of *Rosell* and *Calceol*.

Here note, that as colour cannot be on colour, so consequently the **Rose** must be **Argent**; but if the Feild be metle, then the name of a **Rose** only, sheweth it to be a red, and because all **Roses** are seeded **Or**, and **Bearded** **Vert**, it is also needless to expreis them, except, they be of contrary colours thereunto. As I have seen a **Rose Bearded Or**. And the **Rose** it self, **Or**.

S 3 **Roses** A is the Coat of Sr. *Thomas Powell* of *Horsley* Baronet. This was the Coat of *Cune* or *Kane* *Dda*, a noble man in *Wales* His Paternal Antecessour.

A a **Rose** G born by *Howell* Lord *Rofs* in *Wales*, and *Van Reichneck* in *Germany*.

G a **Chevron** between 3 such A born *Eignion* of *Gerant* in *Wales*.

A 3 demy roses in pale G. born by *Wolfe*.

A **Rose** with within an other (or a double rose) G by *Rosengberg*.

G a rose A Born by *Bappenberg*.

Barry of 6 O and B on a Canton Er. a **Rose** G. by *Holme* of *Chester*.

A 3 **Roses** G by the name of *Yong* of *Kenton*.

XXXIV. He beareth Argent, a **Province Rose** flipt, or

er slipped, proper. This is born by the name of *Provincial*. It is of a pale red, or Carnation colour.

XXXV. He beareth, Or a **Branch of Roses**, or a **Rose Branch**. Thus born in Crests held in hands, or Lions paws &c. belongs to many.

XXXVI. He beareth Azure, a **Rose slip**. See more of the nature, and sorts of Roses, in *Rea's Flora chap. 4.* Some say a Rose slipped, the Stalk, Blade, and Seed. Now **Barbed** is the green leaves on the back, to which the rose is joyned.

A 5 Roses on a branch Irradicated (**Sans leaves**) G. Born by *Roschack of Switzerland*.

A a Rose Branch G Leaved V Born by *Friesen*.

A a branch of 5 Roses, Leaved, Proper. Born by *Holderman*.

G a Branch of 5 Rose leaved A Born by *Van Hammerstein*.

a Rose slip G is the Crest of *Rosen'erg*.

A on a mount in Base V three Rose slips G Stalk and Leaves, V is born by *Clinghart*.

On a Cap A turned up O three such is the Crest of *Van Ruder*.

XXXVII. He beareth Or, a **Rose leaf**, proper. This is the true form of a Rose leaf; they ever growing three together, though some Herald-Painters make them single, as in the four next Examples. This is born by the name of *Rosell*.

XXXVIII. He beareth Argent, a **Rose leaf**. All leaves are generally born with the points upright, if otherwise then to be termed in what posture, as in the next Examples.

XXXIX. He beareth Argent, a **Rose leaf pendant**. A term used from the Latine word *pends*. to hang; because the point of the Leaf hangs down. Born by *Hagen*.

Per fesse B and O, 3 such O, born by *Keptell*.

XL. He beareth Or, a **Rose leaf bendwise sinister**. Or in bend sinister. Born by *Ben-Ilse*.

Per pale A and V on each 6 leaves in a pale barwise the Stalks endorsed, by *Widenbach*.

XLI. He beareth Argent, a **Rose leaf in bend**. Which shew the point of these leaves to lye bending towards the corners of the Field, or Escuchion.

XLII. He beareth Argent, **party per pale conjoined, a demi-Rose and Thistle slip**, proper. Or as some Blazon it, a Rose and Thistle slipped conjoined in pale, both proper. After this manner all conjoined flowers (whether with slips, or without slips) are to be Blazoned, so that I need give no more Examples of this nature. This is mistaken by my Graver, for the Rose should be before the Thistle, and is an Addition to the Coats in a Canton of the Honored Sir Gilbert Houghton of Houghton, Baronet, and *Bispham* of *Billinge* in *Lancashire*.

XLIII. He beareth Argent, a **Garland of Roses**. Born by the name of *Garland*. G the like. A is born by *Krantz*.

XLIV. He beareth Or, a **Chaplet of Roses**.

You see a difference between a Garland, that being full of Roses, and a Chaplet, which is only 4 Roses set upon a Chaplet, or Circle for the head. Born by the name of *Whallerg*. A the like G born by *Trichinden*.

Per pale G and O, a Chaplet of 6 Roses counter-changed, by *Vrede van Amcke*.

XLV. He beareth Gules, a **demi-Chaplet of Roses**. The Chaplet is always the same colour, or mettle that the flowers are that adorn it; if otherwise, say a **Chaplet**, Or, adorned with **Roses**, or **Lillies**, &c. or the like. Three of these are born by the name of *Girdler*.

XLVI. He beareth Argent, a **dowen Thistle** proper. This is a Thistle that hath its **Bole**, or head of a jagged nature, and the flower out of it is White and Woolly; it is also called a **Cotten Thistle**, and hath a long jagged leaf.

XLVII. He beareth Argent, a **Thistle slipped**. This is the common Thistle, whose head is like the **Artichok**, and the flower of a purple colour. There are several sorts of Thistles, as

The **French Thistle**, or **Trefoil Thistle**, hath a head as the common, with a purple flower, with 3 long leaves joined together, at the end of the foot stalk smooth and thick.

The **Star-Thistle**, that hath pricks growing out of the top of the round-head, the main-stalk leaved with a long smooth and slender leaf like a **Pink**.

The gentle **Thistle**, hath 3 or 4 heads growing upon stalks together with flower like the **Blew-bottle**, and great broad leaves and long, like **Tobacco**.

The **Cassel** or **fullers Thistle**, hath a round head with leaves under it, the leaves grow by pairs on either side the stalk, without any little stalk, smooth without any jaggedness.

The **Sea Holly Thistle**, the head grows out in pricks and hath a jagged leaf.

The **Friers Crown Thistle**, hath a round head, and a long leaf, with other leaves (as it were) growing out of the sides of it.

The **Globe Thistle**, hath a round-head, (as it were) all Hairy, with sharp prickly leaves, jagged.

The **Lady-Thistle**, is our common Thistle.

The **Artichok Thistle**.

The **Pine apple Thistle**.

The **Carlise Thistle**, it hath a head like a single Marygold, with abundance of prickly long leaves growing together under it, as if they were a part of the flower.

The **fish Thistle**, like a bunch of Daisies growing together with jagged long leaves under, and joining to each head.

Besides these there is the **duane Thistle**, the **Melan-choly Thistle**, the **Musk Thistle**, the **Bulbed Thistle**, the **Blood red ball Thistle**, the **Barnabas Thistle**, the **Chameleon** or **changeable Thistle**, the **Solier Thistle**, the **Milk Thistle**, with several others which are of an affinity one to the other; which whosoever desires to be farther satisfied let them peruse *Parkinson's Herbal*, Trb. 2. fol. 157. *Plin's natural History*.

The Thistle is the Badge of *Scotland*.

XLVIII. He beareth Argent, a **double Stillflower**, Gules

Gules. **Husk and Stalk**, Vert. by the name of *Gilliflower*. To mention the Husk and Stalk is needless, if they be of their proper colour which is Green; there are variety of *Gilliflowers*, each having a name according to its colour which are generally red, purple, scarlet, and white; with mixt colours from all these, as

Gilliflowers mixed with red and white.

The painted Lady.	Crown of Bohemia.
Pork and Lancaster.	Crown of England.
Acchilles.	English Virgin.

Gilliflowers mixed purple and white.

Sops in Wine.	Purple Imperial.
Admiral of Spain.	Purple Paragon.

Gilliflowers mixt scarlet and white.

Fair Rosamond.	Great Scarlet.
Royal Roab.	Tabella.
Beauty of England.	New Paragon.

With many more to which Gardiners and Flowerists give name. See *Rea's Flora* fol. 156.

The *Julyflower* as they are most properly called (though vulgarly *Gilliflower* and *Gilofe*) takes its name from the Month in which they bring their beautiful Flowers, and indeed are the pride of Summer, as the *Tulips* are the glory of the Spring; being of all Flowers the most sweet in smell.

A 3 such G is born by *Foury*.

There is a Tree or Shrub of the name *Gilofe*, of some called *Geum*, or *Benett*, which hath Fruit in taste like the Pepper-corn.

XLIX. He beareth Argent, a *Pink slipped*, Gules, **Stalk and Leaves**, Vert, three such are born by *Jorney*.

Sweet William is (as it were) many *Pinks* growing together like a *Poefy*; and are of a light purple or peach colour. Some Snow-white, red, others speckled, some of them are double red-flowers.

The *Velvet Armerius*, or **Sweet William**, it is of a deep rich murrey colour, with a paler Circle towards the bottoms of the leaves.

The **Sweet John** is the same in shew to the **Sweet William**, only differ thus, the green leaves are narrower, and the flowers are deeper jagged; in some Plants the Flowers are red in the middle, and paler towards the Edges, in others white. Those Flowers of this kind which are double consist of two or three rows of jagged leaves.

The **Pride of London** is the same, only the *Pinks* are of divers colours in one and the same Flower, as some white, others red, and others purple; of some called the **Flower of Constantinople**.

Single non-such, it hath a head of many single flowers of a scarlet colour.

Pinks are of many sorts, as white, red, purple, peach, and mixed: they are generally single.

The **feathered Pinks**, have broad leaves deeply cut in, and jagged at the edges.

Christ, is a very small kind of *Pink*, gloweth low, and is only set in Gardens to keep up Borders; it is of a light purple colour.

The **Childing Pink**, groweth as the *Camphir* on upright stalks with narrow long leaves, two at a *Joynt*. See numb. 101, 102.

L. He beareth Argent, a **Blew Bottle**, proper. The Leaf is like the *Pink* or *Juliflower*; but they grow far higher than them, or the stock *Gilliflower*.

The **Corn flower**, is of divers colours, as white, red, blew and mixed. A cheveron G between 3 such, is born by *Charley*.

The **Sultans flower** is purple, and the *Thrume* almost white.

LI. He beareth Argent, a **Figworth flower slipped**. This was the ancient way of drawing it, but the true *Figworth* is as followeth.

LII. He beareth Argent, a **Figworth flower slipped**. The Flower is purple, the Leaves nicked, and grow one against the other on the stalk, at the Root of each leaf, from the stalk groweth the flower, so that each Flower slipped, can bring but one leaf along with it, at the top the Leaves and Flowers grow thick together like a *Knor*. The name of the Flower tells the name of the Bearer, *Figworth*.

O. 3 such is Born by *Balterworth*.

LIII. He beareth Argent, a bunch of **Plantain Leaves**, with three seeds proper. It is generally known with us, by **Maybread Leaves**, some call it **Lamb's Tongue**. The Seed is spiked Head like to *Grass*.

Buckhorn Plantain, hath a Leaf like a *Bucks horn*. The **Ribworth Plantain**, hath nicked leaves.

The like Bunch of Leaves dented, is the Crest of *Ulerdorf*; and also of *Winnington* of *Winnington* in *Cheshire*.

LIV. He beareth Argent, a bunch of **Plantain**, with **Rose heads**, that is a *Knor* of them together bearded. The Leaf plain but snowy.

The **crumpled Plantain**, is a round crumpled Leaf, with another growing out of the midst of it, and the seed out of it.

LV. He beareth Or, a **Cabbach**. Is born by the name *Calbasch*.

The **Colewort** is the same to the *Cabbach*, only the Leaves are more open, not knit together as this is; the Seeds growing out of the middle of it in Husks like *Tear-fitch*, called *Cabbach Colewort*.

The **Cole-flower**, or **Colliflower**, the same with a knot of whitish Seeds in the middle, which are eaten when they are young.

The **Curled**, or **Roman Colewort**, hath the Leaves curled and crumpled, or foulding in and out several manner of ways.

LVI. He beareth Argent, a **Tulip**, or **Tulipa**, Gules. The *Tulip* in its variety of colours is Flowers choicest Jewels, and the most glorious Ornaments of the best Gardens. These are those lovely *Lilly's*, whose beauty excelled *Solomon* in his greatest Glory, *Mat. 6. 29*. Those of Self-Colours are all the Colours that is, save *Blew*, of which I never saw any. As for striped *Tulips*, they have several Names, as

The **Crown Heart Tulip**, is white, streaked with *Carnation*, the bottom and *Tamis* are blew.

The **fools Coat**, is yellow striped with red.

The

The **Crown Imperial**, white striped with purple.
The **Rose** such, a pale blush almost white, striped, and speckled with Orange-tawny.

The **Auroza Tulip**, is a rich Carnation striped with white.

The **Princess**, a blewish red, striped and feathered with white.

The **Vice Roy**, of a Violet Purple, edged, feathered, and striped with white.

The **Orient Virgin Tulipa**, is pale Scarlet, and white well divided in small marks and stripes, the bottom and Camis both Blew.

The **Pearl**, is of a bright Carnation, marked with white, the leaves twine and stand different from others.

The **Parot** is green, edged with a little white.

The **Agot Tulip**, is of a sad Isabella colour, with some marks of rich Crimson, and great stripes of yellow, a dark bottom, and large black Camis.

The **Star**, at first opening twisteth at the ends, which after open and spread flat like a Star, with 6 points of a reddish Isabella colour, and striped towards the bottom.

The **Crocus**, is a Flower of the Tulipa kind and fashion, but much less; the leaves are long and narrow, of a deep green, with a white line in the midst of them, they grow out of the Earth singly like a tuft, in the middle rise out the flowers each upon its own stalk; they are in their first rise covered with a thin white or yellowish skin, then comes forth the Flower composed of 6 leaves, with a long point in the middle set about with Chives; they never open, but keep close at the top, except the Sun shines very warm on them; these Flowers are some white, yellow, purple, striped, and others feathered and flamed, with other varieties, which by Florists are thus named.

The **pale feathered Crocus**, whose stalk and bottom of the flower is blew, the 3 outside leaves white, and the 3 inner striped with a blewish purple.

The **Bishops Crocus**, are white, finely striped with blew; some flowers will have the 3 outside leaves so, and the 3 inner white, and others will be contrariwise.

The **Imperial Crocus**, is of a Silver colour striped with Purple.

The **Royal Crocus** is the largest kind, and better striped with a deep Purple, especially on the back of the three outward leaves.

The **Blew Neapolitan Crocus**, is of a deep sky colour, with a black Bottom.

The **Duke Crocus**, hath the out-leaves of a deep Purple, except the edges which are white.

The **Saffron** also is of the **Crocus** kind, springing up with many long narrow leaves, and after them the flowers in form like them, of a yellow, and some of a reddish Purple colour; in the middle of the Flower there are some small yellow Chives standing upright; besides which there is 3 or 4 greater and longer Chives hanging down or between the leaves, which are of a fiery red colour, and the true Blades of Saffron.

The **Son before the Father**, so called of some Herbalists, because the flowers come up before the leaves, the one in Autumn, and the other in Winter; the flower hath 6 leaves, some are white, others of a pale purple colour, some half white, half purple, with some chives or threads in the middle: After the flowers are past, the green leaves do not presently come forth, which at first are of a dark brown colour, but with the Spring grow to be large, long

and green. Some term these **Meadow Saffron flowers**, which are of diverse kinds, and so by Florists have names given them accordingly; as,

The **Variegated Meadow Saffron**, are white striped with a deep Purple; others a pale blush striped with Purple colour; others are white and red penached like a Tulipa.

The **Chequered Meadow Saffron of Naples**, hath larger & deeper purplish red flowers, and more eminently chequered like a **Fritillary**. The **chequered** one of **Chio**, is of a pale purple colour thick spotted and chequered with blewish purple, which comes in Autumn before the leaves; which come up in the Spring, commonly 3 in number, of a fresh green colour lying on the ground, twining and folding the edges.

The **double Meadow Saffron**, is like the common **English** kind, that grows in divers moist Meadows, only the flowers of this are double, containing many leaves of the same purple colour, with some chives tipt with yellow pendants amongst them. Some of these double kind will be striped, and garded with white on a pale blush, and some much more doubler and larger than others.

These, with several other varieties, past naming, both for colours and multitude, you may find in Mr. *Rea's Florist*, fol. 46. 92. 94.

Out of a **Coronet** 5 such A stalks and leaves V is the Crest of *Van Giesenberg*; and *Holevser* hath the same with 3 Tulipa's; so hath *Van Dobritsch*.

LVII. He beareth Sable, a Lilly, Or, seeded Argent. The **Lilly** is of diverse sorts and colours; as red, orange colour, pure white, yellow and fiery colour; it groweth on a strong Stalk, set from the bottom to the top with many long narrow leaves; and at the top from every leaf a Flower, containing 6 leaves.

The **Perlian Lilly** groweth with leaves to the top, from thence hanging down their heads, are many small Flowers like this, of a deep Purple; with a Pointil and Chives in the middle, tipt with yellow pendants like to the Tulip.

The **Crown Imperial** groweth with a strong Stalk, with a large tuft of leaves on the top, from whence hang a number of Lilly like Flowers, of a yellowish or orange colour about the stalk; each flower leaf hath a drop or Pearl at the end of the leaf within, next to the stalk, near the stile, which is compassed with 6 white Chives.

There are of this kind, which have the flowers of a fair yellow colour; others of a light red, or pale Rose colour.

The **double Crown Imperial**, each flower containeth 15 or 16 leaves (whereas the other kind have but 6) but narrow, each having a drop or Pearl at the head of it within, and are of the same colour to the common kind.

The **double red Lilly** hath many more leaves than the other common Lillies; and bears more flowers on one stalk: Of this kind there is White Lillies.

The **Mountain Lilly Imperial**, the Stalk beset with rundles of green leaves at a distance, and naked between, from the head at the top of the stalk, comes forth many flowers thick set together each on a several-foot-stalk, hanging down their heads, and turning the leaves back again. This is by Florists called the **Baragon Imperial**, but common People the **Turn-Cap**. See *numb.* 105.

The **Lilly Conbally**, or **Lilly of the Gally**, or **May-Lilly**, is a small tender stalk, with a broad roundish leaf pointed, growing all along it, at the contrary side, against each leaf came forth a round globy flower pure white, the lower opening first, sheweth it self Lilly-like, but hangeth downwards; some are of a pale red.

S on a Mount in Base 3 Lillies, stalks and leaves A is the Coat and Crest of *Goffling* in *Bavaria*.

LVIII. He beareth Gules, an **Avetist** (or a **Daffodill**) slipped, proper. The Cup is pure yellow, and the under leaves whitish; the leaves are like them of Onions, the stalk is yellow and hollow within its skin: Some Authors term it *Laus tibi*. Of these there are diverse kinds, as single, double cupped, and little low cups, edged with red; they are generally by Florists called **Narcissus**, which name beareth it for his Coat.

The **Incomparable Daffodill**, the leaves from the root are long and broad, of a greyish green, the stalk hollow, at the top whereof, out of a thin skinny husk (as all others do) comes a large flower of six pale yellow, or white leaves with a wide Chalice or cup in the middle of a deep yellow, cut and indented about the edges.

The **double white Daffodill of Virginia**, hath the cup double, or stuffed full of nicked or jagged flower leaves, the bottom leaves sharp pointed, and many of them lying one over the other, and shorter by degrees to the middle thereof. Others out of the double Cup cometh a small long white Fork or Horn.

The **yellow Daffodill of Africa**, beareth upon one stalk, on the top 10 or 12 large flowers; of these some are of a Brimstone colour; others a fair yellow Lemon or Saffron Cup.

The **Turky Daffodill**, with a double Crown; it bears on one stalk 4 or 5 milk white flower leaves, with a double yellow cup in the middle, or one Cup within another.

The **double Daffodill of Constantinople**, hath many flowers on one Stalk, all white; the Cups yellow, some edged with Purple.

The **great Sea Daffodill**, is much larger than any other kind; one Stalk bears at the top, 10, 12, or more flowers of 6 leaves spread open, with a white, short cup, or crown in the middle, lying flat on the leaves, cut or divided into six corners, from thence comes long white threads, turning up in the ends, and some white threads in the middle, tipped with yellow pendants; of these kinds some have Lilly like reddish Flowers, others with Blush Flowers, others Scarlet Flowers; the Virginian with Purple Flowers; all bearing many Flowers on one stalk.

The **Spanish Daffodill**, is a large great Flower, not hanging the head like others, but standing forth; of a fair yellow colour, the cup or trunk a little crumpled, and wide open in the mouth, turning up the brims; there is also of this kind such as are Snow white.

Some of these double Daffodills are so double in the cup that it bursteth and spreads open like a full Province Rose, the small leaves standing in rows one under another, being shorter and shorter by degrees to the middle of the flower, lying so upon the 6 great bottom leaves.

The **Junquilia**, or **Rush Daffodill**, differs in nothing, but the Cup is shorter, and of a pure white, as the leaves. Of this Flower there are yellow, and some turn back the leaf even to the foot-stalk; the cups of them are double.

The **bulbous Violet**, groweth like the Daffodill, and the Flower hangeth down its head, being 6 short leaves standing round, with a low cup of a pale greenish colour. Some term this the **Snow-flower**.

There is another sort of **Bulbous Violet**, which hath a stalk between 2 leaves of a greyish green; at the top whereof out of a thin skin cometh forth one, sometimes two small white flowers hanging down the head, consisting of 6 short leaves standing round together, with some sharp points in the middle of a pale green colour. Some again have the 6 leaves standing round like a cup edged with green.

The **Indian Jacinth**, hath a thick tuberous knobbed root from whence riseth several stalks set with fair long broad leaves, joined at the bottom close to the stalk; from whose top proceeds many large flowers, each composed of 6 white leaves spread open, like those of a Daffodill, with some short threads in the middle.

The **Starry Jacinth of Peru**, the leaves ly on the ground, being broad, long, and sharp pointed, from whence riseth a thick short stalk, bearing from the middle to the top thereof upon long foot-stalks, very many blew star-like flowers, with some blew threads tipped with yellow pendants, standing about a middle head, which is of a deeper Blew than the outward 6 leaves; there is of this kind which have white flowers, with a little shew of Blush towards the bottom; others have them all of a Blush colour.

The **Lilly leaved Starry Jacinth**, hath the Flowers growing on the stalk, like the White Lilly; the flowers are of a star-like form, of a light blew colour, with 6 short leaves in the middle standing round like a Cup; there are other Colours of this flower, as white and bluish Colour.

The **Oriental Jacinth**, or **Zumbul of India**, hath a speckled stalk, the flowers are of a bluish purple colour, opening into six small leaves which turne back again (as all the Oriental Jacinths do) others of this kind are of a pale, others deep blew, with stripes down the back of the leaves of the flowers; others are pure white, others of a bluish colour, others purple; others have the flowers fair and double, consisting of two or three rows of leaves spread open, and of the colours abovesaid.

The **Muscary**, or **Musk Grape flower**, is of the same nature and kind as the **Jacinth**; the leaves at their first springing up are reddish, and after of a whitish green, hollow and guttered on the upper side; on the upper end of the stalk are many flowers like little bottles, of a fair yellow colour, and a musk scent. OF this kind there are ash-coloured, red, white, and pale blew.

The **fair haired Muscary**, or **Grape-flower**, or **Jacinth**, hath the leaves not lying on the ground, but standing upright, yet hollow as the former; the stalk is branched out on every side, with many tufts or knaps at the ends of them.

The **curled hair Muscary**, or **Grape-flower**, it differs in this; it is a bush or tuft of many branches, subdivided into diverse long curled threads or hairs, of a fine bright Murrey colour, as well the tops of the stalks as the flowers.

The **Grape-flower**, hath many flowers close set together, like unto a small bunch of Grapes, in form like those of the Muscary, of a fine pale blew, or sky-colour. Of this kind there are white, bluish, and blew colour: the leaves being all guttered, as the Muscary.

The

The **Star flower of Arabia**, hath leaves like the **Oriental Jacinth**; the stalk is round and green, on whose top, upon long foot stalks are diverse large flowers, with small short green pointed leaves at the bottom of each of them; consisting of six pure white leaves, with six white threads about it tipt with yellow pendants.

The **Star-flower of Bethlehem**, the stalk beareth at the top a great bush or spike of flowers, upon long foot stalks, but shorter and shorter towards the top; the flowers open by degrees, first below and so upwards, consisting of six white leaves, spread open like a Star, with a white umbone in the middle, beset with many threads tipt with yellow.

The **Star-flower of Naples**, hath 4, 5, or 6 leaves growing round together, being long and hollow pointed, of a whitish green colour. The Stalk beareth many flowers, each containing 6 long narrow leaves, white on the inside, and of a whitish green on the out-side, turning back towards the stalk, with 6 other small leaves in the middle, standing round together like a Cup, with a white pointell, and 6 threads tipt with yellow.

The **Star-flower of Aethiopia**, bears from the middle of the stalk upwards, flowers that be all white, with some yellowness in the bottom of them, with a 3 square head compassed with white threads tipt with yellow.

O 3 such Averills is born by *Averall*.

LIX. He beareth Argent, a **Mallows flower and leaf in Bend Sinister**. It is a spiring stalk, at each leaf a flower, and the top hath a Knot of them together: The Flower is a light Purple.

The **Shrub-Mallows**, hath woody branches, covered with a whitish bark, with soft woolly whitish green leaves, in fashion like those of the **Ribes** or **Currant-tree**; the flowers are large, and like those of the single **Holly-hock**; in some, of a deep reddish or Violet purple; in others paler and lighter, with the bottom of a deeper purple, running into the leaves in small Veins; there are others of this kind that have white flowers, with a large Purple spot in the bottom; others have the flowers striped with faint purple or bluish lines; there are also double flowers of them, with the like variable colours.

The **Spanish Mallows**, the Flower Blew.

The **French Mallows**, the leaf with 5 points.

The **Egyptian Mallows**, the flower being 5 leaves, come to a long husk like a Peas-cod, but it is five square.

The **March Mallow**, groweth right like a Rose, single leaved, like a single Rose of 5 leaves, and white.

The **Holly-hock**, groweth like it, save the flowers are double, whitish fraked with Purple after the common Mallows, called of some **double Hocks**.

LX. He beareth Argent, a **blew Bell slip**. This is Born by the name of *Bleu campé*. Some call this **Bind-weed**, or **blew Bind-weed**, the flower in some is Blew, with a white Star in the bottom.

The **Bell-flower**, the leaf is rough and hairy, the flowers blew like this example, but end in six long indents, as if it were composed of so many leaves; some are double.

The **Coventry Bell-flower**, is Purple pale coloured.

The **Canterbury Bells**, have large rough leaves like Nettles, the stalk square, divided into Branches,

*

whereon stand divers long hollow flowers like Bells, wide at the brims, and parted into 5 points, some are vvhite of this kind; others of a deeper or paler Violet purple. Some call this flower **Marians Violet**.

The **double Canterbury Bells**, termed the lesser **Crachile**, have them consisting of 2 or 3 rowvs of leaves; and of these some are vvhite, others blevv or purple.

The **Thorn Apple**, hath the stalk at the joints spread into many branches, set vvvith deep green cornered leaves cut and jagged about the edges, at the joints come forth large Bell-fashioned vvhite flowers, vvhich are succeeded by green round heads, green and prickly or thorny. There is of this in Foreign Countreys, that bear this Flower double; and another kind having the Flower Ingeminated, or Hose in Hose, that is one coming out of another.

Sea Bind-weed, hath a scattering Branch like Pease, the leaf round and smooth, the Bell plain vvvithout nicks, growing from each leaf, of a reddish Purple, vvvith small leaves like a Rose inclosing the top part next the stalk.

The **Herbaile of Peru**, the stalk is big and bunched in the joints, vvhich spreads into branches, set at the joints vvvith green leaves, betwixt vvhich the Flowers come forth on short foot-stalks, in fashion like to **Bind-weed**, narrow at the bottom, and vvide open at the brims; in several Plants, the Flowers are in some red and vvhite, vvhich have green branches; red branches vvhich have red Flowers only; a dark green, vvhich have yellow Flowers; and a brown stalk that bears red and yellow Flowers. They are like the **Bindweed** open in the Night, but when the Sun shines on them, the Brims shrink inward; therefore of some are termed, the **flowers of the Night**.

The **Rock Rampions**, or the **Steeple Bell-flower**, the leaves grow in a bunch like Prim-roses, the Bells by multitudes hanging on a small stalk one above another, Pyramidically to the top, blew of colour, and a pointell in the middle. Some of this kind are white.

LXI. He beareth Argent, a **single Poppy and Leaf, slip**. The single Poppies are of three colours, white, red, crimson, and lighter, and deeper coloured.

The **Poppy** hath a round seed-pod in the middle of it, with a Crown at the top of it, and a round Button like a Rose at the bottom; this Seed-Pod by all Florists, is termed a **Poppy Bolle**, and so I find the same born by the name of *Bolle*, viz. Gules, three **Poppy Bolles on their Stalks in fesse**, Or.

Pash-Poles, or **Chesboule**, are double Poppies, which are of two sorts, those with leaves like Roses, the others with jagged and torne leaves like jagged Pinks: the party-coloured, the red, the striped, scarlet, and yellow are best.

The **Thorny Poppy**, the leaves like to thistle leaves.

The **Bastard Poppy**, flower yellow, and leaf a wild jagged leaf, called the **Corn Rose**.

The **Horned Poppy**, is blew, red or yellow; and in stead of a round pod for the seed, as the common Poppy hath, this groweth into a long Cod like a Mustard seed.

The **Spatling Poppy**, many of these white flowers grow together at the top, on a pretty long foot-stalk, every flower standing in a large loose husk, something round.

I 2

1

I have caused a small Poppy to be closed in this square, to shew the out-side as well as the in-side; though generally flowers are born in their full they; this being as it were a Poppy blooming, not yet come to its growth.

LXII. He beareth Argent, **five Cullumbine leaves on a slip**; or a slip of Cullumbine leaves; they generally grow thus, 5 together on short foot-stalks. Born by the name of *Cullumber*.

LXIII. He beareth Argent, a **Cullumbine**, Azure. They are generally of three colours, White, Blew, Purple, and of them varieties, according to the deepness or paleness of the colour.

The **Virginian Cullumbine**, hath a long heel, and is yellow, shaded with red, and deep red spots in the hollow of the flower.

The **double Cullumbine**, are not only the same, being doubled in the bottoms, but are variegated, striped, spotted or poudred; of which some are half White, and half another colour, as Murrey, Violet, or light Red.

The **double Rose Cullumbine**, hath no heel, but stands on the stalk, like little double Roses.

The **double inverted Cullumbine**, hath the heel turned inwards, and coloured as the former.

A Chevron Sable between 3 such, is born by the name of *Hall*.

A Chevron engraled between 3 such, is the Company of *Cooks Arms*.

LXIV. He beareth Argent, a **Rose Campher**, (or **Campion**) slip; the Flower is a light Purple.

The **double Champions** are both red and white; the single and double, grow many Flowers in a branch together.

The **single Hon-such**, or **Flower of Constantino-ple**, I have shewed before, *numb. 49.* though others make it a kind to the **Campion**, because growing many together in form of a Poetic. Some call it the **Flower of Bistol**.

LXV. He beareth Argent, **three Wall flowers on a slip**, Or, **Stalk and Leaves**, Vert. These are also termed **Winter-Gilliflowers**, they grow after this manner, a great many in a Cluster, the out-sides blossoming first; they are of three colours, white, yellow, and purple. This is born by *Chebell*.

The **double Wall-flower**, hath the Flowers growing on a spired stalk, and so blossom by degrees, the lower flowers first; they are called **Stock-Gilliflowers**, and **Winter-Gilliflowers**, and are striped with 2 colours, Purple and White; others all yellow, White, red and pale.

The **Coral-wort Flowers**, in husks of a purple colour, see *numb. 100.*

LXVI. He beareth Argent, a **Pansie** (or **Hearts Ease**) **Slip**, proper. This is a very fine coloured flower, the 2 top leaves are pure Purple, the 2 side leaves are pure yellow, and the bottom leaf a Brimstone colour; each of the three, have a Purple spot at the ends of the leaves, and three black scores from the middle of the Flower: There is double flowers of this kind. The Flower is the Crest of *Fitton*, of *Gansworth*.

LXVII. He beareth Argent, a **Violet Slip**, with the **Flower inverted**, proper. Of these single Violets,

there is three sorts, white, pale blush, and a kind of light Purple.

The **double Violet**, commonly called the **Queens Gilliflower**, is of three kinds, White, Purple, and striped (that is) of Purple, finely striped with White.

LXVIII. He beareth Sable, on a **Stalk**, **two leaves**, Vert, between a **Marygold** in his prime, and **two blooming**, Or. There are 2 sorts of Marygolds, single and double; the first is a Pale of slender leaves, set about a large thrum.

The **double Marygold**, hath no seeds, but all full of leaves, less and less, till it do center in the middle of the flower, and is of a gold colour.

The **yellow Star-wort**, hath rough leaves, the stalk divided into branches, bearing at the ends five or six green leaves, standing round like a Star, with a Flower in the middle, of narrow long, pale yellow leaves, compassing a yellowish brown Thrum, like the single **Mary Gold**.

The **Flower of the Sun**, this is the largest of Marygolds, of which see *numb. 86.*

The **French Marygold**, of which there are single and double, some deeper, others paler; they are of a fair yellow colour, the leaves grow out of a pod, long and large, wherein (after they are past) the seeds are contained. It is generally called the **African Marygold**.

A **Corn Marygold**, is single, with a jagged leaf and a large thrum in the middle of the Flower; see *numb. 73.* This is termed an **Or-eye**.

The **Wind-flower**, the leaf 5 pointed, each cut with deep nicks, almost jagged.

LXIX. He beareth Or, an **Honyfuckle slip**, proper, or a **Woodbine slip**, the Flowers are first red, and then more yellow about the ends, and part of the Flower; some call it **Aenus hair**.

LXX. He beareth Argent, a **double Honyfuckle**, Born by *Honyman*.

The **double Honyfuckle**, the Flowers are like the common Honyfuckle, but in this there is a multitude of them growing 5 or 6 stories one above the other, with round green leaves circling the Stalk between every round of Flowers.

The **Indian Honyfuckle**, hath the Flowers coming forth together in tufts from the ends and sides of the red branches, which in the bloom are of a fine red, but after more yellow about the ends, and part of the Flower.

The **Virgins Bower** groweth like the **Honyfuckle**, the Flower comes from the joints upon long foot-stalks, and is four leaves Cross-wise, of a liver colour, or deep red; others of a Purple colour; the leaves stand at the joints consisting of three parts; whereof some are notched on one side, and some on both.

The **double Purple Virgins Bower** hath the Flower exceeding thick and double, the outward leaves being broad, and the inner narrow, and folded close together, like a large Button in the middle of a Flower, which opens by degrees: There is of them also of a bluish or pale Peach colour, and the other White.

The **Virginian Chamber**, the leaves grow out at the joints of the branches, at each one, which said leaves are broad at the bottom, and about the middle divided into

3 parts, and nicked about the edges; the Bud before it opens, is long, having at the top 5 crooked horns, which being open, divideth it self into 10 parts, sustaining the leaves of the Flower, which are very many, long, sharp pointed, narrow, and orderly spread open, one by one, some lying straight, others crooked; these Flowers are of a whitish colour, thick spotted with a Peach colour, having towards the bottom a Ring of a perfect Peach colour, with a white Circle above and beneath it: In the midst of the Flower riseth an Umbrance, which parteth it self into 4 or 5 crooked spotted Horns; from the middle of these riseth another roundish head, which carries 3 Nails or Horns, biggest above, and smallest at the lower end; the Flower fallen, there ariseth from it a Fruit like unto a Pomegranate, containing a whitish Pulp, with black Kernels or Seeds. This Branch hath many clasps to hold it self up, especially at the top.

The **Pimpernell** groweth like the Honyfuckle, winding about any thing it can get hold on, the Flower is four leaves, with 4 hairs or chives out of the middle of it; the Flower grows out of the side of the Stalk, from between 2 leaves.

A 3 Wood-bines or Honyfuckles proper. Born by *Honyfuckle*.

A 3 Woodbine leaves Bendwife. Born by the name of *Theme*.

LXXI. He beareth Azure, a **Daisie**, Argent. They are of 2 colours, White and Red, and from them White tipped with Red. G 3 fans Stalks A Seeds O Born by *Daisie*.

The **Camomile Flower**, like a Daisie, the leaf jagged and small; the double Flower is all White, the middle something yellow.

The **Scabius** hath a jagged leaf, and blewish White Flower, some Red.

LXXII. He beareth Argent, a **Bunch of Daisies** some in their prime, others blooming, Gules, Leaves and Stalks, Vert.

The **double Daisies**, are of diverse sorts, as Red and White, and partly White and Red.

The **blew Daisie**, groweth thus, but the Stalk is set with small leaves one upon another like scales; on the top is a round head composed of many Blew Flowers.

The **Chiding Daisie**, and the **Abhoritive naked double Daisie**, is green; and several other varieties there are, but such are scarce worth the Description, much more to be noted for Arms.

A 3 bunches of Daisies, each having 3 Flowers G Born by *Daisie*.

LXXIII. He beareth Sable, a **wild Field Barpgold slip**, this is also termed, an **Ore-Eye** if Yellow, and a **Wild Daisie** if White, the **Seeds** or **Thrum** in the middle, yellow.

The **Elecampane**, the Flower and Thrum is yellow.

LXIV. He beareth Azure, a **double Crowfoot**, or a **Ranunculus sipt**, with one Leaf, Or. Before the Flower is budded forth, they are called **Golds-knops**. The leaves are broad and indented about the edges, some are more cut, and divided (as it were into several leaves) then others, the Stalk is branched into 2, 3,

4, or more Stalks, each bearing a fair White Flower double, so that no head or button can be seen in the middle of this kind, there are many varieties, as Silver colour, Yellow, Red, Scarlet, Isabella, beside the several varieties of striped ones, as

The **Ranunculus**, or **Crowfoot of Candy**, the Flowers are of a pale yellow bluish, striped a little on the inside, but more on the out-side with Crimson.

The **Ranunculus of Asia**, hath a large double flower of 6 or more rows one within another, of a yellow, red, or Scarlet colour; when the Flower is in its prime, another small Flower will rise out of the middle thereof.

The **Ranunculus of Rome**, hath leaves scarlet coloured, edged with yellow; others scarlet, varied and marbled with a deeper or a lighter scarlet; others yellow, striped with Scarlet; others White within and Rose colour without; others Isabella within, and Crimson bordered with Isabella without, with diverse other sorts.

The **Wolfs Bane**, hath round cut green leaves on short foot-stalk, and with them the Flowers, which are small and yellow, made of 5 leaves like the single Crowfoot, vvith yellowv threads in the middle; of this kind the Flowvers are also pale yellowv, and in some almost White: Florists call this the **Aconite**, from its Latine term.

The **Water Lilly**, hath a Leaf like the Heart vvith a long stalk in the indent, and the Flower very large, some are White, others yellow, vvith a Thrum and a small Poppy like head in it yellowv.

LXXV. He beareth Gules, a **single Crowfoot**, contains 5 leaves about a thrummy head.

The **sweet Wood Crowfoot**, have 5 long narrow smooth leaves set in several places, and at the joints all round the Stalk like a Star.

The **Virginia Crowfoot**, both leaves and flowvers grovv from the ground vvith long stalks; they are seven pointed and smooth; the flower small, long leaves, vvith a small thrum or seed in the middle.

The **Caper**, is a flower like the Crowfoot, or **Globe Crowfoot**, the colour greenish vvith a thrum of Seeds, covered in the blooming vvith 2 roundish leaves; it is called of the Physicians the **purging herb**; of some the **Dogs Bramble**, or **Dogs Apple**, or **Hares Bears**; the Mages call it **Pantheron**.

The **Batchelors Button**, a kind of white double Crowfoot, having them 2 or 3 heights grovvng one out of another, and are termed double, and double double Batchelors Buttons.

The **Yellow Grass Crowfoot**, the leaves grovvng in a tuft like Grass.

The **Plantain Leaf Crowfoot**, grovveth vvith a stalk and leaf like the Tulip, having 3 Flowvers upon foot stalks at the top.

The **single Anemone**, and the **narrow leaved Anemone**, are after this manner set about a thrummy or Velvet head, commonly consisting of one row or pale of broad leaves, the head being hairy, tipt vvith a Woolly matter, the Flower being of divers colours, see num. 85. as Red, Scarlet, Purple, White, Peach and Rose colours, both plain, and marked vvith White.

The **single Anemone**, vvithout a **Head or Button**, this consists of something broad leaves, hath no pluff or thrum

thrum of leaves in the middle, but a small head or button; and some, inclining to the **double Anemone**, will have 2 rows or pales of leaves, some three rows about the head; and some so thick and double, beginning with large leaves next the stalk, and so lesser and narrower to the middle, that the head is not to be seen till the flower fall.

LXXVI. He beareth Argent out of a **Tuft, Head,** or **Branch of leaves**, a **Gentian** of the Spring, or a **Gentianella**; the leaves are small, hard and green, growing close to the ground, ribbed, veined, and pointed; on a short stalk is on flower large, hollow, and bell-fashioned with open brims, ending in five corners; having some white spots in the bottom on the insides; some call it also a **Felwort**. The smaller sort of this kind, being long, husked, and slender, is termed a **Verbal-Gentian**.

LXXVII. He beareth Sable, a **Tassel, Or.** this is spoken of before *numb. 47.* This is born as a part of the Clothers or Shearmens Companies Coat.

A 3 Tassel slipped. Born by *Tasseller*.

LXXVIII. He beareth Sable, a **Saxifrage flower** slipped, proper. The Mountain Saxifrage groweth many together upon foot-stakes at the head of the stalk, the flower is white. This is born by the name of Saxifrage.

LXXIX. He beareth Argent, a **Tobacco flower** slipped. The flower is of an Olive-colour, they grow many together upon the head of the stalk, with small foot stalks, the lower budding first. It is called, the **Nicotiana**, or **Male petum**, and **Holy Hearbe**. The leaves are large and long growing to a roundish point. It is a thick, spongy, sappy leaf, of a deep Green.

LXXX. He beareth Argent, a **Prim Rose**, growing out of a **bunch of Leaves**. The flower is of several colours each on its own foot, as peach, blew, red, green, yellow, white, and so deeper, and lighter, single and double flowers. This is born by *Prim-rose*.

The **Primroses**, are also double of variable colours, some having the outer row green leaves, with a small pale yellow flower in the middle; others scarlet, or velvet red, with a yellow star in the middle or bottom, as in all the variable Primroses of these kinds.

The **Hose in Hose Primrose**, hath upon every single stalk two flowers ingeminated, one standing and growing within the other; and of a deep, in others a paler red colour.

The **Cowslip** is the same kind of flower only they grow many together upon the head of a plain naked stalk, by small-foot stalks; we call it a **May-flower**.

The **paigle** is a **double Cowslip**, of a purple colour, gold colour, of a yellowish green, some variable of a fine orange colour towards the bottom, edged with Cinnamon colour, and red on the out-side, some the like with scarlet.

The **Cowslip hose in hose**, it differeth from that of the Field, only in this, that each flower hath another growing out of it, standing at a distance as that in the husk, doth from the husk; being many on a stalk with foot-stalks, of the same colour and fashion with the com-

mon kind. The like is in the red Primrose hose in hose.

The **Jack-an-Apes on Horse-back**, or the **fantastick Cowslip**, hath the flower all green and jagged like to a Juli-flower.

The **tufted Cowslip**.

The **jagged hose Cowslip**, hath the hose jagged and divided into four or five parts and purled about the edges, with a small single flower of yellow standing therein.

The **Orlip Cowslip**, is like those of the field, but of several red colours, some deeper, others lighter; some bigger, others smaller.

The **Bears ear Cowslip**. The flower with a deep invecking, and many on the stalk, have five leaves parted at the ends with a white circle or eye in the middle, having long trunks whose ends stand in small Cups; of these **Auricula's**, or **Bears ear**, there are several kinds, but the best is bright murrey, or reddish purple; others on the stalk bear a great Truss of many flowers of a purple colour with large white eyes, others a deep black purple, others black, others striped with white on purple, and yellow or Lemon colour, with reddish purple; others are all red, scarlet, yellow or white, with white Circles or Eyes.

The **Virgins Milk Auricula**, hath a large mealy leaf, and a great truss of pure white flowers.

The **Burage-leaved Auricula**, hath rough hairy leaves, spread on the ground like those of the Cowslip or Primrose; the stalks are brown and hairy, having on the top five or six Flowers, each consisting of five leaves large and sharp pointed and of a rich blew, with some small yellow threads in the middle.

The **Bears ear Sanicle**, first riseth with foulded leaves, which after opens fair and broad a little hairy, cut in divisions and nicked about the edges, of a dark green above, but whiter on the other-side; the stalks are naked, bearing divers small flowers, like in form to the Cowslip, but hang down their heads, of a deep purple colour with a small white eye, and some threads in the middle.

The **Birds Eye**, is a small Cowslip, of which there is white, red, and spotted, all having small yellow eyes in the bottom of the flowers; the leaves are snipt about the edges, of a pale green on the upper, and of a mealy whitish colour on the under-side.

LXXXI. He beareth Argent, a **Flax flower** slipped. The flower is of the broad leaved Flax, both yellow and blew, and the narrow leaved, is the same. These cut down and made up according to Art, are the coverings, or Coat-Armour of the best of Nobility.

The **Wild Flax**, hath a white flower made of five leaves something large, with small lines of purple. There is of this kind that hath yellow flowers, with reddish stalks.

The **Toad Flax**, hath fat narrow leaves of a whitish green colour, snipt about the Edges; the stalk bearing in a spike divers small flowers, like the foresaid, but without heels behind, of a sad or paler purple or violet; it is a gaping flower with a yellow spot in the gaping place; some are of a yellow colour with the gaping mouth downy, and the heel behind of a purple colour; the leaves lying on the ground like those of a Daisie.

The **Broom Toad Flax**, hath it leaves standing all in a Bush, the stalk hath many branches set with green leaves

leaves long and narrow, at the joints are small reddish flowers.

LXXXII. He beareth Argent, a **Cockle flower slipped**, proper. The flower a light purple; the leaf is long and narrow, and hairy, set two at a joint; the husk long and erected, whose ends, or cut-points, are longer than the leaves of the flower. Three of these are Born by the name of *Cockledge*.

LXXXIII. He beareth Argent, a **Larks heel**, (or **Larks spur flower**), slipped; they are of divers colours, as white, red, blew; they have small jagged leaves, and are single and double.

The **double Larks heel**, is on a tall and upright stalk, branched at the top bearing many double flowers, in form like the *Rose-Colombine*, and are of several colours, as purple, blew, ash-colour, rose-colour, a pale blush and white.

The **Indian Cresses**. The flower like a single Larks heel, yellow, they are on stalks like the *Fox-glove*, the leaves are smooth and round.

The **Balsam Apple-flower**, hath a spur behind the flower, but bendeth downward, the flowers grow together on foot stalks; having round black seed, but the flower have two or three shadows of purple.

LXXXIV. He beareth Argent, a **slip of Foxgloves**, proper. Born by *Foxy*. There is two sorts of them, the Field, and the Garden Foxglove.

The **Common field Foxglove** hath nicked, and some smooth leaves; the flowers of a purple and white, and some yellow.

The **Garden Foxglove** are double, not in Bells but after that manner in broken-leaves, there are of them, some white, yellowish dun, yellowish brown, yellow, purple, and the like.

The **Corn-flag of Constantinople**, the stalk riseth from three or four broad, long, stiff leaves full of Ribs, one coming out of the sides of another, and joynd at the bottom; which beareth many flowers one above another, standing all one way like the *Fox-glove*, and are of a deep red colour with two white spots within the mouth of every flower. Some of this kind have the flowers white, carnation, or bright red.

The **Italian Corn-flag**, hath the flowers growing on both sides the stalk, and are of a sad red.

A 3 such Slips is born by *Casheen*.

LXXXV. He beareth Argent, a **double Peony**, (vulgarly called a *Pianet*, flower of *Rose*), slipped sanguine.

There are two sorts, Male and Female: The Male hath no Division in the leaf, but always whole.

The Female are single and double, having a pod in the middle of the flower like a pair of Breeches: or **Be-comered head**, with many white Threads tipt with yellow. Their colour for Gardens are red, purple, carnation, and white, or blush colour; and striped of purple, with white.

This flower according to its drawing, will serve for several sorts of flower which are made after the fashion of the Peony, but less, as

The **Barth Marigold**, yellow, with the out-leaves large, and the inner leaves small and long, and thick set, with a jagged leaf.

The **double Crow-foot**, as in *numb. 74*.

The **Anemone**, or **Amonie**; of which there are divers kinds and colours; as scarlet, red, purple, white, yellow, green, carnation, blew, and striped, according to the said colours with white, and white with them; of which some are single, like the single Crow-foot with an hairy or thread-like round pod, tipped with a blackish purple. The double, some are broad leaved, and others narrow; there is so many sorts of them, that like to Tulips, the Florists give them names, which Mr. *Rea* is full of. See his *Flora chap. 23*.

LXXXVI. He beareth Argent, a **flower of the sun**, with one leaf slipped. This is called the **Corn Marigold of Peru**, of which there are two sorts, the one bearing round, the other oval yellow flowers, the inner part, or thrum of a deep purple colour, but ripening goeth yellow. This is born by the name of *Sanley*.

LXXXVII. He beareth Argent, a **Jasmine flower slipped**, proper. The flower is white, and is born by *Joslin*.

The **Jasmine** hath divers green fleckable branches that come from a larger bow, set with winged leaves of a dark green colour standing two together at the joint, made of many small pointed leaves, set on each side of a middle rib; usually three on a side, and one larger and more pointed on the end; at the tops of the branches the Flowers grow in tufts, each on a long foot-stalk, which are small, long and hollow hose, opening in the end into five white pointed leaves.

The **Catalonian** or **Spanish Jasmine**, have the flowers before they be open of a blush colour, and after white with blush edges.

The **double Spanish Jasmine**, have the flowers white, but bigger consisting of two row of leaves, with some smaller, coming forth of the middle, or hollow Bosoms of the Flowers.

The **yellow Jasmine**, is like the former; the yellow flowers being past, round black shining berries succeedeth.

The **Indian Scarlet Jasmine**, have weak branches, supporting it self by some short Tendrils, which it fastens to any wood thing it grows by; the leaves are winged three together, finely nicked and full of veins; reddish at first, but after of a fair yellowish colour; the flowers come forth many together, which are long like a Fox-glove, opening into five fair broad leaves, with a stile and small threds in the middle of a yellow or saffron colour: Some of this kind have small red-lines on the inside thereof; others of a deep scarlet, veined with small yellow lines.

The **Hynd Cressole**, or ordinary yellow Jasmine. The leaves grow by threes, as the *Rose*, but smooth.

The **Indian Jasmine**, the flower yellow, and the berry as comes from them are like small Olives. It grows in branches with a purple Bark, the leaves are ever green, and like to the Pomgranate-leaf, but longer and broader. The Flowers grow many together on foot-stalks.

The **Pipe-tree**, or **Lilac**, or **Persian Jasmine**, the flower groweth (as if it were but blooming) not so open out, as this figure, the Flower blew or purplish.

The **double Pipe-tree**, or **Jasmine of Arabia**, hath the Flowers double, round three or four rows of leaves,

leaves, and white, the middle hollow and something yellow, the leaf great and smooth, set against one the other, on a short foot-stalk.

The **Persian Jasmine** with cut leaves, is like the former, only the Branches are finely decked with small long cut in leaves, divided almost to the middle rib; some into three small leaves on a side, and a larger at the point.

LXXXVIII. He beareth Argent, a **Balm Leaf**, with a Flower on the Dexter side of the stalk; the Flower is purple, the leaves grow by couples at the joynt, from whence also proceeds the flower. It is rather a shrub, then a tree; though some term it so, *nam* 5. 13.

The **Turky Balm**, have the flowers growing on the top of the branch spire-like, with several leaves between them, and are of a blew, or purple blew colour.

The **Assirian Balm**, the Flower is out of a short husk, narrow at bottom and open at top with a turn indented, Bell-like; three grow together from the root of the leaf, of a white colour.

The **Mother-wort**, from the middle of the branch to the top grows the Flower at the joints, with the leaves round the stalk; their fashion like the balm, and are purple coloured; the leaf deep nicked being divided into three points.

LXXXIX. He beareth Argent, a **Sage leaf** and flowers fixed to it. The Flower is blew and gaping like the **Clary** or **dead Nettle**, growing on small stalks one against another, even to the top. 3 such leaves born by *Sagenwort*.

The **great Sage**, hath the Flowers in bunches about the stalk, with leaves under them.

The **French Sage**, have them grow in bunches at the top, several leaves coming out together round the joints of the stalks.

The **gilded Sage**, or **striped Sage**, the one is with yellow, the other with white, edged and spotted or striped.

The **Stony Sage**, or **Mail-Sage**, of others called **Citans Blood**, **Scorpions Tail**, or **Dr-Eye**. It hath a leaf like Sage, and most commonly grows on tops of Houses and Walls, some call it *Peraclea*.

XC. He beareth Argent, three **Knots**, or **Heads** of **Tansy**, with a leaf slipped. The Tansy Flower groweth altogether in a flat head, by several small foot-stalks, joined to the main. It is called also **cur'd Tansy**; the Flowers yellow, the leaf jagged.

The **White Tansie**, or **Agrimony**, the leaves whitish like the **Willow**. It is a short shrub of no height, the leaf is in five parts.

The **Mountain Tansie**, the heads more divided with a Flower of six white leaves, and a yellow thrum in the middle, like the **Camomile**, or **Daisie**.

The **featherfew**, the Flower and Leaf like Mountain Tansie.

The **double Featherfew**, hath the Flower very double with little white leaves, so that but a little of the yellow thrum can be seen.

XCI. He beareth Argent, a **bunch** or **knot** of **Alder-berries**, and three leaves slipped. The Flower is a white blossom, which after groweth to a small black berry, and they grow many together upon foot-stalks to a larger stalk, and it to the Alder-branch, *Umbel* like.

This is born by the name of *Elderhead*. Some write it the **Elder tree**, whose boughs are thick and gross, but within are very hollow, filled with a soft *Mary*, which is commonly called their *Pith*.

XCII. He beareth Argent, a **Comfery slip**, flowered, proper. The leaves are rough and hairy, set by pairs on either side the stalks at the joints; the Flowers stand in order, one before another of a whitish colour.

The **spotted Comfery**, is the *Cowslip* of *Jerusalem*.

XCIII. He beareth Argent, a **Burnet slip** flowered, the tops, or heads, or knaps, stand upon a long stalk, and are of a brownish colour.

The **American Burnet**, hath long spiked heads set thick with knaps, which when they bloom, each casts out a whitish Flower of four leaves, having many small white long threds in the middle.

The **Mountain Scabious**, the Leaves waved, the head full of little yellow Flowers, all in a round.

XCIV. He beareth Argent, the **double Ladys Bower** slipped; at every joint was a couple of Leaves large and smooth, from whence sprung two stalks with Flowers of a purple colour, their growth is much after the manner of a single Poppy.

The **Nigella**, hath five large blew leaves, with a hairy thrum in the middle, out of which proceeds many small Flowers like stars.

The **Spanish Nigella**, hath leaves like Fennel, the flowers are single, consisting of five large leaves of a bleak colour, with a green head in the middle, compassed about with little gaping hollow leaves, and a yellow line; after the Flower is past, the head grows big with a Crown on the top spread like a star.

The **double Nigella** consists of three or four rows of small leaves, one lying under another, of a pale blew colour; in others white.

XCV. He beareth Argent, an **Hemp stalk** leaved, and seeded, proper, or a **Bunch** of **Hemp seed**, on a stalk, leaved and slipped. The Seed is called *Line-seed*.

The **bastard Hemp**, is with several Burs, or hairy **Knobs** at a distance on the stalk; out of which groweth two leaves, one contrary to the other, and so to the top; which endeth in a **knot**, or **bur**, with small leaves out of it.

The **Chast Tree**, or **Hemp tree leaf**, like the Hemp leaf, but smooth long and narrow; the Flowers like **Lavender spikes**, stored with blush white flowers, which turned into round seed like Pepper.

The **Hemp stalk** is much worn by that worthy person *Mr. Fur* alias *Thief*; and is very honorable, and worthy of such an exaltation by him.

XCVI. He beareth Argent, an **Ekcampane** flower slipped, proper. The Flower is yellow both in the leaves and the Thrum about which they are; which in time groweth to Down, which the Wind bloweth away with seed in. It is like the **Sun Flower**, but not so large. This is born by the name of *Sollar*.

XCVII. He beareth Or, a **Burage** slip, proper. The leaves of the Flower are blew, the stalk and leaves rough.

rough and hairy, with a white spike from the middle of the flower having its end black. It is also called **Bugloss**, and **Garden Bugloss**, answerable to the name as beareth it.

The **Stone Bugloss**, the **Uiper Bugloss**, have hairy leaves and stalks, very long and narrow.

The **Sea Marsh Bugloss**, long smooth leaves, growing altogether, after the manner of a Prim-Rose or Daisy.

The **Wild Bugloss**, of some called **Orchanet**; it hath its leaves sharp set and thorny. The root hath a kind of juice that being wrung out, is of a sanguine colour. Some have white leaves.

The **Walwort**, is an herb grows commonly about two cubits high; his Leaf is rifted like Bugloss, the root outwardly is black, but within white and oily.

XCIII. He beareth Argent, a **Fennel flower** nipt, or a Fennel slip, flowered, Or. it shouteth out into many branches, at the top whereof are Tufts or Umbels of Flowers of a yellow colour, which turns into small round seed, two always together. The Leaf thin, fine, small, long, or a thready branch.

The **Pellitory of Spain**, and the **double wild Pellitory**, have the like Leaves, being finely cut and deeply nipt about the edges; the stalks have at the top many small flowers; the single, is a pale or border of leaves, white above, reddish under, with a middle yellow thrum; the double flowers are very thick and double, all white.

The **dog Fennel**, hath small deep dark leaves, bearing at the tops of the branches divers broad spread white flowers, in some single, others very double.

There are other Flowers and Herbs of affinity to this

²⁵ The **Dill**, is leaved and seeded like it. Some call it **Annet**.

The **Comine** is the same, the Flowers reddish, and the seeds white.

The **Chervil**, the Flowers white, purplish in the middle, they grow in the seeding so, as the Umbels are hollow in the middle, like a Birds nest.

The **Earth nuts**, or **Chest-nuts of the Earth**, hath a broader and thicker leaf then Fennel, the Umbels white Flowers.

The **Dropwort**, or **Enanth**, the Flower white like a Daisy, or Field Mary-gold.

The **Dauke** or **wild Carrot**, flower white.

The **red or yellow Carrot**, the flower white, the Umbels do not spread much, the leaves more thicker, and stronger then Fennel.

The **Parr-wort**, the leaves more open than Fennel, the Flower white, and sometimes purplish.

The **English Sarifrage**, the Flowers of a yellowish white.

The **Hemlock**, a stronger leaf, the Flower vvhite, having long sharp pointed seed, like Anniseed, but more vvhite. Some vvrre it **Humlock**.

The **Caraway**, the Flowers of the Umbels vvhite, the seed of a blackish browyn.

The **Anise**, the Flowers vvhite, the seeds vvhitish, and the leaf broad and nicked with large indents.

The **Bishops weed**, vvhite Umbels.

The **Sampire**, or **Golden-flower of Sampire**,

the Flower all yellow, the leaves long and slender, and thick, like **Prick-my-dame**.

The **Shepherds Needle**, the Flowers white, the seed round and pointed at the end, like a Needle, or prick of an **hedg-hog**.

The **Coriander**, the Seed and Flower both vvhite.

The **Smallage**, the leaves dented something unevenly, the Flower of the Umbels white.

The **Allisanders**, the tufts of Flowers yellowish, the leaves broad and unevenly dented.

The **Lobage**, hath the Flowers yellow.

The **Angelica**, hath large white spread Umbels, the Leaf like the Allisanders, broad and uneven, endented, five together, and sometimes more near the root.

The **Waster-wort**, the leaves like Angelica, the tops or Umbels of white, with a thin black seed.

The **Gout-wort**, or **Verb Gerrard**, the flower white, and the leaf broad and nicked, three growing together at a little distance, upon one stalk.

The **flawort**, long and slender leaves, thin, set upon stalks.

The **Glasswort**, the same, but turning and winding one among the other.

The **fumitory**, hath a Fennel like leaf, growing in tufts, at distances on the stalk; the flower reddish growing on spikes.

There is another kind of **fumitory**, which is a bushy and shrub-like herb, near to the Coriander, whose flower is white or more like ashy colour.

XCIX. He beareth Argent, a **Caper branch**, proper. Born by **Caprel**. The leaves are round at the end, and sharp at the stalk, with a thorn or prick at the branch, just under the leaf, and at the leaf riseth the Flower upon a pretty long stalk. The Flower is four white leaves, with 4 green ones on the back of them, as the husk, having many yellowish threads, and a long stile or pestile in the middle, which afterwards groweth to be a Fruit, and is long and round, like to an **Olive** or **Acorn**.

The **Egyptian Capet**, hath no thorns, and the leaves grow two together at a joint.

The **Bean Caper**, is an herby, not a woody stalk, like the other Caper branches, branching forth from the bottom, at each joint cometh forth two leaves one opposite to the other, at each joint cometh forth one Flower as the others; which cometh to a long husk, and round, which openeth into several parts wherein is a brown seed.

C. He beareth Argent, three double stock **Gilliflowers**, on a slip leaved, purple: See *n.m.b.65*. Born by **Stockflower**. Mr. *Rea* in his *Flora*, p. 151, 152. makes a great difference in the **double Wall-flower**, and the **stock Gilliflower**; for though to outward appearance they shew all to be of a kind, yet the scent of them will soon distinguish the one from the other; as also the elegance of form, and delicacy of colours, the one is more esteemed then ther. The **stock Gilliflowers** are of divers colours, as white, yellow, sad and light purples, and some of that colour striped with white. They have generally hairy green leaves, and a woody stalk, which shooteth into many branches of flowers, growing spike-ways, the lower flowering first, and the rest by degrees.

K

The

The **Dame Violets**, are four white long leaves turning down at the ends, out of a green pod or husk growing scatteringly many together on one stalk.

The **double Dame Violet**, groweth many together in a knot upon short foot-stalks. These are also called **Queens Gilliflowers**, or **Rogues Gilliflowers**, or **Close Science**, and are white, purple, and striped in their colours.

The **Water Gillovers**, or **Gillflowers**, are five white leaves growing on a naked stalk, in rows one above the other, with yellowish threads in the middle.

A. such a Stock-Gilliflower slipped, P leaves, V is
Born by *Weltrugh*.

Cl. Hebeareth Or, an **Hoary Pink, slipped.** Born by *Markoe*. The leaves are set by couples at a joint of a hoary white (like the white **Live-long**, or **Life-ever-lasting**.) the Flowers are five leaves a piece; white, and round pointed.

The **wild Pinks in Tufts**, are another sort of these Pinks, which Flowers grow in tufts, like to an Umbel on foot-stalks, some white, others of a reddish colour; the leaves long and broad are set by pairs, one against another.

CII. He beareth Argent, a Mountain Pink, proper. The leaves grow thick in Tufts like grass, the Flower ris'd out of them by single stalks, having joints and leaves on each side, the husk hairy with five points out of which is a small pale reddish Flower of five leaves. Three such are the Arms of *Mountain*.

III. He beareth Argent, a slip of Golden Maiden-hair, proper. Born by *Mariane*. The leaves are of a yellowish green (like grass) growing above ground in tufts, from whence springs little small stalks beset with the like kind of hairy leaves, which beareth on it a small gold yellow head, lesser then a wheat corn, standing in a great husk.

The *Eng'lm Maiden-hair*, is a small, sturdy stalk with two round leaves fixed to the side, without any foot-stalk, one opposite to the other; and, leaves growing less and less set at a little distance till it come to the top, where it ends in a small leaf; of a dark green, spotted in the back.

CIV. He teareth Argent, a chequered **Fretillary** slip. Born by **Fretilar**. It is of a deep brown hair colour, chequered with a deeper, the in-side of the Flower (being six leaves) is of a brighter colour than the our-side; having a stile, and claws tipped, with yellow pendants.

The **double Scitillary**, is in all parts as aforesaid, only the Flower is double consisting of twelve leaves, or more, and is of a pale, purple, or bluish colour, spotted as the other.

The **white Fritillary**, is like the other checkered, only the Flower white, and grow two on a stalk.

Of these Flowers there is the yellow, the spotted yellow, the yellowish green, and blackish.

The **Sullen Lady**, hangeth her head down (as this Flower doth) and is of an umberish dark hair colour, without any checker or spots. Some call it the **black Fritillary**.

A 3 Fritillary's flight, proper. Is Born by *Sullen*.

CV. He beareth Argent, a **Turn-cap flower**, *slipped*. But by Flowerists termed, a **Partagon** *slipped*. They grow with a high stalk, of a reddish brown colour, being at certain distances with rundles of leaves long, and not very narrow, and naked betwixt; at the top of the stalk come forth, set together, each on a foot-stalk, the said Flowers, hanging down their heads and turning the leaves back again like to a Garland; and is of a light purple, with brown spots, on the inner side, which becomes the outer upon the turn of the leaves, having a stile in the middle, with 6 yellow chives, tip with Vermilion pendants. These are born by *Turnlev*.

The white spotted Hartagon, and the white, are the same only differ in colour; of this kind there are purple, and yellow, orange, and pale greenish, yellow spotted with black specks.

The **Martagon of Canada**, bears four or five Flowers on long foot-stalks on above another, hanging down their heads, of a yellow colour.

The **Baragon of Constantinople**, is of a deep orange, or a scarlet, thick speckled on the inside with many small black spots, and some without specks.

The **Brown Curn-cap**, is of a gold yellow, with many brown spots about the bottom of the Flowers, the points or ends that turn up of a red or scarlet colour, and without spots.

The **Dogs Tooth flower**, the stalk comes up between two long and narrow leaves, of a whitish green, spotted and striped with white; on the top is one flower hanging down the head, containing six leaves, white narrow and long, which turn up again to the stalk, like the Turn-cap or Martagon; in the middle there is a white three forked stile, compassed about with six chives, tipped with sad purple pendants. Some of this kind are of a purple pale colour, others reddish purple, or pale yellow. The root is white, and like a Dogs Tooth, from whence it is so-called.

The **Cyclamen** or **Sow-bread**, it hath divers round cornered and sharp pointed green side-leaves, spotted and circled with white on the upper-side, and red underneath; the Flowers are every one on a small long stalk, hanging down the head and turning up the leaves again, being fine narrow and long, and of a bright shining reddish purple colour, and sweet scent. Some of this kind, have white, pale purple Flowers, some are double consisting of twelve leaves.

The **Ivy leaved Cyclamen**, bring forth the Flower before the leaves which are much spotted on the upper side; these Flowers are of divers colours.

CVI. He beareth Argent, a Mountain Avena flower. This is a Flower of four heart-like leaves, fixed in a long husk, like a Pink, with four other green-leaves on the back of them, contrary set, after the manner of the beards of a Rose; out of the middle proceeds four threads with pendants on them all black, which stand not up, but lay themselves one on the middle of every leaf of the Flower.

The purple, or reddish Mountain, or **99** **Marble** **Flower** are double consisting of ten or twelve leaves with six jagged leaves, spreading behind the brims thereof. This is also some called a **Water-flower**. And is Born by the name of **Water-lily**.

CVII. H.

CVII. He beareth Argent, a **Strawberry**, proper. between two **Blossoms**, Argent; **Leaved and slipped**, Vert. Or else thus, a **Strawberry slip with Blossoms and Fruit**, proper. Or more briefly, a **Strawberry with two Blossoms and leaves slipped**. The Strawberry when ripe, is white on one side, and red on the other, as if they were equally divided; the leaf is triparted and nicked; the Fruit Heart-like.

The **Flat Strawberry**, is more flat then round.

The **Dwarf Strawberry** more round.

The **Strawberry Tree**, hath a Fruit like a Strawberry; the leaves like Bays, and always green, and finely purled about the edges. The Flowers grow on the ends of the branches with long stalks, which are small little **white Bottles**, like those of the Lilly of the Valley, succeeded by **Red Berries** like Straw-berries.

The **Strawberry Cinquefoil**, hath five leaves, two under the other, at a very little distance.

O 3 Strawberries couped in the stalk, proper. Born by *Strawberry*.

CVIII. He beareth Argent, a **Husmillion slipped** in bend sinister, proper. This Fruit when ripe is yellow on one side, and green on the other; when Mellow all yellow: It is also termed a **Melon**: The leaf is a kind of three pointed leaf, the middle longer by far than the other. Others five pointed like a Gooseberry, but hairy. Born by *Millon*.

The **Citrull**, or **Turky Millon**, hath a yellow flower (with Claspers like a Vine) having a kind of knot under it, which groweth to the Fruit; the leaves hairy, long and narrow. Called also a **Cittern**, and is oval round and smooth.

The **Cucumber**, is like them only much less; the Flower of a whitish yellow, and some perfect yellow, the leaf great and broad, after the form of a broad fine pointed leaf, turning in at the stalk.

The **long bowed Cucumber**, or **Cowcumber**, the Fruit bending after the form of an S, and is long, flat, and narrow, and sharp at stalk, but more full at the contrary end.

The **Indian Melon**, is Pear or Quince-like, divided into parts as this figure in the Plate.

The **Apple Millon**, or **Apple like Turkey Citru**, it is round and smooth; in all things else like the ordinary Million.

The **Pompion**, is the same in all respects to the **Husmillion**, but of a far greater Bulk, being green and yellow divided, not ribbed, but sometimes rugged.

The **Gourd**, the leaf broad and round pointed at the end, rough and hairy stalk, the flower containing five long narrow leaves fixed on a knop, under it from whence proceeds the Fruit, which is three sorts; first a **Bottle-like Gourd**, the **Quince-like Gourd**, and the **Lozenge**, **Cimnel**, or **Buckler Gourd**. Which last is termed the rugged Gourd, being knobby and rough, through **Rifings** or **Cornels** it hath outwardly. Called also the **Egyptian Citrull**, or **watry Million**.

The **Indian Gourds** are fashioned oval-like (or Egg-like) Pear-like, or almost round, with Ribbs and spotted with long, square, and diversly spots, on green with white, some red, and others deep yellow spotted.

The **Ethiopian Gourd**, is like leaved to the Bay, the Flower white, the Fruit longer than the Melon, ending in

a round point, the Rind is hard with sundry ribbs, covered with a green freezy Cotton.

The **Indian Scaly Husk Melon**, it is in form like a Pine-apple, scaled all over with a thin greenish scaly Rind, which may be paired off it.

The **American Quince Mellon**, the fruit ribbed, and like a Quince, the leaf also.

O a **Pempion** slipped, proper. Born by *Pompain*. Also by *Millon*.

CIX. He beareth Argent, a Fruit called **True-love**, or **one Berry**. Or the Fruit of the herb Paris. It hath one stalk from a Bulbous root, on which grows three great broad leaves in triangle, out of the middle thereof riseth a stalk which hath onely one flower of yellow leaves, and four green, as it were a husk on the back, from the middle grew a round Berry of a purplish colour. This is born by the name of *Onnibury*.

The **Dwale**, or **Deadly Night-shade**, hath a black Berry growing on five leaves, after this form.

The **Winter Cherry**, or **Ground Cherry**, is one Berry of a scarlet colour, compassed about with a Cup-like husk of a thin substance, and of the colour of the Berry, but not so deep: as the Berry groweth the husk opens and falleth below the Berry into two or three leaves, which being not blown out, or at his full growth, is a perfect and an intire round Cup all about it.

A 3 such couped in the stalk is born by the name of *Gbeirheim*, or *Cherybiae*.

CX. He beareth Argent, a **Stozar slip**, Fruit and leaves proper. It groweth in all respects like to the Quince tree and leaves; the Blossom stands both at the joynts with the leaves, and at the ends of the branches, consisting of five or six whitish leaves like to the Orange-tree, with some Threds in the middle, after which comes a Berry set in the cup that the Flower stood in before of the bigness of a Nut pointed at the end, and hoary all over, of a reddish colour; they grow by couples each on a long foot-stalk, joined in one near the bottom.

The **Virginian Date Plumb**, is the like in form.

The **sleepy Night-shade**, hath a Sage-like leaf, with a purple Bell-flower, which after seeds to this form, with a round Berry of a deep black purple.

The **Tree Night-shade**, hath a woody stem, and many green branches with small long green-leaves something uneven in the edges; at the joynts of the branches it puts forth two or three flowers together, of a Star-like form, turning back the leaves which are white, with a yellow pointil in the middle, which falling away are succeeded by small green Berries, some red, like little red Cherries, wherein is small flat white seed.

The **Shrub Night-shade**, hath a dark brown stock and branches, the flowers like the common Night-shade, in one white, in another blew: others have the green leaves striped with white.

CXI. He beareth Argent, a **Cotton branch slipped**, proper. It is a tree not very tall; the leaves are five pointed, and smooth without any more picks; the Flower like a blew Bell-flower, broad above and small at bottom, and parted to the bottom into five leaves of a yellow colour; with a stiff reddish middle pointil, compassed with five or six yellow Threds, which are thrust off by the Fruit rising under it, which groweth to be a round, covered

vered with a husk or skin, which opening when it is ripe, sheweth forth a lump of pure white **Wooll**, or **Cotton**.

The **Thorny Indian Cotton**, hath all the stems set with small prickles, having many fair broad leaves set on a foot-stalk, dividing themselves into seven parts like to a star, the leaves nicked, and the fruit and flower, as the former.

The **Jaba Cotton**, or the long leaved Cotton-Tree, groweth to a great height, with spreading Arms and Boughs, and long and narrow leaves (like Rosemary) but much longer; the Fruit is like a long Pod, or Cod, growing great from the stalk upward, opening and ending in five points of an Ash-colour and ragged, but full of most pure white Wooll, and divers black round seed within (not involved within the Cotton (as the rest) but growing by themselves upon five long woody pettitions, extending all the length of the Cod.

The **Cotton Weed**, or **Cud-Weed**, hath a long stalk beset with small smooth leaves, on the top is a woolly head, set about with many hairy woolly white leaves: And is of some called the Lions foot.

CXII. He beareth Azure, a **Cornucopia** Or, adorned with three Tulips Argent, stalks and leaves Vert. The Cornucopia is sometimes used with one sort of flower, and sometimes with another, in such cases the Flower is to be named; but if there be divers Flowers, or Fruit, then to say, **adorned with various** (or **varieties** of) **flowers or fruit** proper, is sufficient. The Cornucopia is a word, or term used for plenty, abundance, the enjoying of all things. It was a Cup used in old time to drink in, which cup of plenty *David* doth elud unto in the Psalms, *Psal. 23. When he tells us, that notwithstanding the wicked devices of all his Enemies, God had given him a plentiful Table, and that his Cup* (or Cornucopia) *did overflow.*

A the like proper, is the badge of Peace and Plenty: and may fitly be born of him who hath received a Country from long Warr and Sieges, restoring to them again their ancient Peace and Plenty of all things.

CXIII. He beareth Argent, a **Fruitage** proper, with a scarlet Ribbon on the top, tyed in two bow Knots, the ends pendant on either side. These **fruitages** are variety of fruit of all sorts, or any sort hanging out of a Pod, or Cup (husk formed) of green leaves. A **flowerage** is the same, composed of several Flowers. These kind of Flowers and Fruits are more used for the adornment of Escachions, than born in Coats. Yet I find it born in Arms by the name of **Firtill**.

XIV. He beareth Argent, a **Fruitage** hanging or pendant, by two strings to the Dexter and Sinister Gheif points; with another fixed to it, all proper. After the same manner you will find Flowerages, thus hung. Which is termed, a Flowerage. The like is born by the name of **Dower**. This is also by some and that very properly termed a **Festoon of fruit**.

CXV. He beareth Gules, a **flower pot eared**, Argent; with three Tulips Or, stalked and leaved, Vert. This is a **Dutch Coat** born by the name of *Van Zurgan*. The like with several Roses G the Pot O is the Crest of *Achalon of Bavaria*.

V a Flower pot A full of (or maintaining) Gilly-flow-

ers. G is the Arms of *New June*, or our *Ladies June*.

CXVI. He beareth Or, a **flower pot eared**, (or a Jugg-pot) Gules: with a Tulip purple, stalk and leaves Vert. As in these, so other flowers are born in both, sometimes single, others double, others more, according to the fantasy of the owner. This I find born by the name of *Flowerjet*.

An open Lilly A in a like Pot O is the Crest of *Little*. Some term it a blown, or bloomed Lilly.

CXVII. He beareth Argent, a **Twiggen Basket eared**, Or: filled with variety of flowers and leaves, proper. Also they are filled with variety of Fruit and Leaves, &c. and called a Basket of Flowers, or a flower Basket. This is born by the name of *Twiggerberch*.

O the like Basket with Fruit O born by *Van Fruthenbach*.

CXVIII. He beareth Argent, an **Artichoke** with two leaves, the stalk couped, proper. The Flower from the Artichoks, is Thistle-like.

The **Artichoke Thistle**, hath a Thistle flower growing out of the top, and the leaves more indented with sharp prickles.

The **Candy wild Artechoke**, hath indented pricking leaves, the head also be set with prickles, from the end of every leaf.

The **Artechoke** (or vulgarly an **Artichough**) is a Ladys dish-meat, and from its dainty and pleasant taste well befits the name of its bearer, *Daintieeth*.

O 3 such couped in the stalk, is born by *Van Coknell*.

Per fesse O and G an Artechoke the stalk raguled and irricated V is born by *Pircheimer*.

CXIX. He beareth Argent, a **Bunch of Madder** leaves Vert, with four seeds growing out of them sanguine. It is an herb that groweth up in stalks, without any branches, and at a certain distance, upon each stalk eight long narrow plain leaves altogether, and so till it come to the top out of which tuft, or bunch of leaves, groweth pale yellow flowers, which after come to a red berry, and when ripe, turn black. This is the Company of *Diers* Crest.

The **Garden Madder**, hath a long rough leaf, as aforesaid.

The **Sea Madder**, hath a leaf veined like the Plantain, and is roundish at the stalk, and pointed at the end, the seed growing altogether in a tuft at the top.

The **Candy Madder**, or spiked head Madcier; hath several stalks coming one from another, at the top of each a kind of spike like hairy long tuft; in which the seed groweth much like the Fox-tail, or Cats-Tail grass.

The **Rock Madder** hath small narrow leaves, and groweth in branches like a tree.

The Leaves without the Flowers or Seeds is the Crest of *Sveinem*.

Upon a Cap quarterly G and A the like Bunch of Tuft. G by *Van Benstedt*.

CXX. He beareth Gules, a **double flower de lis**, Or. This is, as if one Flower came out of the middle of another, as the **double honey suckle**, *numb. 70*. This Coat is born by the name of **Double**.

TO

The Honourable

HUGH, Lord CHOLMONDELEY, of Cholmondeley;

Viscount KELLIS, in Ireland.

AS the Laborious Bee from several Flowers gathereth much Honey; so I from your several Gardens have produced an Affinity of Leaves and Fruits, which are here set together in one Plate, and Dedicated to your use (from whence they had their first Being) by him, who is your most Humble and Devoted Servant

Randle Holme.

CHAP. V.

Seeing neither of the foresaid Plates, of Trees and Fruit, of Herbs and Flowers; were able to contain the various and manifold sorts growing in the Universe, and consequently are or may be born in Coats of Arms; I am therefore by this Plate following, constrained to make a further addition of such as are therein wanting.

Of the Affinity of Leaves.

I Shall first begin with Trees, and therein give a farther Description of their Leaves, with the near resemblance or affinity they have to one another; and then give some examples of Fruit, and their resemblance or likeness; and then set forth those Trees not yet mentioned.

I He beareth Argent, a Cork Tree Leaf. Leaves resembling this in their make are

The Laurel, and Bays, the Clove-tree.
The Beech, the Hirtle, the Indian Date Plum,
and the Coffee-Berry Tree, all smooth leaves.

The Chestnut is long and slender, and nicked very small.

The Birch, small, and slender, and nicked.

The Hony suckle, the leaf round at the end.

The Olive, smooth, long and slender.

*

The Damergaret and Almond, are long and slender leaved, but smooth.

The Strawberry Tree are of 2 sorts, one nicked, the other smooth.

The Cherry, nicked; the Barbary long, with small Indents.

The Nutmeg hath the middle broad, the ends sharp and bending like a waved leaf.

The Cinnamon, smooth on the out-side, only an ingraled Vein in the inner part of the leaf: near the edge, round about, with Veins to every point, and then again double veined; the Cassia is the same, so that in Blazoning, it may be termed any of these said Leaves.

B 3 such leaves O born by Leveson of Trentham.

G 3 such O by Cogan; also by Fodon.

A 3 such V born by Salterfley.

O 5 such in Salter, the Coat of Radbrook.

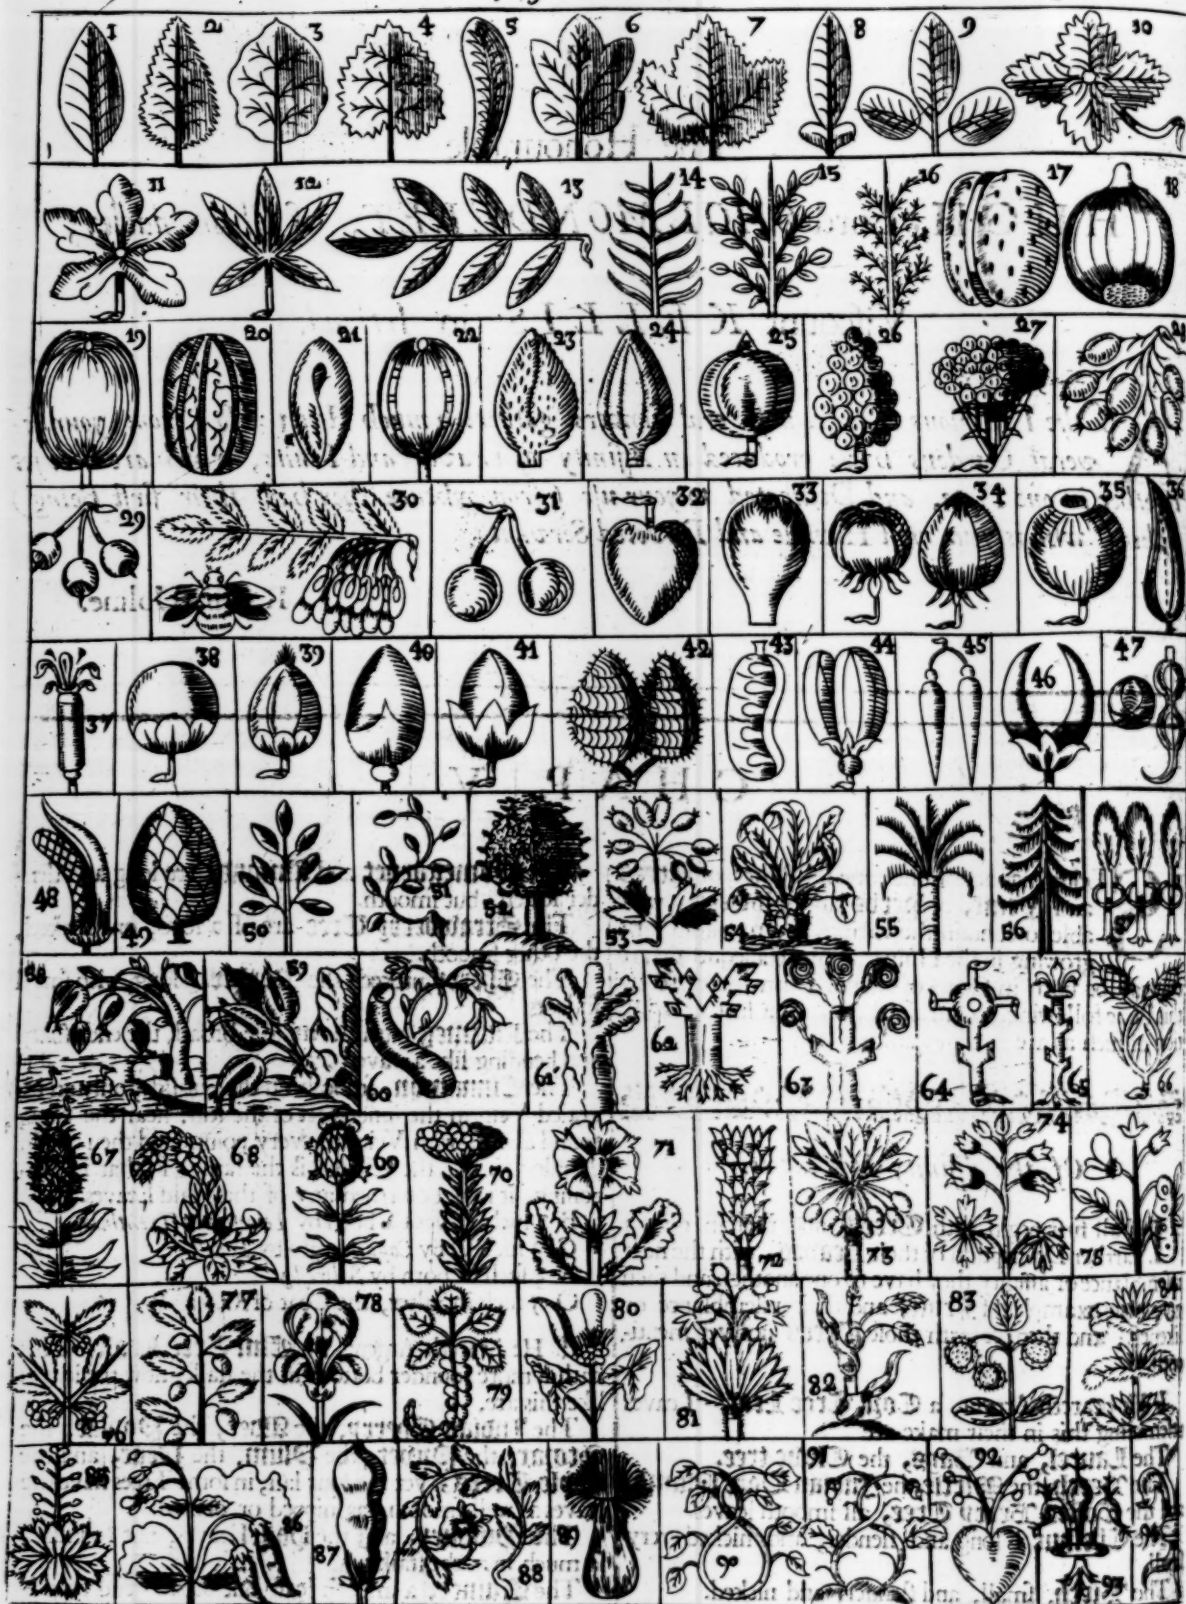

II. He beareth Argent, an Elm Tree Leaf. This hath a more rounder bottom at the stalk; now the leaves like this are,

The Indian Cherry, the Alder, the Poplar, the Storar, the Privet, the Plum, the Pear, and the Apple Trees; yet the four last, in some Trees have the leaves as well smooth, as snapped or dented.

The Mulberry, and the Hazel leaves, not rounding so much in at the stalk.

The Quince, a smooth leaf, but broad, and rounded in at the stalk.

The

The **Apparock**, and **Peech**, the leaves smooth; so is the **Pipe-tree**; only the leaf turneth a little in at the stalk.

The **Lignum Vitæ**, or **wood of Life**, hath a smooth leaf.

G 3 Elm leaves A born by **Feldy**.

A 3 such in Chief V a Rose G by **Tatley**.

Er. 2 Bars S. on each 6 such Leaves O born by **Elmes**.

III. He beareth Argent, an **Aspine leaf**. This is a kind of round waved leaf, yet a little pointed both on the top, and at the stalk; now the leaves that have a resemblance to this, are.

The **Will berry**, or **Windberry**, is round at the end, and long and sharp towards the stalk.

The **Pepper tree**, is round in the middle, but ends are more sharper.

B. Such a Leaf O hath to Name, the Family of **Aspine**.

G 3 in Fesse O born by **Stretch**.

A 3 such V born by **Cade**.

IV. He beareth Argent, a Leaf of a **Line**, or **Linden tree**. This leaf is as broad as long; save it something tends to a point on the top, and heart-like in the mean, or part next the stalk.

The **Judas Tree**, the leaf smooth and heart-like, and full of turning and winding veins.

The **Bulberry figg**, hath the leaf smooth, and

A such a Leaf V and 3 Roses in Chief. Is born by **Feldy**.

A 3 Line Leaves V born by **Hofeld a b**.

A a point pointed with a Line leaf thereat V by **Parren**.

A a Linden tree proper. Is born by **Depyester** in the **Netherlands**.

V. He beareth Argent, a **Medlar leaf**. This is a long and narrow leaf, sharp at the stalk, and broader above the middle, thence tending to a roundish point at the end.

The **Sallow tree**, with long leaves, hath them pointed at both ends.

The **Rose bay**, or **Oleander**, hath smooth long narrow leaves, at the end somewhat sharp.

The **Date Plum**, is a long pointed leaf, but round and broader at the stalk.

VI. He beareth Argent, a **wild figg leaf**. The leaf of the figg (as saith Mr. **Johnson** in his **Herbal**) divideth it self into three, but usually into five points, being all smooth.

The **three leaved Maple**, or **three pointed Maple tree**, the leaf resembles this, only it is round at the stalk, not turning inwards.

O 5 Figg leaves in Saltire V born by the Count **Feria**.

G a Fesse between 3 such O born by **Figgs**.

B 3 such O by **Figlow**.

VII. He beareth Argent, a **Sycamore leaf**. This is another kind of broad leaf, with three points, and those like to it, are

The **Maple**, the **Curren Trees**, and **Bulberry**.

The **Cotton Tree**, hath in each point three indents all the rest of the leaf smooth.

The **white Poplar**, leaf is larger nicked.

The **Mountain dwarf Cherry**, hath deep ticks, as if it were almost jagged.

B a Sycamore Leaf O a Chief A born by **Sycamore**.

G such a Leaf sans stalk between 3 Nails in triangle the points to the Fesse A is born by **Holfere**.

O a Maple leaf V born by **Maple**.

VIII. He beareth Argent, an **Orange leaf**. This is, as if it had young leaves coming at the foot-stalk of the leaf; like to it is the **Lemon**.

The **Bead tree**, but the leaves are indented.

B an Orange leaf between 2 Beasants. Is born by **Orange**.

A 3 Bead tree leaves V born by **Beadleffe**.

IX. He beareth Argent, a **Jasmine leaf**. The Flowers grow in bunches or clusters like the **Wall-flower**; these leaves grow by threes, upon a short foot-stalk; the under leaves being oval-wile, and the top long and pointed at both ends. The like whereunto are.

The **Ben tree**, which is a long and slender top-leaf, with two small ones standing a cross with short foot-stalks.

The **Indian Coral Tree**, the leaves like **Hearts**, or the **Cresfoil**, standing cross, on short foot-stalks.

The **Cresfoil Tree**, after the same manner.

The **Alder Tree**, long slender leaves, and are at a distance on foot-stalks.

A a Jasmine branch V a Canton G born by **Jaseman**.

G a like Leaf O born by **Densfeld**.

X. He beareth Argent, a **Staff tree leaf**. This is a round leaf with four points, the stalk growing out of the middle of it, from whence comes short stalks of an inch long sustaining five or six Flowers, consisting of four yellowish green leaves a piece, which comes to small berries, like **Asparagus berries**, when ripe are black; the branches do grow through the leaves.

B such a Leaf slipped O is born by the name of **Leaf**.

B on a hill in Base, such a Leaf O born by **Van der Hof**.

XI. He beareth Or, a **Dugg tree leaf**. This consists of five, being a round entire leaf, the stalk being fixed in the middle of it; it is a tree that hath no branches, but from the top out of the body of the tree, groweth a long stalk with the leaf, the flowers do the same, which are like unto **Alder blossoms**, of a pale yellow colour.

O such a Leaf between 4 Roses M are the Arms of **Du-ke**.

XII. He beareth Argent, a **Chast tree leaf**. This consists of five long, slender, smooth leaves, all joynt together at the head of a long stalk; they grow upon the branch one opposite to the other at the end whereof comes forth spikes of flowers like **Lavender Spikes**, white, which turn to seed like **Pepper**.

The **broadest Chast tree leaf**, hath two small leaves coming from the bottom leaf, which make them seven in number, and are dented about the edges, and more wolly: the flowers are new.

The **Thorny Indian Cotton**, hath seven leaves, long and narrow of an equal bigness, from the middle whereof groweth the stalk: the Flower is like the **Cockle**, or **bell-flower**, the stem is all beset with sharp pricks.

A 3 such leaves V a File of 3 points G born by **Chastey**.

A 3

A 3 Thorny Cotton-leaves V by *Thorncoat*.

XIII. He beareth Argent, a *Walnut leaf*, or *Sprig*. These leaves upon all the branches grow like winged leaves, one answering another upon the stalk, they are a broad and long leaf, smooth, and are three or four on a side, and one at the end.

The *Ash-leaves*, are long and narrow, indented very small; the lower leaves longer than those next above them, so that it riseth taper, or pyramid-wise; they have little or no foot-stalks.

The *Mastich tree leaf*, hath the same.

The *Service tree leaf*, like the Walnut.

The *Fittich Nut tree*, and the *Quicken tree*, are both like the Ash with nicked leaves, but lesser; the later having a tuft or *Umbel* of white flowers, which after turn to red berries.

The *Turpin*, or *Turpentine Tree*, the leaves smooth, four on a side: the *Balsam*, three on a side, smooth, both broad-leaved, like the *Walnut*: the tree is not above two Cubits.

The *Sumack Tree* of *Virginia*, nicked with nine, or ten leaves on a side like an ash.

The *Sweet Gaul Tree*, the leaves smooth and round at the end.

A a Walnut sprig (or leaf winged) in Fesse Barwise between 3 Walnuts V born by *Walnuttree*.

XIV. He beareth Argent, a *Pew leaf slipped*. It hath long and small leaves without any foot-stalk, joined very close on both sides the stalk. This is by Artists termed a winged leaf (as all others are) which have them growing one against the other, as in the former examples; and those under this number, are.

The *Willow*, or *Withy*, have long leaves thus set; but they are broader at the stalk, one side being a blewish green, and the other white.

The *Bor tree*, hath leaves sharp at the foot-stalk, but round at the end.

The *Locus tree*, are oval leaves set on the stalk by short foot-stalks.

The *Silver Bush Tree*, the leaves smooth and indifferent large, and set at a distance one against the other.

A a Yew leaf out of the Base (or Yew slip) V in Chief 3 Cressants G born by *Northbagh*.

A 3 Yew-slips fructed, proper. Is born by *Yewell*.

XV. He beareth Argent, a *Thorn bean tree leaf*, or a *Binding Bean tree branch*; every branch or stalk of this tree, is a sharp thorn; on either side whereof grows three or four winged leaves, one opposite to the other: which to look too, seems a branch, yet all makes but one entire leaf; because all the leaves grow so.

The *fitt Tree*, hath narrow small leaves after this manner, both at the point, and also all over the stalk and branch.

The *Broom Tree*, the branches and stalk are very close and thick beset, with a small longish leaf, one against the other. It is a shrub which of some is called *Mirica*, for the bitterness of its taste; its boughs flourish as well in Winter as the Summer. The Flower is yellow, which groweth to a *Pod* or, *Cod* like a *fitch* or *Cetch* of a blackish colour. This is the Crest of *Van Bromburge*.

A 3 Broom branches V born by *Brome*.

The *Heath*, hath a stalk contrary set on either side, with a slender winged stalk of short and narrow leaves.

Gorse, of some called *firse*; it is a sharp and thorny kind of shrub; each leaf being round and sharp pointed: the Flower is yellow in form like the *Pease blossom*. It beareth Flowers all times in the year.

O a Fesse between 3 Gorse slips V born by *Gorse*.

XVI. He beareth Argent, a *Sprigg of Cypress*. This kind of leaves cannot be taken from the tree but in slips, or sprigs; by reason the leaves are so long and slender and grow so thick together, as if it were all jagged.

The *Arbor Vita*, or the *Tree of Life*, hath a small scaly leaf, short and narrow; and covers all the stalks and branches.

The *Dragon Tree*, is all from the branches ends, beset with sharp long and narrow leaves, joined together at the bottom where they come out of the tree: the Fruit is a red *Cherry*.

The *Cedar*, hath long narrow leaves, which grow together on a knot, or joint, in the stalk or branch.

The *Larch Tree*, doth the same.

The *Pine*, is fuller of small long, and narrow leaves; the branches or stalks, covered over with a lesser sort of leaf scally. The boughs grow Cross one to another.

The *Palme*, the leaves of this tree is very long and narrow.

The *Pitch Tree*, the leaf not very long but narrow, and grows all over the stalk, sprig, and branch.

The *Date Tree*, is like the *Palm*, with the branches full of long narrow leaves, and the body or stem, scaly as it is.

The *Camarisk*, and the *Savine Trees*, have short and narrow leaves like the *Arbor Vita*: only the mean stems or branches are not covered with them. The first hath the red shoots, set with small, short, hairy, soft, green leaves; and another tree of this kind hath the leaves wholly white, and abide so constantly from year to year.

The *Juniper Tree*, hath small and long narrow leaves; three for the most part growing together almost like *Thorns*; they bear green berries like *Pears*; commonly round.

The *Indian Coker Nut Tree*, hath branches or rather long twigs, growing only from the main stock.

A a Cypress sprig V a Chief G born by *Cyprus*.

B 3 such sprigs O born by *Birkin*.

G a Larch tree Leaf or Branch A born by *Larcher*.

A 3 Palm Branches or Leaves. By *Palme*, or *Palmer*.

Of the Affinity of Seeds, Pods, and Fruits.

3. **F**rom the resemblance of *Leaves*, we come to *Fruit*: whereof a few is here presented to your view.

XVII. He beareth Vert, a *Walnut Or*. Some term it out of its shell, which needs not; when no manner of a branch

branch, or slip, is mentioned. It is of a yellowish colour, inclining to white.

B 3 Walnuts O born by *Walnut*.

G 3 such with a Fesse between O born by *Hardshull*.

XVIII. He beareth Argent, a **Chestnut**, proper. As it is out of the husk, it is of a deep brown red colour: the husk smooth without any knots, or furrows on it.

A a Chest-nut proper, on a Chief S 3 Trefoils O by *Nattell*.

XIX. He beareth Argent, a **Cokar Nut**, proper. It is of a Chest-nut colour, and the flowers like them of the **Chest-nut**, the leaves long and slender like the **Date-tree** leaves. This is born by the name of *Cakarston*.

O 3 such G born by *Van Kakhburg*.

XX. He beareth Vert, an **Indian Nut Or**. It is of a yellowish colour marked, or spotted with a deep blackish brown. 3 Such is born by *Raidinges*.

XXI. He beareth Sable, a **Fistick Nut**, Argent. It proceeds from a white blossom; groweth many together on foot-stalks, in long clusters, and a winged leaf.

The **Coffee Bean**, or **Berry**, is much like it. The Coffee-berry is of a white brownish colour, they grow two in a thin furrowed husk.

XXII. He beareth Argent, the **Pod** of the **Palma Christi**, or the great **Spurge**, proper. It is a kind of Nut of a brown colour; the leaves are large and uneven, of five points, with a turning in at the stalk.

XXIII. He beareth Argent, the **purple Indian purging Plumb**. It is of a bitter taste. Three such is born for the Coat Armour of *Plume* or *Plome*. This Nut groweth within a Rind or husk which openeth as it ripens.

XXIV. He beareth Gules, a **yellow Indian purging Plumb**. Born by the name of *Don Plomsho*.

The **Ethiopian Sower Sourd**, resembles this, only is longer at the end, with a little bending; and riseth from the stalk with a kind of knot, or joint: the rind is ribbed, of a greenish colour.

XXV. He beareth Argent, a **Bladder Nut**, proper. The tree to this fruit, hath a winged leaf of five, a little dented, the Flowers grow many together on long stalks, which with a round cup in the middle of the white leaves, sheweth like a **Daffodil**; after them comes russetish green **skimy Bladders** with brownish Nuts, with a rough or furrowed hard shell.

The **made Apples** of *Ethiopia*, are made so only they have many more Furrows: and are of a red colour. The Flowers are six white short leaves, with a yellow point in the middle of divers Threads, joined together.

XXVI. He beareth Argent, a **Cluster of Hony-suckle-berries**, Gules. These Berries are the Fruit, and Seed of the **Hony-suckle**, set in a bunch or knob together.

Virginia Sumack, hath large winged leaves indented like ash; the Flowers in heads, or **Clusters** white, which turn to threads, or **red Chymes**: seed round and reddish.

XXVII. He beareth Argent, a bunch (or Umbel) of **wild Ash**, or **Quicken Berries** slip. They are red, and grow in a round; as the **Alder-Berries**. Born by *Quicken*.

The **Alder-Berries** are black, and grow thus in Umbels. And three such is born by *Alderbery*.

XXVIII. He beareth Or, a **Bunch**, or **Cluster** of **White-Thorn Berries**. Some term them **Hawthorn Berries**, and a bunch of **Haws**. The Flower is white, and the Berries scarlet, on short foot-stalks.

The **Plant Bealy Tree**, grow in Clusters, or bunches like **Haws**, and are black.

The **Dog-berry**, or **Satter Tree**, the Berries are round, black, and in bunches.

XXIX. He beareth Argent, three **Wharl Berries**, or **Bill-Berries**, at a slip pendant; they grow generally two and three together, so that these seem to be slipped off from the stalk. They are termed **Whortle Berries**, or **Wind Berries**.

Pivet Berries, grow in bunches, and are all black, directly round.

XXX. He beareth Argent, an **Ash stalk**, leaved in Fesse, with a bunch of **Keys** pendant from the slip proper. These are the right way of drawing the **Keys**, and not as *numb. 66*, and *69*. This is also termed, and that properly, an **Ash leaf** in Fesse, with a cluster or bunch of **Ash-Keys** pendant; for though there be several leaves on the stalk; yet all is but one winged leaf, of eleven small, and slender ones.

Here is the true shape of a **Drone Bee**, or a **Humming Bee**, vulgarly termed an **Humbo-Bee**. It is of a yellow Mouse, or hair-colour; with a black streak over cross the back; the tail below the waste, divided into three parts, that part next the body yellow, middle part black, and end, white.

A 3 such proper by the name of *Humbee*, or *Drumle*.

XXXI. He beareth Argent, two **Cherries** fixed at the ends of the stalks, and slipped, pendant.

The **Lampl Berries** (or **Plumbs**) are black, and of a pure bloody colour within: See *numb. 73*.

The **Cornel Tree**, hath the berries long and round, like **Olives**, red when ripe; the Flower is nothing else, but yellow tufts, as if they were set together; the leaf roundish pointed, and smooth.

A 10 Cherries G stalks V born by *Cherry*.

XXXII. He beareth Or, an **Heart Cherry** pendant. It is red of one side, and a kind of whitish bluish on the other of a pleasant taste, and lovely to look upon. Three such are born by the name of *Cherrishurst*.

XXXIII. He beareth Argent, a **Figg**, Vert. See *chap. 3. numb. 38*.

The **Cardamom**, or **Ginny grains**, are in form like a **Figg**, and full of reddish seed; it is veined on the outside the husk long-ways, like the **Goose-berry**, but much thicker, and jagged at the small end.

The **Jumper Tree**, like the **Fitt**, the berries pear-like, of a blackish blew colour.

XXXIV. He beareth Argent, two **Lobe Apples**. They proceed from a yellow flower like the **made Apple**, and when they are full ripe, the Fruit is red; with long trailing, winged, and divided leaves. Three such is born by

by *Lovable*. Some of these Apples are Orange colour, and others yellow.

The *Virginia Winter Cherry*. At the joints of the leaves comes forth a yellow blossom, being one leaf of five points, with divers purple threads in the middle, tipped with blew chives; after which comes *Bladders* or thin skins, full of berries, green when ripe, and jagged at the top.

XXXV. He beareth Azure, an *Adams Apple*. The Flower like the *Orange flower*; the fruit yellow rinded, thick, rugged, and uneven; with some rifts and chaps or chones thereon.

The *Sage Apple* of *Candia*, the like in form.

XXXVI. He beareth Gules, an *Indian Figg*. The flower is whitish yellow, growing in clusters, the fruit like *Cucumbers*, of a whitish colour.

The *Beza Tree* fruit, is of a greenish ash-colour, having eight edges or corners, with a white substance within; divided into certain cells, wherein is a seed like to a Pease.

This answereth the *Date husk*, before it be opened, and the *Date* appear, as *chap. 3. numb. 79*.

XXXVII. He beareth Sable, a flowered *Pod* of *Aloes*. The *Pod* out of which the flower cometh, groweth in great numbers together, is green; and the flowers out of it, are yellow, tipped at ends with yellow pendants, with a yellow pointil in the middle of a whitish green colour: The leaves are large growing one within another, chanel-like; with sharp ingraled points, and ends about the leaves. It is a precious wood, and of a sweet smell: the leaves are fat and gross, whereout distilleth that kind of Gum that is most odoriferous. It is also taken by Physicians for an herb that is sharp and bitter, which groweth in *India*, and *Persia*.

XXXVIII. He beareth Argent, a *Bulle n Seed head*, or *Seed Vessel*, proper. The Flower is yellow, the *Pod* whitish, and the cup it is set in, is a white hairy green.

The *Pod* of the *Virginia Potato*, hath the *Pod* something pointed.

The *Indian Gistly Plum*, hath the *Pod* longer and round at the end of a pale green; the leaves are round at the end, and sharp at the stalk.

The *Cart Indian Apple*, is round in the cup or husk, long pointed, and furrowed into four or five parts, and yellow on the out-side.

The *Storax* and the *Virginia Date Plum*, are so pointed and furrowed.

A *Mullein seed head*, proper; a *Canton B* is the Arms of *Van Muleinbach*.

XXXIX. He beareth Argent, the *Pod* or *Husk* of *Bush Cotton*. This before it opens its husk for the Wooll to appear, which is two or three broad leaves much jagged at the top, containing therein a yellowish flower, like a bell-flower, broad above and narrow at bottom, made of five leaves, with a stiff middle pointil, compassed with five or six yellow threads. Three such is born by *Cottenhead*.

XL. He beareth Or, a *Settlen*, or *Sirtan plum*. The Blossoms are five white leaves, growing many together on a long stalk with foot-stalks. The berries are of

a blackish green. Born by the name of *Dago Sario*, a Spanish name.

XLI. He beareth Argent, an *Assirian Hade Apple*. The pod is whitish green, and the cup jagged, or cut into four long leaves. The leaves rough and hairy, unevenly cut, being large broad, and pointed.

G a Fessie between 3 *Assirian made Apples*, the husk, A the *Pod* or *Apple* O born by the name of *Strachwith*.

XLII. He beareth Argent, a *Pod* of a *smooth Scorpion grass*, Vert. This is born by *Breundt*.

There is another kind of *Scorpion grass*, where the head being long, turns round, and is all hairy on the out-side, like a worm; which some call the *Worm-grass*, or *Caterpillar-grass*. The leaves grow in tufts like grass, but is broader and longer piled, then ordinary grass.

XLIII. He beareth Argent, a *Sena Cod*, proper. Of some a *Pod* of *Sena* of *Alexandria*. The flower is yellow of five leaves with *Purbeins* running through every leaf, the pod of a darkish green, the leaf winged of of seven small round pointed ones.

XLIV. He beareth Or, a *Square Codded Pease*, or else a double *bulbed Pease-Cod*, Vert. Their may fitly be termed *Cods* having a near resemblance thereunto; and so may well answer to the name of the *Bearer*. For three such *Pendant* is born by the name of *Codde* or *Coddell*.

XLV. He beareth Argent, a *double Cod* of *Stallow wort*: or a *Swallow-wort Pod* double codded, pendant: they usually have two on one stalk; the leaves long pointed and smooth; at the joints towards the top comes forth 5 white pointed leaves, which comes to long round Pods, thick above and less at point. of a greenish colour.

Star Codded pulse, or *Birds foot*, have five such Pods as these a little bending at the end, and fixed all close together, without any foot-stalk, like to a birds foot, the flowers yellow, the leaf a long winged stalk, with short and slender leaves, set well and thick together.

The *Scorpion like Pulse*, hath two crooked Pods joined together, which stand like two *Rams horns* on the stalk.

XLVI. He beareth Argent, a *Cluning Dogs bare horned Cod*, Sable. The Flower is five leaves bending backward, with a green pointil compassed with five chives, of them come two Cods bending out and inward again, after the manner of *Bulls horns*. The leaf, broad in the middle, like a *Bay leaf*.

XLVII. He beareth Argent, a *Nut ben Cod*, and *Nut*. Every *Nut*, is in the *Pod* in a distinct cell by itself, the other part of the *Pod* being stretched, where there is none. It is of a thin bladder like substance and of a light yellow colour, with many long streaks on the out-side; the Nuts themselves are whitish, in a rough woody shell. Three such born by the name of *Nutben*.

XLVIII. He beareth Argent, an *Oleandor Pease-Cod*. The flower like the *Pease*; the leaf long and slender growing altogether in a tuft. From either, the

Role

Rose-like white, or red flower, proceeds a long cod crooked hard and woody, brown of colour: in which woolly seeds are wrapped. This plant is called the **Rose Bay**.

The **Cyprius**, or **Crescote Tree Cod**, is crooked like a **Crescent**, or half Moon: the flower is of a gold yellow shining colour.

The **Long Pepper**, without the husk doth much resemble the seed part of the **Oleander Cod**.

Three **Oleander Cods**, proper: in a field. A is born by *Oleander*.

A 3 **Peper pods** pendant, S is born by *Butley*.

XLIX. He beareth Argent, an **Indian scaly Bush Melon**, Vert. The leaves are large and long like the **Pom Citron tree**; the Fruit covered with a thin scaly green rind, somewhat like the **Pine Apple** for form, but as easily paired away as a **Pear**. This is born by the Town of *Sealhere*.

The **West India Bay plumb**, like this in form, but not scaly, of a yellowish black colour, shrunken in (as it were) uneven, or withered.

The **Chestnut Sourd**, hath a hard thick rind of a dark green, set with Diamond pointed like blackish pricks.

The **prickly Melon**, have leaves long and pointed, dented about the edges, the flowers pale whitish yellow: the fruit hath a green rind set full of short and thick sharp pricks, having some strokes thereon, as the **Melon** hath.

4 **W**E now proceed to give some examples of Trees, not before mentioned; or if before, yet their bearing is shewed but in part, there wanting some peculiar preidents, for better demonstration, and rules in Blazon.

L. He beareth Argent, a **Branch of Laurel**, or **Bays**.

Now according to the rule, chap. 3. numb. 28. the branch is not to be so termed (unfructed, or without fruit) except it be thus made, and consist of nine leaves; that is three slips set together on one stem. But if fructed then four leaves is sufficient to have it termed, a Branch. As chap. 3. numb. 2.

The **Cherry Bay tree**, being young hath a green bark, but old it is grey: It beareth a white flower, which turns to Cherries, black when ripe with stones in, the inner part of the fruit is of a deep blood colour.

LI. He beareth Argent, a **Spigg of Laurel** (verted and reverted,) or **flexed and reflexed**. It is were a **Aline**, or **Pop Stem**, or any other kind of Fruit bearing tree that cannot support it self, but by the help of a pole, there had not needed the term **flexed**, &c. for they bend, and bow naturally: I have seed this Blazoned, a **Twig**, or **Spig** in pale, **reflected** in form of an **S. reverted**.

A the like V between 3 **Cornish Chough**. Is born by the name of *Shone*.

A the like V between 3 **Rooks**. Is born by *Dico ap Dafydd ap Madock* ddw in *Wales*.

LII. He beareth Or, on an Hill out of the Base, a **Haws tree Blossomed**. By the name of *Hayes*. The Blossoms are white, which turn to red Berries, which hang in **Clusters** on foot-stalks, the leaf five pointed with a little but sharp dents. See numb. 28. It is termed a **Hay-thorn**, or **white Thorn**, or **Hays tree**. This born with an Hare segant at the root. Is the Crest of Ince of Ince and *Chester*.

LIII. He beareth Argent, a **Slip of Hay-thorn fructed**. Some Blazon this three **Bunchs**, or **Clusters of Hays**, on a slip, Gules: which is the proper colour of them. Born by the name of *Hayshall*.

Argent three such proper. Born by the name of *Van Hainuse*.

LIV. He beareth Argent, on an Hill out of Base, an **Indian fig Tree**, or **Plantain fig Tree**. It is so called, because it hath long **Plantain** like leaves; having a great thick rib running through the middle; the flowers are of a rustetish purple colour, divided into many clusters, which brings forth long fruit, a span long, see numb. 36. This is born by the name of *Malenitz*.

LV. He beareth Argent, an **Indian Cokar Nut Tree**. It groweth a great height without branches which causeth the Natives (at certain distances) to strike pins, or pegs into the body of it, or tie ropes about it, that serves for steps to get into it: The flowers of it, are like the **Chestnut**, hanging in bunches at the lower boughs, which comes to large Nuts, see numb. 19.

A such a tree out of Base, fructed, proper. Is born by *Van G're*.

LVI. He beareth Argent, a **China Cokar Tree**. It hath its boughs growing downwards from the stock; the leaves are long and slender like the **Palm** or **Date tree** growing all on one side, the boughs do not shoot into branches.

Small Water Parrow groweth much after the same manner, having five or six joints in the stem, at each of them there is several fine small green and winged leaves, being less and less upwards, so as the top of the stalk seems to be pyramid fashioned.

A a **China Cokar tree** fructed, proper. Is born by *Dón Diago Cab. ck*.

A the like tree, sans fruit, V is born by *Abank a Poland*.

LVII. He beareth Argent, three **Palm**, or **Cypress trees Irradicated**, (or **mooted** up by the roots) in Fesse, **fretted** with a rubin Gules. Some term them, **wreathed**, or **fretted** in form of a **Coze**. Born by the name of *Cyprus*.

B the like O fretted G is born by *Dón Aberca* of *Spain*.

LVIII. He beareth Air and Water; with Fowl swimming therein, a **Wardle**, or a **Wiant Geese tree**. on an Isle issuing out of the sinister side. *Parkinson, fol. 1306.* will not have them to proceed from Trees, but from shells growing upon sides of Rocks, and Ships that have taken long Northward Voyages: Yet others have affirmed them to be from Trees, growing towards the North of *Scotland*, which as they ripen, the Shell (being like a Muscle openeth, and so length the Fowl drops down;

which if it fall into the Water, lives: if on the Land, it periseth. This is born by an *High-Lander* named *Cornajalle*.

LIX. He beareth *Air*, and in *Base*, *Water*: on the sinister side a *Rock*, with a *bung* of *Barnacle shells* fixed by *foot-stalks*, or strings, with some of the *Foul* in the *Water* all proper. Born by the name of *Rocfall*.

LX. He beareth *Argent*, a *crooked stock double beved*, couped at both ends, in bend: having 2 *Spigs beved*, issuing from the middle of the sinister side at one place, and bowed crossing each other. Born by the name of *Crostock*.

O the like V is born by *Van Byfmych* in *Rhyme* Palatinate.

A the stock in base barwise with three *Rose-sprigs* proceeding therefrom, proper. Born by *Van Rostein*.

O the like in base Barwise with three *Hollin leaves* therefrom V by the name of *Van Gorney*. Also *Morner* the same.

LXI. He beareth *Azure*, in base a *stock* (or *stem*, or *trunk*) of a tree *couped*, (*cropped* or *loped off*) of its five boughs, or *Arms*, Or. This is more briefly *Blazoned*, in base a *cropped tree*: For in the cropping of trees, the *Wood-men* always leave a stump of the bough remaining to the tree, which they cut off. Others say, *trunked* in its five boughs; or couped of its branches. By the name of *Deadffe*.

A the like G in Chief three *Pellets*. Born by *Brodzic* a *Polonian*.

LXII. He beareth *Argent*, a *stock of a tree*, *mooted* up by the root; having two *Arms couped*, and *trunked*, *Gules*. Born by the name of *Raggott*.

G the like O born by *Don Capatas* of *Spain*.

B the like O born by *Van Mornitz*.

LXIII. He beareth *Argent*, a *stock* in base, with three *boughs* (or *Arms*) couped; from the middle three *smoaky vapours* issuant, and one a-peece from each other, all proper. Others say, from each one, and middle three *vapours* of *smoke*. Born by *F. mall*; and is the *Crest* of *Gilford*.

Terms of Herbalists used about Trees, and Fruit.

5. **T**HERE is no part of a tree, or *Fruit*, but it hath its peculiar name, which I shall endeavour to set down under these heads; in the *Root*, in the *Stock*, in the *Leaves*, in the *Fruit*, and in the *Extremities*.

First, in the *Root* there is

The *Main-holder*, which is that part of the root next the tree.

The *Sprays*, or *divided Roots* from the *Main*.

The *Tuber*, the knotted or bunched part of a root.

The *Suckers*, are such as shoot from the *Sprays*, or *Arms* of the root, called also *Shooters*.

The *Fibres* are the small threds, or strings that come from the suckers; by which the tree is nourished.

Secondly, from the *Body*, or *stock* there is

The *Stem*, or *Trunk*, is the body of the tree to the branches.

The *Stock*, next to the root.

The *Bark*, which hath several Denominations according to its being; as *rough*, *smooth*, *scaly*, *hairy*, *mothy*.

The *woody*, or outward bark.

The *rind*, or inward bark.

The *Sap* or *Bait*, is the out-side of the *Wood* after the bark is taken off with the rind; and by *sap* we understand the moisture in the tree.

The *Heart*, the middle of all the *Tree* inward.

The *Wood*, or *Timbert*, is between the *Sap* and *Heart*.

The *top*, the height part of the body.

The *self-Boze*, the growing up of the bark at a broken bough.

The *Joynt* or *Shoot*, is the knot or joynt from whence a years growth proceeds.

The *Knots* or *Knobs*, are woody substances that grow out of the sides of any trees.

The *Thorns*, or *pricks*, are sharp points growing from the branches of some trees, which are straight in some, and crooked in others.

The *Uerthing*, is the turning of branches.

The *Arms* of the tree, are the main boughs next the top.

The *Branches*, are smaller boughs that come from the *Arms*.

The *Spigs*, or *twigs*, are such as are from the branches.

A *slip*, is any part of a branch, slipped from the main.

The *Water shoots*, or *suckers*, are twigs that grow from the roots of trees.

The *shoots*, are such twigs as grow from trees.

The *sprays*, are smaller twigs as grow from them.

The *Cyons*, *Stems* or *Siers*, are underlings, or small twigs of a years growth with a joints, which being cut off, is grafted in another stock.

The *Quill*, is the Cane, or space between two such joints.

The *Pit* or *Hole*, whereto the branches sprout out.

The *Pith*, a soft spongy substance, in the middle of some trees.

Thirdly, in the *Leaves* there is

The *Lozenge leaf*,

The *round leaf*,

The *round pointed leaf*,

The *smooth leaf*,

The *rough leaf*,

The *hairy leaf*,

The *hoary leaf*,

The *dented*, *nicked*, or *sniped leaf*, cut in edges.

The *waved*, or *unevenly cut leaf*.

The *crumpled leaf*, such as stand bending, and folding in the edges, and will not lie even.

The

The **foot-stalk**, is so much of the stalk, as is from the leaf, to the sprig or branch it is fixed too.

The **Ears**, or **fines**, are such leaves as grow on the foot-stalk, either naturally small; or through extravagancy, and above nature's use.

The **winged leaf**, is such as have 2, 3, 4, 5, 6, 7, &c. leaves on the side of a stalk, and as many set over against them, without any foot-stalk, or else very short ones, with an odd leaf at the end.

The **Rib**, is the chief vein, from the stalk to the end of the leaf; the **Waster-vein**.

The **middle rib**, which hath leaves fixed to either side of it.

The **nerves**, are such veins as run from the rib, to the sides of the leaf.

The **pur vein**,

The **ver vein**,

The **Brime**, or **edge** of the leaf.

The **eyes** or **buds**, that which is at the foot of the foot-stalk where it joyns to the sprig, or branch.

The **claspers**, are tender threads, or hearby strings, by which running and climbing branches hold up themselves, by winding about what they find in their way.

The **tendrel**, is the same to claspers.

Fourthly, in the Fruit there is

The **Catkins**, which is the hairy bloom of the Willow, or Chestnut, before the flower, and may be generally used for the first knot, or coming forth of any bud.

The **bud**, the **cup**, or **blissom**, &c. See in flower terms.

The **pod**, or **berry**; is the first knitting of fruit, when the Flower is fallen off.

The **rind**, **peeling**, or **skin** of any Fruit, is that as doth cover the out-side, whether it be soft or shell fruit.

The **urchin rind**, is the cover of the Chestnut.

The **pulp**, or **pap**, of an Apple.

The **Cork**, or **Coar**, is the skinny thing that keeps in the seed of any fruit.

The **Cell**, is the hollow places, in pods, husks, or coars, in which the seeds are; one fruit having in it several cells, or places in which the seeds are.

The **Pippins**, are the seeds of Apples, Pears, &c.

The **husk**, is a general term, for the thing as covers any kind of fruit, provided it be either rough, barky, or woody, skinny, or bladder like.

The **hulk**, **hull**, or **pill**, is used for any covering of fruit, that is thin skinned, or easily cut.

The **Oyme**, is the same to husk.

The **Shell**, is any woody substance, as covers either seeds, or kernels outwardly, as Nuts.

The **Stones** of fruit, are such shels as are covers for seeds or kernels; within eatable fruit, as Dates, Cherries, Apricocks, Plumbs, &c.

The **kernel**, of shell-fruit, as Nuts, Walnuts, and Almonds.

The **furrow**, is the chones, and clefts, or hollowings, in the corners, or rinds of any fruit.

The **Ridges**, are the swellings of the sides of the fruit.

The **umbil**; is the **navel**, or **navel** in any fruit, just against the stalk; it is also taken for the **crown**, top, or head of an apple, where the blossom is.

The **Gistle** of the Walnut, is that as lieth between the two halves of the kernel, within the shell.

Fifthly, in the Excrements of Trees and Fruit there is

Agarick, an Excrement or hard **Mushroom**, growing out of the sides of old Trees.

Lungwort, a kind of Moss, with broad tough leaves, diversly folded, crumpled, and gashed in on the edges, and spotted on the upper side.

Mushrooms, growing on branches or bodies of Trees, and are of a skinny, soft, spungy substance.

Jews Ears, an Excrement from old Alder Trees.

Touchwood, a kind of hard, dry, spungy Mushroom.

Moss, as hairy Moss, fennel like Moss, hollow head Moss, broad horned Moss, and knobbed or kneed Moss.

Gums, as **Araback**, a liquid substance from Cherry and Plum Trees. **Gum Hedrea**, from the Ivy Tree.

Gum Tragacanth, from the Goats Thorn. **Gum**

Opopanax, from Panax, the All-heal of *Hercules*.

Gum Sandarack, from the Prickly Cedar. **Gum**

Armoniack, from **Gum**

Lacke, from Ants, as Honey from Bees.

Myrrh, a kind of Gum from a tree in *Arabia*.

Camphire, the Gum of Cafar, a tree in *Arabia*.

Mastick, a Gum taken from the mastick, or lentise tree.

Bellium, like myrrh, not so bitter, & easily to be broken; of a quicker scent.

Cambugia, whither Gum, or Juice dried, is not certain.

Rosin, a liquid substance from the Firr tree, which after hardens.

White Rosin, gathered by *Carthage* in *America*.

Pitch, from the Pitch tree.

Turpentine, from the Turpentine tree.

Tar, a compounded Rosin, or Rosin made molliable.

Birdlime, made of the green Bark of the Holly tree.

Balsam, or **Balm**, from the Balsam tree.

And to conclude this Treatise, take the terms used about Trees and Wood when they cease to have life in them; for we say the Tree or Branch is

Starved, when it wanted Soil to nourish, or is cut off from the main body.

Blasted, or **Withered**, when Winds have destroyed it.

Rotten, **Decayed**, or **Dead**, when Age hath ruined it.

Cropped, when all its Boughs are cut off.

Pruned, when some extravagant Branches are taken away; called also **Lopped**.

A **Log** is a Stock without Boughs.

A **Pole**, a Tree without Branches or Leaves.

A **Stake**, top of Trees or ends of Boughs.

A **Strick**, a shoot of a tree grown to some substance, then cut from the tree.

A **Winding** or **Writhing**, a Stick bent and wreathed about.

A **Pile**, is many pieces of Wood for Fire, laid together, or a piece of Timber to drive into the earth, to lay a Foundation, or build upon.

A **Faggot**, is many Sticks bound together for Fire, Fuel.

A **Bush**, cutting of small Wood or Branches, and bound in a Bundle for Firing, we call such **Kids**.

A **Billet** is a piece of Cleft Wood for to Burn.

A **Nethering**, is a twig or stick bent about Stakes and Poles, by which fences and hedges are made secure.

A **Stump**, or **Stoe**, is that part of the tree in the ground, remaining after the Tree is cut down.

A **Silven**, **Shivered**, or **Cloven Tree**, when it is rent and torn by Winds and Lightnings.

Terms used by Pomarists, or Lovers and Keepers of Orchards.

5. **Bourgening**, is the taking away all dead branches from Trees.

Bud, is the first shooting forth of the leaf or flower from Trees or Plants.

Bud, is a knot in a shoot or lance from a Branch; of some termed an **eye** or joint of a shoot.

Bunch, or **bunched eminencies**, are knots in sprouts or shoots above others in the same **Lance**.

Bareing the roots, is to dig about the roots, and uncovering them.

Stumers, are such Trees that cannot support themselves but have a Pole.

Cleaving of Trees, to rub them and preserve them from Mols.

Cleft, is a slit or cutting into the top of a Stock for to Graft in.

Cones, are knots like seeds growing from the sides of branches.

Cyen or **Graft**, see **Syen**.

Catkins, or **Catkins**, are the first bloomings of Willows or Chestnuts, or such like, which come forth with Downe.

Dwarf Tree, is such as are set to Walls, and kept by pruning not to grow any higher; or such trees as are planted in hedg-rows, or such as will not grow thick.

Dressing of Trees, is the cutting and lopping off of superfluous Branches, rubing off the Mossiness, and keeping them in good order.

Eye, or **Joint**, see **Bud**.

Eminencies, are knots in sprouts of the higher sort, such as are above others in the same **Lance**.

Fruiter, a Fruit-seller; of some a **Fruiterist** or **Fruterer**.

File in Trees, is a Disease that frets and corrupts the Bark.

Graft, see **Syen**.

Grafting, is an artificial placing the Cyen or Graft of one kind upon the stock of another, so as the Sap of the Stock may nourish it, and cause it to grow therein; of which there is four (yet) known ways, as

Grafting in the Cleft, is by sawing off the head of the Stock for Wall trees near the ground, and in Standards much higher, as the growth of the Stock is, in which a Cleft being made, the Syen being cut Wedg-like is placed, and so bound close, and covered with Clay tempered with Horse-Dung.

Grafting by Shouldering, or **Whip-Grafting**, as some term it, is by cutting of the head of the Stock, and by cutting the graft from a Knot or Bud, on one side sloping, with a shoulder at the top to rest on the head of the Stock; and with a Knife to cut away so much of the Bark of the Stock as the cut-side of the Graft will cover, placing both together that the Sap may join, then bound and clayed as aforesaid. **Notch Grafting** is much after the same manner.

Grafting by Inoculating or **Budding**, which is by taking off the eye or small Bud, which grows between the leaf and the new shoot or lance, and so placing it on a fit stock, that it may from thence receive nutrition agreeable.

Grafting by Approach, of some called **Grafting by inarching**, or by **Ablactation**, which is, the young stocks and cyens growing near together, and having both their heads uncut, the branches of both being of one size, are brought together that they may touch each other for the length of 3 inches, where such joining sides are cut to the Pith, that the Saps may exactly meet, in which position bind them, and cover the place with tempered Clay.

Greens, are such Trees or Herbs as are green all the year; Winter Trees or Flowers.

Inoculating, see **Grafting**.

Jule, see **Catkins**.

Joynt, in a sprig or shoot see **Bud**.

Junpe, a young shoot or Sience.

Knot, see **Bud**.

Lopping, is the Cutting off all the boughes to the maine stock.

Lance, is a shoot, or a yearly sprig, growing from a tree in one years space.

Lome, a kind of Clay to put about Grafts, made of Clay and Horse-Dung, and such like compositions.

Morbide, is a flat, not high tasted Fruit.

Nursery, is a Bed or parcel of ground where seeds are sowed, or slips are set to take root, or where young Stocks are grafted.

Pallisado Hedge, such supports as are made to uphold young Plants that they keep within pounds, whether they be by Laths or other cloven timber.

Plash.

Planting of Trees, is setting them in an Orchard at due distances.

Plants, are young Trees fit to be set.

Prune, is the cutting off of superfluous Branches or sprouts in a tree.

Propagating or **Increasing** of Fruit trees by peeling or cutting the Bark; it is done by tying Mortar and Clay about a sprig or young Branch, and then to cut the Bark all round between the Clay and the Tree: by means whereof roots will shoot forth in the Clay, and at setting time cut it off from the Tree, and plant it where you please.

Syen, is a cutting of a twig under a Bud or Knot, to graft in another Tree or Stock.

Shoot, see **Lance**.

Standards, are trees standing of themselves, not on Wall sides.

Scrambling Trees, are such as grow confusedly wide and spreading, and will not be kept in order.

Suckers, are sprigs or twigs which grow from the roots.

roots of trees. **Sprouts**: some call them **Sciences**.

Self Bore, is where the Bark of a tree grows round about an old withered Branch cut from the tree.

Transplant, is the removing of Stocks or Grafts, or any young trees from one place to another.

Verdure, is the greenness of leaves in Trees or Plants.

Whip Grafting, see **Grafting by Shouldering**.

Worms in trees, such as breed in trees between the Bark and Wood, through oldness of the Tree or sweetness of the Sap.

Wall-Trees, called **Walters**, are such as are planted at Wall sides, and are pinned up to the Wall.

6. **H**AVING done with Trees and Fruit, I shall now in the remaining part of this Plate, and in that following, give some examples of the Bearings and Affinity of Leaves, Flowers, and Seed-Vessels of some Plants, Herbs, and Garden Blossoms; but first I shall begin with the whole Plants, and then proceed to their particular parts.

LXIV. He beareth Argent, a **Stem** of a Tree trunked and raguled, the top having a round knot, with a self bore, and three branches issuing therefrom cross wise, coupéd or slipped, Gules. Others thus, a Knot or self Bore, with 4 slips, the bottom raguled: But I judg this best Blazoned, a long Cross trunked, **Now pierced**, the foot raguled, see lib. 1. chap. 5. numb. 108. 112. 22.

This is born by the name of *Prunellorve*.

LXV. He beareth Sable, a **Stem** of a Tree, Ir-radicated, and raguled, the top floppy, Or. By the name of *Malestomer*.

G 2 such in Salter A born by *Van Wardcotz*.

O on a hill in Base V 3 such coupéd on the top G born by *Trebach*.

LXVI. He beareth Argent, a **Wheat-stalk** slipped, bladed, or double eared, crolling one another, Vert; or double eared, crosséd, (or fretted or debrused) one of the other. Born by *Earely*, or *T. rley*.

Spelt-Corn, it is lesser and blacker than Wheat, it is found sometime single, sometime double eared, set, with a long Beard. This is an *Italian Coat*, born by *Aldebrand*.

O 3 such is born by *Maltigon*, an *Almaine*.

LXVII. He beareth Argent, a **Sprig** of **Hyslope**, flowered. It groweth in long sprigs, with 4 or 5 long narrow leaves in Tufts, at certain distances about the stalk; the flower is a blewish purple. Born by the name *Hyslope*.

The **Golden Hyslope**, hath the leaves partly yellow.

The **sagged or dented Hyslop**, hath only two long dented leaves at distances, on either side the stalk, between which and the stalk appears 3 or 4 small slender leaves smooth.

Savory hath only 2 indifferent broad leaves; but the following, called

Winter Savory, hath 4 leaves set at a joint; the flower a pale purple, set at distances on the top, with leaves under them in tufts.

Tyme, or **Mother of Tyme**, hath small leaves set round the stalk, with white purplish flowers, set with some leaves in roundles, round about the tops of the stalks.

The **greater Mother of Tyme**, hath but 2 leaves, and they something broad at the joints, with little small ones coming between them and the stalk.

Golden Tyme, is streaked with yellow.

A 3 Sprigs V born by *Tyme*, or *Tymes*.

Sweet Marjarome, hath 2 large broad leaves set on footstalks at each joint; with 4 small and narrow above them in the joint; at the top stands long and round scaly heads, or **knots**, from whence comes a white flower.

Marjarom gentle, some call it **Bastich**, hath a little broad leaf, four in a joint, the head is round, which groweth to a kind of Downy tuft, out of which comes white flowers.

Organy, or **Bassard Marjarome**, hath 2 leaves by couples in joints, being somewhat round, at the top stands several scaly heads or knots spiked, with whitish flowers; the root is like the Rape, red within and black without.

Goats Organy, hath 2 leaves, and little ones between them and the joint, the flowers stand at several distances about the top of the stalk.

Spanish Goats Organy, or **Marjarome**, hath a long and narrow leaf; in all other things like the other.

Basil hath two leaves at every joint, somewhat broad and round, yet pointed and snipped in the edges; the flowers are small and white, coming out of the top joints with two small leaves spike fashion.

Bush Basil, and **Indian Basil**, have the leaves thicker set on the stalks.

Field Basil, or **Beds foot flower**, the leaves and stalk hairy.

The **Mountain wild Basil**, hath 2 rough leaves with some smaller between them at each joint; the flower is in a head, together with leaves amongst them.

Stone Basil or **wild Basil**, they have 2 leaves at a joint, hairy with the stalk; the flower grows in rundels at every joint, and are white.

Poley, or **Pole Mountain**, have invecked leaves larger than any of the former, with a kind of a whitish hoary spiked head, with pale yellow flowers in a hoary husk.

The **Spanish** and **Purple Poley** have small leaves growing out between the leaves and stalk; and so hath the **candy Poley**.

The **African Poley**, hath very small and hoary white leaves set many together at each joint, all along the stalk by distance; the flowers grow at the top.

Dittany, a hairy stalk set full of leaves, two standing together one against the other, round broad pointed at the end, and hairy; at the top hang several scaly spired heads of stalks, out of which comes pale purple gaping flowers.

Prunellorve, at each joint 2 roundish leaves on short foot stalks, with 3 smaller between the flowers are white, set in roundles about the top of the stalk.

The **Peart**, or **French Penny-royal**, have at equal di.

distances many small, long and narrow leaves all along the stalk; the flowers purple.

Mint, or **Spear-Mint**, hath long narrow indented leaves in each joint; the flower is of a bluish colour growing on a spiked head, with leaves under them.

The **curled Mint**, hath a kind of jagged or torne leaf, turning and crisping, or crumpled every way.

Calamint, or **Mountain Mint**, like the ordinary Mint.

The **field Calamint**, the flowers set in each joint, from middle to the top, in a Whorle or Coronett about the stalk.

Pepper, at each joint 2 broad leaves nicked and hoary, the flowers grow in large tufts at the top, of a whitish purple colour.

Balm, hath two round leaves (pointed at the end) at each joint, on short foot stalks, and indented; the flower comes out at the top joints, gaping, and of a Carnation colour, some almost white, others Purple and Blew.

Unpleasant Balme, the leaves are set by pairs at the joints; those crossing them, be lesser themselves, and so to the top.

The **Assyrian Balm** hath rounder and shorter leaves on long footstalks, with fewer Indents; the husk is wide open like a round skin with 5 points, in the middle thereof groweth the gaping flower.

A 3 sprigs of Balm flowered proper. This is Born by *Balm*.

Mother-wort, hath 2 large leaves broad and long, and rough and crumpled, with many large indents and great veins at every joint, almost torne and divided by the indents; at the joints from the middle of the stalk to the top, grows the flowers round about at distances, in husks: of a red Purple.

Porehound, the leaves large and round pointed; rough and hoary; the flowers white and gaping, in rough husks about the joints.

The **Spanish Porehound**, the leaves invecked; the **French Porehound**, the leaf long and broad, and indented waveways.

Sage, it is of 3 sorts, either speckled with red, white or yellow, which is called gilt Sage; the leaves stand by couples at the joints, being somewhat long and broad, rough and wrinkled, the flowers come from the tops, set at certain spaces one above another, which are long and gaping, of a blewish purple.

In many Plants there will be small pieces of leaves, or small leaves growing at the foot-stalk, and the stalk which the Herballists call Ears or Fines. In *Egypt* and *Candy*, and hot Countreys, they bear an Excrement like small Apples or Berries, covered with Down or Cotton.

A 3 Sage Slips proper. Born by *Sage*.

French yellow Sage, hath rugged, hoary, broad, and almost round pointed leaves, many set together large and small, on either side the joint of the stalk; the flowers grow in roundles, towards the top of the stalk, yellowish and gaping.

Clare, or **Clary**, the leaves are long and roundish at stalk, set by couples on the stalk, being rough, wrinkled and hoary, somewhat evenly cut in on the edges or waved; the flower grows at distances, with two small leaves at the joints under them, like Sage, but smaller.

O a Clare Branch V born by *Cl. ry.*

Wild Clare, or **Oculus Christi**, the leaf indented. The **German Clare**, the leaf somewhat torn, or deeply indented on the edges.

Germander, the stalks set with small and somewhat round leaves, pointed and dented; the flowers stand on a long spiked head, gaping, and of a purple colour.

Jagged Germander hath the flowers spiky from the middle of the stalk, at every joint, with the leaves.

Bacchar, hath a long smooth leaf, set variously along the stalk, the same is divided into small branches on the top; at the ends whereof come forth diverse flowers on small foot-stalks, which are only small threads or thrums standing close and round, of a purple colour out of green scaly heads.

Centory hath one stalk with broad round pointed leaves, set by couples at a distance on each side; the flowers on the top, are of a Carnation colour of 5 or 6 leaves; they grow in an umbell or tuft. Some call this Herb the **Gall of the Earth**, or **bitter Herb**.

Starwort, hath a long smooth leaf, set variously along the stalk; the flower is like a **Marygold**. Some yellow, others purple, blew, &c. called the **Purple Marygold**.

Gromell, the leaves smooth, long and slender, like **Gillflower** leaves, set along the stalk, contrary one to the other, at the top stand diverse small white 5 leaved flowers in rough brown husks, with long leaves amongst them. Some have tufted flowers, with the leaves in a round under them.

A 3 such Sprigs flowered proper. Born by *Gromell*.

Sheepswozt, hath the stalk set with smooth, long and narrow leaves, green above, and hoary under; on the top stands a scaly white, silver-like head, with a thrum of a blewish colour, paled about with 12 or 14 small long pointed leaves, as a border.

Aegration, or **good old Herb**, it is a small shrub, very full of young shoots and slips, like the **Oregon** or **Marygold**, and hath its flower alike coloured.

LXVIII. He beareth Argent, a **Mullein**, or **Peth** **Mullen Bunch** flowered; the stalk is covered all over with broad and long whitish woolly leaves; the flowers come out on all sides, set like a long spike of a yellow colour, some white, of fine round pointed leaves. Born by *Don Mollien*, a *Spaniard*.

Black Mullein, the leaves nicked, with the flowers in the like spiky heads of Gold colour. **Jagged Mullein**, with the leaves jagged, or unevenly cut into.

Sage leaved Mullein, the leaves grow all the stalks over; the flowers in long husks grow all together in a head by several small stalks, umbell like, yellow, with red threads therein.

Woad, hath after the same manner, the stalk all covered with long and slender leaves, the top branched out with yellow flowers.

G a Wood Plant O born by *Woad*.

House-lecke, or **House-like**, it is an herb always green the top branches Bend the heads downwards, the flowers are many leaves Star-fashion, of a dark reddish colour, they grow on a stalk one above another, with a single leaf at the foot of every one of them: This is called generally with us by the name of **House-green**, Born in a white Field by *Wolick*.

The **House-leek** (is compared by one) for his colour to the **Harrygold**, for its roundness or figure; to the **Bulls-eye**. The leaf is thick, fat, and spungy, the end thereof is sharp, or like a tongue.

Scmgreen, is another kind of it, but much less; it grows upon Walls, and tops of Houses; some call it **temperbiva**, being always well liking and green.

LXIX. He beareth Argent, a **Calsidony** slip flowered, or **French Lavender**, it hath at distances many small or narrow, and long leaves, set in roundels; the flowers proceed out of a long, round, scaly head, of a blewish purple, after the manner of a **Thistle**.

The **long leaved Calsidony**, the leaves are long and slender, and grow thick on the stalk; but the top of the branch is bare without leaves, unto the head or flower; the same is the **dented leaf Calsidony**.

The **Spanish Calsidony**, hath a head like a thistle, of many threads or thrums 4 or 5 together on long stalks.

Candy Calsidony, hath a flower like a blew **Buttle**, of a yellow colour; or to a single **Harrygold**.

Lavender, hath 2 leaves long and whitish, one against another, along the stalk, from which riseth a naked stalk with 2 leaves at a joint, and at the top diverse small husks standing round about them, formed in long round heads or spikes, with purple gaping flowers.

Jagged Lavender, the leaves like **Fennel**.

Rosemary, all along the stalk is long, narrow leaves, and at every knot comes forth 2 blewish gaping flowers, out of a small husk. **Gilded Rosemary**, is tipt or pointed, or striped in the leaves, with a golden yellow; and **Silver Rosemary** with white.

Three slips flowered, is born by **Don Foix**, or **Foix**, a **Spaniard**.

LXX. He beareth Argent, a **Sprig of Sweet Wandeline flowered**. The leaves are nipt about the edges, the flowers set round together, of an equal height in **umbels** or **tufts**. There is a sort that have long narrow leaves and smooth. This is born by the name of **Morlarberg**.

Cott-mary, or **Alecoste**, broad and long green nicked leaves; the stalk in the top spreadeth into 3 or 4 branches, each having a tuft or umbell of yellow flowers.

Cansy, is a kind of a narrow thread like, and long leaf, or rather wings of leaves fixed to each stalk; the flowers are yellow, growing altogether in an umbell; and like buttons.

O 3 Spriggs, is born by **Corvvin**.

Double, or **Curled Cansy**, the leaves are close and thick, and somewhat crumpled together.

Mountain Cansy, a broader and thicker leaf, the flowers on the top branches are like **Camomill flowers**, with a border or pale of white leaves, and a yellow thrum in the middle.

The **great white Cansy**, or **Field Cansy**, is the same, having a broader leaf winged; the flowers stand upon long foot-stalks.

Featherfew, the leaves much torne, or cut in the edges, the stalk set with many leaves; at the top stands many single flowers upon several small foot-stalks, like small **Camomill flowers**. **Double Featherfew**, hath

*

the flowers with many leaves, so that little of the yellow thrum can be seen.

Camomill, is set with very fine leaves, bushing and spreading over the ground, the tops have flowers like **Daisies**. **Double Camomill** hath the flowers double. There are three kinds of them, one hath a Saffron coloured flower; another hath a purple colour; and the third a white; this herb hath that laudable preheminnence, that the more it is trod upon, the better it cometh up and prospereth.

Naked Camomill, hath the flower, a yellow thrummy head, without any border of white leaves about it.

Hayweed, hath a Fennel like leaf, and **Camomil Flower**, but larger, and hath no smell.

The **Oak of Cappadocia**, is a ragged and deep cut leaf, set by long foot-stalks upon the branches, without any order; at the tops of all the sprigs both great and small, stands the flowers, which are small, round, yellow mossy buttons.

Jerusalem Oak, the sprig full of unevenly dented leaves, like **Gumel** or a **Succory leaf**; from the middle to the top, at every leaf, is a flower, yellowish like to the **Blossom** of a **Aine**.

Hugwort, hath the branches set with a leaf cut in deeply about the brims like **Wormwood**. **Fruitful Hugwort**, the leaf more jagged and narrow, especially about the middle rib, and ending in a longer point; at each leaf there groweth 2 or 3 round berries, hairy all over.

Southernwood hath **Fennel** like leaves, but not so long; from the middle of the sprig hangs yellow flowers like buttons on stalks. **Tree Southernwood**, hath the leaves not so fine, but more like the **Wormwood**. Born by the name of **Southernwood**.

Lavender Cotton, hath a long winged, small leaf, set unorderly upon the stalks to the middle, thence naked to the top, where groweth a round head, which sendeth forth a yellow jagged flower.

Wormwood, the stalk set one against another, with leaves divided or cut into many parts; the flowers are many small buttons, with pale yellow flowers in them, growing spiked.

White tufted Wormwood, hath thick, broad, hoary leaves cut in about the edges, in some places more than others, narrow at bottom and broader at the point, from the stalk set here and there with smaller cut leaves, riseth a branch, which hath each a scaly Silver like green head, out of which comes a flower of many leaves silver white.

Lavender sea Wormwood, the leaf divided into 5 long and slender leaves fixed on a foot-stalk.

Spicknard, or **Galatian**, hath leaves like the **Primrose**, growing in bunches, out of which comes a stalk set with jagged leaves, 2 together at a joint, on the top stands reddish flowers, thick mass together in an umbell.

The **great Galatian**, hath a jagged or divided leaf on each side, some to the middle rib, being winged as made of many leaves together on a stalk, branched on the top with many small whitish flowers, coming out of husks.

LXXI. He beareth Argent, a bunch of **Mountain Avena**, with the flower inverted. The leaves are wing-

M

ed,

ed, made of many small leaves towards the bottom standing on both sides the rib, the end leaves being large and whole, but indented on the edges, the flower is of a deep yellow, having many yellow threads in the middle.

The **Purple Mountain Avens**, is double rosed; and the leaf like a **Rose** leaf 3 together (or trible pointed) and a long stalk, having here and there on them, some small divided leaves.

The **Cinquefoile Avens**, hath the leaf divided into 5 parts, like a **Cinquefoile**, dented about the edges, which are without foot-stalks, fixed at every joint; the flower a little pale yellow one, of 5 round leaves, with many yellow threads, something downy in the middle, that after grows to a round hairy head.

LXXII. He beareth Sable, a slip of **Sea Spurge**, Or. 3 such born by *Contriver*.

Cypress Spurge, hath the scaly leaves contrary way, down to the stalk.

2 slips of **Sea Spurge**, the highest row of leaves Gules, the next Argent, and so changeably, is the Crest of *Van Reden*.

Out of a Coronet O 2 slips S is the Crest of *Reb-lincer*.

On a Cap B turned up Losengy O and B 2 such Sprigs A born for the Crest of *Mallen van Ulmen*.

The same is the Crest of *Brumser van Rudenheim*, with the turn up of the Cap Ermine.

Out of a Lamp parted in three S and A a like sprig is the Crest of *Van Wildenberg*.

LXXIII. He beareth Argent, the top of a **Laurel** sprig berried, out of Base. The leaves are longer and softer than **Bays**, the Berries black. Born by the name of *Lawrence*.

A the like proper. Born by *Kornich a Portuguese*.

A 3 such tops of Laurel sprigs coup'd, is born by *Don Carnato of Spain*.

LXXIV. He beareth Argent, a **Stavesacre** slip. The leaf is six pointed, each containing 3 dentals; the flower is a deep blew, and groweth at the top of the branch spiky one above another, that turn to horned seed Vessels.

LXXV. He beareth Argent, a **Sprig of Sena**, having a **Bloom**, a **Blossom**, and a **Pod**, on the top of it, proper. The Flowers are yellow, and the cod of a yellow green.

The **Scorpion Sena**, hath the ends of the pods sharp and bending, and grow 3 or 4 in a bunch. This is born by *Senagge*.

Greenweed, or **Diers Weed**, hath a number of small green stalks, whereon grow without order, many small long leaves, and yellow flowers at the top, spike-like, which turn to small pods; it is called **Woud** or **Weed**.

Cassia, or purging **Cassia**, the leaves are smooth, being 2 together at the top, and by pairs set on the stalk, the flower is yellow, many growing together, which comes to a very long round cod.

The **Sweet Bean**, or **Carob tree**, hath the leaves smooth, round and pointed at both ends, the Pod is crooked, turning and slender; yet broad in the husk,

which proceeds from a long **Catkin** in the Winter, that in Spring-time openeth into Purple flowers.

Tamarind, hath a long vvinged leaf, smooth, and set close together, the Pod is like a half Moon.

The **Nut Ben**, hath long pointed leaves, round at stalk, vvinged at a pretty distance; the Pod or Nut is enclosed in a single husk, sometime two in the husk, each by it self, the other part streightned betwix them; see *numb. 47*.

LXXVI. He beareth Argent, a branch of **Purging Thorn**, fruited. The Flower is whitish green, of 4 leaves, that grow to black round Berries.

Cammock, is an herb thoroughly beset with Prickles, in some places called **Rest Harrow**, and **Whine**, the leaf is like **Rue**, it groweth most in tilled ground.

LXXVII. He beareth Argent, a slip of a **Jujube Tree** fruited. It hath a nicked leaf set on both sides the branch one above the other, at each leaf is a small yellowish flower of 5 leaves, from whence comes a red berry, large as an **Olive**, and of it make with a long stone in it.

LXXVIII. He beareth Argent, **flower de luce** slipped, the leaves are long and sharp edged like a **Sword**; the flower blew, with the turned down leaves, a thrum of yellow, there are both yellow, white and purple of them. This I have set here, to shew you the true and old way of Drawing the flower de luce, after which form it ought to be made.

LXXIX. He beareth Argent, the **Libard bane**, or the **Leopard-bane**, or **Uenemous Berry**, leaves and root. Born by the name of *Cucumber*. It is a rough hairy leaf, like the **Cucumber**, full of Veins, of a blewish green colour, the root knotted like a **Scorpions Tail**; if it be drawn with Berries, the stalk hath 4 small leaves set by couples; the flowers are many, growing in a tuft of round head together, of a yellowish pale colour, with many yellow threads in the middle, as saith *Ambr. Pars, fol. 609*.

The **Scorpion rooted Wolfs-Bane** set forth by *Parkinson*, in his Herbal, fol. 320. resembleth this, only the leaves drawn smooth, somewhat waved, or unevenly dented about the edges; the flowers are yellow, somewhat like the **Corn Marygold**, having many narrow long yellow leaves, as a border set about a middle thrum, which when they fall away, turns to small whitish Downe, the root runs taper-wise to a small point, which hath small fibres at it; the whole root is in joints like the **Crocodiles Tail**, or the **Catus**, or **Guinean Beast**, and white. This is born by the name of *Gwinberkentz*.

LXXX. He beareth Argent, a slip of **Wake Robin**, or **Cuckow Pintle**. The **Hose Husk**, is a yellowish green; the Pestle or Clapper, Purple, the threads yellow, and the berries white; and when the Pestle decayeth, the Berries grow large and red. This is of some called **Friers Coule**, because of the hooding of the Pestle, when it is springing forth. This is born by the name of *Pooreman*.

LXXXI. He beareth Or, a **Ciper Bugloss** of **Cay**, slip. The stalk is set round and full with long

leaves, out of which riseth several small hand-like flowers, round; at whole top, stands open tuft of yellow flowers, in long rough husks. This is born by an *Italian* called *Figon*.

LXXXII. He beareth Argent, out of a *Hill*, or *Mountain* a *Plant* called *Jobs Tears*. It is a jointed stalk, at every joint is a long narrow leaf, like to *Millet* or *Beard*, at each cometh forth one round seed, rased in some husks, round at bottom and pointed at end, whereat hangs 2 or 3 chaffy husks or beards, like small *lark ears of Corn*. This is born by the name of *Jobe*.

LXXXIII. He beareth Argent, a *Spig* of *Turnsole*, at the leaves comes forth three berries, on short foot-stalks, round and rugged, and of a blackish colour; which live within them a juice, or moisture of a purple colour, of which that *Turnsole* is made; fold by the *Dru* 3 *Turnsole* slips with berries are born by the name *Turnsole*.

LXXXIV. He beareth Argent, a *Spig* of *Bugle*, with bluish coloured Flowers. The like slipped is born by *Bugles*.

Common Bugle, hath a broad smooth leaf with blew flowers.

Saint Peters wort, smooth and straight veins through the leaves, like *Plantain*; it hath a yellow star-flower with threads in the middle, in a short green husk.

Saint Johns wort, like to them, the stalk brownish spreading into many branches, having two small leaves set one against the other at distances of a deep green colour, and full of small holes which cannot be discerned but between and the light; at the tops of the stalks stand yellow Flowers made of five leaves a-piece, with many yellow threads in the middle (which being bruised do yield a reddish juice,) after them succeeds round heads which contain black seed. Some of this kind have the Flowers in circles at the joints, as well as the tops.

The *Woolly Saint Johns wort*, hath the branches hoary white and woolly; the Flowers are paler and smaller Flowers. This is called of some *creeping saint Johns wort*, because it lyeth on the ground.

The *Indian Saint Johns wort*, hath woody stems, covered with a whitish bark, from whence springs divers branches, set with leaves one contrary to another, which are narrow below at the stalk, and broad and round at the ends; sometimes two or three at a joint, at which said joints riseth divers white flowers of four leaves, pointed white with a little purple in the middle.

Cutlan, or *Park leaves*, the same; with yellow Flowers, which turn to a round seedy husk, of a purple colour.

Iron-wort, leaves hairy; Flowers gaping, of a pale purple.

Mountain Iron-wort, the leaves long and slender, the Flowers purple and white, gaping.

Dragon flower, leaves broad in the middle, and dented with long foot-stalks; with gaping Flowers.

The *French Catch-flie*, hath at the top, and joints below, many Flowers together standing in clusters, very small and short foot-stalks, in husks of a greenish yellow colour.

Sope-wort, have the leaves ribbed like *Plantain*, the Flowers grow only on the top in bunches, consisting of five leaves round at the ends, and a little dented in the middle, of a pale Rose-colour, in husks on short foot-stalks.

Cy-bright, the leaves are finely dented and grow two together very thick, and from the middle of the stalk upwards, comes forth white gaping flowers, spotted and striped, with purple and yellow.

LXXXV. He beareth Argent, a *Bunch of Treacle Mustard leaves*, with a seed sprout. The Flowers are white, which grow to round long pods, upon short foot-stalks. This is Born by *Bunger*.

Princes feather, hath the leaves invecked, the Flowers grow in branches, consisting of five pointed leaves, with a round yet pointed stile in the middle; set about with chives, tipped; all white, spotted with purple. This is Born by *Fathesoe*.

LXXXVI. He beareth Argent, a *Pease-stalk*, with *blomes*, and *Blossoms* on the top, and *leaved* and *coded*, with its *claspers*, all proper. By the name of *Peas*.

Cich-Pease, or *Rains Ciches*, or *Cicers*, have winged leaves, six and eight on a side, some smooth, others dented, the Flowers, are a pale yellowish colour.

Wood, or *wild Orobis*; the Flowers white, the cod black, and the leaf is long and arrow, one in a place.

Cocks head, is a small Cod, with *Uitch* like leaves, the Flower is pale red, and grow spike-manner.

LXXXVII. He beareth Argent, a *Bean-cod erect*, Vert. They grow upright, the leaves winged, consisting of three or five smooth and round leaves, pointed at the ends; the Flowers stand two or three at the joint of the main stalk with the leaf, and are of a light purple, some white, others of a reddish colour.

Greekish Bean, have the stalk with two edges, lying on the ground if the small tendrels at the ends of the winged leaf have not something whereon it may ramp or rise. The Flower is a dead or fullen purple, pale at the bottom.

A 3 Bean Cods bar-ways, two and one proper. Is born by the name of *Hard-bean*.

G 3 Bean Cods pendant O born by the name of *Beane*.

LXXXVIII. He beareth Argent, a *Rose* with a *spring Imbowed*, (or *recurvant*) leaved and slipt, proper. Born by the name of *Round*.

A the like with the spring imbowed circularly from the Rose to the dexter side, proper. Is the Arms of the Town of *Rosenheim* in *Germany*.

O a Cock standing on a spring G which circles him almost about the Leaves V is the Coat of the Town of *Dorham*.

A 3 berries S on foot-stalks at the end of a spring slipt imbowed circularly from base to base sinister V born by *Winsbury*.

LXXXIX. He beareth Or, a *stone Mushroom*, proper. This usually groweth among stones, and old decayed buildings, being of a greyish black colour, full of white lines and strakes, on the upper side, embowing a little from the middle to the edge, being hollow within

like a **Bell-flower**. Three such is born by the name of *Mushroom*.

XC. He beareth Argent, a **twigg wreathed** in form of the figure of 8, (or wreathen and fretted) leaved at the ends, and out-sides, Vert. By the name of *Wreithen*.

A the like G born by *Van Heinach*.

A a like twig G born by *Van Seckendorfe*.

A the like only crossed at the ends G by *Reinhofen*.

B the sprig with a leaf at the ends, and one in the circular part; the rest **trunked** or **regulated** A born by *Stardinger*.

XCI. He beareth Or, on a **Chapourn mounted** in Base, Sable; two Oak-twigs, **homed** and **imhomed**, fretting each other, **fructed** and **leaved**, proper. Born by the name of *Van Marschenstheim*.

S the same O born by *Ayche Van Herngiesdorf*.

XCII. He beareth Argent, out of an **Heart**, Gules, a **Sprig double topped**, Sable, each having three Berries on short foot-stalks, Azure. This is born by the name of *Truchengens*. **Dens Hearts** are often born with one or two, or more slips, of various leaves and flowers, which are to be Blazoned according to this example.

Party per Fesse G and O an **Heart** and **Spriggs** counter-changed. This is born by the name of *Hertwig*.

XCIII. He beareth Azure, a **Flower de lis**, Or, on each top, a **tuft**, Argent. By the name of *Flower-top*.

And thus you shall have several sorts of flowers, leaves, and other things, adorning one another. This is born by the name of *Flowerdorse*, viz. A the Flower B and tufts V.

XCIV. He beareth Argent, a **demy Flower de lis** fixed to the Sinister side, Purpure. By the name of *Hanser*.

Thus **Roses** and other **Flowers** are born by the half, sometimes fixed to the Dexter, some to the Sinister, some to both sides; some also in Chief, others in Base.

B the like in Base O born by the name of *Billinger*.

Party per pale A and G a demy **Rose** and **Flower de Luce** conjoined, counter-changed. Born by *Langen*.

Per pale B and G a Fesse A a demy **rose** on the first, and a demy **Flower de luce** fixed to the Dexter side of the latter O by the name of *Van Kesselberg*.

Per pale G a culter in bend point upwards A and of the first a demy flower de luce fixed to the Dexter side, of the second. By the name of *Van Denstat*. This may also be Blazoned G a culter in Bend, and a demy flower de luce A.

But herein there ought to be notice given, which side of the flower is rebated or taken away, as in the next Coat.

A 3 demy flowers de lis rebated on the sinister side G born by the name of *Van Mulwitz*.

G a demy flower de lis, in Bend Sinister rebated on that side, and a **Rose** O born by *Van Konitz*.

TO

The Right Worshipful

Sir ROBERT COTTON of Cumbermare *Knight and Baronett*,Sir HENRY BUNBURY, of Staney, *Baronett*.

AND

Sir PETER PINDAR of Chester, *Baronett*.

Right Worthy Sirs,

Such an itching desire some have to be known in the World, that rather they will be accounted Fools in Print, than by silent Pens to be esteemed Wise. For my part my Ambition herein was only to add my Observations, which was never before taken notice of in the rules of Heraldry, (therefore new to some,) though it is but to reform and advance what hath been done by Others. Which in the Conclusion is humbly Dedicated to your secret Memories and Posterities by

Your most humble and devoted Servant
Randle Holme.

CHAP. VI.

IN the beginning of the last Chapter, I began with the affinity of leaves, belonging to Trees and Fruit. In this (to conclude the Treatise of Vegetables) I shall follow the same method, in Flowers and Plants, under these heads.

First, the terms or names given by Herbalists and Artists to Leaves, according to their form and tribe.

Secondly, the terms given to the Heads of Flowers according to their manner of growing.

Thirdly, the terms of flowers, how called, and in what order they grow, and with what kind of leaves.

And last, which moves me into it, is only to give you the names of plants, as Gardiners use, not that these are in Coats of Arms, except some few.

I shall begin with a double pointed leaf, as pointing at both ends. Of which kind of leaf these following Herbs and Flowers are of kind.

The *Marigold* hath long leaves, the leaves are long and slender, and grow all in bunches from the root. The flowers grow on a branched stalk, being many small long leaves white, out of a green scaly head.

The *Sea purge* shoots out in branches from the root, all set with long pointed leaves, one against another; the

flowers are five small leaves a-piece like a star, pendulous, or hanging down from a branched stalk, of a sad purple colour.

The *Spurge Olive* hath a leaf long and slender, with one vein through it, at the top of the branches grow divers white flowers, of 4 leaves.

The *White Mustard* hath a long and slender leaf, growing on branches; the flowers are small and yellow, and come between the leaves, and the stalk.

The *Dianthus* or flowering *Carrot*, have one sort of them, a pale, the other is red, and grow on flexible branches, being with many long leaves.

The herb *Cutwort*, or trouble *Belly* grows in branches with small leaves; the flowers are white and small, and grow together in a long row.

The *Marigold* hath long and broad leaves, hairy at both ends, growing in bunches from the root, and the flowers are all yellow, and grow in branches.

The *Cuning* or *Worm* grows in branches, two leaves are joined, from whence also proceed several five pointed flowers, of purple reddish colour, with a green pointil, compassed about with five dark yellow chives, from whence grows a double bending Cod. See chap. 5.

unb. 46.

II. Is an **Oval leaf pointed**, or pointed at the end: those that are of this Tribe, are,

The **Tobacco**, which grows in tufts from the root, then shoots into branched branches, beset with leaves at each joint; the flowers grow in branches being a pale greenish yellow cup-flower, with an invected turning-out brim, set in a midling **Hose**, or **Husk**.

The **Indian leaf**, the edges are waved, or un-evenly cut.

The **Burrage leaf**, is long and hairy, and rough; a kind of crumpled and uneven cut leaf, without any foot-stalk, set to the sprig or branch.

Hounds-Tongue, a long narrow sharp pointed leaf at both ends; grows in tufts, the tops are branched with a small leaf at every branch, and flowers all along the same, which open by degrees, as the flowers do blow; which consist of four small purple red leaves, scarce shewing themselves, out of a rough green husk, with some small threads, or pointils in the middle.

Pepperwort, or the **Dittander leaf**, is dented about the edges; the Flower is small and white, growing in branches, on short foot-stalks.

Gomfrey, large and long hairy rough leaves, growing on a stalk; at the top is a bunch of Flowers like bells, in short husks of a white colour; being on several long stalks, set one above another.

Gomfrey with purple Flowers hath smooth leaves.

Handrake leaf, is a long broad leaf, sharp pointed; the Flowers are pale green, of five round leaves, standing in a green husk with five points, from whence proceeds the fruit, which is as large as an Apple, of a Gold yellow colour.

Mint, or **Spear-Mint**, the leaf nicked, the flower grows on a spiked head, and are of a bluish, or purple colour.

Pellitory of the Wall, a long pointed leaf, and rough; at each leaf, from the middle of the stalk (which spreadeth into branches) stands small pale purple flowers, in hairy husks, or rough heads.

Penny-Royal, grows in branches, the Flowers are some white, or yellow, and some purple, and grow in roundles at the tops. The stalks shoot forth small fibres, or roots at the joints which fasten themselves in the ground, and so become new sprouted stalks.

Balm, the leaf pointed, and a little dented in the edges, they grow by couples on the stalk, at each comes forth a small gaping Flower, of a pale Carnation (almost white) colour, in a husk.

Campton, hath a leaf full of veins, growing on stalks, the Flowers are on branches, some white, some light purple, others peach-colour, containing five round invect leaves, set in a roundish long husk, furrowed and divided into five points.

None-such, or **Flower of Bristow**; is a small Flower of many leaves, round at end, set in a hose or husk growing at the top of the stalk many together in a tuft, or umbel like, with slender leaves amongst them.

Swallowwort, a long slender pointed leaf, growing by pairs on a stalk, with which from the middle comes forth small white flowers, of five pointed leaves.

Bugle, broad leaves pointed, growing on a stalk, with little foot-stalks; the Flowers are bluish, growing spiral at distances, with leaves smaller and smaller, to the top, amongst them.

III. Is an **Heart leaf**, because it turns inward at the foot-stalk, like to the Heart.

Hechacan of peru, the leaf sharp at point, turning thereat a little crooked, it groweth up like hops, by help of a pole, it beareth berries in long clusters, of a yellow colour, and some of a whitish colour.

Rattle Snake-weed; the leaf sharp pointed and bending, set one at every joint of the branch.

A 3 such Leaves V is born by *Van Ratlesnag*.

B 3 such O a Cheif A Born by *Hilrid*; also by *Bonarmas*, two *Polonian Families*.

IV. An **Adder Tongue leaf**, or a long pointed leaf byforked at the bottom; or a three square leaf, sharp pointed; or a leaf with a forked bottom.

Sorrel, groweth out of the earth in bunches, each on its own stalk, till it come to seeding time, then it shooteth up a small tender branch, with flowers and seeds of a reddish colour; the leaves are long and smooth; of which Cooks makes their Green-Sauce, being of a harsh-taste.

The **Britannick**, or **English herb**, it hath the look of the largest **Sorrel**, but of a more black colour, being mossy and mealy.

Byony, is a long winding, or waved leaf, rounded at the stalk, it groweth like **Hops**, by help of a Pole; the Flowers are white growing together in a long tuft like **Stars**. The branches therefrom are black, and are further in sunder than bunches of **Grapes**. Called of some, **Wild Vine**; and **Dog-berries**.

Creacle Mustard, hath the leaf longer.

Hearts Tongue, leaf long and slender, all of a breadth and round at end, streaked on both sides the rib, with small long brownish marks, the bottom of the leaf bowed a little at each side to the stalk, being sharp at the end.

Jagged Hearts Tongue, is the same to the other, only the tops of the leaves jagged, and cut some more, others less.

Buck-wheat, a long pointed leaf, broad about the middle, and round byforked at the stalk; the Flowers grow at top in clusters, all white, much like a knotted head of Flowers.

Bloodwort, a long slender leaf, sharp pointed, and round at stalk.

Bind weed, long waved sharp pointed leaf, biforked at the stalk; the Flower is a white bell, wide in the opening, or brim.

Bind-weed with purple and blew bell-flowers; have the brims turned like the **Mallow**-flower, and divided into five, some six points or indents. It hath clasps and tendrils, by which it supports it self.

Scamony, hath the bell-flower white, with wide open brims and narrow bottoms, set in a short foot husk; the leaf something bending or waved, these last grow like **Hops** by poles.

Syrian, or **Arabian**, **Aromatical Reed leaf**, is long and waved, the stalk is divided into branches, and they into others, two at a joint which bear small yellow Flowers.

Wake Robin, or **Cuckow Pintle**, the leaf waved.

Fryers Coul, the leaf round at the end, then shooting into a point, with the points, rounded at the stalk.

Second sort of **Adders Tongue leaf**, (or long pointed leaf) byforked to the stalk; is termed, an **extrinsecal**

real Adders Tongue leaf, or an **Adders Tongue leaf** externally biforked; that is, having the biforkedness of the leaf (which in the former points to the foot-stalk) in this, they point outwards; which may in English be called an out-pointed Adders tongue leaf.

Hule Fearn, the leaf marked like to Harts-tongue, and bowing on each side the middle rib, like a half-Moon; or an hollow roundness at the bottom, and unevenly dented or waved about the edges.

Third sort of **Adders Tongue leaf**; is that which is biforked to the point of the leaf, and is termed an **intrin-fical Adders tongue leaf**; because the biforkedness, or the bottom points, turn inwards to the sides of the leaf.

West India Potato leaf, is much more veined here and there; this is called also the **Negro's**, or **Mozocco Potato leaf**.

G three Adders Tongue leaves (the like to the example) V is the Coat of *Alagoras*, a *Spanish Family*.

B a Fesse between 3 such O born by *Browneslane*.

V. The **Adders Tongue leaf**, double parted, or **double forked**, both outward, and to the point. 3 such V in a Field O born by *Sharfall*.

Hule Fearn eared leaf; this differeth from that before, *numb. 4* having a small ear, or piece of leaf set on each side of the forked bottom, which makes it double pointed.

Spinage, hath such a leaf; some only our-forked, others double forked.

Valerian, the points of the leaves more round pointed, as if five leaves were set together being winged, branched at the top with white flowers dashed on the edges, with a pale purple, in husks, growing together in tufts.

VI. An **Eared leaf**; that is having two small leaves growing to the leaf, or at a distance from it on the foot-stalk, a **finned leaf**.

Snake-weed, or **Bistort**, the leaf hath a small fin at the stalk, long and narrower downwards; on the upper side the leaf blewish green; and under ash-colour grey and purplish; being full of veins, bearing a spiky bush, of pale flesh colour flowers.

Broad leaved **Sow-Chistle**, is broad at top, triangular indented from thence, a long the stalk or rib; it is rent and torn with fewer division on the edges than the **common Sowthistle**, the Flowers are white.

Great **Mountain Sow-Chistle**, the leaf parted into four, sometimes five divisions, placed on each-side, one against another, from the upper leaf, each less than other to the bottom, all indented or uneven cut, set with pricks on the edges. The top parted into branches, the Flowers set together umbel like, of a yellow colour, with a more yellow thrum, on a foot-stalk within a long husk, or hose, cut in the top.

Wood Night-shade, leaf hath the two ears joynd to it by an half round; at the top comes forth Flowers, in an umbel, long-wile of a purple colour, of five long narrow leaves, which turn backward to the stalk, with a long gold yellow pointil in the middle.

Wolf Bane of Austria, hath the two leaves joined to the great one, by a half round fin; the Flowers on branches like **Marygolds**, all yellow.

Jews Wallow, at bottom of leaf a long pointed ear, which ends in a long thread, or crooked tendrel.

VII. A **Cresfoil leaf**; that is three leaves joined at the beginning of the foot-stalk; or a long pointed **Cresfoil**.

Strawberry, **Raspis**, **Mountain Avens**, and **Black-berry**, alike.

Wild Fenugreek, leaves with deeper dents about the edges.

Parts foot, the leaf round pointed, and endented set at a very little distance, the Flowers yellow, standing in long spikes, thick one above another. It is called also **Weslot**, or **Kings Clover**.

Brier, or **Bramble**; the leaves set at a little distance on foot-stalks the flower white, of five leaves, with a thrum of yellow, which after turn to Black-berries growing altogether in a knot, bulbes like; there is the **Garden Brier**, which is sweet; and the **Field Brier**, which is not.

Bean Cresfoil leaf, is smooth, set at a little distance on short foot-stalks.

French Bean, or **Kidney Bean**, have three smooth long pointed leaves, standing at a little distance on short foot-stalk; the flowers like other bean, but grow spiked on a long stalk one above another; some white some scarlet, others purple, which grow to a fat (but narrow) long Cod.

B 3 such V on a Fesse O is born by *Lachinsford*.
A a Chevron between two and a Rose. Is born by *Arelan*, a *Spaniard*.

VIII. A **Cresfoil leaf gradually eared down the stalk**, or **finned down the stalk**, or a-long the foot-stalk.

Annise, or **Anniseed leaf**, is three at the head indented, onely on the top and two more at a distance set on the stalk without any foot-stalk; the Flowers are white, growing in an umbel.

Night-shade, hath a long and slender leaf at top, with two small ones near joining; and at a distance two large leaves, on foot-stalks a little uneven; the stalks branched which have white Flowers of five small pointed leaves with yellow pointils, of four or five threads set together; they grow on stalks, one above another, spiked in most places, it is called, **Gold-Anape**, or **yellow Trace**; for the Golden colour Fruit.

Avens, hath a winged leaf, made of many small leaves towards the bottom, growing less and less, and set at a little distance, the end-leaf being large and whole, resembling three round endented leaves.

Radish leaf, is roundish at the top growing less and less to the bottom; waved, and set at the rib, without any foot-stalks.

Virginian Potato leaf, is round pointed, smooth and all the winged leaves of an equal distance and bigness, with foot-stalks.

IX. A **winged leaf**, that is, many set on both sides of a middle rib, growing one above another; some having six, eight, or ten leaves on a side, and one at the end: or some called a **stalk of Leaves**. As

Sensitive Plant, or **Herb of Life**, is a rib with small long smooth leaves, set together without any foot-stalks, growing in tufts.

Sena, or **purging Sena**, narrow pointed leaves, three on a side and smooth; the Flower is yellow, of five leaves round at end, which after turns to a Cod.

Sena

Sena of Italy, and Alexandria, and Bassard sena; have the leaves round at the point, and set to the rib without foot-stalks.

Angelica, the leaves broad towards the stalk, and long pointed, and indented, the Flowers are white, in an umbel.

Parship leaf, closer together being broad and long, dented; having the bottom leaves much longer than the topmost, growing pyramid-wise.

Water-crelles, have the leaves round and pointed, three on a side, and smooth; set not one against but contrary to the other; the Flowers are white, standing on foot-stalks one above another, which grow to small pods, like horns.

Italian Water-crelles, have the leaves indented.

Allheal, hath a leaf round at stalk, and is a smooth long leaf, sharp pointed; branched or divided, each bearing a tuft, or umbel of yellow Flowers.

Burnet leaves are long and nicked, with an umbel of white Flowers at the head of the branches.

Lady-smock, many small slender leaves on each side the rib; with a stalk of white flowers on foot-stalks. Some bear double flowers.

Huscovy, or Husk Cranes-bill, hath the leaves cut into many parts; the Flowers are red and crimson, blew and white, and striped; they grow on a stalk with a tufted head, consisting of five leaves in a husk which proceeds to a long beak, or bill: see numb. 88.

Rams Ciches, or Cicers, or Cich-Pease; hath seven or eight dented leaves on a side the rib; at the top of the stalks come forth many tufts of Flowers, thick set together; of a pale yellow colour, after the manner of a Pease-flower, which groweth to a rough cod, small pointed.

Wild Cicer, or Cich-pease, have the leaves smooth.

Cassia, the leaves are smooth, having two together at top, and two on each side, long pointed; the Flowers are yellow many growing together on a long stalk, of four or five round leaves, with many green threads standing about a small long crooked unbone, or horn; which groweth to a long slender pod.

Goats Rue, upon the stalk groweth at every joint long winged leaves, which are small and long, and pointed at the end, and smooth on the edges; the top is branched, upon each stands many leguminous, or pulse like flowers, of a blewish purple colour, one above another in spikes; in some plants they are of a pure white, which after turn to round long pods a little bunched out in some places, wherein lyeth seed, like the **Uetch,** or **small pease.**

Queen of the Meadows, or Meadow Sweet, or Head Sweet: It is a winged and dented leaf, standing one above another, at distances, upon a reddish rib; which are fixed sometimes to the mean stalk, which hath on the top many tufts, or umbels of small white flowers, thrust thick together. This plant hath the two lowermost leaves ever much less than the other, and sometimes small cares, or eared leaves between the large ones, the leaves are of a sad green on the upper-side, and greyish underneath.

English Maiden-hair, hath from a fibres root, many blackish shining brittle stalks, each side set very thick with small dark green leaves, round pointed, and spotted on the back: they grow spiral, the leaves smaller all along

to the top, from what they are at the bottom of the stalk.

Spleenwort, hath divers stalks of leaves, rising from the like root, cut on both sides with uneven divisions, dented on the edges with sharp points; and grow spiral.

Maiden Hair, is a long rib set on both sides with a fine delicate, and almost three-square, leaves; dented on the top (or curving unevenly) without any (of very short) foot-stalks, the leaves grow pyramid-wise, the least at the top, and so bigger and bigger down the sides; being 20, 25, or 30 leaves on a side, all marked on the back, with many small brown spots.

Centory, the leaves long, four and five on the side, the rib deep dented; the flower like a Thistle, of a pale blew colour, growing on branched stalks.

Yellow Centory, hath the leaves seven or eight on a side, which are both long and slender.

Celandine, the leaves long pointed at both ends, set on a rib two and three on a side, each leaf divided into many parts, and each of them cut in on the tops of the edges; the stalks are full of a yellow sap, or milk; at the top of the branches are gold yellow flowers of four leaves a-piece, out of which comes small long pods. Some write it **Celedony.**

Pease, the leaves are round at the end, four or five on a side, the flower is white, (some a light red gaping flower) that turns to a **Peascod.**

Uetches, Lentils, Cares, have leaves like Pease round at end, and pointed on the rib, but small and little leaves, eight, ten, or twelve on a side, the flowers like **Pease.**

Diobus, or the bitter Uetch, hath many long and slender smooth leaves on the rib growing pyramid, and the top ends in a sharp point, or wreathing clasper.

Licorice, the leaves are smooth, five and six on a side.

Fearn, the leaves are nicked almost to the middle vein of the leaf, and set contrary one to the other on the great rib, the bottom leaves being much longer than the top-leaves, growing pyramid-wise.

X. A **winged jagged leaf.** That is having the leaves deeply cut in on the edges.

Agrimony, hath divers long leaves, made of many set upon a stalk, some greater, others lesser, all of them indented about the edges; green above, and grey underneath, a little hairy withall; on a stalk grow many small yellow flowers one above another, in long slender spikes. It is also called **white,** or **wild Tansy.**

Curled Cresses, the leaves cut and roundly dented, and curled about the edges; the flowers are white, on long spikes one set above another.

Mustard, the leaves are small and jagged, set together by small fins, running along the rib, and are unevenly cut; or dented; the flowers are yellow, growing along the branches which turn to small pods, hanging one above another.

Round rooted Readish, hath jagged, and deep cut leaves, set at a distance; round, and without foot-stalks.

Smallage, the leaves consist of three parted leaves; each part deep dented, four and five on a side; the flowers white, in umbels, or thick tufts.

Filipendula, or **Drop-wort**, hath divers winged leaves, long, dented about the edges, and set close together on each side a middle rib, like **Burnet**, with **Cantary**, or **Agrimony**: the stalk hath such leaves thereon, spreading in the top into tufts of white flowers, of five pointed leaves a-piece, with some threads in the middle of them, each standing upon a small foot-stalk.

Gilfoil, or **Parrot**, hath a long winged leaf dented, the flower is white, growing in tufts, or umbels; some call it **Rose-bleed**, it is a short Set or shrub, the leaf like a Bird's **Feather**, dented by cuts, and are sharp also like the **Cumin**.

Corn Parsly, hath sundry long and winged leaves lying on the ground, deeply dented, set close on a middle rib, and pointed; the stalk hath the like leaves at the joints, but less branching on the top, each having small umbels, of white flowers.

English Sea-Fern, on a stalk are placed many rough, thick, shining, blackish, green leaves; broad in the middle, long and pointed at both ends; finely snipt about the edges; with brownish marks on the back, like **land Fern**. These grow from a brownish root, composed of a multitude of threads.

The second is a winged leaf double set, or a double winged leaf, of some termed a **Flie Winged leaf**; because set by pairs against one another on the middle rib.

XI. a Branched Winged Leaf, a Winged Leaf of many parts, or **Winged and Divided Leaves**, that is when the lower winged leaf fixed to the maine rib containeth as many leaves as is on the stalk above it: or from the top leaf each exceeds other in the wing as is above it.

Hemlock, hath set at the joynts very large winged leaves, which are divided into many other winged leaves, one set against another indented; branched towards the top, where it is full of umbels of white flowers.

Parsly, hath upon the rib, or stalk on the top, a three parted leaf, each dented on the top; below it on short foot-stalks is set two such like leaves on answering the other; at a distance below them, on a long foot-stalk, is set on either side such a like winged leaf containing three leaves a-piece; below them again, is set on either-side at a distance on a longer foot-stalk, another winged leaf which containeth as many leaves as is above it, growing altogether pyramid-wise; the bottom leaves still exceeding them, next above it: thus Parsly is winged, for three or four winged leaves on the side of the main rib; the Flower is white growing in umbels.

Sweet Cilley, or **Chervil**, the leaves are much cut and jagged, being a little hairy on the stalk, and of a whitish green colour, at the top stands small white tufts of Flowers, or spoked tufts.

Lobage, hath great large winged leaves, divided into many parts every leaf being cut in the edges, with three dents, or four at most; the stalk full of joints, out of which towards the top come forth long branches which bear yellow flowers in umbels.

Laserwort and **Allisander**, are leaved like the winged leaves in the plate, with large deep indents, the Flowers in umbels, are white.

All-heal of America, or the **cluster-berry All-heal of America**, hath a round pithy brown purple stalk, set at the joints with large leaves divided into many parts, usually by three at a space, on midling foot-stalks; the winged

leaves being set at a good distance from the top three leaves; they are a little dented about the edges; and on sundry branches have many tufts of flowers, made of small whitish green threads, like **Vine-blossoms** which after turns to dark red berries in clusters.

Verb Francumfence, hath the divided winged leaf, set with three leaves broad and dented on the top; then three single leaves on a-side, with as many directly against them, each at a little distance on foot-stalks; and then two winged leaves each consisting of three leaves, set at the lower part of the stalk; from the upper joint, riseth a few branches bearing large umbels of white flowers; smelling sweet as most umbelliferous tops do.

Libtick, or **Sermountain**, hath at the joints a long slender leaf, spreading winged divided in sundry parts, whose foot-stalks usually bear two leaves, some four, set one against another, and three always at the end, with a winged leaf at the bottom.

The second, is a **Rush-leaf**, (or **prickly leaf**) set in **Wharles**; that is, at distances, or several spaces about the stalk, to the top, are set divers roundels of leaves; that are long, and slender.

Horse-Tail, hath only one intire stalk like a rush (called a **rough jointed rush**) it is full of joints up to the top, so made as if the lower part were put into the upper, whereat grows at each side, or round, a bush of small rushes hard and sharp; at the top comes forth small **Jules**, or **Catkins**, like those of trees.

The greater **Hedow Horse-Tail**, is the same, only the rushy leaves in the joints are more bushy and longer, and many of them do branch themselves forth into others, and are all of them full of joints, scarce discernable.

Rosemary, hath **Wharles** or small slender leaves set at distances about the stalk.

Small Haudlin, hath the stalk full of small slender leaves of whitish green; with yellow flowers, thick thrust together, in an umbel, or tuft.

Franching Spurry, or **Spurwort**; on the stalk are set at distances, or joints, small narrow leaves waving, or bending in manner of a star; or spur rowel of many points; the Flowers are small and white, in husks, on branched stalks which turn to small round heads.

Woodroof, the stalk is set at every joint with eight or ten long (& broad in the middle) leaves; on the top is star-flowers of five leaves on branches, of a white colour. Some have blew, others purple coloured flowers, standing on a branch by short foot-stalks.

Maidens-Hair, or **Ladies-Bendstraw**; the leaves long slender and sharp pointed, turning downward; the top branching forth into divers parts, with five small leaves at every joint, on which grow long tufts, or branches of yellow flowers, very thick set together, one above another.

Goose-grass, or **Cleavers**, hath six rough hairy leaves on a hairy stalk in wharles, at distances, or set in a round compass, like a star, or rowel of a spur; from between the leaves at the joints, towards the top comes forth many small white Flowers, on threddy foot-stalks which turn to two rough round seeds; the purple flowered **Cleavers**, have the leaves and stalks smooth.

Cross-wort, hath a square hairy jointed stalk, with four roundish (pointed at both end) leaves, hairy yet smooth.

smooth of a yellowish green, towards the top at the joints with the leaves, in three or four rows upward, stand small pale yellow flowers in husks.

Stinking Ground-pine, a round stalk, set by joints at certain spaces, with very many small and narrow thred-like whitish green leaves, round the stalk; being longer at the bottom than the top.

The **lesser Ground-pine**, hath the stalk lying on the ground in a compass, upon each there is divers rundels of small long leaves set at spaces, of a yellow green colour; on the tops, divers Flowers do stand together in a tuft, consisting of 5 small white leaves a-piece.

Fair Death low Pine, a reddish stalk full of joints, each set round in compass, with many small and long, thick fat leaves; the tops have divers Flowers, on short foot-stalks, consisting of five or six long dented leaves, of a whitish red colour, with yellow threds in the middle; the purple **Low-pine-Flower**, groweth in a great spiked tuft, or bush; consisting of four leaves a-piece double forked at the ends, in a brownish husk.

Narrow leaved Salomons seal, hath only one stalk set at several spaces, with long narrow leaves, five or six together round the stalk; at the said joints or spaces, with the leaves, comes forth two or three short stalks, with whitish green Flowers at the ends of them, like bells with dented edges, after which comes round red berries.

Thick Madam, or **stone Crop**, is a sappy stalk, thick set on all sides, with small round sharp pointed sappy leaves, (or as others describe them) with thick fat round yellowish green leaves a little pointed at the end; the Flowers stand at the tops of the branches, many set together, yet somewhat loosely and not in tufts or clusters, consisting of five pointed leaves with some threds in the middle, all of a yellowish colour; others white, some carnation. It is termed also **Trick Madam**.

XII. A Thread leaf, or Pair-like leaf, or a leaf finely cut.

Fennel leaf, or threddy branched leaves.

Flurweed, hath a branched stalk, set with green leaves very finely cut, or severed into a number of parts; the Flowers are small and yellow, growing spike fashioned, which after comes to small long pods.

Flax, hath on the stalk, which is slender and pliant, many (or thick beset with) single narrow long thred-like leaves, without order; branched in the top into three or four small foot-stalks, each bearing a blew flower, of five round-pointed leaves with some threds in the middle; in green short, and dented husks.

Ragwort, hath the leaves something broader than Fennel, much cut and rent in the edges even to the middle rib; the top brancheth forth into many stalks, bearing yellow Flowers, set in a pale, or border, with a dark yellow thrum in the middle; set in a round, divided husk.

Sea-Moss, or **Coralline**, and **Sea-Feather**, are all branched with threddy leaves like Fennel.

Camomil, hath small trailing branches, set with very fine hairy leaves, bushing and spreading abroad, the tops have white flowers, with yellow thrums in the middle; some have only yellow thrummy heads, without any pale or border of white leaves, and a small thrum in the middle.

Corn Marrygold, and **Dr-Eye**; have both thred-

dy branched leaves, yet something broader than Fennel; The Flowers, out of a green scally head, or husk, a border of broad pointed leaves, cut or dented into three or four parts; about a thrum all yellow.

Nigella, leaves as finely cut as Fennel, the branch hath flowers, containing five blew leaves, laid open like a star, without any green leaves under the Flower, with a green head in the middle, compassed with some few threds.

Carrats, the leaf large and spreading, made of many thin, cut deep leaves, divided into many parts, jagged yet broader than Fennel, the flowers are white umbels in branches, dispersed.

Asparagus, or **Sperage**, the leaves jagged, and hairy, branched; the Flowers are yellow, consisting of six leaves.

Bastard wild Poppy; Fennel leaved, the flower 4 round leaves, white, or red, with black threds, about a green round head.

XIII. A Sword, or Flag leaf, or Blade leaf.

Aspodil, or **Asphodil**, have long narrow leaves, compassing one the other at bottom of the stalk, like Flags and Flower-de-luces: the Flowers are yellow, in a spike; six leaves a-piece, with some threds in the middle.

White branched Asphodil, hath white flowers, in little round husks, consisting of six or seven long and narrow leaves, with threds, or chives in the middle, tipped with roundish pendils.

The **Asphodil**, or **Aspodil**, which hath many crawling hollow three square leaves sharp pointed; the stalk is smooth and naked; divided at the top into many branches, bearing many star-like flowers of six leaves, whitish on the inner-side, and striped with a pale purple line down the back-side, having some yellow threds in the middle; there is a kind of these, whose flowers are all white, and the stalk is not branched; others are of a bluish colour; others striped on the back with lines, growing on the stalk in a long spike, those below flowering first.

The **small Aspodil**, or **Kings-Spear**, hath many long narrow edged green leaves trailing on the ground, the stalk set with small leaves to the middle, where the flowers begin being many, yellow and star-like.

The **Lilly Aspodil**, it hath many long thin sedgy leaves; the stalk is naked, bearing at the top four or five small Lilly-like flowers, blowing one after another (like the day Lilly) of a yellow colour: Of this kind some are white, others bluish, or flesh colour.

The **Spider-wort**, or **Savoy Spider-wort**, hath thin small sedgy leaves of a whitish green; the stalk bears at the top, one above another seven or eight flowers; white flower hanging Lilly-like, with a small forked pointil, with some threds tipped with yellow.

The **Italian Spider-wort**, hath on the top of the stalk many white star-like Flowers, and a grassy leaf.

The **Virginian Spider-wort**, hath a growing grassy leaf; the stalk is in joints, with some short leaves on the top, from whence proceeds the flowers which are many; hanging down their heads at first, and turn up as they come to blow, each containeth three leaves laid flat of a blue colour, with red threds in the middle, tipped with yellow pendants; they open commonly one after another. It may be called the **Day flower**, for it opens in the day and closes in the night; of this kind there is that have red, others white flowers.

Flag, the leaves hard and stiff, the flower yellow like to the Flower-de-luce, having three falling leaves, and other three arched; that cover their bottoms, with three short pieces of leaves instead of whole ones. Some call them **Saggess** or **Sedges**; others **Sword-herb**; of the Latine **Gladiolus**; Some call it **Arion**; some **Sword-point**, or **Edge-Tool**; and others **Cuttle-haft**.

Rice, the stalk is in joints, at each a thick long leaf, at the top it beareth a seed, in a sparsed juba, or tuft (or a spiked tuft spread in branches) whose blooming is said to be purple; with the seeds standing severally on them enclosed in a hard brown husk, and an **Aunor Beard**, at the head of every one of them.

Millet, hath jointed tall stalks, soft and hairy, with long and large Reed-like leaves at them, compassing one another; the top of the stalk, hath a number of whitish yellow long sprigs like Feathers, bowing down their heads.

The **Indian Millet**, hath the seeds in a **Juba** or tuft, standing upright, and boweth not; and are either whitish, yellow, red, or blackish, hard and shining.

Panick, is like the **Millet**, only the top is a whitish long close spike, round at the end, soft (and as it were hairy soft) husks.

New Indian Panick, hath from the joints, and also at the tops, panick-like heads, closer than the former, the stalk and flowers of a blewish shining purple colour, full of hairy husks.

Sampire, or **Rock-Sampire**, the stalk is tender and green, branching forth from the bottom, beset with thick and almost round leaves, and long; sometimes three or four together on a stalk, and are sappy: the tops and branches, have umbels of white flowers. It is called **Pearceston**.

Ginger, the root is that we call **Ginger**, the leaves grow like the **Water-flag**, with a Flower like a Flower-de-luce. But the **Brazil Ginger**, with a blackish root, hath a stalk like to our **Reed**, when it is new put forth, or sprung up to a foot in height.

Dittander, or **Scar-wort**, hath long and narrow leaves, set upon a stalk, which brancheth forth at the top into dark purplish flowers, set together, consisting of five small pointed leaves a-piece, in rough brownish husks.

Coad-har, or **Flat-weed**, the stalk full of long narrow leaves, at the top is a spike of pale yellow flowers, with gaping mouths, and a spur behind each; growing in a spike fashion.

Flea-bane, hath a long narrow leaf upon the stalk, dented a little about the edges, and pointed at the ends; at the top part of the stalk, at every joint with a leaf, comes forth a yellow Flower, in a green husk, which when it is ripe turns to down.

The **purple Flea-bane**, hath the top of the stalk branched, at the end of each, stands a bluish purple flower of small leaves, white at the top, with a yellow thrum in the middle, out of which doth rise divers white threads.

Spider-wort, hath long narrow leaves all in a cluster at the ground, from whence issue a stalk branched at the top, whereon groweth all along, on short foot-stalks, a purple flower of six pointed leaves, out of a short husk. Some white, others red, or carnation flowers.

Cyper-grass, hath long and narrow leaves, the stalk divided into three or four branches, with lesser leaves on;

at the top of each a blue purple flower, standing in a short green head, consisting of many long narrow leaves set thick together.

Goats-Beard, hath long narrow leaves compassing the stalk at the joints, and turn down by reason of their length, having a whitish rib all along the middle; the stalk brancheth into 2 or 3 parts, each having a large green head, with long pointed ends, out of which appears a small purple flower. There are some that bear yellow flowers, and rose colour.

English Worm-seed, the stalk set with long narrow leaves, pointed at both ends; at the top of the stalk is 2 or 3 branches, at the ends whereof come forth small yellow flowers, made of 4 leaves apiece, all set together in a tuft, on short foot-stalks.

XIV A Through leaf, or a pointed **Through leaf**, that is a leaf that hath no foot-stalk, but surrounds the stalk or branch it is fixed unto.

Solomons Seal, of some called **St. Johns Seal**, or **St. Maries Seal**, or **Frarinell**, or the **Seal of Heaven**, is a long stalk bowing towards the top, set with single leaves one above another, at the foot of every leaf almost from the bottom up to the top of the stalk comes forth white and hollow pendulous Flowers, something like the **May Lilly**, or **Lilly Convally**, but ending in five longer points on long foot-stalks: That of **Virginia** hath the Flowers only on the top of the stalk, in a spike without any leaves intermixed.

God of Pleasure, hath the stalk compassed with a sharp pointed leaf, biforked at the bottom, branched at the top, beset on both sides spike like with white Flowers of 5 round leaves on short foot-stalks, after which comes round heads, each having a point on it.

Pyragum hath the stalk compassed with leaves pointed one above another, the flowers are small and white, standing together in tufts on the top, which turn to round rugged heads, with a prick at the end.

Helleboz, or **Reese-wort**, hath large roundish leaves all along the stalk, compassing one another to the bottom, having eminent ribs along them; the top is divided into many branches, having all along them many small, yellow, or whitish green star-like Flowers.

Ladies slipper, hath the stalk compassed with a large and pointed leaf at distances, on the top stands one flower, sometimes two or three on foot-stalks one above another, with a small leaf at the foot of every one; each Flower is of an oval form, and hollow, open with ears like to a slipper, with four long, narrow and dark coloured leaves at the setting on of the flower unto the stalk, wherein the Flower was at first enclosed, being of a pale yellow colour and purple.

Birthwort, is a kind of a running slender and bending stalk, trailing, having few or no branches issuing therefrom, compassed about with one round pointed leaf, set at distances with the leaves, from the middle, at every joint upwards, come forth a long hollow flower, small at bottom, broad at the top, of a deadish yellow, or brown colour, after which comes a round fruit somewhat longish, as large as a **Walnut**.

Hairy headed Knapweed, a through leaf, sharp and long pointed, the top branched, with a leaf at every joint; at the top a Flower like a Thistle, with whitish crooked tangling threads, of a purple colour.

Centory, hath yellow flowers, the leaves broad

the stalk, and roundish pointed, 2 at a joint; the top 2 or 3 or more stalks rising from between 2 leaves, at the end of each a Flower of five white leaves in a small husk.

Gentian, on the stalk is many broad three ribbed, dark green leaves, pointed at the top, compassing the stalk at the bottom, 2 leaves one against another; at the top comes forth the flowers, compassing the stalk at 2 or 3 of the upper joints, with 2 leaves a piece under them. The Flowers are Star-like, consisting of six long narrow leaves, of a purple colour, with yellow threads in the middle, standing about a long green byforked long head, like a fish tail.

Honywort, or **Cerinth**, the leaves are broad and long, roundish at the ends, and compassing the stalk so much that they seem to go through them, of a blewish green colour, spotted all over with white spots; at every joint or leaf comes forth a branch which at the top are smaller, at every leaf is a long hollow flower like a Bell, of a yellow and purpled colour, set in a green husk, divided into five parts. The great, yellow, and purple and white Honywort, have the stalk and leaves all hairy.

Through War, or **Through leaf**, hath the leaf round at bottom, and pointed at the end, having the stalk through the middle of the leaf, which stand at distances, at each leaf cometh forth a stalk, and so smaller to the top, the flowers are small, standing in tufts, at the head of the branch of a yellow colour. The common **coddled Through War**, the leaves are uneven on the edges, long and round pointed, opening in the compassing of the stalk, heart-like; the branches have white flowers one above another, consisting of 4 leaves, in husks, which turn to long and square cuds.

Leopards Bane, hath one only leaf compassing the stalk, round and indented, from whence groweth small branches, with small leaves thereon, at the top of each, one pale, smooth yellow flower, of 4 round leaves, with a small greenish head in the middle.

Wolfs Bane, hath a flower on a double stalk like the **Corn Marigold**, which when it falleth away, turns to a small whitish downe.

XV A Slit Through leaf, or a **Round Through leaf**, bipointed at the opening.

XVI A double pointed Through leaf, or a **Through leaf pointed** at both ends.

Wood Spurge, hath at the tops of the stalks many yellow flowers standing in cups, or leaves under them, like cups (that is) two almost round leaves, compassing the stalk that is yellow also; of which comes small round heads standing up a little higher in the cups on foot-stalks, with a little buttons on the top of each head.

Garden Spurge, hath 2 long and narrow leaves, of a blewish green colour, compassing the joint, from whence it riseth into branches; 2 leaves being still at the division or parting of the branches; at the tops are yellow pale Flowers set in leaves like cups, that turn to seed-heads, as aforesaid. There is a sort of Spurge that beareth red Flowers, and yellow, dasht over with purple.

Through leaved Centory, the stalk at every joint, or set at distance, hath a broad and long pointed leaf at both ends, that so compasseth the stalk about, as it seemeth to have run through them, and turn up at the edges,

*

that they may hold Dew or Rain that falleth on them; the Flowers on the top are in small branches 3 or 4 out of a cup, with pale yellow leaves, 6 or 8 about a small thrum or head.

Saint Peters Wort, hath only one stalk from the root, set at distances, with 2 broad and long leaves round pointed at both ends, having sometimes small little leaves rising from the bosom of the greater; at the top is 3 or 4 branches, each having a Star-like Flower of 5 pointed leaves, and threads pointed with small round buttons, all yellow.

Sun turning Spurge, hath only one stalk, whereon grow diverse yellowish green leaves, smaller at the bottom, but broad and round at the ends, endented about; the flowers are yellow, as other **Surges**, standing in cups, of two leaves a piece, the stalks running through them.

XVII A four parted Through leaf, or a **round four parted Through leaf**, a **Caterfoil Through leaf**.

Knobbed, or **Tuberous Spurge**, the top is branched, at every joint is a leaf through which they spring, having a white rib down the middle; at the tops are Flowers set in the middle of a round four parted round leaf, of a yellow colour; after which comes a round seed pod, like other **Spurge**.

XVIII An Arrow head leaf, because like the head of a **Dart**, a **Pheon like Leaf**.

Arrow head Water Plant, hath a leaf like a broad Arrow head, its Flowers are white, growing at the joints in rounds, at certain distances to the top of the stalk.

Wild Colewort, hath the top of the leaves more round, and the forked part the same.

XIX A Round leaf, or a **Roundel leaf**, vvith a stalk in the middle.

Kidney wort, or **Wall penny wort**, or **Wall wort**, hath thick, flat and round leaves, growing on stalks all in a cluster or bunch, unevenly cut or waved, and hollow on the upper side like a Spoon, from whence riseth a stalk branched, bearing a number of pendulous Flowers set in spikes round the stalks one above another, like little bells, dented in the edges, of a whitish green colour.

Wood Sorrel is three leaves like **Hearts** set together in a round, with the stalk in the middle.

Marsh Penny wort, or **Water Penny wort**, or **Pennywort**, is a creeping stalk, with round leaves, divided into six invecles, as if the were six leaves with the stalk in the middle on the back of them.

XX A Guthrome leaf, a **Round leaf Turned in**, at the stalk.

Sea Bindweed, or **Soldenella leaf**, the flower is a purple Bell in a husk.

Asarum, or **Asarabacca**, the veins of the leaf are as if they were scales from stalk to brim, each on their own foot-stalk, the Flower is a brown green husk (on short stalks) divided at the brim into 5 divisions like the cups or heads of **Henbane**.

Basard Asarum, hath the leaves uneven or waved; the Flowers like the **Camomill**, all yellow.

Arch

Arch Angel, or **Dead Nettle**, the leaves crumpled and dented, Flowers grow at a distance on the stalk with leaves between, and are white, some red gaping Flowers.

XXI. A Bulbes leaf, a round leaf tending to a point, or a broad round leaf a little pointed.

Dittany, hath a round pointed leaf woolly, or covered with downe, the branch set full of leaves two together, the tops send forth spikes, of thin leaves like Scales, purple on the out side, and paler within; out of which comes purple gaping Flowers; some are red, others of a deep blood red; others of a pale blew or Ash colour; others of a bleak blew, striped with a deep Blew or Violet.

XXII. An Egg leaf, or an Egg Oval leaf, being round at both ends, oval like, yet broader at one end than the other, Egg-like; of some called an Eclip leaf, or pointed oval leaf.

Water Lilly, the leaf is long and roundish at the end, with a return of the leaf at the bottom into the stalk; the Flower is green on the out-side, and the inner very white, consisting of many rows of long and narrow leaves, compassing a head, or thrum of yellow threds.

The **Water Lilly of Egypt**, is double flowered, but inclosed or set in a husk of four leaves green on the out-side, and White within.

A **Beets Leaf**, and the **Garden red Beets**, the leaves grow on weak tender stalks, at each leaf round the stalk, a Wharfe of yellowish green Flowers, and so spiked to the top: There is 2 kinds, White and red Beets.

Winter-green, of some called **Wolbes-heart**, or **Juniper-herb**, or **Black Lingwort**, or **Earths leaf**; It is like to our **Beets**.

Egyptian Wake Robin, is a whitish green leaf, full of Veins running every way; the Flower is 3 hofe or husks, out of which comes a Pestel or Clapper, in the middle thereof is white Flowers downwards, that turn to pale red berries.

XXIII. A Bulbes pointed and Inverted leaf, is a Violet leaf, being round, tending to a point at the end, and the bottom turning in at the stalk like a heart. A Heart leaf.

Dogs-bane, leaves full of Veins, broad and sharp at the end, 2 at a joint, the Flowers come forth at the joints with the leaves 3 or 4 or more together, consisting of five white pointed leaves, from which grows long crooked pointed cods, fixed to a small foot-husk.

Ale-hoof, or **ground Ivy**, is a creeping stalk lying on the ground, having 2 such leaves at every joint, somewhat hairy and crumpled, or unevenly dented about the edges, with round dents at the ends of the branches, with the leaves come forth hollow long flowers gaping at the ends, of a blewish purple colour, and small white spots on the Labels or lips that hang down, as also in the mouth or jaws.

Spanish Opvine, on the stalks at distances, are set two leaves thick and broad pointed at end, and unevenly dented; the top hath a tuft of flowers, which consists of 5 small whitish leaves, after which comes chaffe husks.

Barsh Marygold, the leaf is smooth, more open

*

from the stalk, the Flowers are yellow, like to **Crook foots**.

Dozehound, the leaves waved and crumpled; set together on a stalk, the Flowers are white, and gaping in spiral or in spikes with the leaves.

Celandine, or **Pile-wort**, a heart like leaf, set on a weak trailing branch, smooth and shining; the flower is 9 or 10 long narrow pointed leaves, with a round head in the middle, all yellow.

Scurvygrass, or **Spoon-wort**, the leaf stands by it self on a long foot-stalk, the Flowers are white and yellow threds in the middle; growing spikewise in branches on both sides.

Parnassus Grass, a Violet like leaf grows on its stalk, the flower White also, and is five leaves standing round a green head or button, with some yellow threds about it.

A such a Leaf stalk slipped and embowed to the dexter G. born by *Van Balcker*; also by *Van Dobkitz*.

The like with the stalk to the Sinister, is born by *Manswiz*.

A on a Bend G 3 such O born by *Gofen* or *Godson*.

XXIV. A round leaf pointed at the stalk or bottom of the leaf, a Barberry leaf, or top like leaf.

Capers, hath a weak woody stalk, lying on the ground, set with crooked thorns like hooks (as the Bramble or Dog-rose) at each joint comes forth 2 leaves one opposite to the other, from whence springs a round head, that being ripe, consists of 4 round white leaves, with 4 other green ones, as the husk wherein they stand, having many yellowish threds, and a long stile or pestle in the middle.

Purslane, hath a round thick fat leaf, growing sharp at the stalk, it hath no veins but through the middle, they are set on a reddish weak stalk, one opposite to the other, and on the top many together in a cluster, after the manner of a knot of leaves, the undermost leaves be in the largest.

Rue, or the **Herb of Grace**, hath such a round end leaf drawing somewhat to a point, it hath but one vein, and is a kind of Sea-green colour, or dark blewish green, growing one opposite to the other, on hard whitish woody stalks, the flowers that stand on the top consist of 4 small yellow leaves, with a green button in the middle, compassed about with sundry small yellow threds, that growing ripe, contains in it small black seed.

Wild Rue, or **Wood-sage**, as some call it, it hath small stalks in manner like to a **Birds Feather**, the leaf is a little bigger than our common **Rue**. It hath a tuft that is full of black seeds.

Indian St. Johns Wort, hath the leaves narrow at the stalk or setting on at the branch, and large, round and broad at the top.

XXV. A Tripointed crumpled leaf, or a Tripointed uneven cut leaf, by reason the edges are bending to and again, so that the leaf cannot lie flat and smooth.

The **Burdock**, the leaf green on one side, and grey on the other, it brancheth forth at the top, beareth diverse rough heads or burrs, with crooked pointed prickles, out of each comes many purplish threds, those are the Flowers.

Butter Dock, or **Rubarbe**, is the like, having a large

large crumpled leaf, almost as broad as long, with long stalks.

Saracraze, or **white Saracraze**, the leaves are roundish, being unevenly cut or dented about the edges, each on a foot-stalk lying on the ground, of a yellowish green above, and grey underneath; from amongst the leaves riseth a stalk, with a few such little leaves thereon, branched at the top, on each stands a white Flower of 5 pointed leaves, with some yellow threads in the middle, standing in long crested brownish green husks, with another lesser husk of five or six leaves at the bottom of it.

XXVI. A broad tripointed indented leaf, whose points all extend forward. A 3 such V is born by *Tri-pointe*.

Colts-foot, or **Fole-foot**, roundish 3 pointed leaves, dented a little about the edges, with a down or freeze over the leaf on the upper side, and whitish or mealy underneath, which may be rubbed away; the flower stands on its own stalk, which is small and yellow, like a single pink in a hofe, within a small husk at bottom.

Gilder rose, or **Marth Elder**; the leaves are broad and smooth, divided at the edges, into three (and sometime into five divisions or incisures and dented about) the flowers consist of 5 leaves, of a white or pale bluish, being set many together, in a round tuft or ball on the top of the young branches.

XXVII. A Round pointed Trefoil leaf, or divided at the edges into 3 parts.

Fenugreek, round at the top and pointed at the stalk, on the stalk are whitish Flowers, growing in tufts, that turn to long crooked pods.

Hepatica, or **Liverwort**, the leaf is each on his own stalk out of the ground, they grow together in tufts, the Flower is both single and double; the first consisting of six pointed leaves, with a button in the middle; the double consisteth of many, set thick and full together; they are of a violet purple colour, others white, blue, or red.

XXVIII. A Trefoil tripointed and dented leaf, that is, a leaf divided or cut into three parts, each containing 9 points: Of some a **Tripointed leaf**, each **trebble trebbled**; or a **Triparted leaf trebble-trebble pointed**.

Crow-foot leaf on its own stalk; the Flower grows on a naked stalk, and is Yellow, some White.

Muskwood Crowfoot, hath the leaf divided in 3 parts to the stalk, then each part again invecked at the end into three, of a pale shining green colour, from amongst them riseth a stalk with 2 such leaves on, but smaller; above them is a greenish yellow head, that spreadeth into 4 or 5 mossie heads of threds.

Columbines, have three such like leaves as this example, all fixed on a stalk by short foot-stalks, below them again on the same stalk is set 2 such other parted leaves upon longer foot-stalks; so that in the same, to make it compleat, there is 9 of these leaves, which is termed a **Triparted, Winged and Divided leaf**.

Smallage, hath 5 of these leaves set on a stalk, 2 on a side, one against another on short foot-stalks, and one at the end, which makes it a **Triparted Winged leaf**;

*

but on the top of the stalk, with the umbell of white flowers, there is usually but 3 leaves together.

XXIX. A Cinque-pointed, or Five pointed leaf; and a **Cinque pointed recurved leaf**; by reason two parts turns (as it were) backwards to the stalk.

Sanicle, hath a great round leaf on its own foot-stalk; being deeply cut or divided into 5 parts, and those parts dented also; the Flowers are branched at the top, every one having a small round greenish yellow head, out of which comes small white leaves.

Bears ear Sanicle, hath the Flowers pendulous, all in a tuft like **Cowslips**, of 5 pointed leaves, of a purple colour.

Spotted Sanicle, hath the Flowers white, all spotted with red spots; the leaves and manner of growing as the other Sanicle.

XXX. A leaf divided into five Sections, or a five pointed leaf.

Cowcumber, or **Cucumber**, the branch traileth on the ground, the leaf is parted with an uneven cut, into five points, but not deep into the leaf.

Indian Melon, hath the like leaves with clasps on the branches, with five pointed yellow flowers that turns to a Fruit like a Pear, but furrowed, of a green and yellow colour.

XXXI. A Cinquefoil, or five parted leaf, indented, five fingered leaf; or five leaves standing together on a small foot-stalk.

Cinquefoil, or five leaved Grass, the stalk groweth in the middle, some leaves are five pointed and smooth, others are dented all about the edges.

Cranes Bill, or Storcks Bill, the leaves grow from the root or long foot-stalks, each leaf being divided into five parts, and they again cut in on the edges; on the top of a branched stalk, comes forth diverse Flowers together, each on a foot-stalk, consisting of 5 leaves apiece, of a reddish, purple or rose colour, set in short and small husks, which falling away, there groweth a long spike or sharp pointed Nail, or a thing resembling a Stork or Cranes Bill, as in *numb. 88*.

A Bend between 2 such V is born by *Alorist*, an *Italian*.

V the like leaf G on a Quarter O by *Hemad*, a *Polonian*.

Knotted Cranes Bill, hath only two Flowers together on foot-stalks, consisting of 5 leaves apiece, indented in the middle; (like a **Hallow**), of a purple colour, veined with a deeper purple running there through; having a reddish **unbone** in the middle, cut into five parts at the top, which turn to long beak heads. This smelleth sweet like musk, and therefore is of many Flowerists, called **Muscovy**.

Hellebor, hath large leaves growing out of the earth on long foot-stalks, divided into five, sometimes six or seven parts or leaves, each nicked or dented from the middle of the leaf upwards; the Flowers grow on their own Stalks from the ground, being naked, and without any leaf thereon; the flower cometh forth in Winter, and therefore called **Christmas Flower**, it consists of five large, white, round leaves, sometime dasht with Purple about the edges, and sometimes all purple, with many

ny pale yellow thrums in the middle, standing about a green head, which after groweth to be the seed Vessel, dividing it self into several Cells, like the **Columbine Seed-Pod**. Some call this the **Christmas** or **New-Pears Rose**. Some are red, yellow, &c.

The **Bastard black Belleboy**, hath a smooth divided leaf, and is both longer and narrower, with flowers like the former, but of a pale green colour, growing in branches with small leaves amongst them; This is also called **Bears-foot**, and **Setterwort**.

Purging Sanicle-like Belleboy, hath a like divided leaf of five parts, ended about the edges, but not so deep; from among these leaves riseth a stalk with some small leaves on, at the top 2 or 3 or more flowers, each of them consisting of many small hard whitish leaves, as a pale or border, compassing many threads in the middle.

Stabesacre, or **Louse-wort**, the stalk brancheth forth diverse ways, whereon grow large leaves, cut into five divisions (sometimes more) each again being tribble pointed, the middle longer than those on each side; the flowers grow in spiked heads, and are somewhat like a **Larks heel**, or **Larks Spur-flower**, for it hath a spur or heel behind it, of a deep dark blew colour; after which comes 3 or 4 horned seed Vessels.

Cinquefoil Awns, hath a leaf divided into 5 parts, and dented; each on a foot-stalk from the ground, the stalks have such like leaves at the joints where it brancheth forth, at the tops stand pale yellow flowers, very small, consisting of 5 round pointed leaves, with many yellow threads somewhat downy in the middle.

XXXII. A five parted leaf, tripointed; or a divided parted leaf into five, each having 3 dents at the top, or 3 divisions or subdivisions apiece.

Dathorne, hath diverse Shoots, Arms and Branches, whereon are set in diverse places sharp Thorns, the leaves are cut in on the edges into diverse parts, and they again dented at the top; the Flowers are many, standing together in a bunch, coming out with the leaves at the upper joints, consisting of 5 white leaves apiece, with divers white threads in the middle, tipped with red; of a pleasant smell; after which comes Berries somewhat longer than round, being red when fully ripe.

XXXIII. A five parted, feathered, or jagged leaf, a jagged fingered leaf.

Wolfs-Bane, hath 5 jagged or deep cut leaves, fixed to a stalk as it were in the center of them; the top a long branched head with diverse coloured flowers, some purple, some white and yellow, growing spirall many together, the bottom blooming first.

White Wood Crowfoot, the leaf cut in five parts, and then dented; the like divided leaf hath the common **Field Crowfoot**.

Helmet Flower, hath a like jagged 5 pointed leaf, with purple flowers like Helmets growing spiked on a stalk.

Demp, the stalk set with many leaves at distances, every one divided into 5, 6, or 7 leaves joined together at the bottom, and dented about the edges.

XXXIV. A Star Leaf, or a leaf divided into several parts, or cut into seven divisions, or several leaves standing together.

Lupine, hath a strong upright stalk, set confusedly with divers soft woolly leaves upon long foot-stalks, each leaf being divided into five, seven, or nine several parts, green on the upper side, and woolly underneath; the flowers grow from the tops of the branches, in Spikes, and are some yellow, others white, spotted with purple, and others blue; which after groweth to a soft woolly pod, and hath in them 3 or 4 flat and round pease, the flower is like to that of the **Field Bean**.

Hadder, the stalk is trailing, rough or hairy, set at every joint with long and narrow leaves in form of a Star or Rowel of a Spur, at the top come forth small pale yellow flowers growing in branches, each on a foot-stalk.

Wild Hadder hath the Flowers white, each consisting of five round leaves, some of six.

Small creeping Hadder, hath the leaves smooth, and the flowers of a blewish purple colour, made of five round pointed leaves, with some small threads in the middle.

XXXV. A Sept foile, or seven pointed leaf, a Setfoil Leaf of seven ends all dented. Such a Leaf I find born by the name of *Setfell of Spain*.

XXXVI. A round eight pointed jagged leaf, Spur-Rowel leaf.

Ravel-Wort, the leaves lie round on the ground, with ribs or veins like to a **Plantain Leaf**, and unevenly dented about the edges, out of the middle riseth up divers round stalks somewhat hairy, but bare and naked without any leaves up to the top, where stands 4 or 5 leaves like those below, amongst them starts forth divers foot-stalks, having small white flowers of 5 small notched leaves standing in a green husk, divided at the top into five parts, where after the Flower standeth a round Seed-Pod.

Comentil, or **Set-foile**, the leaves have their own foot-stalks from the ground, being round and divided into seven, others eight parts, dented about the edges, at the tops of the stalks, which is in branches, groweth small yellow flowers, consisting of five leaves; at every joint the stalk is surrounded with a leaf, and where the branches shoot forth also.

Silver leaved Comentil, hath the leaf smooth save the points which are a little snipt, being green on the upper side, and silver shining white underneath; the flowers are small and white, set about the top of the stalk at several distances, and standing in small husks.

Winter Wolfs-Bane, hath each part of the leaf dented into three at the points, all standing upon their own stalks.

Ladies Mantle, or **great Sanicle**, the leaves rise from the root upon long hairy stalks, being almost round, but a little cut into on the edges into 8 or 10 parts (corners or points) and then dented round; and then plated or crumpled in divers places; the flower stalk is compressed in the joints with small leaves, and divided at the top into three or four branches with small yellowish green heads, and whitish green flowers breaking out of them.

Cinquefoil Ladies Mantle, hath the leaf divided in the edges into five points or corners.

Palma Christi, or **great Spurge**, the leaves grow on stalks in branches, from the back of the leaf, being round, and divided into eight or more parts, with a small

endent about the edges; the Flowers are many round buttons, consisting of many pale yellow threads, standing all along upon a long stalk.

Woodrose, or **Woodrhone**, the stalk is compassed about at certain spaces, with a long and slender leaf, 4 or 5 flowers made of 5 leaves a piece, white and laid open like a Star; some have blewish purple flowers.

XXXVII. A broad and round pointed finned and winged leaf, or a seven pointed (parted or divided) finned leaf, or a broad finned and winged leaf round pointed.

Lion leaved Turnep, is cut or divided into diverse parts round, of a dark yellowish green, or Lion colour, from whence riseth up a stalked stalk, spotted with pale purple lines or strakes, divided into many branches, set with small flowers of 5 leaves pointed, of a brown yellow colour.

Peony, or **Diony**, the leaf is cut into the sides in divers parts, and more pointed, green on the upper side, and hoary white under; among which leaves spring stalks with a flower on the top, of a red purple colour, consisting of eight leaves, with many whitish threads tipped with yellow; standing about the middle bicornered head, which growing ripe, hath the seed in it.

Valerian, hath from the root many leaves rising, which are cut, and unevenly divided on each side, almost to the middle rib; the stalk is branched on the top, having small white flowers edged with purple, set in an husk, growing many together in tufts or umbels, thick thrust together.

Mountain Scabious, the leaf cut in divers places to the middle rib almost, set at distances like a winged leaf, one contrary to the other, and endented on the edges; the stalk is branched at the top, on each is one great large round blackish green head, or knop, or button, from whence shoots forth diverse pale blewish flowers, the outermost larger than the higher innermost, having many threads also in the middle; there is of these flowers, some red, some pure white, others pale yellow, something flat at the top, and not so round Globe-like as others.

XXXVIII. A Broad deep cut, or divided leaf, sharp pointed, or a broad finned, winged and pointed leaf.

XXXIX. A Broad deep cut leaf, dented at the brims, or at the ends or points.

Mugwort, hath divers leaves lying on the ground, which are very much divided and cut in deeply about the edges, of a dark green on the upper, and very hoary white on the neather side, the stalk is purplish branching forth at the top, with small leaves thereon; where are also set pale yellow flowers, like Buttons in spikes.

XL. A Trefoil eared, and finned leaf, a leaf eared down the rib.

Abens of the Mountain, or **Mountain Abens**, hath the top leaf large and dented, the other lesser by degrees towards the bottom, standing on either side of a rib without any foot-stalks.

Colewort, hath a waved large round leaf at top, with lesser down the rib, all joined together with Finns, narrow and waved also, or unevenly cut.

Ballard Agimony, hath long soft hairy leaves, on long reddish hairy foot-stalks, which are divided into many parts or leaves 6 on a side, but little ones between, all round pointed, and set at a small distance, and small dented.

XLI. A jagged, cut, and torn leaf, or cut and divided leaf finned.

Succory, see chap. 4. numb. 14.

Dandelion, the ends of each gash or jagged, on both sides the stalk are looking downward to the root; the middle rib is white, which broken yieldeth a bitter milk, every stalk beareth a yellow flower, consisting of many rows of leaves, broad and nicked in at the tops or points, with a deep spot of yellow in the middle, which growing ripe, the green husk wherein the flower stood, turneth down to the stalk, on which riseth a head of downe, as round as a Ball.

Gum Succory, hath the like jagged leaves, from whence riseth a branched hoary stalk, with small leaves set without order, whereon are set yellow flowers like Camomill, that when ripe turn to downe.

Purple Gum Succory, hath the flowers of a purple red colour, and sometime blewish, others whitish purple.

Hawktweed, hath the same leaves with yellow flowers, having great round bulbous husks.

Mountain Hawktweed, hath the leaves hairy.

Sow-thistle, the leaf deep gashed, and much torn in the edges, set with prickles, the stalks rough, on the top are yellow flowers set in rough green husks, which turn to down as the other.

Smooth Sow-Thistle, the leaves jagged and torne of whitish green colour, branching forth at the top into diverse branches, which have on them pale yellow flowers, which pass away into Downe.

Mountain Sow-thistle, the leaves rent and torne, and indented in all its parts, branched at the top with less and less divided leaves; the flowers are blew purple, standing many together in small hairy green tufts; every one having twenty, or more leaves, broad at the end and nicked, that turns to Downe being ripe.

Rip-wort, or **Ripplewort**, the leaf in some places whole without any cuts or indents on the edges; then the lower part some few uneven cuts, like Hawktweed, the flowers are on branches, yellow, small and Star-like in husks.

Rocket, both tame and wild, the leaf broad at the end, cut in on the edges, each part rounder than other, and lesser and lesser down the rib, all jagged; the flowers are four long and round pointed leaves in bottle husks, growing on a stalk with short foot-stalks, spiked head like, one contrary to another, of a yellow colour.

Winter-cresses, or **Winter Rocket**, leaves cut and jagged in diverse parts, the same growing less and less to the bottom, round pointed, and something waved or unevenly cut; branched on the top with flowers of four leaves apiece, growing together in tufts, of a yellow colour.

Rape, or **Charlock**, or **Turnep**, being wild, the leaf at the bottom not jagged, but the higher and higher are still larger and jagged and waved, the ends roundish; the flowers are four yellow pointed leaves in a small husk,

husk, growing on a stalk with short foot-stalks, one against another, spiked.

Wild Beew, the leaf jagged and round, the flowers yellow, in an umbell.

Shepherds Purle, jagged and pointed, the Flowers are white, growing one above another by degrees spiked, which turn to panches or Seed-vessels, small at bottom, and broad at the heads.

Wild Rape, or **Turnep,** the leaf rough, hairy and crumpled; the flower is a yellow pointed leaves growing both sides the branched stalk, in spikes, which turn to small long pods.

Penbane, the leaf much rent and torn in the sides or edges; of a dark greyish green colour; the Flowers grow in tufts or divide themselves at the top of the stalk into small branches of a dark yellow colour, paler at the edges, with many purple veins therein; it is a hollow flower scarce appearing out of the husk, ending in 5 round points at the brim, with a purple point in the middle.

Garden-Gentle, or **Bears-Breech,** the leaf is parted into several deep gashes on the edges; the stalk from the middle up, is set with a spike of white hooded gaping flowers standing in brownish husks, with long sharp pointed leaves under each flower.

2. **I**N the speaking to these several sorts of leaves, and shewing what sorts of Herbs, Plants and Flowers they had a relation too; I have given several sorts of terms (used by Florists) thereby to set forth the many and sundry ways Flowers grow in; as some in branches, some in tufts, others in spikes, &c. Now for thy better information (Courteous Reader) I have caused all these sorts of terms to be Engraven, which take as followeth.

XLII. A Panick head, or a round close spike head, or aspired head. If long and slender then termed a long panick head, this is, when the Flowers grow out of a spiked head without any stalks.

XLIII. A Bulbes, or **Bulbous head,** are Flowers that grow round yet tend to spire, being more open than the spiked or panick head is, by reason the Blossoms have each of them a short foot-stalk.

XLIV. A tufted head, a **Bunched head** (a spiky head in Branches.) This is when the Flowers have pretty long stalks; and some with longer than others, by reason whereof they grow at a little distance one from another, yet all from one main stalk.

XLV. A Spiked head set at distances, or set by degrees, or set at several spaces; or a spiral head in spaces about the top. Some term it a **Labender like head,** or a **spiked knaped head.** See numb. 59.

XLVI. Charles of Flower, or Flowers set together in a **Whorle** or **Coronett.** When the Flower at several distances or spaces grow round the main stalk.

The **Giants Bell-Flower,** or **Giants Chestnut-Moxt,** hath long leaves tough and hollow in the mid-

dle, of an over-worn green, and a little indented about the edges; the Stalk is set with leaves, from among which the Flowers come forth Bell-fashioned, divided at the brim into five points, which turn back, and are of a whitish purple colour.

The **Cardinals Flower,** or the **American Bell Flower,** the stalks are hollow, beset with leaves, smaller by degrees to the top, from the bosom whereof the Flowers come forth, consisting of 5 long narrow leaves, 3 of them stand close together hanging down-right, the other 2 are turned up with an umbone between them; of somewhat a paler colour than the leaves, which are of an excellent Crimson.

The **Yellow Gentian,** hath a stiff round stalk full of joints, with 2 small leaves at every joint compassing the stalk, which from the middle to the top thereof, is adorned with many rundles or coronets of flowers standing at every joint, with 2 green leaves under them, which Flowers are laid open like Stars, of a yellow colour, with some thrums in the middle. Some term this the **great Gentian.**

XLVII. A Narrow spiked head; or, a **spiked head set on either** (or both) **sides with distances;** or a **long narrow spike;** or by some called a **Seed sprout,** chap. 5. numb. 85.

If the Flowers be but on one side along the stalk; they are termed Flowers set in **thin long Spikes,** or set one above another in long spikes; or a **seed sprout single flowered;** if on both sides termed a **Seed sprout double flowered.**

XLVIII. A spiked head thick set; or an **Orchides head;** this is a kind of Spire or Panick head, for the ground out of which the Flowers grow; yet the Flowers start out of the said Spire by long necks or cups; and these kind of Blossoms usually spring out first in the bottom of the Spire, and are perished before the top put forth any blooms.

Such a spiked head, but more rounder on the top, set full of Red and White Rose Flowers, is the Crest of *Truches Van Reinselden,* of *Alsatia,* a Province in Germany.

XLIX. An Umbell head, or an **Umbell of flowers** thrust thick together, or Flowers in an umbell; this is when several Flowers grow together from one main stalk by divers foot-stalks, yet not one exceeds another in height, but are all even set in the top; of some termed, a **shade of flowers.**

Such a Flower slipt A Leaves V is born by *Francisco* of Italy.

The **Candy Tufts** are small Plants whose Stalks are set with long narrow notched leaves of a whitish green, at the tops stand many small single Flowers close set together, which in some are white, others purple spotted in the middle, others of a pale purple.

L. A knotted head; or **round staly heads;** or clusters, or divers heads of flowers set on branches; a **knop head;** when the heads are in rounds or ovals.

LI. A staly spired head; or a **staly panick,** or spiked head; that is when there is no flower from the

Herb, but a spired head composed of chaffy, or scaly leaves; and such kind of scaly spires are often born in Arms, as I have observed both in French, Spanish, German, especially Italian, and Poland Coats, and sometimes in our own home Coats as:

On a cap B turned up Er. 2 such O is the Crest of Monsieur De la Loze.

A a Demy-naked man holding in his right hand such a scaly head O, born by Gonzague.

B 3 such panick heads of scales O Born by Van Wint-

Out of a Coronet the like Head A is the Crest of Noverburg of Bavaria.

LII. A round chaffy head, hairy; or a scally head guined, or Bearded; but most generally, a chaffy head parted into many threds.

LIII. A pannicle chaffy head; or scally tufts, or panick, or spiked chaffy heads in branches; and a bushing spiked head, thick below and smaller above.

Flower Gentle, of some termed *Love lyes a Bleeding*, it hath a thick and tall crested stalk; with many reddish green leaves, the stalk is divided into branches, bearing long spikes of round hairy tufts of a reddish purple colour, which are divided into several parts; of these there are some purple mixt with green, others of a whitish green, others of a murrey, others have the hair mixt, some purple, scarlet, and gold colour, or green red and yellow.

The *Golden Locks*, or the *Golden Flower Gentle*, are small stalks beset with narrow long leaves of a whitish green; bearing at the end many double small flowers of a gold colour.

LIV. A chaffy head with sparfed tufts; or tufted panicle spread; or a panicle of many sparfed tufts of chaffy heads, standing on small long foot-stalks; a *Rizomed* or Oat-like head.

LV. Branches of Flowers, or more generally termed, a stalk branched; or the tops of the stalks run into short sprays, or foot-stalks, bearing every one a flower.

The *Indian Yucca*, or *Indian Bread*, it hath a great round tuft of hard long hollow green leaves, with points as sharp as thorns, which always remain so; the stalk is strong and round divided into several branches, which bear divers flowers, something resembling the *Fretillary*, but narrower at the bottom, containing six leaves, the three outer veined on the backs from the bottom to the middle, with a reddish blush upon white.

LVI. A stalk with four leaves, (or leaved,) coupéd, or cut of in the top, and sliced at the bottom.

LVII. A *Garb banded*, bowed in the head. This in a Field Vert. Is born by the name of *Bower*.

G 2 such contrary Imbowed. Is the Coat of *Van Barrenleben*.

LVIII. A tuft of Rushes, or a tuft of Grass with a fibrous, or *Thready root*; or a root composed of strings, and small fibres. Three such Vert. roots Sable, in a field Argent. Is born by the name of *Rushan*.

LIX. A Spiked, or Panicle Head, with roundels of flowers set at spaces; a stalk with roundels round

the top in degrees. A *Lavender Knap*, or the stalk set with leaves at distances, and round heads of flowers. see numb. 45.

A 3 Lavender Knaps coupéd, proper. Born by *Lavender*.

LX. A round scally bush, or head, shouting forth at the top many small threds, or thrums; or a thred-dy flower out of a round scally head; or a bulbous scally head; or a round head, thick set with sharp bearded husks.

Of these kind, are the *Centory flowers*, having pale blew threds, out of green heads.

The *Knaptweed*, hath purple threds.

Saw-wort, the threds are of some white, others red and purple.

Dark-weed, hath a small head, with a large yellow tuft of threds.

LXI. A round loose head, or knape; or scally loose head, pointed: A *Bur*, or rough head with crooked points; or a husky threddy head; or a tassel of threds.

Of this kind are the Flowers of the herb *Loose-strife*, and the yellow round headed, *Willow herb*.

The *Herb Burnet*, hath the flower purple out of the knap which is of a brownish colour.

The *Burdock*, hath a rough green head.

Hares-foot, is long, spiked, and hairy, of a white, or bluish colour.

Bacchar flower, consists only of small threds or thrums, standing close, and round, of a dead purplish yellow colour.

LXII. A small scally head, out of which sprung a *Border*, or pale of leaves, set about a middle thrum, round pointed leaves, compassing a thrum.

Of this kind are the flowers of *Sneefewort*, the pale or border of leaves blew, and the thrum yellow.

The *Blew Bottle*, hath the leaves hollow, and small at bottom and open at the brims, and cut and notched deeply into divers parts, with threds in the middle.

LXIII. A round spike of threads of leaf; a head of long slender sharp pointed leaves; a *Bush* or tuft of leaves, rising smaller at the top; a loose umbel; or a loose panicle head.

The *Cresfoil flower*, proceeds out of these green heads, and are of divers colours, as white, red, purple, bluish colour, and the like. This is called, the *ground honyfuckle*, the head being circle-like.

LXIV. A long husk notted on the top, with a thready flower, or a flower composed of threds.

The *hoary Mountain Colts-foot*, hath such a purple-flower out of a short furrowed husk.

The *Bearded Creeper*, hath such a hairy, or fine cut flower, of a yellow colour. Some call it the *woolly plant*, or *Beats-wort*.

LXV. A feather flower, long *Plumes* of feathers set in a foot-husk; or long woolly hairy threds waved; a stalk plumed with a Feather.

O 2

Of this sort is the *wild Clymer*, or *Travellers joy*, of a hoary silver colour, which when the flower is past, comes a brownish seed, thus plumed.

LXVI. A *Hole*, with a silken down out of it; a winged seed.

LXVII. A *Bottle like scabby head*, out of the top or middle, riseth soft and woolly threds, with 3 *chives*, tip with pendants.

The *Chistle gentle*, bears such a like flower, but the colour is variable, in some white, other red, stammel, and blewish.

LXVIII. A long round *scallike head*; or a long round head compact of many scales.

The *Callidony*, or *French Lavender*, have such flower; some are white, some blewish purple, and yellow, with green scally heads.

LXIX. The first is termed, a *husk composed of leaves*, out of which riseth other long and narrow leaves. See numb. 83.

Like this is *Star-wort*, whose Flower is yellow; and *Elecampane*, which is the like. These husks are also termed *foot-husks* of leaves.

The second is termed, a *midling foot-husk*, deeply dented, or cut to the middle, the top sharp pointed; with leaves standing therein round pointed, or broad pointed, and narrow bottoms, according as they are.

Of this kind is *Wild flar*, some having a blew flower, others yellow; in *Spain* white, with purple veins in the leaves.

The *Sweet Nigella*, hath a blew Flower, and the husk cut to the bottom, as if it were small leaves; and so is the *Cockle*, whose flowers are some blew, others purple, but generally between both.

3. **F**ROM the manner of the bearing of Flowers in their heads, we shall now descent to the Flowers themselves, and shew you how they are termed, according to their nature and kinds.

LXX. Out of a short, or small pointed husk; a *gaping*, or *hooded flower*; There is a sort, which hath the *under Lip* hanging down, and round dented at the bottom.

Balm, hath the gaping flower, blewish purple, some have it pale carnation; and *Turky Balm*, perfect white.

Mother-wort, is purple red, out of a sharp pointed rough and hard husk.

Mint, hath the flower some a pale bluish, others purplish, and the *Hungarian Mint*, more white. *Calamint* is purplish and of a bluish colour.

Sage, have them purplish, and some milk white, others blew.

Bugle, hath a broad hanging lip, of some blew, others ash-colour, or white and bluish colour.

LXXI. The first is called, a *hooded gaping flower*, in a pointed husk, or prickly husk; also a gaping flower hanging out in *Tongue*; or with its *Lips* hanging down.

Of this nature is the *Bear breech flower*; which groweth together in spikes, and are white.

The second is called, a *hooded gaping flower*, standing in a *husk*, with three long threds growing out of a tip at the ends.

Of this kind, is *Herb-bane*, or *Kill-herb*; of which there are divers colours, as brownish, white, yellow, blue, but most commonly they are of a purple colour.

LXXII. This first, is generally termed, a *Cod-flower*; because there is no Cod-seeding flower, but they have this kind of make, to the flower, though different in the colours; as

The *Wild Bean*, have the flowers purple.

The *French*, or *Kidney-bean*, have scarlet flowers.

The *Sanured*, or *Garden Beans*, white.

Pease, have them white, red, and bluish colour.

Wild Pease, are white, and some mixt of purple and ash-colour.

Spanish Pease, are of a pale yellow.

Cichlings, or *Pease-Everlasting*, of a pale purplish red. Some are blew, and of a violet purple.

Wood-earth Nuts, of a purple crimson.

Cetches, of a pale yellow, some purple, white, and bluish purple.

Lentils, of a sad redish purple.

Tares, or *Wild Cetches*, purple, some whitish.

Lupines, are white, others yellow, blue, bluish, and veined.

Ciches, are either white, purple red, or lighter, or deeper.

Wood Orobis, of a pure white, others of a bluish purple.

Cocks head, of a pale red, with some blueness amongst it.

Pulse, some white, and pale purple.

The second, is termed a *Cod-flower*, with an *umbone*, or *horn*, growing out of the middle of it.

Callia flower, is of this nature which being bloomed and full open appears to be four round pointed leaves, having the four points of the husk seen behind them; with many green threds in the middle standing about a long small crooked umbone, or horn, which after turns to be the *Pod*, or *cod*.

The third sort of *Cod-flowers*, is called the *single Cod-flower*; because it consists of one leaf turned double, within which are set in a short cut husk, several small threds.

Of this kind is the *Bean-Trefoil*, whose Flower is yellow.

Rest-Harrow, the Flower is also yellow.

LXXIII. The first is termed, an *open*, or *wild helmet flower*, with *Umbones*; others call it, *Larkheel helmet flower*; or a cut, or divided helmet flower.

Wolf Bane flower, is of this kind, and are either blew or purple, or white and yellow.

The second is called the *helmet-flower*, or *Horned hood*; of which there are divers colours, as blue, purple, white; which grow altogether in long spikes.

LXXIV. Is an **hooded Water-flower**, out of a **skinny** two parted husk; I take this to be of the bell flowers kind.

Water Nilfoil flower, is of this kind; being composed of a middle roundish heart pointed leaf, compassed with two other in manner of a hood, till it be blown open, out of a bipointed skinny husk.

LXXV. A **Honks hood**, or a close **helmet flower**. See numb. 73.

LXXVI. The first is a **Dragon head flower**; others term it a **Pulse like flower**, resembling in a sort those that are called **Cod flowers**, but much lesser and slenderer.

Goats Rue, hath this Flower of a pale blewish purple.

The second is termed a husk of 4 points, having 4 leaves, of which two (or the lower leaves) hang downwards; out of the middle proceeds many small long threads pointed or tipt. An **unhooded flower**, a **gaping flower** cut into leaves.

Tree Germander, hath the Flowers of this kind; white, in a round pointed husk.

The third sort of Flower is called, a **gaping flower** cut into parts or leaves; out of a **round pointed husk**, with the lower leaves longer, and turning downwards, and three crooked or bending threads tipt, out of the middle.

Dittany, hath a flower of this kind white, and some reddish, consisting of 5 long leaves, 4 standing upwards and the fifth hanging down, and turning up at the end again, with a **Cassel** in the middle, made of five or six long purplish thred that bow down with the lower leaf, and turn up at the ends again, with a little **Freez** or **Thrum** at the ends of each.

LXXVII. An open **hooded flower**, an open **French hood flower**, or after others, a **hooded open flower** with a **Spur**, or **Tail** turned down, with threads in the middle.

The second kind is also termed the **Fly flower**, or an open **hooded flower**, with a **heel** or **Spur** behind it (without any threads in the middle) but with a **round stile**, or head.

Of this kind is the handed **Orchis**, which is of a pale purple colour: The **Wasp Orchis**, of a brown yellow.

The **Gnat flower**, that is yellow and brown.

The **Bird flower**, which is either White, or Purple, or both.

The **Bee flower**, hath small narrow leaves, the stalk bears 3 or 4 flowers one above another, each contain 4 leaves, 3 small and sharp pointed, of a bluish colour, and turn up towards the top of the stalk; the fourth is round, and in form and colour so like a Bee, that anyone unacquainted therewith would take it for a living Bee sucking of the Flower.

The **Gnat Satyrion**, the Flowers grow after the same manner, only differ in the lower leaf, which in this is like a **Gnat**, or great long **Fly**.

*

The **Fly Orchis**, is in all things like the last, except the Flower, which in this the Fly hath legs, a list of Ash-colour crossing the back, and the lower part black, others white spotted.

LXXVIII. The first a **Larks heel flower**, from the **Spur** or **heel**, turning up on the back of the flower.

The **Larks heels**, is both white, crimson, purple, and blew.

The second is a **Foots head** or **Cotule**, with a broad dented lip hanging down, and a broad blunt tail or horn behind, turning up.

Of this kind is **Dog-stones**, which are of several colours, as white, red, blew and purple spotted.

The third sort is an open round **helmet flower**, with a **broad lip** hanging down, with a **straight heel** or **horn** standing upwards.

All these sorts of Flowers mentioned numb. 77, 78. are generally termed **Lark heel**, or **Horn**, or **Spur-flowers** (except the Florist proceed to a further description) and so are passed over.

LXXIX. The first is a **Snap-Dragon flower**; so termed by reason of its opening and shutting its mouth upon our pressing it gently with our Fingers; it hath a long leaf jagged; the flower is in some White, others Red or Yellow; or White having the upper leaves in the inner side, striped with feathered lines of a purple colour.

The second is a **round flower**, consisting of eight leafs round pointed (or broad pointed and round) set about a **head** or **pod**, having three **chives tipt** with **pendents**; a **pod** paled with eight round leaves.

Upon the division score of this quarter, is placed a **Crescent flower**, it consisteth of 3 round leaves, each having a chive or thred with a pendant lying upon it.

Of this kind is the **Virginia Spider** - **Wort**, or **Day flower**, which is of a pure Blew colour, the pendants black, having a thin skinny husk, of 3 leaves or points, on the back of a fullen yellowish hue, in which the Flower is closed before it bloom. See numb. 13.

LXXX. The first is a **five cornered flower**, or a **flower of one entire leaf**, with 5 corners, with a head or **pod**, or **Umbell** in the middle, compassed or set about with threads.

The second is a **Cinquefoil flower**, or a Flower of five round leaves sharp pointed at the ends; standing in a **husk**, whose long points exceed the Flower, or a fine pointed husk.

Of this kind is **Bullein**, which is of several colours, as white, yellow, and bluish colour.

The great **Corn Aiolet**, the leaves round pointed, of one whole Flower, of a fair purplish blew and white at the bottom, with a round **white point** in the middle.

The **Male Cistus**, hath woody branches covered with a whitish Bark, the leaves are long and narrow whitish green, crumpled and hard to handle, 2 standing

ing

ing at every joint; the Flower cometh forth at the end of the branches 3 or 4 together upon slender foot-stalks, each consisting of five small round leaves, like small single Roses, of a fine reddish Purple colour, with many yellow threads in the middle, which falling away, are succeeded by round hard hoary heads, with brown seeds in them.

The **Gum Cistus** hath the leaves of a dark green, but whiter on the back side; the stalk and leaves being bedewed with a clammy sweet moisture, called **Gum Ladani**; the Flowers are white, each leaf having at the bottom a dark purple spot, broad below, and pointed upwards, with some yellow threads in the middle; which is succeeded by cornered heads, and brownish seeds.

The third, is a Flower of four round pointed leaves, and a husk on the back of as many leaves, wherein stands a long **Stile** or **Petiole**, compassed about with many threads tipt at the ends. A four leaved Flower in a long pointed husk.

Of this kind is the **Caper Flower**, being white, the husk green, and the stile and threads yellow.

LXXXI. The first is a Flower of 5 round pointed leaves (without any husk or green leaves under them) with a long round **double pointed**, or **horned head**, compassed with a few threads tipt. A five leaved Flower.

Of this kind is **Nigella**, made of 5 blue leaves laid open like a Star, with a green head and threads. Some of the Flowers are of a yellowish White, with green threads tipt with blue.

Single Peony consists of four, some five leaves, with such a stile and threads tipt about it.

The second, is a small Flower of four Leaves round pointed with some threads in the middle; called a **Caterfoile**, or a four leaved Flower.

LXXXII. The first is an open **Scaly head**, set in the middle of several long and sharp pointed leaves; out of which thrust themselves many **downy Threads**.

Of which kind is the Flower of **Spanish Bastard Saffron**; they have the threads yellow, and Saffron colour; and some white, but those are very rare.

Candy Saffron, have the scaly heads, set more closer (like a **Chistle head**), and the threads thick set together.

The second is many long and narrow leaves, set as a **Pale** or **Border**, about a **middle Thrum**, at the bottom as a husk, is several long and slender leaves sharp pointed, spreading open by two together, like a **Star Flower**.

Of this kind is **Winter Wolfsbane**, having the under-leaves broad and flat pointed, cut into 2 parts.

The third is a **double double pale**, or **border** of broad and flat leaves, cut in 3 or 4 parts at the top; set about a small **middle thrum**, all proceeding out of a **scaly head**, or **husk cut into leaves**. From the bottom of which husk, issue round the double pale, several foot-stalks; at the end of each is the like pale, compassing a **thrum out of a husk**.

*

Of this kind is the **double Marygold**, and the **Bacchanapes on Horseback**, being of a gold yellow colour.

LXXXIII. The first is out of a **head of many leaves** (or **scaly leaves**) or a **round head** composed of small long leaves set close together; in the middle is many long narrow leaves cut into, or dented at the tops or ends; set in a **Pale** or **Border** about a **Thrum**.

Of this kind is the **Stay-wort Flower**, whose colour is of some yellow, others blue, others purple, the thrum in all being yellow, and the leaves in the border sharp pointed.

Eccampane, hath the border of leaves slender and sharp, and the thrum all yellow.

The second is a **round close scaly head**, out of which proceeds **Downy threads**, or a smooth scaly round head, with **Down**.

Of this kind is **Bacchar**, of a purplish yellow, which turneth to a whitish down.

Outwort, hath the threads or thrums white.

Cloudwort, hath the threads, or downy hair yellow.

Knapweeds, hath five purplish threads or thrums.

The third is a **round head** or **husk**, cut or sharp pointed on the top; from whence issues a **pale** or **border** of round pointed leaves.

The fourth is the same Flower laid open, which is a **pale**, or **border** of leaves, with a **thrum** in the middle.

Of these kinds are the **Mountain Tansie**, the border white, the thrum yellow, like to **Camomil flowers**.

Featherfew, hath the same coloured pale and thrum.

The **Corn Marygold of Candy**, the border yellow, and the thrum a yellowish brown.

The **Corn Marygold of Pern**, which is that great Monster of a Flower, called the **flower of the Sun**, whose pale is yellow, and the thrum brownish, with Star like Flowers in the middle.

LXXXIV. The first is a **Caterfoile inbecked**, or a **four leaved inbecked flower**, which is broad and round pointed, with an inbeck on the top of each leaf; having a dark spot at the bottom of the leaves pointing upwards; with divers **tipt threads** or seeds in the middle.

Of this kind is the **Male and Female**, and sweet **Gum Cistus**. The leaves of the Male, of a fine delayed reddish colour, like the **Eglantine**, or **Spier Rose**, with heads or seeds also.

The **Female Cistus** hath the Flowers White, with a purple bottom and yellow seeds. The **sweet Cistus** hath the leaves of some white, with purple bottoms, and other yellow.

The second Flower, is a **Bottle like husk** surrounded, with 5 round pointed leaves, with threads in the middle.

Of this kind is the **Syrian Sage Gullein**, the leaves yellow, many of the Flowers standing together, in

a kind of round, like to those of the **Wild Campion**, or **Flower of Bristol**, called by divers **Stone-suck**.

LXXXV. The first is a round **long husk**, of some called **hose husk**, with six open broad round pointed leaves.

The second is a **round furrowed head**, or **husk**, with a flower of seven **round pointed leaves**, about an **head** or **pod**.

Of this kind is the **white tufted columbwood**, the head is a Silver green, leaves pure white, growing many together in a tuft.

LXXXVI. The first is a **hose dented** in the top, set in a **foot-husk**; (some term it a **Hole in hose husk**; others a **long crested husk in husk**, with a flower of five long sharp pointed leaves.

Of this kind is the **Saristrage** or **Break-stone**, the husks are brownish green, and leaves White.

The second is a **long cod**, winged or eared, set in a **foot-husk** of two pointed leaves; the Flower is composed of one whole leaf, plaited into five round pointed peeping ends, a two leaved husk, with an eared round cod-husk.

Of this kind is the **lesser Corn Violet**, whose flower is of a fair purplish blue colour, with a pointell in the middle, when it is bloomed, or fair open.

The third is a thick short **bottle-husk**, compassed in the bottom with a **shoot** or **foot-husk**, composed of two sharp pointed leaves, out of which proceeds a peeping flower, of five or seven leaves broad and round, invecked on the top.

Of this kind is the **Childing Pink**, whose Flower is a faint red, the husk a grayish green; some have the Flowers white, others blue.

LXXXVII. A hollow **Hose flower**, divided at the brim into four round parts, set in a **shoot husk**, composed of 4 sharp pointed ends or leaves: some call it a **Bell flower** with a **turned brim**.

Of this kind is the **Sweet Mountain Rose**, of a deep red on the out-side, and paler within; having some threads in the middle.

LXXXVIII. This is a **Branch** or **Tuft** of **Crane-bill seeds**, and each is an **umbone**, cut into five parts at the top, with a **Crane Bill** issuing out of the middle, or small beaks pointing forth.

After this manner doth the **Crane-Bill flower**, or **Pink-Needle**, and **Goats Thorn** bear their seed; and **Hutoby** also.

Aenus Comb, or **Shepherds Needle**, hath the Flowers in fashion of an umbell, and the Seed Vessel like the long Bill of a Bird.

LXXXIX. These Figured 89, 90, 91, 92, 93. go all generally by the names of **Bell-Flowers**, but that each may perfectly be described, take this further account of them as our Florists deliver them.

The first is a **Bell flower**, or a **Cup flower**, that is, a round hollow flower, wide at top, and narrow at bottom, set in a **pointed foot-husk**.

Of this kind the **Cotton Tree Plant Flower** hath a resemblance, which is broad above, and small at the bottom, and is parted to the bottom into five thin leaves of yellow, with a stiff reddish middle pointell, compassed with 5 or 6 yellow threads.

The **Daffodil** hath six pale yellow leaves, with a **Chalice**, or **Bell**, or **Cup** in the middle, of a deeper yellow.

The second is a **pendulous flower** like a **Bell**, dented at the edge, standing in a short husk, cut into four or five points.

Of this kind is, **sleepy Night-shade**, whose bells are in some red, others purple.

Alkanet, hath a yellow bell, set in a long cut hairy husk.

Comfrey, have them long and hollow, of a pale whitish colour; others pale purple, and some of a sad yellowish colour.

Wild field Bell flower, commonly called **blein bells**, are dented in the edges into five sharp points; set in a long and slender leafy foot-husk.

The third is a **Bell flower**, with a **Lip**, set in a **shoot husk**; or, a large long hollow flower; a little more long, and eminent at the lower edge.

Of this kind is the **field Fox-glove**, of a reddish purple with white spots within, having some threads in the middle.

Sesamum, or the **Oyle grain**, or **purging pulse**; hath a like kind of whitish Flower, made of one leaf, without any division in the edge, with a few tight threads in the bottom.

XC. The first, is a deep dented **Bell flower**, plaited, or cast into **furrows**, set in a long and slender leaved husk.

Of this kind, is the **Rampion**, or **Bell flower**; which is blewish, with a long **stile**, or pointell in the middle.

Coventry Bells, are more open than the ordinary sort, and parted into seven or eight corners, of a pale purple colour.

The **great Throatwort Bells**, have the long dents turned a little outward, and are of a purplish colour: these are also called **Canterbury Bells**.

Stamony, hath wide open tops cut into four sharp ends, which turn a little outwards, and are of a whitish colour.

Mountain Soldanella, is a bell-flower consisting of one leaf plaited into five folds, each ending in a long point; which makes the flower seem to be five leaves, of a fair blew, in some deep, and paler, and others white.

The second is an **open mouth bell flower**, finely dented about the edges, having a **Rose-like Husk**, with plain long **Barbs**, exceeding in length the flower, or bell.

Of this kind is the **Bell flower**, of the **Thorny Indian Cotton** with five **Barbs**, or pointed corners; or as some describe it, ending in the open in five pointed parts, being yellow with purple bottoms.

XCI. The

XCII. The first is a **Bell-flower**, with a wide open and turned brim, and narrow bottoms; without any division in them; of some only termed, a **Bell-flower** with a **Brim**.

Of this kind is the flower of the great white **Bind-weed**; set in a short husk, consisting of two sharp pointed leaves.

The second is a **Bell-flower**, having the brim cut, or divided into eight points; or the brim round dented, or eight cornered; a **Bell** with an **Engrailed brim**.

Of this kind is the **Hollow leaved Bind-weed**, which *Parkinson* in his *Herbal*, describes thus, it is one whole leaf yet plaited, the brim having five corners, where it is broad like a cup, or bell; and small at the bottom, of a fine purple colour.

The **Spanish blue flowered Bind-weed**, is the like; being folded into five plaits, which open into so many corners in the brim, of an excellent sky coloured blew, with white bottoms pointed upwards, and yellow in the middle.

XCIII. The first is a **Cup**, or **Bell-flower**, with an **Inbeck brim**, standing in a short foot-husk.

The second is out of a short dented husk, a long hole, or hollow trunk flower, with a brim parted into five sharp points; or the brim rowel like.

Of this kind is the **Bell-flower of America**, which are small long and hollow, with a five pointed brim; of a bright red colour, and plaited like the bell-flower, with five **clives** or **threads** in the middle, tipt with pendants.

The **white Jasmine**, is a small long hollow trunk, ending in five leaves pointed, and turned up like the brim of a **Bell-flower**, standing in a small husk.

The **Spanish Jasmine**, have the turn up, or brim-leaves more rounder, and fuller, growing to a point; and are white with purple edges.

The **Indian sweet yellow Jasmine**, have the leaves of the brim round pointed.

The **Virginian climbing yellow Jasmine**, have a long hollow trunk, ending in five points, but not laid open into leaves, as the former.

The **blew Pipe-tree**, or **Lilac flower**, is a long hollow trunk, ending in five leaves, or points, turned up; or opening into five pointed leaves.

The third, is a **Bell-flower**, plaited and **inbeckt** on the upper edge, and long or more eminent dented, at the lower edge; with a **double pointil** in the middle; set in a **hairy** or **threddy** husk. Some term this a **bell-flower with a Lip**, because the lower side with it indented corners, hang down, or reach further out, then the the higher side of it, like the **Bell Lip**, *numb. 89.*

XCIII. This is termed, a **Long**, or **hole husk**, sustained by two small and long leaves (in manner of a foot-husk) from the middle whereof shooteth forth a narrow hollow trunk, or long hole-flower, of one entire leaf below, but ending above into five corners, or small pointed leaves, turned or laid open, like a **Star**. Others term this a **hole husk**, eared at the bottom. Others a **hole flower in hole**, eared.

The **Uernal Gentian**, is of this kind, whose flower is perfect blue, with a white line, in the middle of each leaf.

XCIV. An **Aspodil flower**, that is, a round husk, with a Flower on it, or on a stalk, a round head; on the top whereof stands a flower, consisting of six long and narrow leaves, growing in form of a cup, or bell, with two **chives** in the middle, tipt with pendants. Some call it an **Aspod-flower**.

Aspodil, that is the great branched; is of this kind, which is white, some yellow; whose Flower leaves are round at the bottom, which naturally make a round head at the stalk of themselves, without any other bulb, or head to stand on.

XCV. The first is a **Bulb**, or **Bulbous flower**; or a round head flower, consisting of four, five, or six leaves, growing (as it were) in convex, or half round.

Of this kind, is the Flowers of **Sarsa parilla**, which are white; and also the **Lilly Com-bally**.

The second is a **Bulbous flower**, with a round bottom, being all one flower, only divided in the top into four or five round pointed leaves.

Of this kind is the **Indian Yucca**, which is a **pendulous flower**, hanging downward; consisting of six hollow, or convex leaves (or guttered leaves) which in their growing make a round bodied flower, with an **Aspodil**, or small rising towards the foot-stalk, white, with a bluish, or reddish colour, spread on the back of the three outward leaves, from the middle to the bottom.

Ladies Traces, are small round white flowers growing on spikes, which when they are extraordinary blown, turn to be sharp pointed, like bell-flowers.

XCVI. The **Lady Slipper**, so called from the resemblance the fore part of the flower, hath to a **Slipper**, or **Pantable**. Thus otherwise termed in its description; the flower is of a long oval form, and hollow, at in the upper part with ears like slippers; with four long narrow leaves at the setting on of the flower unto the stalks, which was as a husk to enclose the flower.

The **Ladies Slipper** is of this kind, and is of a fine pale yellow; and some browner, other purple, some white, with red streaks through the bellies of them: the back leaves are of a dark colour. This is of some Florists, called the great **wild Belleboz**.

The second is five long pointed leaves set about a **Pod**, or **Seed-Vessel**, or a round head pointed.

Of this kind, is the **black Belleboz**, or **Christmas Flower**, which is made of five round pointed white leaves; sometimes dash with purple about the edges, and some all purple, with many pale yellow threads, or **thymes**, standing about a green head with divers points.

Bastard Belleboz, or **Bears-foot**, have the flower of a pale green, with greenish yellow threads, or **thymes**, about such a like head, or seed-vessel.

XCVII. The first of these is a **spizg**, or **spike**, set on both sides, one contrary to another, with **mossy** or **hairy buttons**, or **balls**, or **downy catlines**.

Of this kind is the **Oak of Cappadocia**.

Rose sponge, or **Wyer balls**; are burs growing on those twigs, made of brown and yellowish threads, round soft and hairy.

The second is a *spike*, or *twig* of round *pendulous* *bottle-like flowers*, set opposite one to another, on short foot-stalks; ending in four points, or corners.

Of this kind is the *Sea Houseleek*, the flowers grow thick without foot-stalks, of a whitish in some a yellow colour, divided at the ends into five or six parts, hanging down.

Harebells grow thus, of which there are divers colours; as white, blue, light green.

These Trees and Plants I have read off, but without any certain description.

Cerfoil, is an herb in operation, and working in a manner fiery.

Cetewale, is an herb whose root Physicians use to gather in the Summer.

Chast Lamb, or *Agnus Castus*, have such virtue in the flower and seed, that being digested of any person, it makes them chaste.

Crowtoe of some called *Uacinum*: It hath a leaf like to *Portate*, an handful in height, in breadth it is less or more small than a Maidens finger, of a most curious green colour; his top is full of purple flowers.

Dictamus, an herb which groweth in *Crete*, and is very wonderful (being eaten) in loosning and unbinding the straightness of the body; the *Dart* being wounded with a *Dart*, in eating it, is soon cured.

Dragaunce, is an herb so called, for that it is bespotted, and is specked in his colour much like to a snake, representing the very *Viper* or *Dragon*, which herb the *Viper* it self stands in dread of. Of some it is called *Colubine*, the flower is purple coloured, and black in the middle, it is cloven and sharp in the middle as the Serpents tongue is.

Dragon, or *Aron*, of some called *Haron* or *Jaron*, the *Romans* call it *Serpentarie*; it is a shrub two cubits high, straight up: it groweth in hedges and shedy place, for the Sun it cannot abide. There are two kinds of them, the great and lesser, which hath white little spots.

Dwale, or *sleepy Dwale*, is a shrub which groweth near to the Sea, very abundant and plentiful in young shoots. There is another kind of the same name called *made Dwale*. The one causeth sound sleep; the other, wonders in imagination.

Etele, of some it is taken for *Ev-bright*, but this hath his leaf very thin and plain; it is not of so fresh a green colour, or of the like look, as many other plants be; but this it hath above them, that being prest gives a and juice like milk.

Fenkell, is an herb common both for the Field and Garden; the juice whereof quickneth the eyes; Serpents eating thereof keeps them from many sicknesses, weakness, old age.

Frankincense tree, it is plentiful in boughes; the leaves are like to our *Pear-leaf*, saving it is much more smaller, and in colour as green as *Rue*, in rind and bark

as soft as *Laurel*, its Gum or Tears is a most sweet perfume being burnt.

Hares foot, of some called *Hares Cummin*, it is an herb growing in Garden Allies.

Jacint, or *Jacynth*, is an herb having a purple flower: Some are more airy, bespotted with purple and red. It hath a certain Flax, like snow. See *Sentian*.

Jupiters Beard, or *Goldilocks*: It is hairy like *Asop*, or *Hyslop*.

Kastany, is a tree of good high growth; if it be cut down, by and by it springeth up, spreadeth abroad and beareth infinite of blossoms, of a colour, his fruit hangeth between leaf and leaf double, or by couples, in manner of a *Hans stones*.

Laburnum, is a Tree growing upon the *Alps*; whose wood is white and hard; the flower is a cubit in length, and so noisom that no Bee will touch it.

Liricum-fancy, or as others judge *May Lilly*, for it resemblance is a-like; the flower is very white.

May-gold of Bonardus, of some called, *Wood-warren*; others *Loose-strife*, or *Verb Willow*, because it grows in Meadows like to *Broom*. It beareth a red-flower; it is so bitter that no Beast will eat thereof.

Holin, or *Long-wort* as some call it; the root is long, the flower white, and somewhat wan. It is a deadly bane to fish.

Myh Tree, it groweth most commonly near to the Sea-shore. It is one of the odoriferous kind or sort, which have sweet scent or smell.

Nymphs tree, it is of an exceeding great height, very soft and tender in the bark: In the fruit it is like to the *Cherry*, as sweet and as small also. A *Nymph* that was Daughter to *Nestune* flying from *Priapus*, was turned into this Tree, and thereupon it had first its name.

Papirus, or the *Rush of Egypt* and *Siria*: In length (it is reported to be) ten cubits, growing in the fen and marshy grounds; of this was paper at first made, as the name yet seemeth to testify; of this rush they make Candles and Torches (as we do of *Bull-Rushes*) without Week or Cotton.

Pearserthnut, the Greeks call it *Astragalos*, the Latine *Ficus Terre*; the *Fig of the Earth*. In manner of growth it seemeth to be but a small and very short shrub; It is in leaf and bearing like to the *Cicer*, or *Parlsnep*.

Pbleum, is a tree of a strong stock, and as small of height, in his leaf very fertile, and in a manner fleshy. It giveth orderly leaf after leaf, as they fall away.

Plane-tree, so called from its breadth and plainness of leaf.

Oak-fern, called of some *Polipodeck*, is a branched herb growing generally on the tops of old Oaks and Walls.

Spicknard of India, so called, because supposed to come out of those parts, being the leaf is gathered swimming aloft in the Clouds and Streams of *India*, without either root or stalk, which the natives pierce and prick, then lay it up to dry. Yet some say it grows in *India*, and *Siria*.

Terebul, is the name of an herb leaf in *India*, which swimmeth above the pools and ditches, without any root

that is seen, it is of some called **Malabathrum**: whereof cometh a most precious and sweet Oyl.

Crayon, is a Tree or Shrub, that hath his bough, seed, and leaf like to the **Nastich Tree**, but not altogether so great. It floweth and distilleth that humour that is like Gum; in the harvest time the leaves smell ramishly in manner like **Goats**. There is an herb like this, which some call **Scorpion**, and **Tragos**.

Tree of Paradise, is a Tree that beareth fruit like a cluster of **Grapes**, but in bigness of an **Apple**. It is covered with a yellow Coat, and his leaf is very long and broad, for the which it is of very short life, for in the second year his body dryeth up and waxeth barren.

Turbit, whose leaf is like the **Lawel**, it groweth in *Egypt*.

Aervain, of some called **Holy herb**; the *Mages* call it **Juno's Tear**, or **Hercules moist Blood**. The *Romans* **Cocks Comb**; it groweth only in the Waters, where Doves in Companies fly and make their food of it.

The **Virginian Periploca**, or **Virginian Silk-flower** so named by some Herbalists. It riseth all in stalks, set at several joints with two long broad veined round pointed leaves, at the top out of a **skinny hole**, comes a great tuft of Flowers thirty or forty, hanging down on long foot-stalks, each consisting of five small hollow leaves of a pale purple colour; after they are past comes long **crooked Cods**.

The **Indian flowering Reed**, it hath fair large leaves coming from the joints of the stalk, bearing at the top one above another divers flowers like in fashion to the **Com-flag**, of a bright crimson colour.

The **French Hony-suckle**, or the **Red Sattin-flower**, hath many stalks set with winged green leaves, and at the joints come forth smaller stalks, set with many Flowers, of a shining red colour, and in some white.

The **sensible Plant**, is a woody stalk, set with small winged leaves; this is respected only for that by touching the leaves, you may perceive them to shrink from you.

The **humble Plant** will fall of its own accord, when you come near it.

Dodder, an herb or plant having no leaves but only strings or wires, it grows upon other Plants from whom it receiveth its nourishment, the root in the ground dying.

Codded Willow herb, or **Codded Loose-strife**, hath the Flower growing out from the top of the cod, and the seeds wrapt up in down.

Sauce Alone, or **Jack by the Hedge**, hath the tast of Garlick, or a hot bitter tast, bearing large cods, which being ripe are red.

Aervain, hath small blue Flowers growing in a spike on the top of the stalk.

Horned tree Crisfoil, the body of it is very slender, covered with a whitish bark, the branches more white; the leaves stand three together, lesser, rounder and whiter than those of the **Ordinary Laburnum**; the Flowers are like those of **Broom**, of a gold yellow colour, which come forth at the end of the branches three or four together, succeeded by **crooked flat thin Cods**, like **Horns** or half Moons.

Spirea, it is a shrub with divers woody stalks, set with leaves like those of **Sally**, but lesser and nicked in

the edges, at the end of the stalk comes forth divers small Peach-coloured flowers thick set together in a long spike; lessening by degrees like a **Pyramis**.

Dwarf Bay grows in a thick bush, full of branches, set with small whitish round pointed green leaves, the flowers are small, of four leaves, set thick and close together, on the sides of the new shoots, wherewith they are on all sides covered; some of a pale bluish colour, others white and Peach colour, or a deep red, whose place are succeeded with small **Berries** of a red colour.

Snail flower, or rather **Snail seed Vessel**, is a kind of **Pod**, in form like a Snail house, smooth and rouled up, others prickley; others like small Buttons, some smooth, others rough, hairy and green.

Catterpillar Seed Vessels have the Plants trail on the ground, and such are supported; the Seed Vessels are like **Green Worms** or **Catterpillars** turned round.

Other terms used by Florists, about flowers only; with their signification.

5. **Alies** or Walks.

Alpodill roots, clogs, or long knotty roots joined together at the top. See **Glandulous**.

Aulnes, or **Awones**, are Beards about Ears of Corn. **Aglets**, or **Pendants** hanging on the tip ends of chives and threds, as in Tulipa's, Roses, Spikgrafs.

Aquietic Flowers, such as grow in Water, or wet and moorish grounds.

Annual Leaves, such as come up in Spring, and perish in Winter.

Bud, is the first appearing of Husks in which the Flowers are.

Bloom, or **Blown** is when the Flower first puts forth out of the husk.

Bed in a Garden, long earth Beds, in which Flowers are set.

Brim of a Flower, the outward edges, or that part of a Flower as turns.

Baccipherous pods, such whose seeds are inclosed in a juicy pulp.

Borders in Gardens.

Borders in Flowers, are such leaves as stand about the middle thrum of a Flower. **Palled** about.

Bulbes, or **Bulbous**, round roots, as in Tulipa's, taken also for round, yet spired heads of Flowers.

Bearded husk, is a Rose husk, or such as are hairy in the edges. **Rose Pod husk barbed**.

Bunched roots, are round roots that have knots or knots in them.

Bunched cod, is such as stand out in knobs, where the seed lieth in the cod.

Bicomered head or stile, see **Ambone**.

Blade, or leaf of Corn.

Bolle of a Poppy, is the round seed Pod; and also of a Flax Seed Pod.

Compost, is a mixture of Dung and Earth to enrich Gardens.

Crenated leaves, such as are jagged or notched.

Creeping flowers, are such as grow along the ground; and rise not upright.

Cells, the partitions or hollow places in husks or pods where the seed lieth.

Coximbiferous, Flowers made of thrums, without any circle of leaves.

Chives, are thick, round and sharp pointed horns that stand in the middle of flowers; which in some are more slender than others.

Compressed Pods, flat seed Vessels.

Chives, tipt with Pendants, is when the horn hath a seed hanging and shaking at the point of it, as in Tulipa's and the like. **Chives** are small pointels

Campanulate Flowers, such as have the resemblance of a Bell.

Cullions or **Stone-roots**, round roots, whether single, double, or trebble.

Clove roots, as in Garlick and Lillies, which are of some termed **Scaly Clove roots**.

Compound Flowers, such as consist of leaves, and a thrum of short threads.

Compound leaves, such as are three or four together.

Clogs, or knotty roots, hanging together by threads or small fibres.

Corniculate seed Vessel, such as are divided into several distinct cases.

Cone, or Pine Apple like heads.

Capsulate Pods, little short seed Vessels.

Cod, or Seed Pod, as in Pease, Vetches, Bean.

Couped, or cut off. See **Raguled**.

Pentapetala, Flowers of five leaves.

Clapper, see **Pointell**.

Cluster, or Bunch; Flower or Fruit growing close together.

Cups, are short husks in which Flowers grow, some being pointed into 2, 3, 4, 5, or 6 leaves.

Chaff, or husk which compasseth ears of Corn, and holds them together in the ear.

Delve, or Spadegrass, a digging into the Earth as deep as a Spade can go at once.

Delve, or dig.

Dented verge, is such leaves as are nicked about the edges or brim; of which some are fine dented; others large or deep dented, or cut into the leaf.

Downy or Frieled leaf, is such leaves as are woolly.

Deciduous, leaf, a deep cut leaf.

Edges, or out-sides of leaves. See **Brim**.

Edged, as Flower leaves often are, especially in the Tulipa; of which there are several terms, as edged, striped or streaked, garded, feathered, ragotted, marbled, flaked, spotted, or specked, powdered, variegated, variably, &c.

Eminence, or Woolly Eminence, is the outward skin or husk that covers round roots, as in Onions, Tulipa's or Dog-stones, and such like. See **Off-Sets**.

Eggers, are the Spring, or first-ripe Tulipa's.

Ear of Corn, are many grains of Corn compassed about with a chaffy husk.

Erect Flowers, such as grow upright without hanging the head.

Echinate seed, rough, prickly urchin like seed.

Esculent seed, such as can be eaten, as Pease; Bean.

Flowers or **Blossoms**, are of several composures; as cap. 6. numb. 70, to 97. there are set down, these following shapes, forms and fashioned blooms.

Silken down Flower, numb. 66.

Woolly Flower, 67 97

Thready flower, 64 83

Feather flower 65

Scaly or chaffy flower 61

Thrum flower. 82

Thrum or plush bordered 82 83 79 96

Hose flower with turned brim 87 92 93

Cup flower or Bell flower 92 89

Gaping flower 70 71 cut 76

Gaping hooded flower 71 76

Dragon head flower 76 79.

Cod flower 72

Helmet flower 73 75 78 77

Fly flower 77

Spur or heel flower 77 78

Round or one leaf flower 80

Bifoile, or two leaved flower

Three leaved flower, trefoil flower 79

Four leaved flower 80 81, a Caterfoil flower 87

Cinquefoil flower, 80 84

Cinquefoil flower barbed 80

Jagged leaf flower 64

Dented leaf Flower 83

Sharp pointed leaf Flower 69 86 90

Round pointed leaf Flower 69 84 85

Bell Flower 89 92

Bell Flower brimmed 91

Aspod or Aspodil Flower 94

Bulbe or Bulbous Flower 95

Bulbous Flower round bottomed 95

Slipper Flower 96

Bottle Flower dented 97

Fragrant, sweet smell.

Flaired, is a cutting of Turf.

Freeze, or **fringe**, such as is in the middle of the falling leaves of the Flower de luce. See **Thrum**.

Film, is that thin woody skin as separates the seed in the pod, and keeps them one from another.

Fibres are small threads or strings at roots.

Furrow, is a ridge or swelling on the sides of either Tree, Stalk, or Fruit; of some termed **Ribbed**.

Fruticose, is such stalks as are of an hard woolly consistence.

Florist, is a lover of Flowers and Gardens.

Florilege, is the description of Flowers.

Frutage, is the hanging of several sorts of Fruit together in husks with strings.

Flowerage, is the setting of sorts of Flowers together, in husks, and so to hang them up with strings.

Foot-husks, or short heads, out of which Flowers grow.

Frumentaceous herbs, a Corn bearing herb.

Gramineous herbs, such as bear Corn for Mans use.

Griffly seeds, are thin skinny flat seeds.

Graniferous seed pods, bearing small seeds like grains.

Gumous or knotty kernelly roots, fastned to one head.

Glandulous, kernel like roots, fastned together with small threds or fibres.

Greens, are Trees whose leaves fade not away in Winter.

Heads or **husks** of Flowers, are those things, out of which Flowers grow, of which there is several shapes, forms and fashions, as

Panick, spike, or spired head, *numb.* 42.

Bulbes head, *numb.* 43.

Tufted head, *numb.* 44

Spike head in spaces, 45 59

Wharles, Wharled heads, 46

Seed spout head 47

Spike, or spired head thin set 47

Orchides head 48

Spike head thick set 48

Umbell head 49

Shade of Flowers 49

Knotted or scaly head 50

Knoppe head 50

Scaly, panick or spired head 51

Loose chaffy or scaly head 52

Chaffy panick head 53

Loose knapped head 61

Loose panick, or panicle head 63

Poppy head 18 67

Bole head 18 67

Rizome head 54

Chaffy spearled head 54

Branched head 55

Knapped head 59

Bulbes scaly head 60

Scaly head 62 82 83

Short husk or head 65 69 70

Leaf foot husk 69 74 86

Slender leafed husk 90

Bottle husk or head 84 86

Round husk 85 83

Furrowed husk 84

Hose husk 86

Long husk 85 86 87

Cod or pod husk 86

Hose husk eared 93

Rose pod barded 90 or Seed Vessel bearded

Truss head Flower.

Horned head, or biparted; see **Amibone**.

Heads, or buddings of Herbs, else pods in the middle of the Flowers.

Husk, is that which a Flower grows out of, of which there are several, as a bulbes or round husk, a bottle husk, a middle husk and a foot husk.

Pod **husk**, is a long round husk, as in Pinks, July flowers, &c. an urchin or prickly husk.

Pod **in** **pod**, or one long husk in another.

Hollow leaves, as the Flowers of the Blew Bottle, which are small at bottom, and open at the brim, cut and notched deeply in; so is the **Hony Suckle** and **Bell Flowers**.

Husk crested or furrowed, when it rises in ridges.

Hollow stalks, when it is Straw-like, as the **Daffodil**.

Inoculating, see **Ingrafting**.

*

Joyns in Stalks, are knots in the stalks of herbs.

Ingeminated, is having one Flower standing, naturally growing out of another.

Inebriating leaf, such whose quality is to make fuddled or drunk, as **Tabacco**.

Knots, kernels or bulbes roots, are round or long roots.

Knots or joints in Stalks, Shoots, and Canes.

Kernels, in Nuts and Fruit Stones, or in Stone Fruit.

Knaps, or the tops of Lavender before the Flower be come forth.

Leaves belonging to Flowers have diverse names or terms according to their shape and fashion, as

Losing leaf, *numb.* 1.

Oval leaf pointed at the top 2

Heart leaf 3

Adders tongue leaf 4

Adders tongue double parted 5

Eared leaf 6

Trefoil leaf 7 27

Trefoil leaf eared 8

Winged leaf 9

Winged jagged leaf 10

Branched leaf 11

Winged Branched leaf 11

Rush leaf 11

Fennel leaf 12

Thready branched leaf 12

Sword, Flag, or Blade leaf 13

Through leaf 14 16 17

Pointed through leaf 14 15

Slit through leaf 15 16 17

Arrow head leaf 18

Round middle stalk leaf 19

Mushroom leaf 20

Bulbes leaf 21

Bulbes pointed and inverted 23

Bulbes heart leaf 23

Violet leaf 23

Barberry leaf 24

Crumpled leaf 25

Tripointed uneven leaf 25

Broad tripointed leaf 26

Triparted winged leaf 28

Trefoil winged 28

Cinque parted leaf 29

Five pointed leaf 29

Five pointed recurved leaf 29

Cinquefoil long pointed 31

Five fingered leaf 31

Five parted leaf triparted 32 33

Jagged finger leaf 33

Star leaf 34

Sepfoile or Setfoile leaf 35

Caterfoile double leaf 36

Spur-rowel leaf 36

Winged finned leaf 37

Winged finned deep cut leaf 38

Torne jagged finned leaf 41

Trefoile leaf eared and finned 40

Laying of Flowers, is the laying of Slips half cut from the main root, and covered with Earth that they may take root, and in time be separated from the main Stock,

Stock; which are termed **Layers**.

Leguminous, Pulse or Pease-like; any sort of Seed like Pease.

Larks heel, are such Flowers as have a Spur or Larks heel at the back of it; called also **Spur-Flowers**; see *numb.* 73, 77, 78.

Monopetala, Flowers consisting of one entire leaf.

Nodes, or self coloured flowers.

Nolly, soft, or hairy, and smooth middle of Flowers; see **Thrum**, **Plush**.

Membrane, or thin husk that covers Corn.

Marine herbs, such as grow in the Sea and Salt waters.

Nervous leaves, such as are full of Veins and Nerves.

Naked, is when a Stalk hath no leaves on it; a naked leaf is smooth and plain, without veins or dented edges.

Nolegay, a Poly of Flowers.

Notches, or notched leaf, of some a forked leaf, is when the leaf on the top is cut or divided into two or three or more, either round or sharp points; as in July-flowers, Marygolds, and Crowfeet, and tops of husks in which Flowers grow.

Narcotick leaf, such as stupifies, makes senseless.

Odoniferous, Odorate, a sweet smelling.

Off-sets, are the young root that springs or grows from roots that are round, tuberous, or bulbous; also the loose, outward brown skins, either in Tulipa's or Onions; &c.

Quine or husk, the thing Flowers grow out off.

Dichides, heads of Flowers set thick together Spike wise.

Panick heads, see **Spikes**. Spired heads set with Flowers.

Prime, as a Flower in its Prime, not over-grown, or fading.

Plush, the middle of Roses, Anemonies, Marigolds, &c. of some termed **Thrum**, or **Thrummy** heads; of others Hairy heads, or Buttons, or Bos's, Tuft or Wart.

Pod, or Cod, in which the seed groweth; the round head in middle of a Flower.

Powches or skinny husks like leather, in which are thin broad seeds.

Procumbent leaves, which ly down flat on the ground trailing on the earth.

Pappous, such as ly in Down, or have some downy part.

Pendulous heads, such Flowers as hang downward, the stalk not being able to stand upright.

Panicle head, a dispersed tuft of Flowers.

Perenniel leaves, such leaves as last all the year.

Pointel, or Pestle, or Stile, that as stands in the middle of a Tulipa or Peony, and such like.

Popillionaceous Flowers, such as resemble Butterflies, as the Blossoms of Peas and Bean.

Peel, or Peeling, the out skin of Apples, or thin skin as covers the Chest-nut, or other Nut kernels.

Pore, holely, full of small holes. **Spongy**.

Pith, the spongy substance in the middle of Rushes.

Pendants, a kind of seed, as are on threds or chives in the middle of Tulipa's and Lillies. See **Chives**.

Paled Flowers are such as have leaves set about a head or thrum, as in Marigolds.

Rind, is the skin of any Fruit that may be cut off or pared. **Urchin like Rind**, is the outward cover of the Chest-nut, which is all set with pricks. *

Raguled or couped, that is cut or sawed off, as the branch from the tree, or the Stock from the root.

Rizomes, the spearfed ears of Oats in the Straw, a **Rizome** head, a chaffy spearfed head.

Radiate Flower, bright shining Flowers.

Seed Vessel, or seed head, are such as the Flower seeds are in.

Seed Sprouts, a long spike with flowers thin set to it.

Seedlings, such roots of July Flowers as come from seeds sown.

Self colour, is a flower of one entire colour, without any intermixture with others.

Spongy, pory or soft, and full of small holes.

Solid Stalks, having no hollowness in them.

Shoots, young sprigs, sucklings, lances.

Siliquous seed, such as are born in husks, cods, or shells, like Pease or any such thing.

Staly Clove roots, like Lillies, one Clove laid on another by degrees, like an Artichoke, or Thistle head.

Stamineous Flowers, which consist of threddy filaments.

Spokes or **Umbel** Flowers set together evenly, not one jot above the other. **Spoked tufts**.

Spikes, flowers set thick one above another, *numb.* 48.

Stalk of leaves, and Flowers, of which there is several sorts, as naked Stalk, having no leaves on, but only a flower at the top. A crested stalk that hath turrows or ridges; a striped stalk, which is of two or more colours. A winged stalk that hath leaves set on either side of it.

Serrate leaf, a winged leaf set orderly in a row one against the other, or such as are dented.

Spraves, or divided roots, as in Carrats, &c.

Stile, see **Pointell**, a long head, three square or round.

Shell, the out-side or woody husk or cover of Nuts, and of Stones in Fruit, of which some are smooth, others tough, others Pory and Bark like.

Succulent herbs, such as are full of Juice.

Skinny husk, a soft sappy husk, as of Nuts and Filberts.

Segment leaves, such as are cut and divided into many threds or slices, as Fennel, &c.

Spinous leaves or flowers, are such as will prick, and are thorny.

Siliquous seed Vessel, such as have long pods, and the flowers generally consist of 4 leaves.

Sempervirent shrubs, such as have green leaves all the year.

Sinuate leaves, such as are crooked, bent or crumpled about the edges.

Stellate Flower, such as are Star-like, or are seeded with Stars, or full of eyes like Stars in the thrum or pendals.

Squamous, rough, prickly, or scaly husks or seed Vessels.

Shade of Flowers; see **Umbell**.

Shutes are Rushes.

Sheaths, are thin leaves or rindy husks, which compass about a Flower stalk.

Stellate leaf, so styled from the manner of the growth, the leaf compassing the stalk at intervals, Star-like.

Stile, see **Umbone**.

Slip, is a renting or pulling of a sprig from a branch, or the branch from the arm of a Tree, and so a slip may have it rent double or trebble slipped, or the stalk ragged.

Sprig,

Spig, is somewhat more than a slip, as having more leaves and sprays with it than is in the other, being generally that as is of some growth and maturity. or **Sprout**, of some called **Twig**.

Tuberos or knobbed and knotted roots or heads, or small tubers with strings and fibres among them.

Thamis, are the pendants which are on the points of chives, which are thicker and stronger than threads. See **Chives** tip.

Threddy roots, small hairy roots, **Fibres**.

Thrum or threads in a head in the middle of a Flower. See **Plush**.

Crispelata, or **Tetrapelata**, Flowers which consist of 3 or 4 leaves.

Threds tip with Pendants, are smaller than Chives as in **Roses**, **Anemones**, and such like.

Threds tip with Aglets, or threads with Aglets hanging at them, as in the spiked heads of **Grass** and **Plantane**.

Tip, or ends of leaves.

Trills of Flowers, when many ~~are~~ together on the head of the Stalk, as the **Cowslip** and **Auricula's** do.

Variously mixed or coloured, edged, feathered, Garded, Agotted, Marbled, Flaked, or Speckled.

Variegated, Flowers diversely spotted, marked or striped.

Verbeus leaves, such as come up in the Spring.

Umbone or horn, is any pointed stile in the middle of a Flower.

Uncious leaf, an oily sappy leaf.

Umbone double pointed, or biparted, as in the **Penny** sometime the umbone hath 3 or 4 sharp points, then termed an umbone divided into so many heads or points, or cut into 4 or 5 parts.

Utricillate Flowers, such as grow about the stalk in **Rundels** or **Whirls**.

Verge, the edge, or outside of a leaf, as a dented **Verge**; see **Brim**.

Umbell, Flowers set thick together, and all of the same height. A spearled or thin **Umbell**, when they stand at a distance from one another, yet all of an equal height. **Umbrell**.

Amball, the middle round head of a Flower set about with threads tipped.

Winged seed, such seeds as have hairs growing at them.

Weeds, and **Weeding**, is the taking out of the Garden, all such things as spring of themselves, and are hurtful to Flowers.

Umbelliferous, sweet smelling umbell Flowers.

Wharles of Flowers, are such as are set at distances about the main stalk or spike.

Things proper for Fruit Gardens and Orchards.

5. **HIGH WALLS** either of Brick or Stone.
A **Fountain** or **Grotto**.

Statues or **Figures** cut in Stone, set on **Pedestals**; to be in the quarters of the Garden.

*

Flower Pots to set Flowers in, upon **Rails** of Wood or **Ston**, in **Allies** and **Walk**.

Green Plats, even laid with **Turfs** or **Sods**.

Allies, or **Walks** well Gravelled.

Cartis Walks, **Walks** one higher than another.

Pole Hedges or **Pallisadoes**, or **Codling Hedges** are set with **Trees** platted one into another, and supported with **Poles** add **Stakes**, **Laths** and **Rods**, which as the **Trees** grow, are cut and pruned even on the sides and top.

Laths and **Rods** to support Flowers.

Garden part, to be divided into **Beds**, and then again to be cast into **Ovals**, **Squares**, **Cants**, **Frets**, **Borders** or **Knots**, according to the fancy of the Gardener.

A **Summer house** or **Garden house**, in a corner of the Garden, either square or octangular, finely painted with **Landskips** and other conceits, furnished with a **Table** and **Seats** about.

A **Nursery** or large **Bed** of Earth, on which **Stock** for **Fruit**, and **Seedlings** for Flowers are nourished till they be removed into the **Garden Platts**.

A **Good Gardener**, that understands the nature of **Fruit** and **Flowers**; and the times for sowing, setting, grafting and transplanting.

A **Conservatory**, or a green house, a place to put flower pots in, to keep the Flowers from **Frost** and **Snow**.

A **Repository**, a kind of **Seller** in the Earth to preserve **Plants** in time of **Frost** and cold **Weather**.

Instruments belonging to a Gardener.

A **Spade**.

A **Shovel**.

A **Mattock**.

A **Screen**, or **Riddle**, with a **Wier Riddle**.

A **Rake** with **Iron teeth**, and **Baskets**.

A **Pruning Hook**, and **Knife**.

A **Grafting Knife**, and a fine pointed **Pen-Knife**.

Watring-Pots of several sorts.

A **Ballet**, a **Grafting Chissel**, a **Saw**.

A pair of **Garden Sheers**.

Crowels of several sorts, long and short.

A **Dibell** or setting **Stick**.

A **Billboquet**, an Instrument made of **Lines** and sharp pointed **Sticks** or **Iron Pins**, to square out **Beds** and make rounds in **Garden Knots**.

Weeding Tongs, of some called a **Dog**, to pull up the roots of **Weeds**.

Weeding hook.

Wals, a thing to wind about grafted **Trees** before they be clayed, and after.

Loam or **Clay** to put about grafted **Cyons**.

Hand Beetle, to cleave the **Stock** for grafting.

Grafting Quill.

A **short Ladder** and **Stool**.

Pouch Wallet or **Basket**, to hang in **Trees** to gether **Fruit** in.

Tras

Trees, Shrubs, Flowers and Herbs may be distinguished into these several Heads, according to their Fruit or Seeds, Leaves, Flowers and Pods.

First, for Seed Trees, such as are contained in a Flethy pulp, and covered with a soft skin, which are of three sorts, as

1. **Pomiferous** Trees, such as bear Fruit Apple like, as

Apple	Pomegranate
Pear	Orange
Quince	Lemon
Medler	Citron
Lazarole	Adams Apple
Service	Plantane Tree
Figg	Indian Fig

2. **Pumiferous** Trees, such as bear Fruit with Stones in them, as

Peach	Olive
Nectarine	Date
Apricock	Mirobalane
Plum	Sebesten
Cherry	Jujutes
Cornelion	

3. **Bacciferous** Trees, such as bear Berries either single, or many together, as

Mulberry	Holly
Elder	Box
Sumach	Mastick
Quicken	Dragon tree
Turpentine	Clove tree
Nettle Tree	Bede Tree
Bay	Sassafras
Laurel	Indian Mole
Yew	

Secondly, such as are covered with thick or thin husks, and with hard woody shells which are of three sorts, as

1. **Duciferous** Trees such as bear Fruit in hard husks or kernels in shells, as the

Walnut	Storax
Almond	Hassel
Fistick Nut	Filbert

2. **Echinate** or prickly husks, as the Chestnut Beech

3. **Dudated**, or smooth thin husk, bladder like, or more thicker skin, as the

Bladder Nut	Coffee
Coco	Cotton tree
Nutmegs	Anacardium
Chocolate	

Thirdly, such Trees as bear Fruit in Cups Acorn-like, of which there are two sorts, as

1. **Glandiferous** Trees, having kernels in their husks as

Oak	Holm Oak
Bitter Oak	Cork tree

2. **Coniferous** Trees, such as bear Cones

Alder	Fir-tree
Larich tree	Cypress
Cedar	Tree of Life
Pine	

Fourthly, Trees whose Fruit or Seed is in single teguments or coverings, of which there are three sorts, as

1. **Siliquous** Trees, having pods thick or thin, as the

Carob	Tamarind
Calcia	Judas tree

2. **Membranaceous** coverings, such whose seed vessel is a thin skinny husk, as the

Elm	Maple
Hornbeam	Sycamore
Ash	

3. **Tuliferous** Trees, such as bear Catkins, as the

Birch	Sallow
Aspin	Lime tree
Poplar	Plain tree
Willow	

Fifthly, Trees which are esteemed for their Wood and Bark, either for Physick, of which there are several sorts, as

1. **Cordial** Woods, as the

Aloe tree	Pockwood
Guajacum, or	Snakewood

2. **Astringent** and cooling Woods, as the

Red Sanders	Lignum Nephriti
Yellow Sanders	Rosewood (cum

3. **Mechanics** Wood, such as are used in Dying, as the

Brasil	Logwood
--------	---------

4. **Fabyle** Wood, such as Workmen use, as

Ebony	Cabbidge tree, or
Princes Wood	Palmetto Royal

4. **Barks or Rinds**, such as the Cinnamon Jeluits Pouder Cortex Febrifugus Cortex Wintera-Peruvianus, or (nus)

Sixthly, Trees which bring forth Gums and Rosins, which may be distinguished into two sorts, as

1. **Solid**, or hard Gums, as Gum Arabick Gum Hydra Sarcocolla Gum Sandarak Myrrh

2. **Liquid** or more moliable, as Liquidambra Pitch Balsamum Peruvi- Rosin anum, Tar

3. **Suffumigations** Gums, or such as are for Perfumes, as

Frankincense, or	Copal
Olibanum	Caranna
Gum Elemi	Benjamin
Gum Anime	Storax

4. **Volatile** or **Unctious**, such as are easily made soft, as the

Camphir	Tacamahacca
Cambugium	Lake
Bdellium	

Shrubs or Underwoods may be distinguished by these several heads, as

First, **Spinous**, or thorny shrubs whose Fruit may be eaten, as

1. Raspberry, Rapis Sloe tree, or	
Bramble	Blackthorn
Blackberry	Bullas
Rose	Barberry
Briar	Purging thorn
Goosberry	Christs thorn
White thorn or	Box thorn
Hawthorn	Bucks thorn

Secondly Shrubs which are **Bacciferous**, or have juicy or sappy fruit, not thorny or thorny, yet esculent, or not eatable, but purging, as

Vine, or Grape	Hony suckle or
Railin	Woodbine
Carran	Upright Wood-
Bilberry	Pepper (bine
Wayfaring tree	Mezereon
White beam tree	Spindle tree
Dogberry tree	Privet
Birds Cherry	Shrub Cassia
Rock Cherry	of Gelder Rose
Austria	Water Elder
Dwarf Medler	Yellow Jetlamine
Sweet Wort	Sea Grape

Thirdly, **Sempervirent** Shrubs, such as are always green and flourishing, of which there are these

True Balsom, or Laurel of Alexan-	dria
Balm	
Thorny Burnet	Horse Tongue
Dwarf Balm	Butchers Broom
Phylliræ	Wild Bay
Ever green Privet	Juniper
Strawberry tree	Savin
Evergreen thorn	Myrtle
Spurge Laurel	Arbor Vitæ
Spurge Olive	Myrtle Symach
Widow Wall	Ivy
	Misselto

Fourthly, **Siliquous** shrubs, such as bear pods and husks, as

Ilach, or	Bean tree
Pipe-tree	Locust tree
Caper	Humble Plant
Thorny Broom	Broom
Bean Trefoil	Furs
Shrub Trefoil	Goats Thorn
Sena	Dorycnium
Liquorice	

Fifthly, **Graniferous** Shrubs, such as bear Corn-like seeds in their pods or husks, as

Chast tree	Red Sumach
Spiked Willow	Tree Spurge
Tamarisk	Virgins Bower
Jessamine	Travellers Joy
White Pipe tree	Virginia climbers,
Shrub Mallow	or Virginian Ivy
Galls	

Sixthly, **Graniferous** evergreen Shrubs, such as are always green, and have Seed and Pods like Corn, as

Holy Rose	Sage Mullen
Oleander, or	Hartwort (Rose
Rose Bay	Sweet Mountain
Sana Munda	Sea Purslain
Gutwort	Silver Bush
Herb terrible	Heath
Rosemary *	Rose of Jerico

Flowers, Plants and Herbs
may be distributed into
these several Classes ac-
cording to their several
beings, as

First, by the fashion of their leaves, as

1. Such as have imperfect leaves, as	
Mushrooms	Polipodi
Toadstool	Rough Spleenwort
Mould	Mullearn
Trubs, or	Hartstongue
Truffle	Moonwort
Fuzball, or	Adders tongue
Puckfist	Duckweed
Moss	Hairy riverweed
Liverwort	Sponge
Fearn, or	Sea Navel-wort
Brake	Sea Lettice
Oak Fearn	Sea Larc
Maidens hair	Round leaved Ci-
Tentwort	Wrack (sterweed
Wall Rue	Sea fann

2. Perfect **Gramineous**, **Fu-**
mentaceous Herbs or Leaves, such
whose Seed is Mans Food, and grow
in thin or thick Membranes, as

Wheat	Oats
Rye	Panic
Maize, or	Indian Millett
Indian Wheat	Millett
Barley, or	Bean
Malt	Pease
Rice	Vetches

3. **Gramineous** Plants, not used
for Mans Food, which may more pro-
perly be called Grasses, as

Canary Grass	Hairy grass
Panic grass	Meadow grass
Fox tail	Sweet Reed
Cats tail	Camels Hay
Wheat Grass	Galingal
Matweed	Rush
Wild Barley	Cane
Reeds	Feathergrass
Jobs tears	Cotton grass
Oat Grass	Reed Mace
Finger grass	Burr Reed
Pearl grass	Mouse tail

4. **Gramineous** herbs of Bulbous
roots, such whose roots are either
round, long, scaly, or consist of diverse
knots, as

Crown Imperial	Lilly
Martagon, or	Turks cap

Petous Violet	Star of Bethlehem
Pultcus Iris	Onion
Corn Flag	Leeks
Saffron	Shalot
Crocus	Chives
Son before Father	Garlick
Tulip	Moly
Fritillary	Ramson
Daffadile	Squill, or
Hyacinth	Sea Onion

5. Herbs of an Affinity to Bulbous
roots, such as grow in dry places, and
Water,

Kings Spear	Indian Hyacinth
Spider-wort	Flowering Rush
Dogs-tooth	Birds Nest
Day lilly	Brom rape
Tuberous flower-	Toothwort
Flowering Reed	Dragon
Jucca, or	Wake Robin
Indian bread	Frierscowle

6. Herbs of round leaves, whether
large or lesser, and grow in dry and
wet places, as

Coltsfoot	Winter green
Butter Bur	Sun-dew
Sowbread	Sanicle
Afarabacca	Ladies Mantle
Burdock	White Saxifrage
Violet	Golden Saxifrage
Pansy	Ground Ivy
Water Lilly	Monwort
Marsh Marygold	Indian Cress
Butterwort, or Sa-	Scurvy grass
nicle of Yorkshire	Sea Bindweed
Grass of Parnassus	

7. Herbs of **Nervous** leaves, such
as are full of Veins and Nerves, as

Hellebore	Fleawort
Neczwort	One Blade
Helleborine	Two Blade
Plantaine	Gentian
Buckthorn	Dwarf Gentian
Snakeweed, or	Solomons Seal
Bistort	Lilly of the Vally
Sopewort	Pondweed
Sea Plantaine	Water Caltrope

8. Such as are **succulent** Herbs, ha-
ving the leaves full of sap or juice, as

Houfeleek	Indented Sengreen
Sengreen	Stone crop
Aloe	Wall Pepper
Orpine	Navelwort
Rosewort	Glaswort
Purslain	Tangg
Garden Brooklime	Cali
Spotted Sanicle	

9. Herbs according to their superfi-
cies may be distinguished by their
leaves or manner of growing, whether
rough or smooth, crumpled or plain, as

Burrage	Buglofs
---------	---------

Alkanet	Chequerunning	4. Umbelliferous Herbs, such whose Flowers grow in Umbels or Tufts, as	Cranes-bill	Shepherds Needl ^e
Vipers Buglofs	Horse tail		Venus comb	
Sage of Jerusalem	Horned water Mil-	Fennel	Hartswort	
Honywort	Madder (foile)	Dill	Carrat	
Comfrey	Croswort	Hogs Fennel	Wild Carrat	
Dogstongue	Bastard Madder	Samphire	Carraway	
Grimmeil	Goose grafs, or	Giant Fennel	Cummin	
Heliotrope	Cleaver	Herb Frankincense	Alhale	
Asparagus	Woodrof	Spignel	Chervil	
Ladies Bedstraw	Spurry	Bithops weed	Hemlock	
		Water Hemlock	Spanish Picktooth	
		Earthnut	Bastard Parsley	
		Dropwort	Water Milfoil	
		Pellitory of Spain	Milky Parsly	
		Scorching Fennel	Water Dropwort	
		5. Verticillate Herbs, are such flowered Plants as grow in Wharleas about the stalks, being generally all of them <i>Diozate</i> , or sweet smelling, as		
		Sage	Majoram	
		Germander	Organy	
		Maftick	Ground Pine	
		Thyme	Pennyroyal	
		Goats Marjoram	Water Germander	
		Lavender	Wood Sage	
		Calfidony	Clary	
		Polymountaine	Dead Nettle	
		Winter Savory	Black Horehound	
		Hyslop	Iron-wort	
		Mint	Motherwort	
		Car - Mint	Hedge Hyslop	
		Balm	Hooded loose strife	
		Basil	Betony	
		Calamint	Self-heal	
		Dittany	Bugle	
		Assirian Balm	Dodder	
		6. Spitate Herbs, such whose Flowers grow in spiked, or long taper heads, as		
		Teasel	Nightshade	
		Eringo	Burnet	
		Globe Thistle	Hartstoot	
		Shepherds rod	Star headed trefoil	
		Agrimony	Arsmart	
		Enchanters, or	Pondweed	
		7. Herbs bearing many Seeds together in a Clufter or Button, as		
		Wild Tansy	Pilewort	
		Cinquefoil	Adonis Flower	
		Avens	Mallow	
		Tormentil	Hollyhok	
		Anemomy	Marshmallows	
		Windflower	Tree Mallow	
		Pach flower	Vervain Mallow	
		Crowfoot		
		Thirdly, Flowers according to their Seed Vessels may be consulered under these heads, as		
		1. <i>Goniculate</i> , divided, or horned, as		
		Piony	Columbine	
		Flaxinella	Wolf Bane	
		Larks heel	Staves Ace	
		2. <i>Papilionaceous</i> climbing Herbs, such whose Flowers resemble Butterflies, as		
		Kidney Bean	Bitter Vetch	
		Ginny Bean (ents)	Chickling	
		Bean of the Ancients	Winged wild Pease	
		Pease	Underground	
		Vetch, Wild Vetch	chickling	
		Lentill	Earth Nut Pease	
		3. <i>Papilionaceous</i> Herbs, not climbing, as		
		Bean	Grafs Vetch	
		Lupin	Goats Rue	
		Chich Pease	Birds Foot	
		Wild Licorice	Land Caltrops	
		Milk Vetch	Melilot	
		Ladies Finger	Willkwort	
		Fumitory	Scorpion Grafs	
		French honyfuckle	Caterpillar Grafs	
		Cocks head	Lotus	
		Sanfoin	Foenugreek	
		Hatched Vetch	Camock	
		Horse-shoo	Snail Trefoil	
			Hedghog Trefoil	
		4. <i>Siliquous</i> Herbs, whose Flowers consist generally of four Leaves, as		
		Stock Gilliflower	Mustard	
		Wall - Flower	Pepper-wort	
		Dames Violet	Charlock	
		Double Rocket	Swines Crest	
		Toothwort	Horned Poppy	
		Willow herb	Great Celandine	
		Loose strife	Flixweed	
		Upright Dogsbane	Tower Mustard	
		Silk Grafs	Coddled Mouse ear	
		Turnip	Treacle wormseed	
		Navew	Arabian Mustard	
		Radish	Dogs-bane	
		Vervain	Swallow-wort	
		Brooklime	Water cress	
		Speedwel	Woad	
		Cabbage	Cuckoe flower or	
		Colewort	Lady - Smock	
		Colliflower	Gold of pleasure	
		Coddled-through	Bulbonach	
		Rocket (Wax)	Madwort	
		Winter Cress	Thlaspi	
		Jack by the Hedge	Shepards purple	
		Sauce alone	Scitica	
		Ginny Pepper	Wild Germander	
		Sea Lavender		
		6. <i>Capislate</i> Herbs, whose Flowers consists of five Leaves, as		
		Gilliflower	Lesser Centory	
		Pink	Cow Basil	
		Campion	Cockle	
		Catchfly	St Johns Wort	
		Venus looking	St. Peters Wort	
		Sweet John (ghals)	Tutlan, or	
		Sweet William	Park Leaves	
		London Tuft	Stichwort (weed)	
		Bristol None such	Common Chick	
			Pimpernel	

Earthworms and **Holes**, are very hurtful for they open the Earth, and let in the Air to the Roots of Plants and Trees, deform Squares and Walks, and feeding in the Earth draw on Barrenness.

Poisonous Smokes, cold Frosts, Winds, &c. are all in their Kinds and Degrees, hurtful both to Flowers and Fruit.

Evil Neighbours, and **Orchard Robbers**, are in a great measure destructive to such places, which willful annoyances, must be prevented and avoided by Justice, the Love and Liberality of the Masters and Fruiterers.

General Observations and Rules of Gardiners about the Ordering and Increasing of the Trees and Flowers.

It is to be noted that in the planting of Gardens and Orchards that the **Ground below**, that the Earth be a black, fat, mellow, clean, and well tempered soil, wherein Trees, Flowers, and Herbs, may gather plenty of good sap. If the soil be **Barren**, it is to be made better by Delving, Duging, and other means for the manuring of grounds, at least once in six or seven Years.

If the ground be **Boggy**, or be in fear of Inundations, drein and secure it by Trenches, Allies, Walks, Walls, and such like.

Keep **Grass** that it grow not too much about roots of Trees.

If **Weeds** lie on the ground they will grow, but bury them and they will surely die and perish, and become manure for the ground.

Trees against a **Wall** soon ripen Fruit, yet it hurts the Trees more than the benefit, for into a dry Wall the Tree cannot spread its roots as natural it would, but binds it, and so stops the sap which wound the bark and causes disease in the Wood.

All Orchards & Gardens are generally made **Square**, because Walks are straight, at the end or corners whereof are made Summer-houses or places of pleasure.

Fences, for such places are usually made of Earth by Mounts, Ditches, or Moats; or else of wood by Quickset Hedges, or Pales, or Rails; but the Walls made of Brick or Stone is the best.

Sets for Gardens or Orchards are of some propagated from slips, but such are observed not to be durable; the most usual kind of Sets, are Plants with Roots growing from Seeds or Kernels of Apples, Pears and Crabs, or from stones of Cherries, Plums, &c. Else from fruit themselves, as Walnuts, Chestnuts, Almonds.

But next unto these, or rather equal with these Plants, are **Suckers** growing out of the roots of great Trees, which Cherries and Plums do seldom want, which being taken from the Tree with its root & some **Calves** of the Tree being set else-where, will soon become Trees of strength, & will bear fruit without grafting. There is another way to increase Sets, by laying of the Cyons or sprigs with their tops in a heap of good & pure earth, the tops coming through ten or twelve inches: In which hill the sprig will put forth roots, and the top new cyons, and so laying from hill to hill every bended Bough will put forth branches and become Trees. This is of some termed a **running Plant**.

Sets, if they proceed from good Seeds, needs neither removing or grafting, because they are apt to bring forth their own kind in time, but not so soon as if they were grafted.

Transplant Trees any time in Winter when the Weather is open, calm and moist; but the best time is at the

fall of the Leaves, in or about the change of the Moon: For a Plant set in the fall, shall gain a whole Years growth (in a manner of that which is set in the Spring after.

Grafts and **Sets** must be fenced till they be as big as the Arm, to preserve them from annoyances; and that is done by Stakes and Thorns.

Distance of Trees to be set in Orchards is of some held to be ten foot, others twenty foot, others ten, or twenty yards; for it must be generally observed that the distance must needs be as far as two Trees are well able to overspread, so as not to touch or drop one on another.

And look how far a Tree **Spreads** his Boughs above, far doth he put his **Roots** under the earth, or further if there be no stop.

Grafting time is best in the last part of February, or in March, or beginning of April, when the Sun with its heat begins to make the sap stir more rankly.

Cuttings & slips are apt to grow from these fruit Trees, **Codlings, Genittings, Bets, Sweeting, Senec, Noyls, Quinces, Goose-berries, Currans, jays, Aines, Hulberries, Camarisk, Roses, Dony-suckles**

Aines are pruned from December to the end of January, others only in the twelve days of Christmas.

Garden Seeds are best sown in the beginning of March, though some will venture to sow them any time from March, to the Feast day of St. James.

Much **Roots** at Plants will produce many tops or branches, which if you use to **stow** or cut the tops, will cause them to grow both low and slow, thick of branches slender of Wood.

Great Wood, as Oaks, Elmes, Ash, &c. being continually kept down with Sheers, Knife, or Ax; neither Boal nor Root will thrive, but be as an Hedge, or Bush.

Every **Pruning Plant** (if it thrive) will recover any wound above the Earth, by good dressing, although it be to the one half, and to his very heart.

The Lying or Leaning of Trees against **props** or **stays**, hinders its growth, breeds an obstruction of sap, and wounds incurable.

Removing of Trees as great as the Arm is dangerous, and seldom take root again, if they do, yet will not continue long; for a Tree once Taunted is never good, and will hardly ever thrive.

Diseases are easily discerned in Trees, by the blackness of the boughs at the heart, when you dress or prune the Trees: Also when a Tree hath more tops than the root can nourish, the tops decaying blakens the Boughs, and the Boughs the Arms, and the Arms the Boal, or Body, and so the Heart. Also when the Bark is black, or yellow, and the Tree brings forth small hungred leaves; or when it brings forth Blossoms, and wants strength to shape its fruit, is a sure token of a Taunt, and next Year of its Death.

Dressing, of Trees, and **Lopping** away of superfluous boughs, is to be done in the beginning of the Year, the Moon being in the change when the sap is ready to stir, which will soon cover the wounded place.

Age of a Tree is easily known tell they come to 20 years by his Knots; reckon from his Roots up the Arm, & so to his top twig, & every years growth is distinguished from other by a knot, except lopping or removing do hinder.

Fruit is to be gathered when ripe, and not before, else it will wither & be tough & sower; & gather in the full of the Moon for keeping, & dry for fear of Rotting, & without crushes or bruising, for that causes corruption, if they be not quickly used.

An Alphabet of Trees, Flowers, Plants and Herbs. The first Figure shewing the Chapter, and the second the Number of the Chapter, where they are Treated on.

C H A P.

To the Right Worshipful

Sir THOMAS DELVES, of Doddington, Baronett.

And to **THOMAS His Son and Heir.**

AND TO THE

Pious and Virtuous Lady, Mary the Relict of Sir Henry Delves, Baronett.

NExt to the Reading of Holy Scriptures, wherein the Mysteries of Our Salvation are contained; yet for Recreation sake, let me presume to invite you to spend some few Hours in this, wherein you may perhaps find something that may please the Fancy, recreate the Mind, or strengthen the Understanding; which if it do, I have my desired Wishes, which is that I may be any way serviceable to my King and Country, and remain,

Your most devoted Servant,

Randle Holme.

CHAP. VII.

HAVING hitherto handled that part of our distribution which comprehend things Vegetable; we shall proceed now to the second sort of Creatures which have Life and Senses.

Sensitive things are all sorts of Animals, and Created Beings which have Motion; which in respect of Man, are termed unreasonable Creatures, he only being endued with a Reasonable Soul, and an Holy Will; if by Sin and Transgression, he make not himself worse than the Beast that perisheth.

There is no Sensitive, or unreasonable Animal but hath at the least these parts:

The **Head** to receive Food, and wherein the Senses and Life is felt, have their residence.

A **Belly** to receive, and concoct his Meat.

Intrails, whereby to eject the Superfluities, or Excrements.

Members for Motion, which also serve for the use, and exercise of the Senses; for without these he can neither Feed, Feel, or Move.

and never seen the whole, knoweth not whereof it is a part; and herein this is principally to be noted, that the bearing of whole Animals is the most worthy, yet the bearing of part is not to be misliked.

Neither must we esteem every bearing according to its Order of Nature; but be interpreted in the best sense, that is, according to their most noble and generous Qualities. Wherein first observe, that in all sorts of Animals born in Arms, or Ensigns, must be set forth in those excellencies which may give honour to the Bearers. For example, the **For** is full of Wit and Cunning; but wit is given to filching for his Prey; if then this be the charge of the Escocion, we must conceive the qualities of the Bearer represented thereby; to be a wife, cunning, and politick Man; but nothing to be looked on as to his pilfering and stealing. For it is rather a dishonour than a praise for a man to bear a **Lion** on his Shield, if he bear a **Sheep** in his Heart, or a **Goose** in his Brain, and so of all other Creatures.

Secondly, as Beasts of savage and fierce nature, must be figured, and set forth in their most noble and fierce action; as a **Lion rampant**, his Mouth open, his Claws extended, for in this term he is said to be prepared to rent and tear; showing by that posture he is a Creature of much Vigour and Courage. **Psal. 22. 13. a Leopard on a Rock passant**, that is going (as it were) **step by step**, which form of action sheweth best their nature as a **Wolf passant**, and a **Boar passant** must be set forth according to their most noble action, as a **Boar running on a bank**, or a **hound coursing**, a **stag tripping**, a **horse standing**, &c.

R

Third-

WE will proceed to particulars, concerning things Sensitive, Born in Coats of Arms, and first we will give their whole Bearing, and then their Parts and Members; as usually they are Born. For every one that first hath seen the whole will know and discern the parts the better; whereas he that seeth a part,

Thirdly, as touching the orderly placing of the Feet of Animals, this is generally to be observed, that the right foot must be placed foremost; because the Dexter-side is the first in Motion, and the most noble for Strength and Action; and therefore this to describe is to set them forth in their most commendable Action.

Fourthly, When Animals are set on Banners, they must be made agreeable to the nature and quality of the thing born: Therefore as it is proper for a Banner to be carried on a staff, according to the use thereof, the staff must proceed, and the Banner come after; therefore ought the Face of the Creature to look towards the staff, that is directly forwards. So it must be in every other thing, or else it would seem retrograded, or going backwards, which were monstrous to behold.

Also here we must note, That in a Banner, that which is made for the right or one side, the same must be made on the other, all looking to the staff; and though the right foot on the Banner, when turned seems to be the left, yet the contrary side maketh no difference or alteration in the work, but the foremost foot on the further side of the Animal must be first set out in the delineation thereof.

Fifthly, Though the bearing of all created things in their proper kind and colours be commendable, yet must not such peculiar commendations be extended to derogate from the dignity of other bearings, as if they were of no esteem, in regard they be not born proper: For there is as good and honorable intendments in these as in them; especially when they are as Ancient as the former, and the Bearers of equal Estate and Dignity. For Arms are honored by the Bearers, and not the Bearers by the Arms.

Sixthly, Also in the bearing of Terrestrial Animals, here are these things to be principally observed.

That those Beasts, Birds, Fish, &c. which either those Emperours, Kings, or Princes, do bear for their Royal Ensign; the same is accounted there, to be of dignity: So is the bearing the Lion chiefly esteemed with us in England, because it is born by his Majesty. So is the Eagle, by the Romans, and the Flower-de-lis, by the French, &c.

Seventhly, Four footed Beasts, whether they be proper or discoloured (that is varying from their natural colour) are no way dishonorable, but are to be esteemed more worthy, than either Fowl, or Fish.

Eighthly, Amongst sensitives, the Males are more worthy bearing than the Female; in regard they do contain in them more worthy and commendable significations of Nobility, and Sovereignty.

Sun-blasted, is a sore of the Feet through Travel.

They that desire further Instructions in the Terms of Hun-
 ting, let them peruse the works, Intituled, The Noble Art
 of Vnucry and Hunting, which will give them satis-
 faction to their Desires.

The compleat Gentleman, by Peckham.

An Essay towards a Universal Character, by J. Wilkins.

D. D. Dean of Ripon.

Now to the end that Rules and Observations for-
 merly set down, may receive both Life and
 Warrant by Precedents, I will now Exemplify them in
 their Order. First for whole Beasts.

I. He beareth Gules, a Lion Rampant, Argent.

if there be more than one Lion in a Coat (saith *Lech*, pag.
 44) they are not termed Lions, but Lioncels: Which is
 as much as to say young or petty Lions, or Lions Whelp.
 But this rule must be understood with this Grain, in
 on in some particular cases (saith *Gwilliams*, fo. 193.) for it
 holdeth not good in our Sovereigns Emblems, where they
 are Lions, *propter dignitatem Regie Majestatis*. Again
 this Rule hath no place in Coat-Armours wherein any
 of the Ordinaries are interposed between the Beasts, for
 by such interposition, every Lion is required to be of as
 great Dignity, as if he were born dividedly in so many
 several Escuchions. But in my Judgment, by this term

the honour of the bearing is much eclipsed. therefore in
 an indifferent rule, I think it may be as indifferently used
 as *Lech*, *Accidance*, p. 48 where they are Blazoned only
 Lions, And *Salmarsh* in his *Analysis*, p. 57 will have them
 termed noe other but Lions in all coats let the number be
 two or more.

Per Bend sinister Er and Ers. The like O born by the
 name of *Mostyn* of *Mostyn*.

G a Lyon Rampant and Bordure Endented O born
 by *Tudor Maner*.

O a Lyon Rampant G born by *Bledyn ap Kinyon*.

Er. the same B by *Elider ap Rees Sais*.

Er. the like S born by *Kenarick ap Rhymallon*.

B the like parted Per Fesse O and A a Bordure Ab-

Kariadock Veichfras.

V the like O born by *Sandde Harl*, or *Sandeff Harl*.

A the like S born by *Owen Borgentyn*.

Per Fesse S and A the like counterchanged by *Egnis*

Evell.

B a Lyon Rampant A *Eustace Baron of Mowmalto* in

Cheshire.

B the like A Semy de Lis O by *Pool of Pool*.

G a Lyon Rampant O head and mane A is born by

Grace of Newland.

In the Blazoning of the Lyon, you may add

Armed and Langued; but because no Lyons (or any o-

ther kind of Creatures) are otherways born, but with

Claws and Tongues, you may if you please omit the

phrase. However observe this, that in the Arming of a

Lyon (or other Beast) if either the Field, or Charge be

Gules, then they ought to be made Azure; and if of any

other colour or metal; they ought, and must always be

made Gules, else it is not held to be good Armory.

II. He beareth Sable, a Lyon Saliant, Or. It is

said to be Saliant when his head tendeth to the Dexter

corner, and he is (as it were) falling upon his prey. *Gwilliams*, fo. 139. saith, The proper form is, when the right

fore-foot and wither that corner, and the hindermost in

the sinister Base; but that best suiteth to the posture of a

Lion Rampant, as in these two figures.

O the like O born by *Telbridge*.

A a Lyon Rampant, or Saliant Incensed G born by

Fre; it is said to be incensed, or in a Rage, when the end

of his Tail lyeth on his side.

III. He beareth Or, a Lyon passant, Gules. These

Beasts are said to be passant, when the right foot is lifted

up, as *humb.* 56. or *Passant Rampant* as *humb.* 79.

IV. He beareth Azure, a Lyon Argent.

firm that the Lyon in a standing posture (as *humb.* 43.)

ought not to be termed Passant; for standing, it is his nat-

ural posture, and all other Beasts in this posture, are

called passant, and never mentioned to be passant, but the best

named, and no more; and why not then the Lyon?

this I leave to better judgment, whether needful, or

some have termed this a Lyon *Stantant*, or standing.

And as touching the Order of placing of the feet of

Animals either in their going, or standing, this is a

general Rule in Armory, that the right foot must be placed

foremost, *Qua dextra pars est principium motus*.

withal it is the most noble part in regard of its strength

and being more active than the other. After which gra-

dually place the left foot, and then the hinder foot on the

right

P. M. Thoma. Dehes. de Dodington. Baronetti. Hac dedicata. est.

right side, and lastly, as coming after all, place the hinder foot on the left side, as the several examples in this Plate doth manifest.

Q the like G born by *Games*; and also by *Hames*.
S the like gardant A honored or crowned O born by *Disle*.

V. He beareth Azure, a **Lion Dormant**, or sleeping, Or. Some term him Vigilant or Watching, as it were for his Prey; it is said, that the Lion sleepeth with his eyes open. A Lion lurking. The natural colour of the Lion is yellow tawney, the white, red and black being exorbitant, yet in Heraldry honorable. This is born by the name of *Dorman*.

Q 3 such in Pale S born by *Meredith ap Fernorib*.
Lions, Bears, Wolves, Tygers, Leopards, and other Beasts of a raving kind, when they are born in Arms feeding, are termed in Blazon **Raping**, terming the posture they are in, as also the thing they rape upon. And if you speak of their Teeth, or Talons or Claws, you shall say they are thus or thus **Armed**; and if you speak of their Tongues, you shall say they are thus or thus **Langued**.

And to bear a living Creature in colour, or in action diverse from nature (saith *Gwillim*, fol. 165.) may be born commendably; but to bear the same repugnant or contrary to nature, is holden disgraceful, or rather is condemned as false Armory, and therefore not worthy of Bearing.

VI. He beareth Sable, a **Lion Couchant**, Or; that is, when he lyeth down upon his four leggs. By the name of *Crouch*.

G the like O being the Ensign of the Tribe of Judah.
S 6 such A born by *Bateman*.
O 2 Lions couchant in Pale G born by *Pedernine*.

VII. He beareth Azure, a **Lion Seiant**, Argent; that is, when he sitteth on his Breech, and standeth upon his forefeet. By the name of *Counseller*.

G 3 such A born by *Pladerdine*.

VIII. He beareth Gules, a **Lion Seiant in his Majesty**, Or; holding in his right Paw a **Sword**, proper; and in his left a **Mound**, Azure. This upon an Imperial Crown is the Crest of the Kingdom of Scotland.

Out of a Crown, a demy Lion gardant in full aspect holding up both feet G between two Wings A is the Crest of *Van Martorf*.

On a Coronett a Lion seiant in his Majesty or full aspect G in each Paw 3 ears of Corn, or Reed Spear heads S born by *Van Bleschwitz*.

B such a Lion O holding a Key and a Flower de lis A by *Van Burtenbach*.

On a Coronett a Lion seiant in his Majesty, holding out his Paws S between two Wings A is the Crest of *Flantern*. Some term either a Lion or any other Beast standing thus, to be **displaid**; see chap. 9. numb. 3. and chap. 23. numb. 63.

IX. He beareth Or, a **Lion rampant gardant**, Azure. He is said to be gardant when he sheweth his full face. The French term this a **Lion Leopard**, or a **Leopard Lion**. By the name of *Leonard*.

*

B such a Lion and Field semy de lis A born by *Hal land*.

This Lion, or in any other posture, if crowned with a Coronett is termed a **Lion** (in such or such a posture) **honored**, naming the colour of the Crown, and no otherwise anciently, though now we say crowned.

X. He beareth Gules, a **Lion rampant regardant**, Or. That is when he looketh backwards; yet *Tossil*, fol. 160. informs us that the Lion cannot look back, because his Neck is but one Bone, without joints, like as a Wolf and Hyena, having no knuckles or turning joints in it called the *Spondyli*. This is Born by *Robins*.

Others in respect of the outward turning of the Tail, which is contrary to all other Lions tails, they generally in the end turning inward to the Back, do Blazon it thus, a **Lion rampant regardant**, the tail reverberant or beaten back, or reboundant, as having beaten it to his back, and it hath rebounded again from thence.

Now as touching the diversion of the Lions tail, it is a token of his placability and tractableness; but the inversion of his Tail, is a note of his Wrath and Fury, especially if he beat his Back therewith.

XI. He beareth Sable, a **Lion rampant diffamed**, Argent. This is termed **diffamed**, because he is getting out of the Field (as it were) not daring to look his Enemy in the Face. If he looked back, being in this posture, he is termed a **Lion rampant diffamed, looking back**.

XII. He beareth Vert, a **Lion rampant regardant coward**, Or.

The Lion and all other Beasts with long tails in what posture soever they be (except dormant, seiant and couchant) if they cast their tails between their hinder legs thus, have the addition of coward added to them in their Blazoning.

Per pale G and O a Lion rampant, tail between his hinder legs, and reflected between his fore feet, and to the back of his head counterchanged. By the name of *Schetzell Zur Merx Hansen*.

The tail **resignant**, is when the same is lost or gone, hath no tail, or maketh no shew of a Tail.

The tail **percussed**, when lying on his back or side, as if he were beating and striking himself therewith; see numb. 2.

XIII. He beareth Argent, a **Lion ramping cowardly**, Vert; this Lion assaulteth his Enemy, but it is faintly, not with courage and vigour; which is seen by letting his tail fall and drag between his legs. Some term this a **Lion rampant, the tail descendant**. The Lion thus, Purpure, is born by the name of *Ronch*.

XIV. He beareth Sable, **two Lions rampant**, Argent. By the name of *Mull*, alias *Moile*, of *Ruthen*.

Being rampant you need say no more, for all things that extend themselves in height, are ever set Palewise; but if their extension be in breadth, then such things (except they exceed two) are set Palewise, that is one above another, and no mention of Palewise, as in the examples, numb. 18, 19, 21.

XV. He

XV. He beareth Gules, two **Lions rampant combatant**, Or. By the name of *Wycombe*. If these Lions were of contrary Colours or Metals; then you must add the Dexter Argent, and the Sinister, Or; else of such and such a colour; *Gwillim fol. 198.* terms them **Lioncels combatant**; but I rather adhere to *Carter, pag. 57.* who saith when **Combatant** they are Lions as it were striving for the Mastery; if set otherwise, as in the next, then to be called **Lioncels**.

XVI. He beareth Vert, two **Lions rampant endorced**, Argent. These Lions thus back to back, are born several ways, as **rampant gardant endorced**, **rampant regardant endorced**, **rampant endorced**, with their tails **wreathed**. Some term these **Dogs an Dogs**, that is back to back.

As these two examples of **rampant combatant** (or **Respectant** termed in some other Beasts) and **rampant endorced** are; so you shall use the same terms if they be **passant**, **saisant**, **couchant**, &c. examples of such bearings I need not manifest, these being sufficient to instruct the Ingenious. This is born by *Wilbrounston*.

Per pale G and O 2 such counterchanged. Born by *Williams*.

B 2 endorced O born by *Achilles*, a *Grecin*, at the Siege of *Troy*.

O 2 combatant G born by *Wycomb*.

B 2 Lions combatant O born by *Carter*, Author of the *Analysis of Honour*.

A 2 Lions endorced, their tails wreathed G is born by the name of *Van Rechberg*.

A 2 lions rampant endorced upon a Cock Boat, the tails wreathed, the ends dismembred (or cut off) G born by the name of *Murck*.

XVII. He beareth Argent, a **Lion rampant**, Sable; **collared** and **chained**; Or. Born by *Phillips*.

Gwillim, fol. 266. terms this Lion collared, and a chain flexed and reflexed over his back, &c. which needs not, for if either a chain, or lease, be fixed thus to the collar of any Beast or Bird, or any other Creature; it is ever thus cast between the fore feet, or under the Belly, and then over the Back, whether they be rampant, passant, or statant.

Sometimes in a **passant** or **statant** posture, the chain or lease is under their feet, or between their fore-feet, or over their back, and between the hinder feet, in such cases it is necessary to use the terms, how and after what manner the chain or lease goeth; see more of this, *numb. 56.* in the following chapter.

If there be any other thing about any Creatures Neck (that is no collar) as a Garland, Crown, Scarf or *Lambeaux*, &c. then they are said to be **gorged with a Crown**, or **gorged with a Garland** of such and such flowers, &c. and not to say collared with a Crown, or the like.

XVIII. He beareth Argent, two **Lions passant**, Gules. Here the extension or length of the charge being broader than high, they are ever placed one over the other; and as in this, so all other Bearing, either of Beasts, Birds, or Fish, are to be set thus, and are no otherwise termed in Blazoning; see *Gwillim, fol. 267.* and *Leigh, pag. 48.* This is born by *Straince*, Lord of

Knocking, and quartered by the Lord *Strange*, Earl of *Derby*.

O 2 such B born by *Somery*.

All Lions passant have generally their Tails drawn bending outwards, or extended, which extension befits his Regal Authority.

XIX. He beareth Sable, two **Lions Counterpassant** the upper towards the sinister side, Argent. Born by *Glegge of Gayton*.

The same collared G born by *Glegg of Grange*.

This is Blazoned two **Lioncells**, the one passant, the other repassant; but such should remember that the higher is the repassant, and therefore should have named it first.

XX. He beareth Argent, three **Lions passant**, Gules. Some term these three Lions two and one, as if they did thereby shew how they were set in the Escuchion.

But this is ever to be noted, that when 3 things, of what kind soever they are; if they be thus set triangular, they need no other addition in Blazoning, to shew their places, for they are ever so set; but if they be otherwise disposed in the Field, then to mention how they are, as in the next example. This is born by the name of *Lionell*.

B a Fesse waved between three such O born by *Hares* or *Harrys*.

XXI. He beareth Gules, three **Lioncels in Pale passant**, Argent. *Gwillim, fol. 193. 424. 425.* terms them **passant in Pale Barways**, and in other places, **passant in Pale** only, but according to the rule given in *numb. 14.* and *18.* these might as well be termed only three **Lions passant** (especially in His Majesties Coat of *England*) where the extension being broad, signifies them to be set on high, one above another. This is born by the name of *Fitz-Paine*.

A 3 such regardant G born by *Howel Dda*.

B 3 such A born by *Canvile*.

G 3 such gardant, the Coat of the Kingdom of *England*. Where you may note, that where any **Lion gardant** is **passant**, O in a field G it may be called a **Lion of England**, saith *Mr. Morgan, lib. 3. fol. 23.*

XXII. He beareth Gules, a **demy lion rampant**, Argent. After this manner you will find Lions passant, Lions passant gardant, &c. which are to be termed demy lions, or half lions, as being cut off by the middle, and so of other Beasts. This is termed a **Lion dimidiated**, that is, cut off by the middle. By the name of *Dandelion*.

O such a demy lion G born by *Mallary*.

XXIII. He beareth party per Fesse, Sable and Argent, a **Lion rampant issuant**, Or. The like to this, from the bottom score of a Chief or Fesse, I have seen several Coats with **Lions issuant**, thus. This is not a demy lion, but a Lion issuing or coming out of the bottom of the partition per Fesse, or the bottom of a Chief or Fesse. After this manner must all other Animals be Blazoned, that issue from the bottom of any of the Ordinaries. This term is mistaken by *Leigh*, who calls it **Naissant**, and by *Boswell* **Jessant**.

XXIV. He beareth Azure, a **Lion rampant issuant**, Sable; on a Chief, Or. Some will name the Chief first, as on a Chief, Or, a **Lion issuant**, else with a **Lion issuant rampant**, Born by the name of *Markham*.

G on a Hill a demy Hind, or an Hind issuant, O by *Van Hundenberg*, so termed as if the thing did issue out of the place where it is.

In the base of this Square or Quarter, is another posture of a Lion, which as it was delivered me I thus Blazon, Gules, a Lion sejant, with his right Paw held up, Argent. By the name of *DAWKES*. Some term it his right Paw erected or extended, or elevated, see *numb. 27.* from thence I may give it another term, as sejant ramping with his dexter Paw, or his dexter Paw rampant, &c.

The like Lion sejant, the dexter rampant A Crowned B is the Crest of *Hammer of Fenns*.

XXV. He beareth Or, a Fesse Sable, a **Lion rampant Naissant**, Gules. This Lion is termed **Naissant**, because he seems to proceed from the middle of the Fesse and go into the Field, *quasi nunc esset in nascendo*; as if he were coming out of the Womb into the wide World. This form of Blazoning is peculiar to all living things that shall be found issuing out of the middle of any Ordinary or Common Charge, and enters into the Field as this doth. Yet *Carter* Blazons this, out of the middle of a Fesse, a **demy Lion rampant naissant**. Born by the name of *Emme*.

XXVI. He beareth Gules, a Chief, Azure, a **Lion Rampant Jessant**, Or. This term Jessant (from the Latine word *jacio*, to cast) as being cast over all the Field and Chief: (Some write it Gessant) and is so termed when any Creature surmounts, or is over any of the honourable Ordinaries; though many Blazoners do term him a **Lion** (or the like) **over all**, or a **Lion rampant surmounting**, or **surmounted with a Lion rampant**. This is born by the name of *Jessel*.

B Chief G such a Lion his tail forked O born by *Haflang*.

O chief V the Lion G born by *Aston*.

XXVII. He beareth party per pale, Gules and Azure, a Pallet Argent, on the dexter side three **demy Lions passant**, fixed, Or; on the second a **Lion rampant sejant**, Argent. They might be demy Lions, and yet not fixed, but by that term we understand that they are joined to the Pallet, as if they were coming from under it. This is of some Blazoned three **Lions passant issuant**, as if they were coming from the Pallet; but that would have been more proper if they had been upon a Pale or pallet; however take it for no mist Blazon.

If the Field had been all one colour (as it should have been) and no Pallet; then you should have said, Azure, three **demy Lions passant** on the dexter side, Or. Yet *Leigh*, pag. 48. terms them only demy Lions, and yet sets them on that side, as if they were whole in the Field, and yet but the foreparts remaining, all the hinder parts cut away, which is contrary to the example of a demy Lion given by *Grillim*, fol. 199. who placeth it near the middle of the Field, where they ought to be, except any other charge hinder them; as for ex-

ample, a **demy Lion** between three **Cross Crosettes**, born by *Bennet*. A demy Lion between three **Roses** and a Chief, by *Vivons*: with many such like Coats, where the demy Lion cannot be any where else but in the middle.

A a Lion rampant and sejant S is born by *Newenburger*; as also by *Hohenhamser*.

XXVIII. He beareth Argent, a **Lion issuant**, et **issuant**; (or **issuant and revertant**) Sable; as if he were issuing or coming into the Field in the Base part, and going out again in the Chief part: *Leigh*, pag. 49. terms this a Lion **essant** & **essant**, but it was his oversight in the term.

XXIX. He beareth Azure, a **Lion rampant double queve**, (or **double quevied**) Or. This Lion hath several terms for his double tail, as the tail **forked**, **queve forked**, **double tufted**, and **double tailed**. The Tail I find born in Arms double quevied these several ways as in the next examples. This Coat is born by the name of *Doubletaile*.

S the like O born by *Kingsstone*.

A the like S born by *Cressy*.

A the like S crowned O born by my Friend *Sylvanus Morgan*, Author of the *Sphere of Gentry*.

XXX. He beareth Or, a **Lions tail forked and wreathed**, Gules; it is also termed **twisted** or **platted**. This is born by *Elseger*, an *Italian*.

XXXI. He beareth Sable, a **Lions tail nowed** (or **renowed**, else **newed**) in the form of a Knot (or true Love Knot) Argent. If this were also double tufted, then it is termed **Newed** in true Loves Knot and forked, or double quevied. This is the Coat Armour of *Quevieve*.

XXXII. He beareth Argent, a **Lions tail forked and nowed** (or **knotted**, or **fretted** one over the other,) Sable. But the most proper term for this, is that used by the *French* Heraulds, who call it a **double queve furchee**; or a **double tail furchee**. By the name of *Monieur de Neweng*.

And a Lion with both tail ends Nowed, as *numb. 30.* Sable, the Field A is born by *Montpeyson*.

XXXIII. He beareth Gules, a **Lion rampant**, Argent, the **head**, **feet**, and **tail**, Sable. Born by the name of *Nmane*.

V the Lion A head, feet and tail G born by *Gwystan ap Gmayth Voed*, a great Warriour in *Wales*, who after took upon him Holy Orders, and so turned his Lion from Red to White.

XXXIV. He beareth Argent, a **Lion rampant**, Gules, clothed in a **Friers Jacket**, Sable. Born by the name of *Loonfer*.

G a Wolf rampant in the like A is born by *Traine*.

XXXV. He beareth Or, a **Lion rampant**, Gules, covered with a **Surplice** or a **Ussment**, Argent. Born by the name of *Gwystan*. This Coat by that name I have seen anciently Drawn in *Wales*, the Lion having

a Surplice on him, though of latter times it is usually drawn with a White Body as aforesaid, *numb.* 33.

XXXVI. He beareth Gules, a **Lion rampant dismembred**, (or part d) Argent. Dismembred, is when all its parts, as head, teet and tail are cut off from the body; this is of some old Heralds called *debrused*, but that is a term now otherwise used, as this example following will manifest.

If the Lion be dismembred of any particular part, then you shall say

Dismembred of his head, if the head be cut off.

Dismembred of his right or left foot, or of his tail.

Disarmed, if he have neither Tongue or Claws.

Sans head, if he have not a head, and so of the rest of his Members which he hath lost.

XXXVII. He beareth Argent, a **Lion Lawrel Fish**, with his Tail elevated, and turned over his head, Gules. By *Im. Hof.* If it were of two or more colours, then say a **Lion Lawrel Fish**, Gules, tail, Vert, Finned, &c. It is termed a Lawrel Fish, because it doth represent the Lawrel Garland, or *scaly fish*, that is so made with long scales. Born by *Pan Slescher* being O.

If the tail of the Lion (in what posture soever he be) doth reach so long, as to go over his head, it is termed **his tail elevated and turned over his head**.

A a Lion, tail elevated, &c. S born by *Buxton*.

XXXVIII. He beareth Argent, a **Lion Rampant**, Azure, having a **Peacocks Tail**, or **Train**, proper. It is a common bearing amongst the *Dutch* to have Lions thus tailed, or some thing else instead of their tails, as a **Branch of Roses**, a **Feather** or **Plume of Feathers**, a **Dragon**, or **Hounds Tail**, and such like, which is carefully to be mentioned. This is born by the name of *Elbenr*.

O the like G born by *Eppli van Elanden*.

O a Wolf with a Cocks tail G born by *Leitziger*.

XXXIX. He beareth Azure, a **Lion rampant with two heads**, (or **double headed**) Or. Of some a Lion rampant **bicapited**, which signifies the same thing. Born by the name of *Bifen*.

O the like B born by *Mison*.

XL. He beareth Sable, a **Lion rampant with two Bodies**, Argent, else a Lion rampant bincorporated. Born by the Vanquisher of his Enemy, as Leigh has it, p. 46.

G the like O crowned B born by *Conberton*.

XLI. He beareth in a Field Mars, a **Lion rampant gardant**, with **three bodies in triangle**, Sol. This is also Blazoned, a tricorporated (or three bodied) Lion in triangle, all meeting under one head in the Fesse point gardant. By the name of *Terlion*.

Leigh makes the **Lion rampant sedant**, and the other two bodies from the two corners sedant also. This was born by *Edmund Crouchback*, Earl of Lancaster.

O the like S born by *Caren*, Earl of *Totnesse*.

XLII. He beareth Topaz, a **tricorporated** (or **three bodied**) **Lion rampant**, Diamond; though two of

these bodies are in a sort *passant*, yet all the bodies are here termed *rampant*, from the posture of the Lion they are fixed unto; it being the onely Lion; the others being either *Monsters*, or superfluities of Nature, which cannot be drawn or expressed any other way then thus, that the 3 Bodies may be exactly seen.

XLIII. He beareth Gules, a **Lion, Or, Winged**, Argent. Here you need not mention the posture of the Lion by the rules aforesaid, *numb.* 4. but if in any other posture mention it.

Note also, that all other four footed Creatures having Wings, if they stand on the back, you need say no more than what this example directs; for the Wings ever stand thus, one behind the other, because they cannot lie close to the Body, as in Fowl and Birds: But if the Wings be set any otherwise, then mention the posture, as you will be further instructed in the Chapter of Fowl, in their several postures with their Wings. This is born by the name of *Strongfly*.

XLIV. He beareth Argent, a **Lion rampant**, Gules, **debrused** with a Fesse, Vert. Some term it, **oppressed** with a Fesse; or **over all a Fesse**; or a Fesse **Jessant**, as being put upon the Lion. By the name of *Whittingham*.

XLV. He beareth Gules, a **Lion rampant**, Argent, **Jessant** and **debrused** with two Bendlets, Or. I name the Jessant first, being next the Chief; if the higher Bendlet had been over and the other under, then your Blazon had been diverted, say **debrused** first, as being next the Chief, and then **Jessant**.

I have seen this Blazoned, a Bendlet in Chief, with a Lion rampant Jessant, Argent, **debrused** with another in Base, Or. Or else thus, a Lion rampant between two Bendlets, Jessant and **debrused**, or Jessant upon one, and **debrused** with the other. This is born by the name of *Benleley*.

XLVI. He beareth Or, a Fesse Azure, a **Lion Rampant, Jessant**, Gules, **debrused**, with two Barrulets, Sable. This Coat will admit of several ways of Blazon; I shall mention one or two.

Or, a Fesse Azure, between two Barrulets, Sable, fretted with a Lion, Gules. *Boswell*, pag. 121. terms this a Lion **debrused** with 2 Barrulets, and fretted with a Fesse. and a Lion rampant, **debrused**, and Jessant Frettwise, with a fesse & two Barrulets borne by the name of *Frettleton*.

XLVII. He beareth Or, two **Lions heads erased**, conjoined, **endowed**, the one Argent, the other Azure collared counterchanged. Born as a Crest by the name of *Gregory*.

XLVIII. He beareth Argent, a **Lions head erased**, Gules, **collared**, Sable, **garnished and studded**, Or. If a Crown were about his Neck, then you shall say **gorged** with a Coronett or a Crown. This is born by *Gowis*.

As the heads are born **erased**, so they are born **couped**, that is, cut smoothly off with part of the breast, and cabassed or trunked, that is, with the full face, and no part of the Neck or Breast.

XLIX. He

XLIX. He beareth Gules, a **Lions head gardant, crazed**, Or. This may be as well Blazoned, a **Leopards head crazed**, by reason the **Leopard** in Arms, is never drawn or born but full faced.

B 3 Lions heads gardant (or Leopards heads) coupéd at the Neck O. This Coat is in the Walk under *Lincolns Inn Chappel*, and is looked upon to be very rare; see *numb. 62.*

In the 41 Quarter, is the form of a Lions head without any part of a Neck, yet is Drawn half faced or sideways, which is contrary to our way of Bearing; yet in *Germany* I find such, viz. Argent, a Chapournett, Or, three Lions heads demy faced, G by the name of *Ulfeter*, of *Ausburgia*.

L. He beareth Sable, a **Lions Paw crazed**, Or.  This is the proper posture for the foot to be set in; if otherwise it be put, then mention the same; the like is to be observed and noted of and in all the feet of Creatures, whether **Beast**, or **Fowl**: Some term it a **Lions Gamb**, born by *Gambell*.

A the like Paw erected in Bend G born by *Cartswill*.

A on a Canton S a Lions Paw crazed in Bend O by *Borntheby*.

LI. He beareth Or, a **Lions Paw erected and crazed** in Bend, Gules. Born by *Griffith ap Meredith*, Lord of *Pomis*. *Gwillim*, fol. 201. leaves out the word erected, being in Bend; but it is then to be with the foot part downwards; yet I judge it in a right posture in Bend, being it is then (as if it were) lifted up, as to offend or defend.

LII. He beareth Azure, a **Lions Paw erected**, and coupéd, Argent. Born by *Parre*.

S 3 such A born by *Usher*.

LIII. He beareth Sable, two **Lions paws issuant in form of a Cheveron**, Argent, *Gwillim*, fol. 200. Blazons them, two paws issuant out of Base, erected in form of a Cheveron; herein there is a superfluous of words, when it is as easily expressed in few; therefore I like his Blazon best, that only saith two paws in Cheveron; for by omitting the terms crazed and coupéd; it signifieth them to proceed from or join to the sides of the Escutcheon. This is born by the name of *Frampton*.

LIV. He beareth Gules, a **Lions tail crazed**, Argent; to give it the term of erecting is needless, this being the most proper and genuine posture of his Tail. This is born by the name of *Taile*.

S 3 such A born by *Corke*.

A the like G a chief S by *Traylor*.

LV. He beareth Or, a **Shapournet**, Gules, three **Lions Tails proceeding therefrom**, Azure; or three **Lions Tails fixed on a Shapournet**. Born by the name of *Trazz*. Thus much for the several ways and forms of bearing Lions both in whole and in part; we proceed now to other Creatures, of like nature to him.

LVI. He beareth Gules, a **Leopard passant**, Or, **spotted**, Sable. or else a Leopard, proper; Spotting is a term useless, it being natural to the Leopard, therefore cannot be changed, as the Prophet *Jeremiah* informs us,

Jer. 13. 23. This is a Bastard kind of a Lions Breed, being ingendred of a Lion and a Pard. *Gwillim*, fol. 259. terms it **Passant gardant**, but it is neither in the head nor body drawn otherwise in Arms than full faced; therefore needs not to be termed gardant. Born by the name of *Pantherell*. Also by *William*, Duke of *Aquitain*.

LVII. He beareth Azure, a **Leopard passant rampant**, Or. Born by *Righen*. This is another form of passing, with one of his feet lifted up, as if he were about to seize on some kind of Prey; therefore not unfidly termed, **passing rampant**. The Leopard is born in all the postures as the Lion is, and hath the same terms, as **rampant**, **passant**, **couchant**, **seiant**, &c. but never any term for the face, but still **gardant**, never **regardant**. Born by *Westerhagen*, if **Rampant**.

The Leopard is like to the Lion, save it is not maned and shagged about the Shoulders; its colour is bright yellow, distinguished into diverse spots, of a brownish colour, very beautiful to look upon.

LVIII. He beareth Sable, a **Leopards head**, Argent. It is of some called a Leopards face, of old by *Mr. Camden*, a Libards face. The Leopards head is never born any otherwise than thus. This is of some, but very improperly, a Lions head cabosed or trunked. Born by the name of *Ockbard*.

O 3 such S born by *Waldere*.

B 3 such O born by *More*.

LIX. He beareth Or, a **Leopards head**, Gules, **jeffant**, a **flower de lis**, Azure. Born by *Proulman*.

S the like A born by *Morlay*.

G 3 such A born by *Nobill*.

LX. He beareth Sable, a **Leopard head reversed**, Argent, **swallowing** of a flower de lis, Or. Born by the name of *Turnleigh*.

A 3 such S born by *Siddington*.

B 3 such O born by *Cantilow*.

A on a Pile G a Leopards face swallowing a flower de lis O by the name of *Tirrey*.

LXI. He beareth Gules, two **Pilgrims Staves**, Or, thrust through the ears and mouth (or out at the mouth) of a **Leopards head**, Argent. Where the thing first enters, that name first; if through the mouth and ears, then the points of the Staves (or ends) had been upward. Some will give the Staves (or Swords, or Spears) the term of **Salterwise** in their piercing or thrusting through; but it is needless, for all piercings of this nature are ever **Salterwise**, neither can it be any way else. This is born by the name of *Pilgrimage*.

A Leopards head S with 3 Crofs Bottonies fitched, thrust through the top of the head, and out at the mouth A is the Crest belonging to the name of *Peckham*.

LXII. He beareth Azure, a **Leopards head crazed**, Argent, **Gorged** with a **Crown**, Or. Some say **collared** with a **Crown**, which is improper. Born by the name of *Cogshall*. This may be taken either for a **Lions head gardant**, or a **Leopards head**, but because I find it thus termed I set it in this place, to inform

Mr.

Mr. *Gwillim*, that there is no general rule but it hath an exception. See numb. 49.

LXIII. He beareth Sable, a Panther, Argent, his mouth and ears enflamed, proper. The Panther is a very lovely Beast to look upon, for by the fine coloured Spots which he hath on his Skin, he allureth and enticeth all that see him to draw near to him.

In terming of his colour Argent, Or, Gules, else what other colour the body is of; yet this note, that it is ever spotted with Spots with several varieties of colours, and that alone makes it to be the Panther; else in form and proportion, it is no other than a Leopard, and would be Blazoned for a Leopard. Mr. *Topsell* in his History of Beasts, fol. 576. affirms the Panther, Leopard, Pardall, and Libbard to be but one kind of Beast, called by diverse names, grounded upon this Opinion, that this Beast is generated between a Pardall and a Lion; when the Lion covereth the Pardall, then the Whelp is called Leopardus; but when the Pardall covereth the Lioness, then it is called Panthera.

LXIV. He beareth Azure, a Panthers head erased, Or. In Heraldry I never saw the Panther drawn, but it was with flames out of his Mouth and Ears, by which he is known to be a Panther; else he would be taken for other Beasts very like him. The Panther is the Crest of *Somerset* Earl of *Worcester*; and the Supporters of the Coat of the Company of *Diers*.

LXV. He beareth Sable, a Panthers head regardant and couped (or couped regardant) Argent. *Leigh*, pag. 133. in his Accidence of Armory makes the Panthers head after this form; but all other Heralds (as ever I saw) make him with round ears like a Lion.

Observe that coupling and erasing are the two common accidents to parts of Animals born in Arms, coupling is when a part is cut off smooth, as in this example; erasing, when it is born with ligges like pieces of Flesh or Skin hanging at it, as if it were rent or torn off, as numb. 47, 48.

LXVI. He beareth Argent, a Linx regardant, proper. Born by *Linxhall*. Some term him, a Linx Tenne, spotted, Sable, as being its natural colour; but the first Blazon is best for all Beasts of this nature; for if this were not spotted, it would be taken for no other than a Dog, but his name shews his nature. He is said to be engendred between a Hind and a Wolf; some hold it to be a Lioness, others a Pardall, a Panther, or a Wolf begotten as aforesaid; the natural colour is outwardly red, and inwardly white, but specked with black spots set in orderly manner, with a Beard like a Cat.

B a Linx rampant gardant, born by *Luxen*.

LXVII. He beareth Gules, an Dunces head erased, proper: It is also called a Pardus head. The body of both in Figure are like to the Linx aforesaid, save in the tail, which is like to the Camels, or rather a Cats tail: It is of a yellowish brown colour, with a whitish Breast and Belly; spotted all over save the Belly, with darkish brown spots; as if all the Spots were made of Four. Doctor *Cay* gives it this Description; it is as

large as a Mastiff Dog, having the face and ears like to a Lion; his body, tail, feet and nails like a Cat; sharp and strong teeth, and of a terrible Aspect. Per Cheveron B and G 3 Ounces heads crazed A by *Smith of Ireland*.

Per Bend G and O on the first an Ounce passant Bendwise A spotted S born by the name of *Eseber van Luks*. The Crest is a Demy one out of a Crown with a Scarf about his Neck G.

LXVIII. He beareth Sable, an Hyen, or an Hyena Saliant, proper, a Scarf about his Neck, the ends flying backwards, Or. This is a fierce Beast, of a thin body, therefore swift, and a bushy tail, having bristles or strong hair like a Horse Mane down his back, and spotted with blew spots like eyes. This is born by *Hyend*, or *Hyen*.

There are several terms of Heraldry used for the mounting of Beasts according to their several natures and qualities, as Savage and Fierce Beasts are said to ramp, Beasts of Chase, to leap, as the following Section will manifest.

Terms for mounting of Beasts.

26. THE Lion, Leopard, Panther, Tyger, Lynx, Hyena, Dragon, Dunc, and Bear, are said to ramp, and are termed in that posture rampant.

The Wolf, Fox, Unicorn and Goat, saliant.

The Giffin, lezant or seiant, and of some rampant.

The Hart, Stag, Hind, springing.

The Squirrel, Weasel, Rat, and all Vermin saliant.

The Horse Prauncing, Cariering, Rairing, enraged when in a saliant form, mounted.

The Ram or Sheep, mounting or leaping.

The Boar and incensant, chasant, Rigrant.

The Beaver, erected.

The Cat, saltant.

The Talbott, rampant.

The Greyhound, saltant and saliant.

The Bull, Bugle, Buff, Furiosant, in a rage or madnes, rangant.

The Hare and Cony, Volting, Voltant.

The Unicorn Saliant.

The Elephant, Erected.

The Ape Monkey, Saltant.

The Dragon, Tyger, Lion, Dragon, Wolf, Dragon, Sergeant, sergent, or lezant; see numb. 48. used to all four footed Creatures of a double kind, except the Dragon, which is said to be rampant.

The Lizard, erected.

The Crocodile, Salamander, Camelion, Cwete, Asker, Spider, Ant, and all other Egg breeding Reptiles, are said to be either Erected, mounting, leaping, or skipping.

The

The Scorpion, erected.

The Lobster, Crevisee, Crab, Upright.

*The sundry ways that Beasts are besides
born in Arms.*

27. **Statant** or **standing**, when all the feet are down.

Passant, or **Tripping**, if cloven footed, when one foot is bendingly lifted up, as if the Beast were walking.

Seiant, or **Sedant**, when set on his Breech, and standing on his foremost feet.

Couchant, laid down on his Belly, and the foremost feet stretched out; yet most Beasts have a several term for their lying down in this posture, as I have shewed in the beginning of this Chapter.

Current, running, at the full strein, in his course. All which terms are used for a Beast in a running posture.

Dormant, sleeping, when laid on his Belly and Nose to the ground.

Saliant, **assaultant**, **assaulting**, or **falling on the prey**, when a Beast is rather Bendwise, then mounted upright, this in some Beasts is termed **springing**, **carriering**, &c.

Passant-rampant, when three feet are in a going posture, and his right foot lifted up.

Seiant-rampant, when set on his Breech, and the two foremost feet lifted up.

Seiant in his Majesty, seiant extended in full aspect, seiant **extendant**, or **displaid**, when he sits on his Breech, and hath his forefeet extended.

Seiant gardant in aspect, when he sits on his Breech, with his foremost feet standing, having the full sight of his Breast and Belly before you.

Rampant extendant, or **displaid**, laid open in full aspect, that is when any Beast stands upright, and stretcheth out his foremost legs on each side his body, so that thereby his whole Face, Breast, Belly, and inner part of the Thighs are fully seen.

Gardant, at gaze, looking with a full face.

Regardant, looking backwards.

Suspectant, **Spectant**, looking upwards, the Nose Bendwise.

Despectant, **Dejectant**, looking downwards, or to the ground.

Dors an Dors, **endorse**, is back to back.

Combitant, **respectant**, **aspectant**, when they are face to face.

Dimidiated, **demyed**, or **demy**, half, or cut off in the middle.

Dismembred, parted, when either head, feet, or tail is cut off, or separated from the body, and yet not taken away.

Guined, wounded, when any part is wounded, or made bloody.

Bicapited, double head, when the Beast hath two heads. **Tricapited**, when it hath 3 heads on one body.

*

Bicorporated, or **tricorporated**, double or triple bodied, when so many bodies are joined to one head.

Umbated, shadowed, when the Beast is the same colour of the Field, being only as a shadow on it.

Couped, cut off, when either the head or feet are cut even and smooth from the body.

Erased, rent or torn off, when any member or part is separated from the body by uneven ends or jaggedness.

Stretchant, when a Beast stretcheth out himself either upwards, or backwards or forwards, as chap. 18. numb. 67.

Trunked, or **Cabossed**, when the head or face of any Beast is born sole, not having any part of the Neck to it.

Close couped, the same to trunked.

28. **FROM** the **Lion**, King of Beasts, and such as are of his kind; we shall proceed the next, to the **Hart**, **Stag**, and **Hind**, the timorouslest of Creatures, being they are for **Chase**; and I do the rather choose them next, by reason that all the terms of Blazoning concerned in all Beasts and four footed Creatures, are in a manner terminated in these two, the **Lion** and the **Hart**; so that after them I shall need to give but few examples of contrary beatings of other Creatures, save only to give you the shape and form of all other Beasts remaining.

LXIX. He beareth Argent, on a **Hill**, or **Mount Vert**, a **Stag lodged**, Gules. Sir John Ferne saith, that if an Hind or Doe ly thus on an hill, or in the field, she is termed a **Doe** or **Hind couchant**. But a right Forrester will call it a **Stag** or **Hart harboured**. This is born by the name of **Hartkill**.

LXX. He beareth Sable, a **Stag lodged** or **harboured** having his fore-leggs **extended**, and cross one another, Argent. Or a **Stag couchant**, the forefeet **crossed**. By the name of **Dornes**.

A the like G born by *Bledlyn ap Maenyrch*.

LXXI. He beareth Argent, a **Stag proper**, attired and **unguled** (or **hoofed**.) Or. All Creatures that stand directly on their four feet thus, needs no additional term to shew this his posture; but if they take the right foot up, then they are said to be **passant** in most, but **tripping** in all cloven footed Beasts; for thereby is signified a bodily motion; but very often Heralds make no difference between **statant** or standing, and **passant**, or going, which is a great fault in them. *Gmillim*, fol. 180. terms this a Stag standing at gaze; but that is more proper at gaze, numb. 75. By the name of *Hartley*.

V the like A attired O born by *Jones*, and *Lomarch Holbroch*.

S the like A attired O born by *Held Molmynock*.

A the like G by *Griffith Gryr*.

LXXII. He beareth Vert, a **Stag tripping**, Argent,

gent, attired (or horned) Or. Notwithstanding what hath been said in the foregoing examples concerning other Creatures; yet in Beasts that have long and slender legs, and especially cloven hoofed, this posture must be taken notice of, and is ever to such termed tripping, and not passant. Born by *Llowarch Howl'uch*.

A the like proper, attired O born by *Holme*.

B 3 such and a Chief O born by *Greene*.

S on a hill in Base A a Stag tripping towards the sinister side O born by *Van Brockendorf*. And O the like Stag S with a Swaddle cloth about his middle A by *Van Wiedbach*.

LXXIII. He beareth Argent, a Stag springing, Gules. Born by *Gililand*.

The *Aris*, of which *Pliny* speaketh, is a Beast without Horns, having long tails down to their middle, legs like Deer, of a yellowish colour, spotted with white spots, with a clear sound, like the voice of a Deer.

B a Stag springing O born by *Kuchler of Bavaria*.

A a Stag springing to the sinister G born by *Fremdorf*. The same also by *Van Hirschberg*, of *Frankenford*, and by *Van Langenstein*.

A the like to the sinister side G with a Towel over his back, ends fringed A born by *Van Bodendick*.

LXXIV. He beareth Or, a Stag in his full course, Gules; or a Stag in his strein. This is a term used by Huntsmen when the Deer runneth very fast; and when by Hunting he forsaketh the rest of the Herd; it is said, that he singleth, or is empined. Current, is by some used for to term his running, but it is more proper for other Creatures than these of Chase. This is born by *Lightfoot*.

B such a Stag O pursued by a Brace of Dogs A all Bendway (and at random faith one) born by *Yardely*.

A on a craggy hill out of Base Bendways Sinister, a Stag in his full course G born by *Rechberg*.

A a Stag in his full course Bendways, disattired (or coupéd) of one Horn B born by *Van Brauchitch*.

V a Fesse between 3 Bucks at strein O born by *Robinson*.

The Stag and Buck are most commonly of a Sandy colour, with a black streak along his Back; their sides and belly spotted with White, which spots they lose through Age; their Females are more variable in colour; as being sometimes all white.

LXXV. He beareth Argent, a Stag standing at gaze (or gardant) Gules. A Stag is said to stand at Baye, when he stands in his own defence, with his head downward, to keep himself from the Dogs or huntsman; and to Stand at Gaze, when he stayeth or standeth to look at any thing, or to hear any noise. This is born by the name of *Gassell*.

A a Fesse B between 3 such G born by *Robertson*.

LXXVI. He beareth Gules, a Stag regardant, Argent, the Attire tipped and Anguled, or Hoofed, Or.

When I say the Attire tipped, it is to be understood, that the Horns are the same colour or metal to the Stag, and that the tipp ends of the branches of the horns are only to be Gold, or what other Colour or

Metal the Bearer pleaseth to bear them. Born by *Tipborne*.

And this term of Tipping, is to be used to all sorts of horned Creatures, who have their horns of two Colours, as in the Bull it is very often, and frequently born.

A 3 such G horned O born by *Vigelfare*.

O on a Stag regardant G a Pale A born by *Nobeck*. Some term it Swaddled, or clothed about the middle. See numb. 72, 73.

LXXVII. He beareth Argent, a Stags head coupéd, Sable. Coupé is, when the head is cut smooth off; and Erasing is when it is (as it were) rent, torn, or pulled off, by which means many jagged pieces remain uneven, as the next but one will farther manifest. This is born by the name of *Stagcope*.

A 3 such S born by *Rigmaiden*.

G 3 such O born by *Deering*.

LXXVIII. He beareth Sable, a Stags Head, Argent, attired, Or. By the name of *Orton*, or *Horton*. This is also Blazoned a Stags head caboched, or cabossed, or a Stags head trunked, or a Ctags face. Yet some hold it sufficient to say the head of such or such a thing, when it is full faced (as in the example of a Leopards head) using no other term, as for example.

A Stags head, when it hath no part of the Breast.

A Stags gardant, or at gaze, when it hath part of the Breast.

A Stags head coupéd, when the Breast is cut smooth off.

A Stags head erased, when the Breast is rent or torne. And these are distinctions sufficient enough.

LXXIX. He beareth Azure, a Stags head erased, Or. The Erasing is ever divided into three parts, made jagged and hairy, and no more. This is born by the name of *Breadfield*.

LXXX. He beareth Sable, the attire of a Stag fixed to the scalp, Argent. Skilful Foresters and Park-Keepers have certain names and terms for every part of the Horns, which I have shewed in the first Section of this Chapter, therefore say nothing of it here. This is born by the name of *Forester*.

S 3 such with a Cheveron between A born by *Cocks*.

A one such attire G born by *Heldendorf*. Also by *Brendt*.

G the like A born by *Truchses van Eggenmuhl*.

B the like O by *Churn*.

LXXXI. He beareth Sol, three Attires of a Stag in Pale Barways, Saturn. This is *Gwillims* Blazoning, fol. 185. but I am confident these ought not be termed three Attires, but three Stags Horns, for the Attire of a Stag, is ever to be the two Horns, as in the examples before, and one single Horn to be termed no otherwise than a Stag or Bucks Horn, which ought then thus to be Blazoned.

He beareth Argent, 3 Stags Horns in Pale, Gules. This manner of fixing the Horns in the Field, is of some termed Pale Bar; others Pally Barry, and in Pale Barways.

T

Bug

But this is to be noted, that in things of length, which cannot be well drawn in the Escochion, or fixed according to ordinary Bearing, viz. two and one, as numb. 20. then such are put usually in Pale or in Fesse, as in this, and the next examples doth demonstrate; see numb. 14. 15. 18. 21. This Coat is born by the name of Countess.

O 3 the like S born by *Frederick*, late Duke of *Wurtemberg*.

A 3 such and a chief S is the Town Arms of *Weyllington*. And in a Border G by *Minzingen*.

LXXXII. He beareth Vert, three **Stags Horns** in Fesse, Or. Long things if in Fesse, then they are besides one another; if in Pale they are over one another; and if they be in Bend, they are Bendwise one of another; and these three ways are all the ways such things can be placed, which need no other term than such or such things in Pale, or in Bend, or in Fesse. This Coat is born by the name of *Snistliby*.

Per Pale A and B 2 Stags Horns (in Pale say some) counterchanged. Born by *Hirshorner*.

LXXXIII. He beareth Argent, a **Stags Horn** of the first years growth, Gules. If the Horn of a Stag have but one **Crouch** or **Branch** in the head there, they are called **Stages Hornes, onely headed**. But if they have two, then they are called a **Forked Head**, or a **Double Forked Head**, as the next examples.

The Hare or Rabbit in this quarter, is termed a **Hare** or **Rabbit gardant**, but according to Huntsmens Phrase, it is an **Hare in her Form** or **Musett**, or a **Rabbit squat gardant**. A 3 such Hares or Rabbits G is born by the name of *Hareward*.

LXXXIV. He beareth Sable, a **Stags Horn**, with a **Forked Head**, Or. Born by *Forkler*.

B a forked attire of a Stag fixed on the Scalp A a Bordure O is born by *Rehburger* of *Switzerland*.

LXXXV. He beareth Gules, a **Stags Horn** with a **double forked head**, Argent. All Horns in a manner be hollow, save that towards the pointed tip, they be solid and massy; only Deer both red and fallow, have them solid throughout the whole Horn. This is born by the name of *Horne*.

A a Stags Horn Imbowed to the Dexter G born by *Van Harkberg*. Also by *Van Hirschorne*.

B the like A born by *Van Mosbach*, and also by *Van Lindenfels*. See the form in this square.

LXXXVI. He beareth Argent, a **Rain Deers head** of face, proper; see cap. 8. numb. 42. This is briefly termed a **Ranger** or **Raingifer**.

A 3 such S is born by *Baritt* in *Yorkshire*, or *Boritt*.

LXXXVII. He beareth Gules, a **Bucks face**, Argent, attired, Or. Or after others, a **Bucks head cabashed** or **trunked**, see cap. 9. numb. 2. There is a difference between the Bucks Horns and a Stag, the latter is round, both in the **Beam**, and in the **Antler**; and the other is broad in the **Beam** and the **Palm**, like a Mans hand, with the **Spellers** out of it broadish, of a blackish brown colour. That of their body is

diverse, but most commonly branded or sandy on the back, with a black strake down all along the back, their Belly and Sides spotted with White. This is called the **Head of a Fallow Deer**.

LXXXVIII. He beareth Sable, a **Roe Bucks face** of head, Argent, attired, Or. The **Roe Buck** hath his Horns out of the forehead, or top of the head (as it were) and so standing backwards, whereas the **Stag** and **Buck** have them behind the ears, and stand on either side the head. Besides on the Beam of the Horn, there is but two (or three at the most) of Antlers, which stand directly on the fore part of the Horn by equal distances. This is born by the name of *Roe*.

A a Chevron S between three **Roe Bucks heads** G is born by *Parker*.

B 3 **Roe Bucks heads** erased in Bend O born by *Roydon*.

A on a Bend engrailed S 3 such heads coupé A born by *Heydon*.

A on a Bend B 3 such coupé A attired O by *Yong*. The **Wild Horse**, or **Hart Horse**, hath two horns thus, rough; the body of an Ash colour, called an **hipellaphus**.

LXXXIX. He beareth Argent, a **Stags head double attired**, Gules. All these are bodied like to the Stag, and therefore I shall say no more of them. This is born by the name of *Forfiere*.

In this quarter is a **Stags Horn recurvant**, or **Imbowed to the Base**, which is the Crest of *Van Harslein*, in the Palatinate of *Rhine*.

O the like S born by *Vog van Sommer*; and also by *Van Prasberg*.

XC. He beareth Sable, two **Hinds countertripping**, Argent. Else termed two **Does**; the **Hinds** or **Does** head is born in all respects, answering the Stags, as cabossed, coupé and erased, and their colour like the **Fallow Deer**, sometimes vary, and be all White. By the name of *Cottingham* of *Cottingham*.

B a Hind regardant tripping A on a hill in Base V is the Town of *Zierenbergs* Arms.

B a Hind tripping to the Sinister O born by *Haßberg*. The same upon a Hill in Base V is born by *Van Thierberg*.

Out of a Coronet a demy Hind O is the crest of *Lafre*.

Here note, that in Crest Demy Beasts are ever set upright, and not termed either rampant, salient or springing, &c. according to the nature of Rising.

XCI. He beareth Vert, the **Hanch of a Buck** or **Stag, coupé**, Argent. Some will say **coupé** at the higher part of the **Thigh**, or near the **Shin**. Others term it the **hinder Thigh** of a **Buck**.

This kind of bearing both of the **Buck** and **Horse** is much used in the *Netherlands*, by several Families.

A the hinder legg of a stag, Buck, or Hind, coupé in the hanch or thigh and bowed in the Joint B by the name of *Gaygoble*. the crest is the same with the foot or hoof erected.

Out of a Coronet O a hinds legg erected A is the crest of *Alfter*.

These are all the ways of bearing of these two Crests.

types, viz. the Lion and Stag in Coats Armour, that ever I could find amongst those many and various Bearings used by the *English, French, Spanish, Dutch, or Italians*. So that as you find them born either in whole or in parts; so you may judge all other four-footed Beasts are; so that by the true Blazoning of these, the gentle Reader and Learner cannot go amiss in the other.

Therefore I shall not in the examples of the various Beasts following, give so many rules with the parts of each Beast; but only give a view of the Beasts, either in whole or in some principal part, by which you may understand the whole, thereby endeavouring to avoid a multitude of needless and superfluous examples, and extravagant Blazonings of such parts; yet if any term of Art, in other Creatures contrary to these happen; in their examples of Blazoning, I shall endeavour to manifest and make plain the same for thy Instruction and farther Satisfaction.

XCII. He beareth Vert, a **Rabbit**, or **Cony**, Argent. Born by *Rabby*.

The **Cony** is of several colours, as White, Black, Silver colour, that is, having some white or silver hairs aspersed in the black, griffel, tawny, blewish, yellow spotted, ash colour, and such like. The young ones are kindled Blind, and see not of 9 days.

A 3 such S born by *Sirrode*.

XCIII. He beareth Argent, a **Rabbit** sciant, Sable. By the name of *Cony*.

A 3 such S born by *Conylurum*.

G 3 such A born by *Conesby*, with a Bordure engrailed A. We say the Wing of a Rabbit, not the fore leggs, nor shoulder.

XCIV. He beareth Argent, on a **Hill**, a **Hare** sciant gardant, in full aspect, proper. By the name of *Harehill*.

The like A on a Cushion, is the Crest of *Van Werdestern*.

G an Hare boltant or skipping forward O born by *Hajen zur Turnich*.

Quarterly G and A a Hare the like, O born by *Haf-furt*.

B the like O born by *Van Hasenborg*.

Quarterly per pale G and A the 2 and 3 G a demy Hare upright A is born by the Earl of *Oth* in *Germany*.

B a Hare Boltant to the Sinister O born by *Hajen*.

XC. He beareth Gules, a **Hare** curreant, Or, (or in his full Course, as some term it.) This is a Creature for Game, and is of great lightness of Limbs, and nimbleness of Body, which causeth it to be very swift; it is harder to be pursued and taken up a Hill, than in a Plain, by reason his hinder feet are much longer than the foremost, which casts him forwards in his Coursing. Born by the name of *Weyerswift*.

S 3 such O born by *Waynard*.

A a Goat B and a Hare G both curreant to the Sinister. Born by *Elm van Elmer*.

XCVI. He beareth Sable, an **Hares head couped**, Or. The shape of the **Rabbit** and **Hare** are so like in their draught, that an Herald may mistake one for ano-

ther in his Blazon, except the **Hare** be in his proper colour, which is a sandy brown with a whitish Belly. This is born by the name of *Harbeard*.

A on a Fesse Nebule S 3 such O born by *Harewell*.

XCVII. He beareth Sable, a **Tyger**, Or. Thus we draw it in Heraldry; but *Topsell* in his *History of Beasts*, describeth it to be in form like a **Lioness** for face and mouth, with round ears and feet like a **Cat**; the tail hath a tuft or bob at the end, like a **Lion**; their skin full of spots, of one colour, some round, others square and long, of a black colour upon a yellowish hair. Born by the name of *Theime*.

A the like S born by *Grimstich*.

Per pale G and B the like A born by *Mabb*. The same G is the Crest of *Maister son of Namptrich*.

O the like G by *Lutrich* of *Lutrich*.

XCVIII. He beareth Argent, a **Tyger** regardant, gazing in a **Mirror** or **Looking-Glass**, all proper. Thus *Gwillim*, fol. 203. But I hold it better Blazoned, a **Tyger** regardant desectant, gazing in a **Mirror**; by reason the Glass is on the ground; his Blazon may as well signify its standing upright. This is in *Thame Church*, in *Oxfordshire*.

XCIX. He beareth Vert, a **Lyciske**, Or. This is a Creature engendred of a **Dog** and a **Wolf**, also a kind of **Dog** engendred by a **Tyger**, and so called by *Pliny*, whose fierceness and cruelty was such that they feared not to fix upon a **Lion**. This is the Crest of *Grome* in its proper colours, which is a dusky yellow on the back, more yellow on the sides, and white on the Breast and Belly, with dark spots on the upper parts of the body.

A the head couped S is born by *Van Egolfsstein*.

C. He beareth Argent, a **Bear**, Sable. By the name of *Beareford*. They are Creatures of great strength; and are termed (when in that posture) Rampant, like the **Lion**; they are rough haired, of a dark brown, or earthy colour.

A a Bear passant rampant S collered O born by *Barn and Beern*.

A a Bear passant S with a Fardel girded on his back G is the Arms of the Town of *Freisingen*.

O a Bear rampant S born by *Aindorfer*.

A a Bear in Bend Sinister, supporting a bowed Staff S born by *Bernholtz*.

O such rampant sciant S born by *Berneck*.

A a Bear Saliant S born by the Town of *Berlin*.

A the like rampant S born by *Bernstein*.

A the same rampant S and Mused O by the name of *Barnard*.

CI. He beareth Or, a **Bears head couped** regardant, Sable; though some do term it looking to the **Sinister side** of the Escuchion; but if it were fixed to the body, it were **regardant**, Ergo, Why not as well being without the body? see *numb. 65*.

 **Bears** and **Boars** heads, in their coupling, have not a part of the Breast to them as other Creatures, by reason they advance not their heads in their going. This is born by the name of *Bearboar* of *Poland*.

CII. He beareth Or, a **Bears head coupé**, Gules, muzzled, Argent. The **Bears head erased** ought to be born in Arms after this manner, as most natural to its condition and being; yet no rule but it hath its exception. By the name of *Bearewood*.

CIII. He beareth Argent, a **Bears head elevated and erased**, Gules, Muzzled, Or, garnished and muzzled, Sable; or else this ought to be termed a **Bears head** and (or with a) **Beast** erased; for here is a part of the Breast to the head, which makes the **Snout** thus elevated, else the crazing should have been behind the ears, and the head to be in that form, as the foregoing example. This is born by the name of *Carfoe*.

A the like S muzzled O born by *Fe myke*.

A 3 such G muzzled O in Chief 3 Pellets. Born by *Wall*.

CIV. He beareth Azure, a **Wolf saliant**, Or. By the name of *Wolfe*. Some term it a **Lupe saliant**, from the Latine word *Lupus*, a **Wolf**. This is also of some termed a **Wolf rampant**. Wolves and Foxes, are by some Authors termed a kind of **Wild Mastiffs** and **Wild Currs**, by reason they engender and bring forth after the same manner as **Mastiffs** and **Dogs** do.

B the like A born by *Vunn*, or *Downe*.

A the like B crowned O born by *Reichenburg*.

B the like A born by *Meredith ap Ien dwn* of *Wales*.

Per pale B and A 2 such rampant endorsed counter-changed by *Van Bellendorf*.

CV. He beareth Azure, a **Wolf**, Argent. By the name of *Bleidd Rydd*, of *North Wales*. If there be more than two Wolves in a Coat Armour, then saith Mr. Morgan, lib. 1. cap. 83. they are termed a **roust of Wolves**, that is a **Roust of three Wolves**.

G 2 such A by the name of *Lom*.

A the like G born by *Car dock Hard*.

O the like S born by *Van Wolffs all*.

CVI. He beareth Argent, two **Reynards** or **Fores counter saliant**, the dexter surmounted of the sinister Gules. *Grillim* terms them **counter saliant in Bend**, the dexter surmounted of the sinister Salter like; and to save all these Tautologies, Why not two **Fores in Salter counter saliant**; for the term in Bend might well have been swallowed up of the Word **Saliant**, which signifieth as much as the Creature to be in a rising ramping posture, and the other **counter saliant**, to be quite contrary to the other, as it were in Salter. These I never saw born any other colour than red or proper. This is the Coat of *Kadrol Hardd*, a Noble person in *North Wales*.

O the like, born by *Colfox*, alias *Colfowles*.

The **Fleck** goeth with rolling feet, and hath often anfracts and turnings; *Isidore* saith he is naturally subtil as the Fox; for when he wanteth Meat, he will ly all along, with every limb of his Body stretched out, as though he were dead; the silly Fowl seeing this, Fly to his Carcase, where unawares he suddenly snatcheth up some of them.

CVII. He beareth Argent, a **Squirrel**, Gules. By the name of *Horton*. This some term a **Squirrel sei-**

ant, but that needs not; for I never saw a Squirrel in a Coat of Arms, or as a Crest, but it is ever drawn thus, this being its **Stational posture**; for it never ceaseth from going or leaping; but it is immediately in this posture, and so continueth till it be going again. Some will Blazon it a **Squirrel cracking of a Nut**; others holding a **Hassel Branch fruited**, eating of a **Nut**.

A a Cheveron S between 3 such G born by *Littler*, or *Littellor*.

A a Cheveron B between three the like, born by *Leve*.

O a Squirrel G on a hill in Base V by *Cesteschach*.

V the like proper, turned to the Sinister, is the Coat and Crest of *Wiesener*.

O 3 Squirrels G born by *Van Aschrede*.

The **Pentique Mouse** is like the **Squirrel**, with round Ears like a Rat or Mouse; the colour is white mixed with Ash colour, or else Sandy colour and black. In *Polonia*, they are red and ash colour; it feeds with its fore-feet like the Squirrel, on Walnuts, Chestnuts, Filberds, Apples, and such like.

The **Cetulian** and **Barbarian Squirrel**, hath a head like a Frog, little round ears, is of a mixt colour between brown and red, white belly, bushy tail at the end.

CVIII. He beareth Gules, a **Weasel**, Or. This may be termed, either a **Weasel**, **Fulmart**, or **Ferret**; for they are of one and the self same shape of body.

The **Ferret**, is a yellowish white, with a long slender body: see chap. 8. numb. 14.

The **Fulmart** of a chest-nut colour, with a whitish belly and breast.

The **Barten**, or **Martel**, is of a fuller and larger body, of a deep chestnut colour and white; the Fur is termed, **Foins**.

The **Fitcher**, or **Pole-cat**, is like in shape, but of a larger body, and of a more rough or shagged hair, of a black brown colour, with round pil'd ears without hair.

The **Lakit Mouse**, is all white, mixt with gristle; it is of the bigness of the **Hermine**, **Weazel**, or **Squirrel**.

CIX. He beareth Gules, an **Ermine Couchant**, proper. This is a kind of Foreign Vermin, but the Skin is the richest Furr, being all pure white, having the tip of the Tail only black; from this Beast we borrow the term **Ermine**, as is before shewed in the Furs; If this stood on his feet he would not be unlike the **Weasel**, or **Fulmart**, or **Ferret**, in body and shape, all of them being a kind of field Vermin. This is the Coat of a Bishop in *Scotland*, who lived about the year 1474. viz. Per Felle G and B. In the first 6 whole Ermines couchant Er. 3 and 3.

The like Statant, is the Crest of *Hurleston* of *Piston*.

CX. He beareth Argent, a **Mouse**, or a **Rat**, proper by *Ratell*; and an **Indian Mouse**, Sable.

The **Mouse**, is a little small Creature, of a kind of blackish brown; sometimes, white, yellowish, brown, and ash-colour.

The **Rat** is three or four times as large, of a blackish russet colour; see chap. 8. numb. 12. 41.

The **Indian Mouse**, is as large as our Cat, and is

shaped like our English Mouse, having a Tail like to the Goat.

The **Screw**, or **Crescrew**, is Mouse bodied, but with a sharp Nose, turned up like a **Swine**; of a dark brown colour, yellowish under the Belly; see chap. 8. num. 6. 11.

The **Wood Mouse**, is like the **Domestick Mouse**, save in colour, which is of a brown, or swart colour, having black spots in her Face.

A Rat Saltant to the Sinister S is both Coat and Crest of **Billich**.

CXI. He beareth Argent, a **Stoat**, or an **Indian Mouse**, or **Ichneumon**, Sable. Some call it a **Thyamon**, and a **Neomon**: it is in proportion as large as a small **Cat**, or **ferret**, it hath Bristles instead of hair, blackish coloured; small Eyes, and a long tail turning up a little, like a **Serpents**, having no hair but scales, not much unlike the tail of a **Rat**: see chap. 8. num. 40.

CXII. He beareth Sable, a **Dormouse**, Or. The **Dormouse** in body is like the **Weasel**, only shorter of body, with a large beard like a **Rat**; of a kind of a yellowish white, and gristly colour, with a white belly. This is termed a **Dormouse Dormant**, but it needs no such term, for it is a Creature always sleeping. This is Born by the name of **Dormor**.

CXIII. He beareth Gules, a **Horse passant**, Argent. Horses are termed by several names according to the Country they are bred in; as a **Ripon Colt**, a **Northen Builder**, a **Scotch** and **Welsh Hag**, or **Cit**, a **Spanish Jennet**, an **English Steed**, a **Barbary Courser**. This is Born by the name of **Stedpassie**, and by **In-ram**.

S fesse between 3 such A born by **Stamte**.

A an Horse S Bridled the Reins cast over his head. Born by **Pferdsdorf** of **Frankford**, and also by **Van Rabell**.

O a demy horie saliant, or Rairing; B is the Coat and Crest of **Glausenberg**. In a field A by **Fulain**.

A the like G born by **Kypper**.

G a demy Horse, A bridled O by **Van Malewitz**.

O on a Hill in Base V a Horse Courting S born by **Rajsbere**.

A Stallion, is an old Horse or Mare kept for to breed on.

A Gelding is an Horse, having his Stones cut away.

It is observed of the Horse (and also of other whole footed Beasts) that their Legs are as long as ever they will be upon their Foaling; and therefore young Foals will scratch their Ears with their hinder foot; which after they cannot do, because their Leggs grow only in bigness, not in length.

In this Quarter is an **Horse-head**, or **Face**; of most termed a **Horse head cabossed**; because nothing but the fore-part of the Face and Ears are seen. Such an head S with 3 Hollin leaves in his Mouth V in a Field O is born by **Ridesel Van Eifenbach**.

CXIV. He beareth Azure, a **Horse foot erected**, and **bowed**, **couped**, above the **fitlock**, Argent; **hoof**, Sable. Born by the name of **D. Van Embles**. Some term it couped in the middle of the **Cambrel**.

CXV. He beareth Vert, an **Horse** Argent, **Spancelled** on both Legges, of the **Deerer**, or **Rising side**, Or. Born by the name of **Percivall**.

In the Chief of this quarter is a Bearing which is thus Blazoned.

O a Horse-head close couped S with an **Hollyn slip** in his Mouth devouring it proper. Born by **Ridesel Van Bellerheim**.

A a Rains-head close couped S born by **Van Busseck**.

CXVI. He beareth Azure, **Pegasus**, or the **winged Horse volant**, or **tarrant**, Argent, **Wings**, Or. either term of **tarrant** or **volant** are proper in this posture, and so I have found it both ways Blazoned. By the name of **Pergrave**.

A the like G is born by **Birkenham**.

A Horse head between two **Wings**; or the **Wings** in **separture**; I have found Blazoned **Pegasus** head only; and is the Crest of **Sir John Warden**, baronet.

The **Ethiopian flying Horse**, as **Albertus Magnus** relates, hath the head and feet of a **Horse**, but horned; and **Wings** much greater than an **Eagle**, which he only stretcheth out when he runneth.

29. **T**Here is several things belonging to an **Horse**, and **Horsemanship**, whose **Terms** are necessary, and ought to be known, else a Gentleman will not, neither can discourse of those matters in a fit Dialogue.

Terms used about Riding and Horseman-ship.

30. **A Groom**, a Horse-keeper in a Gentleman's Stable.

An **Officer**, a Horse-tender in Inns and Publick Houses of Entertainment, and in livery Stables.

A **Farrier**, or an **Horse-Leacher**, an **Horse Doctor**, **Horse Leachery**, or **Leach-craft**, is the Art of curing Horses of Diseases.

A **Rider**, such as ride running Horses.

Amble, is to go a fine easy pace.

Attaint, is an over-reach of the heel by the hinder foot; the **Upper Attaint** or over-reach is the cutting of the back sinnew of the fore-leg above the pastern. The

Nether Attaint, is an over-reach on the pastern joint.

Break, or **Back** a Colt, is the first riding of him.

Bound, is to Caper, or Pronce.

Broken winded, is shortness of Breath.

Covert, is the Rearing and Capering of a Horse; See **Salts**.

Covering the Mare, is the horse Leaping her, or **Engendring**.

Cast her foal, is to bring forth a dead one.

Cast the Rider, when by a stumble he falls the Rider.

Canterbury pace: See **Gallop**.

Caper, when a Horse stands on no ground.

Docking, **Curtailing**, or cutting of the horse tail **Dung**, or Horse Muck. (shorter)

Dunghil, a heap of Horse dung, and old Litter put together. **Foal**.

Feeding, the bringing forth of a Foal or Colt.

Further foot before, the further foot on the right side.

Further foot behind, the hinder foot on the right side.

Further side, the right side of the horse.

Gallop, or **Canterbury rate**, between a full or high trot, and a swift running: See **Stately** and **Swift**.

Handing, or **Handing of a Colt**, is to make him gentle, tame, and quiet to Bridle and Saddle.

Hood Bound, when his Shoo's are set too straight on.

Interfering, is the calling of an Horse feet inward.

Leap, is to mount over a Bar, Gate, or Hedge.

Leap a Mare: See **Cover**.

Left side, or the **Ring side**; is the left side of the horse, which side Men get on the horse-back.

Neer foot before, the foremost foot on the rising side.

Neer foot behind, the hindmost foot on the left side.

Neer Attaint: See **Attaint**.

Prance, the skips and capers, and will stand on no ground.

Raisty, or **Resty**, that will go neither forward or backwards, but stand still.

Rack, is a pace wherein the horse neither Trots or Ambles, but is between both.

Rising side, or **Saddle Girth side**, the sidenext the Man.

Rattle in the sheath, when he makes a noise in the skinny part of his Yard.

Stately Gallop, is when a Horse Gallops aloft and close, as War-horses, and those for the great Saddle.

Swift Gallop, is when a Horse run smooth and easy, as running horses, and hunting doth.

Salts, are the Leaping and Proncing of Horses, a kind of Carveting.

Stumbling, when he is apt to fall, or cast his Rider.

Stale, is the Pils of horses.

Craneis, are Leather to put about horse Legs to cause them to Amble.

Trot, or a **Trotting Horse**, when he sets hard, and goes of an uneasy rate.

Vault, when he Raires, or stands upright.

Upper Attaint: See **Attaint**.

Wince, is to kick.

Walk, is the slowest pace a Horse doth go; it is used to cool a Horse after hard Riding.

Work behind, kicking with his hinder Leg or Legs.

Female; because better able to leape, of which faith *Opianus*, those that are blewish spotted, are fittest to hunt Harts; the bright Bay, to hunt Bears and Leopards; the Bay, or reddish colour, to hunt the Boars; the black with glazen Eyes, are good against Lions.

Pack Horses, are such as are employed for the carrying of burthens, and draught in the Cart, Tillage, and such-like; which are termed Cart-Horses, and draught Horses, or labouring horses.

War Horses, such as are trained and brought up not to fear any noise or clamour, or to run back at the rattling of Drums, or Raring of Guns, that will career.

Jade, a **Tired Horse**, Raisty, That will go but when it own pleasure, that goes backward and side-ways when he is spurred, or whipt.

Feeding for Horses.

Meadows, **Pasture Grounds**, where is store of good and fat Grass. This is to feed and nourish them.

Bean, **Pease**, **Barley**, or **Oats**, called also Provender: this is to strengthen them for labour.

Horse Bread, which is to Diet them for Courses.

Hay and **Chaff**, is their natural Winter Food, which they delight in.

Straw, or **Litter**, for them to lie upon.

Diseases insident to Horses.

31. **THE** general Distempers are the **Feaver**, which is a Malady or inward Disease, through an unnatural and immoderate heat, proceeding from the heart and disperseth it self through-out all the Veins and Arteries of the Body.

A **Pestilent Ague**, which is thought to proceed from a **Corrupt Air**, or humors in the Body by unkind Food; it is a contagious and pestiferous Disease, almost incurable.

The **Blood-shot Eye**, when the white of the Eye seems to be all bloody.

A **Dimness**, the **Pin** or **Web**, when there is a Pearl or thin film, covering the Light, or ball of the Eye.

The **Paw**, this is a kind of Gristle, which covereth more than half the Eye.

The **Lunatick**, or **Moone-eye**, such as are Blind by times and fits; sometimes seeing well, other times stark blind.

The **Canker** in the Eye, comes from a corrupt blood in the head.

Diseases in the Ears and Head.

35. **THE Pott-Evil**, is like a Fistula growing between the Ears, and nape of the Neck.

An **Impostume**, a gathering in the Head or Ears, by some extream cold, which appears by Swellings.

The **Uives**, are Kernels growing under the Horse-ears.

The **Canker**, or Ulcer in the Nose, is a Disease that consumes the flesh, and makes it all raw within, and not being helped in time, will eat through the Gristle of the Nose.

The **Gigs**, or Bladders in the Mouth; which grow in the inside of his Lips.

The **Lampas**, is a bleeding of the Mouth from the abundance of blood.

The **Barbles**, or Paps underneath the Tongue, which growing large hinders the Horse in feeding.

The **Tooth-ach**, or pain in the Teeth.

Diseases in the Neck and Throat.

36. **THE Trick** in the Neck.

The **Wens** in the Neck.

The **falling of the Crest**, caused through poverty, or when a Horse falleth away suddenly.

The **Hanginess** of the Mane, is a rankness of blood, which breaketh forth to a Scurf, or Scabbiness.

The **Swellings** of the **Withers**, or back, and gallings.

The **Wens** or **Knobs**, above the Saddle skirt.

The **Navel Gall**, is a traife on the back behind the Saddle.

The **Swelling** of the **Back**.

Hide bound, when the skin cleaveth fast to the sides, and back, that it cannot be pulled from the flesh.

The **Glanders**, a run of the Horse Nose, with a corrupt humor; **Snivel**.

The **Strangulation**, or Squinancy, or Quinzy, an inflammation of the Kernels, on either side the Throat.

The **Strangle**, an inflammation of the Throat.

The **Hourning** of the **Chine**, a disease that consumes the Marrow in the back.

The **Cough**, or **Cold**.

The **Fretted**, broken or rotten Lungs.

The **Shortness of Breath**, of some termed **pur-sick**.

The **Consumption**, an exulceration, or waste of the Lungs.

Inward Diseases of the Stomach and Belly.

37. **Starvetting**, is through glut of Provender.

The **Hungry Evil**; a meediness, or emptiness, by lack of meat.

The **pain of the Liver**, is through its putrefaction.

The **Pain** or Disease of the **Gall**, is a stoppage or obstruction in the Receptacles of the Gall, that it can neither receive into the Bladder, or evacuate being full; which causeth a Coliciveness by one, and yellowness of skin and Eyes with Jaundice.

The

The **Pain** in the **Spleen**, is a swelling, obstruction, inflammations and hard knobs of the same.

The **Pellows**, or **Jaundice**, a weaknes of the body which causeth yellowness in the Eyes.

The **Cholick**, or **Griping** of the Guts, a Wind in the small guts.

The **Cottiveness**, or belly-bound, when he cannot Dung easily.

The **Lar**, or **Loseness** of the body.

The **Bloody-flur**, is an avoiding of Blood with his Dung, which is through the exulcerations in his Guts.

The **Uicers**, the **Bots**, the **Troncheons**; are Diseases that much pain horses, and are the gnawing, and biting of Worms in the Belly.

The pain of the **Kidneys**, is the Stone and Gravel there.

The **Pissing of Blood**.

The **Colt-Evil**, is the rankness of Nature, and want of vent, which makes the Yard sheath, and Cods swell.

The **Gonorrhoea**, or shedding of the Seed; which is through abundance and rankness of Seed, or the weaknes of the Stones, and Seed Vessels.

Outward Diseases on the Body.

38. **THE Falling of the Yard**, is a weaknes of the Member.

The **Swelling of the Cods**, or Stones.

The **Incorning**, or **Burking**; is the falling of his Guts into the Cods.

The **Botch** in the **Grains**, a gathering of ill humors in the hinder parts between the Thighs, near the Cods.

The **Itch**, **Scab**, and **Hangyness**, is a foul scurf in divers parts of the body, through ill keeping.

The **Shoulder Wrinch**, a strain by a sudden turning.

The **Shoulder Spait**, a slip or slide, which parteth the Shoulder from the Brest.

The **Shonider Pight**, when the Shoulder point, or pitch is displaced by some great fall, rush, or strain.

Foundering in the **fore-legs**, when the Horse goes crouching on the hinder Legs, the fore being so stiff, that he is not able to move them.

The **Splent** in the Legs, or Thighs; is a spongy hard gristly bone, growing on the inside of the Shin-bone, which by making the Horse stark, causeth him to stumble. It is termed a **Screw**, if it be on the out-side.

The **Melander**, is a kind of Scab, growing in form of a line, or stroke, over-thwart the bent of the Knee.

The **Attaint**, or **upper attaint**; which is the swelling of the Master Vein, by reason the Horse doth over-reach, and strike that sinew with the Toe of his hinder foot, which causeth him to halt. An Attaint is a clapping one Leg upon another, or by some other Horse treading upon his Heels.

The **false quarters**, is a soreness on the inside of the hoofs, which are commonly called quarters, which is as much as to say, crased unsound quarters, which comes from evil Shooing, and paring the Hoof.

The **Hault behind**, when a Horse hath any Sorance, either in the Hip, the Stifle, the Hough, the Ham, the Leg, the Nether Joint, or in the pastern, or foot.

The **string Halt**, when he twitches his Leg suddenly, and so Halts much.

The **Spaven**, an old Halt, which is left as the horse warms in Travel.

The **Horse is hipt**, when his Hip-bone is removed out of its place.

The **Stiffing**, is when the stifle bone is removed out of its place.

Foundered, is when he is fat, and by labour hath had his greafe moulten within him; which causeth Lameness, and a Surteit going, **benumbedness**.

The **Selander**, is a Scab in the Ham, which is the bent of the Hough.

The **Hough boony**, is a swelling upon the tip, or elbow of the Hough.

The **Curb**, is a long swelling below the elbow of the hough, in the great Sinew behind.

The **Pains**, a kind of Scab, full of fretting matter, and breedeth in the pasterns, for lack of clean keeping and good rubbing.

The **Hules**, or **Kisbed Heels**, this is a Scab breeding behind the feet, somewhat above the neather joint, growing overthwart the fewter-lock; called the **Heilet**.

The **Wind galls**, are Bladders full of corrupt jelly, that grows on each side the joint of the feet, which causeth halting.

A **Wrench** in the neather joint, is by treading awry.

Enterfering, is the Horse trotting so narrow, that he hews one leg upon another; sometimes behind, sometimes before.

The **Shaket-Gall**, when the pasterns are hurt, either with Lock, or Halter.

The **Cratches**, or **Cratching**, or **Bats-tails**, is a kind of long scab by rifts, growing right up and down in the hinder parts; from the Fewter-lock up to the curb, and cometh for lack of clean keeping.

The **Ring-bone**, is a hard Gristle growing upon the Cronet, and sometimes goeth round about the Cronet; if it grow in any other part of the Legg, it is called a **knot**, or **knob**.

The **Crown scab**, the same to Ring bone.

The **Quitter Bone**, a hard round swelling upon the Cronet, between the Heel and Quarter, on the inside of the Foot.

The **Gravel**, is a fretting under the foot in the inner side, and sometimes in both sides together of the Heel, it comes by means of Gravel Stones getting between the hoof, or calking, or sponge, and the Shoe; which by treading eats into the quick.

The **Surbating**, a bating the hoof against the ground, by means of evil Shooing.

The **Prick in the sole** of the foot, is by means of treading of any thing that enters the sole of his foot; termed also **acclloyd**.

The **Fin**, is the rising of the flesh in the Sole of the foot, where any prick or sore hath been healed.

The **Cloping**, is driving the Nail into the quick Hoof, and Shoo clenched and remaining.

The **Retreat**, is driving such a Nail, and seeing it goes a-miss, is pulled out again by the Smith.

The **Loosing of the Hoof**, when it parts from the cronet and foot; the casting of the hoof, when the Coffin falls quite away; the shrinking of the hoof, when they are kept too dry.

The **running of the Fruith**; which is a rotten or rupt humour, that comes out of the Leg.

The

The **Halt-long**, or **Halt-worm**, is a cankerous for-
rance, above the hoof, just upon the coronet.

Accidental Wounds or Distempers.

39. **Wounds**, are those Sores or Divisions of the
parts of the Body, (called also **Ulcers**, **Cal-**
lings) made by accident.

Tumors, are swelling Sores, or Impostumes.

Buies, or **Swellings**, are caused through Blows
with blunt Weapons.

Shoots, either with Arrows, or with the Harquebush,
or Gun-shot.

Burning with Lime, or any hot fiery thing.

Biting of a Mad-Dog.

Burrs, by Tusks of wild Boars.

Stinging, and Biting of Serpents.

Lousiness, which cometh of Poverty and ill Keeping.

Broken bones, or put out of joint; called a **Fra-**
cture.

Eccoriations, is Sores in the skin.

Ruptures, are discales in the Veins, breaking of
Veins, or **incordings**.

Veins to Blood a Horse in.

40. **THE** 2 Temple Veins.

2 Eye Veins.

2 Pallat Veins.

2 Neck Veins, the Organical Vein and

2 Plat Veins, which are in the Breast between the fore-

2 Breast Veins.

2 fore-Thigh Veins, called the Shank Veins.

4 Shakel Veins before, or Fetlock Veins.

2 Toe Veins before, or hoof Veins.

2 Side Veins, called the Spur Veins.

2 Hough Veins, or the Kidney Veins, are in the inside
of the Thighs.

2 Spaven Veins, in the inside of the hinder Legs, from
the cambrel to the fetlock.

2 Flank Veins.

2 Hanch Veins, in his Hanch, or hinder Buttocks.

1 Tail Vein, running all a-long his Tail.

4 Coronet Veins, which are in the top of his Hoof,
where the Hair is.

4 Shakel Veins behind, or fetlock Veins.

2 Toe Veins behind, or Hoof Veins.

By which it appears a Horse may be let Blood in 37
Veins, all which are easie to find, being they all lie in
little Gutters, which by soft feeling with the Finger, you
will immediately find.

Bones in a Horse.

41. **IN** the Head 2 Bones.

From the Forehead to Nostril 2.

Inferiour Gumbles, or Check-bones 2.

Teeth 40, whereof the Grinders are 24; the Canyne,
or Tusks 4; and the Biting, or Fore-teeth 12, as *Aristo-*

le faith; yet others affirm but 28 Teeth.

Close Ribs in the Neck 7.

From the Reins to his hole 7 Ribs.

Commissures, or Bones in his Tail 12.

In the Shoulders 2 Regulæ.

From the Shoulder to Legs 2.

From Legs to Knees 2.

In the Knees two Supportets.

From the Shin to the Articles 2.

In the bottom of his Hoof, 16 small bones.

In the Breast 1.

Ribs 26. great and small.

(Reins 2.

Grinding Bones from hinder part, to the top of the

From the Reins to the hinder part of the head 2.

From upper part of the Thigh to Cambrel, 2 little Ribs.

From Cambrel or Gamba, to the hair of the Pasterns 2.

In the hinder Hoofs, 16 little bones.

In the Back-bone, 33 Cross-ribs.

In the Heart a Small-bone.

So that with the Heart-bone, there is Bones in a Horse
171.

The Names of all the Bones of a Horse.

43. **THE** Head-bone, is the Bone that is in the fore-
part of his Head to the Nose.

The Jaw-bone, called also the Cheek-bone, or inferior
Gumblæ.

The Rack-bone of the Neck, or close Ribs in the Neck

The Back bone, or Rain bones of his back.

The Ribs,

The Commissures, or Joynt bones of the Tail.

The Hanch, or Hip-bone; called also the Columel or
flat-bone of the hips; which hath 12 seaml in it.

The Huckle-bones.

The Spade-bone, the bone at the top of the Shoulder.

The Forcels, or canal bones; are the Bones above the
Knee.

The Marrow-bones, is the bone above the bent of the
Elbow.

The Thigh-bones.

The Shank-bones, the Leg-Bones, are the Bones under
the bent of the Knees.

The Articles, are the short bones, between the pastern
joint, and the hoof.

The Breast-bone.

The Ankle-bones, or Ankles, or pastern joint, or fitlock
joint.

The Stifle bone, is a little bone two inches long between
the lower end of the Thigh and Hough.

The Cambrel, or Gamba-bone.

The Names or Terms of all parts of an Horse.

1. Hair.

43. **THE** Hair and Hide, is generally all the Hair and
Skin of the Body.

The Mane, is the long hair on the Horse neck; the
Maune.

The **Topping**, or fore-top; **Fuke**.

The **Fetter-lock**, or **Fet-lock**, the hair as groweth behind of the Feet; the **fewter-lock**.

The **Cronet**, is the Hair as groweth over the top of the hoof.

The **Bills**, is the hair on the Eye-lids.

2. Head, Neck and Breast.

The **Crist**, or **Crest**, the Ridge or upper part of the Neck where the Mane groweth.

The **Neck**, all from the Head, to the Breast and Shoulders.

The **Brest**, or **Bisket**, or **Chest**; the forepart of the Neck at the Shoulder down to the fore-Legs.

The **Star** in the Fore-head.

The **Rache**, down the Face, when the Hair there is, of another colour, contrary to the rest of the head.

3. Body.

The **Withers**, is the top of the Shoulder-blades, at the setting on of the Neck.

The **Back**, is the place where the Saddle is set.

The **Navel-Gail**, is the top of the back, or chine, just behind the Saddle-place.

The **Reins**, is all the middle of the back from Mane to Tail; the **Ridge** of the back.

The **Dock**, the Strunt, the Horse-tail.

The **Fundament**, or Tuel, the Arse-hole.

The **Sway**, or **swayed back**, is the hollow, or sinking down of the back-bone.

The **Choppel** of a Horse.

The **Girth-place**, is the fore-part of the Belly.

The **Belly**, the middle of the Belly where the Navel is, the Navel place.

The **Flank**, the hinder part of his Belly, next the sheath.

The **Groins**, the hinder parts near the Thighs; each side the Sheath.

The **Sheath**, the loose Skin in which his yard is.

The **Pard**, is the Horse-Prick.

The **Put**, is the bob at the end of his Yard.

The **Cods**, the skin in which the Stones are.

The **Stones**.

The **Filletts**, are the fore-parts of the shoulders next the Breast.

The **sides**, the neerer side; the further side; the rising side.

The **Buttock**, the hinder parts of the horse body.

The top of the **Buttock**, is that part next the ridge of the Back and Tail.

4. Thighs and Legs.

The **stifle**, or **stifle joint**, the first joint or bending next the Buttock, and above the thigh, which bends forwards.

The — is the inward bending of the stifle.

The **Thigh**, is that part between the Cambrel and Stifle joint.

The **Cambrel** or **Elbow**, is the joint, or bending of the upper part of the hinder Leg, which bend backwards from the body; the **Camba**.

The **Ham**, or **Bight**, or **bought**, is the inward bent

or bending of the Cambrel; it is also used for the bent of the Knees in the foremost Legs.

The **Elbow** of the Hough; the outward bending of the Ham.

The **Hough**, or **Leg**, or **Shank**, is from the Cambrel to the fetlock, or pattern joint of the foot.

The **small of the Leg**, is the small of the Legs both in the hinder, and foremost Legs.

The **focil** of the Leg, is the

The **back sinews** of the Leg; is the back of the Leg above the Fetlock.

The **Pattern**, or **Fetlock joint**, or **Ankles**; is the joint at the Fetlock which bends in all the feet forwards.

The **Cronet**, the foot above the hoof to the Ankle joint; so named in all the feet.

The **Curb**,

The **Shoulder**, is that part which extends from the Withers to the top joint of the Thigh.

The — is the top joint of the Thigh.

The **Thigh**, is from the bent of the Thigh to the Knee.

The **Knee**, is the middle joint of the foremost feet, which bends outwards.

The **further Leg before**, is the right Leg before.

The **next**, or **neerer Leg before**, is the left Leg of the rising side before, or the rising side.

5. Feet.

The **Hoof**, or **Horn**.

The **Coffin**, is the hollow of the hoof, in which the foot is fixed; the hoof fallen off.

The **Frush**, the tender part of the hoof next the heel, the **Sole** of the foot; the **Frog** of the foot; by some the **ball** of the foot.

The **Rift of the Hoof**, that part as is pared, or cut off being over long grown; the space between the Frush and the Heel.

The **Heel**, the rising in the middle of the Sole; narrow heel.

The **Coe**, the fore-part of the hoof; the quarter, the inside of the hoof.

The **Pastern**, or foot, that part under the Fetlock to the hoof.

Colours of Horses.

44. White. Black.

Sad Iron Gray, black with tips of the hairs whitish.

Iron Gray, white, with tips of the hairs black.

Gray, is a darkish white.

Dark, or **black Bay**, a deep coloured brownish red, a **Chestnut** colour.

Bay, a light whitish brown red.

Flea bitten, white, spotted all over with small reddish spots; **Gray flea-bitten**.

Dable-Gray, is a light Gray spotted, or shaded with a deeper Gray.

Dable Bay, is a light Bay, spotted with a deeper colour.

Dun, is a light hair colour, next to a white.

Moule-dun, is a Mouse-colour.

Sorrel, is more lighter than a light Bay inclining to a yellow.

Bright Sorrel, is more lighter than the former.

Rount, is a kind of flesh colour, or a Bay intermixt with white and gray; a **Roan-colour**.

Giffel, is a light Rount, or light flesh-colour.

Sp-bald, a Horse of two colours, as some part of him white, and other parts of him, Bay, Iron-gray, or Dun-colour.

To know the Age of a Horse.

45. **THE** Age is known by his Feet, Hoofs; but principally by his Teeth.

The first year he hath six Teeth above, and as many below.

At thirty months old, he changeth two above and two below.

At forty two months, he hath four new Teeth on both sides.

At four years old, then the Dog-Teeth fall out, and others come in their places.

Before six year old, the great Jaw-Teeth on the upper side fall out.

In the sixth year they grow again.

In the seventh year all the Teeth is in their full number, and they are all hollow; and from this time there is no certain knowledge of his age.

In the twelfth year, there is seen in them an extraordinary blackness.

Add to this, that so much as the Horse groweth older; so much his Teeth groweth longer.

The tenth year the Temples fall and begin to be hollow, and the Ey-brows Wax gray-haired; especially of dark coloured Horses, as Black, Bay, Chestnut; the gray Flea-bitten becometh white, and the white Flea-bitten becometh dapple-gray.

He hath as many wrinkles or plates in the upper part of his Broom, or bushing Tail, as he is years old.

The Eyes are of a deadly colour, dull and heavy.

An old Horse-Skin drawn up with ones Fingers abideth so a long time; but a young one falls down presently.

If the Bone at the high-most joint of the tail, at the setting on of the tail, next the body; if it stand out and can be felt, the Horse is young; if not felt, it is old and above ten at the least.

If in the upper tush you see a hole, it is young; but if it be worn smooth, and not to be seen, he is eleven years old at the least.

If the nether tush have a ring of new flesh about it discernable from the other, he is young; but if not discernable, but smooth and plain without difference, and the tush a little Blunted, he is inclining to age.

There are other Observations held, but these are the most certain; who so desires further instructions let them

peruse *P. Vegetius* Cure of Horses; and *G. Markham* his Country Farm.

CXVII. He beareth Sable, an **Als** Argent. Born by *Affil*.

A Fesse between 3 such S born by *Askerre*.

The **Assibis**, or **Assibiculus**, or the **Als-sheep**; is a kind of Beast, whose fore-part is like to the **Als**, and the hinder part to a **Sheep**; which kind of Creature (as Mr. *Topsell* informs me, fol. 29.) was to be seen in the French Kings Court.

O a point G an **Als** Jessat S born by *Esler*.

B an **Als** with a Tower on his Back A born by *Eself-burg*.

O an **Als** S is the Coat and Crest of *Esel Van Bee*.

A the same Mounting G born by *Van Rieth m*.

CXVIII. He beareth Gules, an **Als** head erased, Argent; shot through the Nostrils with an Arrow, or Dart, Or. Feathered of the second, and headed Sable; is *Hockenbull* of *Hockels* Crest.

The **Scythian Als** hath horns, but of what form and fashion my Author declares not.

The **Albarach**, is a kind of white Beasts amongst the Turks, very like to an **Als**.

CXIX. He beareth Azure, an **Als** ear, Argent. The Ear after this manner and form, may as well be termed, an Hinds Ear, an Hares Ear, or an Ear of any other Beast, that have them long. This is born by the name of *Eareby*.

A 3 Hinds Ears G born by *Audice*.

Out of a Coronet 2 Ears G is the Crest of *Altmanstein*.

The like, one G the other A is the Crest of *Medlingen*. And *Sans Crown*, belongs to *Van Alienborf*; and also of *Knobell*.

CXX. He beareth Gules, a **Mule** passant, Argent which is born by *Moile*. This is a kind of Bastard Creature, engendred of an **Als** and a **Hare**; their colour is brown, and some are of an ash-colour, with blackish Mane, and Lift down their Back and Tail.

An **Pinus**, is less than a Mule, and are conceived of an **Horse**, and **She-Als**; which are called also an **Pinulus**, or **little Pinne**; because they never exceed the quantity of a young **Foal**. Some do affirm them to be bred of a **Bull**, and an **Als**; or a **Bull**, and a **Hare**.

CXXI. He beareth Vert, an **Als** couched, or laid under his Burthen, Or: Bridled and Sadled, Sable; the **Fardels** of his Loading Gules. This is the Standard, or Ensign of the tribe of *Issachar*, Gen. 49. 14. according to the Prophetical saying of *Jacob* to his Sons; *Issachar is a strong Als couching down under his Burthen*. Shewing him thereby the virtue of Patience from the Emblem of that Creature.

T O

The Right Worshipful

Sir *T H O M A S G R O S V E N O R*, of *Eaton*, Baronett;

And his much esteemed Brother *John Grosvenor*, Esq;

And to their Worthy Uncles, *Robert*, *Hugh*, and *John Grosvenor*.

IT is the surest way to make a Mans Name Immortal, either by strong Stone Buildings, or calling their Lands after thir Names, or by leaving behind them to Posterity some Witty or Industrious Invention. But above all, David tells us, That the Righteous and Virtuous for their Works sake shall be had in everlasting remembrance. If Vertue deserve a perpetual Remembrance, I must then Canonize you with your Antecessors, amongst these English Worthies, who in the midst of all the Fiery Trials of several late Rebellions, have stood to their Pious Principles of Faith and Loyalty; And that all True Hearts may follow their Example, is the Wishes of him who is
Your Observant Servant
Randle Holme.

C H A P. VIII.

I THE four-footed Beasts mentioned in this Chapter, are of various and diverse kinds; some home-bred, others much remote; so that few of them I find mentioned in Coats of Arms; what are, I shall inform you all along who they belong unto, the rest accept only of their description.

I. He beareth Argent, a **Cat Vigilant**, (or upon his Watch,) proper. By the name of *Catesby*. This is the posture of any Cat when they are hunting and seeking for Prey; see chap. 8. numb. 56.

A 3 Cats passant in Pale S born by *Kent*.

Er. 3 such in Pale B born by *Adams*.

II. He beareth Azure, a **Dog Dormant**, Argent, spotted or branded, Sable. The Dog always when he lyeth down to Sleep, turneth himself round, and puts his Nose between his hinder Leggs; see more of Dogs, chap. 9. numb. 56, 57, 58. This is born by the name of *Lippage*.

III. He beareth Sable, a **Mimick Dog**, (or a **Celtian Dog**, Argent. This is a Dog that will imitate all things it seeth, for which cause some think it to proceed from an **Ape**, but in face, shape and back, it is like the **hedg-hog**, having a short recurved body, long legs, shaggy hair, a short bushy tail, of a white colour;

*

they are sometimes spotted, branded, or party coloured. This is born by *Mimicke*.

The **Melitan Dog**, these are little Dogs also, which were accounted the Jewels of Gentlewomen, and are no bigger than common Ferrets or Weasels.

The **French Dog**, this is a little Dog not above a foot, or half a foot long; the less it is, the more delicate, having a sharp snout, short legs, little feet, long tail, the hair about his shoulders longer than ordinary, of a white colour.

IV. He beareth Gules, the **Head of an Assyrian Goat** (or of some called a **Hambryn Goat**, and some an **Indian Goat**) Argent, **Horned**, proper. There are two sorts of these Goats, the greater being as tall as an Ass, having long broad ears pendant, and go narrow again towards the bottom or end; under them next to the Neck, is two things like Dugs or Paps, which hang down from their Throat, having their Body and Tail like another Goat, only the hair is rough, but short; their under-lip reacheth further out than the top; their horns stand not aloft, but ly along the sides of the Neck, it is called also a **Mauritanian**, or **Lybean Goat**.

The lesser **Assyrian Goat** is described, chap. 9 numb. 21.

V. He beareth Gules, the head of a **Strepsiceros couped**, Argent, **horned**, Or. These Creatures differ

in

P.M.R.D.D. Tho. Grosvenor. des. Baton. Bar.

in nothing from the common Sheep, but only in the horns, for they bend not like them, but are streight, standing backwards, circled about; some like the Goats horns, others with a kind of Wreath work like the Unicorn's horn; others have horns double bended too and again, as *numb. 35.* they are of a reddish colour on the body like a Hart. This is the Coat of *Zimzerin*.

A 3 such B born by *Saimering*.

VI. He beareth Vert, an **Arabian Sheep**, Argent. These Sheep are a little bigger than our vulgar Sheep in *England*; but of the same Wool, Figure of body, and colour, only their shins and forepart of their face, a little red, having short turning horns, with long woolly tails drawing on the ground for a foot or more. This is born by the name of *Ranek*.

The **Arabian broad tailed Sheep**, are of the said form, shape and colour, only differ in their broadness of the tail at the rump, which is near a cubit broad, but lower it went narrower, and at the end like to our Sheep tails.

The **Subus** is a kind of **Wild Sheep**, of a very bright yellow colour; it hath two large horns on the forehead, and liveth both in the Water, and on the Land.

S 3 such Sheep A is born by *Sidenhame*.

VII. He beareth Azure, a **Sena Pig-Cony** (or an **Indian Pig-Cony**, Argent. It is about the quantity of a Cony, but shorter bodied; it hath two little round low ears, and pil'd, without hair, short legs, five claws apeece behind, and six apeece before; teeth like a Mouse, but no tail, and the colour variable, some white, some yellowish, some branded or party coloured; I have seen of them, that their fore-part, to the Belly and Back hath been all white, and the hinder part all yellow; their crying is just like a young Pigg. This is born by the name of *Gruntling*.

S three such O is born by *Lodrome*.

VIII. He beareth Argent, an **Hamster**, or **Field-Mouse**, proper. It is a little Beast about bigness of a Rat, living in the Fields, in the Earth, at the root of Corn; the head is of diverse colours, the Back red, the Belly white, when it sits thus, it resembleth the posture of a Bear, it hath a little short Mouse-like tail; and sitting on its Breech, useth its fore-feet instead of hands, which are like to a **Moles**, but not so broad, it is called a **Cryptetus**.

The **Arctomys**, described by *St. Jerome*, is by some taken to be the foresaid Creature, which abound in *Palestina*, dwelling always in holes of Rocks, and caves of the earth, not exceeding the quantity of an **Wedg-hog**, and of a compounded fashion, between a Mouse and a Bear.

The **Mozician Mouse** is long in body, like to a domestick **Weasel**, tail very short, the colour of the hair like to a grey **Cony**, but more bright; it wanteth ears like a **Mole**, but hath holes; the teeth are like **Mice**.

The **Seythian Mouse**, or **Brand Squirrel** Mouse, or **Pontick flying Mouse**; it goeth by all these names; the hair at roots is a black brown, and the ends Ash colour, having a round circle of hair about the two former feet, which they call Wings, wherewith they are thought to fly from Tree to Tree; the tail all hairy,

*

four or five fingers long, like a **Squirrel**, their ears shorter and rounder at the top than a Squirrel.

The **Nut Mouse**, **Hafell**, or **Filbert Mouse**, so named, because they feed on all such Nuts. This is a sleeping Mouse like the **Dormouse**, the colour is red, like the **Hafell**, and as large as a **Squirrel**, the back like a Mouse colour, the head more red, his ears great, long, and round at the end, pil'd without hair, the belly white, so are his legs, and neithermost of his tail, towards the tip, white; his nostrils and feet reddish; the tail long and rough, but most at the end with white hairs; eyes black, hanging out of his head, the Beard partly white, partly black; both above and beneath his ears, and about his eyes, and the upper part of his tail, next the body, all black; on his fore-feet he hath four distinct Toes or Claws, and five apeece on the hinder, and from the bending of the Knees, to the tip of the Nails, are altogether bald and without Haire; they clime trees like **Squirrels**.

The **Sorat**, is in nothing differing from the **Nut-mouse**, but onely that it hath hairy Eares; and maketh a Skreeking noise in her gnawing.

IX. He beareth Argent, a **Barbary Deere**, or a **Deere-Coate**, or **Tragelaphus**, Proper. The horns thereof are like a **Goats**, but more crooked and Bending going backwards like **Rams**. His Face, Nose, and Ears are like a **Sheeps**, his Cods thick, Leggs and Taile white and like a **Sheeps**; the hair on his Shoulders and Breast, Black; with two gray Spots on his Flanks, on either side, the Nostrills black, and the Face white, so is the Belly. *se chap: 9 numb: 23* This Coate is born by *Deiregoffell*.

The **Mauritanian Deere-Coate**, is cloven footed short, and thicke Necked, the colour black and red, set one with another: a beard like a **Goat**, but turning more backwards, his haire long to his Knees, a mane full of Bristles through his whole Neck, but especially on the Shoulder blades, where it standeth like Bunches, being darker then the rest of the body. The hinder leggs more hairy than the former, and the two outward cloves of the hooves in the former feet, both longer and stronger, then the inward cloves; and contrary the inward cloves of the hinder feet, more longer and stronger, then the outward Cloves: it hath onely six teeth on the neither side, the Hornes are like the **Rams**, crooked and distinguished in the middle by a black line all their length.

X He beareth Or, an **Hipellaphus head**, Couped, Proper. born by the name of *Hornarell*. This is a beast bodied in all respects like to a **Deere**, cloven Hoofed, short Taile, bearded all under the sides of his Chops, and his Throate, hanging down like to a **Goat**, the higher lipps over hanging the lower: the hornes standing broad out from either side at the temples, and like the **Roes** horns for forme and shape. The females have no hornes, but a Bunch of flesh under their throats, which is hairy and hangeth down. *se numb: 28*

A the whole beast G is born by the name of *Van Vellij*

XI. He beareth Argent, a **Shew**, or an **Erd-Shew** or a **Shew-Mouse**, Proper. by the name of *Shrawe*. I find this Creature goeth under severall names besides, as a **Mole-Mouse**, a **Mole-Shew**, or a **Muske-Mouse**. because, being dryed it smelleth like Muske,

efpe

especially the skin It is as big as a **Mouse**, and of a **Weasel** colour, and supposed to be begotten between a **Mouse** and a **Weasel**, but that can neither be true, or probable; The colour is Reddish with black on the Back, and yellowish on the Belly, having a long sharp **Nose**, turned up like a **Swine**; a short small **tail**, and a sharp voice. The eyes very little, scarce discernable; the teeth small, and stand double in the mouth; their biting is very Poisonous.

The **Shrew Woman**, taketh her name from this Venomous creature, they are generally known to be Sable mouthed, of a Poisonous breath, whose voice stingeth like a **Scorpion**, they are the most-----Creatures that **GOD** made, and the greatest Plague to Man; inasmuch that it is a common Proverb with us (*I Be-shrew thee*) that is, I wish thee no more hurt or evil, than the biting of one of these kind of **Termine**.

XII. He beareth Argent, a **Rat Seiant**, proper, I have, *chap. 7. numb. 110.* said something of **Rats** and **Mice**, only in this place give you the form of the **Rats** posture; it is ever upon three accounts thus, *viz.* when it sitteth, when it waiteth for it's prey, and when it is feeding; in all which it gathereth it self together, setting up his back. There are found some **Rats** white with red eyes, but I judge such are so by reason of great age. This is born by the name of **Rateley**.

O 3 such S is born by *Ratgrave. & Ratbach.*

The **Water Rat**, is in all respects answerable to the **Land Rat**, except the **Snout** or **Beak**, which is rounder and blunter; they live in running waters and ponds; not in great rivers. A 3 such S was born by *Mamilne* an ancient Bishop.

XIII. He beareth Argent, a **Cynoprofoppy's head coupé**, Proper. born by the name of *Comber*. There are some nations (as the Author of *Han Transformed p. 245* informes me) placed between the Equinoctiall and the Tropick of Capricorn, on that side which is called *America*, who have faces resembling **Dogs faces**, with flat noses, and **Hound** like eares, they are called by the *Latines*, *Cynoprofopi*. Yet they are not so naturally, but made so by Art, for those people from antiquity held it a singular beauty to have their noses flatt, so that when any child was born, their father or mother never failed to flat or quash down that part of the face; as the like I have seen and known to be done to **Little Dogs**, to make them flatt and turn-up noses, which *Ladies* delight in and keep for fancy and pleasure.

The **Margasans**, are a people bordering upon the *Cynoprofopians*, which have **Dogs faces** like theirs.

Pliny writeth of a people in *Scythia*, which had **Dog-like heads**, and that there are a certaine people in *Tartary* who have **Dogs faces & heads**, yet the women have Human vilages.

In *Nicoverra* a city of *India*, there are men that have **Dogs heads**. In the Iland called *Macumeran*, which is a larg and faire Isle, they have heads like **Hounds**.

And in the Iland named *Daganian*, (of some writers *Angaman*) the inhabitants have heads like **Dogs**, and live by feeding on Human flesh; that both men and women have tails at their Rumps like **Dogs**, and teeth like **Dogs**; and that they cannot speak, but bark and howl as **Dogs**, and make Signs with their **Hands** and **Fingers**,

*

as Deaf and Dumb Men use to do; that they engender with Women (*More Canino*) accounting any other way of Copulation shameful; but all these additiments are rather to be read than believed.

XIV. He beareth Sable, a **Ferret**, Or, with a **Collet** and **String** fired to a **Plumett** in Base, Argent. Their body is long, longer for the proportion than their quantity may afford; they are two Spans long, but very thin and small; there are of them Black and White on the Belly, but most commonly of a yellowish sandy colour and whitish, the eyes red and fiery; his voice is a whining cry; see *chap. 7. numb. 108.* This is born by the name of *Ferretter*.

XV. He beareth Argent, a **Malabars head coupé**, proper; it is reported in *Purchas Pilgrimage*, and *Herbert* in his *Travels*, that both Men and Women of *Malabris*, had the Lappets of their ears open, and so broad and long that they hung down to their shoulders, and the longer and wider that they be, the more they are esteemed amongst them; which they effect, by hanging ponderous things to them.

Ancient Writers speak of some *Indians*, whose ears did reach unto the ground. And *Pomponius* of these, or some like them, saith they are called *Fanejos* or *Sutmalos*, because they use their Ears for a Couch to Sleep on.

Pliny makes a report of a Nation about *Pontus* and the *Scythian* Islands, who being otherwise Naked, have Ears so large, that they envelop or lap their whole bodies within them. And that in the borders of *India* there are Men who cover themselves all over with their Ears.

There is an Island near the *Moluccas*, where a people are which have such vast ears.

The *Fanejians*, a People in *India* have their ears dilated to such a Magnitude, that they cover the rest of their bodies with them, and have no other clothing.

The *Arucettonians* are a people that inhabit the Island *Arucetto*, which is amongst the *Moluccas*, which are not above a Cubit in height, having ears of such bigness, that they lye upon the one, and cover themselves with the other.

The *Carabeus*, or *Carabes*, are a Nation in *Guinea*, upon the borders of *Niapoco*, where the people have ears of an extraordinary bigness; supposing the same to be made by Art, and effected by them as an excellent Garb of Gallantry; but of these kind of eared people, if any desire farther satisfaction, let him peruse that work intituled, *Man Transformed*, scene 8. pag. 141. &c.

XVI. He beareth Azure, the **Bresilian Land Crocodile**, proper. This kind of Serpentine Creature hath a long tail and four feet, the foremost having 5 claws apeece, and behind 4 claws apeece; the skin is covered all over, with an equal, smooth, and fine coloured scale, which are white on the Belly, and greater than in other parts, the tail is marked all over with certain white and yellow spots. This is born by the name of *Gutter-staine*.

XVII. He beareth Gules, a **Scincus**, or a **Scinke**, Argent. The *Scinke* is a kind of Land Crocodile, or taken to be some Beast like to a **Crocodile**, or to a **Lizard**; it hath cross lines on its back, of a white or dusky

dusky colour; the upper part of the body is dusky, the head, belly, feet, tail are white, with the appearance of some scales, or rather the skin is figured in the proportion of scales; upon each foot they have five distinct claws or fingers.

The **Phattage** is a little Beast in *India*, very like to the **Seinke** or **Crocodile** of the Earth, having sharp scales, as cutting as a Saw.

The **Gorgon Crocodile**, described by *Pliny*, to be a Beast having his Scales growing or turning to his head from his tail, quite contrary to other scales, which are from the head to the tail.

XVIII. He beareth Argent, a **Stellion erected**, Gules. See more of the **Stellion**, *chap. 10. numb. 17.* I having caused this to be set in this posture, to shew how these kind of **creeping Serpentine Creatures** (having short legs) ought to be drawn, and not on their feet, like other Beasts, as in old time they were made, as I have seen them. This is born by the name of **Stellion**.

G 3 such O born by *Aufger*.

The *French* Armorer *Bara*, giveth an example of 2 Lizards (Creatures like this) erected one against the other, which he termeth **Rampant**, a Blazon very unfily applied to such Creatures, to whom **Hounding**, **Leaping**, or **Skipping** are more proper.

XIX. He beareth Gules, the **Head** of a **Calitrich Ape**, Argent. By the name of *Ferth*. This is termed also a **Bearded Ape**. These will live no where else but in *India* and *Ethiopia*; they are very Apish and Playful; see *chap. 10. numb. 1.* their bodies are all white, the head, and tip of their tails only yellow.

G a demy Calitrich Ape A wreathed about the head, the ends floutant is quartered by *Parth* of *Austria*.

XX. He beareth Argent, a **Lizard**, Vert, counter-going, a **Reute** or **Asker**, proper. These are distinct Creatures, of which there are several sorts and colours, as you may see *chap. 10. numb. 10.* This is generally called by the name of a **Green Lizard**, but in the Summer time they are paler; they are altogether in Meadows and green Fields. The Lizard is born by *Levet*.

The **Reute**, **Asker**, or **Water Lizard**, are one and the same Creature, of several names; they are for the form and shape like the **Lizard**, only smaller; they live in Standing Waters, Pools, Ditches, &c. they are yellow, and sometimes blackish on the backs, and whitish on the throat and belly, or with white small spots on the sides and belly; yet sometimes there are of them that are of a dusky earthy colour, and towards the tail yellowish; their fore-feet have four fingers and claws, and the hinder have five apeece.

The **Codyll** is like a **Lizard**, but it hath Gills and no Finns, the beak or snout is very blunt and dull, sharp teeth; the claws of the fore-feet are four apeece, and the hinder five; having a fleshy Fin growing all along from the crown of his head, to his tail, upon his back; it is supposed to be a kind of **Water Lizard**.

B 3 Askers heads couped O born by *Auger*, alias *Alsager*, or *Alsacher*, of *Cheshire*.

XXI. He beareth Gules, the **Head** of a **Lapon Monkey** issuant, proper. This is a kind of Monkey

*

that inhabits the *Lapones* and *Numidia*; for stature, it is the bigness and shape of a Man, for by his face, hands, knees, and secret parts you would judge him to be a **Wild Man**; for he is altogether overgrown with hair, with a long slender tail, **Greyhound like**; the females have Breasts hanging down like a **Woman**; they are of a yellowish colour. This Coat is born by *Laponger*.

XXII. He beareth Argent, a **Cynocephale**, or a **Baboon**, proper. It is a Creature that hath the face of a **Dog**, and their other parts like a **Man**, with a short bunting tail, as if it were cut off in the middle; black haired, or of a blackish brown, on their backs; their feet, belly, and tail less hairy, of a tawney brown; the hinder part of the Buttock where they sit, pild, and without hair, red and bright eyes, they have a grim and fearful face, strong and longer teeth than a **Dog**. His Genital Member is larger than might match the quantity of his other parts; and it is most true (though strange) that they are brought forth Circumcised, at the leastwise in the appearance.

A **Cartarine**, or a **Magot**, a Beast much like a **Baboon**, as appeareth by his natural Circumcision; his Voice is like the squeaking of a **Mouse**; his Aspect and countenance was fierce and feared; his eye-brows overhanging his eyes, nose and mouth like a **Dog**, but shorter, turning up a little; short round ears like a Man, all hairy on the breast and shoulders, a long tail, with all the rest of the parts according to the **Baboon**.

The **Acephale**, a Beast without a head, whose eyes and Mouth are in the Breast; the shape in all other parts answering the **Baboon**.

XXIII. He beareth Sable, an **Egropitherus head**, Argent. This is also termed the head of an **Ape-Coat**, as having a mixt resemblance of two sorts of Beasts in them; as this is, in head, face and horns, from the Loins downward, a **Goat**; but in his Belly, Breast, and Arms, resembles an **Ape**. This Beast see *chap. 10. numb. 4.* which for the strangeness thereof, was by the ancient *Grecians* received for a god, naming it **Pan**; as they did likewise the **Satyr**. This Blazon is born by *Zim*.

The **Arctopitherus**, or the **Bear-Ape**, is a Beast resembling both kinds; see *chap. 10. numb. 51.*

The **Leontopetherus**, a Beast resembling a **Lion** and an **Ape**.

The **Cynocephalus**, having the faces of **Dogs**, and bodies like **Men**, or **Apes**. See *numb. 13. 15.*

The **Norwegian Monsters**, or **Wild Men**, they are Beasts in the shape of **Men** (as *Mr. Tysell* relateth) which have such unresistable Strength, that they can pull Trees of a mean stature up by the roots, and tearing the Boughs from the Bodies, with the Stock or Stem thereof they fight one with another.

XXIV. He beareth Argent, a **Subulons** (or a **Bracards**) head, proper. These are a kind of **Hart**, having straight and unforked horns, except one branch; they live in the Mountains of *Jura*, near the Lake *Lemnus*; they live amongst the **Stags** and **Harts**, and are of their colour. This head of a **Subulon**, is born by the name of *Subell*.

XXV. He

XXV. He beareth Or, a **Palmed Deer Head**, proper; or a **Palmed Bucks head trunked**, proper. This is a kind of Deer with a broad branched horn, each branch shooting out into smaller forks like the Fingers of a Mans hand from his Palme. This is born by the name of *Palmitine*.

G three such O born by the name of *Falham*.

XXVI. He beareth Argent, two **Fores saliant**, **endowed**, looking back at an **Hinds head**, all proper. Born by the name of *Foxcroft*.

The like is born by *Salis* an *Italian*.

XXVII. He beareth Argent, a **For seiant**, Gules. By the name of *Foxseat*. *See chap. 7. numb. 106. They are generally of a reddish, yellow, or Sand colour, and more white towards their Throat and Belly, and at the tip end of their Tail.

In *Muscovia* is both black and white Foxes, and black and ash-coloured.

The **Dusky For** hath his Throat sprinkled and darkned with Coal Dust upon white, so as the ends of the hair are black, and the foot or bottom part next the Skin, all white, the rest of the body reddish.

The **White For** hath a pure white Throat and Belly, the rest red, or Sand colour.

The **Sky colour** or **Blewish For**, hath a bright sky colour under their Throat.

The **Crucigeran For**, or the **Cross bearing For**, or the **Crossed For**; having their backs, from the tip of the Nose, to the end of the Tail, a black list, or line; and overthwart the Shoulders; and down the out-sides of the fore-feet to the Toes, another black line, which make a perfect Cross on the Foxes back; the rest of the colour answerable to the vulgar Fox.

The **Spotted For** is the same in colour and nature as the common Fox; but is asperfed over with black spots.

XXVIII. He beareth Argent, the head of an **Hypelaphus** (or the **Hart Horse**.) It is a kind of **Wild Horse** in *Polonia*, which hath Horns like a **Hart**, **re-curved**, or turned contrary to other Horns, forwards to the Nose, on either side the Face; they are bodyed like a **Horse**, only are cloven-footed, like a **Deer**.

The **Equiferus**, or the **Wild Horse** of *Ethiopia*; they have two long venomous teeth, standing out of their Mouth, and have Hoofs or are cloven-footed, like **Deer**; with a long Mane, growing all along their backs, to their tail; they are of an **uncame** nature.

The **Indian Wild Horse**, hath but one horn.

The **Alpian Wild Horse**, is of an ash-colour, with a black list down his back; and them of *Scythia*, are clean white.

Equicervus, is a kind of **Horse**, of a compound kind and shape, between a **Horse** and a **Deer**, and is called a **Buck** or **Deer-horse**; having a well compact body, long and lean Leggs, cloven hoof, short tail, and in all parts you would judge him to be a **Hart**, but in his head and Ears, a **Horse**; and in his Horns, a **Roe**: the upper Lip hangs over the nether, almost as much as an **Elk**; his Mane like a **Horse**, but thinner, and standing more upright. It is of a Mouse, or ash-colour, but growing older, it is more yellowish; especially in the extreem

parts of his body; the hair smooth, but most of all on his Leggs; but under his Belly, in the inner part of his Knees, the top of his Neck, Breast, Shoulders, and Back-bone, not so smooth. It uttereth a Voice like the grunting of a Swine, being without her Female; see numb. 10.

Argent an **Equicervus** proper. Born by the name of *Horburgh*.

XXIX. He beareth Argent, a **Gulson**, (or **Gul-gut**) proper, **Squeezing** himself between two Trees, fixed upon a Mount out of Base, Vert. It is a devouring Creature thought to be engendred of an **Oven**, and a **Lioness**; some think of a **Wolf** and a **Dog**; It hath the Face and Beard of a **Cat**, round Ears, the Body of a roagh shagged Dog, and a Tail like a Fox, black of colour; his Feet and Nails sharp; Hair hard and sharp, his Skin rusty. When he hath eaten his fill, that his belly stands out, and that he can eat no more; he berakes himself to 2 trees that grow near together, and their draweth through his body, by pressing whereof he driveth out the meat which he hath eaten, and being so empty returneth and devoureth as afore. This is a fit Emblem, and truly the badge of a Glutton. And is thus born for the Crest of *Van Quitzon* of *Saxony*.

XXX. He beareth Vert, a **Manus head couped**, Argent. This Beast goeth under several names, as **Hannus** or **Hannulus**; being little low **Horses**, conceived of a **Bull** and a **Hare**, or a **Bull** and an **Ass**, between whose Ears there are two bony bunches about the bigness of a Walnut, which doth demonstrate that the Syre was a Bull; they want their upper Teeth, and their under Chap (as some say) doth stretch forth it self behind the upper, as it is in many Fishes. It is also termed a **Burdus**, from its bearing burtheus, being very gentle and easy to be handled. Of others termed **Iunus**, or **Ginnus**; and **Vinnus**, or **Vinnulus**.

The **Befus**, is a kind of beast, which in the former part is an **Ass**, and in the hinder parts a **Sheep**.

The **Vinus**, is less than a **Hule**, but more redly, having Ears like a **Horse**; and a Mane and Tail like an **Ass**; which is the same (as I conceive) to the **Hannus**, but they say, it is conceived, by an **Horse**, and an **Ass**, or **Hule**.

XXXI. He beareth Argent, a **Bonicerbus head couped**, proper. This is a beast in form and countenance between a **Hind** and **Cow**, and is therefore called a **Bonicerbus**, or **Buselaphus**, or a **Cow-hart**. It hath a long thin Head and Ears, lean and slender Leggs and Shin; the Tail about a foot long, like a **Cow**; his upper part yellowish and smooth, his nether part black and rough; the hair of his body betwixt yellow and red; with a kind of hairy star, in his Forehead, and about the Horns, which are black wrinkled at the bottom, but smooth at the top, turning and meeting as it were in the middle, then flying off again to a great distance, then bending again, so as the tops of the Horns do not stand a-sunder above two fingers breadth; it hath eight teeth, and wants them above; it hath two small Udders under the belly like a Heifer. This is the Coat of *Bonimin*.

A the like head B horned O is born by *Brog* a *Polander*.

X

G

O 3 such G horns tipped A by *Albering* an *Italian*.

XXXII. He beareth Argent, an *Helvetic* wild *Rock Goats* head, issuant, in Base, proper. This beast also hath a double name, some call it a *wild Goat*; others the *Alpian wild Goat*. This is the true form of the head of it, though I have mentioned it again by an over-sight, *chap. 9. numb. 23.* the horns stand upright on the head, and then bend a little backwards in the ends, black of colour, the Eyes red, they are between red and brown, red in the Summer, brown in the Winter. There is of them seen white and black, in distinct colours one from another; some term it, a *Shamois*. This is Born by *Shalva* is a *Spaniard*.

Out of a Crown a Demy-Alpian wild Goat S is the Crest of *Fuzer* *Van Fridberg*.

G the like A to the sinister side; is both Coat and Crest of *Van Bagewitz*.

XXXIII. He beareth Or, an *Elks* head issuant out of Base, proper. They are in shape and body like a *Ree*, or *Hart*; having spotted skins; their Mane is divers, both on their Neck, and under their Throat it buncheth like a beard, or curled lock of hair; they have very short Necks, their Ears and back are very long and hanging down; their colour for the most part is like a *Hart*, and sometimes white. Some are of a russet-colour and in the Winter time brown and blackish coloured; see *chap. 9. numb. 10.* This is born by the name of *Elkine*.

G an Elk proper, born by *Elthorne*. The same is born by *Konissberg*.

XXXIV. He beareth Argent, an *Ore-Dr* head, Gules, Horned, Sable. These *wild Oren* differ from all other kinds, (rehearsed in either *Bulls*, *Oren*, *Bustles*, or *Bisons*.) although some have taken them for *Bisons*. But in outward proportion it differeth but little from the *Bull*; he is very thick, with his back bunched up, body long, short Legs, Eyes red, a broad Mouth and Head; the Temple and Crown hairy, a short beard upon his Chin of a black colour, his other parts, as Face, Sides, Legge and Tail of a reddish colour; the Horns short bending in and out again; being all circled about at certain distances from the head to the point; in proportion of body they are twice as big, and more, then the *Bull* or *Dr*. This is Born by the name of *Urtame*.

The *Bos-Camelita*, or the *Camel-Dr*; these are Beasts found between *Florida* and *Palma* in the new found World, which are a kind of *wild Bull*, whose horns are a foot long, and on his back he hath a *Tumour*, or *Bunch* like a *Camel*; his hair all over his body is very long, but especially under his Chin, and his colour, like a yellow *Bule*.

The *Libian Dr*, is one kind of Ox there, whose horns grow downwards, and for that end they are fain to feed going backwards, because the broadness of their horns doth cover their Eye-sight, having no benefit of their Eyes, in seeing forward.

The *Indian Dr*, have altogether whole hoofs, and but one horn, and are said to be as high as Camels, the horn to be four-foot broad. *Ptolomeus* doth report, that he saw an horn of an *Indian Dr*, which did

hold in the breadth of it thirty gallons. Some of these Oxen have three horns.

The *Arachotan Dr*, is of a black colour, with broad and upright horns, with their back bending a little downward.

On a wreath O and G 2 Ox horns O is the Crest of *Hoon Van Cartyls*.

XXXV. He beareth Azure, the double bended Horns of a *Strepticeros*, fired upon the scalp, proper. At the bottom or root they are dusky and rugged, growing less and less to a sharp point, at the top where they are smooth and black. There is of these Beasts that have straight horns, as *numb. 5.* which are the most general way of bearing them; see *numb. 39.* therefore it is, that these horns being the more rare, are termed for distinction, either the bended, or double bended horns of a *Strepticeros*. *R. Walton* in his Engraven book of Beasts, term this, an *Indian Deer*.

A the like horns, Sable tipped O is born by *Legen*, an *Almain* Family.

A the like G born by *Sachsenheim*. The Crest the same.

XXXVI. He beareth Argent, the head of a *Rhinoceros couped*, and his foot cut off under the knee, proper. This is the true shape of the head and foot, which is by *Pliny*, and others thus described, he is equal to an *Elephant* for height, and length; though some say it is bigger in both; for his form it cannot fitly be resembled to any Beast, for out of his Nose groweth a horn upward to his Eyes; he hath on his body (besides several smaller) six principal Shells, Scales, or Shields; the greatest comes over his back, and compasseth the two sides, which are veined on the side with thick and sharp pointed Quills like the points of the Wings of a *Dragon*, coming from the fall of his back to the middle of his Belly; two other Shields cover his two Shoulders, pointed towards the Shoulder, then spreading it self round, and at the lower part straight compassing about the Leg just at the Knee: two such other Shields, round at top, and inclining to a bavel or declining line, compassing about at the lower part the hinder Leggs about the Knee part; and the other shield or scale, lyeth upon the Buttock and back parts down to the Hams, or Thighs; all which five last said shields, are wrought with certain purple spots upon a reddish yellow ground, after the manner and work of a *Tortoise* shell; his Ears and Fore-head are hairy of a red colour, the Leggs are all scaled down to the hoof, after the manner of the scaling of the *Dragons* Leggs; the hoofs are parted into three (some say four) distinct Claws outwardly appearing so, but they are joined altogether in one intire hoof inwardly; the horn on his Nose is flat, not round, sharp at the end and rough and knotty and (as it were) composed of splented piece joined together, with the edges standing out; the Head and Face covered with confused and unorderly scales of small shields, some round, some half round, some square, some again three-square; his Neck covered with a round, yet pointed scales, large and one above another, as if it had a scaly rough band about his Neck; upon the top of his Neck just over the Shoulder lyeth another large scale which hath a small wreathed horn in the midst of it as it were set in an escalloped socket; the

Lips swelling, and as they were cut into divisions or joints, like the back of a jointed Caterpillar; the Tail is short, having some long and thin stradling hairs set all over it. I am the fuller in the description of this Beast, then I would have been, had my Graver done his part; but seeing his hand was out in the Figure, chap. 9. numb. 32. accept of this to make it up.

The Head O in a S Field, is the Coat of Don Tharald, a Spaniard.

A 3 such feet, G is born by Van Rozenford.

XXXVII. He beareth Gules, an **Ox** (or **Oxine**) head couped, Argent, **Horned Or**. It is a kind of **wild Goat**, differing in nothing but in this, that the hair groweth averse (not like other Beasts, falling backwards to his hinder parts) but forwards towards his Head. In quantity it resembles the **Roe**, having a beard under his Chin, his colour white, or pale like Milk; his Mouth black and some spots upon his Cheeks, his Back-bone reaching to his head, his Horn standing upright and sharp; out of the middle of his Head. Aristotle and Pliny say, that the **Ox horn** bendeth backward, like the Horns of a **wild Goat**. Others that he hath 4 Horns. Some write that it is a small Beast and watry, and of that nature as the **Dormouse** is, for all the Winter he sleepeth, and is as if he were dead, but in Summer awaketh, and cometh to Life again.

The **Indian Ox**, is said to have four Horns, and it may be that both there, and else-where, in diversities of Regions, there may be bred diversity of statures, colours, hair, and horns.

G an Orix head couped A is born by Obism of Rome.

B 3 such crazed O is born by Zepaim of Poland.

XXXVIII. He beareth Vert, the head of a **Deer-Goat**, Argent. This Beast doth in all respects resemble the Goat, both in Beard, the rough shagged hair, and the whole proportion of body; except the horns, which turn forwards at the point and not backwards, they being also circled, and not in knouches, or indents, as the Goats are; their body is of a whitish yellow colour on the back. Yet I have seen of these of a black brown. This is Born by the name of **Abeladame**.

XXXIX. He beareth Sable, the **Attire** (or Horns) of a **Goat**, Or. fixed upon the Scalpe, Argent. Some term them the Horns of a **Strepsiceros**; as numb. 5. 35. This is born by the name of **Innsball**.

V the like O born by Colmar of Alsatia.

The like A is the Crest of **Shomenburg**.

XL. He beareth Argent, an **Ichneumon** (or **Indi: on Mouse**) proper. This is the figure of it according as it was taken out of **Oppianus Poems**, as it was found in an old Manuscript; see it described in chap. 7. numb. 111. It is of a yellow colour, but being angry the Bristles stand upright, which then makes it appear of a double colour, being white and yellowish, by lines or rows, in equal distances intermingled; the body something longer than a **Cat**, the Nose black and sharp, as a **Ferret**, without a beard; the Ears short and round; the Leggs black, five claws on the hinder Feet; the Tail thick towards the Rump, they live both by Land, and in the Water.

A the like S is born *Jelita Poholit, a Polander.*

XLI. He beareth Argent, a **Rat** in his watching and feeding posture, proper. It is termed a **Rat vigilant**, or **poissant**; for in either of these postures he gathers himself in a short lump, (as it were) and so sitteth. See numb. 12. and chap. 7. numb. 110.

The **Mouse** is less then the **Rat** by four times, and is in all respects made like the **Rat** in form and colour, being a blackish dusky colour, more white on the belly; having a long head, short and round Ears, short Leggs, long Feet, sharp Claws, black Eyes, long Tail a little hairy; but most generally pil'd and without hair; see numb. 110. as abovesaid. There are also white **Mice**, which have red sparking fiery Eyes.

The **Mouse** with an Owl upon it, is the Crest of **Standish** in **Lancashire**.

A Rat or Mouse in a Cats Mouth Sejan is the Crest of **Van Caten**.

XLII. He beareth Argent, a **Raingers** (or **Rain-Deers**, or **Reyners**) head, issuing out of **Wate**, proper; see chap. 7. numb. 86. The similitude of this Beast, is much like to a **Hart**, but it is much bigger, it beareth three orders, or rows of Horns on his Head; he changeth his colour according to the time of the year, and place he feedeth in; because some of them have been found to be the colour of **Harts**, others of **Antes**; this Beast is full of long Bristles, or strong hair from the Throat, to the bottom of the Breast, which stands out Mane-like; their Leggs hairy, the hooves hollow and moveable; the Horns are generally white; yet sometimes of the colour, of **Harts-horns**. This is Born by **Raingifer**.

The **Female Rain Deer**, have no Horns; hence all things like the Males; yet they have long side Manes, from the Crown to their backs, which is so long and shagged that it covers the Females Ears.

A a **Rainger** proper; is the Cognizance of **Rain-er** in **Ringlom**. The same with Collar and Chain O is born by **Terwall**.

O the head couped G is born by **Leall**.

XLIII. He beareth Vert, a **Marmot**, (or **Alpine Mouse**) Or. This is a kind of **Squirrel** **Mouse**. I may call it, it is in bigness between a **Hare** and **Coney**; but more fat and of a thicker body, they use their Buttocks, and use their foremost feet instead of hands. Their back is broad, and for the most part is yellow; in some more clear, and in others more obscure, and brown; full Eyes standing far out of their Head; and Face like the **Hair**, the Feet not very hairy, with long Nails, as a **Squirrel**; a Beard like a **Cat**, his Belly and Feet more lighter coloured than his Body; his Tail bushed, and in form much like a **For**. It getteth on his Feet like a **Bear**, or **Ape**, by jumps; for his Leggs are very short. They are like the **Dormouse**, sleep all the Winter; the Mouth and Teeth like a **Hart**, or **Mouse**; their whining, is like the whistling of a Pipe, and bark like little **Dogs**. See chap. 9. numb. 53. Another draught of them. This is born by the name of **Marmote**.

XLIV. He beareth Argent, a **wild Field Mouse**, Gules. This is born by the name of **Feilding**. This Beast

Beast is not much less than a **Rat**; having a long broad hairy Tail, like a **Cat**; the Head round, the Mouth, Teeth, and Beard like a **Rat**; round short Ears; they are of two colours, some of a brown red, some black, with the Face, Belly, and insides of the Legs lighter.

The **Lesser Wild Field-Mouse**, have short Tails, in all other things they resemble the larger sort, as is aforesaid. This according to the foresaid Blazoning is born by *VVilmsfell*.

A 3 such Couchant S is born by *VVilmouth* alias *VVild Monse*.

Between the Figures 44 and 45, is placed an Horn of a **Cow**, or young **Heifer**; and is so born, viz. a Horn coup'd in Fesse A between 3 Estoils O born by the name of *Kuborn*.

XLV. He beareth Argent, an **Indian Mouse**, (or the **Bear-Mouse**) Sable. Many times **Mice** do take their names from the shape, or from the Country they are bred in, as this for form, hath the Head, and Face, and Snout of a **Bear**; being bred in *India*, is called then for its shape the **Bear-Mouse**; or of its place the **Indian Mouse**, it hath a Tail like a **Cat**, and the hinder parts of a **Bear**, of a shagged hair, and of a deep brown colour. See another shape of them, *chap. 18. numb. 40.*

The **Eastern Country Mouse**, is as large as a **For**.

The **Egyptian Mouse**, hath strong stiff hair like a **Hedgehog**, they go on two feet, for their hinder-Leggs are longer than the former; they sit on their Buttocks, and use the ir fore-feet for hands. Called the **Bipedall**, or **two footed Mouse**.

The **Cyrene Mouse**, or **Aiper Mouse**, which have **Hedgehog** hair, and a Face like a **Aiper**.

The **Arabian Mouse**, is as large as a **Dormouse**, which have very short Leggs, inso much that nothing doth appear without the body; except the space of the joints, of the Finger; (as it is in the short Legged Fowl called a **Martin**, or **Martinetts**, or **Martlets**;) the Fingers or Claws of the fore-feet are as broad as ones hand, and the hinder of the quantity of the joints to the ends of the Fingers.

XLVI. He beareth Vert, the **Horns** of an **Equicerve** (or **Deer-Horse**) Argent. These I take to be such Horns by reason of their turning outwards as the **Equicervs** doth; see *chap. 9. numb. 15*. Though by the invecking of the horns, they should belong to a **Bonicon**, and so I have seen them Blazoned; as thus. Two Horns of a **Bonicon** endor'd and conjoined at the bottom Argent. Yet some others have termed them two **Horns conjoined**, the **points endor'd**. But I rather take these Horns to be coup'd, with their endor'ing, by reason they have not the Bur, or Root part of the horn at them. These Gobony A and B are the Crest of *Kargen*.

The like Sable is the Crest of *Van Cromsdorf*. And out of a Crown Or: the like horns Argent, is the Crest of *Van Luczdorf*.

XLVII. He beareth Gules, a **Bonicons Horn**, (the back part reverted to the Dexter side,) Argent.

☞ If there be but one Horn born intirely of it

self, then you must note, that what horn so ever it be the Face or upper side ever ought to be the dexter-side; this therefore being contrary, is mentioned to be with the back of the Horn that way. 3 Such is the Coat of *Van Handersleben*.

B the like, turned to the sinister A is the Coat and Crest of *Smiter*.

B the same to the dexter A the Coat and Crest of *VVeyler*.

G 3 such to the dexter A is born by *Schorlin*.

The like horn turned to the dexter A with three Roses on the out-side G is the Crest of *Roten*.

The like turned to the sinister Per Fesse with a Pale counterchanged O and B is the Crest of *Hegenheim*.

G the like, Verted to the sinister, each inveck contrary gobonyed A and B the coup'd part O is the Coat Armour of *Van VVeyler*.

XLVIII. He beareth Azure, a **Muscat**, proper. It is a beast after the kind of a **Roe**, both for figure, colour, and stature; admitting of no other similitude, except the Teeth which are like a **Dogs**, whereof two are like a **Boars** Teeth, white and straight: Some say, it hath Horns like a **Roe**, but that is a gross Errour, because no Man (as ever saw one of these Beasts) doth so much as make mention thereof, the original of which Errour, came from its description (as I believe) that because it resembled the **Roe**, and the **Roe** having Horns, therefore the **Muscat** must have Horns also. It is called also a **Moschat**, or **Muscat**, or a **Gazel**. Which see *chap. 9. numb. 11*. This is born by the name of *Gazell*.

XLIX. He beareth Argent, a **Flying Ape** displayed, proper. This is an **Ape** in *China*, which hath a kind of loose Skin after the manner of a **Bat**, or **Rear-Mouse** from its back to its four-feet; which upon their opening, spreadeth it self abroad like a **Seal**, by means whereof he flyeth and leapeth from place to place, at his pleasure. This is Born by *Apsy*, alias *Apsrey*.

L. He beareth Gules, a **Horse Legg** in pale reverted to the sinister-side, coup'd under the Shoulder, fleeted in the Knee, and **fitlock joint**, Argent; Hoof Sable, Shoo, Or. If this were the hinder Legg of a Horse, upon this term of **Bowling**, or **fleeting**, in the two joints) then the higher part would bend one way, and the foot another, because their joints are contrary bent: See *chap. 7. numb. 91*. Such a Legg is born by *Abenperg* of *Franconia*.

LI. He beareth Azure, a **Campurch**, proper. This is a Beast, both for Land and Water; living about the Island *Molucara*, being in the fore-part like a **Unicorn**, but rogh, shagged about the Shoulders, like a **Water-Dog**, a short Horn wreathed in his Fore-head, Ears not discernable, by reason of his roughness on the top of his head; the hinder part like a **Deer**, with the fore-feet cloven-hoofed, and the hinder, the feet of a **Stag**. Such a Creature is born by the name of *Campurcham*.

A the like G is the Coat of *Caslingo* an *Italian*.

LII. He beareth Vert, an *Hulpatim*, Or. This is a kind of wild Beast, in the Isle of *Zocotera*; and in the parts of *Ethiopia*; having the Face of an Ape, hairy all down to the Shoulders, and a rough shagg on his body like to a *Water-Dog*, a short small Tail, with round feet, each having only two round Toes, with sharp Claws. This is born by the name of *Van Pragan*.

LIII. He beareth Argent, a *Siraffa* (or *Camelo-pardalis*, or *Camel-Pardal*), proper. This is a Beast in the *India*, or lesser *India*, like the *Camel-Leopard*, but it hath Horns bending forwards; or bunches rising out of the head, as in young *Calves*, their forefeet being much longer than the hinder. It is said to be engendred of a *Camel*, and a Female *Libard*, or *Panther*; the colour is for the most part red, and white mixed together (as it were) an interchangeable skin, being full of spots, yet not of one colour; and it is said, that underneath his Belly, the colourable spots are wrought in fashion of Fishers Net, and the whole body, so admirably intercoloured with variety; that it is in vain for the Wit, or Art of Man, once to go about, or endeavor the imitation thereof. This is born by the name of *Scacrusen*, and in a field O. It is born by *Boyeza*, a *Polander*.

B 3 such heads coupéd O born by *Girraff* an *Italian*.

LIV. He beareth Vert, a *Mesrendis*, or an *Ape-hog*, proper. This is a compound Creature, of an Ape in the fore-parts to the middle, and the other half a *Swine*; the first being of a swarthy or tawny flesh colour, and the latter of a yellowish brown. This is also called a *Minotus*, which is half a Man, half a *Swine*. This is the Coat Armour of *Hiragam*.

LV. He beareth Gules, a *Minocane*, proper. This is half a *Child*, and the other half a *Spaniel Dog*, with a bushy Tail. Some call it a *Homocane*. This is born by the name of *Miner*. And such a Creature proper in an Azure Field, is born by *Camino* of *Ireland*, that is *Mac Camine*.

LVI. He beareth Argent, an *Angry Cat*, roed, proper. Some term it, a *Cat exasperated*, or *made Angry*, an *Ireful Cat*. These sorts of Rowed Cats have for the bodily colour, sometime white, some grey, some yellow, some yellowish brown, and again the spots or roedness of them, is as variable, as black on the white, black brown, on the yellow; and a black, on the brown. This is born by the name of *Ire*.

B the like A with a Mouse under his fore-feet S Born by *Farouche*.

LVII. He beareth Sanguine, a *Griffon*, with its Wings *Overture*, and *Pendant*, parted per pale Argent, and Or. This *Griffon*, I have set here because of the rarity of his Wings, which are seldom seen thus to be born, but above his Shoulders; therefore the Wings are termed (*Overture*) as being on either side his head; and *pendant*, as having the points of the Wings downward, and not up; as in the Examples of Birds, you may see further, chap. 11. This is born by the name of *Griffinham*.

LVIII. He beareth Azure, a *For-head coupéd*, proper; having a *Friers Cowl*, or *Hood*, about his Neck, out of the Crown part, a *Goose-head issuant*, Argent. (In pretence of Peace he bears) in his Mouth an Olive slip, Vert. Thus many a Goose by fair words of a crafty Fox, is brought into a Snare under pretence of safety, and so led captive to destruction. This is the Crest belonging to the Coat of *Schaden*. And also the same is born by *Van Leipoland*.

A the like head coupéd, with a Cow; on his head a spired cap turned up G is the Coat and Crest of *Hundbreckham*.

LIX. He beareth Argent, the hinder Legg of a *Deer coupéd below the Hanch*, (or *Buttock*) erected, and reverted in form of a Cheveron proper. Born by *Hurtell*. If this had been one of the former feet of a *Stag*, or *Deer*; then the bending of the Hoof (the Leg being in this posture) would have turned inwards, as this doth outwards.

Therefore in your Blazon, you must have an especial care to mention what Legg is born; for there is no Beast (but such as imitate the actions of Man,) but their fore-feet in the Knees, bend outwardly from the body, and the hinder feet in the middle joints, bend inwardly, being contrary one to the other, so that the hoof must turn contrary. The like Rule is to be observed in these Creatures which have the bending of the Hams and Knees, contrary to those aforesaid; as have their Forefeet in their Knees, or Elbows to bend inward, and their hinder Knees, or Hams to bend outward, as in Man, and his Imitators, as Apes, Baboons, &c. O such a Leg flected G. Is born by *Van Hintzenhausen*.

Terms used for the bending of the Legs and Arms.

2. **T**Here are several Terms to be used according to the form, manner, and situation of the bended joynts; which I shall set altogether in this place, for readiness sake. Yet with this caution, that the hinder and foremost Feet and Leggs of Beasts, be exactly noted and mentioned, which they are, and whether they be *Couped*, or *Erased*. As

A Leg of a *Deer*, or *Horse coupéd above the Knee*, or in the middle of the *Thigh*. That is when the Leg and Foot stands in that posture of standing, as if it were fixed to the Beast it belonged. That is with the foot down, and the Leg and Thigh, standing upright as it were in pale; as chap. 7. numb. 50. 91.

A Leg of a *Deer*, (mention whether further or hinder) coupéd in the *Thigh*, (or under the *Shoulder*) flected, (bowed, reverted, or reverbered) in the *Knee*. Or thus, a Leg of a *Deer bowed* and coupéd in the *Thigh*. That is when the Legg stands upright, and the Thigh (or *Knee-joint*) bends backwards, as chap. 17. numb. 57. 59. Or the *Buttock* or *Hanch* of the hinder Leg forward, as chap. 7. numb. 91.

A Leg of an Horse, couped in the Thigh, and flexed in the knee and fitlock joints; that is, when both the Thigh part is bended, and the foot bended, and the leg stands upright in its own posture, as *numb. 59.*

A Leg of a Deer couped at the Hanch or Buttock; (reverted, or recurved, or) bowed in the knee, in the form of a Chevron, as *numb. 59.* Some term it erected and reverted, or Imbowed. Before the bowing of the leg, we must suppose the leg to stand upright in its proper posture, as if it were joined to the Beast; which being couped or cut off, the Bowing must needs fall to the dexter side, and the sole of the foot be upwards, and so make the form of a Chevron: But if the joint of the leg bended outward (as all farther legs of 4 footed Beasts do) then supposing the leg to stand upright, upon the coupling or cutting of it off from the body; the Bowing will then fall contrary, viz. to the Sinister side, and the foot or hoof to the Dexter, with the Sole downwards; this is a thing little regarded in the true draught of things by some Herald Painters, yet ought carefully to be noted.

A Leg of a Deer in Fesse, couped at the Hanch and flexed. That is, when the bending is upwards, as *numb. 61. 70.* This kind of flexing or Imbowing; is peculiar and only proper for Arms of Men, Apes, Baboons, &c. and for the hinder parts of Beasts; for the foremost cannot naturally bend so, except the fore-part of the leg be turned up-side down.

IX. He beareth Argent, three Lions tails conjoined in Base, and Crossing or Fretting on the other, proper. This is born by the name of *Liontaile*, alias *Liontaile*.

The like O is born for the Crest of *Lobe*, of *Siliars*.

LXI. He beareth Or, the hinder Paw of a Lion, in Fesse, to the Sinister, couped in the middle of the Buttock, and flexed, Gules. Born by the name of *Rosseg*.

S the like issuant from the dexter side O born by *Seitzen*.

G the like from the sinister side S holding of a Key O by the name of *Hombrecht*.

O the like S (sans Key) born by *Cluser*.

O the left Arm of a Devil or Fiend with a Dragon like foot S is the Coat of *Spittachar*.

LXII. He beareth Azure, the Horns of a Bonafus fixed on the Scalp or Skull, proper. The Body of this Beast is in all respects answerable to the Bull or Ore, Some term it a Bonacons Horns; see *chap. 9. numb. 12. 13.* but it is best Blazoned, a Bonafus head cabossed; the Horns Imbowed to each side the face. This is born by the name of *Croucher*.

LXIII. He beareth Argent, the Horns of a Bull fixed upon the curled Skalp, with two Ears, Sable. By the name of *Bullhead*.

LXIV. He beareth Argent, two Proboscides (or Snouts, or Trunks) of Elephants reflexed, endorsed gobony Or and Gules; fixed upon an hairy skalp, with two Ears, Sable. By *Bosin*.

*

The same is born by the name of *Hurnkhofen*, of *Svebedin*, viz. G the Trunks A and Scalp S.

LXV. He beareth Argent, a demy Talbot rampant, to the Sinister, Gules; instead of feet, two Proboscides of an Elephant fixed on either side (or extendant) reflexed endorsed gobony, Or and Azure; issuing out of the Snouts thereof, two flower de lices, Sable. Some term it a demy Talbot, his feet converted, (turned or Metamorphised) into Elephants Snouts, with two flowers de lis, issuant; see *chap. 9. numb. 3.* Born by the name of *Rechingsford*.

The same G is the Crest of *Van Kettenheim*, sans flowers de lis.

A demy Child with Bucks Horns G born by *Rastus*.

The like A the Proboscides O is the Crest of *Brandek* alias *Randek*. Thus you shall have demy Men, Women, Lions, and other Creatures born with several sorts of things in the places of Hands and Feet.

LXVI. He beareth Azure, the Trunk of an Elephant erected, flexed, and reflexed, or curved and recurved, Or, double Collered and Belled, Argent, on the back thereof four Grafs tufts set at distance. This is the Crest of *Van Probach*.

2 such endorsed G collered, imbatled on the top A born by *Neuenstein*.

2 such B each set on the out-side with 3 Pine Apples, and one in the Snout G is the Crest of *Elmanger*.

LXVII. He beareth Argent, the Proboscide of an Elephant erected, flexed and reflexed, Gules; engailed on the back part, Azure, on each point the head of a Trefoil, (or each Bottony) Or, with a Ribband about the Snowte, turned into a round (or ring) and so compassing the middle of the trunk after the manner of a Bridle, Sable. This is the Crest of *Giltchiken*, or *Caderkingen*.

2 Proboscides endorsed, Snowts dismembred G engailed on the out sides O on each point a Pomell or Plate, is the Crest of *Friesenberg*.

Upon the sides of 2 Proboscides G estoiles O in the Snout feathers A is born by *Salingburg*.

LXVIII. He beareth Or, the Proboscide of an Elephant, erected, flexed and recurved, Gules, issuing out of a pierced place, towards the Basis thereof; a Rose Sprig vertant et revertant, about the trunk to the middle thereof. Some term it, the Trunk of an Elephant Bowed Imbowed, with a Rose Sprig leaves and flower issuing out of the fore-part thereof flexed and reflexed, proper. Born by the name of *Van Spotsloogh*.

G 2 such endorsed couped A the Rose-sprig proper, is the Coat and Crest of *Van Grunberg*.

2 such, the one A the other B, the snout and out-sides feathered counterchanged, is the Crest of *Elmer*.

The same B and O by *Elmer*.

LXIX. He beareth Argent, the Proboscide of an Elephant erected and couped, bowed Imbowed, Or; Mailed (or haired) to the middle, Azure, and Collered at the bottom, with an Hawks Bell fixed thereunto, Gules; out of the Snowte, a Dutch fan pen

pendant, Sable. Born by the name of *Oberstagh*.

2 such endorfed, set with Vine Leaves on the out-sides
is the Crest of *Geymanner*.

The like G set with Dutch fans pendant A is the
Crest of *Aristler*.

2 such maned S the rest A out of a Coronet, is the
Crest of *Kapelan*.

2 such, the A maned B set with Spur-Rowel O is
born by *Gays*.

These things, though I from my Author, and
from their similitude to an *Elephants Trunk*, have
all along termed them so; yet in my Judgment they
would pass better for *Horns*, and I take them to be ab-
solute Horns, if compared with such as you may see, *lib.*
3. chap. 16. numb. 17, 18, 51, 65, 118, 119.

Out of a Coronet O 2 such horns endorfed, gorged
with a Crown A is the Crest of *Lissnig of Bavaria*.

LXX. He beareth Or, an Apes right Arm coup-
ed at the Shoulder, Imbowed, proper. Some term it
an Arm in fesse bowed. Born by *Plonh-rst*.

A the like G born by *Van Planta*.

A a Lions Paw in the like posture G is born by *Spech-
feldt*.

A an Apes Arm crested to the Sinister, imbowed at
the Wrist and Elbow S is the Coat of *Planta an Italian*.

LXXI. He beareth Azure, the hinder parts of an
Ape or Monkey, the feet erected, Or. This is the
Breach of an Ape turned upside down. Born by
the name of *Van Dordt*.

The Legs of an Ape joined at the Thighs, and
reflected in triangle, I have seen born for a Coat of
Arms.

LXXII. He beareth Argent, a Beaver, proper. This
is the true shape of it, which I have described more ful-
ly, chap. 10. numb. 20, 21, 22. therefore say no more of
it here. This is born by the name of *Beverley*.

Per Bend O and B on the first a Beaver in Bend G
on the second 3 Pales waved A born by *Vijcher*.

LXXIII. He beareth Argent, an Hind lodged or
couched in a groath of Ferne, all proper. Some term

it a Bed of Ferne, because it is all round about the
Hind; others a Hind couched in Fern. This is born
by the name of *Hindley of Hindley*.

LXXIV. He beareth Vert, two Trumpets of
Rams Horns erected, conjoined, endorfed, Argent.
Others term them two Hunters Horns, the small ends
imbowed, debused. Others two Rams Horns con-
joined, endorfed. This is born by *Trumperch*.

A the like S born by *Van Widerspach*.

A the like endorfed and conjoined G by *Thorcr van
Eyrasparg*.

LXXV. He beareth Or, two Horns of a Bonicon
couped, Gules. They stand in that form as they did
before they were sawed off the head, and therefore need
no other term to shew how they are set in the Field, on-
ly by coupling, doth signify so much, as that they want
their Butt or Root, or Crown part, where they
are fixed to the Scalp. This is born by the name of
Roppolton.

G the same Gobbony A and S born by *Kargen*.

Out of a Crown the like Gobbony each other inveck.
A and V by *Helin*.

A two such flected and reflected, the invecks inward
and dorfed G born by *Dortzer*.

LXXVI. He beareth Gules, a Jaw-Bone of an
Horse, Argent. Three such is born by *Trigawle*.

B an Arm flected O the hand proper, holding the
like Bone A by the name of *Crato*. Some term it Sam-
sons Arm holding of a Jaw-Bone of an As, because
with such a Weapon he slew many of the Philistines, *Julg-
5. 15.*

LXXVII. He beareth Argent, two Lions Paws il-
luing out of Bale, imbowed, Gules, Flory on the
out-sides, and holding of a Bugle, or Hunters Horn,
Sable, having a Serpent gliding through the mouth,
and out at the end of it, Vert. This is the Crest or Co-
nizance of *Don Pedro de Alberto Castro*, a Spanish Fa-
mily.

A 2 such Paws B holding of a Flower de lis G is born
by *Ezell an Italian*.

T O

The Right Worshipful

Sir *T H O M A S W I L B R A H A M*, of *Woodbey*, *Baronett*;

And in Remembrance of his Vertuous Brother,

R A L P H W I L B R A H A M, Esq;

SIR,
YOUR Goodness hath supplied my Wants, in the Loss of your Dear Brother; from whom I have received so many Kindnesses, that I want Words to express my Thankfulness; the Contemplation of whose Vertues; as they have shined forth in him, so have they been much more Illustrious and abounding in you, which is observed by all, and must be ever acknowledged by him who Glories in your Goodness and Bounty; and desires to Subscribe himself,

Your most Humble and Obliged Servant

Randle Holme.

CHAP. IX.

1. **T**HE Bull is the Ring-leader amongst Ruth-er or Udder Beasts; therefore is fit to begin our Third Plate, or parcel of Beasts therein contained; taking the front of all the other, as a Priviledged Beast above them; having liberty to range in all pastures wheresoever he goeth, with free ingress, egress and regress, fearing neither Payage or Poundage for his Trespas.

The Bull being Gelt, changeth both his Nature and his Name, and is called an Ore.

There are Oren in India which have but one Horn, and some have three, and whole Hoofs, and as tall as Camels, which are very swift of Pace. See chap. 10. numb. 70.

The Scythian Ore hath a Bunch on his back like a Camel.

I. He beareth Vert, a Bull Argent, armed and unguled, Or. The Bull is born in whole and in part as the Stag is, and the like terms are given to them, and generally to all cloven hoofed Beasts. This is born by the name of Bestar.

G a Bull S the right leg and shoulder A the Crest a demy Bull the same colours, is born by the name of *Roxbold*.

O the like passant to the Sinister A is the Coat and Crest of *Van Barut*.

A the like rampant with tail on the side G by *Pfeller van Nofsteten*.

A Bull, his tail turned upon his back and side tipped S is the Crest of *Houghton of Houghton Tower*, in *Lancashire*.

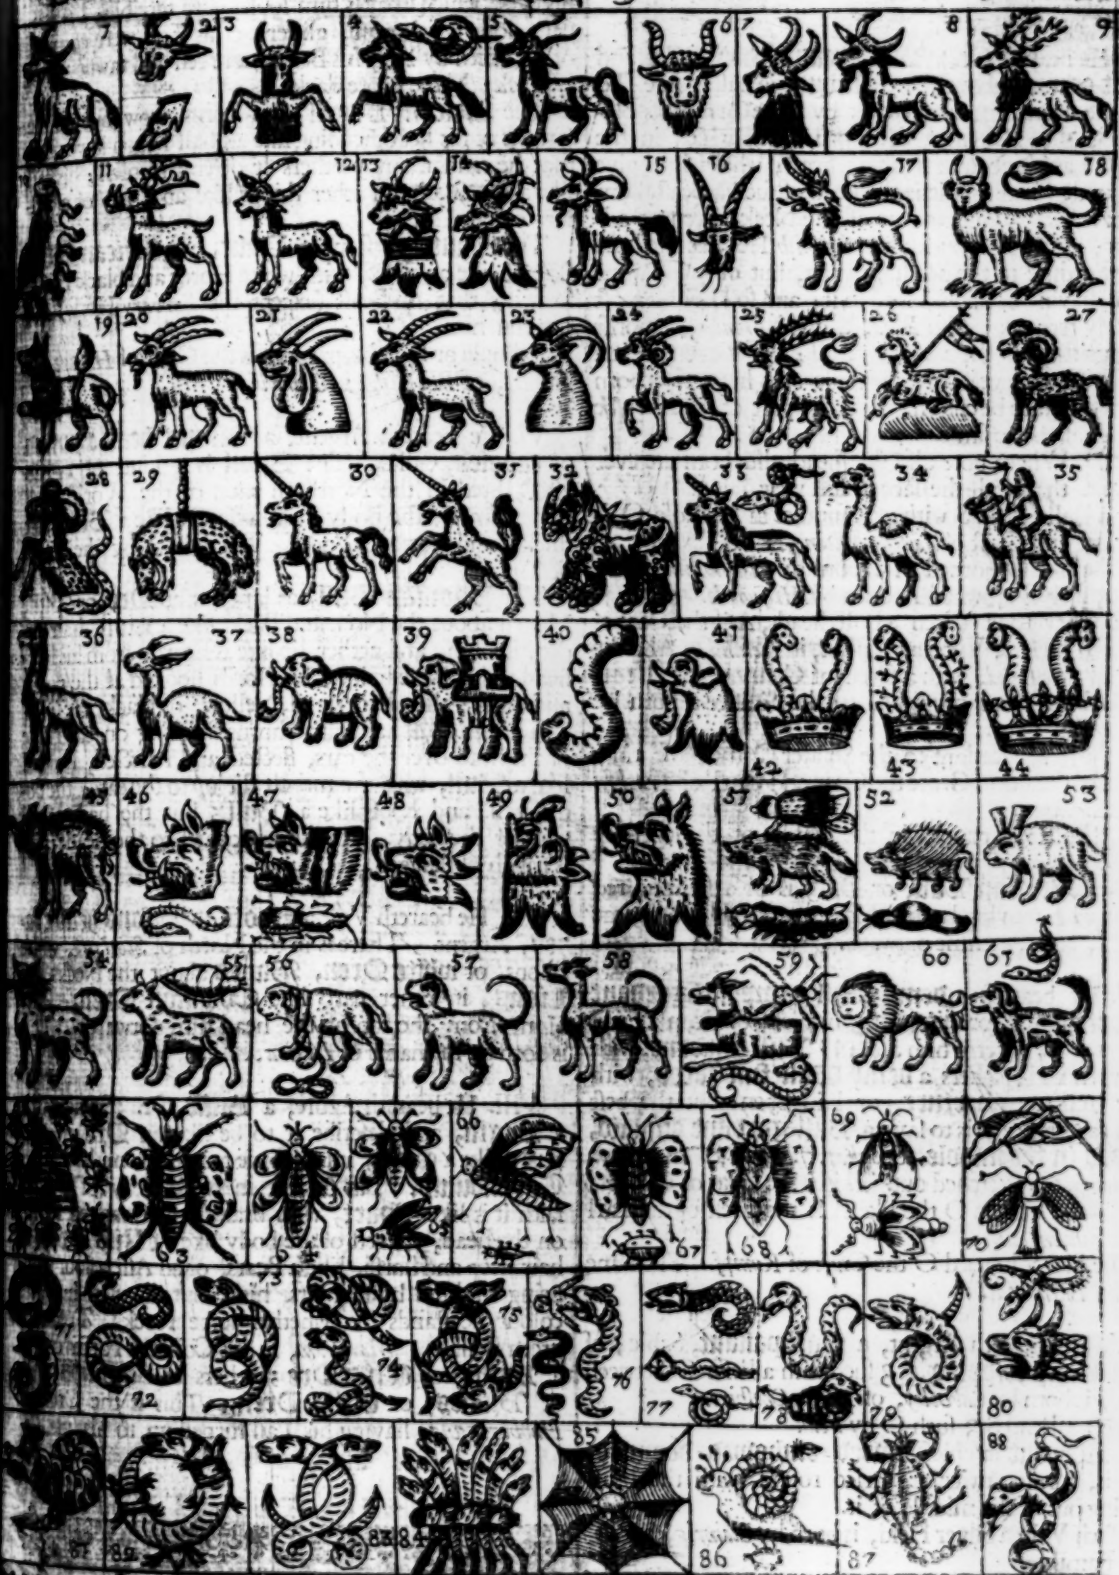

A the like with his tail on his side A is the Crest of *Kuedorfer*.

A the like S born by *Meredith Bull*, of *Wales*, horns and hoofs O.

A a Bull G horns O by *Philip ap Jevan*. And on a hill in base V is the Coat of *Ridley of Ridley*, in *Cheshire*.

The Bull is born winged as the Horse is, and the Butcher's Beest.

The Bonicervus, or Corn-part, hath a long thin head and ears, slender legs, his tail short, but like a Cows, his upper parts yellow and smooth, his neither

M.D.D. Thome Wilbraham: de Woodhey Bar^o. Hac Sculptra seducta est.

Parts black and rough; the hair of the body yellow and red; the horns smooth at top, and wrinkled at the bottom and black; see the head and horns, *chap. 8. numb. 31.*

II. He beareth Or, a **Bulls head** in chief, Gules, and a **foot coupé** above the **Cambill**, in base, Sable. To have the head thus trunked, is by some Armorists Blazoned **Cabossed**, from the word *Cabo*, which in the Spanish Language doth signifie a head; which is to give us to understand that it is the head of such a Beast, born sole of it self, having no part of the Neck thereunto adherent; by which you see the Spanish Heralds used no other Epithite to the head, thus set, but only the word **Head**, having nothing joined to it; and so I hold it most properly termed. Also *Bara*, a good French Armorist useth neither of these words at all; but Blazoneth it a Bulls head (or face) only; because any head thus born is understood to be cut off; so as no part of the Neck be dependant to the same.

Where note also that heads thus born are ever gardant, that is all the face in full view.

A a Bulls head S with an Annulet in its Nose O is the Coat and Crest of *Van Bernstein*.

B the like O horned A is born by *Villenbach*.

O 3 such B crowned A born by *Hassworde*.

S a Cheveron between 3 Bulls heads, A is the Coat of the Lord *Bulkley*, Viscount *Cashall*, in *Ireland*. Also the same by *Prestland*, with a Cressant G.

A a Bulls head coupé G to the Sinister, born by *Trutberg*.

B the like regardant to the Sinister O the Nose ringed S and the horns G are the Coat and Crest of *Truchses van Ringingen*.

A 3 Bulls feet coupé in the middle of the leg S by *Cosfoote*.

The **Phrigian Bull**, or **Dre**, is of a flaming red colour, with moving horns, which they can turn sometime inward, and sometime outward.

III. He beareth a **demy Bull rampant gardant** and **extendant**, (or **extending** himself,) Sable, in a Field Argent. Some term him a **demy Bull gardant**, with legs extended; others a **demy Bull full faced**, with body and feet **oberture**, or laid open; but the best term (as I take it) is to say, a **Bull gardant displayed, coupé in the middle**. See *chap. 7. numb. 8. and chap. 13. numb. 63.* stretched out. This is the Coat of *Bulface*.

Out of a Crown O the like A is the Crest of the Earl of *Sprintzenstein*.

The like S horned O the Crest of *Rumps*. The same by *Van Baymundt*.

IV. He beareth Argent, a **Calf passant**, Sable; of some termed **tripping**. 3 such with a Fesse G between them, is born by *Calveley*, of *Lea* in *Cheshire*.

A on a Bend S 3 such O by *Veal*.

A **Serpent** in chief, **hoisted** - **embowed** - **dehused**, that is, turning twice or thrice round, with the head coming out of the middle of it.

3 such V in a Silver Field, is born by *Clamrig*, a *Polonian* Family.

V. He beareth Sable, a **Bugle**, or **Bubalus**, Ar-

*

gent, armed and unguled, Or. This Beast hath several names, and is in form like a **Bull**, but broader and shorter, and hath a Mane like a **horse**, down to his eyes, which makes him look more terrible; his proper colour is yellowish, glistening (as if it were combed or trimmed by Art) his Belly more red and tawney than his back; Mane more dark.

The **African Bugill**, his horns grow out of the Crown of his head, bending like an half Moon inwards, so that he cannot annoy others or defend himself; his tail like a **horse**, in all other things like an **Dre**, of a yellow colour.

The **Laut**, of some a **Daut**, an **African** **Wild Beast** like an **Dre**, with white Horns and black Nails, so swift, that no Beast (except the *Barbary Horse*) can out-run him.

A Bugle or Bubalus proper, is the Crest of *Hubart* or *Hobart*, of *Blicklinge* in *Norfolk*.

VI. He beareth Argent, a **Bisons head trunked** or **cabossed**, Gules. The **Bison** is a kind of **Wild Dre**, bred in the Northern parts of the World, and never tamed; the Body in all respects like a **Bull**, but thicker and shorter of Body. This is born by the name of *Tison*.

The **Paonian Bull**, as large as an **Dre**, or **Bull**, Maned about the Neck and Back, like a **Lion**, hair under his Chin, and nether lip like a Beard, from his forehead to his Nose hairy; his Horns hooked at the points and black; their hair is red, yellow, or black.

The **Alecorn** hath large horns standing on each side of the head over the ears, flected and reflected, headed like a **Bull**, with the mouth slit up to the ears; the body, tail, and hoofs like a **Bull**; but the hair of all parts of the body, growth backward to the head, and is rough or shagged.

VII. He beareth Vert, a **Scotian Bisons head erased**, Argent. There is in the North of *Scotland*, white Bisons, or **white Dren**, Maned about the Necks like **Lions**, in other parts like **Common Dren**. The Horns from the top of the head turn forwards. This is born by the name of *Matravellin*.

VIII. He beareth Azure, a **Buffe**, Or. Some call it a **Bugill**, and describe it to be like an **Dre**, with a Beard like a **Goat**, it is of some termed from the Latin, **Carandulus**. But *Gesner*, in his History of Beasts, saith it is like a **hart**, with branched or ragged Horns on the head, the rest of the body like a **Wild Dre**, his hair deep and harsh, like a Bears, of an Ash colour; but being frightened by Hunters, his colour changeth into any colour he stands by, whether it be Rocks, Trees, or green Boughs. *Markham*, in his Country Farm calls it a **Buffle**, or **Wild Dre**; others call them **Bianes**, or **Bianes**, or **Wild Dren**. This is the Crest of *Hubbart*, viz. having his Tail turned up to his side.

HAVING occasion now to speak of the **Bull**, with its variety of kinds, as the **Bugle**, **Buffe**, **Bison**, and such like, which are of affinity one with the other; I am desirous in this place to speak something of the **Cow**, and then as in other Domestick Beasts, give you their sorts of Diseases, with other terms used by Drovers and Cowherds concerning their Ordering and Keeping.

Observations in Cows, Oxen, Bulls.

WHEN a **Cow** desireth the **Bull**, which we call **Bulling**; she disorderly forsakes her Fellows, resists the Government of her Keeper; besides their **Baron** hangs down (which is the place of Copulation) more than at other times; they will leap upon their Fellows as if they were Males: Also after the manner of Mares, they Piss after than at other times.

At the time of Copulation, if the **Bull** leap off on the right side, the **Cow** will Conceive a Male; if on the left, she will bring forth a Female.

A **Cow** never thriveth after she hath taken **Bull**; therefore some Herd-men will not suffer them to be Bull'd till four years old.

If **Cows** in Summer time go to the **Bull** more than at other times, it betokeneth and foresheweth a Rainy Winter.

If an **Oxe** lick himself against the hair, or on his right side, it presageth a Storm; if on the left a fair calm day: When he Loweth and Smelleth the Earth; or feedeth fuller than ordinary, it betoken Change of Weather: If in Autumn, Sheep and Oxen dig the Earth with their feet, and lie down head to head, it is held for a sure token of a Tempest.

The parts of a Bull, Oxe, or Cow.

THERE are some parts and Members of theirs, which go under other names and terms than what are ascribed to other Beasts, and they are these following; as for other parts they are called as in other Creatures, as Head, Eyes, Mouth, Bones, Ribs, Intrals, &c.

Head.

The **Muzzle**, the Nose, that part which is not hairy.

Curled Brow, or curled and waved hairy Brow.

Beats Tongue, is the Tongue of either Bull, Oxe or Cow.

The **Wind-pipe**, or Throat Pipe.

The **Roof** or **Pallet**, the rough top of the mouth.

Horns, and the Rinkles at the bottom, and tip end of the horns.

The **Wizen**,

The **Cheek**, one side of the face.

*

Body.

The **Brisket**,
The **Detolap**, that skin that hangs down between the fore-legs from the Throat.

The **Chine**, the lower part of the Neck next the Back, the **Neck-Chine**.

The **Ridg**, or **Ridg-bone**, the top of the Back.

The **Flank**.

The **Rump**, the top of the tail next the Body.

The **Hide**, the Skin.

The **Reins**,

The **Crest**, the top of the Neck.

The **Hane**, the hair on the Neck.

The **Pisse**, or **Pizzle**, the Bulls Prick.

The **Sheath**, the Skin in which the Pisse lyeth.

The **Baron**, the Cows place of Conception or Pissing, the Griskin.

The **Navel**, the loose skin, and hair on it, which hangs under a Bull or Oxe Belly.

The **Udder**, or **Alder**, that place under the lower part of the Belly, in which the Milk is.

The **Speanes**, or the Paps, the four Dugs, by which the Milk is drawn from the Udder.

The **Cods**, the Skin in which the Stones or Testicles are inclosed.

The **Fundament**, the Arse-hole, whereat Excrements are evacuated.

Intrals.

The **Runnett**, **Cheeslip Bag**, is the Bag or Stomach of a young Calf.

A **Casting**, or **Castling**, a young Calf never brought forth.

The **Bag**, is that as the young Calf lieth in the Beast Belly.

Midcalf, is the Heart, Lights, Liver and Throat-Pipe, with its appurtenances belonging to a Calf.

The **Belly**, or Tripe.

The **Daught Out**, or Tuell.

The **Midriff**, the middle skin that parts the Breast and Belly.

The **Raide**, or Arse-Pudding, the Lady Tripe.

The **Many-fould**, or the Maw.

The **Dirty Puddings**, those that Excrements pass

The **Fat Puddings**. (through.)

The **Endless Annat**, or end Pudding, which is whole at the end.

The **Reeres**, is the inward fat on the Loins; in a Swine it is called the Leaffs of a Swine.

The **Tallow** is all the Fat about the Puddings.

The **Amble**, is the Heart, Pipe, Liver and Midriff Skin as they hang altogether.

The **Keel**, the fat Skin about the Intrals.

The **Sweetbreads**,

The **Kidneys** or **Lullies**. The **Higgarne**.

Legs and Feet.

The **Shanks**.

The **Hough**.

Beats Feet.

The **Clees** or **Hoofs**, which is termed double clawed, or cloven footed, of which all outward hoofs are larger than the inward.

The **Cambrell**.

The **Fitlocke**.

Y 2

Dis

Diseases in Cows, and their kind.

4 **I** Alsitude, Clearfomness, or **tyring**, is known by the slow eating, or forsaking their Fodder, by often lying down, or else by holding out their Tongue.

The **Malis**, or **Glanders**, which makes their hair rough and hard, the eyes heavy, the neck hang down, and the nose run out with Matter, seldom chewing his Cud, and his Meat loathsome.

The **Articular Malis**, is a dry humour which causeth a soreness in the hinder legs, and makes them halt; and yet the Hoof appears sound.

The **Farcinous**, or **Farches**, which causeth the whole body to break forth into Matty Bunches and Boils; which appearing to be healed, break forth in other places.

The **Subterentaurus**, an itching humour that is under the skin, and breaketh forth in many places of the body.

The **Subrenal**, when the hinder legs halt, by reason of a pain in the Loins.

The **Haunge**, or **Leprosy**, is a kind of dry scab or scroof, running and spreading it self all over the body, from head to foot, called the **Scurf**.

The **Phranzy**, or **Madness**.

The **Fever**, is an immoderate heat all over the body, especially in the Mouth, Tongue and Ears; a running of the eyes, a drowzy head; with a violent beating of the Veins.

Swelling and Torment in the Belly, often comes by eating of Hens Dung in their Meat, which if not speedily helped, is Death to the Beast.

The **Sucking of the Leech**, **Biting of the Bize**, and **Stinging of Bees**, **Wasps**, **Serpents** and **Adders**, are things much tormenting Cattel, and makes them run about, as if they were going Mad.

The **Lameness of the Joints**, may often proceed from a Strain or Wrench in the Sinews.

The **Cephalalgie**, or pain in the head, which makes him hang down his ears, and forsake his Meat.

The **Swelling of the Veins**, in the Cheeks and Chaps, into Ulcers.

Lice and Ticks, a Vermin that breeds upon them, which biting makes them itch, rub and scrub themselves at every Post.

The **Worms** in the Tail.

Inward Diseases in Cows, &c.

The **Cough**, or **Cold**, and **shortness of Breath**, or **Hauffs**.

The **Decay** or **waste of Liver and Lungs**, which appears by a long Cough.

The **Crudities** or **rawness of an evil Stomach**, is known by his Belly often rumbling and belching, forsake his Meat, hang down his head and **lick himself**.

The **Hardness of the Excrements**, or **Costiveness**, when he cannot Dung.

The **Pissing of Blood**.

The **Sturdy**.

The **Sout**, pain in the limbs through heat and cold.

The **Broken Bones**, and all grief in the Bones.

Diseases in the Eyes and Head.

A **Suffusion** in the Eyes.

The **Haw**.

The **Pin** in the Eye.

The **Ueb**, is a White upon the sight of the Eye; a Cloud in the eye.

The **Swimming of the Head**, a giddiness in the head.

The **Barbes** is a fleshy substance growing under the Tongue, which hinders their eating.

The **Stithie**, or the **Mallet**, or **Hammer**, a Disease that causeth the Hair to stand upright, makes them dull and heavy, forsaking their Meat.

The **Strangles** or **Glandules**, is a swelling under the tongue.

The **Ranula**, is a swelling under the tongue.

The **Hornloose**.

The **Pozrum**, or **Leek of the Eye**, is a swelling tumor in the eye.

The **Cataract**, is a watery humor, or running of the eye.

The **Epiphora**, is a dry inflammation of Cholor in the eye.

The **Snivel**, is a snotty running Nose.

The **Drivel**, or **Drivelling**, is running of Water or Rheum from the Mouth.

Diseases in the Body and Legs.

Hidebound, when the Skin sticks fast to the Flesh and Bones.

Surbutting, is a lameness in the Limbs.

The **Cods swollen**.

The **Founder**, is the hardned foot, that bends with difficulty.

The **falling of the Draught Gut**, or **Tuell**.

The **Pizzle Sheath swollen**.

The **feet squat**, or **bruised**.

The **Hide Flead and Chafed**, when the hair comes off by rubbing.

To know the Bull, Cow, or Oxes Age.

5. **W**ithin Ten Months of the first year, they change their fore-teeth, and six months after the next, and at the end of three years they change them all; and when they be in their **middle** or best strength their teeth are white, long and even; but when they grow old, they become short, uneven and black.

Also by the Horns the Age is known, for in the root of the horn there are as many wrinkles as the Bull or Cow is years old, a wreath for a year.

The Benefit or Blessing of Cows.

6. **B**est, the first Milk after Calving.
Milk, a white sweet liquor drawn from the Udder of a Cow.

Cream, the top of Milk standing in a pot or pan-mug.

Afterings, the Stroakings, or last that is Milk from a Cow.

Soniclatter, Cream gone thick.

Butter, Cream Churned.

Butter-Milk, or Churned Milk.

Thick Milk, Butter-milk made thick through the heat of Summer, the bottom part falling to a **Whigg**.

Curds,

Cheese,

Whey, the liquid substance drawn from Cheese-curds, which clarified is a good Summer-drink.

Whey-Butter, and Whey-Cream.

Fleerings, the Curds or top of Whey boiled with Butter-milk.

Sweet Cheese, Fleeting strained through a fine Cloth and Sugared.

Meal,

Beef,

Meat,

Hides, for the making of all sorts of Leather either Tanned, or white-Leather.

Horns, to make Combs and Lanthorns.

Hair, for Plastering.

Tallow, for Candles.

Suet.

Colours of Oxen and Cows.

7. **W**hite and Grey.
 Black.

Bay, or Brown.

Yellowish.

Farrow, or Fallow, a reddish Cow.

Pie-coloured, part black and part white.

Spotted.

Fildome, part brown, and part white.

Terms used by Ox and Cow-keepers, called Cow-berds.

8. **T**o Fodder, is to give them Meat.
 To Litter, is to give them Straw to stand and lye upon.

Shorn, is the Dung of Oxen and Cows.

A **Meat-berd**, is the Keeper of Oxen or Cows; some call them **Cow-berd**, or **Cow-keeper**.

A **Meat**, is either Cow, or Ox; from hence their Tongues are called **Meats-Tongues**.

To **Decon**, is to make clean their Houses from Dung.

A **Duck-hill**, is the place where the Dung is laid till it be carried into the Field to Manure the ground; some call it a **Hiron**.

A **Maiden-Beifer**, one that never took Bull.

Spiald Beifer, that hath her Genitals taken away.

Cut a Calf, that is to **Splay** it, take away its Stones.

Libbing, is Gelding a Bull.

A **Drove** of Cattle, a **Drove** of Beasts.

Cud, as Tue the Cud, is to draw up the Meat again out of the Throat or Maw, and grind it a-new to make it digest.

A **Farrow Cow**, is a Cow that gives Milk in the second year after her Calving; having no Calf that year.

A **Herds-Man**, one that is occupied about Cows and Oxen.

A **Drover**, is a Buyer and Seller of all sorts of Domestic Cattle.

Things used about Oxen and Cows.

9. A **Calf Hide**, a place made of Boughs in the Field, or near the Cow-house in which the Calf is kept whilst he is sucking.

An **Dr-house**.

A **Stale**, the place in the house where the Ox is tyed to feed, from hence we call a fat Ox, a stale feed Ox.

A **Cow-house**.

A **Booley**, the place where the Cow is tyed.

The **Racks**.

The **Sow**, is the Yoke which is put about the Cow or Ox-Neck to tye him to the Booley.

A **Goad**, or **Dr-Goat**, a long stick with a prick in the end of it, by which Oxen are pricked to make them quick in their Labour or Travel.

A **White**, a Carters Whip.

A **Pelf**, or **Pelve**, an Iron with three fork ends, by which Dung is taken from the Beast, and the house made clean.

A **Hay-hook**.

A **Fork**, or **Pikel**, **Spade**, and a **Rak**.

A **Rake**, a **Barrow**, a **Wheel-barrow**.

A **Wisket**, or Straw-basket, in which Provender is given Cows or Oxen.

A **Cumbrel**, a kind of Cart to carry away Muck and Dirt.

Feeding of Cows and Oxen.

10. **F**odder, is Hay kept for them to eat.

Blend Fodder, is Hay and Straw mixed.

Litter, is Straw of any Grain, on which the Beasts lie to rest.

Grassing Pasture, are either Meadows, Fields, or Closes for them to feed in.

IX. He beareth Or, a **Tarandze**, Gules; attired, and unguled, Sable. The **Tarandus**, is in body like an **Dr**, with the Horns of a **Hart**, full of branches; of some he is taken for a **Rain-Deer**, but hath a Mane and Tail like a **Lion**. This is born by the name of **Tarandrell**.

G the like A is born by **Toslen**, a **Polonian**.

X. He beareth Argent, an **Elks Horn reversed**, proper. That is of a Russet brown colour: *Cesar, lib. 6.* in his Commentaries says, They have no joints in their Knees, but sleep to Trees like **Elephants**. But they ate like **Roes**, or **Harts**, with spotted Skins; their Horns as large again, with broad tops, branched only on one side; his upper Lip is great, and hangeth over the neath.

ther very much, that he cannot eat forward for doubling it in his Mouth; but goeth backwards, and so gathers up the grafs that lies under it: He hath a Mane on his Neck, and under his Throat; the plain sides of the Horns lie towards the back, and the branches towards the face: See the head *chap. 8. numb. 33.*

O 3 Elks horns 2 and 1, proper Born by *Elkborne.*

XI. He beareth Azure, a *Gazel*, proper. This Beast in figure and colour, doth represent the *Roe-Buck*; having long Teeth and white, about eight or nine inches long out of his Mouth like a Boar; of this Beast saith *Bojwell, pag. 5. 7.* cometh Musk: See the true shape of the *Mus:cat*, or *Gazella*, *chap. 8. numb. 48.* This is born by the name of *Garell* of *Spain.*

IX. He beareth Gules, a *Bonacan*, Argent; *Armed*, and *Un-guled*, Or. This is also called a *Bonaze*, or *Bonafus*. This is a Beast of a bright Sorrel colour; maned like a *Horse*, of a dark colour, the body in all parts resembles the *Bull*, or *Dr*: This is born by *Kornich.*

Gejner saith, That the horns are smooth like an *Dr*, and turn round to the sides of his Cheeks, like the *Ram*, so that he hath no defence by them; they are maned to the Shoulders, like a *Horse*; their colour between red and ash-colour. They have no upper Teeth like an *Dr*, so that such may fitly be termed, a *Bonacan Ram-horned.*

Others have their horns coming out of their Forehead, bending down all a-long to the side of their Face, and then turn up at the end, or point of the horn, *chap. 8. numb. 62.* and *chap. 18. numb. 80.*

XIII. He beareth Vert, a *Bonaze*, or *Bonacons* head erased, Argent; *Armed*, and *Gorged* with a *Crown*, Or. This is born by the name of *Globier.*

XIV. He beareth Azure, a *Bonacons* Head erased, Argent; *double horned* (or *attired*) *tusked*, and *bearded*, Or. Thus I find it Blazoned, but I take it rather for an *Equicervus* head, as the figure following; and ought to be termed, *attired counter-attired*; or double attired counterwise, by reason two of the Horns stand contrary to the other two. This is Born by the name of *Tirwell.*

XV. He beareth Mercury, an *Equicervus*, or a *Deer-Horse*, Luna; *attired*, Sol. This is a Beast in the Oriental Countreys, having the body of a *Horse* with outward bended horns, a mane, and a beard under his chin. But is no greater than an *Hart*: Some draw this Beast with cloven hoofs, but that is not right. This is the Coat Armour of *Grimmall*, a Family in *Poland.*

O a demy Equicervus G is born by *Magenbuch.*

A the head cabossed S and for his Crest the head coupéd, is born by *Van Busseck.*

Per Fesse A and S in cheif, the horns on the scalp S born by *Ketenhofen.*

XVI. He beareth Gules, the Head of a *Colus*, Argent; *horned*, Or. It is in stature and form, between a *Ram* and a *Hart*, of a dusky white colour; having a Nose, or Snowt like a Swine; their horns grow upright

out towards the top, circled about almost to the end. This is Born by the name of *Coles.*

XVII. He beareth Gules, an *Iber*, or an *Isbeck*, Or. This is by some Heraulds termed a *Han-tyger*. Others an *Isbeck*, with two *Horns*. But I take it rather to be the *Pyrafloupp*, mentioned, *numb. 431.* This is born by the name of *Obrone.*

And a demy Rampant O is the Crest of *Calcare*, of the Isle of *Man.*

Lofengv A and V on a bend B 3 such heads erased O and the like head for the Crest is born by *Yonge.*

An Iber head A collered and horned O is the Crest of *Wroughton.*

XVIII. He beareth Argent, a *Han-Tyger*, horned, Gules. This Beast hath the Face and Ears of a *Han*; the Body of a *Tyger*, and whole footed like a *Goole*, or *Dragon*; yet others make it with feet like a *Tyger*. I term this *horned* though it be of the same colour with the body; by reason some *Han-Tygers* are without Horns; for very Ancient I have seen it drawn with the Ears of a *Bull*, the forefeet of an *Ape*, the hinder feet of a *Buck*, and the tail of a *For*. This is born as a Supporter anciently belonging to the Family of *Chetwood*, of *Ch.* and *Ockley* in *Shrop-shire*; as descending from the Baron of *Woodbull*, whole Heir he Married.

A Demy one A Horns O out of a Crestant G is the Crest of the Baron *Wabull*, alias *Woodbull.*

O the like G horned O born by *Helter.* Yet I have seen it drawn of old with a Mans Face and Hair, Ears of an *As*, the forefeet of a *Goole*, the hinder of a *Goat*, and Tail of a *Fox.*

The Lord *Paget*, Baron of *Beaufort*, hath for his Crest and Supporters, a *Man-Tyger*, which in the Face is like a *Man*, with a sharp Beard, and long Hair, with the body of a *Tyger.*

XIX. This is by Mr. *Leigh* called a *Han-tiger*, and he thus Blazons it, a *Han-tyger* Argent, *gorged* *erased*, Sable, *Collar*, Or. By Gorging he means that shaggy part that is about the Shoulders, so that the Head, Feet, Body, and Tail is white; the Shoulders, or Mane about it is black. But Blazon it thus, a *Han-tiger*, Argent, *Collared*, Or. *Maned*, (or *haired* on the Shoulder, like a *Lion*) Sable.

XX. He beareth Sable, a *Goat*, Argent; *horned* and *hoofed*, Or. He is also called, a *Capre*, from *Caper*. If the Goat stand up-right, it is termed *Saltant*. This is Born by *Kelmyn.*

The *Goat*, or *Buck-Goat*, by his Horns his Age is known, that is by the Wrinkles next the head. The Female have two *Udders* under their Loyns, next the small of their Belly. But the *Libian Goats* have their *Udders* lye under their Breasts, or fore-part of their Belly, like to *Apes.*

The *Deer-Goat*, hath horns wrinkled round, almost to the top, bending back, and then turning forwards again, towards the ends, a small Beard, and shagged like a *Sheep*, not so rough as a *Goat*; of a whitish yellow colour.

The *Iber* doth in all respects resemble the *Goat*, but is both larger in Body and Horns; of a yellowish colour, as the *History of Beasts*, fol. 446. informs me. Though

in Heraldry it is drawn with the Horns standing forwards as *numb. 17.*

XXI. He beareth Argent, the head of an **Assyrian Goat couped**, Gules. It hath long Ears like a **Hound**, and two round sharp Horns, standing (as it were) in sockets on the Crown, or top of the head, all the rest of the Body, Tail and Feet, answereth the **Deer**; with Stones like a **Stone-Horse**, with Dugs, or long Paps, next the Neck, under the Throat; their colour is whitish. See *chap. 8. numb. 4.* This is Born by *Kisnick*.
S 3 such A horned O born by *Gibley*.

Er. a Goats head crazed G attired O born by *Gortley*.
B 3 such O Horns A Born by *Grydo Don Masmo* of *Spain*.

XXII. He beareth Vert, a **Pigage**, or **Buck-goat**, Or. It is a kind of wild Beast, bodied like a **Buck**, and horns like a **Goat**.

Per bend sinister B and O a demy Buck-goat springing to the sinister counterchanged, the Crest is the same B winged O born by *Van Stoten*.

G the like in full course bend-ways A Girthed O the Crest is a Demy one A out of a Crown O born by *Bladomsker*.

O the like climbing of a hill Bend-ways G born by *Gramsien*.

XXIII. He beareth Argent, the head of a **Wild Goat**, (or a **Buck-Goat**), with bended Horns, proper. It is also termed a **Tregelaphus**, a **Rock-Goat**; and the **Alpine wild Goat**. Their Horns crooked bending to their Shoulders backwards, Ram-horned: See *chap. 8. numb. 32.* This is born by the name of *Pigate*.

The **Hierth**, agreeth with this Beast in all respects; as Horns, Shape, and Bigness; only it hath a long Tail reaching down to the Ground. *History of Beasts*, fol. 643.

The **Cinrus**, a Beast engendred of a Buck-Goat, and an Ewe.

The **Tregelaphus**, or **Deer-Goat**. See *chap. 8. numb. 9.*

XXIV. He beareth Gules, a **Husimon tripping**, Argent. This Beast is engendred of a **She-Goat** and a **Ram**; and from thence the head pertaketh of both kind of Horns; the Ram and the Goat; the rest of the body represents the Sheep. Some term it a **Husion**, and **Husmon**. This is born by the name of *Arnoldus*.

The **Cytirus** is a Beast engendred between a **Sheep** and a **Buck-Goat**, as *Upton* noteth.

XXV. He beareth Argent, an **Antelope**, Gules: **tusked**, **horned**, **maned**, and **hoofed**, Or. Their bodies are like the **Roe**, with horns growing backwards, like Saws on one side. This is born by the name of *Antelope*.

S 3 such heads couped O Born by *Broster* of *Chester*.

XXVI. He beareth Gules, on a **Hill** Vert, an **holy Lamb lodged**, Argent; **Staff** Or, **Banner** of the second, ensigned with a **Cross** of the first; thus by *Gmil-*

lins. But the holy Lamb I never saw born but in two postures; either **standing**, or **couched**, or **lodged**; but in what-soever posture it is, still it holds the Banner and Staff (as it were) on its right Shoulder bend sinister-ways, as this example doth demonstrate. If so, why needs so long a Blazon be used, but much more short; as, Argent, on a **Hill** the **holy Lamb lodged**, proper. If standing, on a **Hill**, the **holy Lamb**, proper. This is born by *Holyhill*.

G 3 holy Lambs Born by *Rome* of *Lamerton*.

S an holy Lamb couched on a Bible, is the Town of *Preston* in *Amundernes*, Coat of Arms.

G on a hill in Base V a holy Lamb A is the Coat of the Bishoprick of *Brixen*.

B a holy Lamb A born by *Lemblein*.

XXVII. He beareth Vert, a **Ram**, Argent; **hoyned**, (or **addorned**, or **attired**), and **unguled**, (or **hoofed**), Or.

The term addorned, is most proper for them and all other Beasts who have their Horns more for Ornament than for Arms and Weapons to fight withall: Therefore they cannot be termed Armed, as some unskillful Artificers do. Some term this a **Cup**; if gelded a **Cleather**.

G on a hill in base O a Lamb A the Crest the same, and is born by *Lemblein*.

O a Lamb S is the Coat and Crest of *Van Hun*.

These I term Lambs, because they are without horns.

O a Ram springing G born by *Hausner Van Treufa*.

G the like tripping to the sinister and regardant A by *Kotzam*; also by *Schafen*.

O the like springing A born by *Van Gregerdorf*.

G a Rams head couped at the hinder part of the head S horns O born by *Van Rechenberg*.

The **Sheep**, or **Ewe** is the same, but she hath no horns, except some little stumps in some, which stand up above their Ears bending back and close to the head. Sheep are generally white, some black, near the *Alpes*, grey and reddish, and Honey-wooled. In the Isle of *Man*, yellow, or Lion tawney. They are generally termed **Button**.

Corvynus Sheep, are red, and have four horns.

XXVIII. He beareth Sable, a **demy Ram mounting**, Argent; **addorned**, and **unguled**, Or. It is termed unguled, from *Ungula*, the Hoof, or Claw. This is Born by *Mountrame*.

The **Subus**, is a kind of wild Sheep, with two large Horns; the body of a very bright yellow; they live in the Water, and on the Land.

In the Base of this quarter is a **Serpent** with his Tail erected, and **torqued** (or **flected**, and **reflected**.) A winged Serpent with his Tail thus erected is the Crest of *Don Sapanco* of *Spain*.

XXIX. He beareth Azure, the **Golden Fleece**. This is so well known in the signs of *London*, by the term of **fleece**, that I dare give it no other Blazon, neither indeed can I give it a more proper expression. This is a Sheep hung by the middle in a Chain from the chief point.

Terms used by Shepheards in Keeping of Sheep.

11. **F**or their safety and feeding.

A **Sheep-cote**, to lodge them in, in the Winter time. **Folds**, for the Summer.

A **Shepheards Bower, Hut, Coat, or Cabin**, a place to keep him from heat and foul Weather; called **Shades**, or **Shadows**, by the Poets.

Shepherds Dog, or Cur, to keep them from Wolves and Foxes, and to fetch them in if they go astray; and to gather them to their Folds.

Crutch, or Racks, to give them meat in, in the Winter-time.

Hurdles, or Folds, things made of sticks wound together, by which the Folds are made to keep them in one place.

Whoop, Whoopoo. Is the Shepherds call or cry, to call the Sheep together, to bring them to the Fold, or Cote.

Shepherds Crook, a Staff with an Iron hook at the end, with which he can catch any Mutton he desireth among the Flock.

Rich lea, is good ground for feeding and fattening them.

Barren Lea, is barren ground.

Pasture Sheep, are such as are kept in Fields and inclosed Land.

Field Sheep, such as are kept in the tyllth of fallow fields, or vast Forests and Commons.

Mountain Sheep, those kept on Rocky hills, and Mountainous places, which are generally very small Sheep.

Peaming time, when they drop their Lambs.

Lipped, or Libbed, or gelded Sheep.

Cut, Heal, or Geld Lambs, when their Stones are taken away.

Tar bottle, or Tar box, a thing to hold Tar in to mark Sheep, and to dress such as have Maggots.

Stragled, gone astray.

Rutting, or Raming-time.

Mutton, the flesh of Sheep.

Coat the sheep, is to drive them into their Houses of Folds.

Shut up the sheep, when they are bidden to fetch in the Sheep from pasturing.

Pasturing, or Grazing, is the feeding of Sheep.

Beiting of sheep, is the dressing of them from filth.

Turn the Tups to ride, is to put them to the Ewes to engender, according to the old Proverb. About St. Luke's day, Let the Tup have his way.

Ewe is Blesom, that is, she hath taken Tup.

Ewe is Riding, when she is Tugging.

Peau, or Lamb, when they have brought forth their young, which they usually do in twenty weeks after Riding.

Sucking Lamb, so called all the time of Sucking the Ewe.

Lamb bossing the Ewe, when it Nuds the Dug.

Cleaned Lamb, when taken from the Ewe.

Read Lamb, when brought up without the help, or sucking of the Ewe.

Lamb, or Hog-sheep, for twelve month.

A **share sheep**, at two years old, at which time he or she hath cast two Teeth.

Two share sheep, at three years old, when cast four Teeth, or hath four broad Teeth.

Three share sheep, at four years old, at which time they have six broad Teeth, then they are called **Weathers** or **Tups**.

A **Flock**, or **Cheave**, of such an age are called Ewes.

Droppings, is Sheeps Dung.

Shepheards Bag, and Bottle, those things he keeps his meat and drink in, his Pantrey and his Cellar.

Gathering and Washing and Coating of sheep, is to make their Wool clean before it be shorn off.

Sheep shearing, is that time wherein the Wooll is cut off them, which both in old time, and at this day was ever accounted days of Mirth and Feasting, as we may read, *Gen. 38. 12, 13. 2 Sam. 13. 23, 24, 25, 26, 27.*

Sheep shearers, are such as tye the Sheeps four feet together, and cut off their Wooll.

Sheep shares, or Wooll shares, that with which the Wooll is shorn of the Sheep.

New Horn sheep,

Mark the sheep, is with a Marking Iron, either of the Letters of the Owners name, or of some other devise, dipt in hot pitch or Tar, and clapt upon some place of the Sheep, which will abide there, to make them to be known: Some mark them with Raddle, and make Ear-marks.

Strutted sheep, is when their Tails are cut off to keep them from Dunging them, and breeding of Maggots therein.

Fleece, is as much Wooll as comes off one Sheep, and is rolled up in a Bundle.

Diseases in Sheep.

12. **Purples.**

Cold, known by their Coughing.

Scab, or Itch.

Pox, or Blisters, or St. Antonies Fire; an incurable Evil, which neither admitteth Medicine, or Resitation by Knife; for there is nothing that spreadeth it self more speedily.

Warts and Cratches, Sores that arise through pricking of the Hoof, by bunches rising there.

Worms in the Claws.

Falling-sickness, a disease not known till Beasts be dead.

Clouds, or pains in the Eyes, dimness of sight.

Swelling of the Jaws, and **Looseness of Teeth**.

Sighing, and shortness of Breath.

Loath

Loathing of Sheep, is when they have no Stomach, but forsake their Meat.

Flur, or Looseness of their Belly.

Pelt of Sheep, an abundance of Blood, which must be taken from them.

Feaver, which is through heat of Blood, which causeth solitariness, and careless feeling, and lying alone in the Night.

Rottenness, or **Pestilence**, a corruption of the vital Spirits; multitude of Evils come by this Disease, and they consume away.

Lice, and **Cikes**, are little Creatures which much vex and molest them.

Cramp.

Worms of the Belly.

Wood-Evil.

Staggers.

Haggots in the Tail, and hinder parts; caused through the Excrement hanging at their Tails, which breeds them to the eating of the Tail, and Buttocks, if not prevented.

Turning Evil,

Pains in the Joynts.

Joynts broken, Put out, Shevered Bones, &c.

Parts or Members of a Sheep.

13. **THE Fell**, Skin, or hide of a Sheep.

The **Pelt**, the Skin of a Lamb, or small Sheep.

Wool, or the Fleece, is that as covers the Skin.

Mutton, the flesh of Sheep.

Lamb's flesh,

Head,

Horns.

Wrinkles in the Horns which shew his Age.

Chewing the Cud.

Teeth,

Roof, or **Passat**, the top of the Mouth, which is rough or wrinkles, as if it were Steps.

Ropes or small Puddings.

Fat Puddings, the large Puddings.

Baggas,

Pommes, the Heart, Lights, and Liver altogether.

The **Trotters**, or **Trottles**, are the Sheeps feet.

Hoofs, or **Claws**, of the out-most in each foot is a litter larger than the inward.

All other inward or outward parts of a Sheep are commonly called after the same Names & Terms of a Bull, or Calf; of which you may see more, *numb. 8. sect. 3.*

Observations of Shepherds.

14. **F**At Pastures, breed straight, and tall Sheep. *History of Beasts, fol. 604.*

Hills and **Short Pastures**, broad and square Sheep.

Woods and **Mountains**, small and slender Sheep.

But the best feeding, is in new ploughed ground.

If the right Stone of a Ram be tied in Copulation, he engendreth a Male, if the left stone, a Female.

That both Male and Females, are begotten as well by the virtue of Waters; as by the virtue of the Rams, and also by the virtue of Winds: For when the North-wind bloweth, for the most part Males are conceived; and when the South-wind, Females; so that Shepherds cause the Ram to leap the Ewe, with his Face to the North, &c.

Abortives, or casting of Lambs after Copulation, is when there falls a shower on them; if great with young, when they eat Wall-nuts, or Acorns, they will cast their Lambs; and likewise in time of Thunder, if the Ewe with young, be alone in the Field, it will cause Abortment.

When any Frost or Ice, or Snow falls on a Sheep, if he endure it and shake it not off, it is a great hazard, but it will dye of the cold, but if he shake it off, it is a sign of a strong, sound, and healthy Constitution.

If the vein of the Eyes, be red and small, the Sheep are sound; but if white, or red and full, they are weak, and will hardly live the Winter, or cold Weather.

Press the Back-bone near the Hips, if the Sheep bend not, they are sound and strong; else weak and feeble.

Take a Sheep by the skin of the Neck, and if he follow quietly it is weak, and a great sign of imbecility; if it struggle and strive and follow with great difficulty, it is a token of health and soundness.

By the behaviour of the Sheep at their Rutting, or Ramming-time, Shepherds judge of the Winter-Season, if they be lustful and leap often on the Female, it presages Tempests, Rain, and change of Weather. But if they be slow and backwards in Copulation, the Winter will be gentle, and temperate weather.

The Ram, from the Autumnal Equinoctial, unto the Vernal, as the Sun keeps on the right hand of the Hemisphere, so doth the Ram lye on his right side; and in the Summer Season, as the Sun keepeth on the left hand of the Hemisphere, so the Ram lyes on his left side.

XXX. He beareth Gules, a Unicorn tripping, Argent; Armed, Banded, and Unguled, Or. The Unicorn both whole, and in its parts, are born in as many postures as the Stag, and have the same terms of Blazoning, only the Stag is termed **Springing**, and the Unicorn **saliant**. That there is such a Beast is proved by Scripture; *Psal. 92. Deut. 33. Job, 39.* and that it is of this form and shape, is testified by Mr. *Topsell*, in his *History of Beasts, fol. 711. &c.* This is born by the name of *Mustertor*.

G 3 such heads coupéd O born by *Paris*.

B a demy Unicorn saliant to the sinister A born by *Truchses van Grobberg*.

B a craggy Rock in base O a demy Unicorn issuant A born by *Van Craenrent of Bavaria*.

A a Unicorn sejant S Armed and Unguled O born by *Harling*.

XXXI. He beareth Azure, a Unicorn saliant, Argent. This is born by *Dunc*.

Z

The

The *Pyraffonpri*, it is a barbarous and cruel Beast, in shape and form in all parts like the *Unicorn*, with rough and shaggy hair like a *Goat*, with two Horns standing forward, like the *Unicorns*. They are to be found in the Isles called *Arabibus*, and *Cadematha*, near the red Sea, and in the Regions thereabouts.

The *Monoceros*, is a wild Beast (saith *Pliny*), hunted by the *Arcean Indians*, which is very curst and untamable; having one horn, which in the Head resembles a *Hart*, in the feet an *Elephant*, in the tail a *Boar*, and in the residue of the body a *Horse*, with a voice like the lowing of an *Or*, but more shrill; which is never taken alive. Their mane and hair yellow; the horn black, not smooth but rough all over with wrinkles.

The wild *Ass*, hath a Horn in the Forehead, is whole hooved, white on the body, and purple on their head; the horn is at bottom white, the middle black, the top purple; which is by some interpreted, that the Superficies, or upper face of the horn, to be all purple; the inner part white, and the inward part, or middle black. It is call'd the *Dyr*, or *Indian Ass*: See *chap. 18 numb. 16. and 8. 37.*

The *Bafman Unicorn*, is like in body to the *Elephant*, and almost as large; having an head like a *Swine*; tail like an *Or*, and an horn in the middle of the Forehead. Which is a second kind of *Unicorn*, which I call the *Bafman Unicorn*, from the name of the Kingdom, in which it is bred.

The Kingdoms of *Niem*, and *Lamber*, in the *India's* are stored with a Beast, having one horn, which is crooked, and not great; with a *Dragons head*, and a bear upon his Chin, his Neck long, and stretched out like a *Serpent*; the residue of his body, like a *Hart*; save that his feet, colour, and mouth are like a *Lions*; which I may call the *Lion Dragon Unicorn*, according to *Herauldry*.

The *Wild Goat*, that useth the Sea; hath a short horn in his Forehead, each round being smaller than another, till it come to a small point, it is like a *Goat* in all respects, only the hinder feet are whole like a *Goose*.

XXXII. He beareth Azure, a *Rhinoceros*, Or. This is a Beast covered all over with great Scales, like Shields, and hath one horn which is upon its Nose, and stands upright towards the Eyes; termed by all a *Rhinocerot*. The *Indians* call this Beast in their Language *Scandabenament*: It is coloured like an *Elephant*, or like the rind or bark of a *Box-tree*, his hair on his Face, reddish; the Legs are scally down to the Hoof, which are parted into four distinct Claws. Some call it, an *Ethiopian Bull*. This is the Apothicaries Crest.

B the like O is born by *Don Sackvilla of Spain*.

XXXIII. He beareth Argent, an one horned *Bison*; or an *Unicorn-Bison*; it is in shape almost like the *Unicorn*, for it hath a short wreathed horn on his Fore-head, with a long mane, of a blackish colour to his Shoulders, the rest of the body, tail, feet like to the *Hart*, with a beard under his Chin. This is born by *Van Horn-Lijonig*.

In this quarter I have set a *Serpent*, whose Tail is erected and bowed, debrused, and embowed with the Tail surmounting, or crossing; else double em-

bowed, and fretted; or twice imbowed counter or contrary debrused.

XXXIV. He beareth Sable, a *Camel*, Or. By the name of *Camell*. If the Camel have two risings, or knots of hair, on his back. Then he is termed, a *Camel double bunched*. They are long necked, tail like an *Ass*, they have Knees on all the Leggs, and Ancles like an *Or*; their feet are cloven; yet the under part hath but two Fissures, or clefts; and in the upper part four clefts. The foot is fleshy like a *Bears*.

The *Bractrian Camel*, hath two bunches on his Back, and one on his Breast, whereon he leaneth; which are said to have a *Boar* for their Sire, which feeding with the flocks of She-Camels, couple together. Their colour is brown, or puke; yet there are Herds of them white in *India*. The Females have four Paps or Spears at their Udders.

The *Nabim*, is a Beast in *Ethiopia*, which hath the Head of a *Camel*, and the Neck of an *Horse*.

The *Dromedary*, or *Camel-Dromedary*, is less than the Camel, but far swifter. The upper Lip is cloven (like a *Hare*;) in the middle, and two broad Nails on his feet, which in the upper part appear cloven, but underneath they are whole and fleshy, without division; he hath a hard bunch on his Breast whereon he leaneth, all shagged, behind the Head, and so round the Neck, with long hair.

V a Camel O born by *Fallows of Fallows in Cheshire*.
Per Fesse B A the like tripping to the sinister G by *Gardener*.

O the like G born by *Schomoltzen*; and B the like A by *Crocher*.

XXXV. He beareth Argent, a *Moos*, proper: riding on the back of a *Camel*, or *Dromedary*, Tenne: bridled, Sable. There is so little distinction between the *Camel* and *Dromedary*, that you may call them by either name. This was the ancient Crest of the Company of *Grocers* of the City of *Chester*.

The Camel thus furnished (*Sans Moor*) is the now Crest of the *Grocers* of *London*.

XXXVI. He beareth Azure, a *Camel-Leopard*, Argent. This is Born by *Gamelberg*. This is a Beast engendred of the *Camel*, and a Female *Libard*, or *Panther*; and hath the Head and Neck of a *Camel*; mane of a *Horse*, body of a *Hart*, and cloven-footed like a *Camel*; having the fore-Leggs longer than the hinder; their colour is red, mixed with white, under his Belly; being full of spots.

The *Camelopardal*, hath two little horns growing on his head, of Iron colour, turning a little backwards, and smooth. His mouth but little, like an *Harts*; his Neck long having no Ears; and the fore-Leggs longer than the other; which makes his back decline towards his Buttock, which are like an *Asses*. The paws of this beast differeth from all other in the World; for he doth not move his right and left foot one after another; but both together, and so likewise the other, whereby his whole body is removed, at every step, or strain.

A the like G is born by *Choleumpar of Poland*.

O the like B is the Coat of *Kemelpedt*.

B 3 such O born by *Van Wyckemell of Switzerland*.

Per

Per Fesse A and G in the Cheif, a **Bull-Lion**, G born by *Sierbert*. This hath only a Bulls head, all the rest a Lion, called by the Dutch, *Stierleew*.

Per Fesse A and B a **Giffon sans Wings** adorned with **Bulls-horns**, counterchanged. Born by *Siergam*. Some call it an **Horned Giffon**.

B a **Boar-Dog**, or a **Boar-Hound**, A by the Dutch termed a **Swijnhond**, is born by the name of *Van Swelondt*.

A an **Ape-Bear**, proper. Born by *Simbeir*: See chap. 10. numb. 51.

Where note, That Creatures thus of a double generation and biformed, in their Blazoning are to have that Beast named first from whence the head is derived, and the other after, which hath the bodily form. Yet neither have these the half of one, and half of the other, as **Lion-Dragons**, **Wolf-Dragons**, and **Dragon-Cygers**, and those other mentioned, chap. 10. numb. 45, 46, 49, 50. of the **Serpentine** kind. But have only the head of the first, and all the rest of the body and feet of the second beast, whereof they are made.

XXXVII. He beareth Gules, an **Allocamelus**, or an **Afs-Camel**, Argent. This is a Beast engendred of an **Afs**, or **Mule**, and a **Camel**; having the head of an **Afs**, with a slender neck, the body of an **Hart**, and such a tail, with feet like a **Camel**, or the **Offrige**, only two claws. Some call it, a **Stag-Camel**.

An **Indian Sheep** of *Peru*, hath the head of a **Mule**, and the body of a **Camel**; the Neck as white as any **Swan**, and rest of the body yellowish; his feet like to an **Offrige-Camels**. This is another kind of the **Allocamelus** before-said.

B the **Afs-Camel** A born by *Cabalu*, an *Italian*.

G three such heads couped at the Breast O by *Capojm*.

XXXVIII. He beareth Gules, an **Elephant**, Argent. They are great and vast Creature, near eleven and twelve foot high, with length and breadth proportionable, of a Mouse-colour; the skin looks pieled and scabby, hard on the back, more soft on the belly; having neither hair or bristles to cover him, nor yet help of his tail to drive away Flies; but always hath crevices in his skin, which doth invite the flies to a continual feast; but when by stretching forth they have received the swarms, by shrinking together they inclose the flies, and kill them. So that these crevices in his skin are unto him instead of mane, tail, and hair. Their Ears are like the Wings of a **Dragon**, or **Bat**. The long Teeth of the Males are crooked, and stand downward, as from their higher Gums; and the Females stand upward, and are smaller and straight. The Female hath two paps a little beside her breast under her shoulders, and not between her hinder Legs. This Coat is born by the name of *Elphin-son*.

O the like S born by *Du-Liers*.

Per Fesse G and A a demy **Elephant** upright, or mounting, counterchanged. Born by *Haugen*.

XXXIX. He beareth Gules, an **Elephant**, Argent; with a **Castle** on his back, Or, gristled, Sable. In former Ages Soldiers were used to fight in wooden Castles fixed on their backs. Some fighting on the right, others

on the left hand, and some backwards, others forward. They would bear an incredible number of Soldiers to the number of fifty or sixty, as is testified by several Authors: See *1 Maccabees*, 6. 37. This is the Crest of Sir *John Corbet* of *Morton-Corbet* in *Shropshire* Knight.

A the like S **Castle** G Furniture O Born by *Zur Gilgen Zu Hilsicken*.

XL. He beareth Or, the **Proboscide**, (trunk or snout) of an **Elephant couped, flexed and reflexed**, (in form of a Roman S) Gules. The Elephants Trunk is a large hollow thing hanging from his Nose to the ground-ward, like the skin upon the bill of a **Turkey-Cock**; by which he draweth in both his meat and drink, using it for a hand, and therefore improperly it is called the **Elephants hand**. It is crooked, gristly, and flexible, but inflexible at the root next the Nose; within it hath two passages, one into the head and body, by which he breatheth; and the other into his Mouth, by which he receiveth his Meat; or whatsoever his Keeper giveth him. *Bara* setteth this down for the Coat of *Cynens* King of *Scythia*. Where also he noteth that *Idomenes* King of *Theffaly* did bear G the like A.

B the same with the Snout crested O is born by *Barschker*.

XLI. He beareth Argent, an **Elephants head erased**, Gules. This should be termed a She Elephant, or the head of a Female Elephant; by reason his tusks or teeth stand upwards, and the Male stands downward; but it is a thing in Heraldry not observed, though it were a sufficient distinction for a Coat of Arms between Families; as the bearing of a Ram and a Ewe, or a Lion with red claws, and another with yellow; and much more then Ermyne and Ermymites, being both one, save the last hath one hair of red on each side of every one of the Poulderings; a thing little regarded makes a great alteration in Arms. This is born by the name of *Brodric*.

Per Cheveron S and A 3 such counterchanged, by *Saunders*.

S on a Fesse between three such heads A as many **Mullets** S born by *Pratte*.

An Elephants head couped G is the Crest of *Van Efferen*. And it is also the Company of Cutlers Crest.

XLII. He beareth Gules, out of a **Coronett**, Or, the **Proboscides** of two **Elephants erected and reflected**, Argent. Some will add, their **Snoutwits inwards**, or **Snoutwits respected**, being a term used, when things (either Quick or Dead) are (as it were) regarding or looking one at another. This is born by the name of *Beltonie*; with the **Snoutwits endorsed**, is the Crest of *Cromair*.

XLIII. He beareth Argent, out of a **Coronett**, Or; two **Proboscides** (or **Trunks**) of two **Elephants reflected endorsed**, Gules, each adorned with three **Trefoils**, Vert. This is a great Bearing amongst the Dutch, as their Books of Heraldry inform me, for there is Scores of those Families, bear the Elephants Trunk thus, some adorned with **Roles**, **Leaves**, **Pendants**, **Crosses**, or with other varieties of things; each set at a certain distance from the Trunk, by a foot Stalk.

Now in the Blazon of such Coates, you must

first observe the reflection of the Proboscides, whether the Snows stand respected, or endorfed; and then to tell the exact number of things, each one is adorned with all: for in some they will have one thing apeece, others 2. 3. 4. 5. &c. Some again will have (with the sides; and others without the sides adorning) such and such things set in the concave or hole of the Snow; whereof you will find Examples in this Work. chap. 8. numb. 69. and chap. 18. numb. 82. This is the Crest of *Garmilline*, the like set with Hawks-Bells, O is the Crest of *Barscher*, one by *Kennap*.

XLIV. He beareth Sable, out of a Ducal Crown, Argent, two Elephants Snows reflected, and endorfed, Or. This term Endorfed, signifieth a turning, or looking back from the other; as if things (either quick or dead) were set back to back, looking contrary ways, as respected, look one to another. Some term these Counter or contrary reflected. This is the Coat Armour of *Magdebourough*, these Snouts are also born Barry, Chequy, &c.

2 endorfed barry of four A. and B. is the Crest of *Van Liebenstein*.

2 the like B. each with 2 barrs A. is the Crest of *Van Bickn*.

2 the like out of a Crown counter company A. & G. each 2 barrs B. is the Crest of *Munich*.

The like (Sans Crown) B. and A. the barrs G. is the Crest of *Van Warninshofen*.

2 the like parted per Fesse. B. and G. is the Crest of *Van Leichwitz*, and the like with a Spur rowel between them, O. Is *Van Obsterberg*.

The like endorfed out of a coronet O. per Fesse, G & A and A & G counterchanged, is the Crest of the Earl of *Oth*.

2 such the one barry A & B the other G is the Crest of *Ratzmecz*.

2 such Chequy A & G is born by *Van Nostitz*.

XLV. He beareth Vert a Boar Or. Born by Sir *Roger Pons*, this being a domestick beast, and brought tame for the use of man: so man hath given several names unto it, both according to their Sex and Ages, for in English we call a young Swine a *Bigg*; a sucking or weaning Bigg, a *Sheate*, or *Shoate*, a *Pealke* &c. Likewise a *Sow*, a *Hogg*, a *Barrow*; a *Libd-Hogg*, a *Libd-Sow*, a *Splayed-Sow*, a *Geld-Sow*, a *Gaute*. The Male a Boar, the Female a Sow, and all under the general term *Swine*, or *Pork*, and *Brawn*. This is born also by the name of *Boar*.

The *French* call a Swine a *Porceau*: a Sow, *Trupe cothe*: a Boar, *Merrat*: a Pig, *Cochon Porcelet*: the barrow Hogg, *Porchastre*.

The *Germans* call a Swine, *Saw* or *Suw*, or *Sufchwin*, or *Schwein*: a Sow, *Hor*; or *Loos*: a Boar, *Acher*: a Barrow-hogg, a *Barg*: a Splayed-Sow, *Gultz*: a Pig, *Ferle*, or *Scutole*: and a sucking Pig, *Spanfoerle*. These are the most common and vulgar terms of Swins, if there be any other, they are devised, or new made.

A the like G born by *Tremarthen*.

G the like A born by *Mauric Goth of Dirvet*.

B 3 Such in Pale, A born by *Yonas*.

O a Boar Currant in bend Sinister B is born by *Sinching*.

O the like in bend Sinister S by *Recken Van Recken*, G the like A by *Van Schweinichen*.

A a demy Boar couped G Brilled V is the Coat and Crest of *Cammeram*.

O a demy Boar crazed G born by *Balbion of Spain*.

XLVI. He beareth Argent, a Boars head couped, Sable: Armed (or tushed or tusked) Or, Snouted Gules, the Snout is the turning up of the Nose, born by *Srinhead*. For the proper colour of Swine, it is very uncertain and varieth not only from the diversity of the Countrey, but in every Countrey, it is diverse in it self; some are white, some branded, or breended, some sand colour, some red, some black, some pyed, some none of these, and some all of these. They are in *Germany* for the most part red; in *England* whitish yellow; and in *France*, and *Italy*, black. A a chevron between 3 such S born by *Edmonen Bender*.

In the base, is a Serpent regardant, recurvant, the tail bowed, or else a Serpent regardant, reverfed, the tail embowed. see numb. 72. This is the Crest of *Van Drodroll*.

XLVII. He beareth Sable, a Boars head couped, Argent; collered engraled, Gules, (some term it gogged with a Pale engraled) by the name of *Ecker*.

In the base part for want of other room, I have caused a *Chaffer-bee* — to be engraven, which is a kind of Bee, or Fly without wings, being covered with a hard Scale, or Shell, of a redish yellow colour, such on a chief A the Field B is born by *Chafferley*.

The Shell fly hideth his wings under a case, or sheath.

XLVIII. He beareth Azure, a Boars head, Argent; crazed, Or. after this manner shall you find almost all sorts of heads born; having the crazing of a contrary colour, from the head: which are ever Blazoned after this manner. This is born by the name of *Birmell*.

S. 3 Horle heads A crazed G born by *Trabern of Pasgen*.

A Tygers head A crazed, O is born for the Crest of *Bostock*.

A Unicorns head, A couped G the Crest of *Ligh of Aalington*.

XLIX. He beareth Argent, a Boars head erect and crazed, Sable. Sometimes you will find them in Coates of Arms, extended bendwise, 3 such is the Coat of *Booth of Barton*, and *Dunham-Massy*.

A. a chevron between 3 such S. born by *Lawrence*.

L. He beareth Gules, a Boars head, with bent, crazed: Argent, or a Boars head elevated, and crazed: or as others term it a Boars head with neck crazed; lib. 4 chap. 29. so *Morgan*. This by the *Welsh Bards*, is called a *Boars head, rising crazed*, and only crazed; but very improper. For were it not that I am acquainted with this Coat and Blazoning; I should notwithstanding their Skill and Knowledge in Genealogies, help them, and the Family which bears them thus, to term it rather a *Tygers head*, (as *Heraulds* now draw the Tyger) then a *Boars head*, for this is not a proper posture for a Boar, or Swine, or Bear, to have their heads thus lifted up. But rather as the foregoing examples,

see more of this in the *Bears-head elevated.* chap. 7.
numb. 102, 103.

A Boars-head couped in the Breast S born by *Schellenger*.

O the like couped regardant, S an Annulet in his ear G is the Coat and Crest of *Rutzen*.

15. **T** Here are in *Illiria*, and *Paonia*, and *Macedonia*, **Swine** (as *Aristotle* Affirmeth) that have whole Hoofs, like **Hors**.

A Swine-Heard, is the Keeper, or tender of Swine, whose office it is to instruct, or accustom the Swine, to the sound of a Horn, and shouting, or any other noise, whereby to call the Swine together to feeding.

To be careful of their feeding, and observe their time of farrowing to make choice of Breeders, and those fit for store.

To avoid confusion amongst the Swine, he must see, that the Young Pigs suck none but their own Dams, and if there be more then the Sow can feed, to Kill some, better then to lose all.

To keep the Sty clean, for though their nature be to Wallow in the mire, yet they love to lie clean, and to have in the Styes several Porches or Hatches, to sever and to distinguish their lodging, that so they may not lie one upon another.

To look to the Gelding or Splaying of the Swine, for it is a good thing to have the Art of a Sow-gelder, or Hog-gelder; Such Gelded Swine in *English* we call a Gelded Male, a Barrow-Hog, and a Female Basse, which is best done, and most safely in the Spring and Autumn.

To be careful in ordering remedies, in case any Diseases fall upon them, for they are subject to many distempers.

Parts of a Boar or Swine.

16. **Bristles**, the strong hair on the Swines back.

Swines hair, an hard harsh hair.

Snout, the turning up of the Nose.

Tusk, or **Tushes**, the long teeth coming out of the mouth.

Cheeks, the sides of the head.

Source, the head, feet and ears boiled and laid in pickle for eating.

Back, the Lights, Liver, and Heart altogether.

Bacon, the flesh of the Boar.

Pork, the flesh of Swine and Piggs.

Lard, the fat of Swine; the two leaves are termed Fat.

Puddings, or **Swines meat**, are all the Puddings together.

Pizzle, the Boars Prick which is writhen like a screw.

Bag, the skin in which the Stones are hanged.

Treath, the tail which is alway writhen.

Swines feet.

*

Clawes, the Hoofs.

All other parts are termed according to the Bull and Cow; but for the other terms, as they are sold by the Butchers in the Shambles, that you may see farther explained in *lib.* 3. *cap.* 3. *numb.* 32.

Things necessary for keeping of Swine.

17. **A Swineherd**, the Swine keeper, a Tenter of Swine.

A Hogherd, a keeper of Hogs.

A Swinecote, a place to keep and fatten Swine in.

A Stie, is the out-courts, or limits of the Swine coat in which they walk and eat their Meat; but generally we call both the Cote and its outler a Stie.

A Trough, or **Stone Trough**, a hollow place cut in Wood or Stone, in which the Swine have their Wash-meat given them.

Washings, as Whey, Butter-milk, Dish-water, any kind of Draff.

Straw, to ly on.

Com, as Pease or Beans, Acorns, Chestnuts and other Fruit, to feed and fatten them.

Grass, Roots, Wifells, Grains, to nourish them up till the time of feeding.

Rings, or Staples to put into their Noses to keep them from Rooting.

Pokes, to put about their Necks to keep them from running through Hedges, and breaking them down.

Crucks, or **Cans**, to carry their Meat and Draff in.

Diseases in Swine.

16. **Swine**, of all Creatures, if they be Sick, will forbear eating, which if the Swineheard observe, he must diligently enquire into the Disease, whether it be

Poison, for a Swine eating of Hemlock will poyson him; so will Chamelion, and black Hellebor work the same effect upon Horses, Oxen and Swine; Henbane make strange pains in their Belly and Guts like Convulsions; the Herb Goosefoot is Venemous to them, with the black Nightshade, and Hartstongue; the bite or sting of a Scorpion is present Death if they drink upon it.

The **Measles**, or **Meazle**, they are like Hail-stones spread in the Flesh, and especially in the leaner part of the Hog; this is a Disease proper to this Beast, for no other in the World (as *Aristotle* saith) is troubled therewith; if a Swine be Measly, the flesh is very soft and loose; and this voice will be altered.

The **Leanness**, or **Pining**, is a kind of leafy disease, and

and they go as if they were drunk, or weary, they lie down and sleep all day. Called also **Mistaking**.

The **Pestilence**, or **Burrin**, which causeth bunches and swellings about their necks.

The **Ague**, is found out by their sudden stop, standing still, and turning their heads about, fall down as if it were by a **Hegrim**.

The **Cramp**, is a painfull Convulsion of their members, caused through cold, which hapneth when in their travel, they suddenly lie down through weariness.

The **Lice**, with which they are much infested, by which **Vermine** their skin is gnawed through.

The **Lethargy**, is a sleeping evil, called a **Lethargy** which cometh upon them, through much sleep in the Summer, of which they die.

The **Head-ach**, which causeth their ears fall down, and their eyes dejected; by reason of many cold humours in the head, it killeth in three or four days time, after infection being as dangerous as the Pestilence.

The **Gargarism**, it is a swelling about the chaps, joynd with the Feavor, and Head-ach. spreading it self all over the throat, like as the Squinacy in a man.

The **Bernells**, these are little bunches rising in the throat, and unto this Disease belongs another, called the **Rangen**, which is not contagious, but dangerous; for it is a swelling in the lower part of the chap of the twins mouth; which waxing white, groweth hard like a piece of horn, through pain whereof the Beast cannot eat, and within two or three days dieth thereof.

The **Pain** in the **Lungs**, which is caused through want of drink.

The **Diseases** of the **Spleen**, causeth also through want of water.

The **Cathar**.

The **Lar**.

The **Scurf**, or **Manginess**.

The **Haggots** in the ears.

The **Impostume**, a swelling and gathering of a corruption in any part of the Body.

The **Luggs**, or **Swin**, that are Lug'd.

LI. He beareth Gules, a **Badger**, (a **Boson**, of some writ, a **Bauson**) Argent, between a **Bee**, and a **Silk-worme**, Or. The **Bee**, is also called a **Drone**, or **Humbo-Bee**.

The **Badger**, hath several denominations in our English tongue, as **Badger**, a **Brock**, a **Gray**, a **Boson**, their hair is rough and rugged, hard harsh, and stubborn, of an intermingled grisly colour, sometimes white, sometimes black; his back, belly, and face white, having a long face and snout.

In *Lucan*, there is a wild Beast or **Boson**, resembling both a **Beast**, and a **Hog**; not in quantity, but in form and proportion of Body: in short legs, ears, feet, and tail, like a **Beast**, in nose and fatness, a **Hog**, from whence come our Proverbs, as fat as a **Boson**.

The **Canine Badger**, hath feet like a **Dog**, and a snout: eating flesh like a **Dog**.

The **Swinish Badger**, hath hoofs, cloven; and a snout like a **Swine**, and eateth roots and fruits, as the **Hog**.

A **Brock** proper is the Crest of Sir **Richard Brock** of **Norton**, Baronet.

A 3 **Brocks** proper born by **Brock**.

*

In this square is also set a **Hony-Bee**, and **Silk-worm**, in their true shapes, of the first, see more *numb. 62*. The latter is a **Worm** hatched from an egg, laid by a **Moth**, or **dronish** kind of a whitish **Butterfly**, through the heat of the **Sun**: and fed with the leaves of a **Mulberry Tree**. At the time of the **Year**, and when these **Wormes** are come to maturity, they spin **Silk** out of their **Bowels**, as the **Spider** doth his web: working themselves into a **Silken husk** about the largness of a **Pigeons** egg, where they lie all **Winter**, and in the **Spring** break forth of the husk, and are metamorphased into **Moths**, large and full Bodied, with wings of a **Measle** substance, much after the form of the **Figure** set down, *numb. 69. and chap. 19. numb. 22. 23*. The wings covering all the back, but a small part of the end of the tail, they are of white, and whitish-yellow colour, both in the body and wings; of a slow or no flying at all, only use their wings to drive them forwards in their going.

LII. He beareth Argent, an **Hedg-hog**, (or **Archin**) **Sable**, in base a **Field snail** proper.

The **Hedg-hog**, hath the head of a **Hog**, being beifer and compassed all over with sharp thorny hairs, both on the face and feet, but not on the belly. He hath two holes under his tail, to eject his excrements, which no creature living hath besides him. They engender, standing belly to belly, because their pricks or sharp quills suffer them not to have copulation like **Dogs**, they are of a blackish brown, or **Mouse** colour, called also **Archin** or **Diricion**, from the Latin *Hericius*.

The **Porcupine**, is a creature very like the **Hedg-hog**, being full of **Square quills**, **Pins**, or **Pricks**, or **Thorny Bristles**: For all those names were given them by the **Latins**, which quills stand more confusedly crossing one another (more then the **Hedg-hog** which goeth all one way backwards) which he shooteth off at his pleasure. Some say that the **Hedg-hog** is for the **Woods**; and the **Porcupine**, or **Porcupine**, is for the **Mountains**. The mouth is like an **Hare**, but with a longer slit, opening; ears like a **Hans**, the fore-feet, like a **Badger**, and the hinder like a **Beast**. He hath a maine standing upright from the top of his head to his shoulders, bending backwards towards the ends; upon the Punctures of his lips, on either side, grows forth long black Bristles, the over teeth hang out, or over the mouth, the quills are party coloured, that is, part whitish yellow, and part black. Pilgrims that comes yearly from *St. James of Compostella in Spain*, do bring back generally one of these quills in their caps, but for what cause I know not.

A 3 **Hedg-hogs**, S born by *Biram of Biram*.

A an **Hedg-hog**, S a demy one for the Crest, is born by *Standigel*, a porcupine, B the quills, and collected in chain; O is *Sidney's* Crest.

The **Field snail**, without a shell is of a pure shining black; but those that are in moist Sellers, or ruins of houses, are of a whitish-yellow colour.

A. a **Chevron** between three **Field snails**, is born by *Snelfeld*.

LIII. He beareth Argent, a **Marmot**, or **Moule**, Or. See this further described *chap. 8. numb. 43*. This **Ruffet** colour is the Crest of Sir **Renold**, Knight of the **Garter**, in time of King **Henry** the first.

Some draw it thus, with ears as if they were cut off in the middle, others make it with ears round on the top. The same Sable is the Crest of the Lord Bray.

LIV. He beareth Azure, a **Cat**, (or **Cat** a mounte, or a **Wild Cat**, or a **Pus**) Or; **Spotted Sable**, this is a faine called also a **Buffon**, by reason of his being an enemy to **Mysse**, or **Rats**, they are of diverse colours; as White, Black, Sand colour, Gray, and **Red** and **Stracked** like a **Leopard**, diversly with Black, or deep Brown or Chestnut colour, his tongue attractive, and forcible like a File.

The **Wild Cat** (or **Pool-Cat**, as some in England call it) is of a Reddish Yellow dusky colour; a Black line, or strack all along the back, with some black on the legs, between the Breast and Neck, a large White spot; her Tail longer then ordinary **Cats**, having two or three or more Black circles at out it.

The **Flying-Cat**, they have a certain skin, which when they lie in quiet, cleaveth or shrinketh up to the Belly: but being stirred, the same spreadeth from their fore feet to their hinder, like the wing of a **Bat**; by virtue thereof, they stay up themselves in the Air, passing from Tree to Tree, like a fowl: as do the **Ape** and **Pontique House**, of which more in their places, chap. 8. n. 49.

The **Heyrat**, a Beast in *America*, as big as a Cat, of a Chestnut colour, a great climber of Trees, and lover of honey, that coming to the caves of Bees, it will with such dexterity take out the honey with its nails, that it neither hurts the Bees, or receiveth harm by them.

A Cat, a Mount, & Gorged with a Crown and Chain, O is the Crest of *Harvey of Chester*.

A 3 Cats in pale S born by *Keat*, Er the like B by *Adams*.

B a Cat Saltant to the sinister, born by *Van Schlachter*.

The same with a Mouse in his mouth, S by *Katzen*, whose Crest is a Cat sciant with a Mouse as aforesaid.

LV. He beareth Gules, a **Genet**, proper, this is a beast something larger than a **Cat**, It is of a dark Yellow colour, full of Black spots: the fur of the **Genet**, is very much esteemed off. It hath according to *Gessars* description, a Head and Nose, as sharp as a **Greyhound**; round Ears, and a Tail like a **Cats**; having several Black circles about it, and as many White successively, following each other. This is born by the name of **Genet**.

B 3 such O is born by *Genitor an Italian*.

In the cheife for want of roome, is a **Glow-worm**, that which shineth in the night; it is of a dusky white colour: having a bright Yellow spot at the tip of its Tail, which giveth light in dark places: the Belly and Legs, are more whiter then the Back, it hath both Back and Belly full of joynts, and 6 Feet all together near the Head, See it with the Belly upwards, chap. 10. numb 71.

S three such proper, is born by the name *Glowworm*.

which again divide themselves into many kinds, of all which I shall speak in their order and divisions.

Of the Nature of Dogs.

But first a word of the nature of Dogs in general: Seeing there is no Region or Countrey in the World, where they are not braed in some store; some for Hunting some for War, and defence, some for Water, and some for Pleasure and Delight. They have generally wide mouths, and their fore Legs bend like the Arms of Men; and he useth them in stead of Arms, having five distinct Fingers, called Claws upon each Foot before, and four upon each Foot behind.

A Dog holdeth up his Foot when he maketh Water, if he be above six Months old; till that time he doth it sitting, as all Females ever do, except she be of a very generous Spirit.

They ever smell to the hinder parts, one of another, thereby to discern their several kind, and disposition of Natures.

After they have run a course, and been in the Water, they relieve themselves, by tumbling and rowling upon the ground too and fro.

When they lie down, they turn round in a circle two or three times together, that they may the more commodiously lie round, and from the Wind.

They sleep as doth a man, & therein dream very often, as may appear by their grumbling, & barking in their sleep.

In their copulation they are Lined, or clean together for a certain space, as if their hinder parts were glewed. Some term it Lining: and that Bitches are Sait, or proud, when she receiveth the Dog.

They bring forth many at a time, sometimes five, seven, nine, or twelve; for so many cells hath the Femal in her Womb.

All the Whelpes, or Puppits, are at the time of Littering whelped blind & see not for the space of nine days: becaused of their multitude, they cannot be perfected in their Dams belly, which doth not happen to Beasts, which bear single.

The use to carry their Whelpes up and down in their mouths, till they be seven days old, some longer till nine, or eleven dayes, and not after.

The Females have underneath their Bellies great Udders, with many Paps, or Speanes to suck at, in a double rank or row on both sides; the generous Bitch hath twelve others but ten. They bear their young within their Belly next to the midriff, their time being dry like a Wolves.

There is no creature without reason, more loving to his master then a Dog, nor more serviceable: enduring many stripes patiently at the hands of his master, using no other meanes to pacifie his displeasure, then humiliation prostration, assentation, & after beating, turneth his revenge into a more fervent love.

The foolishness of a Dog appears in this, that when a stone or any other thing is cast at him, he followeth the stone, and neglect the hand as threw it.

But to conclude with the baseness of a Dog, those two proverbs in Holy Scripture, will sufficiently convince that they are emblems of vile, cursed, and filthy men: Give not thar which is Holy unto Dogs: saith our Saviour. *Matth. 7. 6.* Like the Dog return to his Vomit; 2 *Pet.*

DOgs are the general accepted name, for these kind of Creatures, whereof there are four several sorts

2. 22. for above all Creatures (St. Peter informes us) that when the Dog hath cast his gorge, and emptied his stomach, he will afterwards go and lick it up again.

Their diversity of nature, is in this; some will bark, & not bite: some will both bark, and bite; some will bite fore, before they Bark.

LVI. He beareth Azure, a **Mastive** (or a **Ban-Dog**) Argent, **Collar and Line** (Slip or Lease) lying under his feet, Or; the Line thus tyed up, and lying under his Belly, is proper, and needs no mentioning; but if it were cast over his back, and so hung down, then it were to be thus Blazoned, a **Mastiff Dog, collared, with a Line flexed and reflexed over his back, &c.** yet if the Dog were in a ramping posture, then you need no such term (as flexed and reflexed) see more of this in the Lion rampant, collared and chained, chap. 7. numb. 17. This is born by *Manstiffe*.

B a Mastive A collared G born by *Massoner*.

Several sorts of Dogs of the Mastiff kind.

The **Mastive**, which is a vast huge stubborn, ugly, heavy Dog, not very swift, but strong, terrible and frightful.

They are of several colours, as white, black, grey, chestnut and spotted; these kind of Dogs, according to their size, nature and qualities are termed either

The **Bull Mastive**, which is the lesser sort, being active and more nimble for the Bull, and being tumbled and tossed on his horns, receives no great hurt.

The **Bear Mastive**, which is of the largest size, and more fit for Bear Fights, being high, strong and heavy; now these have their names according to their keeping, as,

The **Dog Keeper**, are keepers of Farmers Houses.

The **Butchers Dog**, for keeping and taking his Cattel.

The **Messenger** or **Carrier**, that fetcheth and bringeth.

The **Mooner**, or **Moon-Dog**, which continually is Barking at the Moon.

The **Water-Dawler**, that runs in Wheels to draw up Water.

The **Tinkers Curr**, that bears his Budget, and carries his Tools.

The **Defender**, are Dogs that forsake not their Master in Life nor Death.

The second sort of **Mastives**, are **Mungrel**, or a Rascal sort of Curs, engendred between **Spaniels** and **Mastives**, and they are **Basard Mastives**, as

The **Admonitor**, or **Warner**, such as Bark at all persons that are Strangers coming newly in; these are admonishing Dogs.

The **Turn-Spit**, such as run in a Wheel, to turn Meat at the Fire.

The **Dancer**, such as will stand bolt upright, and Dance after Tunes.

The third sort are such as are degenerated of such Ma-

stives as is aforesaid, but by a wonderful Conception they are

The **Lyciscane**, of the Latine *Liciscus*, a Dog of a **Bitch** and a **Wolf**; and may properly be called a **Wolf Dog**.

The **Lacane** of *Lacena*, a Dog bred of a **Bitch** and a **For**; of these I believe I have seen some, which have the shape of Foxes, but the quality of Dogs; a **For Dog**.

The **Urcane**, of *Urcanus*, a Dog begotten between a **She-Bear**, and a **Mastive** or **Ban-Dog**; the Dog excelleth all in cruel conditions; is fierce, is stout, is strong; he careth not for the **Wolf**, the **Lion**, or the **Bull**.

LVII. He beareth Gules, a **Talbott**, (or **Hound**, or **Hunting Hound**) Or. If the Talbot be collared and lined as the aforesaid example: he is termed a **Talbott coupled**, and **Lyamed**.

There are for Hunting several sorts of Hounds as,

The **Baur-hound**.

The **Harier**, having large bagging lips, and hanging eares down to his chaps.

The **Gressier-hound**.

The **Fallow-hound**.

The **Blood-hound**, that hunts Beasts, or Men, by the scent of the foot that are Park Robbers, pursuing till they be found out.

The **Terryer** or **Terrars**, such as hunt the Fox and Badger, who like Ferrets follow them into their caves, holes, and bite and pull them thence.

The **Bagle**, is a small kind of Hound.

The **Brache**, is the Bitch to all hunting dogs, for England they are so called, not **Bitches**; but a **Brache**.

B a Talbot. A born by *Borgoigne*, with a collar, by *Van Hundt*.

The like O is the Crest of *Grosvenor* of *Eaton*.

The like A is the Crest of *Talbot* of *Graston*.

A the like G born by *Wolfeley*

O a fesse dauncer, between three such passant S born by *Carrisk*.

G on a plot of ground, V a Talbot A collared with the Lyam, or string fastened to the sinister chief, with bow-knot, O. is the town of *Brakenheims* Coat of Arms.

B a fesse, between three such heads erased, O born by *Burton*.

The colour of these Hounds are generally white, or are spotted with black, or chestnut: Some all black, others part of one colour, and part of another, &c. **Breended**.

LVIII. He beareth Argent, a **Grey-hound**, (or **Courser**) Sable. If it stand upright, then it is termed **Saltant**, or **Saltant**. If **Collared and Lined** as aforesaid in the **Mastive**; it is termed **Collared and Leased**. This is born by the name of *Holford*, of *ford*.

The same collared G born by *Moreton* of *Merton* S 3 Grey-hounds courant A collared G born by *Berrington*.

A one Saltant to the sinister. B collared O born by *Schwarbem Hof*.

OF these Grey-hounds ther are several kinds,

The **Gale-hound**, excellent for perspicuity or fight, that will single a **Deer** out of the herd, or flock, and follows it by eye-sight; prevailing little, or not a whit, by the smell of the Nose.

The **Grey-hound**, is for swiftnes, whose service is to course the **Hair**, and chase the **Buck**, **Hart**, **Doe**, and **Fox**; with other Beasts of the Game of Hunting.

The **Leviner**, or **Lynmer**, or **Leamer**; so called from the **Leam**, or **Lyne** wherewith they are led; being a middle-size hound, between a **Harrier** and a **Grey-hound**, both for kind, and frame of Body: being active, light, and nimble, and therefore may well be termed a **Light-hound**.

The **Tumbler**, or **Lurcher**, is of a small-size, not very tall, but in shape like the **Grey-hound**; in hunting they turn, and tumble, and wind their body; then suddenly and fiercely fly on the beast unawares, and so kills it; his hunt is only for **Coneys**, about their burrough-holes.

The **Chieftain-Dog**, or **Night-Cur**: because he hunteth in the dark, and will neither bark, or yelp in his Game, but in his watching will snatch up in course, many **Coneys**, and bring them to his Masters standing, as he pleaseth.

The **Wolf-Dog**: this is of largest sort, and size of Grey-hounds; which are for the hunting of **Wolves**, **Bears**, and **Wild-Boars**. The largest of this kind are in *Inia*, *Sythia*, and *Hyrcania*, being gotten by **Cygers**, and **She-hounds**.

The parts of a well Shaped Grey-Hound.

21. **Snake** or long headed.

Chub-headed or **Round-headed**.

Dake or **Long-necked**.

Deep Chested, when his breast hangs low between his fore-legs.

Ebb, or **Shallow chested**, his breast and body all of a thickness.

Beam, or **Wheel Backed**, when the back riseth.

Flat Backed, when it is even between the neck, and spaces.

Spaces, the rising of the two hip-bones, at the setting of the hinder parts, or small of the back.

Wide Spaced, is when it is broad, and open between the two hip-bones.

Narrow Spaced, when the two hip-bones are near together.

Filletts, is the small of the back.

Broad Filleted, when the small of the back is Broad.

Narrow Filleted, when the small of the back is narrow.

Flanck, is that part of the belly, under the small of the back Ribbs.

Out Ribbed, is when the Ribbs stands out.

Flat Ribbed, is when the both side Ribbs, cling and are near to gather.

Stern, is the tail of the Grey-hound.

Fine small, and slender Stern.

Broad, **Besom**, or **Busk Sterned**, when hairy shagged.

Round, or **Cat footed**.

Long, and **Flat footed**.

Shoulders.

Knees.

Stiffing Toynt.

Cambrel.

Colours of Grey-Hounds.

White.

Black.

Fallow, **fad Fallow**, is a kind of fad brown.

Red Fallow, is a red brown.

Light Fallow, is a light whitish brown.

Binded Fallow, is a Fallow colour, Barred with black.

Sandy Fallow, or **Cream colour**, is a white inclining to yellow, with a little tincture of red.

Binded, or a **Spotted Dog** in rows, or barts.

Pyed, is a Grey-hound of two colours, some part of one, and another part, of another colour.

Ticked, when a **Dog** is spotted with black on white, or with white spots on black, and the like of the fallow and white, which proceeds from the biting of Ticks, in a Tick cannell.

LIX. He beareth Vert, a **Demy Grey-hound**, **currant**, **Argent**; **collered**, **Gules**; **Edged** and **Terreted**, Or. If there were a **Line** at the collar, he is termed **Collered** and **Leaved**, after such or such a form and manner. This is born by the name of *Gland-Villers*.

O a **Demy Grey-Hound Saltant**, **B** collered, **A** the like for his Crest is the Arms and Cognizance of *Teulingen* of *Barvaria*.

For want of room, this quarter was charged with a **field Spider**, in the chief: and a **Serpent reverted**, crawling on his belly, with his head **regardant**, and end of his tail **embowed**. But of these we shall discourse further in the Sections of **Flyes** and **Worms**. See *numb.* 46. 72.

A 3 **Spiders**, **S** born by the name of *Spidercacher*.

LX. He beareth **Sable**; an **Inland Dog**, **Argent**. This is of an Out-landish kind, and is of a pretty bigness: curled and rough all over, which by reason of the length of their hair, make shew neither of face, nor of body: these Curs are much set by, with **Ladys**, who usually wash, comb, and trim of all the hair of their hinder parts, leaving only the fore parts, and hinder feet jagged. Some call them **Shoughs**.

The **Water-Dog**, or **Water-Spaniel**; they are
A a a kind

a kind of rough or curled, hairy Dogs, whose hinder parts are shorn, or hair cut off, that so they may be the less hindered in swimming; whose figure is then like the **Island Cur**, before spoken of; save they have longer noses, bushed tails, and bushes of hair their masters generally leave them in their shearing on their two hips behind, and bending of the thighs, of the hinder legs.

The **Cuscan Dogs**, are not beautiful to look upon, having a deep shaggy hair, yet in their Game not unpleasant.

S an Island Dog, A couched on a cushion, O born by *Alahand*.

B a Water-dog, O born by *Wasserville*.

LXI. He beareth Vert, a **Spaniel** Argent, Spotted Sable. This is called also a **Land-Spaniel**, whose Game principally, is to attend an Hawk, and are taught by falconers, to retrieve, and spring or raise **Partridges**.

A Spaniel, A spotted S Sejan on a hill before an Haw-thorn tree flowered, proper is the Crest of *Tatton* of *Wiltensham* in *Cheshire*.

V a Spaniel passant, A spotted, is born by *Treever Van Horarof*.

Several sorts of Spaniels.

They have several names according to their office, and employment: and there is several mixt kinds of them, being **Murgrells**.

First for the generous sort of **Spaniels**, there are the **Sociable Spaniel**, which goes up and down with their master, and leave them not in their travel, such was *Tobits* Dog, *Tob. 5. 16*.

The **Shepards Dog**: which are to guide and govern their flocks, and catch in stragling beasts: upon signs given by the master. These Dogs are used by **Herds-men**, **Swine-herds**, and **Goat-herds**, for the same service.

The **Village Dog**, or **House-keeper**. These are bigger then the Shepards dog, and stronger, being severally coloured, great mouthed, and bigly barking, so as to terrifie Rogues, and Thieves. These are likewise brought up in City and Towns, to keep the houses in safety. Called by them **House Dogs**.

The **Setting-Dog**: which findeth out the Game by scent, or the wind, and lieth down by them, till his master hath laid his net over them.

The **Water-Dog**, or **Spaniel**: which taketh the water, to fetch Fowl, or other Game taken by Fowlers. It is also termed, a **finder**, from his hunting out things lost, or left behind us.

The **Cumbler**, of the Spaniel kind, is the same in condition, and for hunt, as the Grey-hound, kind of **Tumbler**.

The **Spaniel Gentle**, or the **Comforter**, is a little pretty kind of Spaniel, of the least sort, such as Gentle-Women carry in their bosoms, lay in their laps, and kiss, and dally withal. Of these kind there is of several colour; smooth and curled hair, ears long and short, and for proportion of body of all sizes, from the bigness of an ordinary **Cats**, to as little as a **Ratt**: for in *Chester* I have seen kept by a certain Gentle-woman; a Dog so little,

*

that she would have carried it abroad with her, in her Muff, and I have taken it in one hand, and covered it with the other, so close that no part of it should have been seen.

Of the **Mongrel** breed of Spaniels, with other Dogs, are such, which though they be propagated with, and by Dogs, yet are they not of one kind, as it is ordinary for the **Grey-hound**, to couple with the **Mastiff**; the **Mastiff** with the **Hound**. &c. from which breed of **Bastard Spaniels**, sprung those smaller sort of Dogs, called

The **Cur**, is an other sort of **Mongrel**, but of the smallest sort of them.

The **Skaut**, or **Kaut**: is a barking Dog, never ceasing while he hears, or sees any strange object.

The **Puppy**, or **Fitting-Dog**, such as Ladies delight in, and to be playing with.

Difference of Terms used to Dogs.

22. **I**N these four sorts, viz. The **Mastive**, **Hound**, **Grey-hound**, and **Spaniel**, though they be all for the hunt, and chase; yet their terms in many things are much different: for we say in hunting; that,

The **Hound**, hunts the Deer or Hare.

The **Grey-hound**, courses the Hare.

The **Spaniel**, follows, or runs the Hare: Retrieves the **Partridge**.

So in setting on the Dogs, upon the Game, we say:

Cast off, the Hound.

Let slip, the Grey-hound.

Let go, the Spaniel.

We say, **Ho, So Ho**: or **Haw, So, Haw**, to the Hound, or too him, too him.

Illo, Illo, there there, to the Grey hound.

Iryet, Iryet, or **Seek out**, to the Spaniel.

Take him, Take him: we say to the **Mastiff**, when we encourage them to follow their chase.

The Hound hath his **Couples**; the Grey-hound, hath his **Collar**, and the Spaniel, his **Terriet**.

The string wherewith we lead them, for the Hound, it is called a **Lyam**; for a Grey-hound, a **Lease**: and for a Spaniel, a **Line**.

Diseases in Dogs.

23. **W**Dms. Cold or Stopping.

Stone.

Costiveness or Belly bound.

Lyce, Fleas, Ticks.

940

Mad Dog biting.
Gals, or **Tettars**.
Itch, **Scab**, and **Mangy**.
Called Feet, or **Fretting** there.
Canker.
Tiredness.

Pain in the **Ears**.
Wounds by **Blows**.
Bruises, and broken **Bones**.

All which terms have been explained in the Diseases of other Beasts, as **Horses**, **Cows**, &c. to which I refer you.

24 **AND** seeing it falls out so as to speak of these terms used to Dogs in Hunting: I shall now give the Reader some other Terms or Significations of words, which are used in the Art of Venery, and that as briefly as I may.

The word or term in Hunting.

Alay, is when Dogs set in a place of reserve tarry there till the rest of the Kennel come in, and then cast off with them: See **Avaunt-lay**.

Avaunt-lay, is when, they set Hounds in a readiness, where they think a Chase will pass, and cast them off before the rest of the Kennel come in; see a **Relay**.

Abatures, and **Foyles**; the Bucks beating down of low twigs and branches, with their Horns.

Angle, **Angled**, or **Chambered**, when in hunting of the Fox, or Badger, they run to the furthest part of the hole.

Assay, as to take Assay of the Deer, is, when the person to whom the Venison is given, if he be Hunting himself, doth (when the Deer is killed) with a long Knife cut a slit down along the Brisket or Breast of the Deer towards the Belly. This is done for him to see the goodness of the flesh, and how thick it is, for which assay the Keeper or Huntsman, hath half a Crown Fee.

Burrows, or **Coney-Burrows**, or **Burroughs**; the place Rabbits are kept and fed.

Buttons, the sprouting out of new Horns on a Deers head.

Burnish their heads, rubbing them against a Tree.

Break head, when a Deer in Chase, leaves or forsakes the Herd. Also to break up a Deer is to cut up his Belly, and take out his Interels.

Beat a brook, or **River**, when any Deer Swims in a Brook, or River.

Broweth, a term for Deer feeding, upon a Heath, or Common.

Blemish, or **Blemishes**; are the marks or tokens of a Deer running such a way, by the broken boughs, and branches which his Horns hath broken down.

Backsets, or **Receits**, is to make a stand to receive a chased Deer, and to cast upon him fresh Hounds, at the latter-end of the Course; see **Ceasers** and **Side-lays**.

Bearing a hare, is killing it.

Bleachers, and **Setwels**, are papers and stick laid cross a Fox-hole, to fear him and make him believe some Gin is set there.

Beauty of their Mildness, is the Foresters term which he gives a Deer which hath cast his Horns and hideth himself, as if he were ashamed of his loose.

Covert, is a Grove or Wood to shelter a Deer from the Hounds.

Covre, **covreth**, when a hunted Deer goeth into the Woods.

Counter, when a Hound hunteth backwards, the same way that the Chase is come.

Change, is when the Hound hunts any other Chase than that which he first undertook. Also Change is when a Deer Herds, and runs with them to save himself.

Cross and double, when either Hare or Deer useth any deceit or subtlety to escape the Hounds.

Cote, is when a Grey-hound runs by another, and out-runs him end-ways, and turns the Hare.

Chafe, is taken for the Hunting scent of the Deer, and flying of the Deer; and sometimes, for the Game of Hunting it self.

Chambered: See **Angled**.

Croppeth the springs, eating Grass after the manner of a Cow; Cropping is eating.

Coppys, are small young Woods.

Clappers, the same to **Burrows**.

Clamps, are Pinchers, with which Foxes and Badgers are taken out of the Earth.

Coney-greys, or **Greeves**: see **Burrows**.

Cabaled, that is the head of the Deer is cut close by the Horns, through the Brain-pan to the Nose; nothing of the hinder part of the Head remaining.

Dole, is the reward of a Roe-Buck, given to the Hounds.

Drain to the ground, is fall to the ground.

Doubles, and **Turns**, is to cross the same way again, or again; a wheeling or turning about: See **Cross**.

Default, is when the Hounds have lost the scent.

Discovreth, when the chased Deer comes out of the Woods again.

Doucets, a Stag, or Bucks stones; and a Goats stones, a Rams stones.

Down, he is down; so we say, when the Deer is dead.

Drawing of the Covert, is when the Huntsmen do beat about with the Hounds for Chase.

Emprimed, or **singled**, when a Deer is hunted and doth first leave the Herd.

Emboss, when the Deer through the Chase is foamy at the Mouth.

Eloyn, is the Flying, or Sore running of a Deer.

Flankards, are two little Knots or Nuts in the Flank of the Deer. The like is between the Neck and the Shoulders.

Fee, or **Fees**: See **Rewards**.

Fray their head, is rubbing their Head to scrape of the Velvet from the Horns of the Stag.

Fraying stock, is the Stock or Tree they rub against.

Foyl fresh, the Soil, Grass, or the like; fresh fodder.

Foyls, the beating down of green branches and boughs of trees. See **Blemishes**, and **Abatures**.

Fozloyn, or breaking from the Hounds.

Fozloyneth, he escapeth escapeth the Hounds.

Fells, are the Mountains, Valleys, Pastures, and such like.

Fryths, Springs, or Copyes, or young Groves, Woods, and the like: we say a Deer feeds in the Fells, or Fryths; if he be out of his own place.

Gutters, are the the Slifters, or Krinks, in the beam of a Stags horn.

Gaze, standeth at Gaze, when they stand to look at any thing.

Go-by, the same to Cote.

Hold, take his hold, when a Deer breaketh the Herd, and draweth to the Woods, and Thickets.

Hunt, is taken from the keeper of Hounds, or the chief Huntsman.

Hallow, is the Hunters Voice to call the Dogs; *Ho, Ho, Ho*. Also a reward given to Hounds, of beast that are not beasts of Venerly.

Hardle, to fasten an Hare, or Haunch of Venison to the Huntsman's side.

Hewts, or **Springs**, the places where the Deer feeds; taken for the small Groves, or Copyes; and the Springs the greater Groves.

Hellows, the bottoms, or plain champaign grounds.

Haunch, the hinder quarter; the Breech, or Buttock of a Deer.

Haryers, are Hare-hunters, taken indifferently for Men, or Hounds.

Hulk, or **Paunch**, is to open the Hare, and take out her Garbage.

Holofasts; See **Clamps**.

Jerkins, or **Slip**, is when a Grey-hound goes by another, and yet is not able to turn the Hare.

Inchpin, are the Sweet-breds, or sweet Gut in the Deer.

Well, is the Caul about the Paunch.

Layre, **Layres**, the place where the Deer lodgeth or Harbours.

Lyam, the string by which the Hound, or Blood-hound is led.

Law, is to give a Hare ground after he is started, before the Grey-hounds are loosed, *viz.* twelve score yards, or thereabouts.

Marfounder, is when a Dog is not able to run, sick, subject to Mange.

Meweth, when Deer cast their Horns, or head.

Main, the Hair on a Stags Neck.

Make head, is which way the Deer taketh his course, or runneth.

Noombles, or **Umbles**; the Hart, or Bucks plucks; as Heart, Lights, Liver, with other appendices.

Open, is the cry of the Hounds; as the Hounds open well; they have good Mouths.

Overshot, is when the Hounds over-go their Game, and follow a new Chase, because they have lost the old scent.

Pride of Grease, is full Fat, and in good liking.

Prime of his Grease, a term used to a Boar when he is full Fat.

Paunch a Hare, pull out his Guts: See **Hulk**.

Prickets, Fellows that attend the Hounds, and run along with the Huntsman.

Paddock, is a Close, closed in a Park railed, or paled in.

Ports, or **Slot**, is the print or tread of a Deers foot.

Quarry, or **Reward**, is a gift or reward given the Hounds, being some part of the thing hunted, if they

be Beasts of Venerly: But of all other Chases, is termed **Hallow**.

Quest, the cast off of the Hounds, when they are to hunt for the scent or smell; also the first opening, or cry of the Dogs when they have found the scent of the Hare. We say they follow the **Quest**; that is, follow the smell.

Recet; See **Allay**.

Relay, is to set on fresh Hounds, from a **Recet**, when the Chase and rest of the Kennel of Hounds be past. See **Avant-lay**, and **Allay**.

Rechate, is to answer the cry of the Dogs, with a blast of the horn.

Reward, as it is a term and general word, I shall in this place inform you upon the Killing of a Deer: How all its parts are distributed, as Rewards, or Fees to them who are concerned in the Chase. First when the Deer is killed and broken up; the Hounds shall for their Reward have the Cabasing of the Head with the Brains, after it is cut from the body, (that is, all the Head save the Tongue, and the Horns, with so much of the skull, or horns, or scalp or fore-part of the face of the Deer, as will hold the Horns together) also the Paunch being emptied, and the intrels with the blood of the Deer.

The Horns, the Skin, and the right Shoulder, are the Keepers, or chief Huntsman's Fee. The left Shoulder is the Under-keepers, or the rest of the Huntsmens Fee; with the Brisket-bone, and the two Flaps which hang with it to the Neck.

The Noombles of the Deer, that is the Heart, Lights, Liver, with all the appurtenances, belong to the Lord; so doth the Caul, the Ears, the Tongue, the Doulcers, or Stones; the Tenderlings, (if his head be tender) and the sweet Gut; which some call the Inch-pin.

The whole Venison, as a present from the Lord of the Park, consisteth of no more, than the Haunch and Breasts. For which the Keeper hath a ten shilling Fee: though it be a free-gift of the Lord; this is it, as makes it not Venison but Deer. The half Buck, or the side of Venison, is the half Fee. The half Haunch a quarter Fee. A Doe that is presented, is a Noble, *viz.* six shillings and eight pence Fee; and so according as aforesaid.

The Hart, or Deers feet ever go a-long with the Shoulders, and the Haunch, to fasten (or to **Hardle** as some hunters call it) to the sides.

The Midriff, and the Grissel, at the Spoon of the Brisket, called the Ravens bone, or the Ravens Morfel, with other Garbage, is cast to the Crows and Ravens; and thus the Venison, as a Deer, is distributed.

Ring, that is when the Hunter cast about the Grove, with the Lyam-hound, is to make a Ring.

Rowling, is to raise, or unharbour the Buck.

Steppe, as goeth to steppe; when the Deer in the heat of the day, with-draw themselves from the Flyes.

Streyneth, that is when he runneth very fast.

Singled, or **Empymed**, when he is hunted and doth leave the herd.

Spent, or **Done**, is when he holds out his Neck, and is tired.

Stewels, or **Stewelling**; is the setting up of clouts, or papers, or the like for marks, and to tear Deer away from a place.

Setting a Hare about, is the Grey-hounds giving him a Turn.

Side-lays, to cast of the fresh Hounds, upon the Deer about the mid-way course: See **Teasers**.

Slip, or **slipping**, is when a Dog gives another the go-by, and yet is not able to turn the Hare.

Skommer, or ease themselves by Shitting, Dogs dung.

Springs, the places where Deer feed. See **Hewts**.

Soyl, as the Hart taketh Soyl, is takes the Water; and to forsake the Soyl, is to leave the Water. The Boar to take Soyl, is to Wallow in the Dirt, or Mire.

Strong-holds, are Woods and woody places.

Splayed, or **Selved**, the cutting away of the Stones of any Beast.

Stripping: See **Jerkins** and **Slip**.

Coil, is to run the Hounds in sight of the Chase.

Tenderlings, are the soft tops of the Bucks horns, when they are in Blood, and new coming out of the head.

Crasonings, is a term for the doubling and crossing of a Ro-buck before the Hounds.

Teasers, **Tease**, is the first Grey-hounds that are let slip at the Herd to bring a Deer single to the Course, or to make them strain, before he come to the side-lays, or Back-fets.

Turn a Hare, is when he is turned about in the course.

Trayl, is when the Hounds hunt slowly and leasurely.

Trench, is a by-path, or a more obscure way, or walk in a Wood.

Vault, going to the Vault, is the Hare running under ground, like a Coney.

Urine, Piss of Hounds.

Scent, is the scent or smell of Hares, or Deer.

Haunt-chase, is the Hound, that leads the rest in the Chase.

Velvet-head, is the horns of a Deer, when they come first out, are covered with a kind of Russet-peel, or pyll, which is called a Velvet-head.

Venison, is the flesh of all sorts of Deer.

Wind, when a Deer smelleth, or venteth any thing, then we say, he hath this or that thing in the wind.

Wrencheth, is a turn in the Chase; not to go straight forward.

A **Wrench**, is not a turn, but as it were, a half-turn.

Warren, or **Coney-greebe**: See **Burrows**.

Wager, is when Gentlemen make Bets on the running of Grey-hounds, in which respect this is the Law for Running of a Course for a Wager. In coursing of the Hare it is not material which Dog killeth her (which Hunters call bearing of a Hare,) but he that giveth most Cotes, or most Turns, winneth the Wager.

A Cote is when a Grey-hound goeth end-ways by his Fellow, and giveth the Hare a turn, (which is called setting a Hare about,) but if he Coast, and so come by his fellow, that is no Cote. Likewise if one Grey-hound do go by another, and then be notable to reach the Hare himself, and turn her; this is but Stripping, and no Cote. If there be no Cotes given between a Brace of Grey-hounds, but the one of them serveth the other at turning; then he which giveth the Hare most turns shall win the Wager; and if the one do give as many turns as the other, then he which beareth the Hare shall win the Wager. A Cote serveth for two Turns, and two Strippings (or Jerkins, as some call them) stand for a Cote; also many times a Hare doth but Wrench, and not Turn;

for it is not called a Turn unless the Hare be set about, and do turn (as it were) round about. Two such Wrenches stand for a Turn. Also sometimes a Hare that is commonly Courfed will know the Country; and because she coveteth the hard beaten ways, she will (of her self) Swarve at such a way, and that is neither to be accounted a Turn nor a Wrench: But if neither of your Grey-hounds be able to Turn the Hare until the end of the Course; then she which went foremost throughout the Course must win the Wager. And for the better deciding of all these Questions, if it be at a solemn Assembly, they use to appoint Judges which are in Courting, and shall stand on the Hill sides whether they perceive the Hare will bend, to mark which Dog doth best, and to give Judgment thereof accordingly.

25. **FROM** Beasts, we proceed next to all sorts of Flies, Worms, and creeping Things; being the least of Living Creatures, which are used in Arms. And yet not the least of Creatures, but they receive Life, in being propogated, and born or proceeding from their like; and are continued by being nourished, and by Copulation beget their like; and for that end there is none so little but have a difference of Sex.

The Worm is called *Vermis* from *Virens*, turning; because of its complication, or foulding of the Body, as it creepeth: Others from *Ver*, the Spring; being the only time that the whole kind cometh forth. Now though they have but one common name (as Worms) yet under that general term, there are divers kinds, and so divers means of Engendring. For some arise from Rottenness of Flesh; some of corrupt humors, some from dry Rottenness, and some again by meeting had between both kinds, being all wonderful in their kind.

They Exercise their Sence (especially for Food-sake) by Touching, Smelling, Tasting, Seeing, and Hearing; and not so little but that they will seek their own Safety, by fleeing from Evil; those that have Wings, by Flying; those that have Fins, by Swimming; those that have Feet by going; those that have either, by panting, crawling, creeping, winding, and turning, or sliding, do set themselves forward.

Feeding for Worms.

The Mite, feedeth on Wax, and old Cheese; the Maggot, on Flesh; the Moth, on Garments, and Cloathes; the Book-worm, on Books; the Wood-Lice, on Wood; the Earth-worm, on moist wet Grounds; the Whirl-worm, or Devils Gold-Ring, (from its lying round) or Cater-pillar, on Vines, Goosberry-Trees; Wiewels, or Bods, on Corn; Canker-worm, on Plants; and the Mulberry leaves feeds the Silk-worms; (so the Louse, on Man's Bodys; the Flea, the Skipper, and the Tike, are Troublesome to Dogs; the Punce, on Wall lows; the blind Beetle, sticketh to moist Walls, the Furry-bear-Worm, called hundred Leggs, and for y

Feet, ly under the Foundations of old decayed Houses, and Walls; the Ant, or Pismire, on Hillocks; and the Spider, makes his Cob-webs to take the filly Flies. These used to be reconed amongst Serpents also, though they have feet, the Lizard, the Ever, the swift Newt, the Salamander, and the Scorpion.

To which we may add, the Adder, the Snake, both of the Wood and Water; the Dart Snake, the Viper, the two headed Serpent, which goes forward and backward; the Cockatrice, and the Dragon.

To them may also be added, the Glow-worm, Palmer-worm, Lady-Cow, Chafers, Horned Beetles, and Horle Flies, all which hide their Wings under a Case, or Sheath.

Flies proceed from Ants, Butter-flies from Caterpillars, and other Worms; which in time lay Eggs that comes to Ants, and Worms again.

26. **B**UT a more general account of Exanguious Animals, such which are imperfect, as being destitute of Blood, which are generally called by the name of Insects, may be distributed into these Heads; as,

First, Insects of an **Analogous** Generation, such as have either no Feet, or but six feet; as,

1. **Apoda**, Such as are without Feet, as

Earth-worm	Snail	Fluke-worm
Belly-worm	Ascarides	Afilus.
Leech	Bots	

2. Such as have six Feet, as

Glow-worm	Proscabar	Louse
Meal-worm	Field-Cricket	Flea
Gentle	Cock Roches	Water Scorpion.
Maggot		

Secondly, Insects as are of an **Analogous**, or like proportionable, and resemblance.

1. Such as have Feet and Wings, either two or four apeece, as

Locust	Eyechur	Grafhopper
Grafhopper	Wood Cimex, or	Winged Scorpion
Mantis	Moth	Sauterelle
Cricket	Winged Cockroch	Cloath Moth
Fen Cricket	Water Spider	Herb Moth.
Chur-worm	Water Cicada, or	

2. Such as have no Wings, but eight Feet, as

Spider	Wheal-worm	Flesh-worm
Scorpion	Wivel	Maggot
Tick	Moth-worm	River Skimp
Sheep-Louse	Canker worm	Fruit-worm
Punice	Teredo	Sea-Louse
Wall-Louse	Wood-worm	Sea-sea
Mite	Tarmes	Sugg.

3. Such as have fourteen Leggs, or more, as

Sow	Wood-louse	Scolopender
Cheeflip	Hog-louse	Julus.

Thirdly, Insects of an **Anomalous** Generation, such as have in their production under-gone several Mutations: Such as are generally known by the name Maggot, as,

1. Such as are without Feet in their first production from Eggs, as

Maggot	Shining fly Magot	Wasp Maggot.
Bee-Maggot	Gentile	

2. Such as have six Leggs, or more, as

Libella Worm	Caterpillar	Smooth Caterpil-
Cadew	Silk worm	lar
Straw-worm	Geometra	Palmer worm
Strait Beetle	Skipping worm	Bear worm.
Whirl-worm		

Fourthly, Naked winged Insects, which in their productions go under several Notations, which may be distributed into.

1. Such as have **Membranaceous** Wings, consisting of thin transparent film, being bred of Maggots, or Worms without Feet, as

Bee	Wasp	Ant fly
Honey Bee	Hornet	Emmet
Drone Bee	Fly	Gnat
Humble Bee	Dung-fly	

2. Such as proceed from Worms with Feet, as

Grafhopper	Bolthead	Crane-fly
Butter-fly like-fly	May-fly	Shepherds fly.
Dragon fly		

3. Such as have **Farinaceous** Wings, or covered with a mealy substance, being many varieties of them for colours and magnitude, under these kinds of

Butterfly	Moth	Hawk Butterfly.
-----------	------	-----------------

Fifthly, Sheathed VVinged Insects commonly called **Scarabs**, or Beetles, as

1. Such as have one or two Horns, as

Rhinocerot	Bull fly Beetle	Knobbed Horned
VVeevil	Goat Chaffer	Beetle.
Stag Beetle		

2. Such as have no Horns, as

Common Beetle	Grey Beetle	Death Watch
Dung Beetle	Green Chaffer	Lady Cow.
Dorr		

3. Such as have half sheathed Bodies, and long Wings, as

Earwig	Cantharides	Glow worm fly.
Water-scarab		

Voices of Bees, Worms, Serpents.

The **Bee**, Humeth, Huzzeth.
 The **Grasshopper**, Chirpeth, or Chipeth.
 The **Cricketh**, Creeketh.
 The **Serpent**, and **Adder**, Hisseth.
 The **Beetle**, Busseth.
 The **Frog**, and **Toad**, Croaketh.
 The **Worm**, or **Locust**, Grilleth.
 The **Wasp** and **Hornet**, Bumbeth.
 The **Bile**, Breezeth, or Brilleth.

LXII. He beareth Argent, a **Bee-hive**, Or, beset with **Bees**, diversly volant, Sable. Born by *Rose*. Or else **Semy de Bees**, diversly volant. If the Bees were all Flying one way, then to say **Semy de Bees volant**, signifies as much as if the Field were all filled with Bees. You will see a rule for the word *Semy*, lib. 4. cap. 1. numb. 38. 39. The true shape of the Honey Bee; see numb. 51.

The **Bee** is a cut-waisted Creature, having an Insect in the middle of its body, it hath four Wings, six Leggs, two Fauings, one Beak, or Bill, without any Blood, or Breath, Intrails few, only a certain pant, moving or stirring (as the Heart, or Brain doth) by which they are refreshed and made lively, quick and apt for use: They are generally yellowish, or black garnished with divers colours, all of one form and shape, but differ in quantity, sex, beauty, quality, employment and labour; care and providence.

They make their Honey-Combs, of a gummy moist liquor, or glutinous substance, thick, clammy and rough; which they lay for a Foundation; then cover it over with another layer of Wax, or Pitch, made with Gum and Rosin; over that again, they lay **Propolis**, which we call **Bee-Glew**. After this they set up the Cells for their **Kings** and **Princes**, in the highest place being large, fair, and sumptuous; and cunningly wrought of the most finest, and purest Wax.

Then each other Comb, contained four orders of Cels, the one for **Labouring Bees**, the next **Drones** possess; the next for the **Issue** of the Bees, and the last for **Honey making**.

Observations and Terms used about Bees, and Honey.

27. A **Hive**, is the little House into which the Bees bring their Honey.

A **Swarm** of Bees, is a multitude of Bees knit together in, or on any place. Also the increase of a Stock.

The **Stock**, or Store are the old Bees from whence the new Swarm hath proceeded.

King of Bees, is the Bee as rules all the rest; or the Queen-Bee.

A **Drone**, is a Bee that hath lost his Sting, and will not work, but liveth on the Labours of others.

The **Comb**, or **Honey-Comb**; is the Cells in which the Honey is laid.

Wax, or **Pitch**; is the substance of which the Comb is made.

Propolis, or **Bees-Glew**, is that which the Comb is last covered withall.

Bees-Eggs, Eggs like Ants-Eggs, which come to be young Bees.

Nature of Bees are hot, & fiery, therefore Honey is so, though extracted out of cold and moist flowers.

Sex, are Male, and Female, and breed by procreation.

Bees are bred by the Females blowing their brood in the cells or holes of their Combs.

Stock, is the whole company of Bees in one Hive.

Swarm, are young Bees, coming out of the Hive, they were bred in, to find a new place to abide, and work in.

Dale Bees, are the bigger, which we call Drons, they work not, but live on the labour, of the rest.

Female Bees, are the lesser working Bees.

Weak, and **Poor stock**, when but few Bees in it.

Drone-pots, things made of Osiers, the twigs set so close that drones cannot get through, yet wide enough for the Female Bees to go in and out.

Bees-blow, or breed a small thing 'less, then or as little a Fly-blow, which come to be as big as a great Maggot, and coloured brown, and about 18, or 20 days, they come forth.

Chilled, starved through cold, benumbed.

Beak like a Gnat, by which they suck, and draw up Honey, and carry it home in a bladder.

Combs are made by holes on both sides, not one against another, but placed triangular, one against three.

Ring the Pan, when the Swarm is all out, not before.

Stings, the Bees weapons, which they loose not, in stinging one another, for their skin is dry, and thin, that their Spears come away again, without hurt; but in stinging thick and moist skinned creatures, they leave their sting behind them, and die, for their intrails come forth therewith.

Bees-stocks may be bought, lent, given, or kept to part, and will prosper, if carefully looked too, but are not to be stolen.

Removing of Bees, from place to place, is best in February, or a little before, they begin to gather Honey; and set the side fore-most, that was fore-most before.

Queen-bees, being lost in stocks and swarms, the same shortly perish, and come to decay.

Bees not working, and yet being good store, shews they are either annoyed with dead brood, or disturbed with enemies, as Ants, Mice, and the like: or else have lost their Queen, which causeth them to make a mourning noise.

Hives must be covered with Boards, to keep them dry, for wet or rain will decay the Hives, and the Bees work.

Place your Hives two foot or more, above ground, let the Bees fly to the Southward, keep winds from them, by trees or other shelter, neither let the Sun shine hot upon them, lest their work be in danger of melting.

Salt

Salt laid in the Hives on the places they stand, will quicken Bees, and put vigour into them, if you find them fainty and foggy, lazy or dull.

Enemies to Bees, are Hornets, Swallows, Titmice, Martins and the like, besides Wasps, Robbing-Bees. Their lesser are Emmets, or Pisimires, Spiders, also Toads, and Snails, all which are noisome and hurtful to Bees.

Bees that are **Robbers**, are commonly fat, and will not labour.

Stocks may be known to be full or empty of Bees, by looking into them morning and evening, or by giving the Hive a knock or phillip, if there be store they will rush a pretty while; if few, they will give a little quick sound.

Bees come to **Decay**, & be lost many ways, a boisterous winds, by Faintness, by Robbers, by Fighting, by Rotten Combs, or by dead Brood, and other Putrifaction.

Dead-brood, are young Bees-eggs, that come not to perfection, but putrify, and infect the cells or holes, they lie in.

Hives in a smoaky or bad air, will not thrive.

Swarms, expect in *May*, if the Year prove warm and kindly.

Swarms knit on Boughs of trees, may be shaken unto the Hive, if ferled on a place not to be shaken, then sweep them into it with a little Broom or Green bough.

Set not a **New Swarmed Hive**, neither near the old stock it came from, nor to another Swarm set up a little before, for fear they creep together.

Little and Poor Swarms may be united, and put together in one Hive.

Great and Forward Swarms, going together, may be seperated, and knocked gently out of one Hive into an other, ready trimmed, and drest.

Two Swarms are apt to fight, and destroy one another, for want of a Queen, or having two Queens, they will strive which shall Govern, till one be kill'd, and then they will be at peace.

Swarms will be apt to fly away, when Honey dews fall, for many Honey dews fall in Gloomy weather.

Feed your Bees, with Honey, till they have gotten some provision in their Hives, this will give them content, at home and so keep them, from straying abroad.

Times to Feed Bees, is in the Spring, and Summer, in cold or wet weather, or over dry seasons for then Honey is not to be gathered abroad, then feed them, else they may starve, or pine, or be out of heart, and not able to work.

Driving of full and fat stocks, by setting one Hive prepared with Honey, upon the other full of Honey and Bees; then knock or rap on the under Hive, and all the Bees will go up to the empty Hive.

Bees Swarming in the **Woods**, in hollow trees, and being there for some time, and having gotten provision in good quantities, are hardly and with much ado gotten from thence.

Bees newly gon into **Hollow trees**, will the sooner be gotten out, by putting a prepared Hive at the hole, and disturbing them by smoak, or knocking the tree, and so you will make the Bees run up into the Hive.

*

Prepared Hive, is how to dress the Hive when it is new, which is to make them smooth or clean, by cutting of the ends of twigs or straws, then rub it with Bean, Oak, Willow, or other sweet leaves, and then stick the Hive with sticks, cleft in four quarters taking off the edges, and stick them bendingly from the top, to almost the bottom; and other like stick set cross: and when the swarm is ready to come, sprinkle it with Honey, or other sweet thing, as Wort, or Sugar dissolved in fair water, which will make the Bees take a better liking to the Hive.

Provoke Bees to **Swarm**, and go into their Hive, if they hang out: Is by moving the Hive up on that side where the Bees ly out, and by stirring, and moving them, and smoaking them, it will make them go up into the Hive.

Bees in Winter, when they stir not, eat not, but flee: therefore, are not to be fed in that season.

Before they **Swarm**, the Males or Drones, will commonly play forth, three or four days, and the Bees will play **Swarm-play**: and sometime you may see the Queen come out and in, before swarming.

Poor stocks, are to be housed in Winter, or keep them close by putting stones to the Hives mouth, to prevent Mice.

Always in Snowy weather, shut up the Bees in Sun-shine, else they will out, and be drowned.

Several sorts of Bees and Flyes.

28. **THE Drone Bee**, these are great bellied Bees, good for nothing, that bestow no pains in gathering Honey, but live upon the Labour of others. He is of a more shining black than the working Bee, and without a sting.

The **Chief Bee**, are very great, and black, having a larger Belly, and bulk, then the true Bee; yet less than the Drone, which also live upon the Labour of other Bees, and do nothing themselves but eat and devour.

The **Wasp**, it is a kind of Insect, they are swift, living in routs and companies, having a long body, enriched with four Membranous VVings: having six feet, of yellow colour, glittering like Gold; garnished with divers black spots all over the body in form of a triangle. They make a sound as Bees do, but more tearful, hideous, and whistling, and have sharp stings in their Tails. They proceed from a Worm, like a Maggot, or Gentle, white, which being laid in the Sun, will after two days be able to fly about; see chap. 10. numb. 11.

The **Wormet**, is a kind of great VVasp, engendred (as some affirm) from Horfes; their Sting will raise a Carbuncle, with a vehement inflammation of the whole part about. It is a yellow or Orange-coloured Bee, with a long Tail, twice as big as the common VVasp, they have four VVings, the inward not so long as the outward, which are of a dark brownish chestnut colour; and the feet of the same colour, their Breast and Shoulders are of Their Belly is tyed to their Shoulders by a fine thread, being yellow, beset with a row of brown specks, having

tain clites, or flits on both sides, by which they can either draw in, or let out their Bodies. They make a sound, or Buzzing noise, more hideous and dreadful, then the Wasp. See chap. 18. numb 155.

The **Cantharides**, or **Spanish fly**, of which there are two sorts the great, and the little; the greater are black grots and unwieldy like **Beetles**; they are of sundry colours and changeable hew, with Golden streaks, or Lines, crotling their VVings; but generally of a glittering green; some reddish, or Murrey; but all of a glittering brightness, and marvellous shining gloss.

The **lesser sort**, are lean and thin scraggs, and starvelings; hairy, heavy, sluggish, and their Bodies and heads somewhat long and hooked, eyes black, their Wings growing out from the middle of their Loyns, being marked with two silver specks, or pricks, and some few white spots: Feet and Legs small and long, of a Vermillion red, or purple. They are breed of a little worm, found in the sponge of a Dog-brier, and from **Caterpillers** of the Fig, Popler, Ash, Rose, and Olive-trees. In the night they appear like Flying Glow-worms, with Sparkes of fire in their tails.

The **Dung**, or **Dun-fly**, of some called the **horse-fly**, or a **Bumley**, this makes a great humming noise when he flyeth, and in the summer time doth grievously vex Cattle, having a stiff and strong Sting. They are of a reddish-Tauney colour.

The **Stone**, or **May-fly**.

The **Red-fly**.

The **Hooze-fly**.

The **Cawny-fly**.

The **Cloudy**, or **Blackish fly**, are much larger than Ant-flies, and with their Blackness, have a gloss of blew, on their Bodies, and Tails: these proceed from Maggots, or Gentills, that breed of Putrified Fleth. They are called **Black Bees**, and are as big as the **Honey-Bee**.

The **Uine-fly**.

The **Canker-fly**.

The **Beet-fly**.

Ant-flies, are small black Flies, with Bodies like to the **Ants**, which towards the latter end of Summer, have wings growing out of their sides, by which they Fly away.

The **Palmer-fly**.

The **Oak-fly**.

The **Dore-fly**.

The **Bumbo-Bee**, is a large Bee, bigger and fuller Bodied, then a **Wasp**, and little less then an **Hornet**, the Body is also hairy, the Shoulder, and Back equally divided with an over cross line, from the insect, or cutting in at the waist, to the end of the tail, it hath four joynts, the first set with yellow hair, the second with black, and the two last with white, the head and feet, and wings, as in other Bees. This makee a more Humming noise, then the ordinary Hive, or **Honey-Bee**, from thence it hath its name.

He that will take upon him to describe, the several sorts of Bees and Flies, will take upon him an endless task, for the several kinds are innumerable; and many, I have seen, of which I could never learn the names, though I have made diligent enquiry after them.

LXIII. He beareth Azure, an **Harvest fly, volant, Argent.** Born by the name of **Butterfly**.

B the like, between 3 Roses, A in chief a crown O born by the name of **Edwards of Chester**. The same born by Sir **Robert Pounderling Knight**, of whom he is paternally descended **Gmills** terms this an **Harvest-fly**, in Pale, *En arrive fol. 235.* which term he adds to all flying Bees, or **Butter-flies**.

LXIV. He beareth Argent, a **Bee volant, Sable,** born by **Bees**.

The **Wasp**, hath the tail part more sharp at the end, bending down with a sting in it; the body of a bright yellow, the wings more whitish. Note that all insects that have stings in their mouth and tail, have four wings apeece, and none have above two that carry their weapons in their mouth: The first for revenge, the latter to feed themselves.

LXV. He beareth Argent, a **fly volant, Sable.** These are your black **August flies**, that are troublesome then, to all creatures: for they will be before us, both at our meat, and drink.

If it stand in the posture, as the **fly** in the base part of this square, it is only termed, a **fly**; being it is neither flying, nor going, but standing.

A 6 Bees volant, S born by **Trabajarn of Emlyn**.

A bend between 6 such S born by **Beelton of Pee-shon**.

S a Lyon Rampant, O with a fly, in his right paw, A born by **Premeu**.

LXVI. He beareth Argent, a **Butter-fly, Gules;** bodied Vert. The **Butter-fly**, of what colour soever the wings be, hath the body generally of a yellowish brown, and sometimes of green, and red colours: in standing, their wings are always erected or upright on their back, and are of great variety, both for colour and magnitude. The great **Harvest-fly**, and fine coloured one, are brown, very rough and hairy. This is born by **Wormsly**.

The **Ante Sable**, I have set in the base point, that you may see the shape and proportion of it, called also an **Emmet**, or a **Pismire**. Some others blazon it a **Butter-fly**, Vert, winged Gules; in base an **Ante Sable**.

A 11 Antes, or Pismires, 3. 2. 3. 2. 1. S by the name of wiseman. Others blazon it **Semur de Emmets**, as much as to say, the feild full of them.

LXVII. He beareth Argent, a **Butter-fly volant, Vert; Wings Sanguine, Spotted Sable:** in base a **Lady-cow**, proper. The **Lady-cow** is all red, having 2 black spots in the cases of the wings.

Butter-flies of all sorts, proceed from the several kinds of **Worms**, that breed in Gardens, Orchards, Woods, and Fields; and are as diverse in bigness, as colours. For there are white, grey, yellow, red, blew, green, and these again Spotted: but above all for beauty, it is the fine coloured one, whose wings are of a reddish brown, painted with eyes like to a Peacocks tail, with variety of colours.

LXVIII. He beareth Vert, a **Butter-fly volant, Or, Spotted Sable,** born by the name of **Canads**.

B 3 such A born by **Beelton**.

G 3 such O born by the name of **Wander**.

B b

LXIX.

LXIX. He beareth Sable, a **Moth erected**, Or; **Winged** Argent: In base a **Beetle-fellwise**, Gules; **Scaled**, or **Winged**, Argent. I term this Scalded, because that under these shells that cover her body: lying close her wings are, which when they are opened, and lifted up, the wings both appear, and have liberty to play, and bate the air; by which means she flyeth at pleasure. See a **Beetle** close in her shell, or scale, *chap. 10. numb. 56. 57.*

The several sorts of Butter-flies, and from what Worms, they proceed.

29. **The White Butter-fly**, with three black spots on the wings, with a green cut wasted body, after the manner of Bees; its original is from the green Caterpillar worm, which feeds on Cabbish-leaves, which in Autumn, Husks (or incloseth it self, in the out skin, which turn to a Husk, or hard shell) where it lieth all Winter and in the Spring, out of the said shell (opening at the end) proceed a white Butterfly, as aforesaid. The form of the shell, which the worm drieth unto, see *chap. 10. numb. 65. and chap. 18. numb. 158.*

The **Parvest-fly**, or the curious coloured Butter-fly, that flyeth about in the Summer, and is the largest of all the Butter-flies that ever I saw, hath its original from the horned worm, set forth in *chap. 10. numb. 7. S. 2.* which in the latter end of Summer, spins a web like a cob-web, but more strong, like to Gunned Silk: in the middle whereof it works it self into a Husk of the forme of an egg (as the Silk-worm doth, of whose species it is) and there lieth as dead all Winter, and in the Summer breaks forth into a curious coloured Butter-fly, much larger then the common white Butter-fly.

The **Large Moth**, is of a whitish-yellow colour, and proceeds from the Silk-worm, figured, *numb. 51.* All kinds of Moths have their wings compressed, lying more flat on the body, whereas the Butter-flies have them erected.

The **Hidling Moth**.

The **Hawk-Butter-fly**, hath the wings lying flat on the body, and are short, and the tail broad.

The **Small Moth**, which usually eateth garments, coverings of stools, cushions, and furniture of beds. These in the eating of such things, are small white worms, like **Bits**, which are nothing else but **Flea-Bits**, which in the end turns to **Fleas**, and they are the original of these small **Moths**. And that these kind of Moths do proceed from **Fleas**, I am fully satisfied from an experience I found out in my own house: for keeping of Pigeons in a Closet for a certain time, and after removing them to another place, had the closet cleansed with as much care as might be, yet notwithstanding in the Spring following, the walls and windows were as full of these small Moths, as was admirable to see, of the dung they could not proceed, for that was gon; so that I could conceive no other thing from whence they should proceed, but from **Fleas** crept into crivesses and holes, where they lay in

Husks, which turned to winged creatures, as in other Worms.

The **Wasps** do first come from Horses, and Bees from Bulls (saith Mr. *Topsell*) from whence he observeth that little creatures are the off-spring many time of the noblest: and this is seen in their incredible swiftness of flying, and ardent desire of fighting, shews them to proceed from laborious parents.

All **Bees** of the Favificious or Honey kind, are produced from a Maggot sharp at both ends, and from **Worms** or small **Haggots**, bred in excrescences of Oaks. And from the Tufts of Briars, are produced the smaller sort of shining Fly's or Butter-flies, many of which are **Seticaudes** hairy, or rough tailed.

All of the **Wasp** kind, are from **Haggots**, or **Gentils**, that have broad and flat tails.

The **Libella-worm**, which liveth in the water, and is naked, produceth the **Dragon-fly**.

The **May-fly**, proceeds from the **Cadew-worm**, or **Straw-worm**, which liveth in the water, and is like sheath or case, with little straws or sticks adhering to it.

The **Beetle**, **May-bug**, or **Chaffer**, is produced from the strait **Beetle-worm**, and **Whirle-worm**, the one being straight, the other having his tail inverted, and turned under his belly.

LXX. He beareth Argent, a **Grass-hopper**, Vert, and a **God-Bee**, proper. The Grass-hopper by his noise of chirping, gives notice of the harvest, it is St. *Thomas Greshams* Crest, who built the *Royal-Exchange* in London.

The **Locust**, is such a kind of creature, but larger by much, which is a great destroyer of Corn, the sending of them was a great *Plague to Egypt*, *Exod. 14. 14. 15.* and will be to any Nation. Their colour is brown-grey.

A 3 Grass-hopper, V born by *Hopperly*.

The **Cricket**, is in form, and shape, nothing different from the Grass-hopper; and therefore may not unfrequently be called a **Fire-hopper**; loving to be near fires: its general of a grey colour, some I have seen of a pure white.

The **Flea**, is very small, yet is in form of a **Grass-hopper**: leaping and skipping from place to place, by the strength of its hinder thighs. It is of a dark reddish colour.

The **God-bee**, or **God-fly**, or **Dor-breeze**: are several sorts of creatures, made much after this form, being round headed, square in the body part, with a worm-like tail, having sharp pricks at the end; six long and slender legs and two wings on a side, of a hard substance veined after the manner of Silk, Net-work, Pellicles, fine skins.

The **Wise**, is much larger whose body is of various colours, some yellow, others white, or blew, green, and grey, all very beautiful to see, having the colour like the shining about a **Peacocks**, neck.

The **Spinner**, is the lesser sort of them, having but a small body, and slender wings, but very long legs, and are generally of a yellowish colour. *chap. 12. numb. 4.*

The **Gnat**, is a small slender fly, with long legs, hath a sharp and shrill noise, when it flieth; and will bite or sting very sharply, making a red spot, where it wound the flesh, like a **flea-bite**.

A a Brize B, born by the name of *Brizell*.
G 3 such O born by *Funscike*.

30. **W**E come now to such creatures as are termed **Sliders**, those may be said to be such, which having no feet at all, yet do move and glid from place to place, by a certain motion and moving of the body. Some more swift and speedy, other more slow: And of these also, have for a covering, their skin only, others skins and scales, and others both skin and shell, of the former sort are these now following.

LXXI. He beareth Argent, in chief, a **Finned Serpent**, (or a **Water-Serpent**) **reversed**, **imbowed** in manner of an Annulet, biting of his tail, Gules. Some term it a **Serpent reversed**, **biteing its tail**; by reason the heads lyeth downwards, contrary to that in base, which is blazoned: (as *numb. 82.*) and *chap. 18. numb. 102.*

In base an **Adder**, or **Caterpillar-Serpent bowed**, or **imbowed**, (or enwrapped round) Vert. or after others an **Adder**, or **Snake**, **twisted round**. The *French* do give it several denominations, as a Serpent turning, circling, wreathing about, winding round, turned in a circle line **Spiral** like, a **Serpent Spirally**.

A a Serpent biteing his tail, V born by *Euyer*.

A a Chevron S between 2 crofs patees fitched, G and an Adder bowed imbowed, V by the name of *Whitly*.

B on a bend O 3 Snakes twisted, round, V born by *Cassleton*

LXXII. He beareth Or. In the chief, a **Serpent**, **regardant**, with his **Taile imbowed**, Azure. *n. 59.*

As this hath his head above his body, so you shall find Serpents born looking back under the body, as if it were looking downwards, with its tail bending upwards, for the tail ever bendeth contrary to the head: then it is blazoned a **Serpent**, or **Adder regardant**, **reversed**, with **Tail imbowed**. See *numb. 46.* This is born by the name of *Prudence*.

In the base, an **Aspe**, or **Adder**, stoping his ear, with his tail, Gules. Some term it from the *Latine* word *ob-tur*, to shut, or stop; an **Adder obturant** his ear.

The **Aspe**, is that venomous kind of creature; that when he would not hear any thing, he puts one ear to the ground, and stoppeth the other with his tail, from whence the Kingly Prophet *David*, hath his saying, *that like the deaf Adder, they will not hear the voice of the Charmer, Charm he never so wisely. Psalm 38. 4.* This is the Badge, or Emblemen of deafness, or of such obstinate People as will not be Counsell'd.

V 3 such in Pale, O born by *Aspenell*, alias *Aspandall*.

LXXIII. He beareth Vert, an **Adder**, or **Serpent bowed**, Or. (of some termed **Nodee**) others Blazon it **fretted**, in a form of a knot; others in **round fretting** himself. This is born by the name of *Novell*.

G The like O born by *Nathily*.

*

The **Serpent** will not give place to any other creature for sharpness of wit, *being full of Su'ty*, as *Moses* tell us. *Genesis 3. 1.* For besides his other exterior senses, he is cunning in preserving his life, in making choice of his lurking dens; in getting his food, hatching his brood, and in casting off his old slough.

LXXIV. He beareth Sable, a **Snake bowed**, with the **Head reversed**, Argent, or to say only **bowed reversed**, is sufficient to signifie, it looking downwards. This is born by the name of *Monaw*.

In base a **Serpent Torqued**, with the **Tail Annotated** or **Retorted**, Or. This is also termed a **Ser-Targant**, (or **flected** and **reflected**) with the **Tail twisted**. This kind of Serpent O in a B Field, is born by the name of *Vigilance*.

LXXV. He beareth Gules, three **Snakes bowed in triangle**, Argent. But three **Adders imbowed** and **fretted in triangle**, is the most properest term, and so the Welsh Bards blazon it, being a Coat belonging to one of the fifteen Tribes, or Families of great account in *North-Wales*: called *Edmwen ap Bradwen*.

Of Serpents in General.

31. **BY** the word **Serpent**, is understood, all venomous Beasts, whether creeping without legs, as **Adders Snaks**, or with legs, as **Crocodiles Lizards**; or more neerly compact Bodies, as **Toades Spiders**, **Wees**, **Scorpions**, **Lice**, as both *Cornelius Celsus*, *Plynie*, and others take it.

But in this our discourse, I shall apply the word, to those venomous creatures only, which crawl or creep, upon their Bellies: and have long tails, of which there are several sorts, which we shall thus in short describe.

Their colours are for the most part, like the place of their habitation, or abroad: I mean like the Earth they live in, as black ones, in dung; some yellow, living in Sandy Rocks; some green, living in trees, and fields; but generally they have spots on their sides, and Belly, like the scales of fish, which are both white, black, green, yellow, brown, and of other colours also.

The frame of their Bodies do not much vary, so that we may express their universal Anatomy, in one view; that is, they are inclosed, in a Kind of a Shell, or crusty skin, called a **slough**, having the upper parts on the back, and neither part on the bell, like a Lizard: their bowells long, and narrow: their heads like to a fish, and flat; never much bigger then the Body, except in monstrous, and great shaped Serpents; as the **Boas**.

Their tongues are forked, eyes small, if their tails be cut off, they will grow again; their heart is in their throat, their gall, in the belly; their stones in their tail; where they have such manner of places, for copulation, as Fishes; their teeth like to Saws, set double.

The **Adder**, its parts differeth not from the general description:

B b 2

description: it is black on the back, sometimes greenish, and yellowish; the scales more sharp, than of the Snake, they lie for the most part round, folded up together, like a rope.

The *Ammodyte*, is a Serpent larger than a *Viper* in the head, having a hard Wart on the upper chap, like a horn; it is fierce, and wild, of a sandy colour, with diverse black spots, and strakes, or small lines, on the back.

The *Aspe*, if he be angry, will swell in the neck, their eyes are red, and flaming, and there are two peeces of flesh, like a hard skin, which groweth out of the forehead. Of the *Asps* there is these sorts. The *Swallow-Aspe*, is like the colour of the Swallow-black on the back, and white on the belly. The *Athas-Aspe*, is of diverse colours. The *Dip-Aspe*, lived in mid-lands, far from water, have long and sharp teeth, like Boars, standing out; their scales are hard, and dry, and red, yet some affirm the colour of *Asps* to be various and diverse. The *Trundo-Aspe*, or *Small-to-Aspe*, is black and white; the *Pyras*, or *Spitting-Aspe*, resembleth an Ash colour, flaming like Gold, and somewhat greenish. The *Chetian-Aspe*, of an Ash colour, and green, and yellow; being the *Land-Aspe*. And the *Chelidonian*, or *Water-Aspe*, sometimes whitish pale, and green spotted, some red, some black in *Ethiopia*: and of a muddy dirty colour: and a fierce aspect.

The *Cockatrice-Serpent*, or *Basilisk-Serpent*, this is the King of Serpents, not for his bigness, but because he creepeth on the earth, half upright; besides his poison is incurable. He hath a comb, or coronet on his head, the eyes red, back blew, belly yellow, spotted with many white spots. *Cassiodorus* relateth the story of another Serpent, like a *Cockatrice*, that had a big head, too big for the Body, a long tail, two short legs, and feet with claws like to a Cat, it had a bunch on the top of his head.

The *Diplas*, it is a Serpent with black tail, the head is small, and so backward it groweth smaller and smaller: the tail exceeding little and cloven; the fore part is somewhat white, set over with black, and yellow spots. There is no difference between the *Diplades*, and *Alipours*, in proportion: but the difference of habitations, the first living in Salt Marshy places; and the latter, in dryer Countreys.

The *Dyrine*, or *Water-Snake*, is a vile stinking Serpent: they have very sharp scales over the back, of a blackish colour, the head is broad and flat, much broader in the head, than that part of the Body which is joyned to it, *Viper* like. See *numb. 77*. Under the scales of these *Dyrines*, breedeth certain flies, with yellow wings: which in the end, do eat and destroy the Serpent.

The *Hemorrhoe*. It is a kind of *Aspe*, or *Viper*, in the shape; for the head is larger then the neck, which is small, growing thicker and rounder towards the middle, and then again smaller towards the tail; which is very sharp and small; on the head, there is the appearance of a horn, standing backward. It is of a sandy colour, red flaming eyes: their scales are rough and sharp, making a noise, when they go on the Earth, which are all set over with black spots. Some ascribe to it two horns, and call it, the *Horned Serpent*, and that it is milk white, with fiery eyes. See *numb. 77*.

The *Cerast*, or the *Horned Serpent*; with their

scales, they make a sound in their going: the colour is branded like sand, yet mingled with an other pale white colour, as is to be seen in a Hares skin, upon the head, there are two horns crooked and wrinkled, like a Ram, they are more flexible, then any Serpent; having only a gristle, instead of a back bone. They have certain red stracks, cross the back, like the Crocodile of the Earth. Yet others say it is of a white colour, with black eyes, having two short horns, growing out of the eye-lids, the neck small and long, to the other part of the Body, the upper part scaly, of an Ash colour, yet mixed with black, the tail brown, and the belly whitish, with slender joynts. See *numb. 80*.

The *Innocent Serpent*, called *Lybie*, they are a Domestical Snake, and have two ears, like Mice; and black as a coal on their Body. There is an other called *Parca*, which is of a yellow colour, like Gold; upon either side, they have two lines, or strakes, which begins at the neck, and ends at the tail, besides these there are no Harmless Serpent, I could never hear off.

The *Pyret*, or *Cenchrine*: It is scally, upon each having a spot, which resembleth the form and colour of a Miller seed; not only the back, but belly, and whole skin, is of the same fashion: the colour of the scales, are dusky and dark.

The *Porphyre Serpent*, is a *Leviathan* Serpent, about a span long, or more; it is of a most beautiful and well coloured purple, the head is exceeding white, and it wanteth teeth.

The *Palmer Serpent*, doth kill with an unremediable poison: and it is also of a Scarlet colour, to the loyns, or hinder parts.

The *Pyret*, it is a Serpent which many take to be the *Diplas*: it is a Serpent that kills by heat, whereas the *Diplas* doth it by thirst. *Junius*, and *Terentius* thinks that the Serpents, which did sting the *Israelites* in the Wilderness, were *Pyrets*, being called *fiery Serpents*, because their biting was with a fiery burning. *Numb. 21. 6. Dent. 8. 15. Isa. 14. 29.*

The *Red Serpent*, this is a Serpent of the sea; it is a Serpent that hath gills, and fins all along the back, to swimewithal, like the Lamprey: it is of a red or purple colour, being full of crooked, and oblique lines; descending from the back, to the belly, dividing or breaking off the long line of the back, which beginneth at the head, and so stretcheth forth to the tail, their mouth little and short, the teeth sharp, and like a Saw: his gills like scally fish, and on his back (as I said) and upon the rim or brims of his belly, to the tail, are certain hairs growing, or at the least then small things like hairs, the tail is short, and one undivided finne. *Belonius* saith, they are red spotted with small dusky spots.

The *Sea-Serpent*: Of these there are several sorts, some are like *Lampreys*; some like the *Pyret*, and many others like the Serpents of the Earth (except in the head) for that is generally like the head of a *Conger*. It particularly hath one kind, in colour, and form, unlike the *Conger*, blackish, and dusky on the back, white on the Belly; the gills, and fins, like the *Conger*, but it hath a longer mouth or beak, which hath many sharp teeth, a smooth and pick'd skin, without scales: the Body over set, with spires: so as being a live, it is handled without danger. It is by *Plinius* called, the *Dragon of the Sea*.

The **Uiper of the Sea**, is in shew like other little fishes, about a cubit long, having a little horn in the forehead: of some thought to be the **Aranei**, or **Spider-fishes**, save that they have a sharp sting, in their head, and this an horn.

The **Sepedon**, or **Seps**. It hath a great head, and small tail, of variable colours, as in a peece of Tapestry: in somuch that some have thought, that it can change colour, like a Camelion. The length of it, is about two cubits: the head broad, the neck, thick, and tail thin, and slender, a sharp mouth.

The **Slow-Worm**, it is a Serpent that hath little eyes, or none at all, and is Deaf, not hearing at all, from whence it hath its name; the skin is very thick, the colour is a pale blew, or sky colour, with some blackish spots intermixed at the sides; it hath a smooth skin without scales, the nether eye-lid covereth all the eye it hath; the tongue is cloven, and black on the top. It is about a Span long, as thick as a mans finger, but slender at the tail. Some call it a **Blind Worm**.

The **Snake**, it is an home-bred Serpent, about five spans long, the head compares with the body, teeth above and below; in the neck are two blanches, with a hollow place between them; the back is blackish, and the other parts green, mixed with some white. This is called also a **Land-snake**, and hath no manner of Venom or Poison in them, for if they bite, they only draw Blood, there comes no more harm by it.

The **Hydra**, or **Water-snake**, the back is a blackish green, the belly yellow, and of a Golden colour; they are scally, and in swimming hold up their breast.

The **Uiper**, the head is very broad, compared with the Body; and the neck much narrower then the head; the eyes very red, and flaming; the belly winding, upon which it goeth all in length; it hath either two or four Canyne teeth, it hath no ears, the skin is soft, and somewhat yellowish, having upon it many round spots, with a kind of darkish colour stroak, or line endented, very small or thick waved, from the head to the tail, all along the ridge of the back; the tail curled, or rounded at the end, very small and sharp.

Echidna the mother of **Chimera** (as the Poets faine) was from the Navel upward, a beautiful Virgin; and from thence downward, a **Uiper**.

The **Jacule**, is a Serpent that flyeth as swift as a dart, and leapeth into trees, and what beast soever he meeteth with, he throweth himself thereupon, and slayeth it: the **Jaculus** is a **Flying-serpent**.

The **Scitale**, is a speckled Serpent, which shineth with such diversitie of spots upon his back, that all that look thereon, do wonder, and delight to see him.

The **Situla**, is the least of all Serpents, and is so little that unless he is seen when men trade on him, his venom is so forcible, that it slayeth before it be felt, and he that dieth thereof, feelth no sore, as *Lucan* doth write of it. Some call this a **Diplez** or **Diplas**, or a kind of **Aspidous-serpent**.

The **Sacer**, is a little Serpent, and yet great Serpents and mighty will fly from it, and avoid its society: it is but one cubit long.

The **Chelidos** is a Serpent the abideth both on the land, and in the water, *Isidore* saith, it maketh the Earth to smell well where it creepeth: it goeth straight out in Lim, and Body: for if it bow, it strains and hurts it self.

The **Ceneris**, is a Serpent that is very like the former, and doth as he doth, as *Lucan* reports of him.

Isidore saith that there be many kinds of Serpents, as the **Admodita** or **Amodice Serpent**: the Serpent **Elephantia**, which causeth such as are stung with it, to fall into a **Leaprofie**. The **Chamedracontes**, a kind of greenish blew Serpent. But having no further descriptions of them, I leave them.

LXXVI. He beareth Argent, a Serpent targent, Vert. **Devouring of a Child**, proper. This form of bending and rebending, either in Serpents, Adders, or Fish is termed either torqued, or torgant, the French term it wabeing, and turging in pale. See chap 18. numb. 103. This is born by the name of *Drummer*.

G the like A quartered by the Duke of *Tremzyle*, whose Daughter married to *James Stanley*, Earl of *Derby*.

To this may be added, the Serpents both double and single torqued. The first having as many bending as would make two Roman S's one below the other. The later being not much more then a single S, as the example I have set in this quarter, viz. G a Serpent double torqued A born by *Kiesemeter*.

O a Serpent torqued and crowned, S is a Coat quartered by *Scomberg* alias *Scharwnterg* of *Bavaria*, born by the name of *Van Stubenberg*.

Per Pale O and B two Serpent torqued, respectant, counterch: on a chief, A a Bird standing on a Rose slip proper Born by *Hulsen*.

G a Serpent targent, A is the Town Arms of *Ahlen*.

O the like B with 3 Roses on stalks in his mouth, O born by *Lynar*.

LXXVII. He beareth Argent, in chief, a Serpent Horned, with his tail imbowed, Vert. Some term it a Serpent Gliding, or creeping; with his tail imbowed, or turned round. This is born by the name of *Tra'main*. G 3 such in Pale, O born by *Wekler*.

In fesse, a Uiper, proper, or a Uiper extended, or gliding. This is a venomous creature, having a round head, and sharp nose, forked sting: the Body slender at the head; thicker in the middle, and small again to the tail, of a yellow colour, full of small blackish brown spots, with a kind of black indented list down it back.

The **Dypine**, is an other like kind of Snake, or Serpent, scaled all over, from the nose to the tailend, of a blackish colour, they have a most loathsome stink with them.

In base a Serpent, bowed, embowed, debowed with the head; that is, the Serpent is twice or thrice rounded, with the head, and tail proceeding out of the middle of the rounds. This is born by *Wrisbinger*, viz. V such a Serpent O.

This is contrary to the turning, or winding of the Body of the Serpent, numb. 4. That having the Body turned about the neck of it, the head then proceeding or extending from the middle of the rounds; But this is turned, or winded about the tail, which makes the head be on the out-side of the rounds. So that notwithstanding these kind

kind of ancient Blazonings given them; for distinction sake, that Serpent I hold better termed thus, **Bowed-embowed**, and **Debused**, with the head and tail from within: Or **Annulated**, or turned into Rings, and the tail issuant, or extended from the middle. And this **Bowed-embowed, debused** with the head extending (or proceeding) from the out-side of the Rounds.

LXXVIII. He beareth Argent, a **Serpent** crawling on his belly, with his **head**, and **tail**, **elevated**, and **imbowed**, Gules. I have seen a Serpent born in this posture, with a tuft of Moss, fixed on the head, middle, and tail, which is born by *Tilsley*. See *chap. 19. numb. 14*. Others a Serpent with his head, and tail elevated, and bowed, O in a Field, G by *Larvator*.

In base, a **Serpent Trochleated**, or **entwined round**, in form of a screw, the head **elevated**, Azure. There is an other like posture, of an Adder, or Serpent, enwrapping round, with its head proceed from the middle, and the tail contrary Imbowed as, *numb. 4. 77*.

LXXIX. He beareth Argent, a **Serpent Imbowed**, the head **debused** (or **surmounted**) of the tail, Vert. This I find several wayes termed, to set forth the right way of his bending; some say, **Imbowed** in form of a **Dragons tail**: others turned round, with the head over the tail. But to say a Serpent **Embowed-debused**; may suffice to expresse this kind of bearing without any other terms, or additions, in my Judgment.

A the like V is born by the name of *Bendenburgh*.

LXXX. He beareth Gules, the head of a **Ceraste**, or **Horned Serpent**, Or. In chief an **Adder**, the head **reversed**, the middle **Bowed-debused**, and the tail **circled**, Argent. Of some blazoned more briefly, an **Adder reversed**, **Bowed-debused**, and **embowed**. B 3 heads of Horned Serpent coupéd, O born by *Gnospat*.

LXXXI. He beareth Azure, a **Dragon Serpent**, **imbowed, debused**, and tail **reversed**, Argent. It is also said to have his tail **Imbowed, debused** and **reversed**.

 **Imbowing** signifieth a thing Bended, or turned round. **Debusing**, to have a thing to be over, or upon, or be under another; as the end of the tail in turning goes under the Body. And **Reversed** signifies the tail to bend backwards, and so down, not having the tail upwards, as in *numb. 79*. Yet some Heralds, terms this a wreathed, or twisted Dragon head Serpent, and his posture they blazon, with his tail turned upward, or Debrused reverting. Others call it a **Basilisk**, or **Cockatrice Serpent**. This is born by the name of *Esfringerser*.

LXXXII. He beareth Argent, a **Serpent Imbowed**, biting of his tail, Gules: adorned with two Collars, and Tufts, Or. Others call it, a Serpent in a circle, see *numb. 71*. This is born by the name of *Skrasset*.

LXXXIII. He beareth Gules, two **Adders imbowed**, and **fretted**, their tails turned after the manner of **Dragons** (or **Weebers**) Argent. This is the old blazoning; some term them, **Imbowed, Endorsed**, and **fretted**: but they cannot be Fretted, except Endorsed,

*

and Bowed: therefore needles to expresse them. Therefore the most compendious way is to say; two **Adders fretted, Tails debused**. This is born by the name of *Fretwood*.

LXXXIV. He beareth Argent, seven **Adders**, Vert, tied, or banded with a wreath, Or, and Gules. Others, **seven Adders erected, wreathed**; or a **Falce**, or Bung, or **Bundle**, of **Adders**; banded, or tied together. This is Born by the name of *Campainfield*. A such a knot of Adders B is born by *Harbut*.

LXXXV. He beareth Argent, a **Spider** in the middle of her **Cob-web**, Sable. There are several sorts of Spiders, the shapes and proportions, with their description, you will have in *chap. 10. numb. 70, 72*.

They are called, **Attercope**, **Spider**, and **Spinner**, and their Web; vulgarly a **Mattercopes-Nest**. They have all of them three joints a-peece in thier Legs; their Bodies like unto great welled basted **Pismires**, of a dark earthy colour. This is Born by *Cobster* of *Lombardy*.

LXXXVI. He beareth Or, a **House-Snail**, or a **Shell-Snail**, Sable. If they be of contrary colours, then Blazon it thus, a **Snale**, Sable; the **Shell**, or **House**, Gules. The Snail is said to want Eyes, and therefore grope out their way by their little Horns. This is Born by the name of *Snell*.

S a Fesse between 3 such A Born by *Shelley*.

O 3 House-snails shells, purple. Born by *Shellerworth*.

G a Snail-shell A and the same on a Crown O is the Coat and Crest of *Sheckheuser*, a *German*.

In the sinister chief is the shape of a small Vermin, or Man-troubler, called a **Louse**; it is much about the bigness of the figure in its full growth, which will be from a **Mitt** to that in twenty hours, or less, if warmly kept; they are devilish Biters, especially the little ones.

Of these Creatures there are three kinds, which are bred and brought up on Man's Body, each keeping its proper place and station; from which being removed they are not apt to do well, as being out of their own Sphere; There is the **Head-Louse**, which is of a brown, or yellowish brown colour, with some black on the back, it keeps only to the Head.

The **Body-Louse**, is more fat and plumper, having a larger pasture to range in, it is generally all white in the body, with a black list down his back, the Head is small and round, with two small Horns and six Feet fixed (not on the Body but) each side the Head, they are hairy, so that they will fasten upon any thing, let it be never so smooth.

The **Crab-Louse**, is contrary to the other two, whose body is round, and made like a Crab; these are of a whitish colour, are sore biters, and fast stickers where they fix themselves: They are nourished chiefly in the hairy parts of the Body of Man, as the Privities, under the Arm-holes, and on the Breasts of such who have Hair there.

The **Cike**, is another kind of **Louse**, (which is placed in the base of this square, it is contrary to the other, being a Companion for **Dogs**, **Sheep**, and **Cattle**; This Creature hath a round oval body, no head, but

but like two Lips coming from it by which they suck and bite. The back is generally of an earthy brown, and the belly white, as if two small shells of those colours were fixed together: From between them proceeds out of the sides six small feet; so that if they be turned on the back, they cannot rise without help, or much struggling to turn them over. They are as large, as a small or middle sort of Field-bean, or Pease.

LXXXVII. He beareth Azure, a **Scorpion**, Or. This is Born by the name of *Gressible*. The **Scorpion** doth much resemble the **Crab-fish**; of which there are two sorts; the **Scorpion** of the **Land**, and the **Scorpion** of the **Sea**.

The **Scorpions** of the **Earth**, are some Winged, and some without Wings; they are no bigger than a Bean, yet their Biting is most Deadly: They are of several colours, as the white, whose Biting is not Deadly. The pale-colour, whose Biting causeth Distraction, to be without Wit, always Laughing like a Fool.

The Greenish, causeth trembling, quivering and cold, as if the Patient were Freezing.

The Blackish pale, causeth after Stinging, heaviness, and a sorrowful Spirit.

The **Crab-like Scorpion**, is of a great Body; and hath Tongue, and **Takers**, very solid and strong, like the **Gamuel**, or **Crevish**, and is therefore thought to take beginning from that Fish.

The Reddish, causeth Thirst upon its Biting.

The Honey-colour, or Wax-colour, the Wings it hath on the back, are like the Wings of a **Locust**. Some have six Knots on their Tails, some have seven: some hold up their tails from the Earth, others draw them a-long, a little rowled together.

The **Octopus**, is a little Creature, not much unlike the **Horse-fly**, except in the Tail, which is distinguished into certain Knots or Seams, of a bright brown colour, with a sharp sting in the same: They have Arms (that is) two cross Forks, or Tongues, which come out on either side in the tops whereof, are little things like Pinners, by which it taketh hold on a thing; it hath four feet on a side, all like the **Sea-Crab**: See *chap. 18. numb. 153*. Some call it a **Scorpion-fly**, some a **Dragon-fly**.

A Cheveron G between three Scorpions reversed S by the name of *Cole*.

G 3 Pallets Varrev, on a Chief O a **Scorpion** erected S This Coat is in a Window in St. Giles's Church in the Fields in *Middlesex*.

LXXXVIII. He beareth Argent, a **fretted serpent**, wreathed; with his Tail **imbowed** **debruised**, proper. This Serpent of what colour so ever he is made, hath the Crown, or Crest, on the top of his head, ever red. This is born by the name of *Subale*. This is of some termed a **Cockatrice Serpent**, from the Crest upon his head after the manner of the Cockatrice.

The like O in a Field V is born by the name of *Stobbell*.

The several Terms for Turning or Winding of Serpents Tails.

32. **A** **Knobated**: See **Entwapped**, *numb. 74*. **Extended**, when it is straight, stretched out at length, *numb. 77*.

Bowed, or **Imbowed**, when it is turned at the end, as *numb. 72. 77*. termed also **flected**, or **reflected**, 59.

Bowed, or **Imbowed** **debruised**, when it turns round, and goes under the Rump-part, as *chap. 10. numb. 57. 58*: and *numb. 79*.

Retorted, turned too and again, one after another, as *numb. 74*.

Entwapped, or **Bowed-Imbowed**, when it turns twice or thrice round one within another, as *numb. 71*.

Intortant, wreathen, wrested, wrapped about, winded inwards.

Embowed erected, when the turning is upwards, as *numb. 46*. above the rump, 57, 58.

Bowed-Embowed **debruised**, when it turneth round and round and the end of the Tail, comes out from the middle of the round, as *numb. 77. 78. 4*.

Twisted: See **Torqued**, or **Entwisted**, *numb. 74*.

Knowed, when the Tail is fretted, in form of a knor, as *numb. 73. 74*.

Double Knowed, when it is fretted five or six times, as *chap. 18. numb. 106*.

Pendant, or **Recurvant**, or **Declinant**, or **Declivant**, or **Reclinant**. When the Tail hangs straight downward, as *chap. 12. numb. 80*.

Erected, or **Elevated**, when it is straight up above the rump without any wavering, or turning. Termed also **Reclivant**, **Uerlant**, and **Surfluant**, as *numb. 28*.

Targant, or **Torqued**, is when the tail hangs downward, wavering or bending, first one way, then another, as *numb. 76*.

And **Torqued**, with the Tail **wreathed**, as *numb. 74*.

Double Torquened, is when it hath so many bending and turnings in the body, as to make an S twice over, as *numb. 76*.

Erected, or **Elevated-Embowed-Debruised**, when the Tail turns upward, and bends round and goes under at the end, as *numb. 61. chap. 10. numb. 64*.

Erected-flected and **reflected**, or **erected Torgant**, when it turns upward, with a wavering, or bending too and again, *numb. 28*. and *chap. 10. numb. 65*.

Embowed **debruised** **torqued**, when the Tail turns upward in a round, and falleth down again under, with a wavering in the end, as *numb. 45. 60*.

Torqued, or **Torgant** and **Imbowed** in the middle, as *chap. 18. numb. 103*. else **Imbowed** **entwapped** **Torqued**; and some **erected-Imbowed** **Tuberated** **debruised** and **Torqued**.

Wreathed-embowed **debruised**, as *numb. 88*.

Fretted in the Tails, as *numb. 75. 83*.

Both

Bowed-debused and **embowed**, when the middle of the Tail is turned one over the other, and then the end of the Tail is bent, or turned round again, as *numb. 80.*

Bowed-debused, and **Counter-embowed-debused**, that is when the Tail turns down, and goes under; and above that, turns again a contrary way (at a little distance) and goes under, as *numb. 33.* Some term this, **double-embowed debused**, or else **double bowed**, and **fretted**, as *numb. 83.*

Bowed with the tail elevated, (or turned) over the

head, as *chap. 10. numb. 10.* yet some term this elevated, and turned over the head, onely.

Bowed-debused, the Tail **Surmounting**, or **Embowed**, the Head **debused**, as *chap. 14. numb. 41.* That is when the turn-part of the Tail turns not under, as in others; but in the turning lyeth highermost, or above the other part.

Bowed knotte d-debused, and **Torqued**, that is when the Head-part is imbowed, the middle is enwrapped round, and close together in the middle, and the Tail-part is flected, or bent too and again, as *chap. 18. numb. 103.*

T O

T O

The Right Worshipful

Sir GEEFREY SHAKERLEY, of Shakerley, Knight,
Late Governour of the Castle and Garrison of Chester.

AND TO

PETER SHAKERLEY, of Holme, Esquire; his Son and Heir:

Governour of the said City and Castle, and one of the Aldermen and Justices
of the Peace in the City, and for the County Palatine of Chester.

I Am unsatisfyed what Service to present you, that might satisfie for those many Favours
I have from time to time Received at your Hands; if you please to Increase my Know-
ledge, in Informing Me how I may better serve you, I shall be doubly Obliged: In the mean
time be pleased to Patronize this my small Dedication, as a part of service owing from
him, who is

Tours to Command at all times,

Randle Holme.

CH A P. X.

I N the progress of our former Chapters, touching
four-footed Animals, we have been as careful as
we could to give every kind of Creature (come
to our knowledge) their due, and natural forms,
and colours, with some short Descriptions: Yet there re-
mains some other sorts of exorbitant Creatures, differing
from others, either in Essence, or Quality; which want-
ing a place amongst the rest of Beasts, I have reserved for
this last plate.

Which may be ranked under these three heads.

Monstruous, Creatures above Nature.

Amphibuous, Creatures living in both Earth and
Water.

Bigenerous, Creatures of two kinds.

He beareth Vert, an Ape Seiant, holding up his
hand, Or: Collered, and Chained, to the sinister side
of the Escuchion, Argent. These kind of Creatures are
all hairy, and in all respects resemble Man: very intel-
ligible, being short of Man in nothing but speech; in lieu
whereof he hath a Tail. The Ape, Monkey, Ba-
boon, and such Creatures, are ever collered about the
middle. This is called an Ape, a Jack-an-Apes, of

which there is several sorts. all of them being of a sad
brown, or Mouse-colour. This is Born by the name of
Appleb.

The **Troglodite Ape**, is maned about the Shoulders
like Lyons, and are as big as great Weathers, or
Sheep.

The **Pigmyes**, are a kind of Ape, about three or
four spans high; which though some make them little
Men, yet *Alberus*, and *Nyphus* prove, that they are
not Men but Apes; by these reasons, that they have
no perfect use of Reason, no Modesty, no Honesty, or
Justice of Government; and though they speak, yet is
their language imperfect; and above all they cannot be
Men, because they have no Religion, which *Blas* faith
truly) is proper to every Man.

The **Satyr**, is by the Poets and Painters, described
to have Horns and Feet, and Tail like a Goat. Where-
as **Satyr Apes**, have neither of both. These are Mon-
sters of the Desarts, or rough hairy **Fawns**, in the shapes
of Men, with Tails like Horses, see *numb. 4. 5.*

The **Phyrr**, or **Sphynge**, or **Sphynx**: They are
hairy, and in the shape of Women; having their Breasts
like Women, pile and smooth without hair, and their
Faces

Donum Dñi Gafndi Shakerley de Holme Militis. H. Sculp: D. 8.

Faces round, with the favour, and visage like them. The hair brown of a swarthy colour, their Breasts spotted with red spots, like Mulletts. The **Sphinx**, which the Poets and Painters feign to have a **Haidens face**, **Lions feet**, a **serpents tail**, and **Eagles Wings**, is described in the figure, *numb. 29.*

The **Bearded-Ape**, or **Calitrich-Ape**, hath a long Beard, and a large Tail, hairy at the end like a **Lyons**; being in *India* all white; see *chap. 8. numb. 19.*

The **Prasian Ape**, having curled hair on their heads, and beards like **Men**, being all white, except their tails, which are two cubits and half long; their head and tip of the tail yellow.

An Ape chained and set upon a Log or Block of wood, proper. Is the Crest of *Middleton of Leighton.*

An Ape O face, hands and feet, proper. Is the Crest of the Lord *Saint John.*

A an Ape Seiant to the sinister, right hand between his Thighs, and an Apple in his left proper. Born by the name of *Gegenhofer.*

B the like Seiant collered, and the Apple in the right Hand A the hill O by the name of *Kotzill.*

An Ape Seiant, left hand down, the right holding an Apple, is the Crest of *Van Stecham of Brunswick.*

G an Ape Seiant collered about his Neck, the Chain pendant down his back between his Legs, and erected or supported a-loft, with his two hands O born by *Van Prag.*

Pet Fesse O and B an Ape Saltant collered A by *Van Katsel.*

II. He beareth Argent, a **Monkey**, proper, collered and chained, reflected over his Back Or, which is the Crest of *Gerrard of Brine.* In chief a **Caterpillar**, (or **Worm**), Vert. The colour of the **Monkey** is generally of a dusky, or black brown, called by some, a **tawny Ape**, by reason the true **Ape** hath none at all. But such Writers are not always to be credited, for there are **Apes** with Tails, as well as **Monkeys**, but not so often seen.

The **Monkey** is thought to be a kind of **wild Cat**, like the **Ape**. They are very sportful, and given to imitate the actions of **Men**, it is less than the **Ape**.

The **Hammonet** are less than **Monkeys**, not much larger than an old **squirrel**; brown on the back, white on the belly, having a long hairy Tail, his Neck almost as thick as his body; for which cause they are tied by the Hips, that they slip not the collar; they have a round head, and Face like a **Man**; but black and bald on the Crown, his stones of a greenish blew.

The **Coxolipis**, is another kind of **Monkey**, whose Tail is only hairy, at the end bushy.

The **Hartine** (or **Cephus**) **Monkey**; their Feet and Knees, and Hands, like a **Han**, the Face of a **Lion**; some part of the Body like a **Panther**, being as large as a **wild Goat**, a long Tail; their colour is divers, some black, with white spots; some yellow, some tawney, some cole-black. Yet for the most part the back to the Tail, of a fiery colour, with some yellow aspersed amongst them; the Snowt white, with certain Golden-streaks, like a Collar, going about the Neck. The Breast, Neck, and Belly white.

G on a Hill in Base V a Monkey A collered, the Chain erected O and for his Crest on a Crown A the same Seiant; which are born by the name of *Lembach.*

G on a Hill in Base O the like Saltant to the sinister ster A crowned the Chain erected to the dexter Chief O by the name of *Katzenstein.*

2. **N**OW a word, or two of the **Caterpillar**; with some other sorts of **Worms**.

The general name for **Worms** having more than 6 feet, are **Cater-pillars**; because they are the only destroyers of **Trees**, **Leaves** and **Herbs**, though there be many kinds of them; yet all are of this, or the like kind of making: Their whole length consists of divers Incisions, which the Latins call *Annuli*, or *Rings*; to the three first *Annuli* next the head, are fixed three pair of slender crooked Legs, to every other Ring of their Body behind, they have two short thick Legs, and at the last Ring of the Tail are two Appendages, or Stays; which in their progressive motion by help of their hinder feet and the Appendages of the Tail, do first gather themselves up into a Loop, then thrust their heads forwards.

The **Caterpillar**, is derived from the Egg of a **Butterfly**; which comes to a kind of greenish **Worm**, after the make of the figure, which the next Summer goes to a **Butterfly** again. The *English* call all sorts of creeping **Worms**, of what kind so-ever, by the name of **Cater-pillars**. If they be Eaters, or destroyers of **Leaves**, **Fruit**, or **Herbs**: Yet of these there are several sorts, some hairy, others not; some jointed, others plain; some are rough hard and stiff, others soft smooth and tender: Some have **Horns** on the Head, or Tail, others no **Horns** at all. Some have no feet, others few, others many feet; yet none exceed sixteen. Some have a bending swift pace, like unto **Waves**, and others keep on their way, plainly, softly, by little and little, without any great haite. Some cast off, or change their skin yearly, others change none at all. Some cease from eating and motion, are transformed very strangely into a **Vermin**, or **Worm**, who being covered with a hard crust or shell, ly as it were dead all Winter, and from these comes in the beginning of hot Weather, our usual **Butter-flies**, of all sorts and colours.

The **Canker-worm**, or **Cater-pillar**, hath many feet on both sides, is of a reddish yellow, and runs very fast, they are generally found, at the foundation of **old** decayed Houses, or roots of rotten **Trees**, they are called by some, **Devils Worm**, or **Hundred feet**, see *numb. 14.*

The **Green-Worm**, or **Horned-Tail Caterpillar**, it hath a Circle inclosing round both his Eyes, and all his feet, having a crooked horn in his Tail of a blackish red, with spots and streaks going over-thwart their sides half white half purple, the little pricks, or hair in the spots are inclining to red, the rest of the body, is altogether green: See *numb. 7.*

The **Elder**, (or) **Cater-pillar**, or **Worm**. So called from its feeding only on the **Elder**, or **Alder-tree**. It is in all respects, like the green horned **Worm**, before-mentioned; it is altogether green, wanting those over-thwart cross white marks, or spots, and the other small pricks:

The Cabbach, or Lettice-Worm: This is a Caterpillar of a greenish colour, which when *Autumn*, or the fall of the Leaf, draweth on, is turned into a certain Sheath, or Case, being of a very hard, and horny substance, of colour very brown, which in the Summer following, turns into a *Butter-fly* all white, with black spots on the Wings. These Worms feed altogether upon Pot-herbs; especially those that be soft, from whence it is termed, *Eruca Laeucaria*, the **Lettice-Caterpillar**. See *numb. 16.*

The Oak-Worm, of some called Dew-Worm: This is the least sort of green Worms, and liveth and feedeth upon the Oak-tree leaves especially; it is scarce so big as a *Baggot*, or *Gentle*, and something like it; when cold Weather approacheth, they fold themselves into a rude, plain, and nothing curious Web, scabbard, or case, of a greenish colour, tending to red: They all Die in the Winter; they have all ten feet a-piece; as all they have, which go bending themselves upward.

The Brandling, is a coloured Worm, and are commonly found in an old Dung-hill, Cow-dung, Ho is dung, or Tanners bark.

The Lob-Worm, or Garden-Worm.

The Gentle, or Baggot: See *chap. 18. numb. 148.*

The March-Worm.

The Flag-Worm.

The Green Gentle.

The Red-Worm, is a long small Worm, and is usually found under stones, and at the roots of Plants; especially at the roots of great Docks: They generally lie wrapped up in a round clue.

The Cod, or Case worm.

The Bob-Worm.

The Cad-worm, or Cadice-Worm, of some called a *Passe*, or *Cock-hair*. They lie in a gravelly husk found under stones in small Rivers.

The Tag-tail, is a worm with a yellow tag on his tail, all its other parts of a pale flesh-colour; it is something less than half an inch long: They are found in marled-grounds and Meadows in fair weather, but not to be seen in cold, or after rain. Some describe it to be a red Worm, with a yellow tip on its tail.

The Colewort-Worm.

The Dogs, or Dox-Worm.

The Squirrel Tail-Worm, is of a colour with red head, and streaked down the back, and a broad tail.

The Gub, is a general term for the smaller worms that breed in the Earth.

The Beal-Worm.

The Bite, is a very small white worm, bred in old decayed Cheese. It is so small that it is scarce discernable, but by its motion.

The Cassi, is a Worm bred, and is often found in rotten wood; it is an Insect with six feet, much resembling a Caterpillar.

The Fruit-worm, such as are bred in Apples, Nuts, and such kind of fruit; it is a worm that is white; see *chap. 18. numb. 149.*

The red Wine Caterpillar, or Willow-worm; from its feeding chiefly on the leaves of Willows, his Lips and Mouth are yellow, his Eyes black, his Forehead purple, the Feet and hinder part of his Body green, his tail two-forked, and some-what black; the whole body yel-

low, yet stained and dyed, with thick red Wine all along the Shoulder-blades, in form of a *Burgonian Cross*, or letter X; down to the Tail. This Worm in Latine is called *Eruca Vinula*.

The Signe-shout Caterpillar, so called from the fashion of the head, especially of the greater sort; they are of a yellow blackish colour, having round white spots on their sides; they feed on the leaves of the marsh trefoil; which they consume with an incredible celerity.

The Smooth horned Worm, on the Herb called the wild Night-shade, there is found a smooth Caterpillar, of a yellow greenish colour, having a Horn in his Forehead, the length of a finger. Called in Latine, the *Eruca Unicornis*, the **Unicorn Caterpillar**.

III. He beareth Argent, a **Monkeys head couped** proper. This is ever born couped without any show of the Breast at all; and is born by the name of *Monkey*.

IV. He beareth Sable, a **Satyr**, proper, Teneant, or holding in his right hand, an *How-bay*, Or. Poets and Painters, do decipher the Satyr, thus: a *Man* in the upper parts of his Body, with long *Ass-like Ears*, and from the middle to the feet, a *Goat*; with a sharp pointed prick. Some draw him with Horns, and a short tail like a *Buck*. Which may not unfitly be termed a *Horned Satyr*, *Fawn*, or *Fauvus*; or *Pan*, or *Sylvan*, or *Wood-fairy*; for by all these names he is known; see the horned head, *chap. 8. numb. 23.* and the Plate, *numb. 6.* This is born by the name of *Palmades*.

S a Satyr proper, with a pipe in the right, and a Garland in his left V is born by the name of *Zm*.

V. He beareth Vert, a **She Satyr**, proper, crined, and Tchant, or holding a Club in her right, and a Comb in her left hand, Or. These kind of *Fawns*, or *Sylvans*, or what else they are called, are included in the number of such as we call *Familiar Spirits*. These are also drawn with long Ears, and short stumps of Horns, like *Calves*, wreathed. This is born by the name of *Sansa r*.

VI. He beareth Sable, a **Satyr's head**, horned, proper. The long Ears make it to be a *Satyr's face*, else it would have passed for a *Wittals face*. But as it is a Satyr, it is born by the name of *Martvillers*.

G 3 such O born by *Saturmaine*.

VII. He beareth Argent, a **Mole**, (or *Worm-wart*), Sable. It is as black as a Coal, and soft as Velvet; having only his Feet, and a little tip at the Nole, of flesh-colour. It is termed a *Worm*, and a *Worm-wart*. Some faith *Gophers* are all white, with a little red on the Belly between the fore feet; having a *Snow-like* a *Shew-mouse*, or *Hedge-hog*; five Toes, or Claws on the fore feet; and four Claws on the hinder feet, a piece; the Tail short and hairy. This is Born by the name of *Moule*.

A 3 such S born by *Mangotham*, alias *Nangotham* Scotland.

A a Cheveron between three high S born by *Impton*.

In the Base, there is the figure of the **Green horned Caterpillar**, described before in *numb. 2.* and in chief, a **Frog tail**, or **young Frog**.

VIII. He beareth Argent, a **Camelion**, proper. It is said of this Creature, that he is of no certain colour; by reason he changeth into that colour immediately, as the thing is coloured, which he sitteth upon. But the usual colour ascribed to him in Heraldry, is green, with the head and belly partly yellow.

Mr. *Topsell* calls it, a **Serpentine**, or **creeping Beast**. Some others, a **Worm** of the **Wood**; or a **Rat-mouse**. Being it is in quantity much between them; from whence some have called it a **Mouse-Lizard**: There is two kinds, one lesser, being all white, set all over with yellowish, or reddish spots. The other of a changeable colour, betwixt white, green, brown and yellow; upon which account some have called it a turn-coat coloured **Camelion**. But naturally green, but paler and nearer to white on the belly, beset all over with red, blew, and white spots. They have copper heads, and two bones at the top of their brows, standing upon either side; Eyes clear and bright; the Mouth wide, and long; with Teeth on both sides, like Saws. The back is somewhat crooked, rising with spotted bunches from the head to the tip of the Tail; which is long and slender, like a **Rat**; the Feet have three Fingers, or Claws, outward, and two within; and contrary the hinder feet have two Claws a-piece without, and three within. They are said to live by the Air, but that is not true; for they eat Flies, Horse-flies, Locusts, and Emits; yet they can most endure fasting of all other Egg-breeding Beasts, for it many times, eateth nothing of eight months, or a whole year. This is the Coat of *Air*.

The like standing on a stock in Fesse raguled. Is Born by its own name *Camelion*.

In the chief, I have caused a **Bulhead**, or **Horse Tail**, so called from its form) which is the engendred seed, or Spawn, of **Frogs** or **Toads**, when they first receive life; and before they come to the shape of such Creatures. The Head is great, and the other part small; for with his tail he swimeth, if they be taken out of the water before they have feet, they die.

IX. He beareth Argent, a **Salamander in flames**, proper. The **Salamander**, is a Creature with four short feet like the **Lizard**, without Ears, with a pale white belly, one part of their skin exceeding black, the other yellowish green, both very splendid and glittering; with a black line going all a-long the back, having upon it little spots like Eyes; (and from hence it cometh to be called a **Stellion**, a Creature full of Stars.) the skin is rough and bald; they are said to be so cold, that they can go through the Fire, nay, abide in it, and extinguish it, rather than burn. I have some of the hair, or down of the **Salamander**, which I have several times put in the Fire, and made it red hot, and after taken it out, which being cold, yet remained perfect wool, or fine downy hair. It is thus born by the name of *Salandine*.

B three Salamanders heads crazed O born by *Aurifer*.

X. He beareth Or, a **Lizard** with his torqued Tail, Vert. This is born by *Lysardell*. The Arms, Shoulders and Hands like a **Man**; the Skin is hard and full of Scales, their Backs a dusky yellow; the Belly somewhat white, on either side they have little prickles, or spots, like to printed Stars; they have long strakes, or lines, to the end of the Tail, with certain rusty spots; their former feet bend backward, and the hinder feet bend forward, like Elbows and Knees of Men. The Fingers of their Feet are very small, being five a-piece both before and behind: See *chap. 8. numb. 20.* the true shape.

The **Uiacome**, is a kind of **Lizard**; of a silver colour, living in dry Sun shany places.

The **Scen**, is a red **Lizard**.

The fortun'd **Liards** have **Lizards**, as large as **Roe-Bucks**, long Feet, strong Claws, a speckled Skin, the face of a **Serpent**, from the Nose to the tip of the Tail groweth Bristles like **Boars**.

The *Hispaniola* liles, have **Lizards**, as large as **Hares**, having Prickles on their Backs, and a Comb on their Heads; their Skin speckled like **Serpents**, and have a **Crap**, or **Craw** in their Breast like **Birds**.

There are **Lizards** with two Tails.

In this quarter, is an **Adder**, or **Serpentine-fish**; with his Tail bowed and elevated over his head: that is turned to the top of the head, and is the Crest of *Beale*.

XI. He beareth Argent, a **Lizard**, Vert, between a **Wasp**, proper; and a two-headed **Serpent**, with four feet, Azure: crested, Gules. The **Lizard** I caused to be set here, onely to shew how *Heralds* in old time drew them with heads lited up; which is contrary to their own nature: See *chap. 8. numb. 20.* See the **Wasp** described in *Bees, cha. 9. numb. 62. 64.* But the particular Coats are as followeth.

B 3 Lizards crested O born by *De La Gare*.

G a Lizard O born by *Sauran II.*

S a cross A between two Anchors, A and two Serpent Fishes their Tail elevated over their Heads to the sinister O by the name of *Van Stadenberg*.

S a Fesse between three Wasps O by the name of *Wasse*.

S a Serpent with two heads, four short feet and Tail extended A by *Pally*.

Aristotle maketh mention of a Serpent that had two heads; and *Arnoldus* of a Serpent in the *Pireney* Mountains, (that was slain by a Soldier) which had 3 Heads, in whose Belly was found the two Sons of the said Soldier, which the Serpent had devoured.

Such a Serpent we read of in *England*, in the 23 E. 3. Anno 1349. found in *Oxfordshire*; near *Chipping-Norton*, that had two Heads, and Faces like Women; one being shaped after the new attire of that time; and the other after the manner of the old attire; and it had great wings, after the manner of a **Bat**.

The **Amphibena**, or Serpent with two heads; having one at the tail, he goes always straight forwards never turns about his body. This Serpent alone, of all others most endureth cold; his Eyes shine, as light in *Lanthorn*. There is some Serpents have trebble Heads, some have many heads, as *Indre* affirmeth.

The Serpent is a Creature of great quantity; for as *Magistenes* writeth, there be such huge Serpents in *India*, that

that they swallow and devour all whole, as Harts and Bulls. In *Italy* in the time of *Claudius Caesar*, was a Serpent slain in whose Belly was found a whole Child. *Alexander the Great* in his Epistle to *Aristotle*, his Master saith, that he saw in *India* crested Serpents, some having two heads, some three.

XII. He beareth Azure, an **Askers** head crazed, Or. The **Asker** and the **Lizard**, are of the same shape and form, only differ in colour, the **Asker** being all yellow with a whitish belly, or of a dusky or brown yellow, with a yellowish Belly. This is born by *Alfarin*.

XIII. Some draw the **Asker** thus, and in ancient times it was done after this manner, with **Swan-like bending Necks**: But I should rather take these for **Serpents heads**, then **Askers**, and so they will be best termed in Blazon. But of this more, *chap. 8. numb. 20. and chap. 10. numb. 10.*

B 3 such O born by *Alfagar* of *Alfagar*.

G an Askers head coupéd, O by the name of *Barr*.

XIV. He beareth Gules, a **Tortois**, Or. It is of some Authors termed a **Shell-Crab**. There are three sorts of **Tortois**, the one of Land, the other of sweet water, and the third of the Sea, or Salt-waters. They are so large in the *Indies*, that with a Shell they cover a Cottage, and row in them on the Water, as in a Boat. They are covered with two Shells of a brownish and a yellowish colour intermixed, with slender Shells on their heads, their feet are five Fingers or divisions a-piece, with Nails upon them. Their Skin is of an earthy blackish colour; their Voice is an abrupt and broken hissing like a **Serpent**, but much more loud and diffused. It is born by the name of *Tortois*.

The **Sea-Tortois**, their Eyes are clear and resplendent, casting their beams farr and near, and are pure white; their feet like **Seals**, or the **Sea-Calf**; serving instead of Oars to swim withall; they Breathe and Sleep upon Land. The *Turks* have a kind of **Tortois-shell**, which is white and bright, like the *Chrysolite*, of which they make hafts for Knives.

The **Jambolus Sea-Monster**, has a body like the **Tortois**, having two Cross-lines over their Backs at the end of which was an Eye and an Ear on either side; they had feet round about, so that they could go backwards and forwards.

The **Croglodite Tortois**, has Horns broad, like the Peggs of a Lute, or Harp; which they move in Swimming.

In the Base, is a **Sow**, or **Devils-Worm**, of some called **hundred feet**; it is a small slender Vermine with many feet, and a jointed body and two horns on the Head and Tail, and is of a reddish yellow colour. I have seen another kind of **Worm** of the shape of this, but much slenderer of a jointed body, and a finger long; the body black, or of a dark earthy colour, with two long and hair-like Horns, with Buttons at the ends like to Snails Horns; it hath feet so thick set together the whole length of the body that they cannot be numbred, resembling so many short white hairs: In its going it is swift, having no motion in the Body (as in divers, and generally all **VWorms**) but goeth straight, the feet only

being seen to move. VVhen it is taken it turneth it self into a round of many doubles.

V a Tortois passant A born by the name of *Gandy*.

B the like erected O by the name of *Cooper*.

G the like erected O by *Van Testudorf*.

S three Sow-VWorms in Pale O by the name of *Sworme*.

A the like in Pale S born by *Brandalo* an *Italian*.

XV. He beareth Argent, a **Toad-erected**, Sable; under this shape of the Toad may be comprehended the **Frogg** and the **Paddock**, all being a like, only differ in colours; but the **Toad** is the most venomous. This is the Coat of *Toadell*.

There are **Toads** which have long Serpentine Tails, whose Bodies are much longer than the ordinary Toad.

A three such S born by *Btereux* of *Cornwall*.

A 3 such V born by *Paddock*.

B on a bend sinister waved O three Paddocks V by *Froschen*.

XVI. He beareth Argent, a **Frogg**, proper. There is different colours of them, in *Germany* and *Flanders* they are green; some again are ash-colour, yellow, and black, spotted. Their feet are longer behind than before, which maketh them apt to leap; before they are short, having divided Claws which are joined together with a thin broad skin, which makes them apt to Swim. Such is born by *Van Hofferberg*.

The **Green Frogg**, is green all over, except the feet, which are of a reddish dusty colour, and is venomous.

O in a Laurel Chapter, set with Roses, proper a Toad or Frog V is born by the name of *Van Lofs*.

The **Paddock**, or **Crooked back Frogg**; they have two little horns, or bunches in the middle of their back; they are between green and yellow colour, with red spots on the sides; their Belly is white, and that part of the back directly over the Breast hath a few black spots; they live in Gardens and Grass.

S one erected O is born by *Froschel van Martzell* of *Barvaria*.

The **Toad** is of a dirty colour on the back, the belly between white and yellow; Eyes of a gold flaming colour; the Voice shrill, so that it is heard a great way off, like a small Bell or Trumpet.

The **Horned Toad**, so called because his Voice is like a **Coronet**; his colour is like Saffron on the Belly, and a dirty filthy colour on the back.

The **common Toad**, is fuller and rounder in the belly, swelled (as it were) more than a **Frogg**, of a blackish colour, full of dark spots, with many deformed spots on the sides, whitish under the Throat, the Head broad and thick; the back plain without bunches, and black or dirty; the whole Aspect being ugly and unpleasant.

In Base is the figure of the **Green Caterpillar**, or **Cabich-Worm**; described before, *numb. 2. s. 2.*

XV. He beareth Gules, a **Stellion**, proper; or a **Stellion Serpent**, to distinguish it from the **Stellion-Horse**. It is of a rusty colour, or whitish, with Stars down his back: There is several sorts of them according to the nature and soil of the Country, and place of breeding. This is born by *Bume*.

The

The **Thracian** and **Grecian Stellions**, are white, full of **Lentile spots** or specks, making a shrill stricking noise, and is good to be eaten.

The **Italian Stellions** do no great hurt with their teeth, they are covered with a skin like a **Shell**, or thick bark, and upon their **Backs** are many little shining spots like eyes; streaming like **Stars**, or drops of bright clear water.

The like erected, born by *Don Stellona*.

XVIII. He beareth **Argent**, a **Seale** (or **Sea-Calf**) regardant, **Sable**. This is called a **Sea-Dog**, also by some, but very falsly, for that is another kind of Fish. The *Germans* call it a **Seal-hound**, and a **Salspeck**, or **Salspeck**. This is born by the name of *Seale*.

O the like with a chief **S** born by *Graffenheale*.

A 3 such **S** born by *Sealhurst*.

The **Seale-Fish**, or **Sea-Calf**, raiseth not up its head as generally we draw it in *Herauldry*: but thrusts it forwards, like a **Swine**. It is of a blackish colour, spotted with white, the belly, and throat white, the fore-feet have five **Claws** apeece, each shorter then the other, the hinder feet, are five **Claws** all of a length, with a skin, or membrane between each, after the manner of a **Goose-Foot**, as is shewed in the basis of this quarter.

XIX. He beareth **Or**, a **Scales-Foot**, erected, and **erazed**, proper. Born by the name of *Beringburgh*.

A **Chevron** between 3 such **S** are the Arms of the Town of *Yarmouth* in *Norfolk*.

A **Chevron** between 3 **Scales-head** extended, bendwise. **S** born by *Ley* of *Wellbury* in *Wiltshire*.

XX. He beareth **Vert**, a **Beaver** erected, **Argent**. This Beast is also termed, a **Fiber**, a **Castor**, an **Amphibion**, from the *Latin*, and *Greek*. Their colour is somewhat yellow and white, aspersed with **Ash** colour, their tail is taken to be **Fish**, and the hinder feet are whole like a **Duck**, by which they swim: their head short, ears small and round, their fore-teeth very long, set like a **Rabbit**: hard bristilly hairs about the mouth, which are so hard that they seem rather to be horn then hair. The fore-feet like a **Dog**, and hinder like a **Goose**. The tail covered over like the Scale of a **Fish**, the Male and Female have bunches on either side their privities which are no stones, for they lie inwardly, as they do both in the **Hare**, and the **Muscat**. This is born by the name of *Newfall*.

G a **Beaver** erected, A born by *Hubsman Van Bibersbach*.

O the like to the sinister, **S** born by *Van Biba*.

O 2 passant to the sinister, **S** born by *Skenken Zur Dipe*, in the Dukedom of *Brabant*.

O a **Beaver** courant in bend **S** born by *Van Beverford*.

A the same erected **S** swallowing, or devouring of a **Fish** proper. This is in a **Glass Window** in *Newhall*, in the Inn of *Chancery* near *Temple-Bar*.

XXI. He beareth **Argent**, a **Beavers tail** Erected, proper between a **Honey-Bee**, and an **Hornet**, **Or**.

A 3 such tails, **G** born by the name of *Beever*.

2 **Beavers** tails erected **B** is the Crest of *Van Bieren*.

*

XXII. He beareth **Argent**, a **Beaver**, **Gules**. Mr. *Boswell* pa. 53. draws the **Beaver** thus, and Mr. *Gwilliams*, fol. 258. as the former, yet both are mistaken in the forme, and likewise in the feet, both making the fore-feet like a **Goose feet**, when they should be the hinder: whose error I followed, till Mr. *Tossel*, fol. 44. did better inform me, the true figure I have since set down, chap. 8. numb. 72.

In this square in chief, is the figure of an other sort, of **Caled-Fly**, called a **Cantharide Beetle**, or **Green Beetle**, or **Chaffer**.

XXIII. He beareth **Azure**, an **Otter** passant **Or**, with a fish in his mouth **Argent**. They are of some called, the **Dog of the Water**; and some, **Cats of the Water**, they are of a Chestnut colour, they have a rough shagged skin, soft hair, sharp teeth, and a hairy bush tail more like the **Fox**, then a **Dog**: so that if his tail were cut off, he would differ nothing in outward proportion of Body from the **Beaver**. This is Born by the name of *Cotterell*.

A fesse between 3 **Otters** **S** born by *Lutterell*.

XXIV. He beareth **Azure**, a **Crocodile**, **Or**; It is a creature thar lives partly in the **Sea**, partly on **Land**: he is cruel in devouring, when he hath killed his prey, before he eateth it, he weeps over it: from whence arose the Proverb, of *shedding Crocoiles Tears*. They are of a Saffron colour, between red and yellow, but more yellowish; the belly whiter, the body covered all over with a certain bark, or rind, so thick and strong, that it will not yeeld to any blow. He hath a long **Serpentine** tail, and feet like **Bears**, save they are all covered with scales. The mouth openeth to the place of the ears, and hath a **Swins Snout**, and contrary to all other Creatures, moveth the upper, and not the nether jaw. This is born by the name of *Cato-k*, a *Spanish* Family.

B 3 such heads couped **O** born by *Tearshall*.

XXV. He beareth **Gules** (an *Egyptian*, or) an *Arabian* **Land Crocodile**, **Argent**, the Scaly parts **Azure**.

The Body of this **Crocodile** is all smooth; the head Articles and Claws **Scaly**: the tail is scaly, but standing up in sharp points like the edges of wedges, in bunches from his rump to the end; R. *Walton*, in his Book of Beasts, calls this a **Landiverba**. This is born by the name of *Rabins*, alias *Rabinsbach*.

XXVI. He beareth **Azure**, a **Scaled Sea Lion**, **Argent**, born by *Merleoven*. I term this a **Scaled Sea Lion**, to distinguish it from the **Sea-Lion**, which is half **Lion**, half **Fish**, as you may see in the Chapter of **Fish**, 16. numb. 7, 8, 9, 10, 11, 12. This is the form of that **Sea Lion Monister**, that was taken, Anno 1295, and another 1284, and another 1274, as *Gesner* informs us. The *Germans* call it a **meer-wunder lowen gleych**.

A the like **G** born by *Wounder*.

The **Chanarch**, a kind of Wild Beast in the *Isle*, which in their Language they call a **Chanarch** (and we can give it no other term) is a Beast much after this form of Body, without any tail, faced like a **Man** (sans Beard) head, body and legs all scaly, the forefeet like **paws**, and the hinder, the Paws of a **Lion**. See the Figure it self, lib. 4. cap. 7. numb. 11. A

A **Sea Lion** about the magnitude of a **Hunting Dog**, with **Goose-feet**, was seen to come out of the Lake of *Argadia*, in *Scotland*, in the year 1510. He was so strong and stout, that he overthrew strong Oaks with a blow or stroak of his tail; he presently set upon his Hunters with a stiff course, and three with three blows he cast down, the rest elcaping into Trees; and long he stayed and lingered about; at length afar off he went again into the Lake.

XXVII. He beareth Gules, a **Sea Frier**, Argent; else it is called a **Sea Frier Fish**, or a Fish in form of a Frier; the *Germanis* term it a **Wassermann** and a **Wassermunch**; and I suppose *Grimm*, fol. 264. means this Fish, which he calls a **Monk-Fish**. Such a Monstrous and wonderful Fish as this was taken in *Norway*, as the forefaid Author testifieth.

B such a Fish A is born by *Mermonke* of *Spain*.

3. **WE** shall come now to Bigenerous Creatures, such as are Monsters by Natures Generation, or rather the Fictions of Poets and Painters, which are usually found born in Coats of Arms.

XXVIII. He beareth Gules, a **Phinx sans Wings** (or the **Lion Phinx**), Argent; crined, Or. This is a Monster having the face and hair of a **Woman**, and the body of a **Lion**. This might more fitly been termed by our Ancestors, a **Leo Virgo**, the Maiden or **Woman Lion**. This is born by the name *Catena*.

A the like B crined O born by the name of *Crackneck*.

XXIX. He beareth Sable, a **Sphinx seiant**, Argent, with **Wings surgiant**, and crined Or. The Poets set forth the **Sphinx** thus, the forepart of a **Ward**, the fore feet and wings of an **Eagle**, the hinder part of a **Lion**, and the scaly tail of a **Serpent**. But *Topfell* tells us truly what the Sphinx is, which I have further declared before in *numb. 1.* but an **Ape is an Ape**, for the Fiction must continue in Arms still. This is born by the name of *Barcellona*.

Oedipus, Son to the King of *Thebes* hath the greatest Right to bear it for his Coat, because he vanquished her by expounding her Riddle.

XXX. He beareth Gules, a **Sagitar** (or **Shooter**) curreant, shooting of an Arrow, Or. Born by King *Stephen*. Some only term it a **Sagitari**, or **Sagitter**, **Sagitaris**, understanding thereby a Monster to be half a **Man**, set on the Shoulders of an **Horse**. *Virgil* calleth him **Cacus**, and feigneth him to be half a **Man** and half a **Horse**. *Ovid* calls him **Chiron**, who was the Son of *Saturn* and *Phillyra*, begotten in the shape of a **Horse**, for fear of his Wife *Ops* Discovery, who brought forth a Creature, whose upper parts was a **Man**, and the lower part a **Horse**. Some not regarding the Bulls cloven hoof, term this a **Hino Centaure**, but that it is not, see *numb. 32.*

XXXI. He beareth Sable, an **Onocentaure** (sans Armes) or She **Centaure**, dismembred of her Arms. This is a Monster being the Head and Breasts of a **Wo-**

man, set upon the Shoulders of a **Bull**. If it had Hands and Arms, it might be termed a She or Female **Minotaure**. This is born by the name of *Sentuary*. These kind of Monstrous Creatures are ever born whole in Arms, never in parts less than half, as in other creatures.

G the like passant to the Sinister A crined, and made into a wreath hanging backwards O. The Crest is a demy Onocentaure A with her hair wreathed together and pendant backwards; and born by *Crater*, of *Brunswick*.

G 3 demy female Onocentaures couped and erected A crined O born by the name of *St. Tawe*.

XXXII. He beareth Azure, a **Centaure** (or a **Minocentaure**, passant,) proper; crined, and holding of a **Scepter** in his right hand, and with his left extended, or pointing to the Sinister chief Or. This is half a **Man**, and the body of a **Bull**.

They are born in Arms, holding several things, as **Clubs**, **Swords**, **Shields**, &c. So that you must always be careful to mention what he holdeth, and after what manner. Some call this a **Hippocentaure**. *St. Jerome* saith, that *St. Anthony* saw an *Hippocentaure*, and talked with him, and that there were such Creatures indeed.

The **Lapithe**, are said to be very like the **Centaurs**, and were once very loving to them, but they fell after to deadly Wars, by reason the **Centaurs** in a Banquet being Drunk, offered to Ravish the Females of the **Lapithe**, *Anno Mundi 2724.*

The **Feray**, or **Fere**, that is, **Wild Persons**, as *Homer* calls them; he compares to the **Centaurs**; but the true **Minotaure** seen in *Aristotles* time, had the face of a **Bull**, and the other Members like a **Man**, *Hist. Beasts*, fol. 87.

A a Centaure passant, proper; in one hand a Sword point erected, and the other a Shield in an Escuchion form G is born by *Casajio*, in *Italy*.

A a Minotaure curreant, in the right hand a Scepter, the left lifted up A on a Bend Sinister S these Letters S P Q R Gold.

This Picture of the **Minotaurs**, the *Romans* of old times did bear in their Ensigns of War, as may appear by the Letters transversed on the Bend, which signifieth *Senatus Populus Que Romanus*, declaring thereby, that the Minotaure was the Noble Token or Ensign of the Senate and People of *Rome*, as is affirmed by *Cicero*, and many Learned Writers.

The **Centaure** is another Monster, of half a **Man** and an **Horse**, which Fiction first arose from the people of *Thessaly*, who first devised to break Horses for War, and ride them, which being seen by other People, were supposed to be but one Creature, which had the upper part like a **Man**, and the nether part of his body like an **Horse**. But these are in Heraldry more properly called **Sagittary**, as is said before, *numb. 30.*

The *French Armorsist* draw this kind of Monstrous creature only with two feet, and not with four, as we do; and such a Bearing I find to be in the Shield of *Sacrament* one of the Kts. of the Round Table, viz. S a Sagittary O Bow and Arrow B, String G.

XXXIII. He beareth Gules, a **Chymere**, (or **Chimeram**), Argent. This is a Monster with three heads, one of a **Lion**, the second of a **Goat**, the last of a **Dragon**, the fore-feet one of a **Lion**, the other a **Goat**.

the hinder feet and tail of a **Dragon**. Mr. Besirell, fol. 86. and so do the Poets describe the **Chimeram**, or **Chymere**, to have the head of a **Lion**, the middle part of a **Goat**, and the hinder part of a **Dragon**, breathing and casting out of his mouth Sparks of Fire. This is the Coat of **Chymere**. This was the Atchievement of that Noble Warriour **Bellerophon**, who slew such a Monster.

XXXIV. He beareth Argent, **Cerberus**, Sable. This is a Monstrous Dog, with three heads like **Hyas**. This is by the Poets feigned to be the Keeper of Hell Gates, and is in Armory called by the name of **Cerberus**, or the **Dog of Hell**, or the **three headed Dog of Hell**, which **Hercules** is said to bring away with him in a Chain, when he fetched **Theseus** out of **Pluto's Palace**. This is born by the name of **Goaler**. It is a fit Badg for a person of that Profession, or one that hath overcome all difficulties, and either conquered or escaped from **Cerberus** his Den.

XXXV. He beareth Argent, the **Scarlet Beast**, (or the Beast of the **Bottomless Pit**, **Winged**, Or. This Beast I never read of any name that was given it, it is the Figure of the Beast which the **Scarlet Whore** is said to Ride in Triumph upon, over the Nations and Kingdoms, as it is mentioned in the Revelations, Rev. 13. 3. which is said to have *seven Heads and ten Horns, whose Heads and Horns were contrary to all Beasts*. This is the Badge and Cognizance of Whoredom and the Mother of Lies.

XXXVI. He beareth Or, an **Hydra**, Gules; called also an **Hyder**; this was a **Dragon** with five heads, which **Hercules** fought with, and slew by the help of his good Friend **Theseus**: For in his Fight as he cut off one head, another (and very often three other heads) arose in its place, which his Friend perceiving, took an hot Iron, and scared the Wounded head, which stopped their farther increase; so **Hercules** overcame him. See the meaning of this Fable in the *Armory of Honour*, p. 63. and *Rosse his Mystigoga Poetica*. This is born by the name of **Hydrager**.

XXXVII. He beareth Azure, one of **Hydras heads couped**, Or. *Conradus Gesner*, in his Book of Fish, giveth the description of the **Serpent Hydra**, to have seven heads. After this form, two feet like a **Lion**, and the hinder part of a **Serpent**: Such a Creature (saith Mr. Boswell, pag. 63.) was in *Marreis*, called **Lerna**, in the Province of *Arcadia*; but this **Hydra**, *ab aqua dicta est*.

The **Egyptian Serapis**, or **God**, was Pictured with three heads, a **Lions** between a **Dog** and a **Wolf**, joined to the winding body of a **Dragon**.

XXXVIII. He beareth Gules, an **Opinicus**, Or, **Wings**, Argent. This is a Monstrous Creature, the body and four feet of a **Lion**, the head, neck and wings of an **Eagle**, and the tail of a **Camel**. This Beast is also born without Wings, then termed an **Opinicus sans Wings**. This is the Crest belonging to the Worshipful Company of Barber Chyrurgians.

Per pale, a demy one, sans wings, counterchanged

*

O and G is the Coat and Crest of *Goffell zum Thurn*.

• XXXIX. He beareth Argent, a **Dragon**, Gules. This is the Crest of *Evereton*, of *Handford*, viz. upon a Cheque B turned up Er. a **Dragon G**.

A a **Dragon G** born by *Don Drago*, a *Spaniard*.

☞ All four footed Creatures that bear Wings, they are ever set on the back of such Creatures **oberture**, or one beside or behind the other, which needs not to be mentioned (though *Gwillim*, fol. 262. terms them Wings displaid, which they are not, except they were each side the head) but if they be set any other way, then mention how they stand, as the examples in winged Fowl will afterwards manifest, chap. 11.

Several sorts of Dragons.

4. THE difference of a **Dragon** and a **Wiver**, is not so manifest in the shapes of their several parts as in their natures; the **Dragon** having 4 legs, the **Wiver** but two; the ears also of the **Wiver** being generally made plain, but the **Dragons** is cut as if it were crazed; in all things else they are agreeable; so that in their divided parts, as Wings, Tail, Feet, &c. they may be taken or Blazoned one for the other; see chap. 12. numb. 79, 80, 81.

There be some **Dragons** which have **Wings** and no **Feet**; others have both Feet and Wings; and some neither feet nor wings; but are known from **Serpents** by their Comb and Beard, or Wattles like a **Cock**.

The **Epidaurian Dragon**, bred no where but in that Countrey, being tame and of a yellow gold colour; wherefore they are dedicated to their god *Esculapius*.

The **Syrene Dragon**, is a **Dragon** in *Arabia*, which hath Wings, being as swift as Horses, running or flying at pleasure; which if they wound a **Man**, he dieth before he feel any pain.

The **Amphisiben** is a Venomous Animal, having a head both before and at the tail, and biteth and stingeth with both, see chap. 12. numb. 76.

The **Devil** is compared to a **Dragon**, (saith St. *Augustine*) *Diabolus Draco dicitur propter insidias*, &c. The **Devil** is called a **Dragon** because of his Treachery, for he doth treacherously and fauntingly set upon Men, with a purpose to ruin and destroy them; but we need not say he is like a **Dragon**, for Holy Scripture tells us plainly he is both a **Dragon**, and hath the shape of a **Dragon**, Rev. 14. 4. 7. 9. And there appeared a Wonder in Heaven, a great Red Dragon, &c. which with his Tail drew the third part of the Stars of Heaven, and cast them to the Earth: And there was a Battel in Heaven, Michael and his Angels fought against the Dragon, &c. and the great Dragon that old Serpent called the Devil and Satan was cast out.

The **Python**, or **Pithias Dragon**, which was a **Dragon** as the Poets feign, bred of the slime of the earth after the *Deucalion Flood*, which was slain by *Apollo*.

D d

lo,

lo, god of Wisdom and Shooting (as *Ovid* calls him) see *numb. 64.*

The **Indian Dragons** have combs on their heads, their backs being somewhat brown, and all their bodies less scaly than others; their other part of a yellowish fiery colour, having also sharp backs like Saws, they also have Beards, their eyes shining like Fire; their Wings of a skinny substance, and very voluble, and spreading themselves wide.

The **Georgian, or Median Dragons**, have both Wings and Feet like a Goose; and are of diverse colours, some black, some red, some yellow, some ash-colour, their shape and outward appearance very beautiful; their teeth double set one within another, their eyes bright as a Star, their **Dewlaps**, or **Wattles** Red.

The **African Dragon**, as the Natives there hold it to be, and say it proceeds from the unnatural conjunction of an **Eagle** and a **She Wolf**, which brings forth a kind of **Dragon**, that in Beak and Wings resembles the Sire, in Feet and Tail the Dam, but in body and skin neither.

The **Dracontopide**, are great and potent Serpents, having faces like **Hairs**, and the residue of their bodies like to **Dragons**; it is thought that such a one was the **Serpent** that deceived *Eve*, for *Beda* saith it had a **Virgins Face**.

The **Fire Drake**, is a kind of Fiery Meteor, or Comet in the Air, in form of a **Dragon**, or two legged **Serpent**, flying about, spitting of Fire, these are things often appear over Ships, Houses or Towns, before some eminent judgments do befall them; of which History gives multitudes of examples.

By and from all these sorts of **Dragons**, our Artists have found a means and way to invent one, which is that we use in Heraldry, being composed of all.

A the like Dragon rampant S born by *Dauney*.

XL. He beareth Sable, a **Dragons head erased**, Argent. Born by the name of *Draknell*.

A **Dragons head erased** S gorged with a Crown O is the Cognizance of the Lord *North*.

A demy Dragon erased G a Coronet about his middle O is the Crest of the Lord *Compton*, Earl of *Northampton*.

XLII. He beareth Gules, a **Dragons head erased fesse ways**, Or. This I have seen termed only a **Dragons head erased**, but it ought to be said in Fesse, or Fesse-ways, to distinguish it from the former way of bearing, which is more common than this; or else to be termed erased in the neck, or at the ears or throat, to shew that no part of the Breast is at the erasing. This is the Coat of *Barfanberge*, a person of the *Spanish* blood. And O 3 such G is born by *Elmore*.

Sorts of Earth-Worms.

In Base is a **Scrytall**, which is a kind of **Blind Worm**, very full of marks or spots upon the back; so variable and delectable, that it possesseth the beholders with admiration; it is thicker and flatter at one end more than the other, as long as any Earth or Garden

Worm; the brightness of whose skin or scaly hide doth not rightly appear till it hath cast its slough, which it ever doth in the Winter time.

The **double headed Worm**, there is no great difference between this and the **Scrytall**; but that this goes or creepeth both ways, and that but one way; the colour is generally both one. It is called in Latine *Amphisterna*, double headed, because it goes both ways, as if it had two heads and two tails; that as is now the head, is presently the tail, for it is never seen to turn the head, and it is like an **Earth-Worm**, hard to distinguish which is either head or tail, being the whole proportion of his body is of an equal magnitude, of the colour of earth, not black, but blackish, the skin rough and hard, set over with diverse coloured spots in rows, gliding on the ground with an higher bulk than other Serpents.

The **Earth-Worm**, or **Worms**, of which there are two sorts, the greater and the lesser; the greater are long and round, of a whitish colour, and sometimes, though seldom, of a bloody hue; they have a kind of Bloody Chain or Collar about their neck, without eyes, as all other Worms; of some they are called also **Dew Worms**.

The **Ascarides**, or lesser Earth-Worm, are found in great numbers in Dung-hills, Mixens, and under heaps of Stones; of this sort some are red, which we English Men call **Duggs**; these are much used for Baiting of Angling hooks, to take Fish with.

Some are yellow, called **Yellow-Tails**, or **Golden Tails**.

Some are white, called **White-Tails**.

Some are blewish,

Some are black.

XLIII. He beareth Argent, a **Dragons head composed**, Gules, holding of a **Winged Serpent**, Vert. This is the ancient Crest belonging to *Garnall*, of *Knighth-ton*, in *Shropshire*.

¶ You need not express his holding of it in his mouth, because the head hath no other way of holding; but if it were a **demy Dragon**, or any other thing, whose feet are seen, if then the holding be in the mouth or in the feet, then it ought to be mentioned whether in the mouth or foot. Note also, That **Serpents,adders, Cels**, and such sort of long tailed Creatures, often in their holding thus, are apt to be **entwapped** about the thing holding them; and then they are Blazoned thus, such a thing **holding a Serpent**, **entwapped** about the Neck or Leg.

XLIV. He beareth Azure, a **Dragon Cyger**, Argent, **Collared and Chained**, Or. By the name of *Gym*. This hath of some been unadvisedly termed a **Lion Dragon**, as having the head and tail of a **Dragon**, and body of a **Lion**: But such must consider, that the most fittest and general received term, is to give it that name first which the head is of.

¶ For there is much difference between a **Dragon-Lion**, and a **Lion-Dragon**; between a **Dragon-Cyger**, and a **Cyger-Dragon**; the first being the head of a **Dragon**, and the body of a **Lion** or **Cyger**; and the latter the head of a **Lion** or **Cyger**, and the body of a **Dragon**, as I shall shew by

many examples of mixed Creatures of this nature; see *numb. 49, 50, 60, 61.*

Some again Blazon this a **Dragon sans Wings**, which is also most improper; seeing it hath neither the body or feet of a **Dragon**.

And here note also, that the tails of these Dragonish Creatures, of what kind soever they be, are turned round, and are **Serpent-like**.

A the same sans Collar and Chain G is born by *Dra-gordorfe*.

XLV. He beareth Argent, a **Dragon Tiger** rampant, or rampant and winged, Azure. I say winged, because such Creatures as these are more commonly born without Wings than with Wings; and when Winged, they are made like the Wings of a **Dragon**. This is born by the name of *Almarade*.

O 3 such rampant G is born by *Liverstane*.

XLVI. He beareth Gules, two **demy Dragon-Tygers** rampant, endorsed, their **Necks fretted**, Or. This is the Crest of *Dracology*, of *Spain*. The word endorsed may be spared, for their Necks cannot be fretted except they were endorsed.

G 2 Dragon-Tygers rampant A their necks and tails fretted A born by *Tyngurion*, of *France*.

XLVII. He beareth Or, a **Chymera Monster**, Gules. I term this a Chymera Monster, being it is Monstrous from the **Chymera**, mentioned, *numb. 33*. that having, as the Poets feign, three heads, one of a **Lion**, another a **Goat**, and the last a **Dragon**, with its body framed thereunto, according to their kinds, as you may there see; but this being but one headed creature, and yet compounded of those foresaid three kinds, can have no better a term given from such a Sire, but be termed its Bastard or its Monster; for it is a creature that hath the head and body of a **Goat**, (except a Beard) the Breasts of a **Womon**, the four feet like an **Eagle**, the tail of a **Lion**, and the Wings of a **Dragon**. It is of some termed **Diochymera**, and **Semichymera**, smelling, participating, resembling in part the **Chymera**. This is born for the Crest or Cognizance of *Chimalara*.

XLVIII. He beareth Argent, a **Griffon passant**, Sable. This is a kind of Monster that is half an **Eagle** half a **Lion**. If it be rampant, it is in that posture ever termed a **Griffon lezant**, (or after some **Sergeant** or **Sergant**) others term it **Surgiant**, as if it were rising to fly. And notwithstanding all this, yet there is able Heralds, who term it **Rampant**, which they say is not improper, seeing it partakes in part with the **Lion**, and is of a **Lion** like courage, in its assaults. And according to the two examples following, may be called an **Eagle-Lion**. This is born by the name of *Bold*, in *Lancashire*. The like is born by *Halton*.

O the like Rampant (saith *Gwilliams*, but *Legh* saith **Sergeant**) S born by the name of *Morgan*. fol. 262. pag. 51.

The term **Sergeant** saith the later, being a term peculiar to the **Griffin**, as being of a double kind, if that be the cause (saith the former) that then

it cannot be peculiar to the **Griffin**, but rather common to all other Animals of a double nature, as the **Wolvern-Cockatrice**, **Lion-Dragon**, **Dragon-Tyger**, &c.

G a **Griffin** rampant, A born by *Oclorsky*.

S a **Griffin** sans wings, rampant coward, O born by *Van Firdenheim*.

O an **Eagles** heads with **Hounds ears**, A is the quartered Coat and Crest of *Arburg*.

XLIX. He beareth Argent, a **Lion-Dragon**, Azure. This is a kind of a Creature, that hath the fore parts of a **Lion**, and the hinder parts of a **Dragon**, (that is, in short) half a **Lion**, and half a **Dragon**. If it have wings, then the term (**winged**) is to be used.

This is the fittest, and most properest way of drawing these Creatures, half one, and half the other; yet I find it in antiquity variously drawn, some with all the feet like a **Dragon**, others all like a **Lion**; but all ever have, and ought to have, the tail of a **Dragon**, or **Serpent**, turning round; if the tail be in any other posture then to be mentioned according to its toudings, or turnings. This is born by the name of *Du Maca*.

A a **Lion-Dragon** Sergeant, or Segrant, G born by *Don Spido*.

B 3 such passant, O born by *De la Milleko*.

L. He beareth Gules, a **Dragon-Wolfe**, Or. by the name of *Aldobranlo* of *Italy*, sometimes they may be of two colours, the **Dragon** part one, and the **Wolfe** and **Tail** another; then term it, party coloured, Or and Argent: or else per pale Or and Argent: or else a **Dragon-Wolfe**, the first part Or, the later Argent. All these ways have I found them termed, in blazon.

B the like Segrant; A born by *Drasolf*.

Here you see in these two examples, the difference of the draught, between **Lion-Dragon**, and **Dragon-Lion**: as I did tell you before, *numb. 44*. The like is to be observed in the commixtures of other Creatures, as **Horse-Dragon**, **Unicorn-Dragon**, the **Swine**, or **Boar-Dragon**, the **Ape-Dragon**, the **Hart-Dragon**, with variety of such like bearings: in which be careful to mention the head part first; and in the draught, to make one half, of one kind, and the other half, of the other. Yet some of these of a double kind have peculiar names to themselves, as the examples following will make manifest: those except out of this rule, see *chap. 9. numb. 36, 37*.

Beasts of a Double Kinde.

LI. He beareth Argent, an **Ape-Bear**, proper. This I call so because of the foresaid rule; yet both *Gefner* and *Topsell*, in their Histories of Beasts, term it a **Bear-Ape**, which hath the Face and Feet of an **Ape** and Body of a **Bear**: its proper colour is a deep brown. This is born by *Puttener*.

The **Haut-Bear**, is a kind of **Bear-Ape**, it is a Beast in *America*, as large as a **Monkey**, his belly hangs very low, his head and face like a **Childs**, his skin is of an Ash colour, hairy like a **Bear**, he hath three claws

D d 2 only

only on each foot, and they are the length of four fingers: his tail very short with no hair on. This is called *Arctopithecus* by Mr. *Topsell*, and Beasts of these shapes, and of a double nature, are:

The *Sinivulpus*, or *Apish-Fox*: of some termed the *Fox-Ape*, and that best for our rule in Herauldry, which is a Beast in the Countrey of *Payran*, the fore part is like a *Fox*, and the hinder an *Ape*, except the ears, which are like a *Bate*, round and pil'd, without hair: the Female hath under neath her belly, a skin like a bag, or scrip, wherein she keeps her young from the violence of Weather and Hunters, out of which they seldom come, but to suck, till they be able to provide for themselves, see it *numb. 71*.

The *Sagoin*, as some affirm, is not much bigger then the young *Coney*, it is of a grissel colour, a neat beard somewhat Ash coloured, a tail like a *Rat*, but hairy: the feet of a *Squirrell*, the face of a *Bartyne*, or *Satyre*; round ears short and open, they are thought to be begot of a small *Ape* and a *Weasell*. And now seeing I am in the discourse of these Bigenerated Creatures, give me leave to describe some kinds, which I have found mentioned in History; as,

The *Hippopotus*, a Kind of Creatures which hath the body of *Ben*, and feet like a *Horse*.

The *Rhinocephalus* hath a neck, and all other parts of an *Horse*, but it is said to breath out air, of such a poisonous nature, that it killeth Men.

The *Lampa* are Creatures said to have the feet of *Horses*, but in other parts resembleth *Goats*, see the true *Lampa*, *numb. 54*.

The *African*, *Arabian Hyena*: is as large as a *Wolf*, but rougher haired, have bristles or hard hairs like a *Horse* mane down its back, the middle of his back crooked and falling in, of a yellowish colour bespeckled on the sides with blew spots, as if he had many eyes, bushing tail like the *Fox*, and it is said to be engendred of a *Wolf* and *Fox*.

The *Crocota*, is a kind of a Beast engendred of an *Hyena*, and a *Lyones*; he is between a *Dog* and a *Wolf*, but more fierce then either.

The *Loupchat*, or *Lupus Catus*, the *Wolf-Cat*, having the face of a *Cat*, with sharp claws, of a blackish spotted colour, and is generally called an *Indian Wolfe*.

The *Thoes*, a Beast engendred of an *Hyena* and a *Wolf*, and (of others) of a *Wolf* and a *Fox*: but I rather think of a *Tyger* and *Wolf*, being it is so ravening, and devouring a Creature: called of some the *Right-Wolf*, mentioned by the Prophet *Zephania*. *Zeph. 3. Hab. 1. Who compared the Judges of the Land, to Right-Wolves, which leave not the bones till the morning.* So devouring were these *Thoes*.

The *Leucrotura*, hath the neck, tail and breast of a *Lyon*, the face of a *Hau*, see the figure 53.

The *Burdon*, is a Creature proceeds from an *Horse* and an *Ass*, as the *Mule* is from an *Ass* and *Hare*. The *Italians* call this Burdon, a *Bastard-Mule*, resembling more the *Horse*, then an *Ass*.

The *Cinirus*, is a Beast begotten betwixt a *Buck-Goat*, and an *Ewe*; as the *Mulmon* is between a *Ram* and a *Goat*.

The *Hybrides* are Beasts engendred of a *Wild-Boar* and a *Tame Sow*.

The *Castoride*, is a *Dog* engendred by a *Fox* and a *Bever*, as the *Lyciscus* is of a *Wolf* and a *Wastif*.

The *Camandua*, or *Ant-Bear*, a name of a Beast I have not yet read of its discription; only find it named by Mr. *Pool*, in his Synopsis of the commentaries of the Criticks, fol. 4. in *Sexto Capite Genesis*.

The *Jackall*, or *Lyons Provider*, called in Latin *Lupus aureus*, the *Golden Wolf*, which name I have not read off but in the aforesaid author, yet of what shape or colour I can say nothing. It is reported of him, that he scents out the Prey, for the *Lyon*, and that when the *Lyon* has taken the Prey and killed it, he stands by, and lets the *Jackall* eat his fill, and when he has done, the *Lyon* begins.

LII. He beareth Argent, an *Arctocyon* proper. This is supposed to be a kind of *Hyena* engendred of a *Bear* and a *Dog*, for they bark only in the night, his feet and legs are like to a *Hans*, and of a *Bear* Colour, a deep black brown: the face is like a *Baboun*, with a beard like a *Cat*, thick necked, and a short body, with a tail like a *Rabbit*, which it continually holdeth up. It is also called a *Papio* or *Dabuh* from the Hebrew, which we in English may call an *Innocent Bear-Ape*, or *Cat*: as from its nature, being not any way hurtfull to Man, or Beast; delighting much to hear Musick. This is the Coat Armour of *Arctocus* an *Italian*.

LIII. He beareth Argent, a *Hantichoza*, of some called a *Leucrotura*; Gules. It is an *Indian* Beast, or rather Monster, having the face of a *Man*, the mouth open to the ears, with a treble row of teeth, beneath and above; long neck, whose greatness, roughness, body, and feet are like a *Lyon*: of a red colour, his tail like the tail of a *Scorpion* of the Earth, the end armed with a sting, casting forth sharp pointed quills, his voice like a small trumpet or pipe, and in course as swift as an *Hart*. This is the Crest of *Van Mancorne*, a *Dutch* or *German* name.

LIV. He beareth Gules, a *Lampa* Argent. This is a beast in the parts of *Lybia*, which hath a *Uomans* face, and very large and comely shaped spots on her breasts, which cannot be counterfeited by Art; having an excellent colour in their fore parts; they hiss like *Dragons*. They are as some write, scally all over; and the legs the same, to the feet; which foremost are like a *Lyon*, and the hinder a *Goat*, with a bushy tail like a *Spaniel Dog*, or an undock *Horse*, his stones great and hanging down. Some term this a *Phayye* Beast, because *Lampa* is Latin for *Phayyes*. This is the Crest of *Laramine* a *Spaniard*.

LV. He beareth Argent; a *Sue Sable*. This is a Monster like Beast, inhabiting in the *Newfound World*; and is of some termed a *Succarath*. It hath the head and face of a *Man*, *Dogs* ears, a rough beard under its chin, maned and bodied like a *Lyon*, but very goat, or slender at the hips, with a large hairy bushy tail, with which he covers his young one, when they lie upon his back. This is the Crest of *Susboll* an *Italian*.

LVI. He beareth Argent, a **Tatus**, of some termed an **Armadillo**, or **Guinean Beast** proper. It is a beast covered with a hard shell, divided and interlined, like the fins of Fish, buckled on its back, like a Coat Armour, within which the Beast draweth up his Body as a **hedg-hog** doth within his Prickled skin, so that it is of some called a **Brasilian hedg-hog**, it hath a Snout and Ears like a **Pig**, the Tail long like a **Lizard**, covered all over with a crust or shell, so that it could be drawn all up into the body (as it were) of the Beast, the Head and Legs scally, on the hinder Feet, five long Claws; and upon the fore Feet, four Claws, of which two are very small, see an other sort of these Creatures, Chap. 18. numb. 29. This is born by *Gwinlien*.

The Tail being long, and I wanting some, for some of these small creeping, and flying Creatures, was forced to put on either side it, as followeth,

A **Hoyle-fly**, or **Scarabee**, or a **Hoyle-Dung-fly**, such as generally feed upon Horse-dung, or Cow-shorn, when it is almost new laid, it is of an Orange or yellowish red in the body, and the wings yellow veined, 3 three Dung-flies, O born by *Dungall*.

The **Cantharid-Beetle**, or **Cantharid-Shorn-Bud**; It is of some of our Countrey Men, called a **Clock**, or **Day-Fly**: It is covered with a Husk or Shell as the **Beetle** is, but of a longer body and slender tail, the colour from the head to the tail is of a shining Green, with a reflection here and there, as the light falls upon it, of a Brownish red, and Sea Green, or Blewishness. It hath two long and slender horns, which it doth move any way, they are generally carryed bended, and are joynted, each joynt, seeming to be a knot; they are of a shining black colour, with a glofe of blew and green; It hath six feet of the same colour to the horns, each consisting of two joynts, to the first joynt the thigh are thick, to the next the legs are more slender, and the feet part more smaller, yet divided into toes or hairs, by which it holdeth fast to any thing it goeth upon. It is of a most pleasant odiferous smell, casting its sweet scent from it a pretty distance, insomuch that while I was taking this small discription from it, I was near being overcome therewith: and my hands retained the savour for a long time after the handling of it. So that I may well name it the **Sweet Scented Beetle**, or **Shorn-Bud**, they make a great noise with their wings (which are only two) in flying. See the figure chap. 19. numb. 24, 25.

A **Beetle**, It is a kind of a great black Fly, or dro-nish Creature that comes not in the light, but creeps under stones, and stocks, and foundations of houses, it hath a most abominable stink, insomuch as those that touch it, shall be infected with its smell. In the night toward evening it flyeth abroad with an hideous humming noise, the wings are covered with two black scales, which when they are about to fly, raise them up above their shoulders, so their wings have liberty to play and baite the Air. They are generally known to us; by the name of **blind Beetles**, and **Devils cows**.

The **Lesser Beetle** is not altogether so stinking, being of a longer body, having six feet, two on either side before and behind, and smooth: whereas the great Beetles are in manner round, with rough hairy feet, see numb. 57. O such 3 born by the name of **Beetle**.

A 3 such erected, born by **Blackbees**.

*

LVII. He beareth Or, a **Dragon-Serpent**, Gules holding a **Ballon**, Sable. Some say with a **Batune** in his mouth, or a **Ballinodo** in his teeth. This is the Coat Armour of *Draughadagh*, an Irish name.

In this square in the dexter Base is set, the lesser Beetle, see it described, in numb. 56.

LVIII. He beareth Sable, a **Winged Serpent**, Or. This is also termed a **Clivern Sans feet**.

✠ All Creatures both real and fained that have long and **Serpent Tails**, if they be **bowed**, or turned round after this manner, needs no mention of the manner of **imbowing**: for it is its proper posture, but if otherwise, it is to be named **how**, and in what manner it is, either **bowed**, **wreathed**, **toqued**, or **nowed**, as you see in the examples of Adders and Serpents tails. chap. 9. numb. 71. to 88. Sect. 9.

Some draw the **Winged Serpent** without ears, placing in stead thereof a **Comb**, and a pair of **Cocks Wattles** under his choppes; but that is too near the shape of the **Cockatrice**, **Sans feet**. Others without a **Comb**, only with a redish Crist, or Shem upon the head, like to a fighting Cock, whose Comb is cut off. The natural colour of these Serpents are black, with somewhat green bellies, with shining eyes. This is born by the name of *Mascharez*.

B three such O born by the name of *Barasana* an Italian.

LIX. He beareth Azure, a **Boas** (or a **Boas Serpent**) with his tail embowed or enwrapped round, Or. in the sinister chief, a **Palmer Worm**: and dexter base a **Ulap**, both proper.

Sorts of Travelling Worms.

The **Boas** is of some Heraulds termed a **Lizard Sans feet**. This is a great bodied **Serpent**, and go all upon their belly; the live generally in sucking **Cows**, and in so doing, they kill them. It is born O in a Field B by the name of *Boaz*.

The **Palmer Worm**, of the English Northern People is called an **Dubut**; but them of the Southern parts call them **Palmer Worms**; because of their wandring, for they never stay in one place, but like superstitious Pilgrims do wander now here, now there; of these kind of rough hairy Worms, there are several sorts.

The **Bear-Worm**, is a rough rugged hairy Worm, of a Chestnut colour, which if you touch runs all into a round (as it were) a hairy ball. These cannot indue to be confined to any particular Herb to feed upon, but tast of all, going disorderly where they will, and live as they list.

The **Pityocampe**, or the **Pine Apple Caterpillar**, it is a rough hairy Worm, three fingers long, and three fingers thick. These Worms consist of eleven slits or cuts, or joynts between the head and tail; these have sixteen feet (according as all other hairy Palmer Worms have) that is, near the head, on both sides three, in the middle of their bodies, on both sides four; and at the end of the tail, on both sides one. Their former feet are crooked and small, their other feet are broad with many Jaggies,

Jaggers, or noches, like a Saw: their head like a Pismires, the hair or bristles stand upright, and are white on the sides, shining or glittering on the back, the middle whereof is garnished with many spots as if they were eyes, whose biting is most venomous and poysonous, their hair stingeth like a Nettle.

The **Vine-Fretter**, is a little hairy Worm, with many feet, that feeds upon Vines when they begin to shoote.

The **Scolopendra**, is of a loathsome, and an abominable smell; it is like the horned Worms; yet wants horns, it goes bendingly with the head stretched up aloft, with its former two feet; it is the length and breadth of a Mans finger, with a few scattering and rugged hairs, bristly and hard, both on the back and sides; the back was black, belly and sides, reddish enclining to yellow; the whole body was divided into fourteen joints, or knots, and every joint had a furrow or wrinkle running all along the back. The head black, the mouth crooked bending like hooks, teeth notched like a saw, and went on sixteen feet.

The **Wleevil**, hath a certain small Beast or Worm like it, which breeds in Trees; they are somewhat bluish or black, many of them have long and sharp pointed beaks, or bills, which do great harm to grafts, and yong Trees: See *chap. 18. numb. 108. 148.*

LX. He beareth Or, a **Lion-Wivern**, the Tail double embowed, Azure. Some term it a **Lion-Serpent** Tail double turned: Which is far more proper for it, then to call it, a **Lion-Dragon**, as I have found it oft in Antiquity Blazoned. These are often born **Rampant** and **Sessant**, the Tails ever being drawn either in this form, or after the next example, which is the common way. This is born by the name of *Lion-celet*.

Per Fesse G and S 3 such O born by *Newton*.

LXI. He beareth Vert, a **Wolf-Wivern**, Argent. Some have termed it a **Wivern-Wolf**, a **Wolf-Serpent** and a **Serpentine-Wolf**; though of old, a **Dragon-Wolf**; but that was in the days of ignorance, when our Fore-fathers understood but little difference in things: and between things and things. This is born by the name of *Wolfsley*.

LXII. He beareth Sable, a **Horse-Wivern**, (or a **Horse-Serpent**) Or.

Here the Artist must take special notice of these three **Wivern composed Creatures**; and the like to them, of the **Serpentine breed**: and those of the **Maratine**, as **Sea-Lyon**, **Sea-Wolf**, **Sea-Horse**, and the like Sea Creatures, for the difference is only in this, that all Sea Monsters have their feet like to **Swans feet**, and their tails like the end of a **Salmons fined tail**; see *chap. 16. numb. 5, 6, 7.* Whereas the tails of them of the **Serpent kind**, are armed with sharp stings and their feet according to their own kinds. This is born by the name of *Horswinne*.

LXIII. He beareth Azure, a **Wivern-Serpent**, Or. This differeth in nothing from the **Winged Serpent**, but in having feet, and a fuller body, it is termed also a **Wivern sans wings**, with the

tail **extendant**. This is the Crest of *Farrington* of *Farrington*, and *Werden*, in *Lancashire*.

B 2 Wiverns-Serpents (or **Wiverns**, Sans wings) rampant Endorsed, their necks and tails fretted, O which in an old MS I find anciently born by the Duke of *Barbunn*, now called *Brabant*.

LXIV. He beareth Argent, the **Serpent Python**, Azure. This Serpent was slain by *Ovid*, to proceed from the flume of Earth, after the *Ducalion Flood*, which *Apollo* the Son of *Jupiter* by *Latona*, slew with his Bow and Arrows: and afterwards sowed his teeth which grew to an Army of men, the tail of this Serpent is **embowed contrary** to the common way as I shewed, *numb. 38.* Therefore ought to be termed, with his tail **created embowed and debruised**.

LXV. He beareth Or, a **Basilisk** (or **Cockatrice**) **Serpent**, proper. This kind of Serpent, hath the head of a **Cock**, with a full round body, and the tail of a Serpent, having six short legs: it is of a brown red colour, with a lighter colour on the belly. This ought to be blazoned, a **Basilice-Serpent**, with its tail **created, flected and reflected**, but seeing that anciently they have bin blazoned, with only the bare name, without any such addition, as I have added to these two last examples, though their tails were also thus anciently turned: I shall therefore leave it to the Judgment of the judicious, whether they be necessary or not. This is born by *Cockfing*.

In the base sinister, I have added the shape or form of a **Caterpillar-Worm**; as it turneth unto a Husky or Shathy hide, in the end of the Summer; in which it lyeth all Winter; and in the Spring, breaketh forth, into a **Butter-fly**; leaving the Husk empty and void.

LXVI. He beareth Azure, an **Hyrcanian Leopard**, proper. This Monster-like Creature hath the head, snout, and eares of a **Dragon**, the body of a **Panther**, curiously set with round spots, in form of roses, of variable colours, on a yellow skin, whitish on the belly; the tail of a **Lyon**, and the feet like the **Pounces**, and tallants of an **Eagle**. This is taken to be both the Coat and Crest of the Family of *Royaume* of *Venice*.

LXVII. He beareth Argent, an **Hobdropus**, Gules. This is a Monster-like Creature having the head, body and feet of a **Talbot**, or **Hound**, breasts like a **Woman**, wings of an **Eagle**, and a long tail of a **Serpent**. This is the Crest of *Lozana* of *Spain*.

B the like O is born by *Byragull* of *Italy*.

LXVIII. He beareth Sable, a **Gorgon**, Argent; This is a strange *Lybian* Beast, it hath red fiery eyes, which continually look to the ground, from the Crown of his head, he hath a long **Hane**, which hang down all about his head, to almost his nose: their body is all Scally from head to foot, which are cloven like the foot of a **Deer**, it hath a scally long tail like a **Serpent**: great teeth like a **Boar**. *Plynie* makes mention of these **Gorgons**, and saith they have scales set all over them like a **Dragon**, having no hair, except on

on the head, great teeth like **Swine**, having wings to fly, and hands to handle; in stature between a **Cow** and a **Calf**.

LXIX. He beareth Argent, an **Estria**, Gules; **Horned Or**. This is one of the Poets compounded Creatures, having the head and neck of a **Bull**, and the body of a **Giffen**; that is, the forefeet and legs of an **Eagle**, and the hinder part of the body, feet and tail, of a **Lyon**. This is the Crest of *Esiringberge* of Holland.

LXX. He beareth Sable, an **Odonta** or **Indian Or**, Argent, **Horned** and **Hoofed**, Or. This is a Beast of a wonderful strength, inasmuch that it will compare with the **Elephant** for Maisterie therein. It is a Beast that hath the head and mane of a **Horse**, with three horns like to the **Antelope**, the middle-most with the Noches, or Saw teeth standing upward, and the other two horns with the noches of the horns standing side-ways, as if they were guards for the middle horn: the body and legs are like a **Bull**, with a bushy hairy tail like a **Horse**, extending it self to the ground, and whole hoofed.

Several sorts of Spiders.

IN this quarter is the true shape and form of a **Field Spider**, like whereunto is the **Horse-Spider** only, the legs are smooth, and a little longer: the body also is smooth, of a black Earthly colour, whereas this of the Field is a brown, and some of a light hair colour, and Ash colour, see *numb. 72*.

The **Long hairy legged Field Spider**, of some called the **Wolf-Spider**, or **Hunting-Spider**, because they are wild, living in the Fields and open Air, see *numb. 72*.

The **Phalangie**, or **Phalang-Spider**, are of several sort, some great, others lesser, both dangerous, hurtful, and poisonous: they are of changeable colours, violent, libidinous, sharp topped, jumping and leaping, as they go. One hath a red head, body black; speckled, or garnished with many white spots all over.

The **Fornication**, or **Pismire-like Spider**, hath the body black as Soot, the neck Ash colour, and his back glittering (as it were) with many Stars on it, called the **Star-Spider**.

The **Lybia-Spider**, because found, not elsewhere; the body round as a ball, black and glittering, with very short stumped feet.

The **Pedeoras-Spider**, is of a bright Azure, or blew colour, which hath six or eight, long high and lofty feet: *Plinie* saith, these **Spiders** have a black Mossiness, or soft down upon their bodies.

The **Sphekion**, or **Wasp-like Spider**; because it is so like a **Wasp**, save it lacketh wings. It is of a passing deep red.

The **Tetragnathan-Spider**, hath half his head divided with a white line, with an other running cross

wise: the other sort, is of an Ash colour, and very white in the hinder parts. they have broad, and whitish bodies, rough footed, with two swellings or bunches, standing out on the head, the one broad, the other stands right forth.

The **Cantharides Spider**, is a small Spider found amongst Pease, Beans, or other Pulse in harvest time, they are like the **Cantharides** or **Spanish Flies**, of a very red and fiery colour; such as these some Englishmen, call **Twings**.

The **Cranocalaptes Spider**, is a small Creature to see to, nodderth its head as it goeth reeling and staggering, being great and heavy, and somewhat long of body of a greenish colour, it hath a sting on the top of of its neck. *Aetius* saith they have wings like **Butterflies** that are found amongst Barly.

The **Carantula Spider**, or the **Spider of Apulia**: it hath only six legs, and a stretched out tail: of them there are two sorts one of a brown, and other of a yellow colour.

The **Agrostis Spider**.

The **Crab-Spider**, is of a whitish colour resembling scum, or frothy some, the head very little, placed under her belly, being crooked or bendind like a hook, (as is to be seen in the **Crab-Fish**) and his back garnished with many white spots.

Such a Spider S in a Field O born by the name of *Tersell* of Tyrol in Germany.

The **long legged Spider** of the Graden, or Field, is of a small body and almost round, of a brownish colour and is called the **Shephards-Spider**, because they are generally in the grounds where sheepe pasture.

The **black Spiders**, and **white Spiders**, are general seen in all Houses, Gardens, and Fields, in England.

The **Spinner**, or **Spining Spider**, is the smallest of all the **Spiders**, not exceeding a grain of mustard in the body, and is of a deep Ash colour.

LXXI. He beareth Argent, a **Simi-Culpus**, or **For-Ape**, termed by *Amb. Parry*, a **Portentous**, a Beast in the fore part like a **For**, or **Wolf**; except the ears which are round, and pild like a **Bat**: the hinder part like an **Ape**, a tail like a **Deer**, the feet have only three fingers, or opens, with sharp claws. It is a kind of **Ape-Bear**, see *numb. 51*. It hath a bag under its belly, with a pape hanging very low down.

The **Chiura**, is a Beast in *Hispania nova*; and the **Seruboy**, a Beast in *America*: which have skins, or bagges under their bellys, wherein the Females keep, and lodge and carry their young, untill they be able to provide for themselves.

The **Cynocephall**, the Female hath a womb without her belly wherein lyeth her young ones.

The **Glaucus**, is a kind of Fish whereof the Male doth swallow up all the young ones, when they are in any danger of other Fish: and afterwards yeeldeth them forth again safe and sound.

In the cheif of this square is a **Gloc-Worm** with his belly upwards, which is described before. *ch p. 9, numb. 55*. This being set here, to shew the tip of the tail, from whence the brightness doth proceed, that shines so gloriously in the night.

LXXII. He beareth Argent, a **Sea Rhinoceros**, Azure. This is by *Gesners*, and other Authors given us by that name, but none of them mention it colour therefore shall say no more of it.

In the sinister cheif of this quarter, is the Field Spider; spoken off before. *numb.* 70. whose form and shape is thus, as in the figure.

LXXVIII. He beareth Argent, a **sea Bulls-head couped**, Sable. By the name of *Bullock*. This is by *Gesner* said to be the figure of the Sea Bulls-head, whose fore-head is scaly, having strong bristly hairs, standing in a manner upright upon the hinder part of the head; the horns smooth, not standing up like the Land-Bull, but standing out-wards over the Ears, with a kind of double bending, too and again; and a large **Cat-like** Beard each side his Nose.

The signification of Beasts used in Armory.

I. **The Lion**, is the *Hieroglyphick* of Heroes, of Illustrious Princes, and great Persons: And denoteth Dominion, Command, Magnanimity, Vigilancy, Strength and Terroure.

Lion Rampant, signifieth Magnanimity. So *Ariel* is the *Lion of the LORD*, *Ija.* 29. 1. He is of great courage, And not to be Daunted.

Lion Passant, sig: Resolution, not to be stayed or hindered in his Purposes and Resolutions.

Lion Dormant, sig: Repose and rest after Victory and Labour; yet Vigilency, for he ever sleeps with open eyes.

Lion Couchant, sig: Sovereignty and Majesty, *Judas* shall ly down as a *Yong Lion*, who shall rouse him up. *gen*

Lion Sejant, signifieth Advise and Counsel. (499)

Lion Gardant, sig: Prudence, and wise Counsell.

Lion Saltant, sig: Valiantness, and Audacity.

Lion Regardant, sig: Care and Circumspection.

Lion double Headed, sig: Policy and Politick Actions.

Lion Fork Tailed, sig: Stenuousness and Magnanimity: For when the Lion is angry, he shews it by the agitation and moving thereof.

Lion taile Bowed, is the Embleme of a Person, that though he be angry, yet doth suppress and keep down that Iracible faculty.

Lion Chained, sig: Homage and Subjection to a Prince or his Leige Lord and Sovereigne.

Beaver, and **Ottar**, are both Emblemes of Sly dissembling companions, who will keep good quarters with contrary sides, in affection to neither, but onely for their own private profit and interest.

Unicorne, is the embleme of Strength, and sig: the bearer to be a lover of his Countrey: One that shews vice, and loves purity of life; Is a generous warrior, who will rather die then be Captivated.

Bull, sig: Labour and Industry, and denoteth a privileged person out of hopes of an Increase.

Bull Rampant, sig: Wrath, Fury, and Madnes.

Bull Passant, sig: Deliberation and Discretion with Industry. *Pas a pas*, that is Step by step: so Industry and Labour with Discretion will overcome the greatest difficulty. it will level Mountaines.

Camell, is the embleme of Sstinence and Abstinence, which is a Prelatical quality in this Creature; denoting the Indefatigable perseverance of the bearer.

Elephant, the embleme of Vigilency, *neq. jacet in somno*: But like a faithful watchman sleeps in a Centinels posture. It denoteth Strength, Ingenuity, and Ambitious of peoples praise, it sig: also meekness and Devotion.

Tyger, is the embleme of Cruelty, and signifies quickness in Actions of greatest concernment.

Panther, and **Dunce**, the embleme Felony, variety, & change. But the bearer to be of that sweet and Amiable disposition, as that he draws all men to love him.

Leopard, doth denote Valiant and generous Warriours, which Enterprise hard things by Force and Courage; Claming valour by extraction, with activity & Promptitude. And shews the bearer to be of a violent spirit and what he wants in Strength hath in Policy.

Beare, the embleme of Wrath, and for courage is incomparable being provoked, or robbed of her Whelps; For they are singular in their love towards their yong. It also denotes policy and strength in Fighting.

Wolfe, sig: Valiant Captaines that do in the end gaine their Attempts after long Seiges, and hard enterprises. So that the bearing of them denotes the person to be serviceable to his countrey in destroying such as are fierce, cruel and Treacherous.

Griffin, denotes Vigilency and life, signifying what he cannot do one way he will do another: what his wings will not, his claws shall, He flies with the Hawke, and runneth with the Hound.

Ermine, denotes Purity and Sanctity, it being of so pure a nature, that it will chuse rather to be taken and die, then to defile its skin.

Sheep, is the embleme of Innocency and Meekness, of Peace and Utility, And sig: the bearer to be a man profitable to his countrey and an increaser of riches. One that denyeth not himselfe for his countrey.

Dog, the embleme of Loyalty, and an affectionate and true friend in adversity. And it is observed that there is not any virtue in a man, but there is found Sparks of it in this creature. It sig: the bearer to love his pleasure abroad, and his profit at home.

Cat, is a Domesticall creature, and is the embleme of good Husbandry and Housewifery, and is cautious of being polluted, or defiled in the least.

Conie, or **Rabbet**, as *Solomon* saith, *they are but a weak nation, yet they build their houses in the rocks*. The first Bearers of them seemed to be excellent Pyoneers, skilful in pyoning, and lucky in undermining and subverting of Cityes, fortified Townes, and Castles.

Squirrel, sig: his bearer to be careful in keeping the love and affection of his followers and Retainers, and is sure they will stick to him in tyme of need. It is the embleme of good Society and Housekeeping, being never unforsed.

For, is the embleme of a Cuning crafty man, and well becomes Lawyers and Attorneys and such sort of people, who under pretence of doing good, when they have got what they can, and well spunged their Clyents, *Laugh at them for fools in dealing with Knaves*.

Ape, is the embleme of a ridiculous behaviour, and denotes

the bearer to take delight in ridiculous jestings, more then serious Actions. *Venus chamber, then Mars's campe.*
Horse, is the emblem of War, that doth foretell (by Instinct of nature) the battle afar off. according to the saying in *Iob* 39. 28. and doth denote an excellency, In swiftness of pace, quickness of spirit, courage of stomach and Magnanimity. And signifies the bearer to be a Vanter after victory, but dejected if conquered.

Ass, the emblem of Sloth, a creature that regardeth not blows, neither will he be spurred forwards to quickness of Action, but continueth in Dulness. And denotes the bearer to be of such a nature, that faire words shall work upon him more then Stripes.

Gule, as the Ass, is an emblem of much patience, and willing to crouch under its burthen. and denotes the bearer to be honorable on the one side: recounting of their virtues and atchievements much, but little of their genealogies, or how descended.

Bind, a Symbole of an Harmlesse person, and therefore Armelesse: whereas all other creatures are Armed.

Hart, and **Stag**, the emblem of long life, and heareings; It doth represent those that are apt to be abused by flattery; and born in Armes betokeneth sometyms one skilfull in musick, also a wise and politick man, one that is rather desirous to stand on his guard honestly, than to annoy others wrongfully.

Buck, the emblem of Society.

Roe, the emblem of Love, and Lady of honor: she is called *Tabitha* by the *Hebrews*, which we Interpreted *Dorcas*, her Furre is *Ermis* being full of spots on a skin delightfull to behold.

Goate, the Symbole of generation, and being provoked will not refuse to assault his enemy: he may betoken one that is willing to fare hard, so he may be honored with high Impliments. And shews also, that the bearer used more policy then strength or valour in atchieving victory; or got his honor by some such maines.

Antelope, the emblem of valour and Irefulness, folly and madness; it denotes a man to do an action without discretion, Virtue is not virtue without good action.

Boare, is the emblem of Sensuality and beastlyness, yet is an absolute Champion amongst Beasts, beareng weapons both offensive and defensive; and is one that useth himselfe to hardship, the better to withstand his adversary. He betokeneth in *Heraldry*, a man of a bold spirit, skilfull and politick in war; and one of that resolution that he will dy valiantly in the field, rather then secure himselfe by an Ignominious flight.

Oxe, as is noted before in the Bull, is the emblem of Labour and industry, it denoteth one to stand up for the common good, and is usefull in plowing up the ground for the increase of come and plenty in the countrey.

Crocodile, by the *Egyptian Hieroglyphicks* doth denote fruitfulness and plenty; yet it is a *Salvage* & devouring beast, by which is deciphered a mad foolish fellow true to none, nor trusted by any; yet a friend to the Swin onely, & to the Trochilus, but for its one belly. It may also sig. one that hath many enemies but few friends.

Dragon, is the emblem of vigilancy and fortitude, and is a fit bearing for vigilant and strenuous Heroes, that will take hold of an opportunity & occasion.

Lizard, is an emblem of security, as being Armed with a coate of male; having a scaly and painted skin. and sig. one that rests himselfe secure, trusting to his owne strength of Armes.

Adder, is the emblem of Wisdome and Prudence, neither harkens to the Charmer.

Tortoise, lives both in water and on the land, and denotes such as are worthy and deserving of honor, as from those virtues and operations that nature hath given to them.

Sphinx, is the emblem of cunningness and crafty devises, and denotes a man to be of a cunning genius, full of Inventions, but tyrannicall & monstrous in his actions.

Hedgehog, the simbol of a good provider, that in tyme of plenty prepares for cold and Scarcity; and sig. a man to be expert in gathering of Substance: and one that providently layeth hold upon proffered opportunities.

Toad, the emblem of Choller and Splen; and denotes an hasty angry pettish man, that is easily stirred up to anger, where unto he is naturally prone, from his birth.

Ant, or **Wismire**, they are creatures not strong, yet prepare their meate in Summer; denoting a person to be a good provident caterer for his family.

Bees, & **Wasps**, shews the nobility of progenitors, as being the offspring of Laborious parents: for Wasps are bred from Horses, and Bees from Bulls. and denoteth an hasty man, one prone to revenge if injured.

Grashopper, they have no King yet go forth by Armys; by the *Athenians* it was a note of an home bred race of nobility and gentry.

Serpent, the emblem of Prudence and wisdome, and denoteth one full of subtilty and sharpness of wit.

Serpent stoping her eare, betokeneth wilfull deafness, or one that will receive no counsell or advise.

Butterflie, the emblem of Vanitie, and denotes fickleness and vnconstancy, never resting satisfied in one state or condition of life they are in.

Worme, and **Caterpillar**, are the emblem of Avarice, and sig. a covetous greedy seeking after worldly trash & things below, never minding those above.

Spider, is of an honorable house, for she taketh hold with her hands and is in kings Palaces: by all which is signified Prudence, Fortitude, Providence, Labour, Vnity, and Nobility. for whilst the slothfull is clothed with rags, he that is Industrious in his calling shall be honored in the gates, and stand before kings.

Heads of beasts, the bearing of heads (next the whole body) is most honorable, and it shews that the bearers of such coates Armour were not forced to stand to the face of their enemy, but did it out of a coragious spirit. It betokeneth also Iurisdiction and Justice.

Heads Grazed, is one of the best maner of bearing, and betokens some memorable action in the first Bear thereof, as having severed violently, or pulled by force the head from the shoulders of some Turbulent person.

Heads Couped, is the Hieroglyphick of Conquest.

Bear, or **Dog**, **Muzzled**, signifies the Bridling of rage and curbing of furious spirits.

Heads Muzzled, denotes a servile subjection and bondage to a master or Prince.

Horns, are Symbols of Honor, Fortitude, and Empire, not onely among the *Ethnicks* but the *Hebrews* them; selves. in somuch that *Rahabney*, the *Crown*, & *Horn*, are in Secrate Scripture, univocall expressions of Glory and Dignity, *Psal.* 89. 24. and so *Moses*, *Exod.* 34. 30. is said to have horns in regard of his faces refulgency.

Broken Horns, on the contrary betokeneth Ruine & destruction. as in *psa* 75. 12

Horse Spancelled, or Fettered, denoteth Servitude, with homage and Obedience to a Lord or Prince.

Beasts Collared & Chained, (of any kinde) betokeneth the like Subjection to a great Prince.

To conclude, From these Brutish creatures mens minds are plainly taught how to become the Imitators of Virtue and good living.

ADVERTISEMENT.

To the Courteous Reader.

HAVING now finished the severall Chapters concerning Flowers and Beasts, And coming in the next place to those of Birds: It may be Demanded, Why I should make such an exact and so particular a discription of them: As to take notice of the Colours of every Dividuall and Prime Feather, Both of the Body, Wings, and Taile; together with the Colours of the Shafts, Vanes and Webs. And of the Principles, or Quill Feathers, How they are Painted in their Interiour and Exteriour Filiments? And not to do the like in Flowers, Fruit, Beast, and Fishes; They having as much variety of Painting in them, As Birds and Fowles?

To which I shall in brief give this Answer, That the Beauty of the Colours variously dispersed in Flowers Fruit Fish and Beasts, doth principally consist in their Exteriour or outward parts, Therefore needs noe such exactness.

Neither doth their Motion of Shaking, Going, Running, or Swimming, any way cause an alteration in their coloured Spots, Stroaks, or Lines, variagated and here and there intermixed; by making them either bigger or less, Wider or closer: As it manifestly doth in the going and flying of all party coloured Birds and Fowles. For if you take notice of them in their standing or walking Posture, with their Wings Complicated, or close to their bodies, with their Tails closed, or shut together; They doe

generall sceme (at a smal distance) as if they were of one entire, or selfe colour on the Head, Back, Sides, and Scapular Coverts; Some-tymes the Taile and the Quill feathers of a deeper dye; and some with a kinde of a dilute or dusky white, on the Breast Belly and Thighes: Yet in their flying, there may be perceiued severall Spots Lines Borders or Rings, on some parts of them, which before could not be seen or discerned.

And againe some there are all over Spoted, Either with round Circular oblong or Square Spots: Or else bespeckled with Lines, either Long or Short, Perpendicular or Transverse; set in opposition, or alternately, with diverse other ways: Which in their flying, will with the opening of their Wings all disappare from what they were before; And other remarkable things be discerned. As the form of Spots will shew (or become to our sight,) Great Rings, streight or transverse Lines, Stroaks, Semicircles, and such like, either on the Wings, Breast, Back, Sides, along or overcross the Taile; and so in other parts and places; As by their particular discriptions you may easily perceive. Which reasons did so Sway with me, that I thought it good to be more precise in them, than in any of the other creatures, which I beg of thee not to think too tedious in reading; For for thy sake I have not thought them so in writing.

Farewell.

T O

The Worshipful and Highly Esteemed
RICHARD LEGH of *Lyme*, Esquire;

AND TO

THOMAS LEGH, his Brother.

Worthy Sirs, I am so far from hiding my own Defects, that I must needs acknowledge there is none in their Labours so imperfect as my self, yet Favour covers a multitude of faults: Neither can any plaid perfection in such cases, except he be Adorned with those Abilities of which I am wholly Ignorant. Then be pleased to accept of the Imperfect-perfect, and hidden-found Particles of Herauldry, gathered in one Body, by the weak Industry of him, who is

Tour most Devoted Servant,

Randle Holme.

CHAP. XI.

WE Proceed now to such Creatures as live above the Earth in the Air, and by Water. Such are termed either Birds or Fowls; nevertheless in their Species they differ much, touching their particular qualities: for some of them are simple, some others Subtile, some Solitary, some Sociable, some Medious, some more Morose, some Articulate, some Inarticulate and not to be understood, some Docible, some Voluble and indocible. Again, some are only for the Land, some for the Air, and others for the Waters. So likewise some have whole Feet, some Palmed, some divided into Toes or Pounces, and some have either few or little Toes, or scarce any at all.

All Fowls are in Coats of Armour to be born, as is best seen in their Natural Actions, as going, sitting, standing, flying, &c. Otherwise saith Mr. *Gwilliams*, fol. 218. memory shall be said to be false, because Art in such case doth not Imitate Nature, but works preposterously.

Such Birds and Fowls as are born in their Natural colours, whether of one, or diverse colours, shall be only named in Blazon, and no mention made of the colour, or colours, but be only termed proper, but if they be in part, or in whole contrary

to Nature, then to be named in each particular part and colour.

I. He beareth Azure, an Eagles head erased. Or. Herauldry make only this distinction between the Eagle and Phœnix and Pellican, the two latter have no Tuft, or Beard, fixed to the under part of their Beak. This is born by the name of *Painter*.

A 3 such S born by *Tellen*.

A an Eagles head couped G with a Barre in his Beak bend ways O born by *Van Trenbach*.

II. He beareth Gules, a Cherubs wing, Argent; or else blazon it, a Wing Pendant, Argent. Wings when they are born in Coats, are termed usually the Wings of the Noblest Creatures; And therefore they are not unfitly in this place, or in the like bearing, called the Wing or Wings of Cherubins, the Wings of Arch-Angels, &c.

With this note of Observations; that if they be Mettle (either Silver, or Gold) then they are Cherubs Wings; if they be party coloured (that is) the long feathers Mettle, and the Ponions colour, or contrarywise, the first colour and the other Mettle, they are termed, Angels Wings; but if all of one colour,

P.M. Rici. Ligh de Lime Armigeri. & Tho: fratris eius. H. Consec2

H. Janus

then **Eagles Wings**. This is born by the name of

Wing.
G 5 such in Salter A born by *Porter*.
G 3 Wings pendant O born by *Band*.

III. He beareth Or, two **Wings** of an **Eagle** pendant and conjoynd Gules. They are termed also, a **Pair of Wings**; or **Wings inverted**. Born by the name of *Hall rough*.

Two **Wings elevated** (or points of the Feathers upward) and two **Wings elevated**, and conjoynd; if they touch or joyn in the bottoms of the positions, as *chap. 12. numb. 57*. Also three Wings conjoynd in triangle are born in Coats of Arms, as *chap. 13. numb. 77*.

O 2 such conjoynd and elevated S born by *Hal-*

ney.
S 2 such elevated and conjoynd born by *Bresin-*

gram.
G 2 Wings conjoynd, the point reverted or pendant, Er. by the name of *Kency*. *Grillims* terms them 2 Wings in Pale, or Paleways inverted. *fol. 391*.

IV. He beareth Gules, an **Arch-Angels Wing** elevated, Or: with an other expanded, Argent. This is born born by the name of *Interfall*.

If these had been both of one colour, or mettle; then they had only been termed, two **Wings expended**; yet being of themselves, some term them **elevated** and **expended**; because they may be expended, and pendant. What this expended signifieth, see *numb. 28. 30*.

2 such O and G out of a Coronate A is the Crest of *Alden*.

2 such Wings expended, O each charged with a fesse G is the Coat of *Geroltzeck*.

V. He beareth Sable, an **Eagles foot couped** in the middle of the Arme (or leg) Argent. The Legs of all Birds of Prey are termed **Armes**, especially of the larger sort, as you shall hear hereafter. This is born by the name of *Histeger*.

A 3 such G born by *Hvanfer* or *Van Hanfer*.

B 3 such turned to the finifter A by *Weislant*.

G 2 erected in Salter, O born by *Van Greunew*.

VI. He beareth Azure, an **Eagles leg**, or an **Eagles Arm**, crazed in the thigh, Or. *Falconers* term the **Eagles** legs, his **armes**; and the toes, his **pouches**; and the claws, his **tallons**. This is born by the name of *Canban-*

gell, this is both by *Grillim fol. 226*. and *Morgan fol. 65*. termed S a leg in Pale crazed a la quise, A tallons G by the name of *Canbanfer*. This term a la quise in French signifies the thigh: as much as to say rent in the middle of the thigh.

A 2 such in Fesse (or Fesse-ways) S or rather Bar-

ways, is born by *Die Pefler*.
VII. He beareth Sable, an **Eagles leg crazed**, Or: with 3 **Ostrich feathers conjoynd**, Argent. The quills of the second. Born by *Featherstot*.

The like to this leg, hath a Wing conjoynd and elevated, Argent; which of some is termed to be in Pale. See *chap. 13. numb. 1*. and is born by *Bachen of Austria*.

*

An **Eagles leg** O with a double Rose set about the higher part, G is the Crest of *Greifenklaw Van Volrath*, of *Rheyn Palatinate*.

G a Leg, B and Wing conjoynd S is born by *Sigrot*.

A a Leg G and a Wing conjoynd V born by *Van Nenningen*.

VIII. He beareth Gules and **Eagle** with two **Heads** **Sans wings**, crazed in the middle of the body, Argent. Others term it the body of Eagle with two heads, and no wings, crazed above the thighs; (or at the rump or crupper) they are born also after this manner, couped in the body. This is born by the name of *Barlow*.

IX. He beareth Vert, an **Eagle Displaid**, **Sans arms**, and **train**, Or. That is, without legs and tail, born by the name of *Wallis*. Some say **Dismembred** of his **Arms**, and **Robbed** of his **Train**, or the **Train-Houlded**, that is fallen off.

O the like S with a Scarf about his neck, O born by *Schaden*.

A the like, **Sans thighs** S by *Van Reicham*.

X. He beareth Argent, an **Eagle sans Legs**, Gules. Some termed it an **Eagle Close**; because its wings lye to its body. Some term it, an **Eagle Complicated**; having its wings folded, and wrapt together to the sides of the body. But to term it an **Eagle**, **Falcon**, or any other kind of Fowl or Bird, if **close**, will be sufficient: but if in any other posture, then to mention in what posture, as the examples afterwards will demonstrate. This is born by the name of *Footlofs*.

B 3 such A is born by *Littlegood*.

XI. He beareth Azure, a **Demy Eagle volant**, or **Overture**, or **Displaid**, Or. Others term it, an **Eagles head**, between two **Wings**: but then the **Wings** are not to joyn to the body, as you see these do. This is the Crest of *Eaglesby*.

A a Demy Eagle G crowned O in base two Basons or Batunes in Salter, the dexter surmounting G by the name of *Waldech of B. wia*.

Per Fesse A and G a Demy Eagle issuant S by *Burgram Van Glett*. Also by *Ogspere*, the like is born with two heads.

O on a Fesse G 3 Roses, a Demy Eagle displaid issuant, S is the Coat of *Wayfen of Fran. kford*.

XII. He beareth Argent, an **Eagle with her neck imbowed**, Sable; and some say with her **Beak imbowed** to her breast, others her **Head imbowed**.

Some again, termed it, an **Eagles close**, or **trussed**, or **complicated**: but all winged Creatures, (as I said before) having their **Wings** close to their sides, needs no other term, but only to name the Fowl, or Bird, what it is, &c no more. This is born by the name of *B. rger*.

A 3 such B is born by *Halhall* or *Halhallier*.

XIII. He beareth Gules an **Eagle at Gaze** in full aspect, Argent. This is also termed an **Eagle at gaze**, with her **Body displaid**; and an **Eagle Spectant**, as looking forward, having her breast only in sight. Others term it an **Eagle standing at gaze**, **foreshort-**

F f 2

ned;

ned; as having little seen but the foreparts, see *numb.* 44, 45, 46. and *chap.* 13. *numb.* 3. This is born by the name of *Egase*.

XIV. He beareth Or, an *Eagle*, Gules; or an *Eagle* with its *Wings complicated*, or *closed* to his body, as some do term it.

But being close I judge it needless to express any such thing, for by naming an *Eagle* (or any other sort of Fowl) and using no other term, we may suppose it to be such a Bird in a standing posture, as I shall observe it in the future examples. This is born by the name of *Aquila*.

XV. He beareth Sable; an *Eagle Collying*, Argent. This Eagle is (as it were) holding up her head, stretching it self a loft, or upright; and is a posture Birds of Prey often use, which the Artist term in *Falconry Collyeth*, that is the *Hawk* noddeth her head, making a motion as if she would take a flight. This is born by the name of *Collyeth*.

XVI. He beareth Vert, an *Eagle regardant*, Argent; by the name of *Griller*.

As concerning the Beaks, or Bills, & feet of Birds, most Armorists (if they be found of different colours from the body of the Bird) do term them all generally *Beaked*, and *Membréd*; the first for the Bills, the latter for Legs, and Feet. Yet Mr. *Williams* holdeth that as there is a distinct difference in the nobility of Birds, so there should be in their blazon: as Bird of Prey and for Battle, to be termed *Armed*; and all others to be *Membréd*.

XVII. He beareth Argent, an *Eagle recurfant* proper, *perched* on a *baston*, Or. This term *recurfant*, is taken from the *Latin* word *recurvo*, to turn backward. Some blazon it, an *Eagle invertant* from *inverso* to turn in contrary to the right way, or to turn the inside outward, see *numb.* 22. 26. This is born by the name of *Turner*.

XVIII. He beareth Azure, an *Eagle in her Majesty*, Argent; crowned, and holding in her right foot a Scepter Or, *Perched* on a *Baston*, or *Bastinado*, Gules. This is born by the name of *Major*.

All sorts of Birds, except Birds of Prey, having their Bills or Beaks and Legs, of a different colour from their bodies, shall be termed *Membréd*, and their Claws or Tallons, *Armed*, see *numb.* 16.

XIX. He beareth Argent, an *Eagle in a trian Spect*, Gules, *standing* (or *Perched*) on an *escrowl* (or *rowl*) Or. This Eagle standeth so as three parts of the body is seen, and no more: being neither full, as *numb.* 13. 18. nor half seen, as *numb.* 14, 15, 16. but is in a posture between both, which Limners, in a picture term, *three quartered*. This is born by the name of *Fuller*.

XX. He beareth Azure, an *Eagle Or. Seiant* or *Seated* on a *Pirch*, issuing out of the dexter side, Argent. This is born by the name of *Pearcher*.

XXI. He beareth Vert, an *Eagle Overt* (or *overture*) (or *Wings disclosed*) Argent; *Beak*, and *Arms* (or *Legs*) Or. *Overture* is a term to shew that the Wings are spread open on either side the head: it is also of some termed, *flotant*, or *hovering*, or an *Eagle* with his *Wings displaid*; as if he were taking himself to flight. This is also of some blazoned an *Eagle volant*, but that term is more proper to them when they have their feet drawn up to their belly, as *numb.* 38, 39, 40, 41. This is born by the name of *Overhead*, or *ollerhead*.

B an Eagle thus O standing upon a Bible, closed G Leaves and Claspes, and Garnished O with an Inkhorn and Penner in his Beak S is the Coat belonging to the Scriveners Company.

A the like O standing on a round Hill V by *Erms of Chester*.

XXII. He beareth Argent, an *Eagle Tergiant*, Or. This Eagle turned with its back only to our sight, is of some termed *invertant*, or *recurfant*, see *numb.* 17. 26. This is born by the name of *Terpin*.

XXIII. He beareth Sable, an *Eagle Surgiant*, (or *rowlant*, or *rising*) Or. These terms are given to all winged Creatures, and Feathered fows, when they only lift up their Wings, as if they were about to fly, or old it was termed an *Eagle*, lifting up his Wings.

In the rising, or surgiant, or preparing of Birds for flying, note this, that the right Wing which is on the further side the Fowl is to be seen only in the position, the rest of the Wing (save its point) is hid by the body and neck and other parts. This is born by *Risley*.

A the like S born by *Van Helmslat*.

O the like regardant G is born by *Van Lockmin*.

XXIV. He beareth Argent, an *Eagle Overture*, with the *points elevated*, Azure. This figure or posture of the Eagle is contrary to that *numb.* 21. That having the points of the Wings (as it were) downwards, but this hath them lifted up on high; mentioned by the term, *elevated*. Some blazon this kind of bearing, an *Eagle* with *Wings disclosed*, and *elevated*. Some the Wings *extended*, or *stretched* out. This is born by *Overlegh*.

B on a Hill in base, O the like A by *Geyl van Wildock*.

XXV. He beareth Sable, an *Eagle Mantling*, Argent. That is when he stretcheth out his leg and his wing all along the side of his leg, see *numb.* 27.

XXVI. He beareth Gules, an *Eagle recurfant Overture*, Or. Some blazon it *inverted* and *displaid*, and some *tergiant*, having his back toward us, a word borrowed from the *Latin*, *tergum* a back, and some *Tergiant volant*, see *numb.* 17. 22. This is born by *Levean*, a *Spaniard*.

G the like in dexter chief O and S in sinister base a *Spaniel Saltant* A by the name of *Composers* an *Italian*.

XXVII. He beareth Or, an *Eagle Rowlant* proper, born be *Candy* or *Gandy*. This *Eagle* is stretch-

ing himself, which when any Bird of Prey doth so, Falconers term it (*Rowze*) from whence the term is borrowed, and sheweth a stretching out of himself, and wings: *shaking* and *quavering* the whole body. Some term this an *Eagle Warbling*, that is after he hath mantled, he crosseth his Wings together over his back.

XXVIII. He beareth Vert, an *Eagle Sepulture*, (or *Wings expanded*, or *erpend*) Or. This is when both the Wings are behind the head, and then again the one behind the other, some term it *expanded*, or *disclosed*. This is born by the name of *Penbruge*.

G 3 such O by *Alten*, and *Alterbeig*. This is by Mr. *Grillim* termed *Overt*, fol. 418.

XXIX. He beareth Argent, an *Eagle Sepulture* and *disclosed*, Sable, *Beak* and *Legs* (or *Arms*) Or. Which sheweth that though both Wings are behind the Eagles head, yet they are not as the last examples, one behind another, but *seperated*, standing at a distance. This is born by the name of *Persley*.

V the like A born by *Hindrell*.

XXX. He beareth Gules, an *Eagle* with *Wings expanded*, and *inverted*, Argent. The outward Wing is as if it turned back again. This is born by the name of *Wber*.

XXXI. He beareth Or, an *Eagle*, the *Wings expanded*, the one *elevated*, *crossing* the other. Some term the Wings *erpend* *crossways*. This is another way of bearing the Wings backwards, and is born by the name of *Littleworth*.

XXXII He beareth Azure, an *Eagle regardant*, *punning* of his right *Wing*, Argent. That is by her *Beak* layeth her *Feathers* straight and even: called of some *Proyning* and *Promening*: *Cricking* or *Cryning* her *Feathers* or *Plumes*. This is born by the name of *Care*.

XXXIII. He beareth Argent, an *Eagle regardant* *punning* of his *train*, Gules, see *numb. 32*. This is born by the name of *Curious*.

XXXIV. He beareth Vert, an *Eagle volant*, with the *Wings expanded*, Or. All Birds are termed *volant*, in what posture soever be the Wings, if *disclosed*; when the Feet are drawn up to the Belly, and not otherwise, an *Eagle volant sepulture* of most. This is born by the name of *Van Malembite*.

XXXV. He beareth Or, an *Eagle volant*, the *Wings sepulture* and *overture* (or *expanded* and *disclosed*) Gules. The one term signifying the Wings to be behind the head, and the other, that they point one from another. This is of most Heralds, only termed, an *Eagle volant*, see *numb. 40*. This is born by the name of *Volantail*.

XXXVI. He beareth Sable, an *Eagle volant overture* in full aspect, Fesse-ways, Argent. This is born by the name of *Kenseliv*, in this examples of Eagles volant, you may in their flying, see their whole proportion of

the body and feet, as if they were opposite to you, which differeth much from those flying before, or these examples of flyings after.

XXXVII. He beareth Azure, an *Eagle volant* in *fesse* (or *Fessewife*) Or. But most generally termed, an *Eagle Tergiant volant*, in *fesse* because his back-parts is only seen, and some *Volant Tergiant Overture*. This is born by the name of *Volans*, or *Van Volantz*.

XXXVIII. He beareth Argent, an *Eagle volant* in *bend*, (*soaring*, or flying a loft) *Overture*, Gules. Some term this an *Eagle volant, displaid*; and others an *Eagle towzing*, or mounting on high, others volant. This is born by the name of *Proudman*.

XXXIX. He beareth Gules, an *Eagle recurfant*, or *Tergiant*, (or *invertant*) *volant* in *bend*, *Wings Overture*, Or. See *numb. 42*. This is born by the name of *Bes*.

A the like S by the name of *Back*.

XL. He beareth Argent, an *Eagle volant* in *fesse*, the *Wings sepulture*, and *disclosed*, Azure. This differeth from the figure *numb. 35*. that holding up its head in flying; this stretcheth out its head, therefore termed *volant in fesse*. This is born by the name of *Stagell*.

O the like G ready to seale on a *Lewre*, B by the name of *Stilgall*, or *Stergill*.

In this quarter is placed, out of the base a pair of *Wings* with the *points elevated*, a bearing contrary to those *Wings* mentioned, *numb. 2, 3*. Sometimes they are found to be born *conjoynd*, and others *disjunct*, as in *chap. 12. numb. 57*.

O 2 *Wings* elevated B is the *Coat* and *Crest* of *Van Halwell*.

O the like S is both *Coat* and *Crest* of *Van Adelsdorf*. Per Pale O and B 2 *Wings* elevated Counterch: by *Van Fornitz*.

B 2 such party per fesse G and A contrary changed, by *Much*.

A 3 *Wings* the *points elevated* G born by *Saxon*, and by *Van Munster*.

O 2 *Wings* one G the other B born by *Van Wenckheim*.

XLI He beareth Azure, an *Eagle volant overture*, Or. Born by the name of *Oryall*.

G such O is born by the name of *Hirberg*.

XLII. He beareth Or, an *Eagle recurfant* and *volant* in *fesse*, the *Wings Overture*. This differeth also in the elevating of the head, from that before, *numb. 39*. This is born by the name of *Shriggall*.

B a *Fesse* A between 3 such, by *Flyers*.

B 3 *Doves* thus volant A was the *Coat* of the *Abby* of *Delacruis*, founded by the *Princes* of *Wals*, now dissolved.

XLIII. He beareth Gules, an *Eagle at Gaze* (or *aspect*) *displaid* Argent, lifting up his *Arms* (or his *Legs*) to his *Breast*, and *Beaked*, Or. This pertaineth to the *Family* of *Garzall*, or *Garset*.

XLIV

XLIV. He beareth Argent, an **Eagle displaid fore-shortened** in the **Train**, Gules. This is one of the ways I find Birds born in Arms foreshortned, and is only in the **Train**, which is so much behind the body, as but little of it is discerned. This is born be the name of *Trailman*.

XLV. He beareth Azure, an **Eagle displaid fore-shortned**, the **Head elevated**, Argent. Some term this, and the next following **Eagles volant**, but that they cannot be, considering they are in full aspect, as much as can be seen, the rest being hid by the body. This is born by the name of *Trust* alias *Trusty*.

In the base dexter and sinister is the form of two **Arms** or **Legs of Eagles bowed**, or bent in the **Knees**. The first being blazoned, Azure an **Eagles leg coupé** in the **Thigh**, and **Bowed** in the **Knee** (or joynt under)

B the like, the thigh coupé O and the Arm G the Pounces S by the name of *Cotulinsky*.

Per Fesse O and S the like counterchange is quartered by the Earl of *Ennenbell* in *Germany*.

O the like, turned to the sinister S born by *Grienthal*.

S the like to the sinister, with an Hawks beil above the bent of the leg O is born by *Van Kalmantz*.

The second is blazoned, an **Eagles Armed coupé** in the **Thigh** & **bowed** in form of a **Roman V**. Some say, a **Leg coupé** in the **Thigh** in fesse, bowed, Or, in Fesse the **Pounces**, or **feet elevated**.

A a Swans foot coupé in the **Thigh**, A. by *Van Wickersheim*.

S an Eagles foot, the like; pounces to the sinister O is the Coat of *Van Tonhauzen* in *Barvaria*.

O the like G born by *Van Maisenbug*.

A the like G born by the name of *Van Knefebeck*.

XLVI. He beareth Or, an **Eagle displaid fore-shortned**, Gules. These are flying as it were straight upon you, so as no part but the roundness of the head, and body is discerned, with the **Pontion** of the **Wings**, which are extended, the long **Feathers** thereof being also foreshortned that little of their length and breadth is discovered. This is born by *Holyland*.

In the sinister base, is the figure of a **Husked creeping** Creature, much after the form of a **Bee**; having six legs, & two long rough or hairy horns, standing not forwards, but sideways: it is spotted with diverse colours in quader-angle lines. The name of it I have not yet learned, except it be that which *Pliny* calls a **Blatta**, that is a **Shorn-bud**, or **Shorn-Beetle**: from *Blata*, a painted or **Spotted-Beetle**.

XLVII. He beareth Sable, an **Eagle volant descendant** in bend, Argent. All birds if their flight be downwards, they are ever drawn with their back part to our sight. This is born by *Falman*.

XLVIII. He beareth Gules, an **Eagle volant descending**: or **descendant displaid**. This is born by *Dilcant*. If the head were towards the chief, and that it were mounting upwards, it is then termed, an **Eagle Tergiant displaid**, or **recurvant volant** in pale, or **volant ascendant**.

*

XLIX. He beareth Argent an **Eagle seizing** and **feeding** on his **Prey**, Sable. When Hawks feed they do generally hang down their **Wings**, which the Master of such kinds of Birds of Prey term, (**Lolling**) therefore some from thence have blazoned this an **Eagle lolling** and **feeding** on his **Prey**: but that is needless, seeing they feed in this posture. This belongs to the name of *Seizridg*.

L. He beareth Vert, an **Eagle stouping** on the **Wing**, Or. This is a Falconers term, by which is to be understood, that the Hawk is coming down in her flight, and is ready to strike at her **Prey**; as the posture of this Eagle, you see is. Though others have termed it an **Eagle ready to Seize** on its **Prey**, the **Wings expanded**: but then there ought to have been some **Prey** near it, for how can it be said to seize, when nothing is to be seized on. This is born by the name of *Stoupley*.

* LI. He beareth Or, an **Eagle in full Aspect** (or **full bodied**) Gules, standing on a **Pierch**, issuing out of the sinister side Argent. This **Eagle is Pierched** looking full upon you, no part of him turning to any side. This is born by the name of *Body*.

S an Eagle displaid A membred O thus standing on a **Limb** of a **Tree Regulated** and **Trunked** A born by *Barlome* of *Barlome*.

LII. He beareth Vert, an **Eagle displaid**, Or. This is also of many termed a **Spread-Eagle**; If there be in the **Field** more then one Eagle, they are not to be termed Eagles, but **Eaglets**, that is little diminutive, or young Eagles, as saith Mr. *Gmills* and *Legh* fol. 223. pag. 104. But this term is a diminution, or a lessing to the honour of a Coat Armour, and I judge it as good to say 3, 4, 5, or 6 **Eagles**, as so many **Lions**. This is born by the name of *Aliter*.

V 3 such in Fesse O born by *Owen Gryneld*.

A an Eagle displaid S born by *Eruen* of *Staplesford*. B 3 Eagle displaid; and Semy de *Crusily* O born by *Alpram*.

A an Eagle displaid G born by *Blundell*, also 3 Eagles displaid by the same name.

B the like A by *Cotton* of *Cotton*, and also by *Rudyard*.

Per Fesse S and G an Eagle displaid A born by *Edge* of *Edge*.

Per Cheveron S and O 2 Eagles displaid, and a *Flower de lis* counterchange, by the name of *Stringer*.

A an Eagle displaid S Armed B by *Millington*.

O the like S the Coat of *Edmin* Earl of *Chester*, before the Conquest also Earl of *Leicester*.

G the like A membred O born by the names of *Sothil*, *Stenesclod*, *Godmanston*, and *Bigberie*.

LII. He beareth Or, an **Eagle displaid, Surgiant**, Gules. Here the **Wings** are not spread abroad, but only raised from the body, still remaining backwards, which is a kind of **Rousing** posture; but being on the other side full bodied, for the best understanding of its form, and draught, it cannot be better blazoned then **Surgiant displaid**. And is born by the name of *Earlycomb*: Some term it, an **Eagle with Wings disclosed**, as a little open from the body.

LIII

LIII. He beareth Sable, an **Eagle displaid** with two heads, Argent. Some will have the Eagle with one head to be called a **Spread-Eagle**, but if it have two heads to be blazoned, an **Eagle displaid**: So saith Mr. Morgan, lib. 1. fol. 60. But I never yet found such a nice distinction, but that they were indifferently termed **displaid**, or **spread**.

If the Legs and Beak or one of them, be of a contrary colour to the Body, then you are to add (**Beaked** and **Membred** or **Armed**) of such a colour or mettle.

An Eagle with two heads, have them ever **endowed**, not looking both one way (as the **Lyon**) but one from the other: and therefore needeth no additional term to its displaying, to shew that they are endowed: note also that it is good Blazon to say an **Imperial-Eagle**, to signify such displaid with two heads.

A such an Eagle S is the Arms of the Empire of Germany.

B the like O born by *Speake*.

Gyrony S and Er such an Eagle O by *Goodman of Chester*.

G the like A by *Longton*.

Per Pale B and G the like A by *Milton of Weston*.

Er the like S membred G born by *Worth*.

A the like S is the Coat of *Meirick Loyd a Brittain* also by *Kylmin Dioit* or *Troetu*. Armed and Membred, O is the Coat of *De la Wood*.

Per Pale Er and S the like O on a canton B a Martlet O born by *Goodman of Wales*.

LIV. He beareth Azure, an **Eagle Sepulture** (or **Wings expenced**) Or, standing upon a **Child** in **Steedling Cloaths** Gules, **Swedles** and **embaythering** Or. This is generally blazoned an **Eagle and Child**, and no more; because it is an Honourable bearing, and well known to all the Heraulds of England, lib. 1. fol. 61. But the fore mentioned Person was then far wide of the mark, that blazoned this an **Eagle disclosed**. This is the Crest of the Right Honourable the Earl of Derby.

A the like Eagle S Child as afore said, born by *Calceeth*.

THESE are the several ways of bearings, and the posture, I have seen Birds drawn in Coats of Arms; by which examples the ingenious, may conceive of the rest, in which I shall only give the figure of the Bird, or Fowl, which if the reader find in Arms in any of the fore said postures: he may add the fore said exemplary terms to them.

Observations in Eagles or Birds, of Prey.

They have great Heads, short necks, hooked Strong and sharp pointed Beaks and Talons.
Thick Flethy Tongues.

Strong and browny Thighs.

Sharp Sighted.

Deep Feathered.

The two appendices or blind Guts, very short.

Of a Membranous Stomack.

Live Solitary, not gregarious, or in companys.

Long lived, and endure hunger a long time.

The Female larger then the Male.

The Sear, or Basis of the Beak, covered with a naked Skin or Membrane, but night Birds have no such Membrane.

The outward Toes of the Feet are connected, or joyned to the middle-most, by an intervening Membrane, as far as the first joyned.

They have generally all spotted Breasts, except the Kite and Vulture.

Age makes the hook of the upper Chap, grown to that length: as to hinder their feeding.

That the inner sides of their Claws are sharp Edges.

Their excrements, are generally fluid, like Milk.

That the exterior vans, of the prime Feathers of their Wings, and Tails, have white or Pale coloured cross Bars.

That the colour of the Back, or upper parts, are for the most part brown.

They live without drinking, and yet their belly is always loose.

The several sorts of Eagles.

The proper colour of the Eagle is thus: the Bill of a horn colour, inclining to a pale blew, spotted with dusky: the Sear and Bridle of the mouth yellow; the Feathers of the Neck are rigid, and ferrugineous; Eyebrows prominent, Eyes of a fiery colour, shining in a pale blew, the colour of the whole Body is a dark Chestnut, sprinkled with white spots on the Belly, the Wings and Tail more dusky, legs Feathered down to the Feet, which were yellow.

The **Golden Eagle**, the Beak of a horn colour, the Shear or Skin covering the Basis of the Beak, of a blewish Ash colour; the space from the Nostrils to the Eyes bare of Feathers: the Feathers covering the Head and Neck, not smooth but rigid and standing at distance one from another; the Talons black, the Legs Feathered below the Knees, the colour of the Wings and Tail dusky, and the whole Body of a Chestnut, speckled with white spots: but few on the Back, and more white on the Belly, with a white Ring abouts its Tail.

The **Sea-Eagle**, or **Osprey**, or **Osisfrage**, is as large as an Eagle, fierce and Preyeth upon Fish, and said to have one flat or webbed Foot to Swine, and the other divided to Prey with, it is of a whitish Ash colour, clouded Eyes, with a beard of small Feathers under the Chin, the flag Feather of the Wing between black and chestnut, the train spotted with black and white, the Feathers growing next or near the Rump almost all white, the Legs covered with dusky Feathers, the lower part of the Legs and Feet scalled, and yellowish with the upper part of the Toes, which were Semicircular.

The **Black-Eagle**, the Jaws and Eye-lids bear of Feathers the Head and Neck and Breast black: in the middle

middle of the Back, is a triangle of white, dashed with red, Rump red, the lesser row of Feathers in the Wings of Chestnut; then followed a black stroak or bar of black, cross the prime Feathers; then a white one, and the remaining part of Feathers to the end, or tips of a dark Ash colour. The Beak yellow, black at the end; the Scar red, Eyes yellow, the Legs Feathered below the Knees: the rest naked and red, Scalled. Some call this a *Alateria*.

The *White Tail Eagle* called a *Pygarg*, or an *Albicilla*. The Nares or Nostrils oblique, the Beak and Sear yellow, the Eye-brows overhanging the Eyes, the Eyes red (in some yellow) the Feet yellow, the Head pale, or whitish; the Feathers being sharp pointed, and their Shafts black, the Neck reddish, the Rump blackish, and the whole Body of a dark dusky colour, the prime Feathers of the Wings black, the lesser row the edges Ash colour, the Tail the upper part, half way white, and the lower part black. This is supposed by many to be only the Male to the *Ring Tail*, or *Den Harrier*.

The *Morphno Eagle*, is of a dusky colour, the ends of the Wing and Belly hath many oval white spots, the tip of the Beam-feathers white, so is the Tail, the Feet Feathered to the Toes, all spotted with white Ash colour spots. The Eyes yellow, the Toes covered with yellow Scales, towards the Tallons, with annular Tables.

The *Crested Eagle*, it is flat crowned in the top, whereof it hath two long black Feathers, with two small ones on either side; these it can when it lifts, set up an end, and again lay down flat. The Wings reach but to the bottom, or rise of the Tail, the Head is covered with dusky Feathers with yellow edges, the sides of the Neck with brownish yellow, the Throat and Breast white, variegated at the sides with black, the Belly and Legs white Feathers down to the Feet, and the Feet yellow. This is termed the *Crested Eagle of Brasil*, or the *Uru-taurana*.

The *Royal Eagle*, is of colour reddish, and is called in Greek *Gnesios*, it is of a middle bigness to the other Eagles: It is a rare Bird, and scarcely to be seen.

LV. He beareth Argent, a *Gerfalcon* Gules, belled Or. There are several kinds of Hawks, which Falconers divide into two ranks, that is long winged, and short Winged: the first have their wings when closed, reach to the end of the tail. The other when closed reach far short of the end of the tail, not much further then the Rump. This is born by the name of *Foulgar*.

Sable a *Goshawk*, Argent: Armed, Jessed, and Belled, Or. Born by the name of *Boulton*.

Where note that where it is not Membre, or Armed, it doth imply, that it is all of one colour: for *Membre* signifieth the Legs; and *Armed* the Bill and Claws, as saith *Morgan*, fol. 59. but to use *Membre* for the Feet and Legs; *Beaked* for the Bill, and *Armed* for the Claws, is the most certain and sure way.

LVI. He beareth Argent a *Falcon* proper. This is also called a *Falcon Gentle*, a white Coronet encompasseth their head near the neck, the head, neck and shoulders are brown, the back of an Azure colour distinguished with transverse brown marks, the Throat white, spotted with oblong lines.

O on a Canton B a Falcon volant O born by *Thurston*.

A a Fesse between 3 Falcons volant B Beaked Issed and Belled O by the name of *Georges*.

Per Chevron B and A 2 Falcons volant O by the name of *Stephens*.

A 3 Falcons G born by *Falconer*.

O a Falcon B Beaked, Membred or Armed G born by *Karmed of Lwydiarth* an ancient *Brittain*.

B a Chevron between 3 Falcons A born by *Philips*.

O on a bend B 3 Falcons A Jesses and Bells O by *Deggs*.

S 3 Falcons A born by *Hawkesworth*.

G a Falcon A born by *Harbrone*.

Several sorts of Falcons.

The *Peregrine Falcon*, hath a long and narrow train, sharp towards the end, the tips whitish, the shafts in the middle of the Feathers red, the Feet a pale green, or between a yellow, and a lead colour; the Beak the same, short Legs, and slender Toes, black Talons; the Thighs long: the Eyes black, the Iris or Circle about it blew, the Head Ash colour, the Back of a livid colour, almost like that of a Goose: The marks of the Wings are of a Copper colour, the Throat spotted with long direct blackish lines, the Thighs with transverse ones, the Legs of a Saffron colour, but more dilute.

The *Black Peregrine Falcon*, hath its Beak of a sky colour, the Membrane which compasses the Nostrils deep yellow, Eyes blew, the Eye-lids the edges round yellow, the Head, Neck, Back and Wings of a dark brown, almost black, sprinkled with black spots in every Feather, the great Feathers being crossed with transverse ones, the Throat of a yellowish white, stained with black spots: Breast, Belly and Thighs, white crossed with transverse black lines; the Train dusky marked with cross bars, the Legs and Feet yellow: the Thighs long, Shafts short, Toes slender, and long, covered with Scales, the Talons black.

The *Sacre Falcon*, the Head is grey, Eyes black, Beak blew, the spots of the Breast and Back brown, the inside of the Wings, and Thighs white; the Tail long, and varied with Semicircular spots; the Leg and Feet blew. Yet such as have Mewed or cast their Feathers, have their Backs and Wings on the upper side black.

The *Ter Falcon*, the Crown of Ash colour, the Beak blew, the Pupil of the Eye black, the Circle blew, the Back Wings and Train, white; yet every Feather of them marked with a black spot like an Heart, or the Eyes in a Peacocks tail, the flag Feathers of the Wings near the tips, have longer black marks, which is inclosed with a white border, the Throat, Brest and Belly pure white, the Tail marked with transverse black bars, the Legs and Feet of a delayed blew, covered all over with a continued Series of board-like Scales.

The *Mountain Falcon*, after he hath Mewed, hath his Head black as a Crow, the Nostrils covered with a Saffron colour skin, Eyes yellowish, the Neck Shoulders and Back to the Rump, blewish, the Throat and

and Breast white, marked with round spots; the Train black, the Feathers investing the Thighs brown; It is observed that the oftner they Mew their Feathers, by so much is their Throat whiter, and the spots smaller, and their Back and Loynes of a deeper blew.

The **Grey Falcon**, the Beak black, the Nares compassed with a yellow Membrane, the Iris of a deep black, edges of the Eye-lids yellow, the whole Body in general is of one colour, that is Cinereous, tending to blew, the Legs and Feet covered with a board-like Scales, of a Saffron colour.

The **Haggard Falcon**, so called by reason of the shortness of its Neck: the Head scarce appears above the point of the Shoulders, so that it seems to have a bunch on its Back. It is in colour like the common Falcon, or Falcon gentle.

The **Red Indian Falcon**, the Head is of an Ash colour, tending to brown, so is the Neck, Back and Outside of the Wings, the Beak yellow, with an Ash coloured Hook: the Pupil of the Eyes black, circled with brown or chestnut colour, the edges of the Eye-lids yellow, from the exterior, and lesser corner of the Eyes, is drawn a long stroak of red: the Breast, Belly, inside of the Wings, the Hips and Thighs, are all fulvous or red, of a pale Vermilion colour, but the Chin is marked with a long Cinereous spot downwards; the Beak besprinkled with small scattering specks of the same colour, the Train is long, each Feather varied with alternate spaces of black and Ash colour, in form of a Semicircle, the Legs and Feet are yellow, the Talons black. The Male of this Red Falcon, hath the Bill blew, with a small yellow Membrane covering the Nostrils, the Breast not marked with any spots, the interior flag Feathers of the Wings, are white, crossed with many transverse brown marks, the rest of the upper side of the Wings of a deep fulvous colour, like red Ocker: the upper side of the Tail, is adorned with a double variety of transverse spots, of white and Ash colour, inclining to blew alternately disposed.

The **Crested Falcon**, the head black, capped with a Crest hanging down backwards from the hinder part of the Head (like a Lapwing) but Forked, the Neck red, the Breast and Belly partly coloured of white and black, the alternate cross lines very fair, Eyes yellow, the Beak of a deep blew, black towards the point, the base covered with a yellow Membrane, the Legs Feathered down to the Feet, the Feet yellow, Talons black, the lesser rows of the Wing Feathers, were edged with white; the Train was varied with transverse spaces, or beds of black and cinereous, alternately: the rest of the Feathers were black.

The **White Falcon**, hath the whole Body milk-white, only spotted on the Breast and Tail with yellow; the Beak white, the Feet yellow.

Several sorts of Hawks.

LVII. He beareth Or, a **Goshawk**, proper. It is also termed by the simple name of a **Hawk**. These kind of Birds of Prey are but small, far short of the **Falcon**; of which there are these several Species.

The **Goshawk**, is of a dark brown colour on the head, neck, back, and upper sides of the Wings; the whole Breast and Belly white, with transverse black circu-

lar lines, standing very thick; the Thighs are covered over with reddish Feathers, having a black line in the middle down the shaft; the Legs and Feet yellow, Talons black, Beak blue, and the Sear of a yellowish green; the Train is long, of a cinereous or Dun-colour, with four or five cross blackish bars, standing at a great distance each from other.

The **Spar-hawk**, or **Sparrow-hawk**, hath a blue hooked beak, black towards the tip; the Basis of the upper chap is covered with a yellowish green skin, eyes yellow, Eye-brows over-hung, white; the head brown; the neck the feathers edged with white, the Back, Shoulders, Wings of dark brown; the Neck, Breast, Belly and under the Wings various of white, and blackish, or russet, waved lines, thick set crossing the whole Breast and Belly; the Feathers under the Chin, and by the Legs are white, with the middle parts next the Shafts; especially towards the tips, brown or russet; the under side of the flag feathers on the interior Web of each are dark transverse spots or marks: the Train is long, having five or six cross bars of black, the tips of the Feathers are white; Legs long and slender, and yellow; Talons black.

The **Lanner**, or the **Leonard**, it hath blue Leggs, Feet and Beak, the anterior or Breast feathers, parti-coloured, of black and white; the black lines or marks not crossing the Feathers, but drawn long-ways down the middle of them, contrary to what they are in **Falcons**. The Back, Wings, and Tail are brown, not much variegated; under the Wings are round marks like little pieces of Money dispersed through the Superficies. The Male is a **Lanneret**, and is almost of the same colour and shape, but of a lesser body.

The **hobby**, hath the upper mandible prominent, hooked semi-circular, it hath a tooth or angle on each side, at the beginning of the hook part, which is received into a hollow dent or nick in the lower chap, is of a dark blue; the Sear yellow, Eyes of a Hazel colour, Eye-lids yellow. The head of a deep chestnut, the neck clay-colour, back and wings, a dark brown, or cinereous black. Those on the rump, and lesser pinion feathers, being lighter; the greater pinion feathers, and those on the back, darker; the Chin and upper part of the Throat white, with a dash of yellow; to this white are drawn upon the head on each side two lines; one from the aperture, or open of the mouth, the other from the hinder part or noddle. The Breast reddish, spotted with black the edges white; the Belly and Thighs, red, spotted with little black spots. The extrem or outmost feathers in the VVings, have their tips black, all of them their interior VVebs, varied with transverse clay colour spots; and the covert feathers of the under side of the VVings, are black, curiously painted with round spots of white, deluted with red. The train being long in the middle, and shorter, on either side, have their exterior vanes marked with transverse reddish spots; the utmost tips being whitish; the Leggs and Feet yellow, the middle and outmost Toes connected (as in others of this kind) to the first joint; the Talons black as Jet.

The **Stannel**, or **Stanniel**; of others called a **Kestral**, or **Stone-gall**, and in some places termed a **Wind-hover**. The beak is hooked, the middle next the Sear white; the rest a dark blue. It hath a Tooth or Angle, which is received in a dent or cavity in the lower chap; Eyes and Eye-lids yellow, a great head inclining

to an ash colour, and marked with narrow black lines along the Shafts of each Feather; the back Shoulders, and covert Feathers of the upper-side the VVings, Ferruginous, or reddish brown, marked with black spots, that is each Feather being tipt with black; the Breast and belly of a paler red, varied with black lines, drawn downwards along the Shafts; but the Chin and lower Belly without spots. The flag feathers of the wing on the outside are of a brown, or dusky colour, but the inner vans, are of a reddish white, indented with the brown, like a Saw-teeth; the under side of the VVings is white, with black spots. The Train have the tips of a rusty white, then succeeds a black bar or ring; the rest of the feathers being of a rusty ash-colour, are marked with transverse black spots; the Leggs and Feet yellow, and Talons black.

The **Merlin** is the least of all Hawks, not much bigger than a **Black-bird**; the Beak is blue, with a tooth on each side, the Eyes of a Hazle colour, the head back and upper part, partly coloured of a dark blue and brown; the flag feathers of the VVings black, with ferruginous spots. The Train of a dark brown or blackish colour, with transverse white Bars; Breast and Belly of a rusty white, with brown spots tending downwards: the Legs are long slender and yellow, the Talons black; the Head is encircled with a whitish yellow ring, like a Coronet. The Male is called a **Jack-Merlin**, and is in all things answerable to the Female, save in the train; the He is said to have but five cross pale red bars, and the She seven.

The **Bald Buzzard**, hath a black beak hooked and covered from the base as far as the Nostrils, with a bluish skin, or fear bunching out; the pupil of the Eye large and black; the Irides yellow, the Feathers on the crown are white, all the upper parts are black and ferruginous, the Throat Breast and Belly, white; but about the crop the Feathers are ferruginous, the Legs are clothed with white and soft Feathers: the prime or flag Feathers in each Wing, especially the four outmost have the interior vans variegated with white and black alternately, that is indented like the teeth of a Saw; under the shoulders are white, spotted with black towards the tips, the third and fourth row of those Feathers as cover the roots, or quills, of the flag Feathers, are marked towards the tips with dusky spots, having their edges ferruginous, the lesser Feathers above these, or them on the top of the ponion are white, the Train is broad, and of an equal length, having the borders partly coloured of white, and a brownish red, indented as in the Wings, the Legs are long, the Feet of a pale blew, or verdigrese colour, armed with Semicircular black Talons, the Toes are so disposed, that the outmost of the Fore-Toes may bend backward, as in Owls and Parrots.

The **Common Buzzard**, or **Puttock**; the Beak short Hooked, and of a deep blew; the Membrane skin yellow, the Bridle of the mouth, or the shin of the corners of it, is yellow; the Irides or circle of the Eyes white, with a dash sometimes of yellow and sometimes of red: the Membrane for Nistation blew, the colour of all the upper parts is a ferruginous black, in the covert Feathers of the Wing are many white spots, which when it is spread makes a kind of white line: the lower side of the Body is a dilute yellow, or yellowish white, the Breast stained with long brownish spots, not transversely placed, but

tending downwards, in each Feather drawn according to the length of the shaft; the Chin a reddish brown, the shafts black; on the Back grows no Feathers, but only down; for the scapular Feathers cover the whole Back. The flag Feathers in the Wing, the four outmost are tipt dusky white, the rest more whiter, the interior Webs of all are variegated with broad transverse, dusky and whitish strakes, or bars. The Train is long, which being spread terminates in a circular circumference, the tips are Ash colour, then a transverse line broad, the remaining part being variegated, with black and cinereous, transverse spaces or bars, the Thighs are long, the Legs short, Feathered a little below the Knees, the rest scaled, yellow; Talons black.

The **Honey Buzzard**, hath the Beak black, the same being crooked, and bunching out between the Nostrils and the Head, the Basis a black rugged skin; the Irides bright yellow, the Head Ash coloured, the Plumage on the Back of a Mouse dun, the tips of the flag Feathers, as also of the second and third row in the Wings white; the tail variegated with transverse obscure, and lucid, or blackish and whitish spaces, rings or bars, the tips white. The lower parts of the Body white, the Breast and Belly spotted with black, drawn downwards, the Legs and Feet yellow, the Talons black.

The **Ringtail**, and **Denbarrier**, or **Denbarrow**: the latter the Male to the former. At the corners of the Jaw grown bristles reflected forwards; from the hinder part of the head, round the Ears, to the Chin, is a Ring or Wreath of Feathers standing up like a Crown, dusky, with the edges of a reddish white, the Ears naked; the Back and Neck of a dark reddish brown, edged with red; the Belly and Breast, of a dilute reddish colour, or white, with a tincture of red, marked with long dusky spots, tending downwards along the shafts of the Feathers. The Rump hath white Feathers, the Tail is tipt with a reddish Ash colour, to which succeeds alternately, red and black bars, the black being much the broader; the flag Feathers in the Wings, the exterior Webs are of the same colour to the Back, the interior being variegated, with transverse black and white stroaks alternately; the Bill is black, the Scar yellow, so is the Eyes, the Legs and Feet, long and yellow.

The **Denbarrow**, the Male, hath the Head, Neck and Back, of Ash colour; the Rump white, the Breast white, with some transverse dusky spots, the exterior flag Feathers are black tipt white, and Ash colour, the covert Feathers cinereous, in other things like the Female.

The **Kite**, or **Glead**, hath the Head and Chin of a pale Ash colour, varied with black lines among the Shafts, the Neck red, the back dusky brown, the lesser row of Wing Feathers are partly coloured of red, black, and white, the middle of each Feather along the shafts black; the long Scapular Feathers covering the Back have black lines like the Flags: Inside of the Wing reddish, with black spots; the Plumage of the lower parts hath the edges Ash colour, the following red, and the middle black. The flag Feathers are six outmost black, the next six of a dark cinereous colour, all the rest black, having in the outward Webs, black transverse lines, with white between: the Tail forked, the two middle Feathers black, the others reddish, with black cross lines, white between.

and so tip, Beak black, Sear yellow, so is the Eyes, Feet and Legs yellow, Talons black. It only moves its Tail in flying, whereby it directs its course in the Air, without much moving the Wings.

The **Mare Buzzard**, the Beak hooked and black, the Sear yellow, the Irides yellow, the Crown of the head clay or sandy colour, all the rest of the Body, is of a dark reddish brown, only at the middle joyn of both Wings, is a spot of the same clay or reddish sandy colour, and the root or rife of the Tail is fulvous: the flag Feathers are black, the covert Feathers party coloured, brown and fulvous: the Tail spread is circular, being party colour, of a dark and light fulvous or bay, Legs Feathered below the Knees, Feet yellow, Talons black.

The **Brasilian Bite**, called **Caracara**: the colour of the whole Plumage is Tawny, with white and yellow specks, the Tail party coloured of white and brown; hooked Bill, black; Legs Feet yellow; Claws long and roundish, black.

The **Butcher Bird**, or a **Shrike**; it is the least of the *Eurp* rapacious Birds, having a straight Bill, only hooked a little at the point, a Tail like a **Happie**, with the outward Feathers, the shortest; about the bigness of a black Bird: the Bill black, having a small tooth on either side, the Tongue is slit, or forked at the end: the Nostrils have about them stiff black hair or bristles; from the corner of the Mouth, through the Eyes to the hinder part of the Head, is drawn a black line, the Head, Back and Rump, Ash colour; the Chin and Belly white, the Breast and Throat varied with black or dark transverse stroaks, the flag Feathers are black, tip from the four outmost to the tenth Feather, with white; but so as every one inward exceeds the other: from the tenth to the Body, the white diminisheth again; in the Tail the two middle Feathers are black tip with white, and all the out side Fathers are wholly white, Legs and Feet black: This Bird is of some called a **Wherangle**, and a **Grey Pie**, or a **Murthering Pie**, or **French Pie**.

The **Flusker**, or lesser **Butcher Bird**; it is no bigger then a **Lark**: with a Bill red hooked at the end, near which is two angular appendices or teeth overhanging the lower Chap; about the Mouth and Nostrils grow stiff black hairs or bristles, the Head and Rump cinerous, the Back reddish rusty, or ferrugineous, with a black stroak from the Mouth behind the Head, with a white stroak by and above it; Throat and Breast white, dash with red; the Belly white, the Wing Feathers dusky, the exterior vans of those next the Body red, the edges of the middlemost white, the Tail hath the longest Feathers in the middle black, the out side Feathers, next the middle are edged white, the next them on each side, the Feathers half white, especially the interior Webs: and the outmost the exterior Webs are wholly white, the Feet are black, or of a dark blew.

The **Aliet**, (which *Upton* saith is the Falcon) but others affirm that it is a little Fowl that Preyeth upon small Birds, of whom it is said, the **Aliet** is a Bird of little power; and little Birds he eats and doth devour.

S an Hawk, or a Sparrow-Hawk, or Falcon Preying O standing with his Wings expanded on a Duck, its Belly upward, A on a chief O a cross Bottony G by the name of **Madden**.

G 3 Spar-Hawks A Jessed and Belled O born by *Aukerton* of *Atherton* in *Lancashire*. Some write it **Atterton**.

*

S a Gosh-Hawk A Armed, Jessed and Belled O by *Bolton*.

B 3 Hawks A Armed, Jessed or Belled O born by *Penington*.

B 3 such with Wings expanded A born by *Nevile*.

A a Cheveron between 3 Hawks S Belled O by *Worsley* of *Birkenhead*.

G an Hawk with Wings expanded holding a Duck under his right Foot (or right Talons) A by *Sir Rob. ap Madock* Lo. of *Brompton*.

LVIII. He beareth Azure, a **Falcons leg erased at the Thigh** Argent, **Jessed Gules, Bells and Aerbels**, Or. By the name of *Jerman*.

G 3 such A Jessed and Belled O by *Colmicher*.

As the **Eagle** is born in its several parts, so is the **Hawk** or **Falcon**, with all other sorts of Fowl: as their **Heads couped** and **erazed**, Wings displaid or expanded; demy Belled, Legs couped or erased in the Thighs, or Shanks: and the like, as I have shewed in the bearing of the Eagle, and its diverse parts.

LIX. He beareth Argent, a **Sparhawke** (or a **Falcon**) proper. **Jessed Gules**, and **Belled**, Or: standing upon a **Perch** issuing out of base, Sable. Born by the name of *Casse*.

S the like Falcon A perched upon a stock fixed in the base point of the Escochion of the second, Armed Jessed, Belled, O. as *Mr. Gm. Illm f. l. 229* blazons it, and is born by the name of *Wweel*, and could not this more briefly be termed, a Hawk Jessed and Belled on a perch in base, and not to make so many tautologies.

G a bend Wavey A in the sinister chief a Falcon standing on a perch Or. Born by *Hawkridge* of *Hawkworth* in *Devonshire*.

LX. He beareth Gules, a **Falcon Or, Jessed Sable, Belled** and stand on a **Falconers Glove**, Argent. Any kind of Bird of Prey, standing upon any thing that is its meat, or that by nature they feed on it, they are then said to seize, or seizing upon such or such a thing, in such or such a posture or else they are termed standing, as in this example, see *n. m. b. 62*.

A Falcon standing on a **Lure** (or **Lewere**) proper. Born by *Lewering*, for his Crest.

A Falcon standing on the stock of a Tree, &c. Born by *Harret*, for his Crest.

G a Falcon A standing on a **Glove** to to the sinister, O by *Eyemanger*.

LXI. He beareth Sable, a **Demy Falcon Overture**, Argent, **Gorged** with a **Crown** (or **Coronet**) Or. This is born by *Germont*.

LXII. He beareth Argent, a **Falcon** with Wings expanded, Or; **Seizing** on a **Partridge** proper, and is the Crest of *Glees* or *G. v. m.* After this manner are **Eagles**, **Sawhawks** and other kind of Ravenous Birds, and Birds of Prey; born in Coats of Arms, upon **Hares**, **Cones**, **Fowl** and **Fish**; which have the same term of **seizing** &c. And sometimes the Beast, or Fowl, seized upon; are born with their Bellies upward, and with their Wings in several postures.

An Eagle Sepulture, feeding on the ponion of the Wing. Born by *Pomigale*.

A Falcon, Jesse, Belled and Vervels, seized an a Mouse all proper, by *Carwendish*.

3. **H**AVING now given examples of the several bearings of the Eagles, and other Birds of Prey: generally called by the name of **Hawks**, of which the **Falcon** is most in use, because she passeth all the rest in boldness, and courtesie; and from hence it is, that the other Titles of the Art or Science of **Falconrie**, and **Falconer**, are derived from her. The first signifying the Art, Profession, and Knowledge of keeping Hawks: and the other the Person that deals in the maning, and luring, and feeding them.

The Names of Male-Hawks with their Females.

A **Sacret** or **Sakaret**, is the Male of a **Saker** or **Sacre**.

A **Carcel** of a **Goshawk**, the Male of a **Goshawke**, called also a **Cyerclet**, or **Cyercell** of a **Goshawk**.

A **Jerkin**, is the Male of a **Jerfalcon**, or **Cerfalcon**.

An **Iron**, is the Male of an **Eagle**.

A **Husket**, is the Male of a **Sparhawk**, or **Sparrowhawk**.

A **Cercell** gentle, is the Male of a **Falcon**.

A **Lanneret**, is the Male of a **Leonard**, or **Lanner**.

A **Jack**, is the Male of a **Merlin**, some call him a **Jack-Merlin**.

A **Boccarret**, is the Male of a **Boccarell**.

A **Penharrow**, or **Penhartier**, is the Male of a **Ring-tail**.

A **Jack**, is the Male of the **Hobby**, of some called a **Robbin**.

A **Ciercell**, is the Male of a **Myllion**. Or **Cassell** is the general Term for the Male of all **Hawks**.

The Names of all Hawks.

1. Long Winged Hawks are,

The **Cerfalcon**, and **Jerkin**.
The **Falcon**, and **Ciercell** gentle.
The **Lanner**, and **Lanneret**.
The **Bockerell** and **Bockeret**.
The **Merlin**, and **Jack-Merlin**.
The **Hobby**, and **Jack**.
The **Steiletto** of *Spain*.
The **Red Rook** of *Turkie*.
The **Clashite** of *Virginia*.

2. Short Winged Hawks.

The **Eagle**, and **Iron**.

*

The **Goshawk**, and **Ciercell**.

The **Sparhawk**, and **Husket**.

The two **French Iys**, and **Butchers Birds**.

3. Wild Hawks which are Sluggish, and Indocile.

The **Stanpell**, and **Ring-tail**, and **Pen-driver**.
The **Raven**, and **Buzzard**, and **Bald-Buzzard**.
The **Kite**.

The Names of Falcons, or other Hawks, according to their Ages.

1. An **Eyette**, is a Term used to a young Hawk, as long as she is in the Eyrie, or Place of her breeding. Termed also a **Byasse** or **Iyas** **Hawes**.

2. A **Rammage Falcon**, so called after she hath left the Eyrie, for four Month *May, June, July, August*; in the Sparhawk this age is Termed a **Blanchet**.

3. A **Soar Hawk**, which Term is given them for about four Months after. It is called also a **Sorage Hawk**.

4. A **Netwer**, or **Netwed Hawk** (of some called **Murzarolt**, or **Carbist**; as much as to say Carry on the fist) they are so called, from *December* to the middle of *May*.

5. An **Entermewer**, from the middle of *May* to the latter end of *December*, they are so called: because they cast their Coats; of some they are Termed, **Hawks** of the **first Coat**, being the second Year of their Age, called also **Haggards** of a **Coat**, or **Hawks** of the **first Coat**, and so as long as they live.

Yet Mr. Ray in his Ornithology of Birds, fol. 69. saith that in the third Year of their Age, they are called **White Hawks**; and the fourth Year, when they come to their full growth and perfection, **Hawks** of the **first Coat**; but for what reason, he knoweth not.

The Names, or Terms given to the several parts and members of a Falcon, and so consequently of all Hawks.

I. Of the Head.

The **Border** or **Bidle**, or **Corner** of the Mouth.
The **Beak** is the Bill, called also the **Mandible**, or upper part.

The **Hook** of the Beak, the **Neb**.

The **Appendence**, or tooth in the middle of the Bill.

The **Clap**, or lower **Mandible**, the under part of the Bill, also the Clap of the Beak.

The **Sear** of the Beak, the soft place of the Beak next to the Head, above the Nostrills: the yellow part above the Beak.

The

The **Nares**, the Nostrills or little holes on either side the higher part of the Bill, or Beak.

The **Burs**, or Ear burs, are the Ears:

The **Front**, the Hawks forehead, or foreparts of the Head.

The **Crynets**, are the little Feathers under the eyes, or hairs about the Sear.

The **Membrane**, is the thin skin which covers the Eyes, though the Eye-lid be open, called the **Diaphanous Membrane**.

The **Obit**, or Cavaty in which the Eye is placed.

The **Pupil**, is the black or sight of the Eye.

The **Iris**, or round circle about the sight of the Eye.

2. The Wing.

The **Pinion**, or Ponion of the Hawk, is the fleshy part of the Wing in which the Feathers are set.

The **Ply**, or bent of the Wing, is the middle joint in the pinion.

The **Flag Feathers**, the Beam Feathers, the Quill Feathers, the Prime or Principle Feathers, or the Sails of the Wings. All these Terms are used for the first row of Feathers, or the long Quill Feathers in the Wing.

The **Principle**, or the two Principles, are the two first Feathers in each Wing: the long one, and next to it.

The **Flag Feather**, that next to the first and second principle, the third Feather in the Wing.

The **Barrell Feathers**, are the extreame pinion Feathers in the Hawks Wing, those next the Body.

The **Barrell Wing**, or **Secondary Wing**, are the small Feathers being 5 or 6 in number, they cover the Quill Feathers, of most called the Covert Feathers of the Wing, or exterior cover Feathers, &c.

The **Covert Feathers**, of the Wing are such as cover the Quills of the Sails of the Wing: there is a first row, which are longer then those of the second row, and the third smallest of all, which are upon the edg of the pinion.

The **Interiour Barrell Wing**, are the like small Feathers which cover the Quills, on the middle of the Wing.

The **Shaft**, is the middle part of a Feather to which the **Web** is fixed, the higher part of the Quill.

The **Clane**, or **Web**, is the threads of Feathers which are on both sides the Shaft, called also **Margins**.

The **Quill**, is that part of the Feather, as sticketh in the Flesh.

The **Filaments**, see Vane.

The **Ridge**, or base of the Wing, the edge or outside of the Pinion.

3. The Body.

The **Plumage**, is the general Term for the Feathers all over the Body.

Summed, well summed, when a Hawk hath all her Plumes or Feathers.

*

Unsummed, when she wants any of her Feathers, or that they are not well grown.

The **Walls**, are the Breast Feathers.

The **Pannel**, is the Pipe next the Fundament of a Hawk, in which she digesteth her meat. It is taken for the Belly or Guts, as empty pannelled, or large pannelled, when they are empty or full bellied.

The **Tuell**, the Fundament, the Arse-hole.

The **Braille**, or Brailes, the small Feathers about the Tuell, both above and below.

The **Gorge**, the place for meat, the Stomach: in other Fowl called the **Crop**, or **Craw**, or **Bewe**.

4. The Train, or Tail.

The **Rump**, where the Train is fixed.

The **Glandules**, the Oyle Carnells in the Rump.

The **Train**, is the tail, or long Feathers set in the Rump.

The **Covert Feathers** of the Train, are the under Feathers of the Tail next the Rump.

5. The Legs and Feet.

The **Arms**, are the Legs, from the Thighs to the Feet.

The **Pounces**, are the Feet, or Toes, or Fingers of the Hawk, by which she grippeth and holds her Prey.

The **Clawens**, are her Claws, by which she kills and teareth what she gets: called of some her Arms, or Weapons.

The **Stretchers**, are the Toes.

The **Singles**, or **Petty Singles**, are the Toes of the Hawk.

The **Seat** of the Foot, is the bottom, or sole of the Foot: it is also called the **Palm** of the Foot.

The **Semicircular table**, or rings of the Pounces; are the rings, or Wrinkles in the Feet, near the Claws.

The **Table**, or square scales, on Hawks Legs.

Annular Tables, are round scales on the Toes.

6. Diseases in Hawks.

Crabbing, is when a Hawk hurts her Wings, in beating or fluttering with her Wings, in the rach of another Hawk.

The **Pynne**, is a disease in Hawks Feet, as the Gout or numness through cold or swelling: and it riseth in sharp Nails in the Palm, or bottom of the Foot; also it is a Disease in the Eye.

The **Frownce**, a canker or sore in the Mouth of the Hawk.

The **Pantas**, or **Alina**: a Disease in the Breast, which causeth shortness of breath, or hinders the drawing of breath, called also the **Pantise**.

The **Filanders**, are the Worms in Hawks, which are as small as a thread.

The **Mytes**, are Lice, or Vermine in Hawks.

The **Pipe**, a Disease often troubleth Chickens, and is a kind of hard skin or horn, that groweth on a Hawks tongue,

tongue, and keeps her from eating, see **Barbillons**.

The **Cataract**, is a Disease in the Eyes by having a skin, or thick film, growing over the sight of the Eye.

The **Dawe**, is a Disease about the Eyes, by the grow- of a lump of Flesh or such like; and it proceeds from Rhume, or from a blow.

The **Film**, see **Cataract**, called also **Cataract**.

The **Aerol**, the **Uleb**, are two Diseases in the Eyes of Hawks, some call them the **Pynne**; they do proceed from Rume.

The **Formica**, a Disease in Hawks Beaks, which eat- eth and fretteth away the Beak, it is also a Disease in Dogs Ears which torments them by scratching.

The **Estarchillus**, a Disease in the Head by Rhume, and in the Throat, which hindreth the Hawk from casting.

The **Barbillons**, a Disease in Hawks tongues, like the Pippin in Hens and Chickins.

The **Fistula**, is the running of the Nares, with Water, or filth.

The **Swimming** of the Head, a Disease discerned by the often gaping, and bateing of the Hawks Wings.

The **Hopboud**, is the cold of a Hawk.

The **Polyp**, or **hidden Evil**, is a gluttonous Sto- mack, a greediness in eating, and devouring.

The **Capute**, a Disease that makes them lose their Feathers, or to fret away the Feathers, that they come like sticks. As the long Feathers, and Flags are full of Taynts.

The **Cramp**, or **Gout**, is a Disease in the Feet through Gold and Swelling.

7: Terms of Art used in Falconry, with their Explanations.

Abate, is to lose their Flesh, go lean, become poor.

Bate, Bateing or Bareth, is when the Hawk fluttereth with her Wings either from **Pearch** or **Fist**, as it were striving to get away, also it is taken for her striving with her Prey, and not forsaking it till it be overcome, see **Busking**.

Bathing, is when she washeth or dippeth her self in water.

Beaching, as Beach the Hawk before company, is to feed her in company to make her acquainted; a Beach- ing of good warm meat, is fed with warm meat.

Beak, as a large or a short Beak, but call it not a great or little Bill.

Bnd,

Blanck, as blanck scared in the feet, or blanck eye- lids, that is of ——— a colour.

Bowze, is when a Hawk drinks often, and seems to be continually thirsty; others take it for her oft washing and stretching of her self, as **Bathing**.

Bowet, is when a young Hawk covets to get out of her Nest, and clambers on the Boughs of the Tree.

Brood, the young Hawks in the Nest.

Breech her, that is, to tie a Leather or such like to the Arms or Leggs of the Hawk, to keep her she shall not stretch her leggs, or open her self too wide, which will rent and spoil her in her flying of the Hare.

Branch or **Stand**, is to make the Hawk leap from

Tree to Tree, till the Dogs Spring the Partridge.

Bratoned, is when the Hawks Thighs are fat, and in good liking.

Busking, or **Baiting**, is the striving for struggling of the Fowl which the Hawk hath seized upon.

Casting, is any thing you give the Hawk to cleanse her Gorge, and to purge her, whether it be Flannel cloth, Thrums, Thistle Down, or Feathers made up to a Lump or Pellet, if given over night, or any other convenient time, they will naturally cast it up again. This term is also used for a Spaniel or Setting Dogs hunt- ing, as he cast over such and such Fields, that is, he hunted them.

Cawking, time, is treading time, when they build and make themselves Nests, in breeding time.

Cauterize, is to burn or sear a greifed part of a Hawk, if the Disease so require it.

Cauterizing Iron, is the Searing Iron, or an In- strument to search Wounds in Hawks.

Cadge, is that Circular piece of Wood an which Hawks are carried, when they are exposed to sale.

Carry, is a flying away with the Fowl when taken.

Cast your Hawk to the **Pearch**, is to put him on the **Pearch**.

Canceleer.

Countenances, the Hawk Countenances, when she picketh her self.

Cast your Hawk to the **Pearch**; say not, set your Hawk on the **Pearch**.

Check, is when the Hawk forsakes her proper Game, and flyeth at Pyes, Crows, or the like, which crosseth her in the flight. A going out: or flyeth a playing.

Coping Irons, are Instruments used in coping or paring of Hawks Beaks, Pounces, and Talons, when over grown; to **Cop**, is to pare them.

Cowping, is when young Hawks quiver and shake their Wings, to their old ones, in their feeding.

Coy, or **Coying**, is cherished well, made much off.

Collieth, noddeth her Head, maketh a motion, as if she would take a flight: not to say breaketh.

Crabb, or **Crabbing**, is when Hawks standing too near, fight with one another.

Deplum, is to pull off the Feathers: **Dismantle** the same.

Disclose, is when the young just peeps through the shell. It is also taken for laying, hatching, or bringing forth young; as the disclosed three Birds.

Display the Train, is to open the Feathers of the Tail, as they will often do as they stand on the **Pearch** but generally in their flying.

Disgorge, or casteth her Gorge, is her casting to cleanse the Mew.

Dropping, is when a Hawk mutes, or casts out her Excrements, directiv downward in several drops; not Yerking it straight forwards, or longways from her.

Engouted, is of a mixt colour.

Enoyling.

Enured, or **Inured**; taught or brought up to ones purpose.

Endewed, is digested her meat, empty Gorged, having no meat therein, Endeweth her Gorge, cleanseth her Pannell.

Enseame, is the purging of a Hawk from her Glut, and

and Grease. It is also likewise taken for the entering the Hawk, or first teaching them to fly at several Games, to encourage them; to make them willing to fly, of some termed **Entering a Hawk**.

Enterpened, when the Feathers are late in coming forth: when they are entangled; letted or hindred.

Embowelled, and not **fully endued**; is when her Gorge is void and empty, and her Bowels something stiff and full, not well digested her meat.

Embalmed, see **Note**.

Eysle, or **Eysle**, but **Eyas** and **Nyas** more proper: which are terms for young Hawks taken and brought away in the Nest. **Eyas** in the Eyrie, a young Hawk in the Nest.

Eyre, or **Eyre**, is the place where Hawks build, and hath their young.

Falconer, is the Keeper, Feeder and Manner of all sorts of Hawks.

Fair Hawk, or a long thick Hawk, you shall say: and not term it a great Hawk.

Feaking, is when the Hawk wipeth her Bill or Beak after feeding.

Feeding, is to give her meat, as feed the Hawk, not give the Hawk meat.

Firmed, see **Summed** and **Plumed**.

Fly on Head, when Hawks forsake their Game; or on the missing their Game, betake her self to the next she meeteth.

Fore-Hawk.

Fore-Hale, the term given to all Females of Hawks. **Frott**, or **Rub** themselves, as Hawks will do: Frott her Eyes against the Ponions of her Wings; is to rub her Eyes on her Wings.

Frisleth, is the Cry, or Crying of Hawks.

Fugitive, or a **Rangler**, is a Hawk that rangleth and wandreth abroad, and will not be at command.

Full Gorged, is to have the Croop, full of meat; say not full Crooped or Crawed.

Gaping of the Hawk.

Game, is the term used to any thing the Hawk flyeth at: and sometimes taken for the flight it self.

Gleame, after a Hawk hath cast, she Gleameth, or throweth up filth from her Gorge.

Glytt, or **Glut**, is a slimy substance in the Pannel, or Belly of the Hawk.

Gripe, is to seize, or hold fast the Prey.

Gurgiting, is when she is stuffed or suffocated, with any thing, be it meat, or ought else.

Hack, is the place where the Hawks meat is laid in the Mew, and where she eateth it.

Hawk keeps her mark, is when she waits at the place, where she lays in Partridge, or the like: and stirs not till they be **retrived**, or put up.

Hewe, is a colour.

Horne at seidge, is when a Hern is found standing by the Water side, watching for Prey.

Jack, is the **Hale Hawk**, see **Tiercell** or **Tassal**.

Jouke, or **Jouketh**, sleepeth well and soundly.

Impe, or **Pimpe**, is to mend a broken Feather, or to put a Feather into the Wings, or Train, instead of one lost or broken.

Ink, is the Neck from the Head to the Body of any Bird, which the Hawk doth Prey upon.

Intermetwing, is from the first exchange of the

Hawks Coat, till she turn white.

Lolletth, is when the Hawk hangeth her Wings.

Lure, or **Lewer**, or **Lewre**, is to call the Hawk to Lure, or teach her to come to it, or to the hand; also the Lure it self.

Liking, is when the Hawks fall to choose their mates: to tread the Hen.

Land, a term given to Water Fowl, when they are raised, or bated out of a Pitt or Pond of Water. Land the Mallerd.

Lease, is a long piece of slender Leather, with a Button at the end, by which the Hawk is tyed to the fist, or any thing else, on which she standeth.

Lean, is when the Hawk holds in to you.

Mewing, is the putting of the Hawk in the Mewe, or Chamber fitted for that purpose, it is also taken for the Hawks casting of her Feathers, as a Mewed Hawk of the first, second, or third Coat, when she hath cast her Feathers so often.

Mewte, or the dung of Hawks: muteth, shitteeth, dungeth.

Man, or **Maned**, or **Maning**, is the ordering and teaching of the Hawk; well Maned, is the good ordering. To make a Hawk is the same. To **Mannage**.

Mayle, or **Mayld**, as yellow or black Mayld, is yellow or black coloured.

Mettelled, is the Nature quality and disposition of the Hawk, whether good or bad, according to the word added.

Mantle, is to advance her self bolt upright, to stretch out her Leg, and Wing all along the side of her Leg, to gape and stretch abroad her self.

Make Hawk, is an old Staunch Hawk, which inured to her flight, will easily instruct a young Hawk.

Mail a Hawk, is to wrap her up in a Handkerchief, or other cloth, that she may not be able to stir her wings, or struggle.

Mail of a Hawk, is taken either for the Breast, or Plumage of the Breast, in reference to its colour: for they say a Hawk changeth the Mail; or the Hawk is white Mailed, &c.

Muteth, or **Mutesheth**, is when she cast her excrement out behind, shiteth or **Shlisseth** as some term it, see **Slice**.

Moulting, the casting of her Feathers; Moulting time.

Nowfell, to entize or inure, the Hawk to love to fly at her Prey. Is a teaching to fly, an entering the Hawk. Nowfell Hawks at young Fowl; Nowfell her young.

Nipeing, is the biting of the Falconers hand, before the Hawk be well maned or taught.

Note, is her fetching of Oyle from her Rump, wherewith she embalmeth her Feet, and layeth her Feathers straight and smooth.

Ofreger, a Falconer, a Keeper, and Manner or Mannerer of Hawks.

Pelt, is the dead Body of any Fowl, the Hawk hath Killed and dismembred in any sort.

Pill or **Pelt**, of a Fowl, is the remains or fragments, refuse which are left, after the Hawk hath been relieved, or fed.

Plumage, are small Feathers given to a Hawk to make her cast, it is also meant for the well Feathering of a Hawk, see **Plume**.

Plume,

Plume, is in some sence to pull Feathers, and to feed upon the Prey, when the Falconer is about to let the Hawk have a reward. Sometime it is ment for the Feathers themselves: as well Plumed, well Feathered; covered with Plume, covered with Feathers; of some termed **Plumage**, or **Somed**. The Plume, is also the general colour, or mixture of Feathers, in a Hawk, which sheweth the Constitution.

Prey, is the Bird, or Fowl, taken by the Hawk.

Plumming, is after the Hawk hath seized her Prey, do h dismantle it of its Feathers.

Petty, as Petty single, the ----- Toe or Pounce of the Hawks Feet, see **Singles**.

Puncheth, is when the Hawk picketh her self, draws her Feathers throw her Beak.

Poyne, is to lay her Feathers straight and even, called also premeing, or

Puketh, or **puteth over**, is when the Hawk removeth the meat from her Gorge, into her Bowels, Paunch or Belly; by transverling with her Body: she Puketh, is she cleanseth her Body.

Puteth over, when she removeth her meat from her Gorge to her Bowels, by transverling with her Body, but chiefly with her Neck.

Quarry, or **quarryor**, is the Fowl which the Hawk flyeth at, whether dead or alive, but it is taken especially for a flight, or the first flight of a Hawk, that is young: as first quarried, first entred to fly.

Quest, quest of a Dog; the calling or barking of a Dog in his hunting.

Railed in flesh, is when a Hawk grows fat.

Rake, is when the Hawk flies out too far from the Fowl.

Ramage Hawk, or **brancher**, is a young Hawk that just left the Nest, but flies not far from it; leaping from bough to bough, following the old Dame.

Ramage, is when a Hawk is wild, and difficult to be reclaimed or tamed; is proud, stout of a high courage.

Rangle, is when Gravel is given to a Hawk, to bring her to her stomach.

Rangler, a Hawk that will be at no command, see fugitive.

Retrive, or **Retrese**, is when Patridges having been sprung, are to be found out again. It is also used for the barking of the Spanniell, when he springs a Patridge, or any other Fowl.

Rowze, or **Rouse**, is when a Hawk lifteth her self up, and shaketh, her self. to shake and quaver her whole Body.

Ruff, is when the Hawk hits her Prey, and yet not trusses it, or come down to the ground with it, misses it. **Ruff and Stuope**, is to strike it, and descends along with it.

Reclaim, is to make a Hawk tame, and gentle, and familiar, maned: taken of her wild nature.

Repest, called back from flying. Lured in.

Recover, or **truss the Wings**, is when the Hawk keeps them close to her Body.

Rebate, is to forsake, or leave her Prey, to rebate is also to take her from her feeding, or Prey: to withdraw her.

Rebate, she is said to rebate, when by the motion of the bearers hand, she recovereth the fist or Pearch, from

which she endeavoured to fly, see **Vate**.

Reformeth her Feathers, not a pruning, but a kind of picking of her self. see **Countenances**.

Seeled, or **Seeling**, is when a Hawk first takes, hath her Eyes drawn so up, or blinded, with a thread through her Eye-lids that she sees not, or very little; the better to make her indure the hood: and tame them.

Seale, or **Seaze**, a seizing is when the Hawk, gripeth her Prey within her Foot; to take and hold the Prey, or stand upon it.

Setting down, is when the Hawk is put into the Mew.

Slize, is when the Hawk muteth or shiteeth a great distance from her, also it is taken for the scouring, or purging away the filth out of the Hawk. Able to slize far from her, and drops none.

Sliming, is when she muteth without dropping.

Snyting or **Sewing her beak**, is the rubbing, wiping and cleansing her Bill after she hath done feeding.

Spying, is to put up any Land-fowl; spring the Pheasant and Patridge.

Stoup, or **Stouping** on the Wing, is when the Hawk is aloft upon her Wings, and then descends to strike her Prey.

Soar, or flying aloft, termed also **Towering**: Soar a-loft.

Summed, or **Somed**, full summed, is when a Hawk is in her Plums or Feathers: full Feathered, the Feathers and Quills at the full growth of some termed, **full-firmed**.

Souie, or **Souie for Souie**, is blow for blow, in the fighting and beating of Hawks, and other strong fighting Fowl, as they fly in the Air.

Spout, is to spit Water on the Hawk out of ones Mouth, when they will not eat the themselves.

Shapt, slender shapt.

Stigles, the Toes of a Hawk which are distinguished, by Long single: Petty single.

Stretchers.

Stowce, is to take the Game in flight.

Staking, or **Stalking**, is to shadow or hide one self from the sight of Wild Fowl, by means of a hedge, or bush, a Stalking horse.

Swibell, or **Swyphile**, a running ring, that Hawks are tyed too in the Mew, or other place; which keepeth the lease, or string from twilling.

Smiteth her beak, is wipeth her Beak or Bill, after she hath fed.

Sweepeth her Beak: see **Snyting**, or **Smiteth**.

Straineth, when she inatcheth or clappeth her Talons on any thing, she is not said to clitch, or clitcheth at her Prey, but strain.

Tiercell, **Tercell**, or **Cassell**, is the general name for the Male of all large Hawks. as **Jack** is for the lesser sort.

Truss a Hawk, see **Mail a Hawk**.

Truss, is when a Hawk raiseth a Fowl a-loft, and so descendeth to the ground.

Truss the Wings, see **Recover**.

Towze up, is to mount on high, to rise aloft, to fly against.

Train, here ment for any kind of Fowl for Prey, which the Falconer casteth out for the Hawk to fly and seize upon, to enure her to fly.

Cye, Cyeing, is the bare Wing or Ponion of a Fowl, and a Leg of a Bird bare picked, which is given to the Hawk (indifferently sharp let) to pick at, to exercise his Body and Limbs.

Cayle to Cayle, when the Hawk forsakes her Game, and flyeth another way.

Cune, is either good or bad liking, being or condition, in a good Tue.

Crick and Crym, her self, is when the Hawk with her Beak doth lay her Feathers even and smooth, of some termed **Propping**: as Proyn her Feathers.

Crush the Wing, is when the hawk keeps them close to her Body.

Unreclaimed, is when a Hawk is Wild.

Unseeling is when you take away the thread that runs through the Hawks Eye-lids, and hinder her sight, is a suffering the Hawk to see.

Unstrike the Hood, is to draw the strings, that it may be in a readines to pull off.

Unlunard, is when the Feathers of a Hawk are not fully grown.

Urines, are Nets to catch Hawks withall.

Uitell, or **Uiaunders**, the term for Hawks meat.

Vanes, as long Vanes, and Sails, see in Hawks Wing the term.

Vervells, small rings of Silver or other mettle which are fixed at the ends of the Jesses, through which the Falconer put the leafe, to tye her to any place. On the Vervells is usually engraven the name of the Gentleman as oweth the Hawk.

Ventricle.

Unenterpen, when the Feathers grow well out, and are not hindred in the groath, by any obstruction.

Warble, is after a Hawk hath mantled, she crosseth her Wings over her Back.

Whurre, as bate at the Whurre, is the rising and fluttering of Partridge, and Pheasant.

Weathering, is setting abroad your Hawk to take the Air, either by Day or Night, in the Frost, or in the Sun, or by the Fire side, or at any other season.

Things Necessary and belonging to Hawks.

A **Ruster Hood**, is the first hood a Hawk wears, being large Wind and open behind, it is a plain and easie Leather hood.

A **Hood**.

Bewetts, **Bewitts**, or **Buetts**: Boots or Leathers to which the Bells are fastned, and are buttoned about the Hawds Legs.

Bell or **Hawks Bells**; which are round hollow sounding Balls, with little Pellets, in them, made of Copper, or sounding Mettle.

Jesses, are those short straps of Leather, which are fastned to the Hawds Legs, at the Bewetts; at the ends whereof are Knots. They are about half a foot long, and sometimes have no Knots at the ends, but Vervells, or little round rings of Plate.

Uervells, or **Anlets**, are round rings of Silver, or

other Mettle, which are fasted to the Jesses, on which is engraven the name, and place of aboard of him that is owner of the Hawk: throw which rings is put the leafe.

Leafe, or **Lash**, is a small long thong of Leather, by which the Falconer (having run it throw the Vervells) holdeth his Hawk fast upon his fist, foulding it many times about his finger.

Ceance, or **Croiance**, is a fine small long line of strong and even wound Pack-thread, which is fastned to the Hawks leafe when she is first Lured, or taught to come to the hand: and is only to keep young Hawks from flying away.

Falconers Glove, is a thick strong Leather Glove, with a Button and Tassell at the lower part of it, on which he carrieth his Hawk to secure his hand from her Tallens.

Lure, is that whereunto the Falconer calls his Hawk, by casting it up into the Air; by help of a Leafe that he hangs it over his shoulder withall: It is made of Feathers and Leather, in such wise, that in the motion it looks not unlike a Fowl.

Pearch, is a crosse peice of Wood, or such like, lapt about with cloath or a straw robe; on which the Hawk reits, when she is off the Falconers fist. This crosse piece is usually fastned in a four square planke, of about a Foot and half: and so is capable of removing to be set any where.

Mew, is the place (whether it be abroad; or in the house) in which the Hawk is put, during the time she casts, or doth change her Feathers.

Feeding, is her meat, whether small Birds, Chickens, or the hearts of Mutton, or Veal.

Cyeing, is the bare Leg, or Ponion of a Puller or Pigeon, or such like, to pull at, to exercise his Body and Limbs.

Casting, is any thing given the Hawk to make her cast, there by to purge, and cleanse her Gorge, and Belly.

We come now to the examples of other Birds which are also born in Coat of Arms.

LXIII He beareth Argent, a **Bird** Gules. I term this a Bird, and no other name, because in Herauldry there are usually such drawn, and put into any of the colours, or mettles belonging to that Art; which as they cannot be distinguished by their shape, or proper colour, they can therefore be termed no otherwise then Birds; or a Bird simply.

Yet some will go so far, as to call a Bird after this form, and shape, by a peculiar name, though all of one colour; as,

A **Gold Finch**, if Or.

A **Dove**, if Argent.

A **Green Finch**, if Vert.

A **Black Bird**, or **Dusell**, if Sable.

A **Bunting**, if Azure.

A **Canary Bird**, if Gules.

Whenas none of these kind of Birds are of a self colour, but generally mixed; and contrary coloured Beaks and Feet, and therefore are in Arms always born proper. And ought so to be termed.

H h

LXIV.

LXIV. He beareth Argent, a **Ligurine**, or **Green-Finch**, proper. It is called by some a **Green Linnet**, the Bill is sharp not crooked, the upper mandible dusky, the lower white, the head and back Green, edged Grey, the middle of the back of a Chestnut, the rump of a deep Green, the throat neck and breast of a yellowish Green, belly white: the borders of the quill Feathers yellow, the second row, and covert Feathers Green, but in the inner side yellow, the tail hath the middle Feathers black, next on either side edged yellow, and the out side Feathers, from the middle outwardly are black, but all their inner Webs, from top to bottom yellow, the feet of a flesh colour.

To Birds of this size, and proportion, we may add these following.

The **Bull Finch**, hath a black short strong thick Bill. The head for the body is great, being on the crown, and about the Bill black; the Breast Throat and Jaws to the Eyes of a lovely Scarlet or Crimson colour; Rump and Belly white, Tail all black, the Neck and Back Grey with a certain tincture of red: (of some a blew or Ash colour) the quill Feathers, the last or inmost of the outer half of the Wing, have the outside from the shaft red, and the inner side black: the interior, or rest of the inner part of the Wing next the Body, are black with a gloss of blew, the Legs dusky. This Bird is called an **Alp**, or **Nope**.

The **Eyebreak**, it is a thick and short Billed Bird, of a whitish colour, the tip black, Eyes Grey, about the Bill Orange colour, from thence to the Eye black, the under Chap compassed with black, the Head of a yellowish red, the Neck brownish, the Back red, the Rump yellowish, the Breast and sides reddish, Belly white. The quill Feathers, the fore-most of them for half way are white, those next the Body are red, the tips of all shine with a changeable colour of purple and blew, like the Necks of Pigeons. The Tail is short, spotted at the top on the middle Feathers with red, on the outward, with black. The Feet and Legs of a pale red.

The **Sparrow**, the Bill is thick and blackish, at the corners of the Mouth, to the Eyes yellowish, the Head of a dusky blew, and Ash colour; Chin black, about the Eyes two white spots; from the Eyes a broad line of black, the Throat whitish, and under the Ears is a great white spot, the Breast and Belly white, the Neck and Back of a reddish black, the rest of the Back and Rump as it were of a mixture of Green, Dusky and Ash colour: the quill Feathers are dusky, with reddish edges, from the bastard Wing, a broad white line, extends to the next joint, the Tail a little forked, and of a dusky black: the Feet of a dusky Flesh colour.

The **Chaf Finch**, the Bill strong and sharp, dusky with a whitish under Chap: the Head blewish, about the Nostrils black, the Back reddish, with a mixture of Ash colour, and green; the Breast red, the Belly under the Tail white: the quill Feathers have the exterior Webs yellow, and interior white, and the Basis, or Ridge of of the Wing blew. In each Wing is a white spot, after it succeeds a black, then a long white fillet, beginning at the fourth quill, and after the tenth continues through the tops of the covert Feathers. The Tail have the two middle Feathers brownish, edged Green, the next three on either side black, and the out-most black, with the middle part of the Feathers white.

*

The **Virginian Nightingale**, a thick short burning Beak, dusky: a black border compasses the Eyes and Bill, the Head is adorned with a towering Crest, which it often moves, towards the Bill, as towards the Tail; the colour of the whole is a lovely Scarlet, in the Head and Tail, more dilute, or browner. It is called of some the **Nut-cracker**, because it loves to feed on Kernells, see chap. 13. n^o mb. 22.

The **Bramble** or **Brambling**: a thick short Bill from a broad base, ending in a sharp point, black: in some black at point, yellow at bottom. From the Head to the middle of the Back, with the edges of the Feathers, of a reddish Ash colour; the lower part of the Back white; the Throat of a yellowish red, the Breast white, the Feathers behind the vent reddish. The quill Feathers are red, the in-most of all black with red edges: each Feather having a white spot on the out-side the Shaft, by the tips of the Feathers of the second row. The Plumage of the base of the Wing, is Orange colour, and underneath yellow. The middle Feathers of the Tail black, tip and edged reddish Ash colour, the out-side Feathers black, with the exterior Vans, or Webs white: the Feet, a pale dusky colour.

The **Great Pied Mountain Finch**, called also the **Lark Heel Mountain Finch**, or the great **Brambling**. The Bill yellow, the Back Neck sides red, the Breast paler, the Belly and Wings white, the Back, and Scapular Feathers, variegated with black and a reddish Ash colour; the black appearing of a triangular figure. The quill Feathers, have the eight out-most black, edged white: the seven next are wholly white, tip black: the rest are black, edged red: all the covert Feathers are white. The Tail forked, the middle Feathers are black edged white, the out side Feathers wholly white edged towards the bottom black. Legs Feet and Claws black, the hinder Claw longer then all the rest, as in a **Lark**.

The **Siskin**, the lower mandible of the Bill hath an Angle, or Tooth on each side, which is received in the upper. The Head is black, the Neck and Back are Green, the Shafts black, the Rump of a Greenish yellow, the Throat and Breast of a yellowish Green, the Belly white. The quill Feathers of the Wing are Green: the exterior covert Feathers are black: the Tail the two middle-most black, the rest on the out-sides, above half way yellow, with black tips, the upper part Grey.

The **Canary Bird**, or **Sugar Bird**, it is as big as a common **Citmouse**, it hath a small white Bill, thick at the base, the Feathers of the Wings and Tail are Green; the Breast Belly and upper part of the Head, more yellowish, their Feet whitish.

The **Citrill**, or **Citrinella**. The Bill is dusky, the Head and Back Green, the Rump yellowish, the hinder part of the Head and Neck ash-coloured, the neither surface of the Body green, about the Ventrals white; the upper part of the Breast and Belly a lovely yellow, the Tail black, the Feathers all edged with Green, the quill Feathers are the same, the lower row of the Wing Feathers green, tip with white: the Feet whitish or flesh colour, with black Claws.

The **Pingryll**, or **Serim**: The Bill thick and sharp pointed, the upper Chap something prominent.

the Head yellow: the middle part of the Feathers spotted with black on the back, otherwise all red: the Rump of a yellowish Green, the Breast the same; the Belly white: the sides variegated with oblong black spots. The Tail black, edged with Green, the Wing Feathers the same, the tips of the second row white, and the other lesser Wing Feathers Green. The Feet dusky; Claws black.

The **Basilian Tangara**, a straight black Bill and Eyes: Legs dusky: on the forehead at the Bill a black spot, the whole Head and Neck of a shining Sea green, a circle of black like a collar encompasses the Back, the Back to the Tail yellow, the Belly blew, the Wings blew, without sides or borders black; the ridges of the Wings yellow; Tail black bordered blew. Legs and Feet cinereous, inclining to dusky.

There is another kind of **Tangara**, with a dusky yellow Bill, black Eyes, the whole Head of Scarlet, all the rest of the Body, Wings, and Tail of a shining black, Thighs white, with a long Scarlet spot on the out-sides, as if stained with Blood, Feet and Legs Ash colour.

A 3 Sparrows proper. Born by the name of *Sparrow*.

A Golden Finch is the Crest of *Haresfinch* of *Chester*.

B 3 Linnets proper. Born by *Linnet*.

O a Fesse between 3 Bull-finches, proper. Born by the name of *Alpin*.

A 3 Brambling proper: a cheif G. Born by the name of *Brambley*.

A 3 Canary Birds G. Born by *Bullmore*.

B 3 Larks O by *Ayer*.

LXV. He beareth Argent, as **Cyttimous**, proper. Born for the Crest of *Tiulm*, or a **Citmouse**, as most term it; of which there is several sorts: as,

The **Great Citmouse**, or **Dr-Eye**, its Bill is straight and black, the Head and Chin black, a broad white line from Mouth to Eyes, which is compassed with black, the Neck, Shoulders, and Back, of a yellowish green, Rump blew: the Breast, Belly, Thighs are yellow, lower part about the vent white: with a broad black line, reaching from the Throat, to the vent, dividing both the Breast and Belly in twain. The quill Feathers are dusky with white and blew tips, the first row of covert Feathers are white, the smaller coverts are blew: the Tail have the exterior vans of all blew, the interior black, the two outmost being white: the Feet of a Lead, or blew colour.

The **Cole-Mouse**, the Bill is black, the Head is so, with a white spot behind: the Back of a greenish Ash-colour, the Rump greener; the Wings & Tail blackish, the edges of the Wing green, the coverts have white tips: the Legs bluish. This is the least sort, which we in our Countrey call **Cittimous**, or **Hop**.

The **Marsh Citmouse**, or **Black Cap**; the Head black, the Cheeks white, the Back greenish, the Feet Lead colour, the Belly and under side white. The Wings and Tail dusky.

The **Blew Citmouse**, or **Nun**: the Bill thick short and of a dusky black, the Head of an Azure colour, is encompassed with a circle of white, as it were, a

Wreath, or Coronet; an other encompasses the Throat, and hinder part of the Head, a black line from Bill through the Eyes, to the hinder part of the Head. Cheeks white, Back of a yellowish green, the Sides Breast, and Belly yellowish, save that a whitish line divides the Belly and Breast, as far as the vent. The tips of the quill Feathers next the Body, are white, the outward edges the like, the covert Feathers blew tip white; the Tail blew, the edges of the out-most Feathers white, the Feet blewish.

The **Long Tailed Citmouse**, the Bill is black, the Crown of the Head white, Neck Black, from the Bill about the Eyes, on each side to the hinder part of the Head, is a broad black line, the Jaws Throat and Breast white, varied with small dusky spots. The Back and sides and Rump of a dark Chestnut, the Belly somewhat lighter. The quill Feathers of a dusky colour: the Tail is long, having the middle Feathers longer then the side ones: the out Feathers on each side, the top or outer half from the Shaft are white, the next less white, the next only the outer tip white, all the rest black. The Feet black.

The **Wood Citmouse**, it hath a red spot through the middle of the Crown, with black on each side: the Body green, Belly paler, the Wings and end of the Tail, black: the Legs dusky.

Basilian Citmouse, or **Gaira-jenoja**. A short blackish Bill, black Eyes, the whole Head, Throat, Breast and Belly blew, the Neck and half the Back is Black, the rest green, the Wings and Tail black, edged with green; the Feet dusky.

The **Linnet**, it is of bigness between the **Chaffinch** and the **Citmouse**, or **Hop**: the Bill is thick and strong, black about, white underneath: the Head party coloured of cinereous, and black; that is, the middle of the Feathers black, edges or sides cinereous: the Back as so, of black with red edges; the Breast white, the Vent yellowish. The Region of the Crow, or bottom of the Gullet, is a lovely red, the edges yellow; the Wing Feathers black, the edges of the exterior whitish, the interior red: the fore-most Feathers of the second row of coverts, are black, those next the rise of the Wing are edged with red. The lesser covert Feathers about the base or ridge of the Wing, are red. The Tail is forked by reason the two outward Feathers are a little longer then the middle, being all black; the middle two edged with red, all the rest with white, the Feet a dusky or blackish colour.

The **Red Head Linnet**, the Bill black, the lower Chap at the base white, the Eyes Hazle colour, on the top of the Head, is a red or sanguine large spot, all the rest of the Head cinereous, the Shoulders, Back, covert Feathers of the Wing, are red: the Breast tinged with red, else it is yellowish. The outward quill Feathers are black, the inner dusky: which by the white edges the Wing being complicated, concur to make a white spot on them. The interior Margins or Vans, and the tips of the quill Feather toward the Body or fering on of the Wing are all white: the Tail something forked and black, the outward Feathers edged with white. The Legs and Feet small of a reddish dusky colour, Claws black.

The **Mountain Linnet**, it is much larger then the common **Linnet**, and agrees with it in colours: only

the Rump is of a very fair shining Scarlet or Orange-tawny colour; the edges of the middle quill Feathers of the Wings are white, and so are the tips of the second row of the covert Feathers; the Tail all over brown or dusky, the edges of the out Feathers white.

There are some Birds of the **Red Head Linnet** kind that have the tips of the second row of the covert Feathers of the Wing white, which make a transverse white line cross the Wing.

LXVI. He beareth Sable, a **Dove** Argent Beak and Legs (or **Hemmed**) Gules, holding an **Olive Branch** Vert. or a **Dove** or **Pigeon** proper, holding an **Olive Branch** in its Bill. This is the Crest of *Ireland*. The latter Blazon may be good, yet not as the first, for there may be a mistake through the diverse colours found in them, as:

The **Common Wild Pigeon**, hath a sharp and slender dusky Bill, soft about the Nostrils and white, the Eyes yellowish, the Legs and Feet (generally in all) reddish: Talons black. The Head Neck and Breast of a blewith Ash colour, the Belly lighter, having a shining about the Neck and Breast of a blewith green. The Rump and under the Wings white, the Wings and Tail a dusky Ash colour, the covert Feathers tipped with black. There is also of this wild sort of Pigeons, white ones, clay coloured, and light Ash colour near a white, with the covert Feather black, as if there were two or three black lines, over cross the middle of the V Wings.

The **Tame Pigeon**, or **Dove**, the Bill dusky, with soft whitish (some more fleshy) Nostrils, the Feet red: as for the colours of the Body it is various, some all white, others all black, others all clay colour: others variable, and contrary mixed, without any kind of order, but in some more, in others less of white and black, white and clay colour. Of these Tame Pigeons there is several sorts; as,

The **Runt Pigeon**, or **Russian Dove**, which are large Pigeons, as big as young Hens: they vary in colour as most other domestick Birds.

The **Cropper Dove**, which will in their mourning blow their Crops or Crows as big as all their Body: they are large Pigeons, and very much vary in their colours.

The **Shaker Pigeon**, or **Broad Tailed Dove**, so called because they shake or wag their Heads up and down, and carry their Tail broad up after the manner of a Hen, or Turkey: they vary also in their colour. There is an other sort of these Pigeons, which are without broad Tails, which are only termed **Shakers**.

The **Carrier Pigeon**. They are generally of a dark blackish blew colour, with a naked circle about their Eyes, the Bill covered about half way, with the like naked skin. These Pigeons where soever bread will fly to that place again, carry them wheresoever you please; so that they are made use of to carry Letters too and fro in *Turkie*.

The **Jacobines**, or **Coppers**, or **Cop Headed Pigeons**, because they have in the hinder part of the Head or Neck certain Feathers reflected upwards compassing the Head, behind almost like a Monks-hood. These also

vary in the colour, and have rough Legs, others ruffed.

The **Turbit Pigeon**, or **Cottbeck**: these have a thick short Bill like a **Bull Finch**, with a flat crown depressed, the Feathers on the Breast reflected both ways.

The **Tumbler Pigeon**, is small and of diverse colours, they have strange motions, turning themselves backwards, over their Head, and shew like Foot-balls as they fly and tumble in the Air.

There are several other sorts, as **Smitters**, from their striking their Wings one against the other. **Helmets** whose Head, Tail and Quill Feathers are all of a colour and the rest of the Body of an other colour. **Light Horse-men**, a Bastard kind between a Cropper and a Carrier, and partakes of both. **Turners** having a tuft turning down backwards from the Head. **Hatmats** from their great black Eyes in which they exceed all others. All of variable colours.

The **Turtle Dove**, is various in colour: but the most usual, the Bill of a dusky blew colour, Eyes red and yellow, a circle of naked flesh compassing them: Feet red, Claws black. Head and Back blewish, Shoulders and Rump reddish, Breast and Belly white, the Throat tintured with a lovely vinaceous, grape-like colour. The Quill Feathers dusky, the second row Ash colour, and the next black. The Tail dusky, the outmost having the Webs and Tips white, with a black ring with white tips, behind his Neck.

The **Indian turtle Dove**, the Bill black, the Feet red, the Head, Neck, Breast, and Wings, to the quill Feathers, the Back to the Rump, reddish but faint: Eyes Saffron colour, with a slender black ring compassing the Neck, the Wings and Tail dusky: there Belly near the vent yellow.

The **Barbados Turtle**, is no bigger than a Lark, the Bill small and dusky, black Eyes, with a Golden circle: the whole Head, Neck, Sides, Back, and Wings dark Ash colour, or black and blew Feathers, with half-moon like black borders, the Wings and Tail dusky, with the outward Feather white. The Belly white, having the borders black.

The **Ring Dove**, the Bill yellowish, covered for some space with a red or purple skin, wherein are the Nostrils, above them is (as it were) a white Dandruff, the eye circle pale yellow, the feet red, as in all other Pigeons; the Neck hath a semicircular ring of White, above and beneath it is various shining colours, as blue and green and yellow; head and back dark ash-colour, the Breast purplish and red, the belly light ash or white; the Wing is black, the middle part edged with white, the tail brownish with the ends black.

The **Stock Dove**, the Bill pale red, the top of the head brownish, the neck a shining changeable colour, the Wings, Shoulders and Breast ash-colour, dash with purplish and red colour; the quill feathers, the five first all black, edged white; the rest have the upper part black and the lower ash-colour; the tail, the lower part cinereous, the upper for one third of the length black, on both Wings are two black spots, the feet red, claws black, the legs feathered below the Knees. It is also termed with us a **Quees**, or **Quiete**.

A Cheveron between three Doves with branches in their Bills proper, is born by the name of *Dovell*.

Per Fesse B and A a Pale counterchanged, three such Doves with branches, is the Coat of Arms belonging to the Worshipful Company of Tallom Chandlers.

S on a Cheveron between three Pigeons A Bills and Legs G 3 Pheon S is born by the name of *Page*.

B 3 Doves proper, born by *Hodby*.

Per Cheveron B and V 3 Doves or Pigeons A Leggs and Bills G by *Dove*.

S 3 Doves with Olive branches in their mouths all proper. Born by *Columball* of *Derley*. Else Blazon them thus:

Sable, three Doves Argent, each holding an Olive branch in the mouth proper, **Membred**, Gules. You shall not need (saith Mr. *Morgan*, lib. 1. fol. 63.) to say, **Beaked** and **Membred**, because the Beak of any Fowl is accounted the Members of that Fowl as well as the Legs, but by his good favour, the term Beaked or Billed are not to be neglected, especially in Fowl, which sometimes have their Bills only of a contrary colour to the rest of the body, and others that have their feet only contrary, all the rest being of one Colour or Mettle, in vvich cases, to use only the term **Membred** may cause a mistake, therefore it is best and safest to use both, rather than lose one part of the Fowls coloured place.

LXVII. He beareth Azure, a **Dove displaid**, Argent in the **Suns Glory**. This is in old Blazoning termed the **Holy Ghost**; because it is said that it descended on our Saviour in the likeness of a **Dove**. This is a part of the Companies Coat and Crest of the **Stationers**. And it is the Embrauderers Crest, being a Worshipful Society in the City of *London*.

LXVIII. He beareth Gules, a **Jacobine ruff footed Dove**, Argent. Others a Dove with a **cap** on the head, and **rough footed**; or a **Ruff footed Dove** capped or coped; or a **capper Dove** rough footed. Born by the name of *Dove*.

B 3 such turned to the Sinister A born by *Mitmejer*.

LXIX. He beareth Argent, a **Heath Cock**, Sable, **Crest and legged**, Gules; a **Hore-Cock**, proper, **Beak, Legs, Comb and Watties**, Gules.

The **Mountain Cock**, and a **Grows**, or **Cock of the Wood**, in Herauldry we draw thus (as in the Plate is expressed) but its true shape is by *Gesner*, and others thus described.

The **Heath Cock**, or **Black Game**, or **Grows**, is all black, having a hair tuft on his head falling backwards, with a reddish flesh on the eye-brows, which all of this kind have; the Bill is black and crooked, the under chap somewhat prominent and gibbous, the eye-brows bare and red; the legs rough with feathers; the feet naked; the neck and back do shine with a kind of blue gloss; the quill feathers are tipped with white, all under the Wings white; the tail hath the feather on either side turning outwards; see the Figure, chap. 12. numb. 60.

The **Heath-Pen** is of the colour of a **Wood-cock**, or **Partridge**, reddish, with black transverse lines; the breast and belly hoary, in the tail the outmost feathers are longer than the middle, but not reflected, as in the Cock, and tipped with White.

The **Cock of the Mountain**, or **Mountain Cock**, comes nearest to this used in Heraldry, yet he is mistaken

that writes that it hath on its head, a red fleshy Crest, and about the cheeks two red fleshy lobes or gills; for it hath no other than an hairy tuft on his head hanging backward (as is seen in many Hens) with a naked skin about the eyes, of a Scarlet colour, the Bill crooked, with an indent in the higher mandible and blackish, the breast of a pale red, with transverse black lines; the throat of a deeper red, the Belly Ash-colour; the upper side of the body party coloured, of red, black and ash colour, the tips of the feathers powdered with specks, except the head, the wing feathers are dusky and dark, tipped with white, and the exterior vane of all variegated with red and black and ash; the tail black, tipped with white, and carried up after the manner of a Hen tail, see numb. 94.

The **Hen of the Mountain**, hath no tuft on the head, but is of a deeper red in the throat and tail, which is crossed with black bars, holding it not up as the Cock; both Cock and Hen have their legs feathered before and bare behind; the toes naked and joined together by a Membrane as far as the middle joint.

A 3 Heath cocks proper. Born by *Peiton*.

G on a Bend A cotized O 3 Heath cocks S Combs, Bills and Leggs G by the name of *Heath* of *Chester* and *Weston*.

S 3 Heath Cocks A Membred G born by *Harbe*.

A 6 Morecocks S Membred G is born by *Fitz Mores*.

Er. a Fesse between 3 such S Membred G by *Mre*, of *Hall of Heath*.

A a Heath cock S comb and legs G born by *Hunerhausen*.

LXX. He beareth Argent, a **Wren**, proper. This is the least of Birds, the Bill is slender, dusky above, and yellowish under, the Eyes, Hazle coloured, the Head, Neck and Back of a dark spandiceous, or red chefnut colour, especially Rump and Tail; the Back, Wings, and Vail, varied with cross black lines, which Tail he holds erect. The Throat pale yellow, Breast whiter, the lower Belly of a dusky red, the Feet dusky.

The **Crested Wren**, or **Golden Crowned Wren**; so termed from its Crest of Feathers extended directly, through the middle of the Head, from the Bill to the Neck. Others write, that it is only a bright spot in the Feathers of the head, of a deep Saffron or pale Scarlet colour, the edges yellow: the Neck of a shining yellowish green, Eyes compassed with white, the Back from a dark green, inclines to a yellow, the Breast of a fardid white, the quill Feathers dusky, edges yellow; with a black spot about the middle of the Wing; the tips white of the covert Feathers, which make a white line cross the Wing above the black: at the ridge of the Wing is a white spot. The Tail is of a dusky colour, having the exterior borders, of a yellowish green, Feet blackish.

The **Black Cap**, it is a very small Bird, with the top of the head black, Neck cinereous, Back dark green, quill Feathers dusky, edged green; Tail dusky, with a tincture of green: Throat and Breast Ash colour, Belly white, tintured with yellow, the Bill black and slender, Feet of a Lead colour. The Head of the Female is red, as the Cock is black.

The **Robin Red Breast**, or **Ruddock**, is a small Bird generally pricking up his Tail, the Breast is of a red, or deep Orange colour, which compasses also the Eyes and

And upper part of the Bill, or forehead, Belly white, Head Neck, Back and Tail of a dirty green or yellow, rather cinereous with a tincture of green. The Bill dusky, the Male having small hairs, or beards, growing on each side: the Feet black.

The **Gimpel**, or **Brazilian Teitel**: it is a small singing Bird, like the **Robin**: chirips like to the **Redstart**. Hath a thick short black Bill, the Head, Neck, Back and Tail all black, shining with a tincture of blew; Throat Breast and Belly yellow, at the rise of the upper Bill behind the Nostrills, it hath a spot of yellow Feathers; the Legs dusky.

The **Anadavad Bird**, is a small Bird, but holdeth not up his Tail, as the **Wren**. The upper Body of a dusky colour, the Rump of a Scarlet, or deep Orange; the quill Feathers and Tail black: the Wings and Coverts spotted with round spots, the Throat red, Breast & Belly black, Legs white, Claws long, & crooked.

A a Fesse between 3 Wrens proper. This is born by *Wren*.

A 3 Robin-red-breasts proper. This is born by *Van Ruddock*.

A a Cheveron between 3 Wrens S born by the name of *Wrenbury*.

LXXI. He beareth Azure, a **Gold Finch** proper. It is termed also a **Chistle Finch**. The Bill white, black at the point, a ring of Scarlet compassing the basis of the Bill, a black line from the Bill to the Eyes: Jaws white, top of the Head black, which runs with a broad line, on both sides the Neck. Neck and Back of a fulvous, or reddish Ash colour; the Breast and Rump paler, Belly white, the Tail and Wings black, yet tips of both are white; the Wing is adorned with a beautifull transverse of yellow in the long covert Feathers.

Under this figure may be comprehended all other sorts of small Birds, which usually (if born in Coats, or for Crests) are born proper as the **Black Cap**, the **Gimpel**, and the **Anadavad Bird**, before in *numb.* 70. described.

The **Lark**, the Bill slender and blackish, a cinereous ring compasses the hinder part of the Head, from Eye to Eye: the Head is reddish Ash colour, the middle of the Feather being blacker, the Back the same; Throat yellow, Breast spotted with brown spots, the Wing Feathers cinereous, tip with white. The Tail brownish with white tips, the outward Feathers edged with white, Feet dusky, the Claws long and crooked black with white tips, the hinder Toes have a Claw, which is called the **Larks Spur** or **Peel** it is twice as long as the foremost Claws: and reacheth behind his Knees.

The **Wood-Lark**, the Bill slender, and dusky, a white line encompasses the Head from Eye to Eye, like a Wreath, the Head and Back partly coloured of black and reddish yellow; Breast and Belly of a pale whitish yellow, the Throat deeper; both spotted with black, in the middle part of the Feathers. Rump yellowish red, or tawny, the Wing Feathers dusky, edged yellow, the Bastard wings have reddish edges, tip white; the small Feathers on the ridge of the Wing, are Ash colour. The Tail blackish, edged with a reddish colour, outward Feathers have white tips. The Feet pale yellow, claws as the foresaid **Lark**.

The **Cit-Lark**, is less then the other, the Head, Shoulders and Back various, black and yellowish green: the middle part of the Feathers black, & the edges green: the Rump green only. Throat white, Breast and under the Wings, yellowish spotted with black, the lower Belly white. Quill Feathers dusky, the exterior edges of a yellowish green, the coverts are tip white, the Tail dark brown, the outmost party coloured of white and brown. Feet yellow, the Claws in the back Toes (as in all **Larks**) very long and dusky.

The **Heug Sparrow**. The Bill slender, and pretty long, and black; the upper part of the Body is partly coloured, of black and dirty red, (that is) the middle of each Feather about the Shaft black, and the out side, or edges red: the Rump greenish, the prime Feathers of the Wing dusky, edged red: the second row of Wing Feathers have white spots, the lesser row spotted like the Body; the Tail all dusky, Breast brownish, the Belly whitish, or Lead colour. The Feet of a yellowish flesh colour. The hinder Claw, is greater and longer then any of the rest.

The **Red Sparrow**, or **Reed Sparrow**; hath a thick bunting Bill black; Head black, a white ring about his Neck, the Cheeks red about the Eyes, Throat black, Breast and Belly white, Back and Covert Feathers of the Wing partly coloured of black and red; Rump red, quill Feathers dusky, edged red; the lesser row of Wing Feathers are Ash colour, edged and tip red: the Plumage of the base or ridge of the Wing, blewish. The Tail is black, with the two Feathers on the out-side white. Feet of a dark Flesh colour; the Back toe great and strong, the Claws black.

The **Yellow Hammer**, hath a dusky Bill, the Throat and Belly yellow, Breast more reddish, Head green and spotted with brown, Back and Shoulders, black, edged with reddish green: Rump red. Quill Feathers dusky, edged with whitish green, Tail forked something, and of a brown colour with the outward edges green, with two white spots obliquely cutting the out Feathers of the Tail, near the tips. Feet of a horn colour, Claws black.

The **Citrus**, the Bill thick and short, Breast and Belly yellow, sprinkled with brown, Head Back Wings and Tail, from a testaceous colour, inclining to a dusky or brown: with two Feathers out-side the Tail partly white.

The **Portulane**, the Bill short and thick at the base, and red: Feet pale-dusky, Claws black, having the Back toes great, and the Fore-toes all of a length, Throat and Breast Ash colour, Belly to Tail red: Head brown, or dusky Ash colour, spotted black; Back the same, Rump green. The great quill Feathers, edged with greenish white, the lesser or interior quills edged with red: the tips of the second row white, of the third row, white, and the lesser covert Feathers, edged with cinereous; the Tail dark brown, with the out Feathers white. *Adriandus* in his *Ornithology*, lib. 13. cap. 24. sets out several other coloured **Portulanes**, of which he saith one is all yellow, or straw colour, except the ridges of the Wings, and tips of the quill Feathers, which are white. Another kind all over white. And a third kind, the Head and Back cinereous, spotted black: Belly and Legs yellow, ridges of Wings and quill Feathers white: Tail brown, with yellow sides.

The **Bunting**, the Bill is great and thick, having a hard Knob, or Eminency, in the upper Bill, the under Chap inclines to it by an indent. The colour of the Head and Back, Earth-like spotted: Chin, Breast, Belly, of a yellowish white; the Throat hath oblong black spots: the quills and covert Feathers are dusky, edged brown; the Tail all of a dusky red.

The **American Bull-Finch**, thick in the Bill, dusky above, white underneath: Eyes blew, the whole Head of a rare sanguine colour, the Back grey, the Neck, Breast, and Belly, white; the Wings and Tails black. The ridge of the Wings, and small coverts grey, interspersed with black.

The **Cold-Finch**, the Head and Back of a dusky greenish ash colour, the Rump black, quill Feathers black, but the smaller next the Body all white, which makes a white spot, or stroak, cross the Wing; second row of Wing Feathers is black, with whitish tips, the coverts are edged with green, the Tail black, with the Webs of the outward Feathers wholly white, the Bill and Feet black. Called also the **Cold-Finch**.

The **White Throat**, the upper Bill black, lower white: the Feet of a dusky yellow, the Back-Toes great, the exterior Fore-toes equal, and less then in other small Birds, joyned in the bottom to the middlemost; and the interior Fore-toes joyned by an intervening Membrane, or small skin, to the middle of the middle Toe, which is not usual in small Birds. The upper surface of the Body red, inclining to ash-colour, the Head more reddish, Throat white, Breast and Belly red, the great quill Feathers white, the lesser next the Body red; the Tail black, with the cut side Feathers, white in the exterior Webs.

The **Stone-Chatter**, or **Stone-Smith**, or **Moore-Titling**; the Bill slender and black and a little crooked, Feet and Claws black. The whole Head and Back black, the Rump white, with a spot on either side the Neck of white, the Neck black, the Breast fulvous or of a yellowish red colour, Belly white. The quill Feathers dusky, except two next the Body which are white at bottom: the covert Feathers edged red, the Tail black, with the two outward Feathers in the exterior Webs, and Tips white.

The **Whin-Chat**, or the **Anthus**, or **Flous**, the Bill is slender and black, the Feet and Claws also: the Head Back and Coverts of the Wings of a Fawn-mort colour, variegated with black spots, placed in rows. The Breast yellowish, spotted with black, Belly white; from the Nostrils above the Eyes, to the hinder part of the Head is a white line, and under the Bill is a like white line, and the middle space between these lines, through the Eyes is black. The Quill Feathers brown, with yellowish edges; those next the Body tipped with white: the Covert Feathers are black, with two white, on each Wing: the middle Feathers are black, the out sides have the Feathers half black, and half white, at the bottom.

The **American Chat**, the Bill straight and black, Sapphire colour Eyes, with a black Pupill; the Thighs or upper Legs are covered with ash coloured Feathers, the lower with a black skin. The Head, Neck, Breast and Belly white, approaching to a dilute grey, but the Back with cinereous, from the Bill, through the Eyes, to the

end of the sides of the Head, is a black line, the Wings black, the Tail black, with white tips, which is covered with the middle Feathers, which are white.

The **White Tail**, or **Fallow-Smith**, or **Wheat-Ear Bird**. Bill is slender and black, the Back-Toe armed with a great Claw. The Head and Back is cinereous, with a mixture of green and red; the Rump is all white, the Belly is white, lightly dashed with red; Breast and Throat have a deeper tincture of red, above the Eyes is a white line, continued to the hinder part of the Head; below the Eyes, a black stroak is extended from the corners of the Mouth to the ears. The Quill and Covert Feathers of the Wings are black, edged with white; the Tail have the two middle Feathers half white above, and half below black, the rest being black, with tips and edges white.

The **Red Start**, the Bill is slender and black, the Legs are the like; the Fore-head marked with a white spot, separated from the Eyes, and Bill, by a black line. The Throat and Cheeks under the eyes black, tipped with grey, Belly white; the Head, Neck, Back, of a lead colour, the Quill Feathers dusky, the upper Coverts black, the neither Covert Feathers red. The Tail the two middle-most dusky, the others on the out-side red. *Geener* describes the **Redstart** into several kinds, the one to have a white mark in the Fore-head, the Head and Back cinereous, or dusky, Wing Feathers Dusky inclining to red; Breast Belly and Tail red, the lower Belly white. Another to have a Breast blew, the Belly of a pale yellowish red, with the Rump and Tail the like colour.

The **Fig-Eater**, hath the upper Bill black, the under Chap blewish, the Head, Neck, Back, Wings and Tail, from Ash colour, inclining to green; the Quill Feather of a Mouse dun, with black shafts, and green edges: the Belly white, the Breast darker, the Legs blewish.

B 3 Larks, O born by the name of *Ayer*.

V 3 Gold-Finches, O born by the name of *Goldfinch*.

O a Red-Start proper. Born by the name of *Starton*.

LXXII. He beareth Argent, an **Dusell**, or **Black-Bird**, proper. The **Dusell** is all black of the Body from Head to Tail, the Bill yellow, and Feet black. The **Red Breasted Dusell**, is the same, only hath a red Breast. The **Indian Hock-Bird**, or **Blew Dusell**, the Bill crooked, under the Nostrils dusky, the Breast and Neck, of a lovely blew; the Back and Wings black yet sheweth something of blew. A long blew Tail.

The **Wisilian black Bird**, or **Dusell**, the Bill is short and dusky; the whole Body is an excellent red, the Wings and Tail black, the Tail is long; the Feet black. The ridge of the Wing red, the Covert black, the next red, and the prime Feathers black. The Feet black, or dusky.

The **Ring Dusell**, is like the common **Dusell**, save it hath a white ring under its Throat.

LXXIII. He beareth Argent, a **Cornish Chough**, proper. The Body is all black, with red Legs and Feet, and

and a red Beak. The Bill is long slender, and crooked, the higher mandible much longer than the other, both red: the Nostrils round having Feathers reflected downwards, which cover them: the Feet red, the Plumage of the whole Body is black. It is called also a **Fulica**, or **Fulice**.

The **White Bill Crow**, is all black in the Body, the Bill is white, being fleshy about the Nostrils, and of a dusky colour, the Feet blackish. This is of some termed a **Rooke**.

The **Jack-Daw**, or **Daw**: the Bill a dark dusky colour, the Nostrils and half the Bill, covered with little hairy Feathers: the hinder part of the Head inclining to ash-colour, the Breast and Belly more deeper: all the rest of the Plumage is black with a kind of shining blew gloss. In some places it is called a **Caddesse** or **Choff**.

The **Collared Jack-Daw**, differeth in nothing from the other common one, save the Head is more blew, and it hath a white ring or colour, about its Neck, and hath a great Head.

A 3 Cornish Choughs proper. Born by the name *Peniston*.

A a cross engrailed Flory S between 4 such proper. Born by *Edwin Lord of Englefield in North-Wales*, he was one of the 15 Tribes or Houses of greatest account under the *Welsh* Princes.

A on a bend B 3 Garbs O between 3 such Choughs. By *Wilest* or *Whixstee* l of *Crownest in Cheshire*.

A 3 Jack-Daws proper. Born by *Darson*.

O a Cheveron V between 3 Cornish Crows. Born by *Walthall of Wistanston*.

A a Cheveron S between 3 such. By *Hensham of Hensham*.

LXXIV. He beareth Or, a **Raven** proper, by the name of *Corbet*. The **Raven** hath a thick long sharp Bill, coal black, hooked a little at the end, but not as in Hawks: hairs or bristles bending from the Head downwards cover the Nostrils, the Plumage of the whole Body is black with a shining gloss of blew, especially in the Neck, Wings, and Tail, the Feet black and Scally. This is born by the name of *Corbin* in a Field Argent.

The **Crow**, hath a straight black Bill, the Nostrils covered with hairs hanging over them: the Feet black, so is the Plumage of the whole Body, only the bottom of the Feathers are ash-colour, or a dark lead-colour.

The **Rooke**, it is in all respects answerable to the Crow, but it is something bigger, and hath a purple Splendor, or gloss in its Feathers.

The **Royston Crow**, hath a black straight Bill, tip whitish, yet something bowed, the Nostrils round covered with bristle hairs, the Head and Throat to the Breast bone, and Wings with the ponions all black with a blew gloss: the Breast, Belly, Back, and Neck, cinereous or grey, the Shafts of the Feathers blackish, Tail black.

O 3 Crows. Born by *Corbet of Atherton*.

A a Cheveron between 3 such S. Born by *Llowrach ap Ryrid* a noble Person in *North-Wales*.

O 2 Crows. By *Corbet of Leighton*.

*

A a Raven standing on a Tortaux. By *Raven of Elejworth*.

A a Cheveron between 3 Ravens heads crazed. By *Ravenscroft*.

A 3 Crows. Is born by *Crocket*.

LXXV. He beareth Argent, a **Rook** passant and **Ermine**, or **Portant an Ermine**, as Mr. *Biswell*, p. 23, 24. hath it. The **Rook** is all black with a whitish bill, of most termed, a **White Bill Crow**. This is born by the name of *Rook*.

A a Cheveron between 3 such S. Born by *Llowrach ap Eran*, a Noble Man in *North-Wales*.

LXXVI. He beareth Azure, two **Pheasants** endowed, their **Tails** cross, regardant, or looking back. Or. See more of the Pheasant *numb. 120*. or else blazon it two Pheasant, the **Sinister** Surmounted of the dexter **Salterwise**, and regardant. Born by the name of *Pheasantail*.

LXXVII. He beareth Argent, a **Woodcock** proper, born by *Woodcock*. It hath a long slender bill of a dark brown, the upper side of the body partly coloured, of red, black and Grey: the breast and belly are grey, with transverse brown lines: the Wings are black, crossed with red bars in each Feather: the tail is short, the Feathers with bars as aforesaid, the Legs long and of a pale brown or dusky colour, the Claws black. the back-toe very little, having but a little Claw.

The **Snipe**, or **Snite**: the bill black, at the tip it is somewhat broad and chamfered: the Legs a pale green, Claws black. The Head is dusky, with a red line, the Head is divided long-ways, with black on each side, over the Eyes another red line, between the Eyes, and bill is dusky-brown, the back party coloured of red and black, the chin, breast and belly wholly white, the quill Feathers, the outward white, the middle tip with white, then next the body brown; the greater coverts are grey tip white; the lesser and ponion, partly coloured with red, black, and grey. The tail varied with cross bars of red, and black, tip white. The Legs of a pale green, Claws black, see *Chap. 12. numb. 62*.

The **Gid**, or **Jack-Snipe**, or **Judecock**: it hath a long slender bill, broad towards the end, and rough as if it were carved, or graven, or the point chamfered, yet the very out-most tip smooth, of a dusky colour; the Legs bare somewhat higher than the Knees, pale coloured with a dash of green, the Toes divided to the bottom, back-toe small, Claws black: the top of the Head black, with a red tincture, the Neck and the Scapular Feathers covering the back, are partly coloured of brown, white, and pale red: the Rump of a shining blewish purple, about the Eyes a line of a pale yellow, the Throat a pale red, with white and brown spots. Breast and belly white, between the bill and eyes, a black line. The quill Feathers, the out ten dusky or brown; the tips of the next ten white, the lesser were straked, with red and black: the great covert Feathers, are tip white, the lesser row are black, tip with red.

The **Brillian Gua-rauna**. It hath a long bill a little inclining downwards, yellow: with a dusky sharp tip: the thighs are slender, feathered down half way, long Feet, and long Legs; the whole Plumage is brown, mingled

mingled with much shade, the Head and Neck speckled with white. It is in form like the **Woodcock**, only the bending of the Bill, and the Neck something longer.

The **Godwit**, the Bill is white at base, black towards the point, the Legs long, naked to the middle of the second joint, or Thigh, of a dusky dark green colour; Claws black: the head grey with a tincture of red, middle of the Feathers black, white about the Eyes, Neck and Throat reddish, the Breast of a sordid white, crossed with black lines: the Back party coloured of red, black, and white; the middle of the Feathers being black, the edges red. Rump white, powdered with blackish specks: the Quill Feathers black, with white Shafts, the first and second row, have reddish ash-colour tips, all the smaller coverts are like the Body; the Tail is short, all the Feathers crossed alternately, with black and white lines. This is in some places called a **Parwhelp**, or **Parwip**.

The second sort of **Godwit**, as *Aldrovandus* hath described it, tom. 3. pag. 430. The Bill is long and slender like the **Woodcock**, black at the end, rest reddish: the Legs long and bare above the Knees, the Head of a dusky ash-colour, white about the Eyes, Back brown, Rump white, Chin white, with a tincture of red: Neck cinereous, Breast and Belly white. The Quill Feathers black, those next the Body half white, the tips of the Feathers of the second row, make a white line cross the Wings, the Tail black, the out-sides tipped with white.

B 3 Woodcocks O born by the name of **Woodcock**.

G a Woodcock O on a chief A 3 Roses by **Woodrofe**.

V a Chevron between 3 Snipes S born by **Sniper**, or **Sneap**.

A 3 Woodcocks proper. Born by **Woodcocks**.

LXXVIII. He beareth Vert, a **Quaile** Argent, **Beak** and **Legs** Gules. The natural colour of the Bill is, the upper Chap dusky, and the lower black; the Head black, edged reddish; middle of the Back and Neck is marked with a yellowish white stroak, the rest party coloured of black and reddish ash-colour, the Breast and Belly of a dirty pale yellow, the Throat hath a mixture of red. The Quill Feathers are dusky, crossed with pale, red lines; the lesser row reddish, the Tail as short as the tip of the Wings, black, with transverse lines of pale red. The Feet are pale coloured, and scaled.

The **Rail**, or **Daker-hen**; the Bill whitish, the lower Chap dusky, Legs bare above the Knees, Feet whitish: the Head hath two broad black lines, and a white line from the shoulders, the Back is black, edged with reddish ash-colour, the Chin, Breast and Belly white Throat more sordid, or dirty: the Thighs variegated with transverse white lines. The lesser row of the Wing Feathers are yellow, and the borders of the prime Feathers yellow: Tail short.

The **Indian Quaile**, their Bill is longer then the common **Quaile**, and in the colour of their Feathers nearly resemble them, see the figure chap. 13. numb. 20.

The **Sparola**, the Bill red, yellow at corners of the

mouth; Crown, Neck, Back, and Wings various, like the **Quaile** of a dusky chefnut colour edged with white and red: a white Wreath or Ring about the Neck, Belly white, Tail short scarce to be seen, yet forked and party coloured, the out Feathers white, the Feet reddish.

A 3 Quails proper. Born by **Quale**.

O a Quaile S is born by **Van Khroe**, a German.

G a Fesse between 3 Qualles A born by **Quallett**.

B a Daker-hen, or Rail O born by **Dacer**.

LXXX. He beareth Or, a **Mag-pye** proper, for brevity it is termed a **Pye**, and a **Pye-Annat**, from its cry or chattering note. This is born by the name of **Chatterer**.

The **Mag-pye**, hath a bill black, the Nostrils beset with reflected bristly hairs, in the nictating membrane is a white spot: the head, neck, back, rump, are black, the breast and sides are white, as also the first joint of the ridge of the Wing, the quill feathers and tail black, yet glitter with green, purple and blew, mingled. The tail hath the middle Feathers longer then the side Feathers, the middle have their bottoms green, the middle blew, and the tips purple. The Feet and Claws black.

The **Brillian Mag-pye**, hath a large bill, yellowish: the end Scarlet-colour; the head black, the back and Wings shew some whiteness, eyes large and black compassed with a white circle, the breast is Gold or Saffron-colour, the belly and thighs of a vermillion, the tail black, but in the end red: the feet hath two toes, forward, and two backward, of a violet ash-colour. Yet *J. de Laet* in the description of *America*, lib. 15. cap. 7. Saith the breast is of a Saffron-colour, compassed about the border with Vermillion, the belly yellow, all the rest of the body black. This is by the Natives called a **Toucan**, see chap. 12. numb. 28.

A 3 Mag-pyes, proper. Born by the name of **Losen**.

O a Fesse between 3 Water Wag-tails, proper. By **Wag-tail**.

A a chevron S between 3 Pyes, proper. Born by **Pye**, also by **Evanson**.

LXXXI. He beareth Argent, a **Chattering Mag-pye** proper. Born by **Chatter**. This is termed a **Chattering Pye**, by reason when he is chattering he moveth his tail up and down, like a **Wren**, or **Water Wag-tail**.

The **Water Wag-tail**; though it be but a small bird to the **Pye**, yet in proportion and colour of body it is of a near resemblance; straight black bill and feet: the fore-most of the head and breast, and about the eyes, white; the throat hath a black spot like a semicircular figure, the points running almost to the jaws: crown of the head, sides of the neck, and back are black; rump also: the quill Feathers are black, the coverts of the first and second row white. The tail is long, and black, the out-most feathers are all white.

The **Yellow**, or **Golden Wag-tail**, the under part of the body yellow, the breast darker, the upper part of a dark green, the back black. The Wings and tail in all respects like the precedent, only the

Li covert

covert Feathers, of a greenish white.

The **Grey Wag-tail**, white about the eyes, head dusky, chin and throat party coloured of white and grey, breast and belly white, dashed with yellow: the rump about yellow, the Wings dusky, or blackish, crossed in the middle, by a vvhite line; the tail black, vvith the out side Feathers all vvwhite: the bill and feet black.

The **Britishian Januacij**, in shape like a **Wag-tail**, the bill straight, bending tovwards the end, blevvish and black at the end: the head and neck black, all the back, breast, and belly, yellow; Wings black vvith vvwhite in the middle, tail black and long; Feet dusky, vvith the back-toe very long, vvith a clavv of equal length.

A 3 Pyes proper. Born by *Pye*.

B a Fesse waved between 3 Wag-tails, proper. Is born by *Wag-tail*.

LXXXII. He beareth Argent, an **Arundo**, or **Swallow**, proper. This is an airy bird, and of all others it loveth to be flying, in so much that it catcht flying. Born by *Swift* for his Crest.

The **Swallow** hath a great head, and short neck; a small bill, long wings, and a forked tail: it hath a black bill; the head, neck, back, and rump are a shining but very dark purplish blew: under the chin is a deep sanguine spot, the throat to the breast bone like the neck: the breast and belly white with a dash of red: the interior covert feathers of the Wings are the same. The tail black, with a white line cross it near the rump: Wings black: feet short and black.

The **Martin**, or **Martinet**, is of the Swallow kind. the bill small and short, blackish; the Iris or circle of the eye, Hazle-colour: feet small, Legs short, the soal of the foot bafe, all the rest covered with a white down; claws white. The head, neck, back, tail, and Wings are black, having a blevvish gloss: the rump, breast, and belly, milk vvwhite: the tips of the interior quill feathers, or those next the body, are vvwhite; the tail is not so much forked as the **Swallow**.

The **Sand Martin**, or **Shoar Bird**; the bill black: the head, neck, and back, of a dark dun or Mouse colour; chin breast and belly vvwhite: at the bottom of the throat a ring of the same Mouse colour encompasses the neck. The quill feathers black, the tail not forked, but black. The feet not feathered, but bare and dusky.

The **Black Martin**, or **Swift**: hath a great head and a very small bill, black: the vvhole body is black, vvith an obscure tincture of red and green: only under the chin is a notable spot of vvwhite or ash-colour. The Legs very short, but thick: feet small, having all the four toes standing forvvard, none being behind.

The **Sea-Swallow**, the head, Wings and back dusky, the Wings and tail long, and forked, and blackish, but brown on the inside; the bill strong and black: from the bill through the eyes, almost to the breast, is a black line, which near the breast makes as it were a collar. The feet as black as Jet, and whole footed like a Goose, the cheeks, chin, and lower belly, white; the breast hath a tincture of red, rump white. The bill is long and red, with a black end or tip: the back-toe is very small,

scarce discernable. It is in some places of *England* and *Wales*, called a **Spurr**, and a **Scray**: in the North parts, a **Cerne**.

The lesser **Sea-Swallow**, or **Fishenlin**: The bill Saffron, or red, the feet having the fore-toes webbed together to the middle joynt, and are of a Saffron, or reddith colour: the crown, and hinder part of the neck, black; back, ash-colour; breast, belly, rump, white; the tail long and forked sharp, all white.

The **American Swallow**, hath a short broad black bill, a wide mouth, which it can open beyond the region of the eyes, black eyes; the head, neck, back, Wings, and tail, are of a brown colour mingled with grey; the breast belly and under the tail, white; the Wings are long reaching to the end of its forked tail.

O 3 Swallows proper. Born by the name of *Vatton*.

G on a chief, O 2 Swallows with Wings disclosed, proper. By the name of *Speed*.

O 3 such Swallows, proper. Born by *Hast*.

G 3 such A Legs O. Born by *Owen ap Maccock*.

S 7 such A. And on a Chapeu S turned up Er. a Swallow A is the Coat and Crest of the Lord *Arundell*, Baron of *Trevis*.

A a bend between 6 such S born by *Tempest*. One is his crest. Sans Legs all of them.

LXXXII. He beareth, Or, a **Swallow volant**, **displaid**, proper. Of some termed only a **Swallow volant**. But more proper **displaid**, by reason the breast and belly is seen, see *numb. 36. 84*. This is born by the name of *Swallow*.

LXXXIV. He beareth Argent, a **Swallow volant**, proper. By the name of *Speedwell*. This and the foregoing example are thus in Antiquity Blazoned, which I will not alter; but when I consider the several niceties which are in Blazoning, give me leave without offence (according to the examples given before in *numb. 36. 37. 42.*) to make a farther and additional Blazon, as thus to term Birds in this posture of flying, **volant oboverture** in Fesse when the Belly is seen, and **volant tergiant** in Fesse when the back is seen.

LXXXV. He beareth Gules, a **Martlett**, Or, This is the English Heralds way of drawing the Martlet with rough and jagged Thighs and no Feet; but other Countreys depict them otherwise, as in the next example. This is the Coat of *Martyn*.

B a chevron embattled between three such O is born by *Judson*, and also by *Hudson*. The Martlets A is the coat of *Bayne*, or *Brayn*.

A a chevron engraled between 3 S by *Bickley* of *Bickley*.

G a chevron between 3 such A born by *Walling*.

A a Fesse and 3 such in chief G by *Cheney* of *Cheney*. Quartered by the Lord *Cholmondeley*, Viscount *Kellin*.

O a Fesse waved, and 3 such in chief S by *Rosengrave* of *Rosengrave*.

A a chevron between 3 such G by *Knappley*.

A 8 Martlets and an Orle S born by *Wilmington*.

A a Cross flurt between 4 such G born by *Gollorne*, or *Gaulborn*.

The same Coat with a Canton B is born by *Bird*, of *Clester*, and *Branton*.

A a Cross between 4 Martlets G born by *Burde*.

A an Escochion G 8 Martlets in Orle S born by *Hulgrave*.

Per Bend Sinister S and A 6 such counterchanged, by *Allen*, of *Chyster* and *Bomfirth*.

The same S and O by *Allen* of *Brinley* and *Greenhills*.

S 4 such A 2 and 2 born by *Monier*.

A 5 such G 3 and 2 born by *Dowdale*.

O 6 such B 3, 2, and 1, born by *Clawville*.

☞ Birds may be numbred in one Escochion to the number often, if they exceed then they shall be Blazoned sans number, or semy de such or such a Bird.

LXXXVI. He beareth Argent, a **Martlett**, Azure, or a **Martin sans feet**. This is the *Dutch* and *French* way of Drawing the **Martlett** without either Feet or Thighs, as I have seen in many of their Books of Armory, which we for a distinction from others, must term it a **Martlett sans feet**. Three such born by *Monfieur de la Margelbourg*.

O 3 such in Fesse G by *Van Velen*.

G 6 such born by *Van Low*.

Per pale G and O 6 Martlets respecting each other counterchanged by the name of *Saynelle*.

Godfrey Bouillon in Shooting against *David's* Tower in *Jerusalem*, broched 3 footless Birds called **Allerions** or **Martletts** upon his Arrow, and thereupon gave in his Shield O on a Bend G 3 such A.

LXXXVII. He beareth Or, a **Cock**, Sable, **Crested** and **Wattled**, Gules, **Beak** and **Legs**, Argent.

☞ Some do term it a **Cock armed**, **crested** and **yelloped**; others **membred** and **crested**; but these terms are superfluous when the Cock is intirely of one colour; but when the several parts are of several colours, then to give those said terms, or any of them is necessary. By **Arming**, is meant his **Spurs**, to be of a contrary colour from his **Legs**, and some take it for his **Beak**.

The **Cocks** natural colour is various, some white, some black, some brown; but one in its most lively and flourishing colours, and most for Beauty, take thus; the Bill of a dark ash-colour, the Comb on the Head and Wattles or Gills under his Chin are naked and of a pure Blood red colour; the eyes black with a white circle about them, in some yellow; the parts about his eyes and ears bare, and of a red colour, the covert long feathers of his Neck which extend from the head to the breast are yellow; the breast and thighs brownish red, the prime feathers black, the covert feathers of the first and second row, brown, inclining to a yellow, the back cinereous, the falling feathers of the lower part of the back yellowish, the under part of the belly and rump whitish; the tail consists all of crooked bending feathers (**Sickle feathers** as some call them) whereof the two middlemost are longest, and are with the rest most elegantly arched or reflected, and of a black shining colour; the Spurs, Legs and Feet of a dark ash-colour, claws black.

The **Persian Cock**, in all things resembles our Cock, save that it wants a rump and tail; with us they

are generally called **Ruinkiness**. The varieties of Cocks according to the Countrey in which they are bred, differs not in form or shape, yet by reason of the difference of Climate, Soil, Food, and other Accidents, do vary and differ much in colours and also in bigness, and in having Combs great and small, single and many doubles like crowns on their heads, or in having or wanting tufts on their heads.

G 3 such Argent, armed, crested, yelloped O by the name of **Cock**.

The like G in a Field A by *Eignion Says*.

A 3 Cocks G born by *Cockborne*, of *Scotland*.

B a cheveron between three such A born by *Alawe Mewric* of *Dyvet*. With the cheveron O is *Jenkin ap Davids* coat.

A a Cock G armed, crested and yelloped O by the name of *Bronchan* and *Broughan*.

G a Cock A born by *Lospitall* of *France*.

A a Cock G born by *Rotenhen*, a *German*.

O the like to the Sinister S by *Stockel van Hertenberg*.

B the like O by *Dachfelden* of *Switzerland*.

☞ The Cock of all Birds, saith *Gmillin*, fol. 232. is most properly said to be **Armed**, and to be a Knight amongst winged Creatures; for his **Crest** is his **Helmet**, his **Beak** his **Fauchion** or **Curtle-ax**; his **Legs** with **Spurs**, and so **Soldier-like** armed **Cap-a-Pee**; his **Breast** his **Buckler**, &c.

LXXXVIII. He beareth Vert, a **Cock roosted**, Argent, **crested** and **Wattled**, Gules. Some term it a **Cock sans Legs**. This is born by the name of **Cock-roost**.

S 3 such A born by *Giffon*.

Idomeneus the Grandchild of *Sol*, bore a **Rouft Cock**, nay every Bird almost for its qualities being born in Arms, as *Seneca* saith in *Agamemnon*, Act. 1.

LXXXIX. He beareth Sable, two fighting Cocks sparring, Argent. These are termed fighting Cocks, because prepared for Fight, having their Combs, Wattles and Tailcut off. If they were **House**, or **Dung-hill Cocks** wanting nothing, and were thus sparring, then they may properly be termed two **Cocks fighting**, or two **Cocks combitant**, or **respectant**.

O on a Bridge of Planks in Fesse, extending throughout and supported by pieces Salter-ways G 2 Cocks respectant S born by *Stager Zu Landendorf*.

S 2 fighting Cocks O born by *Courage*.

Terms used by Cock-Masters about fighting Cocks.

The **Cock-pit** is the **House**, or **Hovel** covered over, in which the Cocks do fight.

The **Clod** is the green Sod on which they fight, which is generally round that all may see.

The **Seats**, or places on which the Spectators sit, which is three heights, or more, one above and wider than another.

The **Cocks Walk**, is the place where he is bred which usually is a place that no other Cock comes to.

A **Clear Walk**, is the place that the Fighting Cock is in, and none other.

The **Pen** is the place in which the Cock is fed; which is so made, that if there be never so many Cocks in it, they see not one another.

A **Stive**, or **Stave**, is a thing made of straw almost after the manner of a Bee-Hive, to put the Cock in, to keep him warm.

A **Bag** is a linnen Bag made up in the sides and on end, in which the Cock is carried from place to place.

Sorts of Fighting Cocks.

A **Cockrel**, a young Cock bred up for Fighting.

A **Ducker**, or **Duckster**, is such a kind of Cock, as in his Fighting will run about the Clod almost at every blow he gives.

A **Baumer**, is a high fighting Cock, that strikes high: called of fore a **high bearing Cock**.

A **Beeler**, or a **Blood-pot Cock**; is such a Cock as strikes, or wounds much with his spurs. Cock-Masters know such a Cock, while it is a Chicken, by the striking of his two feet together in his going.

A **Shake-bag**, is a Cock turned out of the Bag to fight another Cock, without unseen, or unmatched; a Battle at a venture.

Terms in feeding Cocks.

To **Feed**, is to take them from the Walk, and put them in the Pen.

High feeding, is when the Cock is too high in flesh to fight.

Low feeding, is when he is poor and low in flesh.

Scouring, is the cleansing of his body weekly from his filth.

Shutting the Body, is to purge it from its groser dung.

Sparing, is to fight a Cock with another, to breath him, in which fight they put Hots or Huts on the Spurs that they hurt not one another.

Spar the Cock, is breath him to embolden him to fight.

Washing his Mouth, is to make clean his Beak and Mouth after his Meat, lest any filth should annoy him.

Terms in Matching and Fighting of Cocks.

Matching of Cocks, is to see they be of an equal height, length, and bigness in body.

Girth, is the compass of the body, which is known by handling.

Handling, is to measure the Girth of him, by gripping of ones Hands, and Fingers, about the body of the Cock.

High Bearing Cock, is one that is higher and bigger than the Cock he fights with.

Low bearing Cock, is one over-matched for height.

Sparing, is the first beginning of the fight, which is by riling and striking with the Heels; fighting with Wings and Feet.

Beaking is fighting with their Bills: or holding with the Bill, and striking with the Heels.

Setting is when a Cock hath fought so long, that he is not able to stand, or gives over fight: then he is brought and set to the other Cock, Beak to Beak; and if he do not strike, the Battle is lost.

Shake-back Battle, is a fight between two Cocks unmatched, unfight unseen. To fight Shake-bag, is a kind of Challenge to fight any Cock that is brought to the Cock-pit, or any other place.

Battle Royal, is a fight between either 3 or 5 or 7 Cocks altogether, and that as stands longest, gets the day.

Plate fight, or a fighting of Cocks, for a piece of Plate; or any such thing. Is the fighting of four staves of Cocks (or 16 Cocks) two & two at a time, which makes 8 Battles; and then the eight winning Cocks (by lot) are to fight again, which makes four 4 Battles; and the four winning Cocks of them (by lot) are to fight again, which makes 2 Battles. And last of all, the two winning Cocks are to fight, which of them shall have the Prize.

A **Challenged Cock-fight**, is generally to meet with 10 staves of Cocks, and to make out of them 11 Battles (or more or less) the odd Battle, to have the Mastery.

Ordering of Cocks to Fight.

Dubing of a Cock, is the cutting off his Comb and Wattles.

Shurking of a Cock, is to trim the ends of his band, or neck feathers.

Gubing a Cock, is the cutting the feathers under the Wings. This is a thing not to be done according to Cock-pit Law, neither to cut off his feathers in any handling place of the Cock.

Triming a Cock, is to cut all his feathers of him from behind, as the rump, vent, and belly: which usually is cut all bare.

Spurs, are a kind of Horny Nails naturally set on the inside of the middle of his Legs.

Gablocks are Spurs made of Iron, or Brass, or Silver, and are fixed on the Legs of such Cocks as want their natural Spurs, some call them **Gills**.

are the Boors or Stays about the Cocks Legs, by which the Gablocks are kept fast on.

Hotts or **Hutts**, are the Pounces or round Balls of Leather stuffed and clapped, or tied on the sharp end of the Spurs, to keep Cocks that they shall not hurt one another in sparing, or breathing themselves.

Bearing Claws, are his fore-most Toes on which he goes, which if they be hurt, or Gravel'd he cannot fight.

Cock-Pit

Cock-Pie Laws.

In *Setting* of a Cock, none are to be upon the clod but the 1. & 2. chosen for that end.

When the Cocks are set *Week to Week* in the middle of the clod, and then set by the owners; if the set Cock don't strike in the wing of 10, and six times 10, and a waterail; then the Battle is lost. If he strike then to begin he courting again.

In *Setting*, if any offer a Mark, to a Groat; or Five shillings, to one; or Ten pound, to Five shillings. Then the Battle is done, and the Battle is to be lost.

Have to be the *Wing* set, then the Cock is to be set, and then to be set.

Wing and *Wing* is a Wager, or sufficient Betting, when Cocks are set on the clod, or in fighting.

Rules and Observations in Cock Fights.

When a Cock is taken from his walk, he is to feed a month before he is set.

The first four days, he is to be fed with ordinary wheat bread.

The Cock not to be spared of 4 or 5 days, that he has been in the pen.

Then to feed him daily, or every other day, till about 4 days he be to fight.

The third fortnight, he is to be fed with fine bread of wheat, kneaded with white of eggs, and milk. Every meal having 12 ricks, or Corns of Barley.

The Water is not to be by him; then he will drink to himself. But to give him Water 3 or 4 times in a day.

If he is to fight, give him, and give him a clove of Garlic, and give him Water for some few days.

If he is to fight, they give him a voice of an egg, beaten and beaten (till it be as thick as treacle) with his bread.

Four days before fighting, they give the Cock Hyssop, Violet, and Strawberry leaves, made small; in fresh butter.

The morning he is to fight, put down his Throat a piece of fresh butter, mixe with powder of white Sugar candy.

XC. He beareth Argent, a *Capon*, Sable. A *Capon* is no other then a *Cock Geld*, by reason whereof it hath neither Comb, or Wattles, grown up to that greatness, as otherwise it would; nor the Tail to that length, but hanging or drooping downwards, and instead of Spurs short stumps. This is born by the name of *Capon*.

A 2 such S born by *Capon* St.

This is by some termed, a *Cock Kerved*, a *Cock* having his *Courage* abated; by his Kerving, that being the term of taking his stones from it; else by nature they are as valiant as the rest.

XCI. He beareth Gules, a *Hen* gathering of her

Chickens, Argent. Born by *Chicken*. Some term it a *Hen* covering her *Chickens* with her Wings. The colours of Hens are as various, as in Cocks; some white, some black, some brown, some Pheasant colour. Some having small diminutive Combs, others none, some with high and lofty tufts on their heads, others smaller, and others none at all: such are called *Copped Hens*, that have such tufts. Again there are Hens and Cocks that are *rough-footed*, having their Legs grown over with feathers.

XCII. He beareth Argent, a *Hen* feeding with her *Chickens*, proper, born by *Gasbrug*. The *Curlew*, for their largeness, variety of colours, are most esteemed, the description of one take thus. The *Curlew* hath a yellowish Bill, the tuft on her head cinereous, bare about the eyes, of a red colour: the Neck and Back and Tail brown, the Breast yellowish spotted with reddish brown, oblong streaks, and spots; the Belly cinereous, the Thighs and Rump, whitish: the Legs lead colour.

A 3 Chickens S is born by *Poliny* an Italian.

XCIII. He beareth Argent, a *Frisland Cock* Sable, Crested, Wattled, and Legged, Gules. This is of some called of a *Frisled Cock*, because the Feathers are all curled and frised, by which epithete I believe this Bird was at first named, the same being afterwards by the mistake of the vulgar, corrupted into *Frisland*. *Gesner* fol. 466. and *Aldrovand*, lib. 14. chap. 14. calls this breed, the *Wool-bearing Cock* and *Hen*.

A 3 such S is born by *Cockham*.

O the like Cock S Crested and Jelloped G by *Pesser*.

XCIV. He beareth Argent, a *Urogallus*, or a *Urecock*, or *Ureben*, proper. Called also a *Cock* of the *Mountain*, or a *Mountain Cock*. The colours whereof I have described, *numb. 69.* to which I shall refer you. This is born by the name of *Urgall*.

B 3 such O is born by *Urecock*.

O on a Hill V the like S is quartered by *Hennenberg*, and is the Coat of *Van Rhombild*.

XCV. He beareth Argent, a *Peacock*, Azure. The proper colour of the *Peacock* is, the Bill white, being a little hooked at the tip: the Head, Neck, and beginning of the Breast are of a deep shining blewish green, in the Head there is two oblong white spots, the one above the the Eyes, the other under them succeeded by a black, or deep blew one: the tuft on the Head is of naked green stalks, or shafts of feathers bearing on their tops (as it were) Lilly Flowers, of the same colour; the Back of a pale ash colour, sprinkled with many transverse spots of black. The Wings are blackish, the long Feathers of the Tail are of a Chestnut colour, beautified with most elegant Gold lines tending upwards, but ending in large round tops of a very deep green, the circular spots (or as *Pliny* calls them) the Eyes of the Feathers, are partly coloured of a deep shining Gold colour, the next Chestnut, the third green, and the intermost is a blew, or Sapphire coloured spot, almost of the figure of a Kidney Bean. The Hips, Legs, and Feet, of an ash colour, besprinkled with black spots. The Belly near the Stomach is a blewish green.

green, near the vent it is black: or of a dusky colour. The Cock is Armed with Spurs, after the manner of a Dunghill Cock. This is born by *Peacock*.

The *Peahen* hath little variety of colours, for the Head, the Crest, the whole Wings, Back, Belly, Thighs and Legs are of a dusky colour inclining to a cinereous; on the top of the Head, are some small spots of green dispersed, and two great white spots above and below the Eyes, the Chin white, the Neck is waved, and green; the Tail short, having no such Eye Feathers, as the *Peacock* hath.

A Cross S between 4 Peacocks B born by *Smith*.

A 3 Peacocks B born by *Proudhore*.

B 3 such head crazed O by *Baconthorp*.

B on a Log of Wood in base O a Peacock proper, by *Poppendorf*. The same out of a Coronet is his Crest.

A Peacocks head B is the Crest of *Gesler*.

A Peacock is the Crest of *Butrich*.

The Tail is much born in Crests, as:

A Peacocks Tail set in a cap of dignity is the Crest of the Lord *Molyneux* Viscount *Marlsborough*.

The like out of a Coronet, is the Crest of the Earl of *Julich* and *Leve* in *Germany*.

The like Tail in its pride, is the Crest of the Earl of *Brug* and *Lienitz* in the same Empire.

A Peacocks Tail out of a Crown, tyed in the middle with a Ribon G is the Crest of the Earl of *Monstereberg*.

Out of a Lamp chequy O and G 2 such Tails proper. Born by *Wolf Van Sponheim*.

Out of a Coronet 2 Peacocks Feathers, fretted with two other counterposed in quadrangle. Is the Crest of *Pentzen*.

A Peacocks Tail, is the Crest of *Schlaunderspach*, a *German*.

Out of a Garland of Roses A wreath ways, a Peacock Feather proper, between 2 Ostrich Feathers, B is the Crest of *Van Dalwick*.

7 Peacocks Feathers each diminishing other from the middle, proper. Is the Crest of *Riemen*.

XCVI. He beareth Argent, a *Peacock in his Pride*, proper. There is a kind of *White Peacock* in the Northern Countrys, see numb. 98. three such is the Coat Armour of *Panne*.

When Birds are of their natural colour, they are ever blazoned proper. On a Coronet the like to the sinister, is the Crest of *Van Stockamer* of *Brunswick*.

XCVII. He beareth Or, a *Turkey-Cock in his Pride*, proper. Some term it rather a *Turkey-Cock in his Ire*, by reason they prove to be angry and will fight with any one that comes near them, when they are in this posture. This is born by the name of *Humphrey*.

The *Turkey-Cock*, the Bill is of a dark ash colour, the Eyes black, with a yellow circle round about the Eyes, it is of a florid blew and purple colour: its Head and Neck is bare of Feathers, and coloured with a purple coloured skin which hangs loose, and flaggy, especially before, down towards the Breast: it hath no Crest or

Comb, but a certain red fleshy appendix, or worm-like caruncle, arising above the upper Chap of the Bill, which is sometimes in his pride, extended to that length, that it hangs an inch or two below the point of the Bill, which again at his feeding is contracted to that shortness, that it stands like a fleshy pointed substance over the root of the Bill. The Feathers are generally from the Stem, or Shaft, party coloured, divided into bars, a small one of white, and a broad one of a blackish brown, the ends or tips white. The Legs and Feet ash colour; having small Spurs, or stumps, as in young Cocks. The Cock is differenced from the Hen, when they are come to maturity, by a blackish bristly bush in the upper part of his Breast, and that the worm-like fleshy part on the Head of the *Turkey-Hen*, is very small, always standing in a tip, on the root of the Bil.

A Chevron between 3 such, proper. Born by *Yoo*, or *Tew*.

A 3 such Turkey-Cocks S. born by *Ireby*.

XCVIII. He beareth Argent, a *Turkey*, or *Turkey-Cock*, proper.

The *Turkey* is also born in his *Pride*, or *Ire*, side-ways; in which posture to distinguish it from the aforesaid *Turkey*, standing in full view; your are to term it a *Turkey walking in his Pride*, and so of the *Peacock*. This is the Coat of *Turke*.

S 3 Turkeys A Beaks and Legs S Crest and Wattles G is born by the name of *Tuke*, or *Tuck*.

B the like O membred as afore: is born by *Criger*.

XCIX. He beareth Vert, a *Upupa's head, couped*, Argent. This is in our Country speech called a *Whoo-phoo*, or *Whopee*, or *Doopoe* and *Howpe*. It hath a long slender Bill something bending, black and sharp at point; the shape of the Body is like that of a *Plover*, the Head is adorned with a most beautifull Crest, two inches high consisting of a double row of Feathers, reaching from the Bill, to the nape of the Neck, all along the top of the Head; which it can at pleasure set up, or let fall: the tips of them are black, under the black, they are white, all the rest of the Feathers, under the white are of a Chestnut colour, inclining to yellow. The hinder part of the Neck is pale red, the Breast white, variegated, with black stroaks tending downwards. But the older Birds have no black stroaks, but only on their sides. The Tail is a little forked all black, with a cross mark, or bed of white, of the figure of a crescent, the middle towards the Rump; the Horns towards the ends of the Tail. The Quill Feathers have cross bars all the length of them, half an inch broad, black and white. The Limbs or borders of the last Feathers, next the Body are red, the Rump white, the long Feathers springing out of the Shoulders, and covering the Back, are all varied with white and black cross lines. The Legs are short, the Toes as in other Birds, are four, three forward, one backward. Some call this Bird a *Thuet*. It is born by the name of *Thuet*.

B 3 such couped O. Is born by the name of *Joyntan*.

A one such crazed B is born by *Wildthull*.

C. He beareth Argent, a *Tee-Whitte*, or a *Lapwing*, proper. This Bird is also termed a *Tuewhite*, or *Terwhite*, or *Pewet* from its cry. The Bill is round and

and black, the Feet long and reddish: the top of the Head is shining black, the Crest or Tuft, springs from the hinder part of the Head, and consists of 3 or 4 long slender Feathers, sharp pointed: the Cheeks white, with a black line under the Eyes, through the Eares: the Throat, and under side of the Neck, black; the Breast and Belly, Thighs and Rump, and under the Wings white: the Neck above, and middle of the Back, and Scapular Feathers are of a shining green, with a purple spot on each side next the Wings, the Tail of a deep bay, the Feathers next them are dusky, with a certain splendour. The Wing Feathers, have the four out-most black, with white tips; the six following are black and white, those next the Body green, the lesser covert Feathers, are beautified with purple blew and green colours, variously commixt. The outside Tail Feathers are white, having a black spot in the exterior Web: the tips of all the rest white. In the North of England, this Bird is called a *Cewit*, or *Basard Plover*.

G 3 such O born by the name of *Terwhite*. The same with a Bordure A born of *Terrick*.

G 3 such Heads coupéd O is born by *Puett*.

CI. He beareth Argent, a *Nycticorax* his Head coupéd Sable. The *Nycticorax*, or *Night-Raven*, hath three distinct Feathers with strong Shafts in its Head, after this manner; the Body like a *Plover*, or *Pigeon*, but hath no Tail longer then the point of his Wings. The Bill is black, the Legs and Feet long and of a yellowish green; its Back and Crown of the Head, black; Neck ash colour, Throat and Belly tinged with yellow, a white line from the Eyes to the Bill, Wings and Tail, are cinereous.

A 3 such heads coupéd proper, is born by *Nightraffe*.

A cheveron between 3 such erazed S is born by *Durnall*.

The whole Bird proper, is the crest of *Vasant*.

CII. He beareth Argent, a *Pheasant*, proper. Its Bill is whitish, with a fleshy and tuberosus Membrane, joined to the head, by which the Nostrils are hid, the eyes yellow; a red or scarlet for a good breadth com-

passes the eye, the forepart of the head is black, shining with a kind of purple gloss; the crown of the head, and upper part of the neck round about, is dark green, shining like Silk; and in the Sun or shade, sheweth very changeable, in some it shews to be blew; at the ears there grows black feathers longer than the rest, which *Pliny* calls *Horns*; all the rest of the body, breast, shoulders, back, sides, wings and tail are of a yellowish chefnut colour, each feather tip with black, and edged with a most beautiful colour, which as it is diversly objected to the light, shews either black or purple; next to the purple is a most splendid gold colour; the tail is long, having the two middle feathers longer than the outside feathers, they are of an ash-colour, on the sides or edges of a yellowish red, the shafts adorned with black spots, in the long feathers on both webs, opposite one to another, in the side feathers in the outward web only; the wing feathers and the ridges of the Wings are of an ash-colour, dusky, spotted all over with white spots, the legs, feet and claws of a whitish colour, the toes joined together by a thick Membrane as if it were for Swimming, the like whereof is not to be found in any other Pulveratious or Earth Bird. The Legs are armed with Sours like a Cock, but shorter and sharper, and of a black colour. This is born by *Pheasant*.

The *Jacupema*, or *British* kind of *Pheasant*. the head round, and neck slender and long; the bill slender and bending; the thighs and legs long, four Toes as in a Hen; the whole Bird is clothed with black Feathers, with which something of brown is mixed; the throat, and for an Inch and half down the neck is bare of feathers, and covered with a red skin, the rest of the Neck hath white spots amongst the black; so hath the Belly and the hindmost half of the wings; the thighs and a long tail are wholly black; the legs and feet red.

B 3 *Pheasant* Cocks O born by *Pheasant*. The same is also born by *Rede*.

A 2 *Esse* between 3 *Pheasants* G born by *Staney*, of *Staney*.

A *Pheasant* sans feet proper, is the crest of *Bromley*, of *Hampton*.

A *Pheasant* is the crest of the Company of Cooks and Victuallers.

The Right Worshipful

CHARLES HOUGHTON, of Houghton Tower, Baronet.

A N D

To the Vertuous Lady,

DAME MARY CALVELEY his Loveing Aunt.

THE many Examples of your Vertuous, Religious and Heroick Actions, as so many mighty and weighty Motives hath engaged me to present you with my Service, and make my Submissive Applications to you in this succeeding Chapter: not doubting but that under the Shadows of your Auspicious Favours and Smiles of your accepting Aspects, it will be Patronized, and the Author have the Happiness to acquit himself,

Your most Humble and Devoted Servant,
Randle Holme.

C H A P. XII.

I. **H**E beareth Azure, a Sarret Overture Argent, Beaked and Membered Or. This Bird I find by Boswell, termed a Sarret, a name not to be found for any Bird in these parts of Europe in any Language, but I suppose it to be a Sarret, the Male of a Saker, a kind of a Hawk, had it not the tuft behind its Head. However seeing antiquity hath fixt the name, we will let it pass as a Fictitious Bird, as many others born in Armory are, as:

The **Kalader**, or **Kalady**, which is said to be all white, without any other colour; it is by Boswells figure, pag. 70. much after the form and shape of a **Duk** or **Kite**, and is said to prognosticate life, or death to a sick person, by his looking, or not looking on them, see numb. 31.

The **Disfrage**, or **Disfrised Eagle**, which being brought up by the Bird **Cebur**, loofeth its name and parents, and natural sight: it is of greater Body, yet of different colour, from the **Eagle**; being of a whitish cinereous, or brown.

The **Gripe**, in Latin called **Cultur**, others a **Grip**. It is a Ravenous Bird, shaped like a **Hawk**, they are fabled to be the fore-tellers, who shall be slain in Battle.

and where, for which end he fleeth to such places, waiting the issue, that thereby from the flaine, he may fill himself. It is said that the she conceiveth without the help of the Male, and is of a dusky black colour.

The **Chalcelet**, this is a long, and black Bird, seldom seen, but like the **Ptyne**, or **Ptynge** flyeth most part of the night, and taketh his Prey: it fights so cruelly with the **Eagle**, that they fall down to the ground together wounded, and so are taken of Shepards alive.

S a Sarret Wings overture A born by Sarret.

B a Calader O born by Chaldorf.

O a Gripe S born by Mort.

II. He beareth Argent, a Bird of **Paradise**, proper, it is but a small Bird in Body not bigger than a **Swallow**, the head is of a bright yellow, shining like to **Burnished Gold**. The Chin of a blewish green, the Bill long and crooked, and dusky: the Wings of a shining dusky colour, between black and red. The smaller Feathers are half red, or Scarlet, and half Saffron or Gold colour: inclining to red: the Belly and Breast fulvous, or more Liver colour, but very bright and resplendent. The Tail a blackish red.

The

P. M. Gough Houghton de Houghton Times Inc H. Gough

H. Jones Fe

There is another sort of **Bird of Paradise**, that hath a white Head, spotted with yellow, Eyes yellow, the hair of the Eye-lids red: Bill between yellow and green, the upper part a little crooked. Breast red, Belly, Back and Wings white, tipped with a red, or ferrugineous colour. The Tail Feathers, are of a reddish yellow.

The **Crested Bird of Paradise**, the Bill black long, and crooked, the Head, Neck and Wings black, at the joining of the Bill yellow; it hath a Crest or Cop near the Neck, almost 3 inches long ridged and of a yellow colour; which seemed to be rather bristles, than Feathers.

The **King of Birds of Paradise**, it hath Legs and Feet as all other Bird, of Paradise have, with four Toes, three forward and one backward, with crooked Claws made for Preying. The whole Back, lower Belly, Wings and Tail, are of a shining brown; about the Bill Velvet hairs, black mixt with a green and a dusky colour; the Neck about of a Gold yellow, shining with a green gloss; the Breast a deep brown; from the Feathers of the Tail are two strings, two foot long, of a yellow or Gold colour; crooked at the ends, and of a dark brown. The Legs dusky; the Claws whiter, the Bill between green and blew, yet whitish at the point.

B 3 Birds of Paradise O born by *Reslifs*.

A 3 such G is the Coot of *Slingsby*.

III. He beareth Argent, an **African Cock**, or a **Guiny Cock**, or **Hen**, proper. It is called a **Mauritanian Cock**: it is of an ash colour all over, chequered with white spots, a black ring compasses the Neck: the Head is reddish; on the Crown, or top of the Head grows a hard horny Cap, of a dusky red colour; the Cheeks under the Eyes blew, and bare of Feathers, under which is a red gill, compassing the Chaule; the Bill yellowish, Feet blew. *Gesner fol. 772.* gives it this further description that the horny Crown is steep behind, and of a gentle ascent before, being fastened on (as it were) by Labells or slips, proceeding from it, which are fixed between the Eyes and Ears, on both sides, and on the Fore-head: at the hinder part of the Head grows certain erect hairs all of a dusky yellow colour; the Eyes, and Eye-brows black: between the Head and Bill, is a kind of fleshy substance of a sanguine colour, which that it might not turn down like Gills, or Wattles, it is turned up again in an acute angle, just under the Eyes upon the Cheeks. The Bill is pale yellowish, the colour under the Jaws and Throat, is purple; the Neck dark purple, the rest of the Body is black or dusky, being (as it were) black finely powdered, which make it a dusky ash colour: in which colour are dispersed all over the Back, and Wings, oval and round white spots, each contained in the intervals of oblique lines intersecting one another, after the manner of Honey Combs, or Nests. The lower parts of the Body, as Breast, and Belly, and Tail have the spots set in rows, without such lines interposing. There is another sort of them which have the Neck to the Breast hairy; and of a blew ash colour, with a round and double Tuft, or Crest on the Head, consisting of elegant black Feathers, the rest of the Body as afore described, save the spots are variegated, or shaded.

O 3 such Cocks I find born by the name of *Wyncock*.

A 3 such Cocks Heads couped B Comb and Wattles G by the name of *Nackthem*.

IV. He beareth Azure, a **Swan**, proper. It is Rare, to see a **Swan** any other colour than white, with a red Beak, with a black Membrane about the Nostrils to the Eyes, with black or dusky Feet. Yet in Heraldry they are often painted in contrary colours, especially black. This is born by *Swanley*.

The **Swan** is covered with a soft delicate Plume, in old ones purely white, in young ones grey, the Bill in the young, is Lead colour; but the old have them Red; the Hook or Nail, at the end or tip of the Beak, is black, and above at the base of the Bill, grows a great lobe of tuberosus Flesh, of a black colour, extending downwards to the Nostrils, from the Eyes to the Bill is a triangular space, bare of Feathers, the Feet of a Lead colour, have a little above the Knees, the inmost and outmost Toes have lateral Membranes appendant to them; Claws are black. It hath a long Neck, which is generally bears bending, and long Wings which being coted to the Body, folds two double.

The **White Swan**, called also an **Elke**, and in some places a **Wasper**; the Bill towards the tip, as far as the Nostrils is black; thence to the head covered with a yellow Membrane, under the chin yellow; the whole body is white, yet not so pure white as the **Swan**, for the middle of the back, and the smaller covert feathers of the wings are cinerous; sometimes a brown feather here and there is mixt with the white on the back; the legs and feet are of a dusky yellow, being bare of feathers a little above the Knees;

The **Swan Goose**, is between a **Swan** and a **Goose**; it hath the back of a dark grey, Belly white, breast and throat of a reddish brown; a line or list of dark brown runs all along the ridge of the neck from the head to the back, the tail and wings of the same, the Bill black, a line of white is between the eyes and Bill; the feet red, and in some the Bill too, it walks with its neck erected.

G a Fesse between 3 Swans A born by *Phillip ap Rys of Wales*.

A demy Swan to the Sinister, the Wings expanded, is the crest of *Wildberg*.

A 3 Swans, wings disclosed S born by *Folgnardby*.

G a Swan A membered S born by *Guilster*.

G 3 Swans A born by *Barn rip*.

B 3 such, wings disclosed proper, born by *Swan*.

B a Swan to the Sinister A Billetee O born by *Riet*.

G the like, Wings expanded A is the coat and crest of *Truthingen*.

B a Swan A a Bordure O by *Mansen van Mansenburg*, of *Alfaria*.

O a Swan fans feet A quartered by *Fortenbach*.

G on a Mount in Base V a Swan fans legs, Wings sepulture O with a stone Ring in his Beak B by the name of *Grenpen*.

☞ All Water Fowl have short tails, wherein Nature's Provider hath ordered it so, that their Tails shall not be any Impediment to them in their Swimming, Diving or running. And that all Fowl that have long

long Legs, do in their flying stretch forth their Legs at length to their Tails; but such as have short legs do truss their feet to the middle of their bodies.

V. He beareth Sable, a **Swans Neck erased**, Argent. All Erasing of Birds heads are generally from the lower part of the Neck, with a part of the Breast to it, and so it is in the **heads coupé**.

¶ All other Birds save the Swan, are Blazoned such or such a head erased or coupé; but the Swan by reason of his long Neck is termed a Swans Neck (not Head) erased or coupé.

S 3 such coupé, born by the name of *Squire*.

A Swans Neck A is the crest of *Omarshalk* of *Barvria*.

B 3 Swans Necks erased, is born by *Baker*.

S 3 such erased A is born by *Colley*.

B 2 Swans necks coupé at the Breast respectant A born by *Van Niebelj*.

a Swans Neck A Gutte de sang was the ancient crest of *Leicester* of *Tabley*.

VI. He beareth Vert, a **Truon oberture**, Argent, Beaked and Membred, Gules. This is a Bird like a Swan, and Brayerh with his head in the Water like an *Ais*. It is also called an *Onocrotulus*, from the voice of an *Ais*. This Figure is given me by Mr. *Boswell*, pag. 24. but the true shape and description; see num. 24. 25.

G a Truon A born by *Truon*.

G the like, Wings disclosed A born by *Van Lappiter*.

G per Base Barry of 4 A and G on a Coronett, a Truon gorged and crowned with the same O born by *Van Lappitz*.

VII. He beareth Argent, a **Pen-Twin**, Azure. Born by *Penguin*. It is said to be half a Bird, and a tail like a Fish; it hath no Wings, but two small skinny Fins hanging down by their sides like two little Arms, the upper side of the Body is covered with black Feathers, and the under side with white; the neck hath a ring or collar of white Feathers, the Bill and Feet flat and black, having no back Toe: See another description of this Bird, chap. 13. num. 45.

VIII. He beareth Sable, a **Stork**, Argent, Beak and Legs, Gules. The natural colour of the common or white Stork; the head, neck and fore part is white, the rump and out-side of the Wings is black, the Belly white; the quill Feathers of the Wing black, the tail short and white; the bill long and sharp pointed, red; the legs long, and bare above the knees, and red; the Toes from the divarication to the first joint, connected or joined together by an intervening Membrane, the claws are broad like the Nails of a Mans hand; the Vertebres or joints in the Neck are fourteen.

The **Black Stork** hath its head, neck, back, and wings all black, with a certain glose of Blew or Purple, and Green; Breast, Belly and Sides are White, the Bill green, the legs and feet green; yet some have the orbits

of the eyes, the whole Bill, Legs and Feet, red, or scarlet colour.

The **American Stork**, or **Brasilian Vaguar**; it is like a **Stork** in figure, the Bill half next to the Head, is of a yellowish green, the other half to the tip, of ash colour; white Eyes, with black pupil; and about them a Scarlet coloured naked skin, the like also near the rise of the Bill, or between the Bill and the Throat, which when it is angry, it lets fall like a Gill, or Wattle. The Body all white, and at the lower part of the Neck, above the Breast, the Feathers are longer than the rest: the Tail is black, so are the Wings, near the Back; which hath a glose of green: the Legs and Feet red, like other **Storks**.

A a Stork S Beaked, and Leged, G born by *Starky*.

G a Stork regardant A Membred, G born by *Storke*.

G a Storke to the sinister Wings disclosed, A Membred. G the same on a Coronet, is the Coat and Crest of *Regall*.

S 3 Storks heads erased A born by *Warring*.

IX. He beareth Argent, a **Storke rising**, (or sur-giant) Sable; Beak and Legs, Gules. This might be blazoned a **Storke** proper, from the description of the **Black Storke**, mentioned in the fore-going example, num. 8.

Antiquity hath drawn the **Stork**, with a tuft behind the Head, but it is most properly thus without it, either on the Head or Breast. Again it hath anciently been depicted, with a bush Tail, like to the *Distrige*, when it naturally hath but a short bunting Tail, so short that the Wings being closed, or gathered up they covered all Tail.

B 3 Storks rising, proper. Born by *Gibson*.

V in the base Watery, a Stork by the brink thereof rising A by the name of *Starkwater*.

X. He beareth Or, an **This head, coupé**; **Erasing**, or **Jessant a Serpent**, proper. It is like to the **Storke** in shape, and is a Bird that eateth and devourerh **Serpents**, and therefore ever drawn in Herauldry, with a Serpent in its Beak. It hath a thick Bill, where it is joyned to the Head, but pointed at the end, and a little crooked, or arched, and wholly red: as are also the Legs which are long, and are little naked about the Knees. The Plumage is all over black. This is born by the name of *Carall*.

A 3 such proper. Born by *Meerthig*.

XI. He beareth Azure, a **Crane**, proper. Born by the name of *Crane*. Antiquity hath made this a bush Tail, like to a **Capon**, whose draught I have too much followed, though naturally it hath a short **Pendant**, or **Dropping tail**: much like the **Storke**. Whose description take thus: the Bill is straight sharp pointed, and of a dark greenish colour; the top of the Head black, being from the Bill to the hinder part of the Head, covered with black hairs, or bristles, rather than Feathers. On the back of the Head it hath a space, or bed, of the figure of a **Cressant**, bare or thin set with hairs, and of a

K k 2

red

red colour. Below which on the upper part of the Neck is a triangular spot, of ash-colour Feathers. Two white lines, or stroaks, from each Eye, descends down the sides of the Neck, and meet behind, the fore-mentioned white triangle spot, and thence continues all the back part of the Neck. The Throat, and part of the fore-most part of the Neck, of the same black hue. The Quill feathers, and utmost pinion Feathers are black, all the rest of the Body is ash-colour: the Tail is small and short, hanging down all of a brown, or cinereous colour, with black tips: the Legs are black, bare of Feathers above the Knees. The Toes black and very long, joyned together at the first joynt, by a thick Membrane.

The **Indian Crane**, is in all respects and colours, like the common **Crane**, only that in this, the top of the Head from the Bill to the Crown is bare of Feathers, and of a red colour.

The **Himantopus**, or **Loipes**, is of the form of a **Crane**, having long Legs and Bill, and a short Tail: its Belly, and Breast, and under side of the Neck white; the Head about the Eyes is black, and under white: the Back and Wings, black; the Tail above, ash-colour, and under white; the Bill black, the Legs and Feet of a Sanguine colour, bare about the Knees. The Toes of an equall length and short, wanting a hinder Toe, therefore unfit to stand upright, but with a cringing or bending in the Knees; Claws black.

The **Sea Pye**, or **Hematopus**, hath a long straight Bill sharp at the end, red: Eyes and Eye-lids of a curious red, Legs and Feet long and red; it wants a Back-toe. The Toes half way joyned by a Membrane or Skin: Claws black. The Head, Neck, Back and to the middle of the Breast, black; the rest of the Breast, Belly and Rump white, Tail the lower half white, the upper black: Wings black, with a white cross bare, made by the covert Feathers,

S 3 Sea Pyes proper. Born by *Atcliff*.

A on a Hill in base out of Saggs V a Crane to the sinister, with a Fish in its Bill, proper. By *Van Eicke*.

B a Crane A born by *Dobrinkie*. Holding up its right Foot. By *Schilmatz*.

G the like A by *Cranigperg*.

B a on a Hill out of the base V the like to the sinister A by *Westendorf*.

V a Crane pointing his Beak to the dexter side, A by *Utzlingen*.

A a Crane G born by *Ufheim*. Whose Crest is a Crans Head, both to the sinister.

V a Crane A with a stone Ring in his Beak O by *Crenchel*.

A Crane standing in Saggs with Spear heads, proper. Is the Crest of *Barnston*, alias *Barnar Aston*.

XII. He beareth Argent, a **Falcinellus head coup-ed**, proper. This may be in English called a **Sith-Bill** from the bending of its Bill after the manner of a Sith: its shape is in all respects like a **Crane**, or **Curlew**; the whole Body is of a spadiceous colour, tending to dusky, but the Neck and Breast are spotted, with certain oblong dusky spots. In the middle of the Back, Wings, and Tail is a kind of glosse green dark colour;

*

the Bill is black, so is the Thighs as far as bare, with the Legs and Feet, which are of a good length. This is born by the name of *Crook*.

The **Byzilian Curicaca**, the Bill is crooked and sharp pointed, and of a dusky fiery colour; the Feet and Legs long and cloven, red; Claws black. The Plumage of Head and Neck white, mixt with yellow; in the upper side of the Neck the Feathers long; the circle of the Eyes yellow, Pupil black: about the Eyes and Throat there is a black skin. The Back and Belly ash colour, and middle of the Wings white, mixt with grey; all the rest of the Body and Tail, black. The Thighs are but half Feathered: there is another sort of these called **Daituitui**.

The **Suara**, it hath the like crooked Bill, long and of a whitish ash colour; black Eyes, a long crooked Neck and Head, and whole Body covered with Feathers of an elegant Scarlet colour, onely the ends of the Quill Feathers are black. The Tail long, the Thighs half bare, without Feathers, and of a light grey. It is by some Authors called an **Indian Curlew**.

The **Water Raven**, or **Acacalot**: the Bill bends like a bow, and is blew: the Legs long, Feet cloved into four Toes, and blackish; the Claws blacker: the Eyes black, the circle about Sanguine, from the Eyes to the Bill bare of Feathers and reddish: the Head and Neck of a dusky white and green Feathers, and some yellowish: the Wings are also of a shineing changeable colour, which varies according to the reflection of the Sun-beams: the Breast, Belly, and Tail, are dusky with red intermingled.

The **Crex**, hath a long crooked Bill black, also black Legs and Head; but the Neck, Back, and Breast, are white, the rest of the upper parts ash colour: the Wings are blackish, crossed on both sides by a white line, near the ponion, or ridges: his voice is like the sound, *Crex*, *Crex*.

A 3 Sythe Bill Heads coup-ed S born by *Moerburg*.

A a Water Raven, proper. Born by *Norton*.

O 3 such Heads coup-ed. Born by *Leighby*.

XIII. He beareth Azure, the Head of an **Avocetta** proper, it is from the reflectedness of its Bill, termed a **Recurvirostra**; Which we may very well English, a **Turnbill**. It turns upwards, and ends in a slender weak point, and black: the Head round as a Ball, black; with the fore-part grey. The hinder half of the Neck is black, the Throat and fore-part of the Neck, Breast and Belly, white; the Back partly white, partly black: the Quill Feathers are at the ends, half way black, the rest white; as also the Feathers of the second row; the rest of the covert Feathers to the ridge, are black: which makes in the Wing a broad bed of white, not directly cross the Wing but oblique. On the Back it hath two black stroaks, beginning at the Shoulders, and meet at the middle of the Back, and from thence they run in one to the Tail: the Tail is all white, the Legs are long, of a fair blew colour; bare of Feathers above the Knees; Claws black, with a very small Back-toe, the fore-most Toes are long and joyned together with a skinny Membrane, to the outermost joynts; the Skin being cut in (as it were) between the Toes. Three such is born by the name of *Binder*, or *Bender*.

XIV.

XIV. He beareth Sable, an **Heron** (or an **Ardea**) or **Heart** proper. This is called also, an **Heronshaw**: it hath a long straight Bill and sharp pointed, of a yellowish green colour: the Eye-lids, and the space between the Eyes and Bill green: the Legs and Feet are green, the Toes long and open, the out-most being joynted to the middle Toe, by a Membrane below. The fore-part of the Head white, from the Crown succeeded a black parcel of Feathers, hanging backwards; The Chin white, the Neck long ash colour behind, and white before, tinged with red, and delicately painted with black spots. On the lower part of the Neck grew small long narrow white Feathers, which covered the Back and are variegated with long whitish lines tending downwards; the lower part of the Breast and Rump yellowish. The prime Feathers of the Wings are ash colour, the Bastard wing black, which are covered at the root with white Feathers. Then the second row of Wing Feathers are black: and the Basis, or Ridge of the Wing, white: the Tail is ash colour, being round at the end, reaching but little behind the points of the Wings. 3 such born by *Heron*.

The **Ash-coloured Heron**, hath the Bill of a Rose colour, and white; Eye yellow; the Head, Neck, Back and Wings of a dusky ash colour, all the ends tip with red; the Wing feathers have white tips, so hath the Tail: the Breast besprinkled with long red, black and white spots, the Belly white, the Thighs reddish: the Legs and Feet greenish.

The **Great white Heron**, is white all over the Body, it hath no Crest or Tuft as the common **Heron**, the Bill yellowish, the naked place between the Eyes and Bill, green: Legs bare above the Knees, with the Feet and Talons are black.

The **Garzetta**, is the lesser **White Heron**. It is all over pure white, having from the hinder part of the Head, a short Crest or Tuft, hanging down: the Bill black, Eyes yellow, Legs green and scally.

The **Cirris**, or **Red Leged Heron**, it is between a Saffron, and Chestnut colour, deeper on the Breast and Belly, then on the Back; a very short Tail: the Pupil of the Eye compassed with a yellow, and that with another Scarlet circle. The Bill at the joyning to the Head green, then blew to the middle, from thence to the tip, black. The Legs and Feet of a deep red, Claws black, see its figure chap. 13. numb. 34.

The **Black Heron**, the shape in all respects answereth the **Heron**, only the colour of the Body all over is blackish, with a white Ring about its Neck, the Bill is yellow in the middle, and at the end, as well above as below.

The **Brasilian Heron**, hath the Bill serrat, or toothed above and below; dusky at the point, and of a yellowish green towards the rise; the Head and upper side of the Neck hath long Feathers, of a pale yellow, waved with black; the Throat and Neck before, white; the Breast and Belly is waved with brown, the Back and Wings dusky, waved with yellow: the Quill Feathers are mixt in equal parts of black and green, the tips white, the Tail the same: the Legs as other **Herons**.

G 3 such A born also by *Heron* of *Northumberland*.

A Cheveron Er: between 3 such A is also born by *Heron* of *Godmanchester* in *Huntingtonshire*.

*

S a Cheveron Er: between 3 such A by *Hern* of *London*.

S an **Heron** A. Born by *Heron*.

S 3 such A by *Heron*.

A 3 **Herons** heads erased S born by *Hernmay*.

B 3 such Heads A born by *Hernsich*.

XV. He beareth Azure, an **Heron Volant Overture** Argent, Beak and Legs, Gules. It is of some **Heraulds** termed **Volant in Fesse**. This is born by *Hernacle*.

Here note that all long Legged Fowl in flying thrust out their Legs to their Tail, but all short Legged Birds, draw them up to their Belly.

A such a **Heron Volant in Fesse**, B Membre, O between 3 Escallops S. Born by *Heronodon*.

XVI. He beareth Gules, a **Heron Sozant a lost**, in bend, Argent. Of others termed **Volant Overture** in bend. Born by *Hernlost*.

The **Small Brasilian Heron**, of some travellers, called a **Garza**: the Bill is dusky above, and of a yellowish white beneath; a yellow Eye, with a black Pupil, between the Eyes and Bill the skin is yellow, the Head is of a steel colour, mixed with pale brown, the whole Neck, Breast and Belly, are white mixt with cinereous or pale Feathers. The Back is black and partly of a steel colour, mixt with pale brown Feathers; the Wing Feathers are greenish, with white tips, the rest of the Wing is elegantly variegated with brown, steel colour, yellow or Wax colour, and ash colour: the Tail is covered with the ends of the Wings. The Legs are mingled with ash colour, and yellow, Claws brown. This Bird walks erect and stately. The *Brasilians* calls this Bird in their Language, a *Guira-tinga*.

XVII. He beareth Argent, a **Cormozant**, Sable. The proper description of its Body and colour is thus: The Bill is straight, hooked only in the tip of the higher mandible, having sharp dented edges, and black: the Legs are thick and strong, Feet and Claws black; it hath four Toes in each Foot all webbed together by a broad black Membrane, all standing forwards, the outwarmost longest, the rest in order shorter (which in **Herauldry** we have observed, quite contrary, by making the inner Toes longest, and the outward by degrees shorter) the Eyes brown, the Pupil black, the colour of the upper side is dusky, shining with an obscure tincture of green, the Breast and Belly white. The Quill Feathers, the tips of them and of the second row, are ash coloured. It hath a naked place round the Eye, from the Bill runing under the Throat, in form of a triangle, being partly Flesh colour, and part yellow. A Cheveron between 3 such is born by *Warberton*.

The **Shagge**, **Graculus Palmipes**, the **Palm-footed Crow**, or **Though**; made in all respects like the **Cormozant**, the Bill black, the neither mandible between green and yellow: all the higher side is of a black purple colour, or black with a dark tincture of green, shining like Silk. The under side is dusky, the middle of the Belly inclining to ash colour, the Chin white: the Wings reach but to the Basis of the Tail, the Feet and Legs as the **Cormozants**, the Skin of the Legs being cancellated, not scally, the Soles and back sides of the

the Legs black, Claws black.

The **Soland Goose**, hath not so long a Neck as the **Cormorant**, but in all other parts resembles it: for the Bill is long, straight, and a little crooked at the point, of an ash colour; behind the Eyes, the skin is bare of Feathers, the Mouth wide behind the Eyes; it hath no Nostrils, but instead thereof a furrow, or cranny, extended on each side all the length of the Bill; all the four Toes are webbed together, and stand forward, Legs Feathered down to the Knees, Legs and Feet black: they are generally coloured as a **Goose**, all over white, except the Quill Feathers, which are black. And the top of the Head, which with Age grows yellow. The Tail as short as the points of the Wings.

The **Sula**, is like the **Soland Goose** for Bodily shape: the Bill, only sharp pointed, and that about the Eyes it was black, it hath also shorter Legs and black: the Prime Feathers of the Wings black, so were the Covert, or top Feathers of the Tail. All the rest white, only the Back a little yellowish.

B a Cormorant A born by the name of *Cormoran*.

B 3 Cormorants O born by *Seamus*.

B a Chevron between 3 such Heads crazed, A by *Lushfield*.

A a Soland Goose proper. Born by *Goose*.

XVIII. He beareth Argent, an **Alcian**, or a **Kings-Fisher**, with an **Ele** in his **Beak**, all proper. Some term it a **Kings-Fisher** **Jessant** an **Ele**, proper. Other **Crasling** an **Ele**, proper. The **Kings-Fisher** is a fine lovely coloured Bird, it hath a black strong, long straight sharp pointed Bill; yet whitish in the Angles. The Chin white, with a mixture of red, the Breast and Belly the same; the lower Belly under the Tail is a deep red: with the sides under the Wings. From the Bill to the Eyes, and behind the Eyes, is a red Spot; to which succeeds a white mark, the Crown of the Head if of a black green, with cross lines of blew. From the Neck, through the Back, to the Tail, is a bright pale blew, very splendorous, which is crossed with obscure dark lines. The Quill Feathers are blew, the next row to them, tip with blew, the Basis of the Wing dusky; the Tail short and of a dark blew, the Legs and Toes before black, behind with the Back-toes red. The Toes stand two forwards and two backwards, as I have observed in the Bird, though other Authors mention it not.

The **Merops**, or **Bee-eater**, is like the **Kings-Fisher** in shape, the Bill black, the Irides of the eyes of a lovely red, the head great and oblong, the crown red, in some Birds having a mixture of green, the forehead next the Bill is a greenish blew, but in the middle between the nostrils white; from the corner of the mouth through the eyes is a black stroak; under the chin is bright pale yellow feathers, the neck and shoulders are green, with a certain mixture of red, the whole Belly and Breast are blew, which is deeper near the chin, and paler lower; the Wing feathers are the first ten blue tip with black; the next ten are orange colour tip with black; the covert wings are orange, those next the ridge or pinion of a bluish green, the long feathers springing from the shoulders of a pale yellow; the Tail longer than the Wings, the top feathers Blue, the under of a Dun colour, with the exterior Webs of a green, intermixt with Blue, the legs

and feet of a dusky red, the claws black; all the foremost toes are joined together to the first joint, as if they were but one toe.

The **Green Herops**, or the other **King of Bee-Eaters**, is somewhat longer than the precedent; the Bill like it, but more Sith like and black; the head, neck, breast, and almost the whole body yellow, from the Bill through the eyes is a great black spot or line; the back is chestnut colour mixt with green and yellow; the Wing feathers are painted with diverse colours, for the first or uppermost part next the ridge is blue; the second row of blue and yellow mixt; the third altogether yellow; the fourth or prime feathers black with red tips; the upper part of the tail a bright green, the lower yellow, so that the tail is half one and half the other colour, the feet yellow, and the claws black.

The **Water Owzell**, or **Water Crake**, the Bill is a little shorter and straighter than the precedent, it is sharp pointed and black; head and upper part of the neck of a dark dusky colour or black; a red eye, all the back and Quill Feathers, and covert feathers of the Wings are parti-coloured, of brown, black and blue, the middle parts of the Feathers being black, the edges blue; the forepart of the breast, and under side of the neck are white, the rump black; the eye-lids round about white, the tail a little longer than the Wings, which it will now and then flit up; the legs, feet and claws black. It is in some places called a **Water-Amzell**.

A such a Kings Fisher, Jessant and Elle proper, born by *Hallum*.

A 3 such proper, born by *V. n. Bufficker*.

O 3 such with a Fesse between B is born by *Katnick*.

XIX. He beareth Argent, a **Sea-Mew**, proper, Legs and Beak, Gules. Some term it a **Sea-Bill**, and some a **Sea-Pie**; but there is much difference in the colours, though little in the shape.

The **Sea-Mew**, hath a red Bill and red Legs, in some more blackish; the top of the head black, the upper side of the neck, back, tail, and lesser quill-feathers are ash-colour or bluish; the great quill-feathers are black, the Wings very long, reaching behind the tail, they are whole footed, having little or no hinder Toe.

The **Winter-Mew**, called also the **Cow-Maddy**, the Bill is whitish, the eyes Hazel colour; the head white, spotted with brown, the Neck brown, back cinereous, the long scapular feathers, varied with brown spots, rump white, the tail hath the tips white, then succeeds a black Bar, the rest of the tail white; the throat and under side of the body white; the quill-feathers have the outmost black, the other white only tip with black; the lesser covert feathers are brown and black mixt; the legs and feet dusky green, the back toe little, armed with a very small claw and black.

The **Sea-Bill**, the Bill white, but yellow towards the tip, bending towards the point; the feet of a pale green, claws black; the Membranes connecting the toes reach as far as the claws; the head and upper part of the neck are clouded with brown spots; the back ash-colour, the tail white, the throat and whole under side of the

the body white; the shoulders and upper coverts of the wings ash colour; the quill feathers are partly white and black in Bars, tipt with ash-colour; but them next the body were all ash-colour tipt with white.

The **Winter Mew**, is another kind of **Sea-Mew**, whose Bill is yellow with a black tip; the eye black compassed with a gold yellow circle, and it with a circle of black; and the black with a circle of white, and it with one of grey or ash colour; the head and breast cinereous and white particoloured; the belly more dusky; the wings and back are of mingled colours, as white, grey, brown; the quill feathers are dusky or blackish, and exceed the length of the tail, which is cinereous, except a cross bar of an inch near the end; the thighs cinereous; the legs and feet a pale yellow, claws black and crooked.

The **Brown Tern**, or **Ash coloured Mew**, is the last of the kinds of **Sea-Mews**; its Bill is a little bending and black; the back and wings of a deep ash colour or blue, the quill feathers brown, tipt at the ends white; the crown of the head in the hinder part black, all the rest of the body pure white, the legs, feet and membranes of a Saffron colour, claws black.

The **Great Gull**, or the **Black and White Gull**, or the **Sea Gull**; the Bill is something bending at the end, and yellow; the lower mandible bunched out into a knob, marked on each side with a double spot, the lower red, the upper black; the edges of the eye lids round about are of a Saffron colour; the head great and flat crowned; the neck short, breast, belly and tail white; the hinder part of the head, back and wings black; the quill feathers are tipt with white, the legs and feet white, it hath a whole foot, and a very small back toe, claws black; this is in some places called a **Huge Sea Gull**, and a **Swarthy-back**; the wings exceed the length of the tail.

The **Herring-Gull**, hath a yellow bill, with a red spot on the side of the Knob, on the lower mandible; the eye-lids round in some yellow, others red; its head, neck and whole under side, with the tail white; the back and wings (except the outward quill feathers) are of a dark ash-colour; which outward quill feathers had white tips; in some the quill feathers are particoloured of white, black and cinereous; the Wings when closed exceed the length of the tail and cross each other.

The **Pewit**, or **Black Cap**, called also the **Sea Crow**, or **Hire Crow**; it is a kind of cinereous or **Brown Gull**; the bill bending a little, of a Sanguine colour, eyes yellow, eye lids red above and below compassed with white; the head and throat of a dilute black; the middle of the back ash-coloured; the neck to tail white, the first quill feathers of the wing had the tips and edges white, the rest of the feathers black tips, all the rest of the wing ash-colour, which gathered together reach behind the tail, that is all Snow white; the Legs of a dark sanguine colour, the back toe small, the feet whole, claws little and black.

The **White Gull**, it is all over as white as Snow, yet the Wings have somewhat of ash colour; the eyes are great, compassed with a black circle, near the region of the ears is a black spot, its wings are longer than the tail, the legs, and feet and bill are all red; the ends of the wings are black.

The **Cornish Gannet**, called also a **Skua**; and

*

the **great Grey Gull**; the Bill is black, bending at the point, and is covered with a Skin from the basis of the bill to the Nostrils, as in Falcons or Land Birds of Prey; the Legs and Feet black, whole footed, without a heel or back toe, save a little stump, the claws crooked; the back is cinereous or brown like that of **Buzzards**, the Belly and under side paler; the quill feathers and the tail are black, all tipt in both with white; see chap. 13. numb. 71.

The **Catarracta**, or **Spotted Gull**; it is on the back variegated like a **Goshawk**, with brown, white and yellow mingled, on the under side it is all white, spotted with brown; the Bill is black and hooked; the wings even with the tail which is black; the hips covered with feathers to the Knees, the Legs, Feet and intervening Membranes cinereous; claws black and crooked.

The **Cornish Wagtail**, or the **Grey Gull**; the colour as well upper as lower parts is all grey (as in the back of a **Turlew**) being mixed with whitish and brown and ash-colour in the back and wings; the rump white, spotted with brown; chin white, the quill feathers all black; the tail is tipt with white, then succeeds a cross bar of black, two inches broad, the rest of the tail feathers are varied with transverse bars of white and black; the Bill is black, a little bending, the head great, the neck short, as in all **Gulls**, legs and feet white, the hinder toe small.

The **Cephus**, or **Spotted Sea Gull**, or **Mew**; the Bill is of a whitish colour, the edges red, at the top (which is hooded) black; the eyes red, encompassed with a white circle; the head, neck, breast, belly, thighs and rump are variegated with white and brown spots, with a mixture of bay or yellow; the wings black, tipt with yellow, the tail all black; the Legs and Shanks greenish, the feet and membranes connecting the toes dusky.

B three Sea Mews A born by *Floyd*, alias *Lloyd*.

A 3 Bars B on the middle 3 Sea-Mews, born by *Pennant*.

The same is the coat of *Ismyton Wyddell* of *Wales*.

O 3 Sea Gulls proper, born by *Cull*.

A a Sea Crow proper, born by *Crommester*.

XX. He beareth a **Drake** proper, in a Field Argent. This is termed also a **Duck**, a **Wild Drake**, or a **Shell-Drake**, or **Hallard**. They have their feet situate more backwards than other Water-fowl, which makes them go wadling; they have generally a broad and flat bill, and a short sharp pointed tail, the male of this kind having a feather turning up in the tail near the Rump; of these shape of Fowl there is several colours and much variety, as

The **Eider**, or **Ferryover Duck** hath a black Bill, with oblong Nostrils, from the Nostrils through the crown of the head, above the eyes, are two very black spots or stroaks tending to the hinder part of the head, which have a white line between them, ending in the upper part of the neck; the whole neck, lower part of the head, the back and wings all white; the quill feathers, the breast, rump and tail all black; the legs short and black, whole footed, with a back toe; which hath a skinny membrane also, the claws share and crooked. The **Pen** of this kind is all brown, speckled here and there with black spots; this is in some places called *St. Cuthberts Duck*.

The

The **Wild Duck**, and **Mallard**; the first is the Female, the later the Male: the Bill of the Male is greenish yellow, the upper Mandible hath at the end, a tip or nail; downwards: the Head, and upper part of the Neck, are of a delicate shining green, then follows a Ring of white; almost round the Neck: from the white Ring, the Throat is of Chestnut colour, down to the Breast: the Breast and Belly are of a white ash colour, bedewed or sprinkled, with innumerable dark specks: the under Tail is black, the upper side of the Neck, is cinereous or red, sprinkled with small spots: the Back red, the lower part still deeper colour to the Rump, which is black, with a gloss of purple: the lesser row of Wing Feathers are red, the long Scapular Feathers Silver coloured, the Quill Feathers the outmost ten, of a dusky or dark brown, the next ten have white tips, being of a shining purple blew colour, with a border of black, between the white and blew. The covert Feathers have (as it were) cross bars or lines over them, first black, and above that white: the Tail is white, mixt with brown; the reflected Feathers in the middle of the Tail, are black with a gloss of purple. They have a white lower Eye-lid: the Feet and Legs of a Saffron colour, Claws brown.

The **Duck**, or the Female to the **Mallard**, or **Drake**: hath neither green Head, or white Ring on the Neck, or red Breast; but the Back, Neck, and Head, are partly coloured, or white brown, and dark red: the middle of the Back the Feathers are dark brown, the edges pale red. The Breast and Belly lighter, spotted.

The **Gadwall**, or **Gray**: it is a kind of **Duck**, and **Mallard**, of a middle size: of some Authors called a **Hitelenten**. It is long Bodied, the Head inclines from blew to black, in the Throat the Feathers edged with ash colour, and a whitish red near the Breast: the lower part of the Neck, and upper part of the Breast and Shoulders partly coloured of black and white and red: that is to say, the edges or fringes of the Feathers reddish, then a black line of a Semicircular figure next it, within which is included another Semicircular white line, parallel to it, and in the white again a black: the Breast white, the Belly darker, with transverse black spots. The Back brown, the edges of the Feathers of a whitish red: its Chin and Cheeks white, speckled with brown: its Rump and Tail black, white underneath: the sides are curiously variegated with alternate black and white lines. The Quill Feathers have the first outward ten brown, the three next the tip with white, the four following have the outward webs black, tip with white: those next the Body are cinereous: the covert Feathers, are of a black purple shining colour: in the third row are spots, or red scattered. The Bill of a Saffron colour, with the middle part black: the Legs Feathered to the Knees, the Feet whitish, the hinder Toe small. The Membrane connecting the Toes, black.

The **Muggent**, hath a Bill and Legs and Feet of a Saffron colour, with the Membrane black: the Crown of the Head blackish, and so are the Wings which are shorter than the Tail: the rest of the Plumage all over, the Body is partly coloured, of a blackish fiery colour, and white, and Weale colour; almost like that of the **Partridge**, that is testaceous.

The **Wigeon** or **Whewer**: the Bill is of a Lead colour, with a black tip: the Feet of a dusky white, Claws black, short Back-toe. The Crown towards the Bill of a dilute colour, Head and end of the Neck red, upper part of

the Breast to the Wings deep red, with small black transverse lines; Back brown, edged Cinereous; Rump above black: Tail black, edges or sides whitish. Breast and Belly white, mixt with yellow: Thighs spotted with a reddish brown: the Quill Feathers, the first ten brown, next ten white tips, the rest purple blew: the covert Feathers next the Quills partly coloured, brown and white: the small Coverts are brown, or dark ash colour.

The **Craker**, or **Sea-Pheasant**; the Bill between a blew and black; the Head brown, behind the Eyes is a line of white, which passed down the side of the Neck to the Throat, all the Feathers between and adjoining to this stroak is black: under the black, the Neck and Back is ash-colour, varied with transverse lines of black and white; the scapular feathers are black, the nether part of the neck, breast, belly and rump, white; the quill feathers are for the first ten cinereous, the second decade, or ten quill feathers are particoloured, the tips white, then red, then black; the rest as remain or appear beyond the incumbent feathers are of a glittering purple and blue colour; the covert of the first row cinereous, of the second row, incumbent on the second decade of quill feathers, are tipped with a yellowish red or Lion colour; the Thighs have long feathers, which are elegantly varied with black and white transverse lines; the tail is forked, by reason the two middlemost run out in two points longer than all the rest, and are ash-coloured edged with white.

The **Brazilian Ipeca** = **Suacu**, is in shape and form a Duck, the Bill from the end to the middle yellow; rest darker, the middle of the head curiously tinged with red, the whole body else is pure white, it hath Ducks feet, of a yellowish red.

The **Sheldrake**, or **Burrough Duck**, called by some, a **Bergander**; its Bill is like a Duck, but turneth upward more at the end, is red all but the Nostrils, and the nail or hook at the end, which are black; at the base of the upper mandible near the head is a carnosous or fleshy bunch or knob; the head and upper part of the neck are black, with a shining dark green, the rest of the neck and region of the craw milk white; the upper part of the breast and shoulders are of a fair Orange or bright Bay colour (the forepart of the body is encompassed with a broad ring or swath of this colour) the rest of the breast and belly is white, having a black line running through the middle of the white to the vent or rump; the middle of the back is white, the shoulder feathers black; the Wing feathers are all white; the Pinion or joint feathers have black edges; and the ten first quill feathers are black; and those on the second row incumbent on them, tinged with a dark shining green; the tail is white, tipped with black; the legs and feet of a pale red or flesh colour.

The **Island Duck**, called by the *Islanders* **Wahida**, or the **Sharp tailed Duck**; the head is small, having white feathers about the eyes; the crown is black, inclining to brown; the neck and back to the rump black, with a mixture of Isabella colour; the rump is mingled black and white, the tail ends in a sharp point made by two feathers of a good length of the same colour; the under side of the Neck and Belly half white, black, the rest white; the feathers of the upper surface of the Wings are of a shining purple black; the Bill is like the common Duck, toothed; the tip and partment

the Head, black, the middle red: the Feet brown, Claws and Membranes between the Toes black.

The **Scoter**, or **Black Diver**, it is all over of a black, or Sable colour, in the Chin and middle of the Breast, some ash coloured, or whitish Feathers, mingled with the black. The Bill is black, with yellow about the Nostrils, as is in all Ducks kind, pectinated about the sides, and without any bunch in the upper mandible: the Feet black, the Male of the **Diver**, hath yellow Eyelids, the Bill is broad and blunt, having no appendix or nail at the tip: the upper mandible above the Nostrils, bunches out into a notable protuberance, or swelling, being so divided in the middle, as it resembles Buttocks: distinguished by a yellow intercurrent line. The upper mandible is black about the sides, or edges, and yellow down the middle, so broad as to contain the Nostrils, and the Feet dusky, the outer Toes having also membranous borders on the out sides; so that its Oars are broad and large.

The **Pochard**, or **Poker**; of some termed the great **Red Headed Algeon**. The Bill is Lead colour, tipped with black; lower Chap black: the Feathers of the Fore-head lie on the top of the Bill like a Peak, or Acute angle: the circle of the Eyes a flame colour: the Head and Neck of a deep red, or fulvous colour, the middle part of the Breast white; the sides and lower part of the Belly, as the Back, varied with transverse undulated lines, but paler: the lower part of the Neck is encircled with a ring or swath of black: the Tail is short, covered with the Wings and is of a dark grey. The Quill feathers are all cinereous tipped with black, and the middle ones with white; the Covert feathers are varied as on the Back, with dark brown & cinereous waved lines (or ash colour, with very narrow waved cross dusky lines) The Rump both above and below is black: so that the Tail is circled round with black. The Feet are lead colour, the membranes joining the Toes, black. The inmost Toe, and the Back Toe, which is very small, have borders, or fins annexed to them.

The **Morillon**, or lesser **Red headed Duck**: the Bill dark blew, paler about the edges, and tip: the tip or nail round and black; the Nostrils long, almost scituate in the middle of the Bill. Eyes white, Pupil black, Head all red: in the angle of the lower mandible is a white spot, the Neck encompassed in the middle with a ring of brown; the whole Back, and Covert feathers of the Wing, of a dark brown, all the Quill feathers are white, with brown tips: except the four outmost, and the four inmost: the Tail is short, and ends in a point, is of a brown or dusky colour. The Breast below the ring is red, the rest of the Breast and Belly is white; towards the Vent or Rump, dusky or dark grey: under the Tail white. The Legs, Feet, and Membranes black, the back Toe hath a broad appendant Membrane or Fin, as in the rest of this kind. Yet *Bellonius* describes the **Morillon**, or **Clautum**, thus. It hath its Bill cut in the edge like a Saw, its Legs and Feet, red on the middle, dusky on the out side; the whole Head to the middle of the Neck, of a deep ferrugineous, or red: under it a broad Ring of white, round the Neck: the Breast ash colour, Belly white, Back and Wings black, the Wing stretched out hath white Feathers appears in it, like to the **Pye**. The Tail is black.

*

The **Golden Eye**, it hath a great round Head and high Fore-head, a short and broad Bill not so much elevated, as in other Ducks: all black to the angles of the Mouth. The Head is dark green or changable colour, of black purple and green. At the corner of the Mouth is a white spot, round, as big as three pence. Iris of the Eye yellow, or Gold colour. The whole Neck, Shoulders, Breast and Belly, all white; the space between the Shoulders, all the Back, and Tail; are black. The Ridge of the Wings, and the Quill feathers all black: and the second and third row of Covert feathers all white. The Legs and Feet of a Saffron colour, or reddish yellow, the Membrane black.
